38 pp., illus.

(U. S. Forest Serv. Res. Paper NE-50)

80

Reports on experiments with various formulations of *Bacillus thuringiensis* against the gypsy moth. Describes new methods of evaluation and assessment of *Bt*, and discusses special problems in the use and evaluation of microbial agents in controlling defoliators. Also presents information about the mode of action of the material against the gypsy moth and some data on the effects of components of commercial preparations on the physiology of the micro-organism.
