By the end of the fourteenth century, Jewish settlements could be found in five urban centers (Kalisz, Konin, Poznań, Pzdrzy and Żerków),¹⁸ while sources from the fifteenth century name six more

Ptaśnik, *Żydzi w Polsce wieków średnich*, „Przegląd Warszawski”, vol. 2, 1922, no. 8, pp. 220–222; I. Schiper, *Studya nad stosunkami gospodarczymi Żydów*, pp. 45–51; M. Schorr, *Organizacja Żydów w Polsce od najdawniejszych czasów aż do r. 1772*, KH, vol. 13, 1899, pp. 487–491 and separate print: Lviv 1899, pp. 6–10; R. Hube, *Przywilej żydowski Bolesława i jego potwierdzenia*, „Biblioteka Warszawska”, vol. 1, 1880, pp. 426–442; see also S. Kutrzeba, *Stanowisko prawne Żydów w Polsce w XV stuleciu*, „Przewodnik Naukowy i Literacki. Dodatek do Gazety Lwowskiej”, vol. 29, 1901, no. 11, pp. 1007–1018 and no. 12, pp. 1147–1156.

¹⁸ See I. Schiper, *Studya nad stosunkami gospodarczymi Żydów*, pp. 62–63; E. Feldman, *Najstarsze wzmianki o Żydach*, p. 62; Żerków: A. Heppner, I. Herzberg, *Aus Vergangenheit und Gegenwart der Juden und der jüdischen Gemeinden in der Posener Landen nach gedruckten und ungedruckten Quellen*, Koschmin–Bromberg 1909, p. 1022 (synagogue fire in 1382). According to Father M. Łukaszewicz: „Jews appear in Żerków only during the reign of Bolesław the Chaste [...] they did not really live in Żerków, but rather in a settlement between Żerków and Gród Ostrowski, one “staja” to the south-west, [...] The synagogue, along with the Jewish quarter burned down during a fire in Gród Ostrowski in the first days of August 1382, so the Jews, with Władysław Jagiełło’s permission, rebuilt their quarter and synagogue, which lasted until present times, until it

(it can only be assumed that they settled there earlier) Jewish agglomerations (Gniezno, Koło, Koźmin, Oborniki, Stawiszyn and Szamotuły).¹⁹ It is very likely that some Jews were living in Śmigiel, since in 1415 there is mention of a Jewish square.²⁰ In 1449, the Jews were expelled from Żnin, a town belonging to the archbishops of Gniezno.²¹

Until the end of the fifteenth century, the presence of Jews can be confirmed in 13 settlements in Greater Poland, eight of which belonged to the Duke and later to the Crown (see the map 1 in this chapter).

The “Taxa Judeorum in civitatibus et opidis Regni existentibus” from 1507 recorded the incomes from the extraordinary tax collected for the coronation of Sigismund the Old.²² This register of the coronation tax collected from Jews in 1507 covers the Jewish population of Greater Poland (along with Cuyavia) Lesser Poland, Mazovia and Red Ruthenia. It lacks information about the Jews inhabiting Royal Prussia, Podole and the region of Mazovia that was transferred to the Kingdom of Poland in 1526. Among the 54 Jewish settlements that were taxed and mentioned in the Taxa 18 were in Greater Poland.²³ The register was supplemented by the editor of the Taxa with three other Greater Polish settlements, where the presence of the Jewish population could be confirmed by other sources.²⁴ Some

perished on 14 August 1861 during a fire in Żerków.”, quot. from: idem, *Strażnica Ostrów i miasto Żerków. Obrazek z dziejów przeszłości naszej*, Poznań 1891, pp. 50–51.

¹⁹ Koło: K. Witkowski, *Koło w średniowieczu*, [in:] *Najdawniejsze dzieje Kola (do lat 20. XVI stulecia)*, ed. K. Witkowski, 2nd edition, Koło 2012, p. 87, claims, referencing the land register of Konin stored in AP Poznań (Z. 3, f. 191), that: „The first mention of Jews in Koło comes from 1432 [...] It is a mistake in the literature that it was in 1429. [...] During my research into the land register, I could not confirm their presence in 1429.”; same as: idem, *Żydzi w Kole do końca XVIII wieku*, [in:] *Z dziejów Żydów kolskich – w 70. rocznicę Zagłady w obozie zagłady Kulmhof (materiały z sesji popularnonaukowej, która odbyła się w dniu 17 stycznia 2012 r.)*, ed. K. Witkowski, Koło 2012, p. 11: „The first mention of Jews in Koło comes from 1432. It was then that Lochman, a Jew from Koło, finds himself in a court battle with Jan, the son of Mrokota from Janiszewo”. 1429 is stated as the first year of a Jewish presence in Koło by Z. Guldon, J. Wijaczka, *Osadnictwo żydowskie w województwach poznańskim i kaliskim*, p. 68, who refer to the publication of E. Feldman, *Do statystyki Żydów w dawnej Polsce*, „Miesięcznik Żydowski”, Year 3, vol. 1, 1933, no. 1–2, p. 131. Earlier literature indicated that 1555 was the beginning of the Jewish community in Koło; see for example M. Rawita-Witanowski, *Wielkopolskie miasto Koło, jego przeszłość i pamiątki*, Piotrków 1912, p. 153; see also: E. Feldman, *Do statystyki Żydów*, pp. 130–131; idem, *Najstarsze wzmianki o Żydach*, p. 152; Z. Guldon, J. Wijaczka, *Osadnictwo żydowskie w województwach poznańskim i kaliskim*, p. 66; I. Schiper, *Ранняя стадия еврейской колонизации в Польше (Городская колонизация)*, „Еврейская Старина”, vol. 3, 1911, no. 3, pp. 348, 351–357.

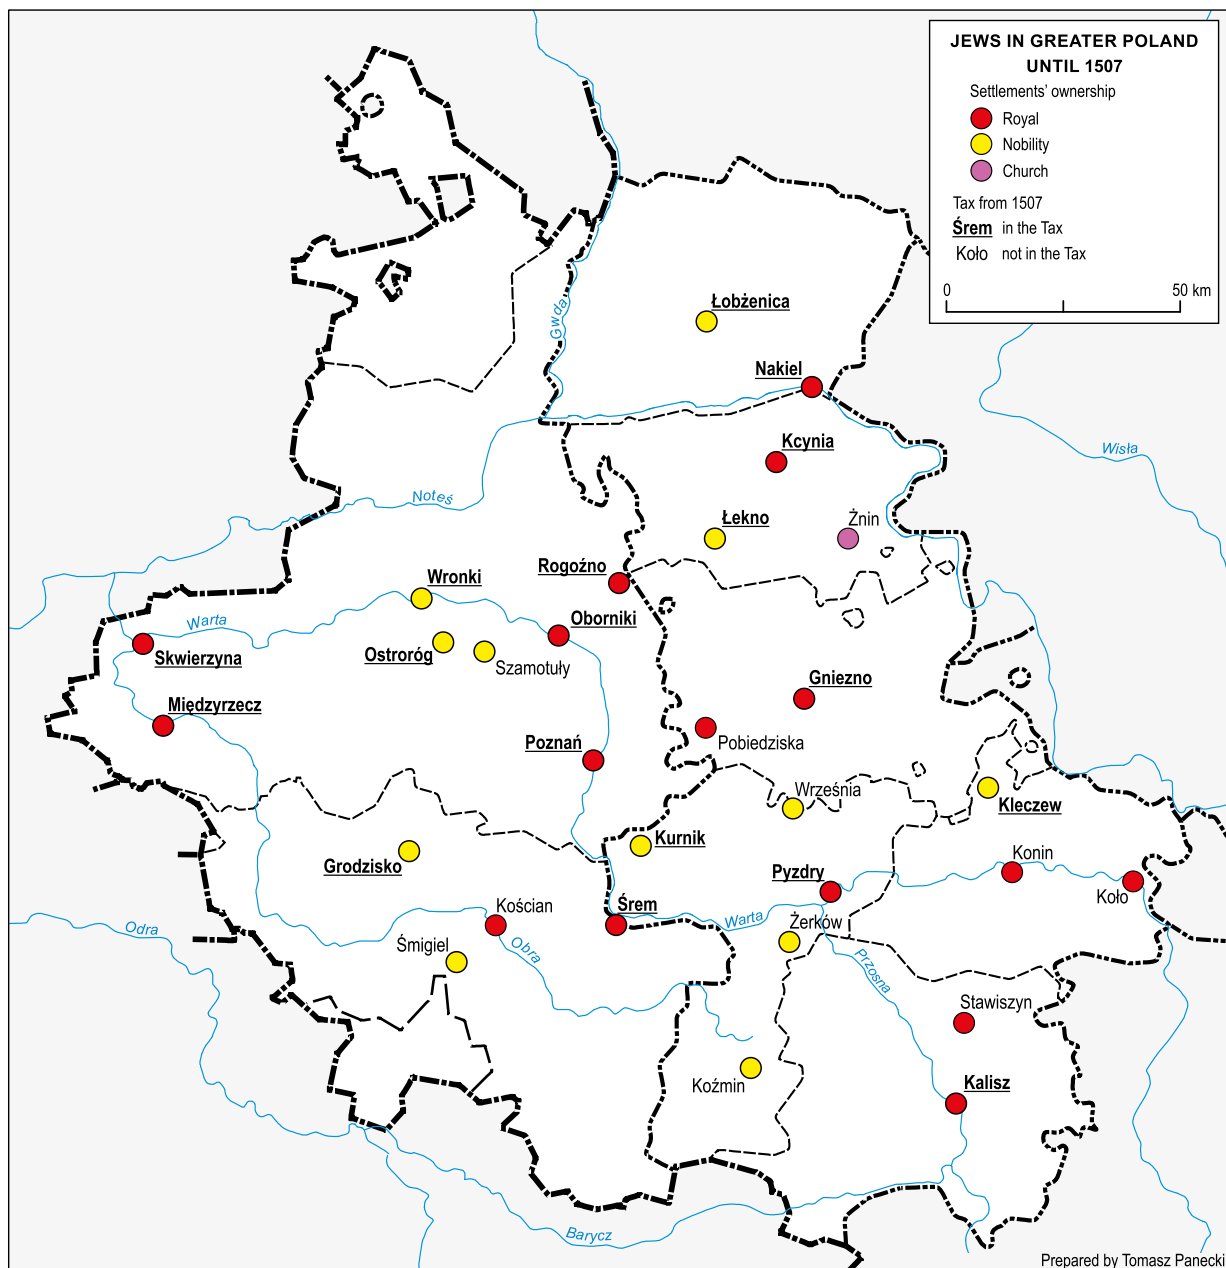

²⁰ KDW VII, no. 760: „den garten, welcher da heiset der Judenplatz” (www.wbc.poznan.pl/dlibra/doccontent?id=20111, access 10.01.2017).

²¹ A. Heppner, I. Herzberg, *Aus Vergangenheit und Gegenwart der Juden und der jüdischen Gemeinden*, p. 1031; C. Sikorski, *Zarys dziejów Żnina*, Żnin 1990, p. 40: „The Jews living there, for some undefined conflict with the Catholics, were exiled from the town by a decree from Gniezno on 24 April 1449. Until the partitions no Jews were allowed to settle in Żnin.”; M. Gumowski, *Żnin w wiekach średnich*, Poznań 1928 (both from: „Historja Powiatu Żnińskiego”), p. 99: „It would appear that the Jews were accused of setting Żnin on fire. The victims and other residents did not accuse them directly, but during the next vacancy after the death of archbishop Wincenty, they sent to the Gniezno chapter a complaint that listed several robberies, injustices and wrongdoings inflicted on the Christians. The chapter took up the matter during a meeting on 24 April 1449 and decided to expel all the Jews from Żnin, so that they left the residents alone”.

²² M. Horn, *Najstarszy rejestr osiedli żydowskich w Polsce z 1507 r.*, Biuletyn ŻIH, 1974, no. 3 (91), pp. 11–15. To read more about the „coronation” tax, see H. Rutkowski, *Podatek „koronacja” w Polsce na początku XVI w.*, [in:] idem, *Fundamenta historiae. Pisma wybrane*, ed. M. Zbieranowski, M. Słoń, Warsaw 2014, pp. 53–70.

²³ Gniezno, Grodzisk Wielkopolski, Kalisz, Kcynia, Kleczew, Kórnik, Łekno, Łobżenica, Międzyrzecz, Nakło, Oborniki, Ostroróg, Poznań, Pyzdry, Rogoźno, Skwierzyna, Śrem and Wronki; see. M. Horn, *Najstarszy rejestr osiedli żydowskich*, p. 13. The publisher of Taxa (ibidem) names Leszno (*in Lesna*), although the in photograph of the manuscript (p. 12) the name is crossed over and corrected to „in Lekno”; Łekno was used in the Polish translation of the Taxa, see *Taksa Żydów żyjących w miastach i miasteczkach Królestwa*, trans. B. Wyrozumka, [in:] H. Zaremska, *Żydzi w średniowiecznej Polsce*, p. 245 and on p. 244 a colored image of the manuscript. Leszno was granted town status in 1547; see: T. Jurek, *Leszno*, [in:] SHGPoz, pt. II, p. 589 (www.slownik.ihpan.edu.pl/search.php?q=leszno&d=7&t=1, access 10.01.2017); Z. Kulejewska-Topolska, *Ze studiów nad zagadnieniem lokacji miejskich w Wielkopolsce w XVI–XVIII w.*, PZ, vol. 9/3, 1953, no. 9–12, p. 182; Szczygieł, p. 211. Sieraków (*in Suerakow*), mentioned by M. Horn, is also absent from the Taxa (and in the translation by B. Wyrozumka); it is assumed that it is referring to Gnyewkow, which is Gniewkowo in Cuyavia.; see. T. Jurek, *Sieraków*, [in:] SHGPoz, pt. IV, p. 421 (www.slownik.ihpan.edu.pl/search.php?id=23209, access 10.01.2017).

²⁴ Konin, Kościan (The starting date of a Jewish presence in Kościan are debatable: I. Schiper, referencing only „the oldest court documents” dates this to the second half of the fourteenth century, comp. to idem, *Studia nad stosunkami gospodarczymi Żydów*, p. 63, while E. Feldman disagreed, noting: “In my opinion, the community in Kościan did not yet exist in the fourteenth century”, quot. from: E. Feldman, *Do statystyki Żydów*, p. 130; M. Horn references I. Schiper’s data, which are the „the oldest court documents”) and Szamotuły; see. M. Horn, *Najstarszy rejestr osiedli żydowskich*, p. 14. The lack of these settlements in the Taxa is explained by the method of tax collection: sometimes it was collected from neighbouring towns

Map 2. Jews in Greater Poland until 1507

of these settlements certainly were quite populous, as the example of Nakło suggests, where in 1515 a fire destroyed a synagogue and 21 Jewish houses.²⁵

or multiple centers paid together, but only the commune where the actual collection occurred was noted; comp. to H. Zaremska, *Żydzi w średniowiecznej Polsce*, p. 243; M. Horn, *Najstarszy rejestr osiedli żydowskich*, p. 14. The taxa itself confirms these practices (*Taksa Żydów*, p. 245): „In Warta, or wherever they might be, Szamaj and his son in law are obligated to pay 5 florins [...]. In Bełżno, with the Jew Samuel, who lives in Potylicz, 5 florins [...]. In Lublin, along with Kazimierz, 75 florins [...]. In Cracow and Tarnów, 300 florins” The amount paid, in the Taxa and elsewhere, „informs us mostly about the wealth, rather than the population of a commune. We can assume though, that the number of houses in the quarter was the primary factor for tax calculations, and its number can inform us about their owners.”; quot. from: H. Zaremska, *Żydzi w średniowiecznej Polsce*, p. 258. She adds that: „This data also lets us estimate the number of small groups, not worthy of separate taxation in specific regions of the country. I assume that these groups had one, at most two families. Such groups formed around 70% of Greater Poland; ibidem, p. 245. E. Feldman claims that for the second half of the fifteenth century: “Quarters in [...] Stawiszyn, Koźmin [...] as they were very small, often single-family, are overlooked [...] as they probably paid the *census annuus* with larger neighbours”, quot. from: idem, *Do statystyki Żydów*, p. 132.

²⁵ M. Aschkewitz, *Die Juden in Westpreußen am Ende der polnischen Herrschaft (1772)*, „Zeitschrift für Ostforschung. Länder und Völker in Östlichen Mitteleuropa”, vol. 6, 1957, no. 4, p. 561: „In Nakel wo die Juden bereits um 1500 nachweisbar

We can therefore determine that until 1507, 29 centers in Greater Poland had Jewish populations: 18 in the Kalisz Voivodeship (Gniezno, Kalisz, Kcynia, Kleczew, Koło, Konin, Kościan, Koźmin, Kórnik, Łekno, Łobżenica, Nakło, Pobiedziska, Pyzdry, Stawiszyn, Września, Żerków and Żnin) and 11 in the Poznań Voivodeship (Grodzisk, Międzyrzecz, Oborniki, Ostroróg, Poznań, Rogoźno, Skwierzyzna, Szamotuły, Śmigiel, Śrem i Wronki)²⁶ (see the map 2 in this chapter).

Any attempts to estimate the number of Jews living in Poland, whether in the Middle Ages or in the early modern era rely mainly on tax-related sources. The problems that arise during investigations, among others, into the Jewish population numbers stem from the scarcity of appropriate sources: there is a lack of materials for statistical analysis, while the taxes paid by Jews were typically lump sums²⁷ gathered in select cities, communes or territories by exactors, i.e. tax collectors funded by the Jewish inhabitants themselves.²⁸

Due to multiple factors, such as varied data sources on Jewish agglomerations, different methods of estimating their size and the use of non-standardized data point conversions, such as “persons per house”, the projections of the size of the Jewish population around the year 1500 have quite a large range: from 4,500 to 30,000.²⁹

sind, gingen bei einem Brande im Jahre 1515 auch 21 jüdische Häuser und eine Synagoge verloren”; R. Heidrich, *Die Stadt Nakel und ihre Geschichte*, Nakel 1910, p. 48: „Im Jahre 1515, wo die Stadt abbrannte, waren in Nakel 21 jüdische Häuser und eine Synagoge; nach dem Brande ist ihnen vielleicht ein besonderes Stadtviertel (die Posener Straße) angewiesen worden”.

²⁶ Pobiedziska (A. Heppner, I. Herzberg, *Aus Vergangenheit und Gegenwart der Juden und der jüdischen Gemeinden*, p. 875: in 1502 the Jew Sloma from Pobiedziska was killed), Września (in 1502 Salomon, *Judeus of Wrzeschna*, and another nameless Jew are mentioned; see *Acten der Kriminalgerichtsbarkeit*, B: *Geständnisse „Maleficiorum liber ab anno 1502 ad annum 1554”*, [in:] *Stadtbuch von Posen*, vol. 1: *Die mittelalterliche Magistratsliste. Die ältesten Protokollbücher und Rechnungen*, pub. A. Warschauer, Posen 1892, pp. 335, 337); comp. to: Z. Guldon, J. Wijaczka, *Skupiska i gminy żydowskie w Polsce do końca XVI wieku*, „Czasy Nowożytne”, vol. 21, 2008, pp. 174–180; Z. Guldon, *Skupiska żydowskie w miastach polskich w XV–XVI wieku*, [in:] *Żydzi i judaizm we współczesnych badaniach polskich*, vol. 2: *Materiały z konferencji, Kraków 24–26 XI 1998*, ed. K. Pilarczyk, S. Gąsiorowski, Cracow 2000, pp. 13–25, esp. the annex on pp. 22–25; Z. Guldon, J. Wijaczka, *Osadnictwo żydowskie w województwach poznańskim i kaliskim*, p. 66; eidem, *Żydzi wśród chrześcijan*, pp. 150–151. B.D. Weinryb tallies the number of towns and cities which had Jewish residents from the twelfth century to the sixteenth century, taking into account the districts, but does not list any names or sources; see idem, *The Jews of Poland. A Social and Economic History of the Jewish Community in Poland from 1100 to 1800*, [Philadelphia] 1973, p. 31.

²⁷ See H. Zaremska, *Żydzi w średniowiecznej Polsce*, pp. 258–261. In 1512 Szloma and Samuel, two Jews from Poznań, paid 235 florins into the Crown’s treasury, as a coronation tax put on all Greater Polish Jews; no information on how the burden was distributed is provided.; see MK 25, f. 182 (online manuscript: pther.eu/MK/025/PL_1_4_1-025_0366.html, access 17.01.2017).

²⁸ For more on exactors and their work in the first half of the sixteenth century, see M. Horn, *Żydzi i mieszczenie w służbie celnej Zygmunta Starego i Zygmunta Augusta*, Biuletyn ŻIH, 1987, no. 1 (141), pp. 9–12; from the middle of the sixteenth century “taxes on the Jewish people were selected by royally appointed Christian exactors, or were collected by Christian customs officials and clerks, quot. from: ibidem, p. 12. For more on the so called „Royal rent” tax placed on Jews see J. Rutkowski, *Skarbowość polska za Aleksandra Jagiellończyka*, KH, vol. 23, 1909, no. 1–2, pp. 30–31.

²⁹ H. Zaremska, *Żydzi w średniowiecznej Polsce*, p. 240 and chap. I.8: *Ilu Żydów mieszkało w średniowiecznej Polsce*, pp. 239–266. The author estimates that: „The number of Jews living in areas covered by the Taxa comes out to around 5000” (ibidem, p. 263), and „The most populous Jewish communes, i.e. those in Lviv, Cracow (then moved to Kazimierz) and Poznań counted from 500 to 800 inhabitants” (eadem, *Żydzi w średniowiecznym Kaliszu*, p. 171); also comp.: Z. Guldon, *Żydzi w Polsce do końca XVIII w. Wybrane zagadnienia*, [in:] *Z przeszłości Żydów polskich: polityka, gospodarka, kultura, społeczeństwo*, ed. J. Wijaczka, G. Miernik, Cracow 2005, pp. 8–9; idem, *Skupiska żydowskie*, p. 13; idem, *Osadnictwo żydowskie i liczebność Żydów na ziemiach Rzeczypospolitej w okresie przedrozbiorowym*, „Czasy Nowożytne”, vol. 4, 1998, pp. 27–28; idem, *Osadnictwo żydowskie i liczebność ludności żydowskiej na ziemiach Rzeczypospolitej w okresie przedrozbiorowym. Stan i program badań*, [in:] *Żydzi i judaizm we współczesnych badaniach polskich*, vol. 1: *Materiały z konferencji, Kraków 21–23 XI 1995*, ed. K. Pilarczyk, Cracow 1997, p. 148; H. Samsonowicz, *The Jewish Population in Poland during the Middle Ages*, „Dialectics and Humanism. The Polish Philosophical Quarterly”, vol. 16, 1989, no. 1, pp. 35–42; Z. Guldon, *Źródła i metody szacunków liczebności ludności żydowskiej w Polsce w XVI–XVIII wieku*, KHKM, vol. 34, 1986, no. 2, p. 250; E. Feldman, *Do statystyki Żydów*, pp. 130, 134–135; I. Schiper, *Rozwój ludności żydowskiej na ziemiach dawnej Rzeczypospolitej*, [in:] *Żydzi w Polsce odrodzonej. Działalność społeczna, gospodarcza, oświatowa i kulturalna*, vol. 1, ed. I. Schiper, A. Tartakower, A. Haffika, Warsaw [1932], pp. 26–27. „At the end the Medieval Ages [...] their number in Poland is estimated to be 18,000, while in Lithuania – 6,000. They were only 0.6% of the total population”; quot. from: M. Horn, *Rola gospodarcza Żydów w Polsce do końca XVIII wieku*, [in:] *Studia z dziejów Żydów w Polsce*, p. 27. B.D. Weinryb estimates that by the end of the fifteenth century there were 10,000 to 15,000 Jews in Poland: „There are a few estimates of the number of Jews in Poland by the end of the century, based on the amount of recorded taxes they paid. These estimates range from 10,000–11,000 to 17,400. (The last figure is definitely too high.) To these Jews of Poland proper should be added those who lived in Lithuania and Kiev.

