

## Fungal culture collection (FCL — current list)\*

*Krzysztof Grzywnowicz*

*Andrzej Leonowicz*

Zakład Biochemii

Uniwersytet Marii Curie-Skłodowskiej

Lublin

**F**ungal Culture Collection of Biochemistry Department of the Maria Curie-Skłodowska University in Lublin, in Poland (FCL — Fungal Collection Lublin) is the university collection and was established as a depository for scientific fungal cultures\*\*.

The list of fungi is written in an alphabetical order. The fungi are listed under their teleomorphic (perfect or sexual) names, and only some species are listed in the anamorph (imperfect or asexual state). The following information is given for each strain: the scientific name, the FCL number, the acronym of a collection from which the strain was obtained and the number in this collection (if known).

All the strains are preserved as actively growing cultures on agar slants at 5 – 7°C. Most of fungi in FCL are wood-dependent or wood-destroying fungi. Some of them are edible mushrooms. The main investigations carried out in the Depart-

---

\* The first edition of FCL appeared in ABC, 1991, 1, 29 – 34. The second edition of FCL appeared in ABC, 1992, 2/6 – 7, 293 – 306.

\*\* Fungal Culture Collection of Biochemistry Department of the Maria Curie-Skłodowska University in Lublin as FCL is now registered in Information Centre for European Culture Collections, Braunschweig, Federal Republic of Germany.

ment of Biochemistry are the biochemistry, enzymology and ecological role of wood-rotting fungi, and the cultivation of some of them for food or feed production.

Abbreviations of collection names:

- AMD — Agricultural Microbiology Department, Agriculture Academy, Cracow, Poland;
- ATCC — American Type Culture Collection, Rockville, Maryland, USA;
- BIAU — Botanisches Institut der Ernst-Moritz-Arndt Universität, Greiswald, Germany;
- BIUR — Botanisches Institut II der Universität Regensburg, Regensburg, Germany;
- CBS — Centraalbureau voor Schimmelcultures, Baarn, Holland;
- FAT — Professor T. Fukuzumi, Agriculture University, Tokyo, Japan;
- FCTUA — Forest Products Chemistry Laboratory, Tokyo University of Agriculture, Tokyo, Japan;
- FIE — Forstwissenschaften Institut, Eberswalde, Germany;
- FIUB — Forstbotanisches Institut der Universität Gottingen, Gottingen, Germany;
- FPD — Forest Pathology Department, Agriculture Academy, Cracow, Poland;
- FPL — Forest Products Laboratory, Forest Service US Department of Agriculture, Madison, USA;
- IFO — Institute for Fermentation, Osaka, Japan;
- ITAT — Institute of Technology and Chemical Engineering, Technical-Agriculture Academy, Bydgoszcz, Poland;
- LAB — Lehrstuhl für Allgemeine Botanik, Ruhr Universität, Bohum, Germany;
- LAPU — Laboratory for Anatomy and Physiology of Plants, the I. E. Purkyne University, Brno, Slovakia;
- LSM — Laboratory of Soil Microbiology, the Pennsylvania University, Pennsylvania, USA;
- MFP — Museum of Fungi, Paris, France;
- SBD — Soil Biochemistry Department, Braunschweig, Germany;
- SFP — Swedish Forest Products Research Laboratory, Stockholm, Sweden.

List of fungi in the FCL:

- Abortiporus biennis* (Bull. ex Fr.) Sing.  
123 BIUR (T 060)
- Agaricus arvensis* (Schaeff. ex Fr.)  
63 CBS (23852)

- Agaricus bisporus* (Lge.) Sing.  
 64 CBS (23853)  
 114 BIUR (T 019)  
*Agaricus campestris* (L.) Fr.  
 65 CBS (24152)  
*Agrocybe cylindracea* (D.C. ex Fr.) Maire.  
 182 FCTUA (Ac-1)  
*Agrocybe dura* (Bolt. ex Fr.) Sing.  
 115 BIUR (T 020)  
*Amanita rubescens* (Pers. ex Fr.)  
 66 CBS (10734)  
*Armillariella mellea* (Vahl. in Fl. Dan. ex Fr.) Karst.  
 14 FPD (5040)

## Systematics and names of fungi in FCL

Names are given in Polish, German, French, English and Japanese (if known). The letter E means edible mushrooms.

