

# THE FLORA OF THE PIRIN MOUNTAINS IN BULGARIA

by

Adam JASIEWICZ & Stefan KOZUHAROV\*

The work is done by the groups of Polish and Bulgarian botanists led by the authors above, in a long-term cooperation. The rich herbarium materials have been collected by several scientists. They have been divided among the specialists of different taxonomic groups and they are now being determined

1. Gosińska-Jakubowska, M. 1970. *Crataegus* species in Poland. (in Polish) *Prace Instytutu Botaniki Uniwersytetu Wrocławskiego* 10: 1-12.
2. — 1974. *Crataegus* in the flora of Poland. (in Polish) *Prace Instytutu Botaniki Uniwersytetu Wrocławskiego* 14: 1-12.
3. — 1975. The use of the numerical method in the systematics of hawthorns occurring in Poland. *Acta Bot. Soc. Sci. Bratislava* 22: 113-120.
4. — 1978, 1979, 1980. Studies on the systematics, distribution and variability of the hawthorns occurring in Poland. (in Polish, English summary) *Prace Instytutu Botaniki Uniwersytetu Wrocławskiego* 18: 1-12; 19: 1-12; 20: 1-12.
5. Gosińska-Jakubowska, M., Hrabu etov'a, A. 1983. Distribution of *Crataegus* species in Poland and Czechoslovakia. *Acta Bot. Soc. Sci. Bratislava* 30: 9-24.
6. Gosińska-Jakubowska, M., Pele, S., Topuzov, K. 1984 (1985). The new to Poland localities of *Crataegus palmstrochii* Lindl. (in Polish, English summary) *Prace Instytutu Botaniki Uniwersytetu Wrocławskiego* 24: 15-17.