Even though in the latter half of the sixteenth century the number of tax registers increased (some of them even recorded the number of Jews that were taxed) and a new source emerged in the seventeenth century in the form of the registers of the general head tax for the years 1662–1676,³⁰ the basis for the estimation of Poland's population until the end of the eighteenth century are fiscal sources. There is a widely held belief in the scholarship of the source literature that "population estimates in the sixteenth to eighteenth centuries based on indirect sources such as fiscal ones due to a lack of direct sources are indicative only of the order of magnitude".³¹ The use of fiscal data for any estimate of the Jewish population is controversial and results in many disputes among researchers.³²

The tax collection universals established in the second half of the sixteenth century imposed the payment "of one gold coin for every head" (i.e. one florin per person) on Jews,³³ with exception of tax collection universals in 1580 and 1587–1588, when it was raised to 1.5 florin per person.³⁴ The tax collection universals contained instructions that during collection "poverty must be taken into account"³⁵ and "the almoner must be heeded",³⁶ which resulted from the practice of tax collection in situation when individuals had different levels of wealth. The difficulties in collecting fees and the problems of the tax system in the Polish-Lithuanian Commonwealth resulted in the imposition of a flat-rate tax on the Jewish population in 1581 in the amount of 30 thousand florins (Polish złote).³⁷ Subsequent Sejms confirmed taxes imposed on Jews in the form of lump sums, while also increasing

Altogether the number of Jews at the end of the fifteenth century would apparently have been between 10,000 and 15,000 persons"; quot. from: idem, *The Jews of Poland*, p. 32.

J. Kleczyński, *Spisy ludności w Rzeczypospolitej polskiej*, „*Rozprawy Akademii Umiejętności. Wydział Historyczno-Filozoficzny*”, II, vol. 5 (30), 1894, pp. 33–61 (esp. pp. 36–37).

their size.³⁸ Those responsible for tax matters in Jewish communes were “elders”, *seniores (parnassim or roszim)*,³⁹ who with the help of censors (*szamaim*), distributed the financial burden on individual members of the commune.⁴⁰

It must be stated that fiscal data lends itself to vastly different demographic calculations. Based on the aforementioned sources, the Jewish population in Crown’s land in the second half of the sixteenth century is estimated at anywhere between 30,000 and 150,000.⁴¹ The estimates for 1560s and 1570s are from 30,000 to 100,000.⁴² A much more accurate estimation method for specific urban centers is based on the number of Jewish houses.⁴³ It must, however, be stressed that even here there are major discrepancies in scholars’ assessments of the number of household members in a home.⁴⁴ An additional obstacle in demographic research is the high mobility of the Jews. Inspectors describing the payments from Jews in Międzyrzecz in 1564 emphasize that “It is an inconsistent payment, sometimes it increases,

³⁸ See: A. Kaźmierczyk, *Sejmy i sejmiki szlacheckie wobec Żydów w drugiej połowie XVII w.*, Warsaw 1994, pp. 13–15; R. Mahler, *Żydzi w dawnej Polsce w świetle liczb. Struktura demograficzna i społeczno-ekonomiczna Żydów w Koronie w XVIII w.*, PDP, vol. 1, 1967, p. 132. In 1589 the Sejm in Warsaw ratified that „Both Polish and Lithuanian Jews, as well as those of all constituent nations must, after dividing amongst themselves, pay 25,000 złote for the Ukrainian needs”; *Sejmy i sejmiki koronne*, p. 41 (tax collection universal of the Sejm [Pacification] in Warsaw from 1589). In 1590 the Sejm decreed that „The Jews of the Crown, are liable to deliver, on the day of St. John the Baptist, 20,000 złote to the royal treasurers and provisors”; *ibidem*, p. 42 (tax collection universal of the Sejm in Warsaw in 1590). The Sejm of 1611 decreed that „Every Jew in the Crown [...] must pay forty [40] grosze each [...] disregarding victims and the poor [...]. And if the Jews themselves pay the head tax on time, they will be left alone by all collectors”; *ibidem*, p. 48 (tax collection universal of the Sejm in Warsaw in 1611). The second Sejm of 1613 decided that „All Jews in the Crown must pay 70,000 złote, 40,000 to Lviv and 30,000 to Bydgoszcz. When they pay it, they will be free from any collection from their produce and servants. If they do not, collection of produce and servants will be authorized.”; *ibidem*, p. 50 (tax collection universal of the Sejm in Warsaw in 1613). Schiper, *Rozwój ludności żydowskiej*, p. 31; Z. Guldon, J. Wijaczka, *The Accusation of Ritual Murder in Poland, 1500–1800*, „Polin. Studies in Polish Jewry”, vol. 10 (Jews in Early Modern Poland), pp. 99–101: *The Size of the Jewish Population*; these same estimates are given by: Z. Guldon, W. Kowalski, *Jewish Settlement in the Polish Commonwealth in the Second Half of the Eighteenth Century*, „Polin. Studies in Polish Jewry”, vol. 18 (*Jewish Women in Eastern Europe*), p. 311. Z. Sułowski had distinct estimates, stating that by the end of the [sixteenth] century the Commonwealth had a Jewish population of 300,000 (see *idem*, *Mechanizmy ekspansji demograficznej Żydów w miastach polskich XVI–XIX wieku*, „Zeszyty Naukowe KUL”, vol. 17, 1974, no. 3, p. 95, tab. 1), he later lowered it to 120,000 (*idem*, *Jewish Population Figures for the Polish Territories during the last Millennium*, [in:] *International Conference on the History and Culture of Polish Jews. Abstracts*, Jerusalem 1988, p. 110). *Historia Polski*, vol. 1: *Do roku 1764*, pt. 2: *Od połowy XV w.*, ed. H. Łowmiański, Warsaw 1958, p. 138, states that by the end of the sixteenth century there were over 150,000 Jews in Poland.

⁴² “The number of Jews in the 1560s and 1570s can be estimated from 30,000 to no more than 100,000”; *quot.* from: W. Kowalski, *The Placement of Urbanised Scots in the Polish Crown During the Sixteenth and Seventeenth Centuries*, [in:] *Scottish Communities Abroad in the Early Modern Period*, ed. A. Grosjean, S. Murdoch, Leiden–Boston 2005, p. 64. Z. Guldon and J. Wijaczka estimated that in 1569 and 1578 there were „at least 4,500–7,500 Jews in cities.”; see *idem*, *Osadnictwo żydowskie w województwach poznańskim i kaliskim*, p. 72; *comp.* also Z. Guldon, W. Kowalski, *The Jewish Population of Polish Towns*, pp. 67–69. T. Czacki states that in 1550 „only 16,589 Jew of both sexes were counted”; see *Rozprawa o Żydach i Karaitach przez T. Czackiego z dodatkiem wiadomości o życiu i pismach autora*, no. 1, Cracow 1860 (Biblioteka Polska, vol. 30), p. 49.

⁴³ See the Jewish Inventory of 1564.

⁴⁴ M.J. Wiczerski, *Demograficzne aspekty osadnictwa żydowskiego*, chap. 3: *Zaludnienie domów*, pp. 22–36; An analysis of the density of Jewish house in the sixteenth to eighteenth centuries (according to modern scholars) is presented in table 6, where the density varies from 6 to 36 members per household. I. Schiper has a separate (and likely unrealistic) view, that „Polish ghettos, specifically those of larger cities, such as Poznań, Cracow and Lviv, were so packed, that according to some modern studies, a house of 9 to 12 rooms had up to 100 family members in addition to teachers and those only coming in to sleep”; *quot.* from: *idem*, *Rozwój ludności żydowskiej*, p. 28.

sometimes it decreases”.⁴⁵ Only thanks to a resolution passed by the Sejm in 1764 was the first census of the Jewish population in the Polish-Lithuanian Commonwealth carried out in 1765.⁴⁶

In the sixteenth century several municipalities in Greater Poland took action in order to expel their Jewish populations. Such attempts were made in 1520 in Międzyrzecz and Skwierzyna.⁴⁷ King Sigismund the Old allowed this under the condition that the remaining inhabitants of the cities take upon themselves the burden of the Jewish taxes.⁴⁸ Even if the Jewish population left the aforementioned cities, the exodus would have been a rather short one, since in 1532 the Jews from Międzyrzecz and Skwierzyna obtained from the margrave Joachim I from Brandenburg a privilege to visit the fairs in Brandenburg.⁴⁹

Some Greater Polish cities requested the privilege to ban Jews from settling in their lands or owning any property (the so-called *de non tolerandis Judaeis* privilege).⁵⁰ In 1578, King Stefan Batory forbade Jews and Scots from settling in the royal town of Kościan;⁵¹ Koźmin was supposed to receive a similar privilege in 1575.⁵²

⁵¹ LWWK 1628, pt. 1, p. 66: „The residents of this town showed a privilege from the presently ruling His Royal Highness de data Varsaviae in conventu Regni generali die 6 mensis Octobris a. 1597, in which inherendo Stephani regis DN privilegio de data Varsaviae in conventu Regni generali die 7 mensis Martii 1578 allowed them to not suffer Jews or Scots in this town, enabling the local possessors of the starosta’s district to help them if a Jew or Scot wanted to suum fiere [s] domicilium”; see MK 118, ff. 268v–269v (manuscripts online: pther.eu/MK/118/PL_1_4_1-118_0543.html and onwards, access 24.02.2017). The claim of a synagogue in Kościan in 1529 (Z. Guldon, J. Wijaczka, *Procesy o mordy rytualne w Polsce w XVI–XVIII wieku*, Kielce 1995, p. 65) or of a kehilla (idem, *Skupiska i gminy żydowskie w Polsce*, p. 175) is not supported by the source (Biblioteka Kórnicka PAN, manuscript no. 68, f. 149). Father Z. Ciepluch, *Z przeszłości ziemi kościańskiej*, Kościan 1929, p. 10, states

At the turn of the 1590s, an influx of Jews to Wschowa, most likely from Głogów, caused the local authorities to attempt to expel them. On 22 April 1592, king Sigismund III Vasa ordered their exile, and instructed Waclaw Kielczewski, the starosta of Wschowa, to execute this and prevent any potential Jews from settling within or even outside the town's walls. The starosta, who was in conflict with many of the local authorities, and who also benefited from the settlement of the Jewish population, ignored the order, prompting further action from the Wschowa magistracy. On 3 July 1592, the king issued Wschowa the *de non tolerandis Judaeis* privilege.⁵³ Appeals from both sides (the magistracy of the town and the Jewish population) to the gord court, petitions from the Jews to the King and attempt of the local authorities to cut the Jews off from food sources and water led to violent confrontations between the Jews and the townspeople.⁵⁴ Ultimately on 7 December 1594, the court under the King's guidance, ruled that the Jews were to leave, which they did by the end of June 1595.⁵⁵ Some of them relocated to the nearby Dębowa Łąka, from which they were also expelled a few years later.⁵⁶

In 1594 Sigismund III forbade Jews from acquiring new buildings or squares in Kcynia.⁵⁷

Besides royal bans on Jewish settlers in some Greater Polish cities, there were also cases of rulers allowing for their migration into new cities. In 1564, Sigismund Augustus allowed them to move into Koło.⁵⁸ In 1593, Jews from Poznań were given permission to settle in the nearby Stanisławów, which gained a town charter in 1562.⁵⁹ However, by 1599 the town was abolished and annexed by the growing Poznań and turned into the suburb of Łacina.⁶⁰

that "There were no Jews in Kościan until 1778, and in 1811, with the magistrate's permission, there were 13. The partitioning powers led them here, and they left with them too". For more on the first mention of Jews in Kościan see footnote 24.

⁵² Z. Guldon and J. Wijaczka (eidem, *Skupiska i gminy żydowskie w Polsce*, p. 179) state that in 1575 Koźmin received the *de non tolerandis Judaeis* privilege and reference A. Heppner, I. Herzberg, *Aus Vergangenheit und Gegenwart der Juden und der jüdischen Gemeinden* p. 542, which has no mention of this.

⁵³ J. Morgensztern, *Regestry z Metryki Koronnej do historii Żydów w Polsce (1588–1632)*, Biuletyn ŻIH, 1964, no. 51, p. 61, point 9: "Sigismund III, at the request of representatives from Wschowa, grants the town the *de non tolerandis Judaeis* privilege, also banning Jews from living in the surrounding areas, as well as any territories belonging to the court not falling under the town's jurisdiction".

⁵⁴ For more on this subject see Sobczak, *Żydzi*, pp. 74–77; A. Heppner, I. Herzberg, *Aus Vergangenheit und Gegenwart der Juden und der jüdischen Gemeinden*, pp. 398–400; comp. also: D. ⁵⁷ M. Horn, *Regesty dokumentów i ekscerpty z Metryki Koronnej do historii Żydów w Polsce (1697–1795)*, vol. 2: *Rządy Stanisława Augusta (1764–1795)*, pt. 1: 1764–1779, Wrocław 1984, no. 114: „17 June 1765, Warsaw. Stanisław Augustus confirmed the privileges given to the inhabitants of Kcynia, including the one given by Sigismund III on 12 February 1594. In it, after listening to their complaints about the Jews and Scots who hampered their trade, the King forbade the Jews from acquiring any new buildings or sites. He also forbids Jews from hiring servants and renting to tenants. On market days they must sell their produce only from their own houses, and they may not offer salt, fish, mead and any other liquor, as well as bread and grain, both in public and private. They must slay their cattle not in front of their houses, but outside the town. They must bear all burdens of the town along with its other inhabitants. This privilege granted by Sigismund III in 1594 was confirmed subsequently by Władysław IV in Warsaw on 30 April 1633, Michał Korybut Wiśniowiecki in Cracow on 20 November 1669, Jan III in Warsaw on 29 April 1683, and Augustus II in Warsaw on 3 March 1731. Augustus II also added a ban on the sale of liquor by Jews and anyone who was not a brewer”.

⁵⁸ M. Bersohn, *Dyplomatarysz dotyczący Żydów w dawnej Polsce na źródłach archiwalnych osnuty (1388–1782)*, Warsaw 1910 [1911], no. 82: "The King [Sigismund Augustus] grants the Jews of Koło the privilege to trade and earn just as the other inhabitants, as they also bear the burdens and taxes"; *ibidem*, no. 533: "King Sigismund Augustus allows the Jews to live in the town of Koło, trade wholesale and retail, with the exception of mead, and orders that they share the taxes with the Christian inhabitants"; MK 96, f. 273–273v (manuscript online: pther.eu/MK/096/PL_1_4_1-096_0554.html and onwards, access 23.03.2017); MRPS V/2, no. 9337. The Jewish population of Koło is mentioned in 1432 (see footnote 19), but the absence of Koło in the Taxa from 1507 suggests that they may have left the town in the late fifteenth century and returned in the middle of the sixteenth century.

Map 3. Jews in Greater Poland in the second half of the 16th century

“The revised inventory of Jews from the Voivodeships of Greater Poland mentioned above or the tax that Jews had to pay the king’s treasury annually written by inspectors” is dated to 1564.⁶¹ This source created during the inspection of the voivodeships of Greater Poland and Cuyavia in 1564–1565 contains not only tax data, but also some information on Jewish agglomeration in Greater Poland. In it, 13 cities are mentioned (of which Wronki fell under the purview of the nobility): six from the Kalisz Voivodeship (Gniezno, Kalisz, Kcynia, Koło, Pzdry and Nakło) and seven from the Poznań Voivodeship (Poznań, Wronki, Międzyrzecz, Śrem, Skwierzyna, Rogoźno and Piła). The records’ order reflects the sizes of the Jewish populations in the mentioned centers (number of houses), while the amount paid show us the prosperity of the communities (e.g., Nakło and Pzdry had four Jewish households each, but paid more than Koło, which had nine while Międzyrzecz paid twice as much as Śrem, despite having the same number of houses).

⁶¹ Inw. Żydów, pp. 271–273, comp. also scans of the manuscript online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0609.htm and onwards, access 16.03.2017; see also Rybarski, *Handel*, pp. 223–227.

The Jewish community in Poznań was without a doubt one of the largest and wealthiest in the entire Crown. In the fifteenth century, most of the Jewish population lived on Mała Żydowska (Little Jewish) Street. The migration intensified in the mid-fifteenth century, when clothiers and tailors pushed Jews out of Sukiennicza (Clothier) Street. Before the fire of 1464, the Jewish inhabitants controlled most of the properties at the rear of Wielka (Large) Street, Szewska (Cobbler) Street and part of the quarter on Sukiennicza.⁶²

The second half of the sixteenth century was a period of prosperity and growth for the commune of Poznań. Between the mid-sixteenth and the mid-seventeenth centuries, the percentage of Jewish houses to other houses grew from 21.7% to 36%; it is also accepted that the number of Jews increased from 1,500 in 1590 to 2,000 in 1618.⁶³

In 1556 an agreement was reached that allowed for Jewish ownership of 49 houses.⁶⁴ Two years later the authorities of the town and the commune reached another one, permitting for a total of 83 Jewish houses.⁶⁵

This increase was not even halted by the fire of 1590 that ravaged the Jewish quarter, since the “Rejestr domów i kamienic szlacheckich” (The register of houses and tenement houses belonging to the nobility) dating to 1613 mentions “there are 147 Jewish houses and tenement houses in total”.⁶⁶

There exists an exceptional source from October 1619, “Rewizja mieszkań żydowskich w Poznaniu” (The Audit of the Jewish houses in Poznań), which lists the name of the owner, the number of rooms and their landlords and the number of occupants. This royal report listed 3,130 Jews in the Jewish quarter, with 335 living outside of it.⁶⁷

Ignacy Schiper estimated that Jews comprised 11.6% of the urban population of Greater Poland in the second half of the sixteenth century.⁶⁸ Zenon Guldon supposed that in that same period Jews from Greater Poland were “28.6% [...] of Polish Jewry”.⁶⁹ Maria Bogucka recognized that “Multiple centers saw a quick increase in the number of Jews; by the first half of the seventeenth century, they were on average 10% of the inhabitants of Greater and Lesser Poland’s cities”.⁷⁰

For the 160 cities and towns of Greater Poland in the second half of the sixteenth century, including 93 in the Kalisz Voivodeship, 67 in the Poznań Voivodeship, 51 had a proven Jewish community. There were 23 in the Kalisz Voivodeship, 28 in the Poznań Voivodeship (see Annex I and Annex II).

In the Kalisz Voivodeship, out of the 16 Crown cities, 7 (44%) had Jewish inhabitants, while only 16 (25%) of the 63 cities belonging to the nobility had Jews. We could not find any mention of Jewish communities in the cities owned by the Church in the Kalisz Voivodeship in the second half of the sixteenth century.

In the Poznań Voivodeship, there is also a predominance of Crown cities: nine out of 16 (56%) had a confirmed Jewish population in the latter half of the sixteenth century. Much more of the nobility's cities have confirmed Jewish communities than in the Kalisz Voivodeship: 18 out of 38 (47%). One of the 13 clerical cities had a confirmed Jewish population (Bledzew, property of the Cistercians).

In total, one of two Crown cities (16 out of 32) had a Jewish community. This ratio was much smaller in those owned by the nobility (34 out of 101 – 34%). Out of 26 cities owned by the clergy (Church) in Greater Poland, only one was inhabited by Jews in the second half of the sixteenth century.

ANNEX I

THE LIST OF CITIES IN THE KALISZ VOIVODESHIP WITH A CONFIRMED JEWISH POPULATION IN THE SECOND HALF OF THE SIXTEENTH CENTURY

Bnin:

- 1565: „Ab Iudeis undecem fl. 11” (RPWK, pzd, 1565; ASK I 13, f. 073v);
- 1577: „Item Zid ze Bnina fl. 3” (RPWK, pzd, 1577; ASK I 11, p. 412);
- 1578 [3 Decembris]: „Item od zýda ze Bnyna fl. 3” (ASK I 11, p. 626);
- 1579: „Item od czterech Zýdow nędznikow po zlotemu” (ASK I 13, f. 768v).

Chodzież:⁷¹

- 1564: „Qu[attu]or Iudaeis floreni qu[attu]or” (RPWK, kcn, 1564; ASK I 12, f. 571);
- 1565: „Iudaeis quator” (RPWK, kcn, 1565; ASK I 4, f. 219);
- 1576: „Iudei ex oppidis: Chodziesz fl. 5” (RPWK, kcn, 1576; ASK I 12, f. 660v);
- 1577: [Żydzi] „s Chodzieza flor. 7” (RPWK, kcn, 1577; ASK I 13, f. 211);
- 1578: „Zýdzý s Chodzieza fl. czternasczie” (RPWK, kcn, 1578; ASK I 4, f. 353v);
- 1579: „Item od Zidow fl. 22” (RPWK, kcn, 1579; ASK I 4, f. 377).

Gniezno:⁷²

- 1564: „There are 22 Jewish tenement houses and houses in Gniezno. Jews rent five houses from Christians; they have a schoolhouse and synagogue. Each year they give a tax of 40 fl. in moneta to the king. Andrzej from Gorka, the starosta of Gniezno, collected it from them every year”,⁷³
- 1565: „A Iudeis Gnesnen[sibus] fl. 98” (RPWK, gzn, 1565; ASK I 13, f. 803v);
- 1579: „Iudei Gnesnen[ses] numero 110 contributioni publicam pro anno presenti solverunt fl. 100” (RPWK, gzn, 1579; ASK I 3, f. 380v).

Golina:

- 1548⁷⁴

⁷¹ The first mentions of Jacob, a Jew who owned a house and garden, come from the Chodzież town books from the years 1551 and 1553; in 1575, the brothers Marek and Jusek are named, and in 1601, there are mentions of Jusek and Joskowa, and well as Icek and Szymon; S. Chmielewski, *Od lokacji miasta do połowy XVII wieku (1434–1654)*, [in:] *Dzieje Chodzieży*, ed. S. Chmielewski. Chodzież 1998, pp. 50–51. Chmielewski estimates that by the end of the sixteenth century, Chodzież had a Jewish community of around 100; *ibidem*, p. 48. The hearth tax register from 1635 lists 28 Jewish houses in Chodzież; see *Hearth tax 1635*, f. 79. There was a total of 218 buildings in Chodzież, of which 13% were Jewish.

⁷² J. Topolski recognized that for the second half of the sixteenth century in Gniezno “presuming the Jewish community counted 600 people is not an overestimation”; *Dzieje Gniezna*, p. 271. In his text M. Zwierzykowski refers to Topolski's calculation; see M. Zwierzykowski, *Mieszkańcy*, [in:] *Dzieje Gniezna – pierwszej stolicy Polski*, ed. J. Dobosz, Gniezno 2016, p. 251; comp. to A. Warschauer, *Geschichte der Stadt Gnesen*, Posen 1918, pp. 130–133; O.M. Przybyłowicz, „*Wolno będzie Żydom mieć okna szklane, w tych jednak żeby nieotworzyste...*”. *O współistnieniu konwentu klarysek z gminą żydowską w Gnieźnie w XVI–XVII wieku*, [in:] *Cum gratia et amicitia. Studia z dziejów osadnictwa dedykowane Pani Profesor Marcie Młynarskiej-Kaletynowej z okazji 65-lecia działalności naukowej*, ed. D. Adamska, K. Chrzan, A. Pankiewicz, Warsaw–Wrocław 2017, pp. 313–325.

⁷³ Inw. Żydów, p. 272 (manuscript online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0612.htm and onwards, access 16.03.2017).

⁷⁴ E. Feldman, *Najstarsze wzmianki o Żydach*, p. 62.

Iwanowice:

- 1544⁷⁵

Kalisz:

- 1563: „Calis iudei ex ibidem. Ad dominum Marszewski remissi a personis 56 non solverunt” (RPWK, kls, 1563; ASK I 11, p. 783);
- 1563: „Iudei Calissienses non solverunt fl. 56 [numbers crossed out – J.S.] quinquaginta sex iuxta regestrum personarum tantum ad rationem dederunt fl. 100” (RPWK, kls, 1563; ASK I 11, p. 767);
- 1564: „There are 18 Jewish houses in Kalisz along with a schoolhouse and synagogue. They pay a tax to the king every year on Saint Martin’s Day through their elders pro tempore existentibus in Gniezno in the amount of 14 fl. Earlier they paid more but now they give less because six wealthy Jews were killed in Oleśnica when they were traveling from the Silesian Wrocław”;⁷⁶
- 1565 [entry made on 25 V 1566 r. – J.S.]: „A Judeis fl. 89” (RPWK, kls, 1565; ASK I 13, f. 121);
- 1576: „13 Augusti perfidi Iudei Calissienses solverunt fl. 90” (RPWK, kls, 1576; ASK I 12, f.603v);
- [1577]:⁷⁷ „Iudei Calissienses solverunt contributionem alias poglowne fl. 110” (RPWK, kls, 1564; ASK I 13, f. 189v);
- 1579: „A centum triginta Iudeis, defalcando 40 pauperes qui a solutione eiusmodi sunt exempti fl. 130” (RPWK, kls, 1579; ASK I 12, f. 725);
- 1591: „Et eiusdem contributionis de domibus spiritualium, quorundem nobilium et aliquorum Iudeorum retenta esse quinquaginta quattuor fl. et gr. tredecem dixerunt eademque domus de quibus eadem contributio retenta est in in [!] retentis porrexerunt” (RPWK, kls, 1591; ASK I 11, p. 1631).

