

LIST OF TABLES AND FIGURES

- Table 1.1. Actual and Predicted SEI for Individuals with Full Careers in Cohorts Entering the Labor Force in 1963–1968, 1969–1973, and 1973–1978
- Table 2.1. OLS Regression of the Difference in Earnings 2008–1988 on International Experience, Foreign Language Proficiency, and Control Variables
- Table 2.2. Panel Regression of Income on Working Abroad, Knowing Foreign Languages and other Controls
- Table 2.3. Independent Rates r_{jk} of Transition from j Social Classes of the Communist Period to k Social Classes
- Table 2.4. Panel Logistic Regression of Becoming Employer on International Experience and Control Variables
- Table 2.4 – continued: Panel Logistic Regression of Becoming Employer on International Experience and Control Variables
- Table 3.1. Characteristics of Episodes of Employment and Non-Employment
- Table 3.2. Basic Characteristics of Independent Variables for Employment Periods and Interruptions
- Table 3.3. Characteristics of the Independent Variables for Episodes
- Table 3.4. Chances of Work Interruption: Simple Piecewise-Constant Exponential Model
- Table 3.5. Chances of Returning to Employment: Simple Piecewise-Constant Exponential Model

Table 3.6. Regression of Hazard Rate of Interruption Employment (Models 1a and 1b) and Returning to Employment (Models 2a and 2b)

Table A.3.1. Regions Included in the Analysis

Table A.3.2. Chances of Resuming Work: Full Piecewise-Constant Exponential Model

Table A.3.3. Chances of Interrupting Employment: Full Piecewise-Constant Exponential Model

Table 4.1. Respondents with Unstable Employment Histories, 1993–2003, 1998–2008, and 2003–2013 by the Total Number of Employment Spells During Each Ten-Year Period

Table 4.2. Frequency of the Independent Variables, Incidence of Unstable Employment by Gender, Age, Education, and Initial Occupational Category, 1993–2003 and 1998–2008 (in %)

Table 4.3. Logistic Regression Coefficients for Employment Instability, 1993–2003

Table 4.4. Logistic Regression Coefficients for Employment Instability, 1998–2008

Table 4.5. Logistic Regression Coefficients for Employment Instability, 2003–2013

Table 5.1. Low Pay Persistence, POLPAN 1988–2013: The Incidence of Low Wage Employment at t_{n+1} by Low Wage Employment at t_n (A, B) and the Persistence of Low Wage Employment Based on Transition Matrices (A/B)

Table 5.2. Factors Explaining the Likelihood of Low Wage Employment at t_{n+1} : Odds Ratio Estimates (OR) and Standard Errors (SE) from Generalized Estimating Equations (GEE) Models

Table 6.1. Descriptive Statistics for 6 * 6 Occupational Cross-Classifications for Friendship and Marriages in 1988 and 2008

Table 6.2. Descriptive Statistics for 4 * 4 Educational Cross-Classifications for Friendship and Marriages in 1988 and 2003/2008

Table 6.3. Distributions of Occupational Heterogamy/Homogamy by Friendship and Marriages in 1988 and 2008

Table 6.4. Parameters for Strength of Association Between Occupational Categories of Respondents and Best Friend/Spouse

Table 6.5. Parameters for Strength of Association Between Educational Categories of Respondents and Best Friend/Spouse

- Table 6.6. Parameters for Homogamy in Occupational Categories in Quasi-Symmetry Model
- Table 6.7. Parameters for Homogamy in Educational Categories in a Quasi-Symmetry Model
- Table 6.8. Parameters for Occupational Categories in Row-Column Model
- Table 6.9. Parameters for Educational Categories in Row-Column Model
- Table A.6.1. Distributions of Occupational Categories for Friendship and Marriages in 1988 and 2008
- Table A.6.2. Distributions of Education Respondent and His Best Friend and Distributions of Education Husband and Wife in 1988, 2003, and 2008
- Table 7.1. Percentage of Poles Who Possessed a PC over the Twenty-Five Year Time Span of the POLPAN Study, by Occupational Categories
- Table 7.2. Types of Internet Usage by Occupational Groups. Values Represent the Cumulative Percentage of Respondents Who Used the Internet for Each Purpose Several Times per Month or More. Data from 2008
- Table 7.3. Percentage of Respondents Who are Able to Complete Certain Tasks on the Computer. Average PC Proficiency Scale Score also Shown by Occupational Category. Data from 2008
- Table 7.4. Regression Analysis of 2013 Income on Basic Demographic Factors, Occupational Category, 2008 Income, and Indicators of the Digital Divide.
- Table 8.1. Proportions of “Don’t Know” Responses to Do-Earn and Should-Earn Questions for Consecutive Waves of POLPAN
- Table 8.2. Mean Values of Pearson’s Correlation Coefficient Between Individual Assessments of Earnings
- Table 9.1. Measurement of Meritocratic Attitudes
- Table 9.2. Measurement of Welfare State Support
- Table 9.3. By-Wave OLS Regression Models of Logged Fair Earnings Ratio on Meritocratic Attitudes and Welfare State Support, and Socio-Demographic Characteristics
- Table 9.4. Multi-Level Mixed-Effects Linear Regression Models of Logged Fair Earnings Ratio on Meritocratic Attitudes and Welfare State Support, and Socio-Demographic Characteristics

