1973. Growth of black walnut trees in eight midwestern States — a provenance test. North Cent. For. Exp. Stn., St. Paul, Minn. 7 p., illus. (USDA For. Serv. Res. Pap. NC-91)

At age 6, survival of black walnut trees was not related to latitude of the source at six out of eight locations. Trees from as far as 200 miles south of the planting generally grew as large or larger than trees from local or northern sources.