Kcynia:⁷⁸

- 1564: „A Judeis kezynen[sibus] fl. 31” (RPWK, kcn, 1564; ASK I 12, f. 586);
- 1564: „There are Jewish houses in Kcynia [empty space, the number was omitted – J.S.] with their own schoolhouse and synagogue. They paid a tax of fl. 12 to the king annually through their elders pro tempore existentibus in Gniezno, but they year before they paid 10 fl. 15 gr.”;⁷⁹
- 1565: „A iudeis kezinen[sibus] fl. 31” (RPWK, kcn, 1565; ASK I 4, f. 236);
- 1576: „Iudei ex oppidis: Kczinia fl. 9” (RPWK, kcn, 1576; ASK I 12, f. 660v);
- 1577: „Żydzÿ Kczinsczÿ fl. 12” (RPWK, kcn, 1577; ASK I 13, f. 211);
- 1578: „Żydzÿ kezinszczi fl. osmnasczie” (RPWK, kcn, 1578; ASK I 4, f. 353v);
- 1579: „Od Żydow fl. 20” (RPWK, kcn, 1579; ASK I 4, f. 378).

Kobylin:

- 1578: „From Kobylin I took 5 florins from 5 Jews” (RPWK, pzd, 1578; ASK I 11, p. 626).

⁷⁵ Ibidem.

⁷⁶ Inw. Żydów, p. 272 (manuscript online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0611.htm, access 16.03.2017). “In Kalisz, in the first half sixteenth century (before 1540), there were six houses and a school (synagogue)”; quot. from: M. and K. Piechołkowie, *Krajobraz z menora*, p. 33; H. Zaremska, *Żydzi w średniowiecznym Kaliszu*, p. 171: “during the reign of Sigismund the Old, Jews were allowed to have 6 houses in the city”; see U. Sowina, T. Związek, T. Panecki, *Kalisz in the middle of the sixteenth century* in this volume III.6.13.4.

⁷⁷ The register bears the date 1564 on it and was included in the RPKW under this year; however, the conducted query placed the date at 1577; see M. Słoń, *Written Sources* [in:] in AHP Greater Poland, in this edition II.1.4.

⁷⁸ In 1559, the Jews of Kcynia were accused of murdering a Christian child for ritualistic reasons; see Z. Guldon, J. Wijaczka, *Procesy o mordy rytualne w Polsce*, p. 68; F. Mincer, *Dzieje Kcyni do 1772 r.*, [in:] *Dzieje Kcyni i okolic*, ed. W. Jastrzębski, Kcynia 1993, p. 43; A. Heppner, I. Herzberg, *Aus Vergangenheit und Gegenwart der Juden und der jüdischen Gemeinden*, p. 376. The 1635 tribute records name 20 Jewish houses in Kcynia; see Podymne (Hearth tax) 1635, f. 79; in 1635 there were 186 houses in Kcynia, with 11% belonging to Jews.

⁷⁹ Inw. Żydów, f. 273 (manuscript online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0613.htm, access 16.03.2017).

Koło:⁸⁰

- 1564: „There are 9 Jewish houses in Koło, and the tenth is a school building; they pay an annual tax of 5 fl. to the king on Saint Martin’s Day through their elders in Gniezno”,⁸¹
- 1564: „A Iudeis fl. 31 gr. 12” (RPWK, knn, 1564; ASK I 5, f. 804);
- 1565: „A Iudeis eiusdem civitatis quorum numero sunt quadraginta personae una cum pauperibus fl. 30” (RPWK, knn, 1565; ASK I 13, f. 29v);
- 1579: „Iudei Colen[ses] ratione personarum, quorum numerus est 46 solverunt fl. triginta” (RPWK, knn, 1579; ASK I 13, f. 253).

Konin:

- 1579: „Iudeus de tribus personis respectu paupertatis solvit fl. unum” (RPWK, knn, 1579; ASK I 13, f. 253).

Koźmin:

- 1546/1547: The Jew Jakub Łysy from Koźmin.⁸²

Krotoszyn.⁸³

Kórnik.⁸⁴

Łabiszyn:

- 1564: „A Iudeis Labiszyn fl. 16” (RPWK, kcn, 1564; ASK I 12, f. 586);

⁸⁰ The town books of Koło lists the Jews Szymon and Jakub in 1551; see AGAD, collection 445, Księga miasta Koła 1, sig. 1/445/0/-/1, f. 2 (searcharchives.pl/1/445/0/-/1/skan/full/7s85QBJf_PIVRoC0YyPhSQ, access 23.06.2017).

⁸¹ Inw. Żydów, p. 272 (manuscript online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0611.htm and onwards, access 16.03.2017); The inspection of 1616-1620 in Koto listed 24 Jewish houses; LWWK 1616, p. 329; while the inspection of 1628-1632 listed 20 Jewish houses: “Item from houses, as many as there are settled, of which there were 209, but now there is only 138, 7 of the nobility, 20 Jewish, from each 1 gr 3 den. should be given. Facit fl. 5/11”; quot. from: LWWK 1628, part 1, p. 100.

⁸² The bills from Poznań from 1546/1547 mention the Jew Jakub Łysy from Koźmin; quot. from: A. Warschauer, *Aus den Posener Stadtrechnungen, besonders des XVI. Jahrhunderts*, Posen [1905], p. 4 [separate print from „Zeitschrift der Historischen Gesellschaft für die Provinz Posen”, vol. 20, 1905, issue 2]; A. Heppner, I. Herzberg, *Aus Vergangenheit und Gegenwart der Juden und der jüdischen Gemeinden*, p. 542.

⁸³ There is no consensus in the scholarship as to when the first Jews came to Krotoszyn; the fourteenth, fifteenth, sixteenth and seventeenth are all mentioned. For example: Sh.L. Kirshenboim sets the date in the fourteenth century (without naming any sources): „The Jewish community was established in the fourteenth century, and by virtue of an ancient privilege allowing the Jews to trade, engage in crafts, and build houses, the community prospered”; idem, *Krotoszyn*, [in:] *Encyclopaedia Judaica*, vol. 12, p. 373. H. Berger points to the end of the fifteenth century as the time when Jewish merchants and craftsmen settled in Krotoszyn: „Es ist anzunehmen, daß sich bereits gegen Ende des 15. Jahrhunderts jüdische Kaufleute und Handwerker in Krotoschin niedergelassen und etwa im 16. Jahrhundert eine eigene Gemeinde gebildet haben”; idem, *Geschichte der Juden in Krotoschin*, Krotoschin 1907, p. 3. Referencing the fact that in 1423 the Jewish commune in Krotoszyn was indebted to the church in Czylcz for 166 talars, A. Heppner and I. Herzberg asserted that the group came „at an early stage”: „Daß in Krotoschin sich schon frühzeitig Juden niedergelassen und daselbst ein eingenes Gemeinwesen gebildet haben, geht aus dem Schuldenverzeichnis der jüdischen Gemeinde hervor, in welchem vermerkt ist, daß diese seit dem 26. Januar 1423 der kath. Kirche zu Czylcz 166 Tal. und 20 Sgr. Schulde”; eidem, *Aus Vergangenheit und Gegenwart der Juden und der jüdischen Gemeinden*, p. 561. M. Bałaban casts doubt over the 1423 date and points to 1540 as the actual year the loan was in effect: „На раннее поселение евреевъ въ Кротошыне есть указание въ книгѣ долговъ общины; въ 1423 г. она была должной католической церкви въ Чильць 166 талеровъ. Дата подвергается сомнѣніямъ, но есть указание на этотъ же долгъ въ 1540 г.”; M. Балабанъ, *Кротошынь*, [in:] *Еврейская энциклопедія. Сводъ знаній о еврействѣ и его культурѣ въ прошломъ и настоящемъ*, vol. 9, Sankt-Peterburg 1906-1913, p. 876. R. Marciniak assumes that the Jewish commune in Krotoszyn probably existed in the sixteenth century; see *Krotoszyn*, vol. 2: *Historia*, ed. R. Marciniak, Krotoszyn-Poznań 1996, p. 114. *The Jewish Encyclopedia. A Descriptive Records of the History, Religion, Literature, and Customs of the Jewish People from the Earliest Times to the Present Day*, ed. I. Singer, vol. 10, New York-London 1905, p. 144, offers 1617 as the first reference to the Jews, when the city’s first rabbi, Hirsch ben Samson, makes an appearance in the sources; while Z. Guldon, J. Wijaczka (eidem, *Osadnictwo żydowskie w województwach poznańskim i kaliskim*, p. 68) proclaim the first mention on Jews in Krotoszyn was in 1674.

⁸⁴ “Iacob iudaeo de Curnik” is mentioned in 1505 (see MRPS III, no. 2237 and 2271), in 1507, the Jewish population of Kórnik paid 2 florins (see H. Zaremska, *Żydzi w średniowiecznej Polsce*, p. 245). The next mention of Jews comes from 1618 (see *Lustracja domów chrześcijańskich i pomieszczeń zajętych przez Żydów wbrew ugodzie*, 14 III 1618 r., [in:] *Opisy i lustracje Poznania*, p. 56: „A Jew from Kurnik resides in a chamber in the yard”. It is possible that the Jewish population temporarily relocated to the nearby Bnin.

- 1565: „A iudeis Labischinen[sibus] fl. 16” (RPWK, kcn, 1565; ASK I 4, f. 236);
- 1576: „Iudei ex oppidis: Łabiszin fl. 10” (RPWK, kcn, 1576; ASK I 12, f. 660v);
- 1577: [Żydzi] „z Łabÿssina fl. 15” (RPWK, kcn, 1577; ASK I 13, f. 211);
- 1578: „Żydzi łabisczi fl. szesnasczie” (RPWK, kcn, 1578; ASK I 4, f. 353v);
- 1579: „Item od Żydow fl. 20” (RPWK, kcn, 1579; ASK I 4, f. 377v).

Łekno:

- 1569⁸⁵
- 1571⁸⁶

Łobżenica:

- 1564 (?):⁸⁷ „Judei de Lobzenÿcza fl. 20” (RPWK, nkl, 1564; ASK I 5, 287v);
- 1565: „Judaei de Lobzenicza fl. 20” (RPWK, nkl, 1565; ASK I 5, f. 276);
- 1576: „Lobzenicza 34 zidow fl. 34” (RPWK, nkl, 1576; ASK I 12, f. 668v);
- 1577: „Od Zidow Lobzenica fl. 16” (RPWK, nkl, 1577; ASK I 13, f. 130v);
- 1578: „Żydowie Lobzenicza Ad r[at]i[o]n[e]m personarum 40 fl. 38” (RPWK, nkl, 1578; ASK I 5, f. 833).

Margonin:

- 1565: „A iudeis Margonin fl. 6” (RPWK, kcn, 1565; ASK I 4, f. 236).

Nakło:

- 1564: „There are four Jewish houses in Nakło, and they rent the fifth one. Each year they pay a tax of 8 fl. to the king on Saint Martin’s Day through their elders pro tempore existentibus in Gniezno. Sometimes they pay fl. 10. In 1564, they paid 15 fl.”;⁸⁸
- 1564 (?):⁸⁹ „Judei Naklen[ses] fl. 12” (RPWK, nkl, 1564; ASK I 5, 287v);
- 1565: „Naklen[ses] Iudei fl. 13” (RPWK, nkl, 1565; ASK I 5, f. 276);
- 1576: „Z Nakła żydzi 7 fl. 7” (RPWK, nkl, 1576; ASK I 12, f. 668v);
- 1577: „Z nakła od zidow poglownego fl. 9” (RPWK, nkl, 1577; ASK I 13, f. 130v);
- 1578: „Nakiel Ad r[at]i[o]n[e]m personarum 20 fl. 12” (RPWK, nkl, 1578; ASK I 5, f. 833);
- 1579: „A iudeis personaru[m] 20 solver[un]t fl. 12” (RPWK, nkl, 1579; ASK I 6, f. 047v).

Pleszew:

- 1576⁹⁰

⁸⁵ M. Bersohn, *Dyplomatarjusz dotyczący Żydów*, no. 118 (1569): „The King [Sigismund Augustus] appoints his courtier Stanisław Olszowski to collect 50 złote from cities that received rent payments from their Jewish populations: Skwirczyna, Wronki, Szamotuły, Gniezno, Kalisz, Sieradz, Władysławów, Pakość, Łobżenica, Nakło, Łekno, Brześć, Kowal, Dobrzyń, Płock, Bielsk, Mława, Ciechanów, Płońsk, Gąbin, Łęczycza, Krośnice, Koło, Kcynia, Nieszawa, Rawa, Września, Puzdzy, Rogoźno, Oborniki, Chodecz, Bydgosz i Sochaczew”; MK 107, p. 538 (manuscript online: pther.eu/MK/107/PL_1_4_1-107_0539.html, access 17.03.2016, dated to 2 May 1570).

⁸⁶ MK 110, f. 247: *Pensio Nobilis Iacobi Liessiewski pro Iudeis civitatum inferius descriptorum*, (manuscript online: pther.eu/MK/110/PL_1_4_1-110_0498.html, access 30.03.2017).

⁸⁷ For the dating of the register to 1564, see M. Gochna, *Rejestr poborowy powiatu nakielskiego 1564 r.*, [in:] RPWK, nkl, 1564, Introduction.

⁸⁸ Inw. Żydów, p. 272 (manuscript online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0610.htm and onwards, access 16.03.2017). LWWK 1616, part 1, p. 358: „The Jews did not show any law or contract from the town, which would allow them to live and trade in that town. Of those, who have resided for a long time, and this includes 12 houses, the householder pays to the castle per fl. 4 facit fl. 48. The 4 cotters pay per fl. 2 facit fl. 8. Additionally, each householder and cotter gives one pound of pepper, pound per 10 gr, facit fl. 5/10. Separately with the town all the onera civilia, more aliorum Iudeorum civitates inhabitantium the must bear, although they cannot purchase further housing without the sanction of the town” LWWK 1628, part 1, p. 191: “In the time of last inspection there were 186 houses. Now, there are only 80 occupied, 76 empty, 16 Jewish and a synagogue”.

⁸⁹ For the dating of the register for 1564, see M. Gochna, *Rejestr poborowy powiatu nakielskiego 1564*.

⁹⁰ E. Feldman, *Najstarsze wzmianki o Żydach*, p. 62. „Jews only appeared in Pleszewo as an organized ethnic group at the turn of the eighteenth century. Before that, Jewish merchants only stayed there temporarily, holding no property and renting no houses”, quot. from: R. Witkowski, *Uwag kilka o dziejach gminy żydowskiej w Pleszewie*, “Rocznik Pleszewski”, 2009, p. 177.

Pyzdry:

- 1564: „There are four Jewish houses in Pyzdry and a fifth schoolhouse. They pay a tax of 4 fl. to the king annually on Saint Martin’s Day through their elders to Gniezno”;⁹¹
- 1577: „Zidowie s Piszdr. Zidowie zaplaczilÿ dani poborową fl. 20” (RPWK, pzd, 1577; ASK I 11, p. 412);
- 1578 [3 Decembris]: „Wziąłem od zÿdow w Pyszdrach mieszkających fl. 26” (RPWK, pzd, 1578; ASK I 11, p. 626);
- 1579 [26 Novembris]: „Iudaei pisdrenses wzialem od zÿdow w Pyzdrach mięszkaiących fl. 30” (ASK I 13, f. 765v).

Sępólno Krajeńskie:

- 1564(?):⁹² „Jacob de Sempelbork a quinque personis taleros duos cum medio fl. 2 gr. 22,5; Marek ex eodem oppido a qu[attu]or personis fl. 3” (RPWK, nkl, 1564; ASK I 5, f. 287v);
- 1565: „Marek de Sempolbork a qu[attu]or personis fl. 3. Jakob de Sempolbork a tribus personis fl. 1 gr. 3” (RPWK, nkl, 1565; ASK I 5, f. 276);
- 1577: „Sempelbork od zidow fl. 5” (RPWK, nkl, 1577; ASK I 13, f. 130v);
- 1578: „Sempelbork Ad r[at]o[ne]m personarum 10 fl. 7” (RPWK, nkl, 1578; ASK I 5, f. 833).

Więcbork:

- 1564 (?):⁹³ „Ex oppido Wieczbork a quinque personis fl. 3 gr. 15” (RPWK, nkl, 1564; ASK I 5, f. 287v);
- 1565: „Iudaei Jacob de wieczbork a qu[attu]or personis fl. 3 gr. 9” (RPWK, nkl, 1565; ASK I 5, f. 276);
- 1576: „Wieczbork zÿdow 3 fl. 3” (RPWK, nkl, 1576; ASK I 12, f. 668v);
- 1577: „Od Zidow Wieczbork personis 7 fl. 7” (RPWK, nkl, 1577; ASK I 13, f. 130v);
- 1578: „Zÿdowie Wiendzbork Ad r[at]o[ne]m personarum 8 fl. 5” (RPWK, nkl, 1578; ASK I 5, f. 833).

Września:⁹⁴

- 1565: „A Iudeis wrzesn[ensibus] fl. 36” (RPWK, gzn, 1565; ASK I 13, f. 803v);
- 1579: „Iudei ex Wrzasnia numero 75 solverunt contributioni anni presentis fl. 60” (ASK I 3, f. 380v).

Wysoka:

- 1564 (?):⁹⁵ „Ex oppido Vÿszoka fl. 1 gr. 3” (RPWK, nkl, 1564; ASK I 5, f. 287v);
- 1578: „Zÿdowie Wissoka fl. 2” (ASK I 5, f. 833).

Złotów:

- 1564 r.(?):⁹⁶ „[Judei] Ex oppido Zlothowo fl. 3” (RPWK, nkl, 1564; ASK I 5, f. 287v);
- 1565 r.: „Joachim Bak de zlothowo a tribus personis fl. 2, Abram Zlothowo tribus personis fl. 2” (RPWK, nkl, 1565; ASK I 5, f. 276);

⁹¹ Inw. Żydów, f. 272 (manuscript online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0612.htm, access 16.03.2017). The inspections from 1616–1620: “There are 7 Jewish houses, in which there are 15 householders and cotters, that is: 7 householders, each one must give 2 pounds of pepper, 8 cotters, each of which much give 1 pound of pepper, pound per 20 gr; facit fl. 14/20. All the Jews must give a pound of saffron, pound valoris fl. 8, facit fl. 8”; quot. from: LWWK 1616, part 1, p. 56.

⁹² For the dating of the register for 1564 see M. Gochna, *Rejestr poborowy powiatu nakielskiego 1564 r.*

⁹³ For the dating of the register for 1564 see *ibidem*.

⁹⁴ E. Feldman, *Najstarsze wzmianki o Żydach*, p. 62, gives the year 1538. S. Mazurkiewicz thinks that: “The Jewish commune in Września came to be in the fourteenth century. A synagogue was built to the east of the market square then.”; he also writes: „The middle of the fourteenth century, probably during the city’s establishment, was when the first Jews arrived”. According to him: „The oldest sources that confirm a Jewish presence in Września come from 23 January 1460 and 17 June 1528”, but does not list those sources; see *idem*, *W okresie staropolskim (1256–1793)*, [in:] *Września historia miasta*, ed. M. Torzewski, Września 2006, pp. 65, 77.

⁹⁵ For the dating of the register for 1564 see M. Gochna, *Rejestr poborowy powiatu nakielskiego 1564 r.*

⁹⁶ For the dating of the register for 1564 see *ibidem*.

- 1578 r.: „Żydowie Zlotowo Ad r[at]o[ne]m personarum 17 fl. 9” (RPWK, nkl, 1578; ASK I 5, f. 833).
- Żerków⁹⁷

ANNEX II

THE LIST OF CITIES IN THE POZNAŃ VOIVODESHIP WITH A CONFIRMED JEWISH POPULATION IN THE SECOND HALF OF THE SIXTEENTH CENTURY

Bledzew:

- 1543;⁹⁸
- 1563: „Iudei de Miedzirzecz et Bledziow [...] simul fl. 90” (RPWP, pzn, 1563; ASK I 5, f. 247v).

Czarnków:⁹⁹

- 1567: „Czarnkow iudeus unus pauperimus. Ex sorte magnifici domini castellani Szremski dedit fl. 1” (RPWP, pzn, 1567; ASK I 5, f. 343v).

Dębowa-Łąka:

- 1595-1599.¹⁰⁰

Grodzisk:¹⁰¹

- 1513: „Data est libertas 2 annorum ab exactionibus et contributionibus iudaeis in oppido Grodzysko residentibus”;¹⁰²
- 1563: „Iudei ex Grodzisko fl. 26” (ASK I 4, f. 212v);
- 1566: „Item Iudei eiusdem oppidi [Grodzisko] solverunt fl. 28” (RPWP, ksc, 1565; ASK I 4, f. 293v);
- 1567: „Iudaei [...] Ex Grodzisko 21 junii contributionem S[acrae] R[egiae] M[ai]s[ta]tis dederunt in moneta fl. 15” (RPWP, ksc, 1567; ASK I 5, f. 392);
- 1576: „Iudaei eiusdem oppidi solverunt a 24 capitibus fl. 15 in moneta” (RPWP, ksc, 1576; ASK I 5, f. 603);
- 1577: „Die 18 Octobris, Felix et Jdzko Iudaei de Grodzisko suo et aliorum omnium nominibus ad rationem capitum ibidem degentium contributionis regni dederunt fl. 24” (ASK I 5, f. 759v).

Kamionna:¹⁰³

- 1563: „Item Iudei ex eadem Camiona Augustii 11 fl. 7” (RPWP, pzn, 1563; ASK I 5, f. 246);
- 1567: „Iudei in Kamiona numeraverunt fl. 4” (RPWP, pzn, 1567; ASK I 5, f. 343v);

⁹⁷ According to Father M. Łukaszewicz: „Only after being reauthorized by Władysław Jagiełło did the Jews rebuild their quarter and, on the ruins of the old synagogue, raised a new one, which had lasted until our times, until 14 August 1861, when it was consumed by the flames of the fire in Żerków. [...] Twenty years ago the deceased rabbi ben Abram, who was their 35th rabbi told me, that their cemetery had a few tombstones that sank deep into the ground and had inscriptions 600 years old, as they were from the year 5029”; idem, *Strażnica Ostrów i miasto Żerków*, pp. 50–51.

⁹⁸ E. Feldman, *Najstarsze wzmianki o Żydach*, p. 60 (*Bledzewe*). There is no information on the Jewish population in Bledzew until the mid-sixteenth century; see K. Górską-Gołaską, *Bledzew*, [in:] SHGPoz, part I, pp. 57–58 (www.slownik.ihpan.edu.pl/search.php?id=16024, access 12.06.2017).

⁹⁹ There is no information on the Jewish population in Czarnków until the mid-sixteenth century; see K. Górską-Gołaską, *Czarnków*, [in:] SHGPoz, part I, p. 288–289 (www.slownik.ihpan.edu.pl/search.php?id=17340, access 12.06.2017); eadem, *Czarnków – dobra*, [in:] SHGPoz, part I, pp. 289–295 (www.slownik.ihpan.edu.pl/search.php?id=17341, access 12.06.2017).

¹⁰⁰ After their exile from Wschowa in 1595, they relocated to Dębowa Łąka. “The town books still mention a Jew from Dębowa Łąka in 1599”; Sobczak, *Żydzi*, p. 78, footnote 23.

¹⁰¹ The hearth tax register from 1631 lists 26 Jewish houses in Grodzisk (including 4 large houses); see Hearth tax (Podymne) 1631, f. 28v. They constitute 13% of the 204 houses mentioned in the tax register of 1631.

¹⁰² MRPS IV/2, no. 10426.

¹⁰³ There is no information on the Jewish population in Kamionna until the mid-sixteenth century; see J. Luciński, *Kamionna*, [in:] SHGPoz, part II, pp. 118–121 (www.slownik.ihpan.edu.pl/search.php?q=kamionna&d=7&t=1, access 20.06.2017).

- 1577: „Die 15 Octobris, Judaei Jozeph Tkać et Abram Bazwieg de oppido Kamiona a capitibus suis uxorum liberorumque suorum 6 solverunt fl. 6” (RPWP, pzn, 1577; ASK I 5, f. 740).

Kościan:

- 1531.¹⁰⁴

Książ:¹⁰⁵

- 1563: „Judei ex Książs quorum persone 19 qui et artifices sunt nihil” (ASK I 4, f. 212v).

