METHOD OF GIVING A POSITION

REFERENCE ON THIS SHEET
First give the code letters denoting the exact degree of latitude and longitude immediately to the South and West of the required point. Then give in figures the distance in minutes of latitude and minutes of longitude of the point from the degree intersection so described. Thus if 50°N. is represented by AB and 23°W. by XY then the position 50°06'N., 23°33'W. will be denoted ABXY 0833. Similarly if 50°N. is represented by AB and 5°E. is represented by PQ, then the position 50°17'N., 5°38'E. is ABPQ 1738.
