TRANSITION TO ADVANCED MARKET ECONOMIES-THE EFFORT OF THE COMMISSION OF THE EUROPEAN COMMUNITIES

Charles I. Kejeh

*Commonwealth Association for Development,
London, UK*

The year 1990 witnessed great and historic changes in the political economies of the East/Central European Countries. These economies have been used to a system of Centralised planning-the command economy; but the decentralization of the system has heralded a new age and great changes in the way the economies are administered.

In attempting to assist these Countries, the European Communities launched in 1990 the Trans European Mobility Programme for University Studies (TEMPUS) with the objectives of promoting the quality and development of high education systems in the East European Countries.

What this paper intends to do is to present a working TEMPUS project using the programme between the Commonwealth Association for Development (Contractor) UK, Janus Pannanius University Pec (H), Interuniversitair Instituut Voor Vorming En Ontwikkeling (B), J.J.Strossmayer University of Osijek (YU) and University "Babes-Bolyai" (R) as an example.