Leszno:

- 1551.¹⁰⁶

Lwówek:

- 1578.¹⁰⁷

Międzychód:

- 1577.¹⁰⁸ „Die 16 Octobris, Marcus Judaeus de Medzireć a persona sua, uxoris, duorum liberorum ac duorum famulorum a singulis capitibus per fl. 1 solvit fl. 6” (RPWP, pzn, 1577; ASK I 5, f. 744).

Międzyrzecz:

- 1553: „Miedzirzecz oppidum ibidem iudei a focis fl. 12” (RPWP, pzn, 1553; ASK I 5, f. 184);
- 1563: „Judei de Miedzirzecz et Bliedziow [...] simul fl. 90” (RPWP, pzn, 1563; ASK I 5, f. 247v);
- 1564: „There are 18 Jewish houses in Międzyrzecz, one school and a synagogue. They pay a tax of 26 fl. to king annually on Saint Martin’s day through their elders in Gniezno; sometimes they pay 30 fl.”;¹⁰⁹
- 1567: „Miedrzirenczen judei dederunt fl. 70” (RPWP, pzn, 1567; ASK I 5, f. 343v);
- 1570: „Judei de Miedzirzecz poglowia szwego daly fl. 45” (RPWP, pzn, 1570; ASK I 5, f. 415);
- 1576: „Judei ibidem de domibus 3, a capitibus 18 pauperibus solverunt fl. 16. Caeteri conflagrati” (RPWP, pzn, 1576; ASK I 5, f. 556);
- 1577: „Judaei Medzirecenses solverunt fl. 16 caetera igne conflagrata” (RPWP, pzn, 1577; ASK I 5, f. 743).

Mirosławiec (Frydland):

- 1563: „Friedland item a Iudeis fl. 2” (RPWP, wlc, 1563; ASK I 5, f. 201).

¹⁰⁴ E. Feldman, *Najstarsze wzmianki o Żydach*, p. 60. There is no information on the Jewish population in Kościan until the mid-sixteenth century; see K. Górską-Gołąska, *Kościan*, [in:] SHGPoz, part II, pp. 342–407 (www.slownik.ihpan.edu.pl/search.php?q=ko%C5%9Bcian&d=7&t=1, access 25.02.2017); see footnote 24.

¹⁰⁵ There is no information on the Jewish population in Książ until the mid-sixteenth century; see T. Jurek, *Książ*, [in:] SHGPoz, part II, pp. 527–530 (www.slownik.ihpan.edu.pl/search.php?q=ksi%C4%85%C5%BC&d=7&t=1, access 22.06.2017).

¹⁰⁶ E. Feldman, *Najstarsze wzmianki o Żydach*, p. 61. There is no information on the Jewish population in Leszno until the mid-sixteenth century; see T. Jurek, *Leszno*. The hearth tax register of 1631 records 27 Jewish houses; see *Hearth tax (Podymne) 1631*, f. 29. They were 8% of the 335 buildings listed.

¹⁰⁷ E. Feldman, *Najstarsze wzmianki o Żydach*, p. 61. There is no information on the Jewish population in Lwówek until the mid-sixteenth century; see J. Luciński, G. Rutkowska, *Lwówek*, [in:] SHGPoz, part II, pp. 696–708 (www.slownik.ihpan.edu.pl/search.php?q=Lw%C3%B3wek&d=7&t=1, access 9.06.2017).

¹⁰⁸ There is no information on the Jewish population in Międzychód until the mid-sixteenth century; see J. Luciński, *Międzychód*, [in:] SHGPoz, part III, pp. 122–125 (www.slownik.ihpan.edu.pl/search.php?q=mi%C4%99dzych%C3%B3d&d=7&t=1, access 22.06.2017).

¹⁰⁹ Inw. Żydów, ff. 271–272 (MS online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0610.htm, access 23.03.2017). LWWK 1564, pt. 1, p. 162: “There are 18 Jewish houses. Each house pays 30 gr, facit fl. 18 and 2 pounds of pepper at 24 gr, [facit] fl. 28 gr 24. All the Jews need to give a stone of olive oil, a pound at 6 gr, [facit] fl. 4 gr 24 and half a pound of saffron of Frankfurt measurment, [facit] fl. 4. Jews, who are cotters and of whom there is 5, pay 15 gr, [facit] fl. 2 gr 15 and a pound of pepper, [facit] fl. 4” LWWK 1616, part 1, p. 5: “There are 27 Jewish houses. From each house they pay a taler, each taler being at fl. 1/6, and two pounds of pepper, pound at 30 gr, facit fl. 57. All these Jews need to give a stone of olive oil, a pound per 7 gr, facit fl. 2/24. Also, half a pound of saffron of Frankfurt measurement valoris fl. 4. Jews who are cotters and of whom there is 8, pay rent at 18 gr and a pound of pepper, pound at 20 gr, facit fl. 10/4”.

Oborniki:¹¹⁰

- 1553: „Obornykÿ oppidum ibidem Iudei tres in una domo manentes et unum focum habentes pauperimi homines fl. 1 solverunt” (RPWP, pzn, 1553; ASK I 5, f. 184);
- 1564: mention of a synagogue;¹¹¹
- 1571.¹¹²

Opalenica:¹¹³

- 1563: „Judei ex Opalienicza fl. 5” (ASK I 4, f. 212v);
- 1576: „Iudaeus Salomon inquilinus in Opalenicza a se ipso, uxore et liberis solvit fl. 2 gr. 15” (RPWP, ksc, 1576; ASK I 5, f. 617);
- 1577: „Die 18 Octobris, Salomon Iudaeus de Opalenicza contributionis publicae solvit fl. 2 gr. 15” (ASK I 5, f. 759).

Piła:

- 1563: „[...] Iudei ex eadem Piła solverunt fl. 9” (RPWP, ksc, 1563; ASK I 5, f. 246);
- 1564: „There are three Jewish houses in Piła; they have their own synagogue. They pay a tax of 4 fl. 24 gr. annually to the king on Saint Martin’s day through their elders pro tempore existentibus in Gniezno”;¹¹⁴
- 1569: „Five Jewish houses and each house pays rent of 1 fl. 22 gr.; 8 fl. 20 gr. Through their elders in Gniezno, they paid a royal tax of 7 ½ fl.”;¹¹⁵
- 1578: „Iudaei, Anno 1578 die 10 Martii, Abram Haske, Abram Bagk Iudaei seniores ex oppido Piela suo et aliorum nomine Iudaeorum ad rationem personarum ibi degentium contributionis publice dederunt fl. 10” (ASK I 5, f. 747);
- 1585: Jew Jakub from Piła.¹¹⁶

Pniewy:¹¹⁷

- 1563: „Item Iudei eiusdem oppidi [Pniewi] solverunt fl. 19 gr. 10” (RPWP, pzn, 1563; ASK I 5, f. 247);
- 1567: „Judei de Pniewi numeraverunt [fl.] 7” (RPWP, pzn, 1567; ASK I 5, f. 343v);
- 1576: „Iudei eiusdem oppidi [Pniewy] in summa solverunt fl. 15. Ratio paupertatis habita” (RPWP, pzn, 1576; ASK I 5, f. 561);
- 1577: „Die 17 Octobris, Abram Sklarz et Jacub Kuchman Iudei seniores suo et aliorum Iudeorum nominibus ad rationem capitum ibi degentium contributionis publicae extradiderunt fl. 18” (RPWP, pzn, 1577; ASK I 5, f. 748).

¹¹⁰ The hearth tax register of 1631 lists 35 Jewish houses in Oborniki; see *Hearth tax (Podymne) 1631*, f. 30. They were 24% of the 147 buildings listed.

¹¹¹ A synagogue is mentioned in 1564: [M.] Maćkowiak, *Kronika miasta powiatowego Oborniki*, Oborniki 1926, p. 9: „The only thing the document says about the Jews is that they already had a synagogue by 1564”; similarly Z. Chodyła, *Czasy nowożytne*, [in:] *Dzieje Obornik*, ed. C. Łuczak, Poznań 1990, p. 66, 75. For earlier mentions of Jews in Oborniki, see G. Rutkowska, *Oborniki*, [in:] SHGPoz, part III, p. 355, point 3Ab. (www.slownik.ihpan.edu.pl/search.php?q=oborniki&d=7&t=1, access: 25.03.2017).

¹¹² MK 110, f. 247: *Pensio Nobilis Iacobi Liessiewski pro Iudeis civitatum inferius descriptorum* (manuscript online: pther.eu/MK/110/PL_1_4_1-110_0498.html and onwards, access 9.06.2017).

¹¹³ There is no information on the Jewish population in Opalenica until the mid-sixteenth century; see T. Jurek, *Opalenica*, [in:] SHGPoz, part III, pp. 424–427 (www.slownik.ihpan.edu.pl/search.php?q=opalenica&d=7&t=1, access 22.06.2017).

¹¹⁴ Inw. Żydów, p. 272 (MS online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0610.htm, access 23.03.2017). LWWK 1564, part 1, p. 139: “Three Jewish houses, each paying a rent of fl. 1 gr 22, facit fl. 5 gr 6”.

¹¹⁵ LWWK 1569, f. 7v (13v); see K. Górka-Gołaska, *Piła*, [in:] SHGPoz, part III, p. 667. (www.slownik.ihpan.edu.pl/search.php?id=21519&q=Piła&d=7&t=1, access 25.04.2017).

¹¹⁶ On 17 November 1585 *Jakub Zyd spilly* is mentioned, see: Rach. kom. cel., sig. C. 11, „Regestr wybierania czła K. Je. Msci na komorze wronieczki A.D. 1585”, f. 3v; *Księga komory celnej we Wronkach z 1585 i początku 1586 roku*, [in:] *Księgi celne Korony z drugiej połowy XVI wieku*, ed. S. Kazusek, Kielce 2017, p. 193.

¹¹⁷ The first mention of Jews in Pniewy was in 1553; see. G. Rutkowska, *Pniewy*, [in:] SHGPoz, part III, p. 697.

Poznań:¹¹⁸

- 1553: „Poznania civitas ibidem Iudei a focus 113 fl. 113” (RPWP, pzn, 1553; ASK I 5, f. 184);
- 1563: „Item Iudei poznanienses, Septembris XIII, contributionum pro eis laudata solverunt fl. 1000” (RPWP, pzn, 1563; ASK I 5, f. 243);
- 1564: „There are 50 Jewish tenement houses and houses, in Poznań; there is a house of doctors and three houses for synagogues, where schools and cantors live. Two synagogues, and 43 houses rented from Christians, sometimes more, sometimes less. They pay 200 fl. to the King’s treasury annually”,¹¹⁹
- 1567: „Posnanienses iudei dederunt [fl.] 1000” (RPWP, pzn, 1567; ASK I 5, f. 343v);
- 1577: „Die 18 Octobris, Seniores Iudaei Posnanienses nomine suo et aliorum omnium Iudaeorum nominibus in civitate degentium contributionis anno presenti laudate ad ratione capitum seu personarum Iudaicarum dederunt fl. 850” (RPWP, pzn, 1577; ASK I 5, f. 736).

Rogoźno:

- 1563: „Ibidem [Rogozno] a iudeis fl. 15” (RPWP, pzn, 1563; ASK I 5, f. 248);
- 1564: „There are five Jewish houses in Rogoźno and a schoolhouse. They pay a tax to the king annually through their elders to Gniezno pro tempore existentibus [no amount given – J.S.];¹²⁰
- 1567: „Rogozinenses iudei dederunt pauperes fl. 8” (RPWP, pzn, 1567; ASK I 5, f. 343v);
- 1571.¹²¹

Sieraków:

- 1577: „Die 18 Octobris, Iudaei a personis 4 ibi habitantibus ad rationem dederunt fl. 4” (RPWP, pzn, 1577; ASK I 5, f. 755).

Skwierzyna:¹²²

- 1553: „Sqwyerzyna oppidum, ibidem iudei a focus 12 [fl.] 12” (RPWP, pzn, 1553; ASK I 5, f. 184);
- 1564: „There are 17 Jewish houses along with a schoolhouse and a synagogue in Skwierzyna. They pay a tax of 15 fl. to the king annually on Saint Martin’s day through their elders pro tempore existentibus to Gniezno”,¹²³
- 1567: „Squirzinenses iudei dederunt [fl.] 40” (RPWP, pzn, 1567; ASK I 5, f. 343v);

¹¹⁸ In 1578, Poznań payed 1058 florins in Jewish poll taxes; see A. Pawiński, *Skarbowość w Polsce i jej dzieje za Stefana Batorego*, Warsaw 1881 (*Źródła Dziejowe*, vol. 8), p. 177. S. Waszak assumes that „the Jewish population within the city walls counted between 1400 and 1700”; idem, *Ludność i zabudowa*, p. 113. For more on the Jewish quarter in Poznań, see also P. Dembiński, *Poznań settlement complex*, in this volume, footnote 78, in this edition III.6.24.4.

¹¹⁹ Inw. Żydów, p. 271; „They evidenced it with documents and a mandate on parchment with the seal of the late king Sigismund, de data Cracoviae, fer. 4 prox. p. f. Conversionis s. Pauli ap. [27 January], anno 1519, and signed by His Royal Highness, in which he ordered that the Jews of Poznań were not to be taxed more than the sum he had established with them, so that each year they would not pay more than 200 zł in coin, which they were to give to their elders, who in turn would pass it on to Jan Rachemberg, qui illos de eo censu ipso nostro 200 fl. praedictorum quietabit, nos vero eius quietationem suscipiemus. The second mandate of the currently ruling His Royal Highness de data anno 1564, signed by Piotr Miskowski R[egni] P[oloniae] vicecancellarii, orders that with the 200 zł in coin, that must be annually given to the Royal Treasury on the day of St. Martin, exhibitori mandati ad manus numerent atque tradant” (manuscript online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0609.htm and onwards, access 16.03.2017).

¹²⁰ Inw. Żydów, p. 273 (MS online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0613.htm, access 23.03.2017); LWWK 1564, part 1, p. 246: „There are 5 Jews, each pays a red złoty per house, fecit fl. 8 gr 20”.

¹²¹ MK 110, f. 247 : *Pensio Nobilis Iacobi Liessiewski pro Iudeis civitatum inferius descriptorum* (manuscript online: pther.eu/MK/110/PL_1_4_1-110_0498.html and onwards, access 8.06.2017).

¹²² The hearth tax register of 1631 lists 34 Jewish houses in Skwierzyna; see Hearth tax (Podymne) 1631, f. 32. They were 12% of the 284 buildings listed.

¹²³ Inw. Żydów, f. 272 (MS online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0610.htm, access 23.03.2017); LWWK 1564, part 1, p. 167: “Jews pay 30 gr rent from each house, [facit] fl. 17 and 2 pounds of pepper, pound at 24 gr, facit f. 27 gr 6, there are 17 houses. And all need to give a stone of olive oil, pound at 6 gr, [facit] fl. 4 gr 24 and half a pound of saffron, facit fl. 4. There are 5 Jews who are cotters, each pays 15 gr of rent, [facit] fl. 2 gr 15 and a pound of pepper, [facit] fl. 4”; LWWK 1616, part 1, p. 14: „There are 23 Jewish houses, [and] each pays a taler, [Start a new sentence here.] each taler is estimated at fl. 1/6, as well as 2 pounds of pepper, the pound at 20 gr [facit] fl. 42/28. All need to give a stone of olive oil valoris fl. 2/24. Also half a pound of saffron of Frankfurt measurement, estimating it at fl. 4. There are 10 Jews, who are cotters. They pay 18 gr of rent and a pound of pepper, pound at 20 gr, facit fl. 12/20”.

Wschowa:

- 1581: Simon Jew.¹³³

(2017)

Translated by Karolina Frank

¹³⁰ E. Feldman, *Najstarsze wzmianki o Żydach*, p. 61.

¹³¹ *Ibidem*.

¹³² Inw. Żydów, f. 272 (MS online: agadd.home.net.pl/metrykalia/4/7/sygn.%205/pages/1_4_0_7_5_0611.htm, access 23.03.2017). LWWK 1564, part 1, p. 199: „there are 35 Jewish houses”.

¹³³ „The first documented sources about the Jewish inhabitants of Wschowa come from the end of the sixteenth century. The first to settle was Simon the Jew in 1581. He lived within the city’s borders, but on land belonging to the starosta. More Jewish surnames can be found in municipal records after 1592. After further study, it would appear that the Jewish population did not surpass 150, including women and children.”, quot. from: Sobczak, Żydzi, pp. 74–75; A. Heppner, I. Herzberg, *Aus Vergangenheit und Gegenwart der Juden und der jüdischen Gemeinden*, p. 398; comp. to D. Czwojdrak, *Żydowskie osadnictwo*, pp. 82–83; Nowakowski, Wschowa, p. 131. There is no data backing the claim that Wschowa had Jewish inhabitants in the years 1461–1462. They were all banished in 1595.

III.2.2.5 SIERADZ AND ŁĘCZYCA VOIVODESHIPS

Henryk Rutkowski

In analogy to the previously published volumes of the Atlas, centres and borders of territorial units of the Catholic Church (Latin) were marked in Sieradz and Łęczyca Voivodeships territory. The basic and the additional map of Church division, the latter drawn on a scale two times smaller than the former, show all administrative centres that existed at the end of the sixteenth century, i.e. the archdeaconry, deanery and parish seats. Also, both maps show the diocese and archdeaconry borders. The differences lie in the choice of the lesser rank borderlines: the basic map contains the borders of the parishes and the additional map – deanery borders.

The described territory was situated within the range of two dioceses. The entire Łęczyca Voivodeship and the majority of Sieradz Voivodeship belonged to Gniezno diocese. Here we would like to emphasize, that the idea of calling Gniezno diocese an archdiocese, popular in historiography, seems wrong in the case of the sixteenth century (it is an anachronism in the case of the Middle Ages).¹ Ostrzeszów land, politically related to Silesia for a long time, belonged to the Wrocław diocese.

The Sieradz–Łęczyca territory, subject to Gniezno archbishopric, was divided mainly into three units: Łęczyca and Uniejów archdeaconries and Wieluń territory. The latter was equal to an archdeaconry and sometimes it was called so – inaccurately, as due to the absence of an archdeacon in the Wieluń collegiate church his function was performed by a provost.² Various parts of the borderland belonged to the archdeaconries of: Kalisz, Gniezno, Łowicz and Kurzelów.³ The archdeaconries had existed for several centuries and only the Łowicz archdeaconry was created in the sixteenth century. It was established by archbishop Jan Łaski in 1522 from the part of Łęczyca archdeaconry that comprised

¹ There is no entry of ‘archdiocese’ (‘archidioecesis’) in DMLP or in *Słownik staropolski*. In Jakub Sawicki’s work on the Gniezno diocese synods from the beginning of the fifteenth century ‘archdiocese’ appears in the sources from 1572, but still the titles of the 1612 statutes include ‘diocese synod’ not ‘archdiocese’ (*Concilia Poloniae*, vol. 5, pp. 147, 204 and passim). The situation in the Lwów diocese was similar, where the title of the 1614 statutes mentions the archdiocese synod and the titles from 1593, 1641 and 1765 – diocese synods (Stanisław Litak’s information). So for a long time there was no rule in the Church documentation written in Latin to call a diocese ruled by an archbishop an archdiocese. The term ‘archdiocese’ was accepted in the Polish language, in general (common) language, even later, probably no sooner than the twentieth century. Archdiocese is lacking not only from *Słownik polszczyzny XVI wieku*, but also in the nineteenth century works: Linde’s dictionary (only as a reference to archbishopric) and in Orgelbrand’s encyclopaedia; even *Podręczna encyklopedia kościelna* (vol. 1–2, 1904) followed Linde. *Słownik języka polskiego* (PWN, vol. 1, 1978, p. 74) offers two definitions of the word, which provide both: correct meaning (a diocese ruled by an archbishop) and an incorrect one (a Church province). Interchangeable usage of the terms archdiocese and metropolis (province) is noted in the *Encyklopedia katolicka* (vol. 1, 1973, col. 873 n.). Earlier, the term ‘archbishopric’ was used to denote province, e.g. in the sixteenth century, as attested by Piotr Skarga’s text from 1577 (see quotation in *Słowniku polszczyzny XVI wieku*, vol. 1, 1966, p. 205 n.). According to *Encyklopedia katolicka*, the origin of the archdeaconry is uncertain. It could be speculated, that this name – resulting from the desire of higher clergy to distinguish themselves with dignified titles – came from the example provided by the names of secular offices (county, duchy), as there is no difference between archdiocese and diocese other than the presence of an ordinary. See *Dictionnaire de droit canonique*, vol. 4, Paris 1949, col. 1263 n. In this publication there is no separate entry for archidiocèse. What is more, this word is not listed by Émile Littré, *Dictionnaire de la langue française* (vol. 1, 1959). It could be seen as a delay in relation to Polish. In German it is similar. The matter would require some research, these remarks are just the result of superficial observation.

² The case was explained by Rosin, *Ziemia wieluńska*, pp. 87–90.

³ See Annex A: Church administrative divisions.

Rawa and Bedlno deaneries, however, already in 1528 the latter was returned to Łęczyca.⁴ The maps reveal great conformity of the diocese borders, especially in the case of the borderlines of archdeaconries and voivodeships, and lands. They also reveal discrepancies in that matter. The state of the borders towards the end of the sixteenth century was, naturally, a result of changes occurring in previous centuries, where there were cases of adjusting the Church division to the political division and the other way round.⁵

When the importance of deaneries in the Church increased following the Council of Trent, their network in Gniezno diocese was reorganized and extended. It probably occurred between 1583 and 1589, but we have access to detailed information about contemporary territorial structure of the dioceses only from 1628. Then deaneries were present in all archdeaconries, and only ‘the officialate, that is Wieluń territory’ was deprived of them.⁶ The deanery division from the end of the sixteenth century is earlier attested to in two archdeaconries covering the borderland of the area of our interest: in Kalisz archdeaconry (two visitations from 1603 and 1611) and in Gniezno archdeaconry (1608–1609 visitation).

Parishes, the lowest units of the territorial organization of the Catholic Church, also functioned in state administration, as it lacked units smaller than districts (for instance, royal universals were announced from the pulpit, the parishes served as an element that allowed the organization of tax collection and tax registry). Apart from normal parishes, there existed relatively few districts, in which the service was provided by subsidiary churches; they were mainly former parochial churches that for various reasons were affiliated to adjoining units. Such churches we treated as parishes. It must be noted here, that there is much terminological confusion around assistant churches and chapels.⁷ This, and the additional insufficient source information, rendered some of our decisions on acknowledging a church a parish centre, or not, purely hypothetical in character. Some difficulties have also arisen around parochial churches occupied by dissidents. Even if we possessed information, that such situation was long-lasting, but the Catholic Church authorities refused to move the parish to another village, we included such a church. For example, we have marked Danków parish (Wieluń territory), even though the local church belonged to the protestants, and its functions for a long time were executed by a chapel (church?) in Zajączki.⁸ The tax collectors did the same when writing their registers.

The source base for the parochial network consisted mostly of church sources, especially those, which list all settlements belonging to particular parishes. We do not possess such materials for the second half of the sixteenth century, but given the long-term nature of parochial divisions, we can assume that earlier or later information is similar in case of our chronological range.

The list of all parochial churches and some subsidiary churches of Gniezno diocese, and their affiliation to higher-rank administrative units, is included in the acts of the diocese synod of 1628. Unfortunately, there are some gaps in it.⁹ Stanisław Librowski’s work, constituting an alphabetical list of all parishes of Gniezno diocese in the Old Polish period with the time of their functioning,¹⁰ helped us use this source properly, especially when it came to determining churches built after 1600. We have also used Stanisław Litak’s study; the accuracy of the data allowed us to solve some of our doubts.¹¹ Church visitations, the best basis for determining the range of a parish, have survived only partially

⁶ Wieluń territory was indicated as a part of Uniejów archdeaconry; Constitutiones 1628, f. C4–E3; *Encyklopedia Katolicka*, vol. 5, 1989, col. 1182.

⁷ Rosin, *Ziemia wieluńska*, p. 95; Librowski, *Repertorium*, part 1, no. 1, p. 86; S. Litak, *Struktura terytorialna Kościoła łacińskiego w Polsce w 1772 roku*, Lublin 1980, pp. 20–22.

⁸ Constitutiones 1628, f. E; Librowski, *Repertorium*, part 1, no. 1, pp. 84, 145; Librowski, *Repertorium*, part 4, pp. 86, 170.

⁹ Some names were given in an incorrect form, e.g. in Warta deanery Mikołajewice were listed instead of Miłkowice, that were earlier – correctly – entered in Uniejów deanery. Some parishes were omitted, for example: Dobra in Zgierz deanery, Boleszczyń in Warta deanery, Łobudzice in Szadek deanery, Działoszyn, Szczyty and Trębaczów in Brzeziny deanery – Constitutiones 1628.