**Class** *Basidiomycetes*  
**order** *Poriales (Aphyllophorales)*

### **family** *Corticaceae*

- Phlebia radiata* — żylak promienisty, Orangeroter Kammpilz,  
*Phanerochaete chrysosporium* — korownica złotozarodnikowa, (anamorph  
 — *Sporotrichum pulverulentum*),

### **family** *Stereaceae*

- Stereum hirsutum (Trametes pubescens)* — skórnik szorstki, Striegeliger Schichtpilz, sterée hirsute,  
*Stereum chailetti (Amylostereum chailetti)*,  
*Stereum taxodii*,

### **family** *Coniophoraceae*

- Serpula lacrimans (Merulius lacrimans)* — stroczek domowy, Echter Hausschwamm, mérule pleureuse, dry-rot fungus,

### **family** *Hymenomytaceae*

- Inonotus obliquus* — włóknouszek ukośny, Rostporling,  
*Inonorus radiatus* — włóknouszek promienisty, Knötenformiger-Rostporling,  
*Phellinus contiguus (Poria contigua)*,  
*Phellinus igniarius (Polyporus igniarius, Polyporus foeniculacens)* — czyreń ogrodowy, Falscher Zunderschwamm, faux amadouvier,  
*Phellinus pini (Xanthochrous pinii)* — czyreń sosnowy, Kiefern-Fenerschwamm, phellin des pins,

**family** *Schizophyllaceae*

*Schizophyllum commune* — rozszczepka pospolita, Spaltblättling, schizophylle commun, split-gill,

**family** *Ganodermataceae*

*Ganoderma lucidum* — lakownica lśniąca, Glänzender Lackporling, polypore luisant, Mannenntake,

**family** *Poriaceae*

*Bjerkandera adusta* (*Polyporus adustus*) — szaroporka podpalana, Angebrannter Rauchporling,

*Bjerkandera fumosa* (form of *B. adusta*),

*Tyromyces palustris* — Oouzuratake,

*Tyromyces pubescens* — Yakiftake,

*Spongiporus guttulatus* (*Postia guttulata*, *Tyromyces guttulatus*) — białak lżawiący, Saftporling,

*Spongiporus fragilis* — białak kruchy,

*Fomes fomentarius* — hubiak pospolity, Zunderschwamm, polypore amadoovier, hoof fungus,

*Heterobasidion annosum* (*Fomes annosus*, *Ungulina annosa*) — korzenowiec wieloletni, Wurzelschwamm, root fomes,

*Trametes sanguinea* — Hiirotake,

*Trametes versicolor* (*Polyporus versicolor*, *Coriolus versicolor*, *Polystictus versicolor*) — wrośniak różnobarwny, Bunte Tramete, polypore versicolore, many-zoned polypore, Kawaratake,

*Laetiporus sulphureus* (*Polyporus sulphureus*, *Polyporus candicinus*, *Boletus candicinus*) — żółciak siarkowy, Schwefel-Porling, E,

*Poria albidofusca* — żagiew białawobrunatna,

*Poria crustulina* — żagiew ciastowata,

*Poria subacida* - Kiniroanatake,

*Grifola frondosa* (*Boletus frondosus*, *Cladomeris frondosa*) — żagwica listkowata, Klapperschwamm, Laub-Porling, polypore en touffe, Maitake, E,

*Daedalea dickinsii*,

*Cerrena unicolor* (*Daedalea unicolor*, *Lenzites unicolor*) — Aschgrauer Wirrling, Einfarbige Tramete,

*Gleophyllum odoratum* — niszczycza pachnąca, Feuchektramete, lenzite odorante,

*Gleophyllum trabea* (*Lenzites trabea*) — niszczycza belkowa, Blättling, lenzite trabée,