- Table 10.1. Unemployment Perception Errors, 2003: Descriptive Statistics by Voivodship
- Table 10.2. Perceived Change in Unemployment by Actual Change in Unemployment, 2000–2003: Analysis of Variance Models
- Table 10.3. Unemployment Perception Errors: The Best Multilevel Model
- Table 10.4. The Consequences of Unemployment and Unemployment Misperceptions
- Table 11.1. The Results of a Factor Analysis of Determinants that, in Respondents' Opinions, Influence Success in Life
- Table 11.2. “Absolutely Necessary” and “Very Important” Determinants of Success
- Table 11.3. Regression of “Meritocratic” and “Family and Friends” Dimensions of Opinions on Determinants Influencing Success in Life by Demographic and Stratification Variables, 2013
- Figure A. POLPAN 2013: Histories of Participation in the Survey
- Figure 1.1. Example of Individual Occupational Trajectories for Calendar Years
- Figure 1.2. Example of Individual Occupational Trajectories for Age
- Figure 1.3. Example of Individual Occupational Trajectories for Years in the Labor Force
- Figure 1.4. Shares of Farmers and Farm Laborers, Unskilled and Skilled Manual Workers, Sales and Service Workers, and Non-Manual Workers Jobs in the Labor Market in Poland, 1945–2003
- Figure 1.5. Occupational Trajectories for Entering the Labor Force in 1945–1950 and 1951–1960
- Figure 1.6. Occupational Trajectories for Entering the Labor Force in 1961–1970 and 1971–1980
- Figure 1.7. Occupational Trajectories for Entering the Labor Force in 1981–1990, 1991–2003, and 2004–2013
- Figure 2.1. Impact of the Number of Months Abroad between 1988 and 1993 on Income in 1993
- Figure 2.2. Predicted Income Differences 2008–1988 Dependent on Knowledge of Foreign Languages for Respondents Who Have Experience Abroad and Those Who Do Not
- Figure 3.1. Unemployment in Poland, 1990–2006

- Figure 3.2. Survival Function and Smoothed Hazard Rate for Employment Episodes
- Figure 3.3. Survival Function and Smoothed Hazard Rate for Non-employment Episodes
- Figure 3.4. Hazard Rate of Work Interruption and Work Undertaking, Estimated with a Piecewise-Constant Exponential Model: Full and Simple Model
- Figure 3.5. Comparison of Duration of Employment Episodes for Men and Women. Survival Function and Smoothed Hazard Rate for Employment Episodes
- Figure 3.6. Comparison of Duration of Work Interruptions for Men and Women. Survival Function and Smoothed Hazard Rate for Work Interruptions
- Figure 4.1. Average Occupational Complexity Score Among Workers with Stable and Unstable Employment Histories, 1993–2003 (a) and 1998–2008 (b)
- Figure 4.2. Average Occupational Complexity Scores Among Workers with Stable and Unstable Employment Histories, 2003–2008, in the Initial and Final Job
- Figure 5.1. The Unemployment Rate According to Labor Force Surveys, the Registered (Official) Unemployment Rate, and the GDP Growth Rate, Poland, 1990–2013
- Figure 5.2. Adjusted Percentage of Workers in Low Wages at t_{n+1} by Low Wages at t_n , When the Overall Rate of Low Paid Employment is Held Constant at the 2013 Level
- Figure 7.1. Percentage of Poles who Possess a PC in their Household, Unemployed and Currently Employed, 1988 to 2013
- Figure 8.1. Variations in the Assessments of Earnings
- Figure 8.2. Variations in Assessments of Earnings by Quintile of Income
- Figure 8.3. Average Evaluations of the Justice of Earnings
- Figure 8.4. Average Evaluations of Injustice by the Type of the Injustice
- Figure 9.1. Rising Inequality in Poland, 1987–2004
- Figure 9.2. Medians of Perceived and Preferred Monthly Earnings of Factory Owner and Unskilled Worker as Number of Mean Monthly Salaries in the Given Year

- Figure 9.3. Medians of Perceived and Preferred Monthly Earnings Ratios
- Figure 10.1. Perceived Unemployment by Actual Unemployment, 2003:
Descriptive Statistics
- Figure 10.2. Perceived Change in Unemployment by Actual Change in
Unemployment, 2000–2003
- Figure 10.3. The Relationship between Unemployment Perception Errors
and Actual Unemployment
- Figure 11.1. The Importance of the “Hard Work” Determinant in 1988–
2013
- Figure 11.2. The Importance of the “Good Education” Determinant in
1988–2013
- Figure 11.3. The Importance of the “Knowing the Right People” Deter-
minant in 1988–2013
- Figure 11.4. Mean Values of “Meritocratic” and “Family and Friends” Di-
mensions of Determinants of Success According to Social Classes
- Figure 11.5. Dynamics of Respondents Opinions About Determinants of
Success in Years 2008–2013
- Figure 11.6. Dynamics of Respondents Support for “Meritocratic” and
“Family and Friends” Dimension of Success in Years 2008–2013