¹⁰ Librowski, *Repertorium*, part 4, pp. 53–174.

¹¹ Litak, *Kościół*, pp. 16, 167–207. Here S. Litak uses his previous installements about parishes, updating his former publication (S. Litak, *Struktura*).

for Sieradz-Łęczyca territory. Our area was the subject of the following visitations of Gniezno diocese (we provide the oldest surviving sources): visitation of Kalisz and Staw deaneries from 1603–1607, and of Konin and Sapolno from 1608–1609, the visitation of the archdeaconry of Uniejów from 1635–1636 and of the Wieluń territory from 1668–1669.¹² As such, the leading role fell to the register of belongings of Gniezno diocese, written down by Jan Łaski's order in 1511–1523.¹³

Gaps in church sources were filled with information from the sources created by the state treasury, especially from tax registers from second half of the sixteenth century. Parochial membership of settlements is mostly identical in Łaski's Liber beneficiorum and in the registers, but there are some inaccuracies in the registers, e.g. due to ownership relations or in parishes divided by a state administration border. Sometimes we had to consult Czaykowski's Regestr from the second half of the eighteenth century and the Table of towns, villages and hamlets of the Kingdom of Poland (Tabela miast, wsi, osad Królestwa Polskiego) published in 1827, which provides information about parochial membership.¹⁴

Wrocław diocese was divided into archdeaconries and they in turn into archpresbyterates, an equivalent of deaneries, sometimes so designated. Part of Wrocław archdeaconry (Ostrzeszów archpresbyterate and a small part of Syców archpresbyterate) and one parish in the archdeaconry of Opole (Starokrzepice in the Olesno archpresbyterate) fell within the territory of the Crown of Poland. The 1592 statutes of the Wrocław diocese synod mention archpresbyters ('archipresbyteri, seu decani rurales'), Ostrzeszów among them, which is the first proof for the existence of this Church district with the seat in Ostrzeszów.¹⁵ Visitations of the churches in Ostrzeszów land from 1638, 1651 and 1670 have been published,¹⁶ the manuscript of the 1633–1635 visitation has been used by Józef Nowacki and Ryszard Rosin.¹⁷ The register of churches from 1667 and Litak's work,¹⁸ were also helpful.

The reconstruction of parish borders was based on an assumption of their relative permanence. We have used retrogression to a large degree, i.e. we have taken into account the parochial membership of the settlements created between the seventeenth and the nineteenth centuries in uninhabited areas, we have used commune borders marked on twentieth century maps. The borderlines of higher-rank units were based on parochial borders.

The border between Gniezno and Wrocław diocese partly overlapped the border of the state, and partly crossed Wieluń land. Other bishoprics neighbouring on Sieradz and Łęczyca Voivodeships were: Cracow diocese from the south, and the Poznań (its Mazovian part) diocese, Płock diocese (Mnich parish) and the Włocławek diocese from the north. We treat neighbouring precisely here, as overlapping of the diocese and voivodeship borders; the maps show the place where the range of the Gniezno diocese moves away from the Sieradz-Łęczyca territory. On the north-western side the archpresbyterate of Ostrzeszów bordered on Poznań diocese.

The course of diocese borderlines requires some explanation in three places. For a long time there existed some disputable fragments along the northern border, until its course finally settled in the fifteenth century.¹⁹ However, still in the sixteenth century a one-village parish Korzecznik, situated in the Brześć Voivodeship, on the border with Łęczyca and Kalisz Voivodeships was a cause for some disagreements. On the Gniezno side this parish belonged to Łęczyca archdeaconry and first to Bedlno

and then to Kłodawa deanery.²⁰ The latter affiliation was presented on the map of the Church division. In Włocławek diocese Korzecznik was counted among villages belonging to Włocławek archdeaconry.²¹ In the end, the parish remained in the Gniezno diocese.²²

The Mstów parish was exceptional in character, as it was divided between two dioceses: Gniezno and Cracow. The seat of the parish was located in the monastery Klasztor Mstowski in Gniezno diocese, and the neighbouring city was subject to Cracow bishopric. The borderline was mostly defined by the course of the River Warta. As such, on the Gniezno side there were not only villages all belonging to Sieradz Voivodeship (two of which, Łuszczyn and Krasice lay south of Warta), but also several villages from Cracow Voivodeship (later they formed a district of the subsidiary church in Rędziny). Such was the borderline defined in 1456.²³ This arrangement lasted for the next several centuries. The parish, according to the affiliation of its seat, was visited by representatives of Gniezno archbishopric, who recorded all villages subordinate to the parish church in the documents of the visitation, as required for practical reasons. Until the second half of the eighteenth century, the inspectors disregarded the two additional churches in the town, that – on the other hand – appear in Cracow visitations. Therefore the opinion (shared by Karol Buczek, for instance) that still in the eighteenth century the diocese borderline near Mstów was disputed cannot be reasonably justified.²⁴

The situation of the borderline near Wieruszów is quite different. In 1368 the parish located in this town – belonging to Wrocław diocese – comprised villages west (e.g. Świba, with a chapel) and east (Chobanin) of the Prosna. When Wieruszów was moved to Gniezno diocese in the first half of the fifteenth century, Świba remained in its old bishopric and the chapel probably started to function as a parish church. Łaski's *Liber beneficiorum* mentions only Mirków – a village on the left bank of the River Prosna – in Wieruszów parish. Other than that, we do not possess any data concerning Church relations in this area in the sixteenth century, our information comes from the next century. Then the diocese affiliation of the villages situated on the left side of the Prosna (Mirków, Kuźnica Skakawska) was debatable. Also, the affiliation of Świba itself, whether it belonged to the Wrocław diocese or not, was questioned by Gniezno. In 1622 the Wrocław suffragan bishop consecrated the village church, but in 1651 some regretted that it came under the authority of the Wieruszów parson. When Wrocław visitation in 1670 treats Świba as a parish in this diocese, the visitation from Gniezno from 1668–1669 sees it only as a chapel in the Wieruszów parish. Such affiliation was preserved in the next century.²⁵

Let us now move to commenting on several locations in the parish network. According to Łaski's *Liber beneficiorum*, parish affiliation of five villages was divided: the village (the peasants) belonged to one church, the manor to another. These villages were: Białe, Warszycze and Wola Warszycza in the parishes Gieczno (villages) and Modlna (manors), Konarzewo in Piątek (village) and Gieczno (manor) parishes and Boczki in Uniejów (village) and Niewiesz (manor) parishes.²⁶ Tuszyn in Łęczycza archdeaconry was a seat not only of a parish, but also of a deanery. The parish church was located not in the town, but in the neighbouring village Stary Tuszyn, also called Tuszynek or Wola Tuszyńska (today it is called Tuszynek Starościński).²⁷ This untypical situation leads to mistakes.²⁸ On our map

²⁸ Litak, *Kościół*, p. 194 mentions the same church twice – in the town and in the village.

there is a Puszcza parish (today called Puszcza Osińska) in the Uniejów archdeaconry. It began in the fifteenth century with a chapel built in the forest, which in 1529 was turned into a parish church by the archbishop. Two villages were assigned to the parish: Osiny and Chabielice, and the former gave its name to the parish, the seat of which was in the church in the forest ('in eremo'). The name of the Puszcza parish was officially accepted only at the beginning of the eighteenth century.²⁹ In Wieluń land there were two towns: Kamień (former Kamion) and Toporów. Kamień was a subsidiary church of the Mierzyce parish, and a village called Załącze Małe belonged to its district. Toporów had no church and belonged directly to the Mierzyce parish.³⁰

In Ostrzeszów land, that is in Wrocław diocese, on the borderland with Silesia, there was a village Mielęcín, whose parish affiliation is questionable. We have assumed an alternative: either the Czermin parish, or the Parzynów parish (the former is more probable). According to the 1670 visitation (then the few Catholics in Mielęcín were in the care of the Parzynów parson), in the beginning of the seventeenth century the village fell under the church in Czermin, located in Silesia, in Syców archpresbyterate, it was subsidiary to Turków parish (Turkows). Around 1738 Mielęcín belonged to Parzynów parish.³¹

There were 295 parishes in Sieradz and Łęczyca Voivodeships at the end of the sixteenth century, including the parishes partly outside Łęczyca-Sieradz territory (there were 21 of such parishes) and parishes with seats situated in neighbouring territories, but partly within our borders (10). We have singled out 12 subsidiary churches with their districts, eight of them situated in Wieluń territory. Except for 10 exterior centres (four of which were cities) – of 285 parish and subsidiary churches with their districts, 220 were situated in villages, and 65 in towns. Apart from the already mentioned Tuszyn and Toporów, five other towns had no churches of their own. These were: Budzynek in Leźnica Wielka parish (Łęczyca district), Zamysłów in Dobra parish (Sieradz district), Pławno in Gidle parish (Radomsko district), Wodziczna in Trzcienca parish (Wieluń district) and Borek in Ostrzeszów parish.

There were 126 parishes in Sieradz land, the biggest land, with the average area of 71 km². There were 77 parishes in the smallest Wieluń land, where the density was the highest – the average area was 46 km². All in all, there were 203 parishes in Sieradz Voivodeship of the average area of 62 km². In Łęczyca Voivodeship there were 82 parishes, and the average area was 53 km². The average area of a parish in the entire Sieradz-Łęczyca territory was 59 km² (in Sandomierz Voivodeship, which was half as big again, it was 68 km²).³²

district officialates administered church justice in their assigned territories. The court was held in a consistory form. We list officialates in Gniezno diocese, whose seats were situated within the borders of Sieradz and Łęczyca Voivodeships at the end of the sixteenth century. These were the officialates in Łęczyca, Uniejów, Wieluń and in Wolbórz. The first three offices have already existed in the fifteenth century and the Wolbórz officialate was created probably in 1540s, after it replaced the earlier officialate in Łęgonice.³³ Most of the officialates operated within their respective archdeaconry borders. Between 1482 and 1511 a group of parishes was moved from Uniejów officialate to Wieluń officialate, without changing their archdeaconry affiliation.³⁴ The range of the jurisdiction of Wolbórz officialate, like its predecessor – Łęgonice officialate, had to go beyond the administrative borders of this rank.³⁵ It seems

³⁵ A. Gąsiorowski, I. Skierska (*Oficjalaty okręgowe*, pp. 104–106) concluded, that the border between Łęgonice and Łowicz officialates was on the Pilica (Łęgonice lie on its bank), but their arguments are unconvincing. Probably at least a part of Łowicz archdeaconry was subject to Łęgonice – the part which belonged to Łęczyca Voivodeship. The 1522 document, which creates Łowicz archdeaconry described its area by listing two deaneries: Bedlno and Rawa – those authors failed to notice that. Referring to these records in this document concerning Łowicz and Łęgonice officialates, she wrote that the new

that, in comparison to the archdeaconries and deaneries, the range of the officialates was obeyed less strictly and people from the borderlands could appear before various consistory courts.

ANNEX A

THE LIST OF THE UNITS OF CHURCH ADMINISTRATION

The list depicts the state from around 1600. Parishes located within the borders of Sieradz and Łęczyca Voivodeships were listed under archdeaconries and deaneries (or equivalent units). Names of the parishes were assumed after the names of villages in which the parish church was situated, according to the state from the sixteenth century. Contemporary names different from previous names were given in brackets. Subsidiary churches, with their mother parishes, were also put in brackets. Cities were marked with the letter 'c'. Parishes partly outside Sieradz-Łęczyca territory were marked with an asterisk, and those with their seat outside this territory – with two asterisks.

The Gniezno diocese

The Łęczyca archdeaconry

The Łęczyca deanery

Bełdowo (Bełdów), Chociszewo (Chociszew), Chodowo (Chodów), Dalikowo (Dalików), Domaniewo (Domaniew), Kałowo (Kałów), Kazimierz t., Leźnica Mała, Leźnica Wielka, Łęczyca t., Parzynczów (Parzęczew) t., Poddąbice (Poddębice) t., Solca Wielka, Tur

The Kłodawa deanery

Bierzwienna Karczenna (Bierzwienna), Błonie, Borzysławice (Borysławice Kościelne)*, Chełmo (Chełmno), Chodowo Większe (Chodów), Dąbie t., Dąbrowice t., Dzierzbice, Goraj (Byszew Grabowski), Grabowo (Grabów Łęczycki) t., Kłodawa t.*, Krośniewice t., Mazowo (Mazew), Miłonice, Pieczewo (Pieczew), Rdułów (Rdutów), Siedlec, Sobótka, Unienie (Umień)

The Kutno deanery

Bąkowo (Bąków Górny), Bedno, Grochowo (Grochów), Kaszewo Kościelne (Kaszewy Kościelne), Kościół (Tum Poduchowny), Łąkoszyn t., Łęki (Łęki Kościelne), Nowe, Oporów t., Orłów t., Plecka Dąbrowa, Słaboszewo (Sławoszew), Sobota t., Strzegocino (Strzegocin), Śleszyno-Sołek (does not exist now), Topola (Topola Królewska), Witunia (Witonia), Zduny, Żychlin t.

The Zgierz deanery

Bielawy t.*, Bratoszewice t., Brzeziny t.*, Ciechosławice (subsidiary of the Piątek parish), Dobra, Gieczno, Góra (Góra Świętej Małgorzaty), Kozieł (Kozle), Łódzia (Łódź) t., Mąkolice, Mileski (Mileszki), Modlna, Niesułków, Oszkowice, Piątek t., Skoszewy (Skoszewy Stare) t., Stryków t., Szczawin, Waliszewo (Waliszew), Zgierz t.

The Tuszyn deanery

Bąkowa Góra, Bęczkowice, Będków t., Bogdanów, Chełm (Chełmo), Chorzęcin, Czarnocin, Dłutów (Dłutów), Gorzkowice, Łaznowo (Łaznów), Maluszyn*, Mierzyn, Milejów, Moszczenica, Nagórzyce*,

unit of Church administration covered these officialates, but they did not explain this matter, even though they saw the inaccuracies in the borders of Łowicz archdeaconry and Łęgonice officialate. In our opinion, the person who issued the document assumed that the territory of the archdeaconry would only partially overlap with the area of the two officialates, but would contain their seats. Even if the archbishop decided to expand Łowicz officialate on the entire Bedno deanery, he did not mean the part of Łęgonice officialate, which belonged to Kurzelów archdeaconry, he did not change the borders of the latter. The inaccuracies in Gąsiorowski and Skierska's article are the result of their omission of the 1528 document, which limited Łowicz archdeaconry to Rawa deanery.

Niedośpielin, Piotrków (Piotrków Trybunalski) t., Rączno (Ręczno), Rozprza t., Rzgów t., Rzujewice (Rzejowice), Srockie (Srock), Stary Tuszyń (Tuszynek Starościński), Sulejów t.*, Wielki Młyn (Wielgomłyny), Witów, Wolborz (Wolbórz) t.

The Uniejów archdeaconry

The Uniejów deanery

Bełdrzychów (Bałdrzychów), Brodnia (subsidiary of the Glinno parish), Drużbin, Faliborzyce (Chwalborzyce), Glinno, Górka Wielka (Górka Pabianicka), Grodzisko, Kwiatkowice, Lutomirsko (Lutomiersk) t., Małyń, Męka, Mikołajowice (Mikołajewice), Niemysłów, Niewiesz, Pabianice t., Pięcnów (Pęczniew), Rossoszyca, Świeńce (Świnice Warckie), Uniejów t., Wartkowice, Wielanów (Wilamów)*, Wielenino (Wielenin), Wierzchy, Zadzim

The Warta deanery

Boleszczyno (Boleszczyn), Brzeźno (Brzeźnio), Burzenin t., Chartłupia Mała (Chartłupia Mała), Chartłupia Wielka (Chartłupia Wielka), Chojne, Dąbrowa Wielka, Dobra t., Jeziersko (Jeziorsko), Kamionacz, Kliczków Stary (Kliczków Mały), Miłkowice, Sieradz t., Skęcznów (Skęczniew), Spicymierz, Stolec, Tubądzin, Unków (Uników), Warta t., Wąglczów (Wąglczew), Wróblów (Wróblew)

The Szadek deanery

Borzyszowice (Borszewice), Brzyków, Buczek t., Drużbice, Grabno, Grocholice t., Korczów (Korczew), Krzepczów, Łasko (Łask) t., Łobodzice (Łobudzice), Marzenin, Parzno, Puszcza (Puszcza Osińska), Rychłocice Wielkie (Rychłocice), Rzestarów (Restarzew Poduchowny), Sędziejowice, Strońsko, Szadek t., Szczerców t., Widawa t., Wygielzów

The Radomsko deanery

Borzykowa*, Dąbrowa (Dąbrowa Zielona)*, Dmynin (Dmenin), Dobryszycy, Gidle, Kamięsko (Kamięnsk) t., Kłomice (Kłomnice), Kobile (Kobile Wielkie), Kodrąb, Krempa (Krępa), Radomskie (Radomsko) t., Wszeborzyce (Soborzyce), Żytne (Żytno) t.

The Brzeźnica deanery

Borowno, Brzeźnica (Nowa Brzeźnica) t., Dworzyszowice (Dworszowice Kościelne), Działoszyn t., Jedlno, Klasztor Mstowski (Mstów)*, Kruszyna, Lgota (Lgota Wielka), Makowiska, Mykanów*, Pajęczno t., Rząsna (Rząśnia), Siemikowice (Siemkowice), Sulimierzycy (Sulmierzyce), Szczyty (subsidiary of the Działoszyn parish), Trębaczów, Wąsosze (Wąsosz), Wiewiec

The Wieluń territory

Biała, Bolesławiec t., Chotów, Cieszęcin, Czarnożyły, Czastary, Danków, Dzierzniki (Dziętrzniki), Dziętrzychowice (Dziętrzkowice), Jaworzno (subsidiary of the Parzymiechy parish), Kadłub, Kamion (Kamień – subsidiary of the Mierzyce parish) t., Komorniki (subsidiary of the Mokrsko parish), Konopnica (subsidiary of the Osjaków parish), Kowale (subsidiary of the Praszka parish), Krzepice t.**, Krzywa Rzeka (Krzyworzeka), Lutułów (Lututów) t., Łagiewniki, Łaszów, Łubnice (subsidiary of the Dziętrzychowice parish), Łyseskornie (Łyskornie), Mierzyce, Mileszyn (Mieleszyn), Mokrsko, Naranice, Osjaków t., Ożarów, Parzymiechy, Pątnów, Praszka t., Raczyn, Ruda, Rudlice, Rudniki, Skomlin, Sokolniki, Stradziec (Strojec – subsidiary of the Praszka parish), Waliknowy (Walichnowy), Wieluń t., Wieruszów t., Wierzbie (subsidiary of the Ożarów parish), Wierzchlas, Wójcin, Wydrzyn, Żytniów

The Kalisz archdeaconry

The Staw deanery

Błaszki*, Głuchów, Goszczonów (Goszczanów), Góra**, Gruszczycy, Kalinowa, Liskowo (Lisków)**, Malanów*, Przespolewo (Przespolew)**, Staw t.*, Tokary, Wojków

The Kalisz deanery

Giżyce**

The Gniezno archdeaconry**The Konin deanery**

Kowale (Kowale Pańskie), Psary Korytkowskie (Psary), Słomów (Słomów Kościelny), Turek t.*

The Sompolno deanery

Grzegorzewo (Grzegorzew) t.*

The Łowicz archdeaconry**The Łowicz deanery**

Łowicz t.**

The Rawa deanery

Budziszewice t.**, Inowłódz (Inowłodz) t.*, Lubocheń Wielki (Lubochnia), Małcz (Małecz)*, Rzeczyca, Tobiasze, Ujazd t.

The Kurzelów archdeaconry**The Kurzelów deanery**

Nowopole (Koniecpol) t.*, Przedbórz t.**

The Opoczno deanery

Białobrzegi**

The Wrocław diocese**The Wrocław archdeaconry****The Ostrzeszów archpresbyterate**

Baranów t., Bukownica, Chlewo, Chochłowy (Kochłowy), Domaborów (Donaborów), Doruchów, Grabów t., Kobyla Góra t., Kotłów, Mikorzyn, Mikstat t., Myjomice, Olszowa, Opatów, Otrzeszów t., Parznowo (Parzynów), Przedborów, Rogaszyce, Siemianice, Świba (subsidiary of the Wieruszów parish from the Gniezno diocese?), Trzcienica (Trzcienica), Wyszaków

The Syców archpresbyterate

Czermin (subsidiary of the Turków parish)**

The Opole archdeaconry**The Olesno archpresbyterate**

Stare Krzepice (Starokrzepice)*

ANNEX B REFORMED CHURCH COMMUNES

Krzysztof Chłapowski, Henryk Rutkowski

We provide a list of those reformed church communes (zbor), whose existence before 1600 is either certain or highly probable. There is every likelihood that this list is not complete, due to, for instance, lack of Church visitations from the turn of the sixteenth and seventeenth centuries, which usually mentioned churches claimed by the dissidents. Only for some of the evangelical communes we are able to define the time of their functioning, most likely some of them lasted for no longer than a few years.

It was possible to determine the existence of 17 evangelical communes in the second half of the sixteenth century, of which two were situated in Łęczyca Voivodeship, five in Sieradz land and 10, the majority, in Wieluń land. The list goes as follows:

Łęczyca district – Jagodnica

Brzeziny district – Brzeziny

Szadek district – Lutomiersk, Zygy

Piotrków district – Bogdanów, Żerechowa

Radomsko district – Koniecpol

Wieluń district – Cieszęcin, Danków, Działoszyn, Jaworzno, Parzymiechy, Siemianice, Trębaczów, Wieruszów

Ostrzeszów district – Myślniew, Parzynów

Burzenin in Sieradz district and Mikorzyn in Ostrzeszów district were not included in our list, as the sources only mention synods that took place in these two places.

The majority of the above-mentioned evangelical communes was established in Catholic parishes (the protestants placed their shrines in occupied churches); there were no parishes in: Jagodnica, Myślniew, Zygy and Żerechowa. Seats of five of the evangelical communes were located in towns (Brzeziny, Działoszyn, Koniecpol, Lutomiersk, Wieruszów).

The records of non-Catholic synods, published by Maria Sipayło³⁶ constitute the main source basis for our list. J. Korytowski's footnotes to Łaski's *Liber beneficiorum*³⁷ provide information about communes in Cieszęcin and Danków, and communes in Myślniew, Parzynów and Siemianice are mentioned by J. Nowacki.³⁸ The case of Brzeziny requires specific explanation. In 1551 Krzysztof Lasocki, the co-owner of this town (the other owner was his brother Jakub), established a Calvinist commune, that later changed into Aryan.³⁹ An Aryan synod was held in Brzeziny in 1565. Shortly afterwards, Krzysztof Lasocki sold his share of property to his brother and the commune ceased to exist.⁴⁰

It is not possible to separate the communes according to denomination clearly. Most of the communes were of Calvinist denomination.⁴¹ Three of them were given to the Unity of Brethren: Lutomiersk, Wieruszów and Zygy⁴². There was supposed to be a Lutheran commune in Cieszęcin⁴³.

III.2.2a.5 CHURCH ORGANIZATION AT THE BEGINNING OF THE SIXTEENTH CENTURY

Henryk Rutkowski

Jan Łaski's *Liber beneficiorum*, written between 1511 and 1523 is the only sixteenth century source that describes territorial organization of Gniezno diocese with a high level of exactness. The map of the diocese in Sieradz and Łęczyca Voivodeships was created on this basis. A similar map has already been published by Eugeniusz Wiśniowski: *Sieć parafialna w archidiecezji gnieźnieńskiej (bez archidiaconatu kamieńskiego) w początkach XVI wieku*¹ (Parochial network of Gniezno diocese – without Kamień archdeaconry – in the beginnings of the sixteenth century). Like Wiśniowski, we have presented the borderlines of archdeaconries and deaneries, as well as seats of all parishes and hospitals. However, unlike this author we have omitted schools (they were in almost every parish) and have not distinguished town parishes where there was no parochial church. On the other hand, we have marked collegiate churches, subsidiary churches (some of them are absent from Wiśniowski's map), chapels and monasteries. We have also shown the number of priests by parochial and subsidiary churches. Information provided by *Liber beneficiorum* is not uniform. In the description of Wieluń territory, here called an archdeaconry,² there are many subsidiary churches and chapels, whereas in other places they were disregarded (e.g. churches in Piotrków and Szadek). In Łęczyca archdeaconry vicars and other auxiliary clergymen are systematically listed, and probably not all of them were mentioned in Wieluń 'archdeaconry'. As such, especially in case of the number of priests, there are gaps in our map, resulting from insufficient information in the source basis.

