

<b>Od Redakcji . . . . .</b>	<b>7</b>
<b>II Krajowy Kongres Biotechnologii</b>	
<b>Prace przeglądowe</b>	
M. SIERANT, A. OKRUSZEK Ciąłka inkluzyjne i ich wykorzystanie do otrzymywania rekombinowanych białek w systemie ekspresyjnym <i>Escherichia coli</i> . . . . .	9
H. M. ŻBIKOWSKA Nerka i pęcherz moczowy transgenicznych zwierząt jako bioreaktory? . . . . .	20
L. KĄTSKA-KSIĄŻKIEWICZ Pozaustrojowe uzyskiwanie zarodków bydlęcych – technologia i zastosowanie praktyczne . . . . .	32
M. LEBKOWSKA Biologiczne związki powierzchniowo czynne i ich zastosowanie do oczyszczania gruntów z produktów naftowych . . . . .	43
M. BIZUKOJĆ, S. LEDAKOWICZ Od obrazu mikroskopowego mikroorganizmu do modelu matematycznego jego wzrostu . . . . .	54
M. KLIMEK-OCHAB, A. OBOJSKA, B. LEJCZAK Mikrobiologiczna degradacja związków fosforoorganicznych zawierających wiązanie C-P . . . . .	68
A. MAJ, L. ZWIERZCHOWSKI Struktura, funkcja i polimorfizm genu receptora hormonu wzrostu zwierząt i człowieka . . . . .	85
K. WASINKIEWICZ, J. WOJTERA, B. TOMASZEWSKA Transformowanie roślin w celu ich wykorzystania w fitoremediacji terenów zanieczyszczonych metalami ciężkimi . . . . .	108
J. PODĘDWRONA, M. ŻUBROWSKA-SUDOL Przegląd stanu wiedzy w zakresie biochemicalnych przemian azotu w procesie oczyszczania ścieków . . . . .	127
A. PILISZEK Chimerowe zarodki ssaków: powstawanie i wykorzystanie . . . . .	142
<b>Prace eksperymentalne</b>	
	
A. GERSZBERG, V. K. MACIOSZEK, P. ŁUCHNIAK, A. K. KONONOWICZ Evaluation of competent embryo production and conversion potential in callus cultures initiated <i>in vitro</i> from leaf explants of six sweet potato [ <i>Ipomoea batatas</i> (L.) Lam] genotypes . . . . .	156
W. PODGÓRSKI Monitorowanie aktywności metabolicznej <i>A. niger</i> w procesie sterowania biotransformacją glukozy do kwasu glukonowego w systemie <i>on-line</i> . . . . .	169
W. PODGÓRSKI, W. LEŚNIAKI Wnikanie tlenu w procesie biosyntezy kwasu cytrynowego w bioreaktorach STR o pojemności 7 i 15 000 dm <sup>3</sup> . . . . .	187
K. MAZURKIEWICZ-ZAPAŁOWICZ, W. MICHALCEWICZ, R. MIĘTKIEWSKI, K. JANOWICZ, L. DARAŻ Wpływ herbicydu Attribut 70 WG na aktywność fizjologiczną wybranych grzybów entomofagicznych . . . . .	201

M. WIELANEK, H. URBANEK, H. MAJOROWICZ Endogenous hydrolysis of glucotropaeolin to benzyl isothiocyanate in hairy root cultures of <i>Tropaeolum majus</i> L. . . . .	<b>210</b>
M. D. GAJ, M. CZUBIN Efficiency of direct somatic embryogenesis in <i>Arabidopsis thaliana</i> (L.) Heynh. under various <i>in vitro</i> culture conditions . . . . .	<b>221</b>
E. KOCHAN, G. GADOMSKA, H. WYSOKIŃSKA, A. CHMIEL Zawartość ginsenozydów w kulturach komórkowych <i>Panax quinquefolium</i> . . . . .	<b>236</b>
A. MROZIK, S. ŁABUŻEK, Z. PIOTROWSKA-SEGET Changes in cellular fatty acid composition induced by phenol and catechol in <i>Pseudomonas vesicularis</i> and <i>Pseudomonas stutzeri</i> . . . . .	<b>244</b>
A. DEMCZUK, J. KOWALEWSKA-PIONTAS, W. BEDNARSKI Próby stymulacji zewnętrzkomórkowego wydzielania beta-galaktozydazy syntetyzowanej przez drożdże <i>Kluyveromyces fragilis</i> 28 . . . . .	<b>253</b>
J. MICHALIK, L. ZWIERZCHOWSKI, L. STROKOVSKAYA, E. SZOŁAJSKA Biologically active recombinant human prolactin synthesised and secreted extracellularly in baculovirus expression system . . . . .	<b>260</b>
H. ZŁOTKOWSKA, J. CZAKAJ, A. KRAKOWIAK Wytwarzanie kwasu L(+) mlekowego przez wybrane szczepy bakterii z rodzaju <i>Lactobacillus</i> w pożywce z serwatką . . . . .	<b>274</b>
P. KRZYMIŃSKI, H. DŁUGOŃSKA Mysia rekombinowana interleukina 2 – ustalenie optymalnych warunków wytwarzania i oznaczania aktywności <i>in vitro</i> . . . . .	<b>284</b>
<b>Raport</b>	
J. DŁUGOŃSKI, A. PODHAJSKA Kształcenie biotechnologów . . . . .	<b>291</b>
<b>Sprawozdanie</b>	
K. KASPRZAK V Konferencja „Ekologiczne i gospodarcze znaczenie dżdżownic”, (Rzeszów, 25-26 września 2003 r.) . . . . .	<b>293</b>