*Abortiporus biennis* (*Polyporus biennis*) — Rötender Wirrling,

*Trichaptum abietinum* (*Coriolus abietinus*, *Polystictus abietinus*) — niszczczyk jodłowy, Tannen-Tramete,

*Irpex lacteus* — irpex blanc de lait, Usubatake,

*Hirschioporus fusco-violaceum* (*Trichaptum fusco-violaceum*, *Irpex violacens*) — niszczczyk ząbkowaty, hirschiopore brun sombre violacé,

*Pycnoporus coccineus* — Hirotake,  
*Laricifomes officinalis* (*Polyporus officinalis*, *Boletus larici*) — modrzewnik  
 lekarski, Lärchen-Baumschwamm, polypore officinal,

**order** *Polyporales*

**family** *Polyporaceae*

*Pleurotus cornucopiae* (*P. cornucopioides*) — bocznik lejkowaty, Rillsteli-  
 ger Seitling, pleurote corne d'abondance, Tamogitake, E,  
*Pleurotus ostreatus* — bocznik ostrygowaty, Austern-Seitling, pleurote en  
 forme d'huître, oyster mushroom, Hiratake (Shimeji), E,  
*Pleurotus eryngii* (*Pleurotus fuscus*, *Agaricus cardarella*) — bocznik  
 mikołajkowy, Kräuter-Seitling, pleurote du panicaut, E,  
*Pleurotus sajor-caju* — bocznik japoński, Himarayahiratake, E,  
*Pleurotus pulmonarius* — bocznik płucowaty, E,  
*Pleurotus florida* — bocznik ciepłolubny, E,  
*Pleurotus cystidiosus* — E,  
*Pleurotus salmoneostramineus* — E,  
*Lentinus edodes* — twardziak jadalny, Eßbar Sägeblattling, Shiitake, E,  
*Lentinus lepideus* (*Lentinus squamosus*) — twardziak łuskowaty, Anis-  
 Sägeblattling, Schuppiger Sägeblattling, Matuouji,  
*Polyporus arcularius* — żagiew włosistobrzega, Wetlöcheriger Porling,  
*Panus tigrinus* — łyczak tygrysowy, Getigerter Knäueling, lentine tigré,  
*Microporus flabelliformis* — Uchiwatake,

**order** *Boletales*

**family** *Boletaceae*

*Leccinum scabrum* (*Boletus scaber*) — kozłarz babka, Birkenpilz, bolet ra-  
 boteux, brown birch bolete, E,  
*Gyrodon lividus* (*Boletus brachyporus*, *Uloporus lividus*, *Boletus sistotremoi-*  
*des*) — zębiak sinawy, Erlen-Grübling, bolet livide, E,  
*Xerocomus badius* — podgrzybek brunatny, Maronenröhrling, bolet bai,  
 bay bolete, E,  
*Suillus luteus* (*Boletus annulans*) — maślak zwyczajny, Butterpilz, bolet  
 jaune, slippery jack, E,  
*Suillus variegatus* (*Ixocomus variegatus*, *Boletus aureus*) — maślak pstry,  
 Sandröhrling, bolet moncheté, E,

**order** *Agaricales*

**family** *Tricholomataceae*

*Tricholoma portentosum* (*Agaricus portentosus*) — gaska niekształtna,

Schwarzfaseriger Ritterling, tricholome prétentieux, E,

*Lepista nuda* (*Tricholoma nuda*) — gasówka naga, Violetter Rötleritterling, tricholome pied-bleu, wood blewit, E,

*Lyophyllum ulmarium* (*Pleurotus ulmarius*, *Hypsizygus ulmarius*) — podblaszek wiązowy, Ulmen-Rasling, tricholome des ulmes, Shiro-tamogitake (*Bunashimeji*), E,

*Mycena aurantiomarginata* — grzybówka złotobrzega, Feuriger Helmling,

*Mycena sanguinolenta* — grzybówka krwistopurpurowa, Purpurischneidiger Blut-Helmling, mycène couleur de sang,

*Flammulina velutipes* (*Agaricus velutipes*, *Agaricus nigripes*) — zimówka aksa=mitnotrzonowa, Samtfuß-Rübling, collybie à pied velouté, Enokitake, E,