In relation to the state from the end of the sixteenth century³, there are the following differences in the administrative division of the diocese of Gniezno in Sieradz – Łęczyca territory in the beginnings of the century: what constituted two deaneries later – Łęczyca and Zgierz – was still one deanery of Szczawin, and deaneries of Kłodawa and Kutno constituted one deanery of Bedlno. Łowicz archdeaconry had not been created yet, and its territory belonged to Rawa deanery in Łęczyca archdeaconry. In Uniejów archdeaconry, Brzeziny deanery also included what later became Radomsko deanery. Archdeaconries of Kalisz and Kurzelów had not been divided into deaneries yet and in Gniezno archdeaconry the seat of the deanery was located not in Sompolno, but in Zbarz. There were some minor differences in the borderlines of deaneries. Tobiasze parish belonged to Tuszyn deanery (later to Rawa), Spicymierz parish – to Uniejów deanery (later to Warta), the area of Chojne parish, which had not been created so far, lay within the borders of Szadek deanery (later of Warta) and the area of Puszcza Osińska parish belonged to Brzeziny deanery (later to Szadek).

We treat united parishes as independent, a parish subsidiaries to the neighbouring parish as a subsidiary church functioning as a parochial church. The range of the functions of such churches differed, sometimes the source causes doubts as to the category of a given shrine. Łubnice in Wieluń land was classified by Wiśniowski as a subsidiary church with parochial functions. We consider this village a parish centre, in union with Dietrzkowice parish.⁴ Kowale (also in Wieluń territory) had

¹ *Kościół w Polsce*, vol. 1: *Średniowiecze*, ed. J. Kłoczowski, Kraków 1968, appendix map no. 5.

² Łaski LB, II, pp. 89, 92.

³ See Annex A: Church administration units.

⁴ Łubnice appear in 1628 as a subsidiary church of Dietrzkowice, we accepted this state for the end of the sixteenth century. *Constitutiones*, f. E; Łaski LB, II, p. 142; Rosin, *Słownik*, p. 110; E. Wiśniowski, *Rozwój organizacji parafialnej w Polsce do czasów reformacji*, [in:] *Kościół w Polsce*, vol. 1, pp. 272, 278–280.

been a separate parish before, but in 1507 they were incorporated into Praszka parish. During the writing of *Liber beneficiorum*, the church in Kowale was completely devastated and did not provide any religious services, that is why we have not marked it on our map. A new subsidiary church was built (according to S. Librowski) in the second half of the sixteenth century perhaps, and we have included it on maps presenting the state from the end of this century.⁵ The description of the Szadek parish from Łaski's book of benefits fails to mention a subsidiary church of St. Giles, whose existence had been confirmed in 1372 in Stary Szadek. According to the Zajączkowscy's findings, we have marked this church in the city Szadek, not in Wielka Wieś, as suggested by Librowski.⁶ Since 1492 there has been a subsidiary church with its own chaplain in Chojny Wielkie in Mileszki parish (Łęczyca Voivodeship). However, unlike Wiśniowski, who granted this church parish functions, we have marked a subsidiary church in Chojny (the matter remains debatable).⁷

The map key informs that the number of priests means the number of posts at a given parochial or subsidiary church. This situation results from the inaccuracies of source information. There were parochial churches without a parson, occasionally administered by a substitute pastor ('komendarz') or passing priests.⁸ Some parsons did not reside in the parish because of their cumulated benefices, there were also those without higher ordination (presbyterate), who were not allowed to fulfil pastoral functions.⁹ The map omits such situations and treats every parish as if possessing a residing parson, i.e. at least one priest. The vicars, as well as altarists, chaplains and mansionaries listed in *Liber beneficiorum* raise the number of the priests. We treat information about a house for a vicar as proof of his presence.¹⁰

Disregarding collegiate churches and monasteries, more than three priests were found in 16 cities and three villages. These were: Będków, Bielawy, Brzeziny, Chełmo (former Chełm, a village in Radomsko district),¹¹ Łęczyca, Piątek, Piotrków, Wolbórz and Zgierz in Łęczyca archdeaconry, Brzeźnica, Kamieńsk, Łask, Radomsko, Sieradz, Spicymierz (village) and Warta in Uniejów archdeaconry, Grzegorzew and Turek in Gniezno archdeaconry and Kalinowa (village) in Kalisz archdeaconry.

There were four collegiate churches in the described area: in Kościół (i.e. in Tum near Łęczyca), in Uniejów, in Sieradz and in Wieluń. The collegiate churches in Uniejów and Wieluń were also seats of parishes, the collegiate in Sieradz was related to the castle chapel¹², and in Kościół (Tum), apart from an impressive Romanesque collegiate dedicated to the Blessed Virgin, there was a parochial church of St. Nicolas.¹³

Monasteries, mentioned only accidentally in Łaski's *Liber beneficiorum*, were marked according to Jerzy Kłoczowski's work.¹⁴ We found Stanisław Librowski's and Stanisław Litak's publications

⁵ In the 1668–1669 visitation Kowale are listed along with a chapel and affiliated to Praszka parish. Łaski LB, II, p. 124; Rosin, *Słownik*, p. 137; Librowski, *Repertorium*, part 1, no. 1, p. 145; Librowski, *Repertorium*, part 1, no. 1, p. 110.

⁶ Łaski LB, I, pp. 439–441; Zajączkowscy, part 2, p. 114; Librowski, *Repertorium*, part 1, no. 1, pp. 139, 148; Librowski, *Repertorium*, part 4, p. 154; Litak, *Kościół*, p. 202.

⁷ In 1628 Chojny were listed among the parishes (*Constitutiones 1628*, f. D 2), but other sources – until the eighteenth century – do not suggest, that this church should be considered subsidiary with a district. Łaski, LB, II, p. 384 (here also the base for the localization of Chojny Wielkie and Chojny Małe); E. Wiśniowski, *Rozwój organizacji parafialnej*, p. 279; Librowski, *Repertorium*, part 4, p. 83; Litak, *Kościół*, p. 195; Czaykowski; Perthées's and Gilly's maps. – The date of the erection of the subsidiary church was established by J. Szymczak, *Erekcja kościoła w podlódzkich Chojnach w 1492 r.*, „Rocznik Łódzki”, vol. 43, 1996, pp. 15–35.

⁸ Wiśniowski lists 14 such parishes lacking a pastor in Sieradz and Łęczyca territory (Wiśniowski, *Rozwój organizacji parafialnej*, p. 287).

⁹ *Ibidem*, pp. 280, 287–295.

¹⁰ There are some mentions of vicars' houses in Milejów (Łaski LB, II, p. 188), and therefore we have accepted the number of three priests. For vicars and the number of priests in a parish, e.g. in Uniejów and Łęczyca archdeaconries see Wiśniowski, *Rozwój organizacji parafialnej*, pp. 311–315, 323–329.

¹¹ In Chełm (Tuszyn deanery) the situation was exceptional – three parsons (probably not all resident), a vicar and an altarists (who was a parson in Siedlec at the same time); Łaski LB, II, pp. 200–206; E. Wiśniowski, *Rozwój organizacji parafialnej*, pp. 283, 326; Librowski, *Repertorium*, part 4, p. 82.

¹² See the commentary on the plan of Sieradz.

¹³ Łaski LB, II, p. 429.

¹⁴ J. Kłoczowski, *Zakony na ziemiach polskich w wiekach średnich*, [in:] *Kościół w Polsce*, vol. 1, pp. 495–582 and appendix map no. 4.

helpful as well.¹⁵ Like Kłoczowski, small monastic outposts (e.g. in Kazimierz) were omitted, and the Benedictine provostry in Uniejów was included only as a subsidiary church (chapel).¹⁶ We have marked 13 monasteries in 12 spots altogether (two priories in Wieluń). Monasteries are listed according to the orders: the Paulines – Oporów, Wielgomłyny, Wieluń, Wieruszów; the Dominicans – Łęczyca, Piotrków, Sieradz; the Canons Regular of the Lateran – Klasztor Mstowski, Kłodawa; the Franciscans in Radomsko, the Bernardines in Warta, the Augustinians in Wieluń, the Norbertines (the Premonstratensians) in Witów. Wielgomłyny and Witów were villages, Klasztor Mstowski neighboured on the city of Mstów via the voivodeship and diocese border, the remaining monastic outposts were situated in towns. Four monastery churches were also parish seats (Klasztor Mstowski, Kłodawa, Oporów and Wielgomłyny).¹⁷

A hospital, that is an almshouse, usually had its own church or chapel.¹⁸ Łaski's register of benefits and studies allowed us to mark 17 hospitals in 16 cities. These were: Bolesławiec, Brzeziny, Brzeźnica, Dobra,¹⁹ Kłodawa,²⁰ Krośniewice, Kutno, Łask,²¹ Łęczyca (two hospitals), Piątek, Piotrków, Sieradz, Uniejów, Warta, Wieluń, Wolbórz.²²

The majority of subsidiary churches performing parochial functions that existed in the end of the sixteenth century were already of this character during the writing of the book of benefits of Gniezno diocese. Such churches were also situated in the above-mentioned Łubienice and Kowale, and then in Szczyty, which lost its independent parish in 1563, and Konopnica, where in 1551–1552 a church was built and a subsidiary of Osjaków parish was opened.²³ Former parishes Mieleszyn and Sokolniki, were temporarily affiliated to neighbouring parishes at the beginning of the sixteenth century and regained their independence soon afterwards.²⁴ Topola, on the other hand, for a long time remained a subsidiary of Kościół parish (Tum), it was separated in 1599.²⁵ The subsidiary church in Słomów, that existed in Łaski's times, became a separate parish before the end of the sixteenth century.²⁶ At the same time four new parishes were created in places that had not had a church before: in Krzepczów (parish created in 1526), in Chojne (1527), in Dłutów (1540) and in Kliczków Mały (1590).²⁷ In 1529 a parish by the chapel in Puszcza Osińska was erected²⁸. In the sixteenth century there were two cases of moving the parish seat from a village to the city, in which the subsidiary church of the parish was located. In 1523 the parish in the village Rosocha was replaced by the provostry in the town Będków (until then there was a subsidiary church there, with four vicars).²⁹ In 1548 the parish was moved from Chrzastów to Nowopole (Koniecpol).³⁰

III.2.2.6 CUYAVIA AND DOBRZYŃ LAND

Arkadiusz Borek

As in previous AHP volumes, we present the structure of Catholic Church administration on two maps. The detailed main map presents the seats of Catholic Church administrative units and the borders of dioceses, archdeaconries, and parishes. The small-scale general map titled ‘Catholic Church divisions in Cuyavia and Dobrzyń land in the late 16th century’ shows the seats of dioceses, archdeaconries, deaneries, and parishes, as well as the boundaries of dioceses, archdeaconries, and deaneries. Both maps present borders as they were at the close of the sixteenth century. The area of Cuyavia and Dobrzyń land analysed in this volume was at the time part of Włocławek diocese¹ (which covered Cuyavia and a fragment of Dobrzyń land), Płock diocese (most of Dobrzyń land and a small fragment of Cuyavia), and – only marginally – Gniezno diocese. The purpose of the text below is to provide a commentary on this static depiction, shed some light on the evolution of Catholic Church structures in the second half of the sixteenth century, and draw attention to cases of uncertain or controversial nature. Owing to factual territorial relations, this chapter focuses primarily on Włocławek diocese.

The source bases for Włocławek and Płock dioceses are disparate. Certain discrepancies are also noted in lower-ranking administrative structures of individual bishoprics. We have very robust documentation for Włocławek diocese. Visitations dating to the last quarter of the sixteenth century constitute the basic sources for identifying its structures. The information from all these sources have been published. Full texts of visitations from Włocławek archdeaconry, and partly of Kruszwica archdeaconry, have been published in the series *Monumenta Historica Dioeceseos Wladislaviensis*² and *Visitationes Archidiaconatus Pomeraniae Hieronymo Rozrażewski Wladislaviensi et Pomeraniae Episcopo Factae*³ (the publications also contain visitations to a few parishes of Bydgoszcz deanery). In his thorough summaries printed in the *Catalogues of Visitation Books of the Cuyavia-Pomerania Diocese* published in ABMK, Witold Kujawski has already introduced readers to the contents of the visitation report for Kruszwica archdeaconry, currently archived at AAG.⁴ Post-Partition changes in parish borders have scattered visitation manuscripts across Catholic Church archives in Włocławek, Gniezno and Pelplin. The earliest extant visitation of Włocławek diocese dates to 1577,⁵ the next one was drafted just a year later in 1578.⁶ Both were requested by Bishop Stanisław Karnkowski. However, they do not cover all

¹ The 1551 Piotrków Synod officially granted Włocławek bishops the title of Włocławek-Pomeranian bishops; *Statuta synodalia Dioecesis Wladislaviensis et Pomeraniae*, ed. Z. Chodyński, Varsaviae 1890, p. VIII; I. Subera, *Terytorium diecezji włocławskiej i pomorskiej*, „Prawo Kanoniczne”, vol. 4, 1961, no. 1–4, pp. 681–768, here: p. 686; B. Kumor, *Granice metropolii i diecezji polskich (966–1939)*, ABMK, vol. 19, 1969, p. 302; S. Librowski, *Wizytacje diecezji włocławskiej*, cz. 1: *Wizytacje diecezji kujawskiej i pomorskiej*, vol. 1: *Opracowanie archiwalno-źródłoznawcze*, no. 1, Lublin 1964, ABMK, vol. 8, pp. 25–30; A. Tomczak, *Kancelaria biskupów włocławskich w okresie księgi wpisów (XV–XVIII w.)*, „Roczniki Towarzystwa Naukowego w Toruniu”, vol. 69, no. 3, p. 17. In this chapter, I will only use the first word of this compound to refer to the diocese under the jurisdiction of those bishops.

⁶ MHDW 17, pp. 6–44. List of difficulties encountered by individual parishes starting on p. 31. Some argue that the files of 1577 and 1578 visitations record the outcomes of a single visitation procedure (M. Pawlak, *Reformacja na Kujawach w świetle wizytacji duszpasterskich biskupów Stanisława Karnkowskiego i Hieronima Rozrażewskiego z lat 1577–1584*,

Cuyavian churches nor enable outlining their territorial range. Later visitations date to the pontificate of Hieronim Rozdrażewski. Dating to 1582, the first record of that period covers practically all of the Cuyavian part of Włocławek diocese, but often fails to provide information on parochial districts of Włocławek archdeaconry.⁷ The 1584–1585 visitation to Włocławek and Kruszwica archdeaconries is much more complete in terms of territorial reach and information on parochial villages.⁸ The year 1586 saw quite brief visitations to Kruszwica and Inowrocław deaneries.⁹ Włocławek archdeaconry was visited in 1594,¹⁰ Kruszwica archdeaconry in 1596,¹¹ and Włocławek archdeaconry in 1598.¹² Apart from those files, the surviving source base also offers information on visitations to individual churches.¹³ Wherever necessary, we reached for seventeenth and eighteenth century sources.¹⁴ Full visitations are supplemented by lists of diocese churches from ca. 1570 (by patronage), 1577 (most probably registers of visitations conducted in that year), 1583 (broken down into deaneries and archdeaconries),¹⁵ and the 1620 synod list of parishes.¹⁶ The manuscript map of Włocławek diocese is an interesting source, as it presents churches and deanery divisions. Paweł Groth dated the map to the years 1620–1630.¹⁷ Nevertheless, attributing a specific date to this map poses difficulties. Most of the map shows earlier deanery divisions, but does not acknowledge that the deanery seat was relocated from Raciążek (Raciąż, c) to Nieszawa (Nowa Nieszewa, r). Only the later formation of Bobrowniki Deanery does not fit into this puzzle (see below). Most of the map must have been drafted based on Rozdrażewski's visitation, as noted by Stanisław Librowski.¹⁸ Sadly, this non-cartometric map is hardly any use as a cartographic source. Ridden with errors and ambiguities, this map's usability as a list of churches is also limited.¹⁹

At present, no existing Catholic Church source enables a broader reconstruction of parish borders in periods preceding the above-listed visitations. The 1527 *Liber Retaxationum* of Włocławek diocese²⁰ provides information almost exclusively on the payments due from individual villages to parochial churches. Of course, such endowment districts of single churches were to a large extent tantamount to parochial districts, but in many cases their boundaries did not fully overlap. Therefore – unless a source specifies the levy paid was *meszne (missalia)*, which indicated that pastoral care was provided by a specific church – we can use *Liber Retaxationum* data merely as suggestions for reconstructing parochial districts.²¹

The stock of Catholic Church sources which is well-suited for reconstructing the administrative structures of Dobrzyń land falling within Płock diocese makes a much less favourable impression. Earliest visitations to most parishes of Dobrzyń archdeaconry date to the years 1597–1598. Two

redactions have survived to date. The earlier of the two can be found in the visitation volume bearing file number (sign) 1 in ADP, and covers 40 churches of Dobrzyń archdeaconry inspected in the autumn of 1597 (mixed with parishes belonging to other areas).²² The later elaboration, which contains information from early 1598, expands its scope to comprehensively cover Dobrzyń, Lipno, and Rypin deaneries.²³ Interestingly, the contents of these two sources differ significantly. This text, however, is not the place for an in-depth source analysis. We used both manuscripts. In terms of our focus in this chapter, it is important to state that the visitation is mainly an internal one, and tends to disregard parish range. Some parishes of Rypin deanery are an exception here. Of the visitations to parishes of Płock diocese situated in Dobrzyń land, descriptions were published only for a few parishes falling within the later-established Górzno deanery.²⁴ A 1605 visitation covers several churches in Dobrzyń land, yet again it fails to provide information on parochial districts.²⁵ The first complete visitation which gives the full picture of the parochial network and the parochial districts in Dobrzyń and Lipno Deaneries dates to 1609.²⁶ Rypin Deanery is for the first time discussed in full in a 1623 visitation, which sadly only enumerates districts granted as endowments to parishes, not districts of pastoral service.²⁷ The next visitation covering this area was not drawn up until 1694.²⁸ The church list of the 1628 benefice tariffs proved useful in reconstructing the parochial network itself.²⁹ In conclusion, we do not have fully useful Catholic Church sources dating to the second half of the sixteenth century on Dobrzyń archdeaconry.

For the purpose of mapping fragments of Gniezno diocese, we used the same sources as in AHP Greater Poland.³⁰

Apart from visitations, our auxiliary sources included tax registers where parish layout was reflected. Nevertheless, it ought to be stressed that tax registers from the second half of the sixteenth century featured parishes in order to help organise the lists of collected taxes, not to reflect actual Catholic Church structures. At the same time, in the overwhelming majority of cases Catholic Church files confirm tax register data. Despite the errors,³¹ thus, employing registers is justified in the absence of Catholic Church sources.

A variety of publications have already tackled the Catholic Church's historical administrative divisions in Cuyavia and Dobrzyń land. Next to Zenon Guldon,³² Witold Kujawski gathered a plethora of information. However, Kujawski's data rely mainly on the sources invoked here directly.³³ Furthermore, this material lay the foundation for the article by Ignacy Subera. Regrettably, the author's great fault are the numerous errors and simplifications, e.g. he ignores the medieval modification of the border shared by Włocławek and Płock dioceses.³⁴ Stanisław K. Olczak discusses the administrative structures of Włocławek archdeaconry in his book,³⁵ but the explanation offered is rather cursory and is not Olczak's main focus. In her articles, Zofia Kuźniewska collates information on Catholic Church

structures in Dobrzyń land.³⁶ Wiesław Müller,³⁷ Bolesław Kumor,³⁸ and Eugeniusz Wiśniowski³⁹ studied the administrative divisions of Płock diocese. Inopportunistically for our purposes, they adopted a statistical approach, which is a fruitless method for resolving detailed matters. Moreover, Dobrzyń land itself has yet to become the subject of an exhaustive publication focused on Catholic Church units.⁴⁰

This volume continues to apply the AHP criteria adopted for mapping parochial seats.⁴¹ Thus, we marked those parochial seats and related districts whose legal existence we managed to confirm for the late sixteenth century. Filial churches with separate pastoral districts are treated on a par with the parochial seats of the preceding sentence (same signature and borders). Still, it ought to be stressed that classing a church as a filial church might denote a wide spectrum of – genetic and/or hierarchical – relations between two places of worship, and sources are not always unambiguous in this department.⁴² Another vital assumption is including a parish only if the Catholic Church administration recognised that parochial centre, whereby whether that centre was actually active was not decisive. Even if a parish was vacant and defaulted in exercising pastoral care, we placed it on the map. In the second half of the sixteenth century, one of the most frequent reasons behind vacancies was the seizure of Catholic Church by Protestants. In general, Catholic Church authorities refrained from officially closing down such parishes, which was in keeping with the recommendations issued by Polish synods. Captured churches were treated as if they were occupied, and thus appeared in visitations – despite the fact that local Catholics had to take sacraments at neighbouring Catholic churches.⁴³

The parochial affiliation of individual settlements is a much more complex issue. Depending on the available source base, we adopted several assumptions to dispel doubts in unclear cases. Even if tax registers indicated a different parochial affiliation, for Włocławek diocese we adopted the affiliation following from the visitations dating to the second half of the sixteenth century. Discrepancies were not unusual, e.g. sixteenth century visitations were found not to be congruent. In such situations, we relied on later visitations to clarify uncertainties. The available source base necessitated a different approach for Płock diocese, where in most cases we deemed tax register data confirmed with seventeenth and eighteenth century Catholic Church sources to be sufficient. Where visitation and tax register data were incongruent, we usually put trust in the former, especially if the sources dated to the first half of the seventeenth century and tax registers were open to doubt, e.g. due to the location of a given settlement. Włocławek and Płock dioceses both had localities whose parochial affiliation could be established on the basis of either only tax registers or exclusively visitations (also dating to later periods). Settlement location served as the criterion of the last resort. It proved infeasible to determine the right parish for ten localities (nine of them were mill settlements) – the location of all these sites remains unknown. Further on in the Commentary, we discuss cases where in our opinion the assigned parochial affiliation requires additional explanation.