<b>Editorial</b>	7
------------------	---

## **2<sup>nd</sup> Polish Biotechnology Congress**

### **Review Papers**

M. SIERANT, A. OKRUSZEK

Inclusion bodies and their application for the production of recombinant proteins in <i>Escherichia coli</i> expression system	9
--	---

H. M. ŻBIKOWSKA

The kidney and the bladder of transgenic animals as bioreactors?	20
--	----

L. KĄTSKA-KSIĄŻKIEWICZ

<i>In vitro</i> embryo production in cattle – technology and practical application	32
--	----

M. LEBKOWSKA

Surface active substances and their applications for oil pollutants removal	43
---	----

M. BIZUKOJC, S. LEDAKOWICZ

From a microscopic image of a microorganism to the mathematical model of its growth	54
---	----

M. KLIMEK-OCHAB, A. OBOJSKA, B. LEJCZAK

Microbiological degradation of organophosphorous compounds containing C-P bond	68
--	----

A. MAJ, L. ZWIERZCHOWSKI

Structure, function, and polymorphism of the growth hormone receptor gene in humans and in animals	85
--	----

K. WASINKIEWICZ, J. WOJTERA, B. TOMASZEWSKA

Plant transformation for phytoremediation of heavy metals polluted soils	108
--	-----

J. PODĘDWRONA, M. ŻUBROWSKA-SUDOŁ

Review of a state of know-how on the biochemical changes of mineral nitrogen during waste water treatment process	127
---	-----

A. PILISZEK

The production and use of mammalian chimeric embryos	142
--	-----

### **Experimental Papers**

A. GERSZBERG, V. K. MACIOSZEK, P. ŁUCHNIAK, A. K. KONONOWICZ

Evaluation of competent embryo production and conversion potential in callus cultures initiated <i>in vitro</i> from leaf explants of six sweet potato [ <i>Ipomoea batatas</i> (L.) Lam] genotypes	156
---	-----

W. PODGÓRSKI

On-line monitoring of <i>A. niger</i> metabolic activity in biotransformation of glucose to gluconic acid	169
---	-----

W. PODGÓRSKI, W. LEŚNIAK

Oxygen transfer during citric acid biosynthesis in 7 and 15 000 liters stirred tank reactors	187
--	-----

K. MAZURKIEWICZ-ZAPALOWICZ, W. MICHALCEWICZ, R. MIĘTKIEWICZ, K. JANOWICZ, L. DARAŻ

The effect of Attribut 70 WG herbicide on physiological activity of selected entomophagous fungi	201
--	-----

M. WIELANEK, H. URBANEK, H. MAJOROWICZ Endogenous hydrolysis of glucotropaeolin to benzyl isothiocyanate in hairy root cultures of <i>Tropaeolum majus</i> L. . . . .	<b>210</b>
M. D. GAJ, M. CZUBIN Efficiency of direct somatic embryogenesis in <i>Arabidopsis thaliana</i> (L.) Heynh. under various <i>in vitro</i> culture conditions . . . . .	<b>221</b>
E. KOCHAN, G. GADOMSKA, H. WYSOKIŃSKA, A. CHMIEL Ginsenosides contents in <i>Panax quinquefolium</i> cultures . . . . .	<b>236</b>
A. MROZIK, S. LABUŽEK, Z. PIOTROWSKA-SEGET Changes in cellular fatty acid composition induced by phenol and catechol in <i>Pseudomonas vesicularis</i> and <i>Pseudomonas stutzeri</i> . . . . .	<b>244</b>
A. DEMCZUK, J. KOWALEWSKA-PIONTAS, W. BEDNARSKI Trials of stimulation of extracellular secretion of beta-galactosidase synthesised by <i>Kluyveromyces fragilis</i> 28 . . . . .	<b>253</b>
J. MICHALIK, L. ZWIERZHOWSKI, L. STROKOVSKAYA, E. SZOŁAJSKA Biologically active recombinant human prolactin synthesised and secreted extracellularly in baculovirus expression system . . . . .	<b>260</b>
H. ZŁOTKOWSKA, J. CZAKAJ, A. KRAKOWIAK Production of L-lactic acid from whey by selected <i>Lactobacillus</i> strains . . . . .	<b>274</b>
P. KRZYMIŃSKI, H. DŁUGOŃSKA Mouse recombinant interleukin 2 – determining optimal conditions of production and activity evaluation <i>in vitro</i> . . . . .	<b>284</b>
<b>Reports</b>	
J. DŁUGOŃSKI, A. PODHAJSKA Education of biotechnologists . . . . .	<b>291</b>
K. KASPRZAK 5 <sup>th</sup> Conference "Ecology and economy of earthworms", (Rzeszów, 25-26 September 2003) . . . . .	<b>293</b>

the first time in history that the majority of people in the world are not members of the dominant religion. This is a remarkable development that has important implications for the future of the world.

The shift in religious composition is particularly significant in the United States, where the majority of the population is now non-white. This is a major change from just a few decades ago, when the vast majority of Americans were white. The shift in religious composition is also reflected in the changing nature of religious practice in the United States, with many people now identifying as "spiritual but not religious".

The shift in religious composition is also reflected in the changing nature of religious practice in the United States, with many people now identifying as "spiritual but not religious". This is a major change from just a few decades ago, when the vast majority of Americans were white. The shift in religious composition is also reflected in the changing nature of religious practice in the United States, with many people now identifying as "spiritual but not religious".