*Armillariella mellea* — opieńka miodowa, Hallimasch, armillaire couleur de miel, honey fungus, Naratake, E,

#### **family Amanitaceae**

*Amanita rubescens* — muchomor czerwony, Perlpilz, amanite rougisante, the blusher, E,

#### **family Agaricaceae**

*Agaricus arvensis* — pieczarka polowa, Weißer Anis-Egerling, agaric des jachères, horse mushroom, E,

*Agaricus campestris* — pieczarka polna, Wiesen-Champignon, agaric champêtre, field mushroom, E,

*Agaricus bisporus* — pieczarka dwuzarodnikowa, Zucht-Champignon, agaric a deux anneaux, Tsukuritake, E,

*Pheolepiota aurea* (*Pholiota aurea*, *Lepiota pyraenea*) — aksamitka złota, Glimmerschüppling,

#### **family Coprinaceae**

*Psathyrella hydrophila* — kruchaweczka wilgotna, Wässriger Faserling, psathyrelle hydrophile,

#### **family Bolbitiaceae**

*Agrocybe dura* — polówka twarda, Rissiger Ackerling, pholiote dure,

*Agrocybe cylindracea* (*Agrocybe aegerita*, *Pholiota cylindracea*) — polówka wiążkowa, Südlicher Schüppling, pholiote du peuplier, Yanagimatutake, E,

#### **family Strophariaceae**

*Stropharia rugosoannulata* (*Stropharia ferii*) — pierścieniak uprawny, Rotbrauner Riesen-Trauschling, strophaire géant brun-rouge, E,

*Stropharia coronilla* — pierścieniak wieńczony, Krönchen-Bräuschling, strophaire coronille,

*Pholiota glutinosa* (*Pholiota nameko*) — łuskwiak lepki, Nameko, E,

*Kuehneromyces mutabilis* (*Pholiota mutabilis*) — łuszczak zmienny, Stockschwämmchen, pholiote chageante, E,

**order** *Russulales***family** *Russulaceae*

*Lactarius deliciosus* — mleczaj rydz, Edel-Reizker, lactaire délicieux, saffron milk cap, E,

**order** *Tremellales***family** *Tremellaceae*

*Tremella fuciformis* — Shirokikurage,

**order** *Auriculariales***family** *Auriculariaceae*

*Rhizoctonia praticola* — skrętniczka,

**order** *Nidulariales***family** *Spherobolaceae*

*Spherobolus stellatus* — strzykacz gwiazdzisty, Kugelwerfer,

**family** *Nidulariaceae*

*Crucibulum laeve* (*C.vulgare*) — kubecznik pospolity, Tiegel-Tenerling, cyathe creuset, common bird's-nest.

**Class** *Ascomycetes***family** *Sordariaceae*

*Podospora anserina*,  
*Sporormia aemulans*,

**family** *Ophiostomaceae*

*Ophiostoma acoma*,

**family** *Morchellaceae*

*Mitrophora semilibera* (*Morchella gigas*, *Morchella rimosipes*, *Morchella hybrida*) — smardz półwolny, Glocken-Morchel, Halbfreie Morchel, mitrophore hybride, E,

**family** *Chaetomiaceae*

*Chaetomium piluliferum*,

**family** *Microascaceae*

*Microascus senegalensis*,

**family Halosphaeriaceae***Lulworthia lignoarenaria*,*Ceriosporopsis mediosetigera*,*Remispora hamata* (*Halosphaeria hamata*, *Ceriosporopsis hamata*).**Class Fungi Imperfecti** (*Deuteromycetes*)**family Moniliaceae***Aspergillus amstelodami*,*Botrytis cinerea*,*Varicosporia ramulosa*,*Tolipocladium* sp.,*Hormiactis candida*,*Preussia fleishkalkii*,**family Dematiaceae***Dendryphiella salina*,*Zalerion martimum*,*Pestalotiota* sp.,**family Sphaerioidaceae***Phoma* sp.**Strains not identified:**