Włocławek diocese

The borders of both Cuyavian voivodeships corresponded mostly to the borders of Włocławek diocese. This tendency was abandoned on rare occasions along the western and southern borders, and large disparities occurred along Vistula River. The northern border of Inowrocław Voivodeship passed through the same diocese. Both the western and southern borders of Włocławek diocese have already been discussed in previous AHP volumes in the section on Gniezno diocese borders.⁴⁴

Apart from the controversies listed in previous volumes, the range of the Warzymowo parish (Kruszwica district, present-day Kolonia Warzymowska) borderland of Włocławek diocese is a contested issue. Sources on Warzymowo parish are rather poor. It is mentioned that the parish had two settlements, which AHP Greater Poland placed in Lisewo parish (Konin district) in Gniezno diocese. Włocławek diocese visitations mention that Lisewo itself was affiliated to Warzymowo parish, as was Dąb (Krasny Dąb) Village held by Lisewo parish. One could consider such information on Lisewo's affiliation a mistake, considering the reference appears in an undated visitation from the late sixteenth century.⁴⁵ Gniezno sources confirm the undisputed autonomy of the local parish, even though its endowments were unimpressive and it had to endure prolonged vacancies.⁴⁶ It is also beyond doubt that Dąb belonged to Lisewo parish (peasants paid *meszne* to the parson).⁴⁷ Visitations of the late sixteenth century list Dąb as part of Warzymowo parish,⁴⁸ however, both sources add a reservation that the village does not display a sense of affiliation to the parish. Dąb is missing from the 1577 visitation.⁴⁹ It seems more likely that Dąb was listed as a Warzymowo parish village because it formed part of the parish (or more precisely the mansionaries founded there) endowment,⁵⁰ not due to actual parochial affiliation. For this reason, we refrained from adjusting this fragment of the diocese border, and Dąb remains within Lisewo parish.⁵¹

There are no grounds for modifying the course of the border determined in the AHP volume on Sieradz and Łęczyca for Korzecznik (n) parish.⁵² Still, it is worth taking a closer look at its position. Włocławek diocese visitors raised the issue of its diocese affiliation, probably because this impoverished single-village parish was situated in Cuyavia. Włocławek archdeaconry visitations from the 1580s and 1590s refer to this problem. The absence of a permanent parish priest and the reluctance of patrons to host the visitor was not conducive to clarifying the situation.⁵³ The reasoning behind Włocławek visitors assuming Korzecznik's affiliation to Włocławek diocese was two-fold. First, the village paid tithe to the Włocławek Bishop. However, some fields also paid tithe to the Gniezno archbishop.⁵⁴ Secondly, in 1539 the Korzecznik parson declared before the official of Włocławek that he would reside at his parochial church.⁵⁵ A century earlier, however, in 1437, the Korzecznik parson had been brought before the Gniezno consistory court, which would indicate that Korzecznik was under the jurisdiction of Gniezno diocese at the time.⁵⁶ In the early 1640s, a Włocławek visitation placed Korzecznik in a different diocese.⁵⁷

The parish appeared on the Gniezno side of the border in the sixteenth century, first in Bedlno deanery and later in Łęczycza archdeaconry of Kłodawa deanery.⁵⁸

The border of Włocławek diocese took a more complex course in its south-eastern (border of Kowal district) and eastern part (along the Vistula, near Brześć Voivodeship). In this section, the diocese borders diverge from those of state administration, and the natural course set by Vistula River. To the south, Rawa territory embraced Włocławek parishes in Łanięta (n, all within Rawa Voivodeship) and Białotarsk (Białotarczek, c; border defined in 1444 in this region⁵⁹). Further on, Płock diocese cuts into Kowal district, covering Duninów parish (Duninowo, r, Gostynin deanery)⁶⁰ and villages of the left-bank side Dobrzyń-upon-Vistula parish (Dobrzyń, r; around Dobiegniewo, r, which received a filial church with its own district in the seventeenth century, but became the subject of a dispute between dioceses⁶¹) situated in the narrow strip of settlements on the banks of the Vistula in that district. Downstream, the situation was reversed. Włocławek diocese overlapped with Dobrzyń land, encompassing Zaduszniki parish (n), Szpetal Dolny (Szpital Dolny, cn), Chełmica (n), Ostrowite, Bobrowniki (r) and part of the Cuyavian parish of Przepust (Stare Rybitwy Village, Rybitwy, r, and no longer existing Starkowiec Demesne, n). This section of the diocese border was determined by the judgement of Gniezno Archbishop Janisław of 3 September 1321, which resolved the dispute between Włocławek and Płock dioceses about jurisdiction over this area.⁶² The course of the border shared by Włocławek and Płock dioceses was yet again altered in the 1630s, when brothers Maciej and Stanisław Łubieński, bishops of Włocławek and Płock, respectively, reached an amicable settlement on incorporating four parishes owned by Włocławek bishops and situated along the southern bank of Drwęca River into Włocławek diocese.⁶³

* * *

In the second half of the sixteenth century, Włocławek diocese was made up of three archdeaconries: Włocławek, Kruszwica, and Pomerania. This division dates as far back as the turn of the thirteenth century,⁶⁴ and lasted until the liquidation of the diocese in 1817. All of Włocławek diocese's Cuyavian part was practically tantamount to Włocławek and Kruszwica archdeaconries, whereby the former also covered parishes in Dobrzyń land. The northern border of Inowrocław Voivodeship overlapped with the border of Kruszwica archdeaconry, and Pomerania archdeaconry only marginally protruded into this voivodeship. This convergence arose from the course of the border between the

⁵⁸ LBG 2, p. 448; S. Librowski, *Repertorium akt wizytacji kanonicznych dawnej archidiecezji gnieźnieńskiej*, part 4: *Indeks geograficzno-historyczny*, no. 1: *Indeks do części 1 (zasób włocławski)*, ABMK 1978, vol. 37, p. 109. The first visitation to mention Korzecznik's affiliation to Gniezno dates to 1759, which makes it a source of a much later date. Earlier visitations of Łęczycza Archdeaconry perished in the 1944 fires in Warsaw; idem, *Repertorium akt wizytacji kanonicznych dawnej archidiecezji gnieźnieńskiej: część 3: akta przechowywane w Częstochowie, Łodzi, Łowiczu, Pelplinie, Poznaniu i Warszawie*, ABMK, 1977, vol. 34, p. 44.

Kingdom of Poland and the State of the Teutonic Order before the Second Peace of Toruń. Włocławek archdeaconry encompassed the following deaneries: Brześć, Radziejów and Nieszawa (former Raciążek); Kruszwica archdeaconry was composed of: Kruszwica, Inowrocław, and Bydgoszcz deaneries. It seems that the division of deaneries between archdeaconries remained unregulated until the period of interest to us. In 1583, Nieszawa deanery was listed under Kruszwica archdeaconry.⁶⁵ An annotation to the 1586 visitation indicates that this deanery's affiliation could have been contested earlier on.⁶⁶ In the end, the case was closed in the late sixteenth century with a verdict in favour of Włocławek archdeaconry. The situation of Raciążek-Nieszawa deanery resembles that of Bydgoszcz deanery, which was placed in Włocławek deanery until the early sixteenth century. The transfer of Bydgoszcz deanery to Kruszwica archdeaconry was probably offset by the simultaneous hand-over of Radziejów deanery to the Włocławek archdeacon.⁶⁷ In general, archdeaconry borders were based on state administrative borders. Kruszwica archdeaconry encompassed Kruszwica district and almost all Inowrocław Voivodeship, with the exception of its south-eastern part. That fragment belonged to Włocławek archdeaconry, along with the remaining part of Brześć Voivodeship and the areas of Włocławek diocese situated on the other side of the Vistula.

* * *

Already 1325–1327 Peter's Pence collection records show that Włocławek diocese was divided into deaneries. Earlier mentions indicate their establishment must have taken place in the early fourteenth century at the latest. The list of Peter's Pence payments reveals a territorial structure greatly divergent from the Włocławek dioceses described in later sources.⁶⁸ The next source to list deaneries belonging to the diocese is the short list predating 1479, which reflects a division much more similar to that of the sixteenth century.⁶⁹ Sixteenth century sources reveal six deaneries which were Brześć, Nieszawa (former Raciążek, covering parts of the diocese located on the other side of the Vistula), Radziejów, Kruszwica, Inowrocław, and Bydgoszcz. Extant visitations place the transfer of the deanery capital from Raciążek to Nieszawa between 1586 and 1594.⁷⁰ Similarly as with other dioceses of the Gniezno district, Włocławek diocese also responded to the Reformation⁷¹ and related challenges by changing its deanery network. This change, however, did not take place in Cuyavia until the first half of the seventeenth century.⁷²

Many sections of the deanery borders overlapped with district borders, yet no deanery fully overlaid its corresponding district. Among others, the border shared by Bydgoszcz and Inowrocław deaneries was based on a natural boundary – the uninhabited territory of the woodlands to the south of Bydgoszcz.

⁶⁶ S. Librowski, *Wizytacje diecezji włocławskiej*, part 1, vol. 1, no. 1, p. 37; Repertorium 77, p. 172.

⁶⁷ S. Librowski, *Wizytacje diecezji włocławskiej*, p. 155; Guldon, Powierski, Podziały, p. 11. Sadly, the *Liber Retaxationum* of 1527 fails to provide information on archdeaconries.

⁶⁸ S. Librowski, *Wizytacje diecezji włocławskiej*, part 1, vol. 1, no. 1, pp. 36–39; *ibidem*, pp. 145, 155–160; Guldon, Powierski, Podziały, pp. 9–11; W. Kujawski, *Struktury Kościoła katolickiego na Kujawach wschodnich*, pp. 28–29; *idem*, *Podziały administracyjno-kościelne Kujaw wschodnich*, pp. 13–14.

⁶⁹ MHDW 1, p. 6. For information on the date of this list see: S. Librowski, *Wizytacje diecezji włocławskiej*, part 1, vol. 1, no. 2, p. 185. This list of deaneries is practically consistent with the division known to have existed in the sixteenth century. Włocławek Deanery is the only exception in this source. One may guess, however, that it is an error. *Vladislavensis* should be construed as reference to all of the Cuyavian part of the diocese, like *Pomeraniae* to Pomerania part, and not as reference to a deanery. Regrettably, the list did not survive to date (*ibidem*) and cannot confirm this assumption.

⁷⁰ W. Kujawski, *Podziały administracyjno-kościelne Kujaw wschodnich*, p. 16.

⁷¹ M. Przybyłko, *Urząd dziekana w rozwoju historycznym*, „Prawo Kanoniczne” 1962, vol. 5, no. 1–2, p. 136; W. Müller, *Diecezje w okresie potrydenckim*, [in:] *Kościół w Polsce*, vol. 2: *Wiek XVI–XVIII*, ed. J. Kłoczowski, Kraków 1969, vol. 2, pp. 180–181; B. Kumor, *Dzieje ustroju kościelnego w Polsce*, pp. 107, 249; W. Müller, *Diecezja plocka od drugiej połowy XVI wieku do rozbiorów*, pp. 107, 249; Müller 1975, pp. 169–170; I. Subera 1981, p. 106.

⁷² In the end, this period saw Kowal Deanery being isolated from Brześć Deanery, Izbica Deanery from Radziejów Deanery (the new Izbica unit encompassed *i.a.* Świerczyna and Chalno Parishes of Brześć Deanery), Służewo and Bobrowniki Deaneries from Nieszawa Deanery, and Gniewków Deanery from Inowrocław Deanery; S. Librowski, *Wizytacje diecezji włocławskiej*, part 1, vol. 1, no. 1, p. 38; *Statuta synodalia Dioecesis Vladislaviensis et Pomeraniae*, pp. 178–179; W. Kujawski, *Struktury Kościoła katolickiego na Kujawach wschodnich*, p. 38; *idem*, *Podziały administracyjno-kościelne Kujaw wschodnich*, p. 17.

The district border took a different course. Almost all of the western border of Nieszawa deanery was based on a fragment of the Brześć Voivodeship border (which was wedged into Inowrocław Voivodeship), at the same time it stretched across the territory of both Cuyavian voivodeships.

Prior to the reform introduced in the early seventeenth century, sources indicate that the deanery affiliation of the church in Dybów-Podgórze (r, currently part of Toruń, see below) was changeable. A 1582 record lists the church as part of Raciążek deanery,⁷³ in 1583 the church was placed in Inowrocław deanery,⁷⁴ in 1584 it returned to Raciążek deanery,⁷⁵ only to be assigned to Inowrocław deanery in 1596,⁷⁶ and end up in Nieszawa deanery in 1598.⁷⁷ In 1620, it became permanently affiliated to Gniewków deanery.⁷⁸ An unambiguous basis for determining the deanery affiliation of this parish in the analysed period is therefore absent. It is clear that we are not dealing with administrative changes, rather with errors made by chancery scribes or insufficient findings on this matter. Under these circumstances, we decided to mark the deanery affiliation of this parish as 'alternative' and distinguish it with a separate signature on the map of ecclesiastical divisions and in the annex on church administrative units. One cannot rule out that these are the effects of the above changes to church administrative borders at the level of archdeaconries and deaneries. To a certain extent, this is manifested by the deanery affiliation of Orle (c, Radziejów district) and Solec Kujawski (Solec, r, Bydgoszcz district) Parishes reported by the 1527 *Liber Retaxationum*, which is different from that presented in visitations dated to the second half of the sixteenth century.⁷⁹

Listing Barcin parish (n, Kcynia district, Kalisz Voivodeship) and Dąbrówka Barcińska parish (Dąbrówka, n) in Raciążek deanery should be considered an ordinary chancery error, carried over from older visitation formats to subsequent documents.⁸⁰ From the geographical perspective, this simply doesn't make any sense.

Some problems with determining deanery affiliation may arise for the church in Wudzyń (Wodzino, c; sometimes also referred to as the church in Wudzynek, Wodzinek, c), which was a village held by Koronowo abbots and situated on the Cuyavia-Pomerania borderlands. The local parochial church did not have a parson of its own, and in the second half of the sixteenth century pastoral care was exercised by Serock priests (r; see below). This explains the 1583 reference to a Wudzyń church in the description of Serock parish in Świecie deanery.⁸¹ The map of Włocławek diocese in the early seventeenth century unequivocally placed Wudzyń church in Świecie deanery.⁸² However, 1570s sources list the church among the churches of the Cuyavian part of this diocese,⁸³ and Wudzyń church is not present in the 1598 list of Świecie deanery churches.⁸⁴ Wudzyń does not reappear in Bydgoszcz deanery until 1699.⁸⁵ Placing Wudzyń in Świecie deanery should therefore be interpreted as a reflection of its connection with Serock, not specific information on its actual affiliation.

Modzerowo (Modzurowo, n), a parish established in the late sixteenth century in Przedecz district (see below), appears in earlier records as a village of Izbica Parish (Radziejów deanery). Later on, it belonged to Izbica deanery (after its formation in the early seventeenth century),⁸⁶ which suggests that following its canonical erection it should be placed in Radziejów deanery. However, the only record from the second half of the sixteenth century to refer to this matter dates to 1598, is unequivocal, and places Modzerowo in Brześć deanery.⁸⁷

The status enjoyed by many churches of the discussed Włocławek diocese in the second half of the sixteenth century requires a comprehensive explanation. Further commentary is required on parishes which ceased to function due to the Reformation. This is also the case with filial churches with their own parochial districts which formed unions with neighbouring parishes or were incorporated into other ecclesiastical institutions, which was *de facto* tantamount to losing legal independence.

The fates of two neighbouring parishes in Brześć district, Siniarzewo (Świniarzewo, n) and Kościelna Wieś (Kościół, n), were tied together around the mid-1580s. The patrons of both churches converted to Protestantism – Kościelna Wieś welcomed a Protestant minister, while the Siniarzewo patron sought to dissolve the church entirely. The owner of Ruszki (Roszki, n), a village belonging to Kościelna Wieś parish, exploited the situation. From Siniarzewo's heir, Filip Zakrzewski, he bought the church building – or rather the building material it constituted – for two dogs, as evidenced by the 1594 visitation. The material was used to erect a new church in Ruszki for the Catholics of Kościelna Wieś parish. The Dominicans from Brześć provided pastoral care to the new place of worship. Nevertheless, the church was neither consecrated nor founded, and liturgy was celebrated under a special indult granted by the bishop. This church did not function for long. Catholics retook the Kościelna Wieś church in the years 1609–1615, downgrading the Ruszki church to a chapel. The dispute over Siniarzewo church between Bishop Hieronim Rozdrażewski and Filip Zakrzewski, who enjoyed strong support of the local nobility, was brought before first a land court, and then the Crown Tribunal. The bishop and the patron entered into an agreement in 1598. Zakrzewski undertook to fund a new parochial church in Siniarzewo. The agreement, however, was never fulfilled. The church was not rebuilt until 1642.⁸⁸ In this situation, we decided to leave the parochial centre in Kościelna Wieś on the map. Although the Ruszki church indeed served as a parochial church, its operations were temporary and it never gained the status of a fully fledged parish. Siniarzewo parish suffered merely an interruption of its functions and was not liquidated, even though villages affiliated to this parish were listed in Łowiczek parish in 1598.⁸⁹

Different was the fate of the church in Zakrzewo (n, Brześć district), whose patron was also the above-mentioned Filip Zakrzewski. In this case, the patron also sold the church building. The buyer, Stanisław Wilkowstowski, was the patron of the parochial church in Osięciny (n), which burned down in 1584, the same year as the transaction was effected. Contrary to Siniarzewo, Zakrzewo parish was not reactivated. In 1598, when Rozdrażewski and Zakrzewski were settling the issue of Siniarzewo, records do not reveal similar efforts concerning Zakrzewo. Still, it is unclear how and whether Zakrzewo parish was officially dissolved. Zakrzewo gained a new Catholic church only in the mid-seventeenth century, and the new place of worship was merely a chapel. Even though a Carmelite Monastery was erected there in 1745, the parish was not reinstated until 1924.⁹⁰ Subsequent visitations recorded the Zakrzewo parish settlements in neighbouring parishes. In 1598, Gęsin (Gęsino, n) was listed as a village of Koneck parish.⁹¹ Other settlements appear later. The no longer existing Krajewice Village (n) was assigned to Siniarzewo parish in 1711,⁹² while Wola Bachorna (n) was placed in Sędzin parish in 1764.⁹³ Starting from 1598, Zakrzewo itself was recorded as a settlement which once had a parochial church. In 1764, Zakrzewo was mentioned as part of Chlewiska parish.⁹⁴ As emphasised above, no act of law sanctioned these changes. Only the 1711 visitation mentions that Zakrzewo parish villages became part of neighbouring parishes.⁹⁵ This situation renders it impossible to unequivocally prove the formal cessation of Zakrzewo parish's existence in the late sixteenth century. When recon-

⁹⁵ Repertorium 71, p. 183.

structing parochial divisions, we identified two options: either to include Zakrzewo parish or to adopt the eighteenth-century divisions. In the end, we chose the latter solution. Absence of information on attempts to restore the church in the late sixteenth century formed the grounds for this decision. One can assume that during the feud with Filip Zakrzewski, Bishop Hieronim Rozdrażewski must have fought for both churches which had been liquidated, yet the settlement required concessions from both parties. Zakrzewski, beyond doubt a hardened Protestant, agreed to the church and endowment being rebuilt, restored, furnished and founded. In return, the Bishop gave up on the Zakrzewo church. This would mean that by the late sixteenth century, Catholic Church authorities accepted the liquidation of Zakrzewo parish and abandoned the intention to reactivate this unit. Hence the parochial divisions marked on our map should reflect these changes.

The Reformation exerted a profound impact on the church in Lisewo Kościelne (Lisewo, n). The patrons of this church also brought a minister to replace the parish priest. Conversely to other similar cases, the parochial centre was officially transferred in full. The new church was constructed by the owner of Pęchowo, where Bishop Stanisław Karnkowski effected the canonical erection of a new parish in 1579. All settlements previously subordinate to the church in Lisewo Kościelne were assigned to the new Pęchowo parish (although visitations recorded the two churches separately in the second half of the sixteenth century). It was not until 1611 that the situation changed. Catholics recovered the church in Lisewo Kościelne and isolated a separate parochial district from Pęchowo parish for the regained church.⁹⁶ In this situation, we marked the Pęchowo church as the proper parish recognised as at the end of the sixteenth century.⁹⁷

In the second half of the sixteenth century, Protestants took over many other churches. Still, Catholics successfully recovered all of them by the close of the seventeenth century. Changes to the parochial network were not considerable, and resembled those discussed above. This issue is discussed in greater detail in the chapter on Protestant churches (see *Reformation in Cuyavia and Dobrzyń land in the second half of the sixteenth century* in this volume).

The two churches united at the very end of the sixteenth century – *de facto*, if not *de jure*. The union brought together the Broniszewo (n, Radziejów district) and Warzymowo churches. The 1598 visitation and tax registers alike unequivocally indicate that Broniszewo, a settlement situated on the south-eastern bank of Gopło Lake, had been abandoned, and housed only a parochial church. The village belonged to the Sokołowski family, who also owned Warzymowo, which also served as a parochial centre under their patronage on the other side of Gopło. The activity of the patrons led to an informal merger of the parishes. The 1599 visitation to the Warzymowo parish mentions that the local commendatory parson collected tithes from Noć, which belonged to Broniszewo parish, in return for liturgical service in Broniszewo. The 1617 contract between Jarosław Sokołowski and a certain priest quite clearly suggests that it was common practice for one priest to service two churches at the time, whereby it ought to be noted that Warzymowo took precedence.⁹⁸ For this reason, later visitations combine Broniszewo parish with Kruszwica deanery⁹⁹ instead of Radziejów deanery, where Broniszewo was listed in the sixteenth century. Nevertheless, the union of the two parishes was never formalised. Owing to its function, we marked Broniszewo as a parish in a vacant village on the map.

Cuyavia had several filial parishes with their own districts. One of Poland's most famous monuments of Romanesque architecture, the BVM Church in Inowrocław (r), was a filial church. Although older and initially serving as the parent church, over time it became formally subordinate to St. Nicholas Church, which was situated within Inowrocław town walls. In the sixteenth century, a parson resided in the latter church, while a vicar serviced the BVM Church. The St. Nicholas Parish encompassed a chartered city, while the parish of the BVM covered the suburbs and surrounding villages; its centre was situated in Staromieście (t, currently part of Inowrocław).¹⁰⁰ Churches in Nieszawa and Przepust were bound by similar relations. In 1460, Nieszawa was transferred to a new location within

⁹⁶ MHDW 17, p. 121; S. Librowski, *Inwentarz realny dokumentów Archiwum Diecezjalnego we Włocławku*, vol. 2: *Lata 1551–1760*, Włocławek, no. 661; Repertorium 77, pp. 157, 165, 171, 183–184, 196; Repertorium 78, p. 108; Kujawski, Parafie, pp. 200–201, 214–215.

¹⁰⁰ MHDW 17, p. 154; Guldon, Powierski, *Podziały*, pp. 21–22; Repertorium 77, pp. 167–168, 182, 194.

Przypust Parish. Although sources continued to mention that Nieszawa was a subsidiary of the Przypust church for a relatively long time, Nieszawa enjoyed much greater actual significance and became the dominant church where a parson resided permanently. Both parishes had their own districts.¹⁰¹ The one-village Orłowo Parish (r) was also a filial parish. It was located to the north of Inowrocław, and was incorporated into the Dybów-Podgórze church (perhaps this reflected a dependency dating back to times before Nieszawa's transition).¹⁰² Wola Pierowa parish (Pierowa Wola, n), incorporated in 1516, was a filial parish of the church in Lubień Kujawski (Lubień, n).¹⁰³

The 1577 visitation defines the church in Branno (n) as the parent unit of Murzynno (Murzyno, r) church.¹⁰⁴ This information, however, should be construed solely as a description of genetic relations and historical dependence (Murzynno parish was created before the end of the fourteenth century¹⁰⁵), not as an indication of sixteenth century formal relations between the two parishes.

The parishes in Lubraniec (n), Bytoń (Bytom, r), and Zgłowiączka (Zgłowiątko, c) were bound by quite special ties. In 1497, Canons Regular were brought to the first above-listed parish, and the local parochial church was incorporated into their monastery. In the 1520s, the efforts of Poznań Bishop Jan Lubrański resulted in the Bytoń and Zgłowiączka parochial churches also being incorporated into the monastery of Lubraniec Canons. After that, Bytoń and Zgłowiączka churches were filial parishes of the Lubraniec church, had their own parochial districts, and received liturgical service from delegated canons.¹⁰⁶

Wudzyń church was in a somewhat ambiguous situation. In the 1570s, sources mention it was a parochial church situated in Budzinko at the time. However, it did not have a parson of its own, and resorted to the pastoral care of a priest from Serock.¹⁰⁷ In 1583, Wudzyń was listed in a description of Serock parish, which belonged to Świecie deanery in Pomerania archdeaconry. The records stated it was a vacant *cappella* of Koronowo Abbey which required consecration, a former parish.¹⁰⁸ The parish continued to operate without a parson, administered by priests of neighbouring parishes.¹⁰⁹ Scarcity of information impedes determining the legal status of this parish in the second half of the sixteenth century. Still, the claim that this parish was a Serock filial¹¹⁰ is not supported by unambiguous mentions in sources. Regardless of this information, Wudzyń church had its own parochial district; we marked it as a parish on the map.

In the second half of the sixteenth century, many parishes of Włocławek diocese were incorporated to church institutions other than parochial churches, which resulted in the take-over of their endowments and rights of patronage over a parish. In 1578, the parochial church in Brześć Kujawski (Brzeście, r) was incorporated into the endowment of Włocławek Chapter,¹¹¹ Byczyna Parish (c) to the Mansionary College of Włocławek Cathedral,¹¹² Piaski Parish (cn) near Kruszwica to the College of Vicars of Kruszwica Collegiate Church,¹¹³ in 1569 Wieniec Parish (c) was incorporated into the

endowment of the Włocławek Cathedral preacher,¹¹⁴ and St. John the Baptist Parish in Włocławek into the College of Vicars of Włocławek Cathedral.¹¹⁵ The monasteries in Koronowo (c) and Strzelno (c) supervised local parishes (in the latter case, the monastery church was also the parochial church).¹¹⁶

Sources mention the subsidiary status of many chapels, but these did not have pastoral districts of their own. One example is St. Florian Chapel situated in the Izbica woodlands near the road to Chotel (c), referred to as *ecclesia Chotlensis* and defined as a filial of the church in Izbica Kujawska (Izbica, n).¹¹⁷ This is the case for St. Mark's Chapel near Diabełek Mill in Kruszyn Parish¹¹⁸ (r, currently St. Mark's Church called Diabełek located within Nakonowo Village borders, r). Nevertheless, it is considered that St. Catherine's Chapel situated in St. Catherine's Demesne was the former parent parish church of Przedecz church (r).¹¹⁹ Other cases in point are *i.a.* St. Giles's Church near Bydgoszcz (r)¹²⁰ and St. Peter's Church in Stary Brześć (Stare Miasto, rc)¹²¹, and a church in Wyszogród near Fordon.¹²²

In the area of AHP interest, only one parish was canonically erected in the second half of the sixteenth century, and that was in Modzerowo, at the intersection of Cuyavia, Greater Poland, and Łęczyca Land. This village was separated from Izbica Kujawska parish, together with Stypin (Stypino, n) Village. Modzerowo parish was founded on 27 November 1591, canonically erected on 8 January of the following year, and the church was consecrated in 1595.¹²³

Clarification is needed concerning the location of the parochial centre in Podgórze-Dybów, which covered the area opposite Toruń. The story behind this settlement cluster is quite complex. Originally, this space was occupied by Nieszawa, which was transferred in 1460 to a different location. What remained were Dybów Castle and the surrounding settlement. Dybów had a church situated on the floodplains on the banks of the Vistula, to the west of the castle.¹²⁴ In 1555, the settlement was transferred to the high bank of Vistula River, and was called Podgórze (Polish for 'base or foot of a hill') from then on. Owing to its location, the church was constantly flooded. Finally, after the 1570 flood, masses ceased to be celebrated there. For about a dozen years, efforts were taken to construct a new church in a safer place. A 1598 record informs that a church had been built, but was still awaiting consecration. Consecration under the invocation of the Assumption of the Blessed Virgin Mary (BVM) and St. Hyacinth probably took place not much later.¹²⁵ In all likelihood, this church occupied the same spot as the later St. Anna's Church; it was probably located at the western tip of Podgórze, in the direction of Gniewków (r).¹²⁶ We took this data into account and marked Podgórze as the centre of this parish.¹²⁷

Apart from the status of parochial churches, the parochial affiliation of certain settlements also calls for an explanation and some commentary. Clarification is necessary for settlements claimed by two parishes or whose affiliation is unclear in sources.

Wąsewo¹²⁸ Village (Wąsowo, n, Radziejów district) was divided between two parishes: Piotrkowo Kujawskie (Piotrkowo, n) and Kaczewo (c). Świesz¹²⁹ Village (n, Radziejów district) was in a similar position, divided between Piotrkowo Kujawskie and Bytoń. Niemojowo¹³⁰ (n, Inowrocław district) was divided between Góra (n) and Parchanie (Parkanie, c), and Słońsko¹³¹ (n, Inowrocław district) – between Parchanie and the BVM Church in Inowrocław's Staromieście. Pławinek (Pomianowice, n) and Wierzchosławice (n) Villages in Inowrocław district, and Łęg (Łąg, n) in Kruszwica district are also classed as divided settlements. Still in the 1580s, all mentioned settlements were listed under just one parish (Góra,¹³² Płonkowo,¹³³ Kościeszki,¹³⁴ respectively). From the 1590s to the early eighteenth century, they simultaneously appeared in other parishes (Parchanie,¹³⁵ Ostrowo,¹³⁶ Polanowice,¹³⁷ respectively). Afterwards, they emerge only in the parishes where they were recorded at the beginning of the last quarter of the sixteenth century. As this double affiliation was confirmed to have existed in the late sixteenth century and afterwards, we decided it should be reflected by the main map.

The parochial borders located in the Noteć meander passing through the southern part of Bydgoszcz district underwent several changes. We have already mentioned the dissolution of Lisewo parish, which certainly contributed to transferring Mochel Village (n) to Dźwierzchno parish.¹³⁸ Similarly, Gniewkowice (Gniewkowiec, n) and Dobrogościce (n) became part of Tuczno parish.¹³⁹ Although these three villages appear in the document on the canonical re-erection of the Liskowo parish and are listed as villages belonging to that parish,¹⁴⁰ later visitations clearly indicate that these localities never returned to Liskowo (with the exception of Dobrogościce in mid-eighteenth century¹⁴¹). Moreover, Złotowo Village (n)¹⁴² was moved from Dźwierzchno parish to Dąbrówka Barcińska parish.

In the late sixteenth century, Kut Mill (currently part of Otłoczyn) changed its parochial affiliation. Most sixteenth century sources place Kut Mill in Raciążek parish. In 1598, the mill was carried both under Raciążek parish (with an annotation that reads '*parochie y catechismu nie wiesz*') and Słońsk parish.¹⁴³ The mill appears solely next to Słońsk¹⁴⁴ in the late seventeenth century visitations, only to reemerge in Raciążek parish in the eighteenth century.¹⁴⁵ It ought to be mentioned here that in the second half of the eighteenth century Słońsk was administered by the Raciążek parson.¹⁴⁶ We thus decided that Kut should be considered to have formed part of Słońsko parish from the end of the sixteenth century, following from the change which occurred at the close of the sixteenth century and was confirmed at the beginning of the following century.

¹²⁸ See *i.a.* MHDW 22, pp. 139, 144.

¹²⁹ MHDW 20, p. 47; MHDW 21, p. 27.

¹³⁰ Sixteenth century visitations place it in these parishes alternately. Unambiguous information on this matter and the division into a demesne and a village is provided only in eighteenth century visitations; Repertorium 77, pp. 210, 253; Repertorium 78, pp. 94, 98.

¹³¹ Repertorium 77, pp. 154–155, 163, 186; Repertorium 78, p. 110. Starting from late seventeenth century, this settlement disappears from the BVM Parish and emerges in Szadłowice Parish; Repertorium 77, pp. 191–192, 208, 210.

¹⁴⁶ Kujawski, Parafie, pp. 672–673.

In the last decade of the sixteenth century, the parson in Zbrachlin (Zbrachlino, c) raised certain parochial claims regarding Niszczewy Village (Niszczewy, n), even though then (and earlier) records placed Niszczewy in Koneck parish, which was correct according to a visitor who voiced his opinion on the matter in 1594.¹⁴⁷ The contestation was short-lived, however, as Niszczewy's affiliation provoked no controversy in the seventeenth century and Niszczewy was only included in Koneck parish.

While Jarki was listed as one of the Dybów mills in the late sixteenth century,¹⁴⁸ it should be affiliated with Gniewków parish, where it was constructed¹⁴⁹ and mentioned in the eighteenth century.¹⁵⁰

Uncertainty surrounds the parochial affiliation of Dębowa Góra, a pitch production site (c) located in Bydgoszcz district near the border with Pomerania Voivodeship. This settlement was the remnant of a village which had perished even before the sixteenth century (already the *Liber Retaxationum* stated the village was vacant) and ceased to appear in sources in the seventeenth century.¹⁵¹ We did not identify any mention of its parochial affiliation. Only its location is known as it was preserved in the microtoponym used in contemporary maps. The only other clue is constituted by medieval information which link this locality with Świecie territory.¹⁵² Taking both circumstances into account, it seems that Dąbrowa Góra should be placed in Wudzyń, which also gravitates towards Świecie deanery. In the early twentieth century, this parish was composed also of Stary Jasieniec,¹⁵³ a settlement whose modern borders encompass the Góra Dębowa elevation.

We established with certainty the affiliation of Rudzk Duży (Rucko Wielkie, n), though certain doubts should be elucidated. In general, tax registers from the second half of the sixteenth century place Rudzk Duży and Rudzk Mały in Połajewo and Rzeczyca parishes, respectively.¹⁵⁴ Visitations dating to this period fail to distinguish between the two villages, only the 1594 visitation lists *Rudzki 2* in Rzeczyca parish.¹⁵⁵ It was not until the eighteenth century that visitation records started to differentiate between the two settlements and place them as mentioned above: Rudzk Wielki in Połajewo parish, and Rudzk Mały in Rzeczyca parish.¹⁵⁶ Given the unambiguousness of sixteenth century visitations, which contain no mention of a Rudzk in Połajewo parish, we placed Rudzk Duży in Rzeczyca parish.

There is some vagueness about the borders of Grabie and Chlewiska parishes in the late sixteenth century. Zduny (Zdunowo, n) and Wilkostowo (n) appear in both parishes in 1594¹⁵⁷ (both settlements) and 1598¹⁵⁸ (Wilkostowo). This situation does not repeat itself in later seventeenth and eighteenth century visitations.¹⁵⁹ In 1594, a succinct annotation was made for Wilkostowo in Chlewiska parish, which read 'to Grabie'. This remark renders the information dating to the late sixteenth century erroneous. Having resolved all ambiguity, we placed Zduny in Chlewiska parish, and Wilkostowo in Grabie.

Lipie (Lipie Górne, n) and Lipionka (Lipie Dolne, n) Villages of Inowrocław district have been marked in Branno and Gniewków, respectively. Registers record Lipie as part of Gniewków, and Lipionka – of Branno.¹⁶⁰ However, visitations clearly state that Lipie belonged to Branno parish, and Lipionka to Gniewków. Nothing signals a change of this status until the late sixteenth century. Visitations from that period mention that Lipie parishioners had to travel to Gniewków to receive sacraments in the

¹⁶⁰ ASK I 30, ff. 782r, 782v; ASK I 50, ff. 546v, 553r, 588r, 588v, 628r, 628v, 664v, 665r, 698v, 720r, 745v, 786v, 803v, 839v, 844v; ASK I 92, f. 3v.

period when their parochial church was seized by Protestants.¹⁶¹ Over time, this caused both Lipie settlements (Lipie Górne and Lipie Dolne) to be placed in Gniewków parish.¹⁶²

The affiliation of Uniechowo was determined without confusion. While the 1599 visitation registered a dispute between the Szpetal and Zaduszniki churches over the village,¹⁶³ earlier and later records consistently locate Uniechowo solely in Szpetal parish.¹⁶⁴ Therefore, we dismissed the claims made by the Zaduszniki church as unsubstantiated.

Visitations in 1584 and 1598 mention a village referred to as *Chrząszczewo* or *Chrząszczewo seu Kałęczyno* located in Kościelna Wieś parish.¹⁶⁵ Beyond doubt, this settlement should be identified as Kałęczyn (Kałęczyno, n), which was situated on the left bank of Bachorza River and had belonged to the Chrząszczewski family until the eighteenth century.¹⁶⁶ At the same time, however, records mention Kałęczyn as part of Bądkowo parish. Furthermore, the terrain itself practically precludes the possibility of the village being divided between two parishes, with Kościelna Wieś being cut off by Bachorza wetlands. Earlier and later visitations place Kałęczyn in Bądkowo only, and this affiliation we adopted in this volume.

Controversies about the range of Warzymowo parish have been discussed above.

Cuyavia had only one parish exclave – Myślęcinek (Myślęcino, n) – affiliated with Żołędowo parish, not the closer Osielsko. Still, it ought to be emphasised that the distance is not markedly farther (6 and 3 km, respectively). Only the 1577 visitation recorded Myślęcinek as part of Osielsko.¹⁶⁷ All tax registers from the second half of the sixteenth century and visitations dated to 1584, 1596 and 1699 place Myślęcinek in Żołędowo parish.¹⁶⁸

* * *

In the Middle Ages, the general official of Włocławek had jurisdiction over both Cuyavian archdeaconries of Włocławek diocese. The other diocese officiality was based in Gdańsk and governed the Pomeranian part of the diocese. This situation changed in the second quarter of the sixteenth century when a district officiality was established in Bydgoszcz to cover Bydgoszcz and Świecie deaneries, thus encroaching on archdeaconry borders.¹⁶⁹

* * *

In total, the parochial church count in the examined area of Włocławek diocese was 123. Three parishes stretched beyond that territory, and five had their centres in neighbouring territorial units. Of those, six churches were filial parishes with own districts. The centres of 27 parishes were located in towns, 92 in villages, two in demesne settlements, one in a vacant settlement, and one in a suburb. Noć (Noteś, m) was the only Cuyavian town not to be a parochial seat. We marked parochial seats based in the demesne settlements of Byszewo (c) and Zgłowiączka (Zgłowiątka; c) as parochial demesne settlements on the map.

Płock diocese

We have presented the border between Włocławek and Płock dioceses above. Within Dobrzyń land, the northern border of the land overlapped with the diocese border running along Drwęca River.

The borders parted only near Ciechocin parish, which encompassed Elgiszewo (c), a village on the northern bank of Drwęca.¹⁷⁰ In the north-east, the diocese border departed from the land border and continued along Drwęca. It encircled several parishes of Chełmno Voivodeship (Michałów Land), then merged with the course of the land border to the north of Górzno (c). North-eastern sections of the borders were the subject of disputes with the Chełmno diocese in the fourteenth century.¹⁷¹

* * *

Most of Płock diocese covered by this volume was fell within Dobrzyń archdeaconry (the oldest mentioned archdeaconry of the diocese, identified as a separate unit probably since the late thirteenth century¹⁷²), which was divided into Dobrzyń, Lipno, and Rypin deaneries. Few parishes and villages belonged to Płock archdeaconry and were situated in Gostynin deanery (Duninów on Vistula's left bank) and Sierpc deanery (fragments of the border shared by Dobrzyń land and Mazovia, Sikórz and Sierpc parishes). Rokice, Bądkowo Kościelne, Tłuchowo¹⁷³ and Skrwilno¹⁷⁴ parishes of Dobrzyń archdeaconry also cut into Mazovia. The border between archdeaconries, like the state administration border, was outlined mainly by rivers.

The earliest deanery to be recorded as part of Dobrzyń archdeaconry is Lipno, whose affiliation is confirmed by fourteenth-century sources.¹⁷⁵ The sixteenth century deanery network of the diocese is the result of Płock Bishop Erazm Ciołek's 1506 deanery reform, and the 1510 adjustments for Dobrzyń land. However, owing to the deplorable condition of the register which documents this reform, determining how the parishes were assigned to deaneries is an arduous task.¹⁷⁶ Also the 1597 visitation is of limited importance to reconstructing deanery borders – the first edition does not list all parishes, and the second failed to identify Rypin deanery and assigned its parishes to churches of Lipno deanery. We dispelled our doubts by referring to the deanery affiliation recorded in the 1609 visitation to Lipno and Dobrzyń deaneries, where the absence of this parish indicates that it was located in Rypin deanery. This affiliation is reflected by 1609 and 1623 visitations (Rypin deanery), which contain data identical to the 1628 register of parishes. This should be considered to confirm the stability of the identified

¹⁷³ While working on this volume, we verified certain claims made in AHP Mazovia. AHP Mazovia affiliated villages of Tłuchowo Parish situated on the Mazovian side with Bożewo and Mochowo Parishes. These villages were Obręb Wielki, Obręb Mały, Sułkowo-Bariany, Sułkowo-Rzeczne, Sułkowo-Błony, and Sułkowo-Jasionki (recorded in visitations as one settlement). The 1609 visitation placed all those settlements in Tłuchowo Parish; ADP, sign. 6, 348v.

¹⁷⁴ In the case of this parish, it has been determined with certainty that Mościska and Czarnia Duża belonged to this very ecclesiastical unit. AHP Mazovia reported such affiliation as uncertain.

¹⁷⁵ E. Wiśniowski, *Diecezja płocka u progu czasów nowożytnych*, p. 129.

¹⁷⁶ Subject literature (J. Sawicki, *Synody diecezji płockiej i ich statuty*, [in:] idem, *Concilia Poloniae: źródła i studia krytyczne*, vol. 6, Warszawa 1952, pp. 79–80; W. Müller, *Organizacja terytorialna diecezji płockiej*, p. 154; idem, *Diecezja płocka od drugiej połowy XVI wieku do rozbiorów*, pp. 156–157, 170) generally dates the reform to 1506, after the heading found in the files of Płock bishops which opens a heavily destroyed list of newly established deaneries and their churches (ADP, sign. 9, pp. 103–108). However, below the *Decanatus Dobrzinensis* heading one can come across a blurry annotation, which should be deciphered as: '[O]rd[o] de Anno Domini 1510 die s. Marci in sinodo factus in archi[diac]o[n]a[t]u Dobrzinensi.' This synod was mentioned by H. Folwarski, and cited after him by J. Sawicki (H. Folwarski, *Erazm Ciołek, biskup i dyplomata*, Varsoviae 1935 (Studia Historico-Ecclesiastica, vol. 1), p. 113; J. Sawicki, *Synody diecezji płockiej i ich statuty*, p. 83). The former researcher dated the synod to 5 March instead of 25 April, which resulted from erroneously interpreting the text to read: *5 marcii* instead of *S Marci*. This interpretation, in turn, was brought about by the fact that the historians used copies made by rev. J. Mąkowski (currently unavailable, possibly missing), not the original documents. This title refers to the adjustment of the deanery structure within the archdeaconry, which is confirmed by the change in the number of parishes belonging to Dobrzyń Deanery, ambiguous records about Michałów Deanery found on p. 107 of the same list (W. Müller, *Organizacja terytorialna diecezji płockiej*, p. 161; Guldon, Powierski, Podziały, pp. 12, 45, 47). H. Folwarski's claim about the separation of Dobrzyń, Lipno, and Rypin Deaneries from Chiechanów Deanery (H. Folwarski, *Erazm Ciołek, biskup i dyplomata*, p. 110), unquestioningly reiterated, should be classed as a complete misunderstanding probably arising from the faulty interpretation of Mąkowski's copies and a reluctance towards verifying this statement by simply looking at a map.

structure. These outcomes correspond to those following from Zenon Guldon's *Map of Dobrzyń land*, which was also based on the 1609 visitation.

It follows from this reconstruction of deanery divisions that only the borders of Rypin deanery overlapped for the major part with the border of its district, though some deviations can be identified, including Ruże and Sudragi parishes, and parishes in Michałów Land. Lipno deanery occupied only the north-western part of Lipno district, and Dobrzyń deanery took up the eastern part of Dobrzyń and Lipno districts and several localities in Kowal district. Deanery structures did not change in the analysed area until the 1643 synod, when Górzno deanery was separated from Rypin deanery.¹⁷⁷

* * *

Dobrzyń archdeaconry had several churches whose status and parochial rights call for a detailed discussion. The original status of the church in Osiek-upon-Vistula (Osieczek, n, Lipno district) is cloaked in a shroud of mystery, as already in the sixteenth century this church was a filial of Łążyn parish. Sources fail to confirm the 1388 canonical erection of the Osiek parish.¹⁷⁸ Indeed, the first source to mention the Osiek church is the 1597 visitation, which describes it as a filial of Łążyn; early sixteenth century sources do not refer to the Osiek church. However, both redactions of this visitation provide slightly divergent, yet not mutually exclusive information on this church. The first redaction suggests that a *parochus* was once active at the church, the second states that the *secullum* in Osiek was a filial of Łążyn which had lacked a parson for quite some time.¹⁷⁹ The 1609 visitation, nevertheless, clearly indicates the absence of any parochial villages.¹⁸⁰ Later visitations fail to offer any information on the parish rights enjoyed by this church. Tax registers similarly do not suggest that a separate parochial district was formed, despite favourable spatial relations. Therefore, it is likely that the chapel came into existence only during the sixteenth century. Perhaps the church in Wielgie (Wielkie, n, Lipno district), which was a filial of Działyń, had a separate parochial district. This is not at all certain, however. Although the 1694 visitation mentions the church's old parish rights and outlines its parochial district,¹⁸¹ the absence of information about this church before 1609¹⁸² indicates that it could have been established in the sixteenth century at earliest. The church which lost parish rights at the turn of the sixteenth century was the parochial church in Grodzeń (n, Lipno district). According to the 1597 visitation, Grodzeń church was a filial of Kikoł, without a specified parochial district and incorporated by Płock Bishop Wincenty Przerębski. This correlation is further confirmed in 1609.¹⁸³ In this case, however, we decided to mark the single-village Grodzeń district as a separate unit. This decision was based on tax registers and the visitation from 1694, whose references provide the necessary confirmation.¹⁸⁴ In 1502, Chrostkowo church was incorporated into Chojno church.¹⁸⁵ This connection, however, must have quickly disappeared. Its traces are nowhere to be found in later sources – in 1597 Chrostkowo church has its own priest (commendatory parson),¹⁸⁶ and the range of the parochial district is well documented. The year 1502 saw the canonical erection of Wola parish (Lipno district).¹⁸⁷ Another change which occurred in 1502 was placing the Pręczi (Pręczkowo, n) church under the administration of the Rypin parson (r). In contrast to Chrostkowo, however, it never regained autonomy.¹⁸⁸ Despite dating far back, Szczutowo (c) church in Górzno parish was a chapel

without any parish rights.¹⁸⁹ In the early seventeenth century, between 1609 and 1628, a single-village parish in Czarne was separated from Wierzbick (n).¹⁹⁰

* * *

The methodological principles presented in the introduction to this chapter helped us resolve most troublesome issues arising from the scant source base for Dobrzyń archdeaconry. Nevertheless, we have decided on providing a more in-depth commentary on a few cases.

We found that Zarzeczewo (n) Village was divided between two parishes. Włocławek visitations from the second half of the sixteenth century consistently place Zarzeczewo in Szpetal Dolny parish.¹⁹¹ It is not until 1609 that sources start locating Zarzeczewo on the Płock side in Grochowalsk (n) parish. Still, this visitation is the first to mention parochial affiliations.¹⁹² Later visitations from these two dioceses go on to reflect the village's division between the two parishes; they also suggest that Zarzeczewo was divided into a village (Szpetal) and a manor with a mill (Grochowalsk).¹⁹³ Szczepanki (n) was also marked as a village divided between Wierzbick (Płock diocese) and Ostrowite (Włocławek diocese) Parishes. In 1541, Płock Bishop Jakub Buczacki transferred this village to the later parish.¹⁹⁴ Szczepanki started appearing in Włocławek diocese in the second half of the sixteenth century and later on.¹⁹⁵ Nonetheless, Szczepanki was referred to as part of Płock diocese until 1694.¹⁹⁶ For this reason, we gave Szczepanki double parochial affiliation. Of course, it is highly likely that Szczepanki's obsolete legal status was carried over to subsequent Płock visitations. Zarzeczewo and Szczepanki were thus divided not just between two parishes, but also between two dioceses. We determined that in the sixteenth century Głodowo (n) Village was divided between Lipno and Wierzbick parishes, which is confirmed by seventeenth century visitations.¹⁹⁷

The 1609 visitation includes Cebryszewo Village (Czebrzyszewo, n) in Wierzbick parish,¹⁹⁸ yet both the canonical erection of Karnkowo parish and registers dating to the second half of the sixteenth century and later visitations¹⁹⁹ place Cebryszewo in Karnkowo. The location of this village, which is adjacent to Karnkowo, renders this 1609 record erroneous beyond any doubt.

Brzeźno Village (n) in Lipno parish, separated from its church by localities belonging to Sumin and Lipno parishes, was an exclave of Kikół parish. Eighteenth century records confirm this division.²⁰⁰

* * *

The whole part of Dobrzyń land situated within the borders of Płock diocese was subordinate to the Płock general officiality, whose jurisdiction covered Dobrzyń and Płock archdeaconries.²⁰¹

* * *

In total, the parochial church count in the discussed area of Płock diocese was 54. Eight parishes stretched beyond that territory, and two had its centres in neighbouring territorial units. Only one of

those churches was a filial parish with districts of its own. Six parishes had their seats in towns, and 48 in villages.

Gniezno diocese

Gniezno slightly protruded into Cuyavia. In total, it encompassed 12 settlements in seven parishes. It was not a continuous area of land, but fragments scattered along the border with Łęczyca and Kalisz Voivodeships. Each of these parishes formed part of a different deanery. The deaneries, in turn, were situated within three archdeaconries and, as such, were subjected to three different officialities (Łęczyca, Gniezno and Kamieniec).²⁰² The only church administration units to be situated wholly in Cuyavia were the single-village parish in Korzecznik, whose status was quite problematic (see above), and Sompolno. Although Sompolno covered few localities and was situated on the edge of the diocese, it was the seat of its deanery. This probably followed from the fact that Sompolno Town (Sąpolno, c) was the property of Gniezno archbishops.²⁰³

A certain simplification made in AHP Greater Poland also requires clarification. AHP Greater Poland states that 'the set of Wolbórz property held by Cuyavian bishops and situated in Gniezno diocese was exchanged for Bydgoszcz deanery' in the eighteenth century'.²⁰⁴ To put it more precisely, an exchange of territories between Gniezno and Włocławek dioceses was announced in 1765. At the time, Włocławek bishops assumed the role of ordinaries and in that capacity took over eight parishes located in the borderlands of Sieradz and Łęczyca Voivodeships, *i.a.* the towns of Wolbórz and Łódź. These constituted part of their local set of property, which parishes formed Wolbórz deanery – an exclave of Włocławek diocese. In return, Gniezno archbishops received the border parishes of Włocławek diocese in both Kruszwica and Włocławek archdeaconries. Starting from the north these were Dąbrówka Kujawska, Strzelewo, Bydgoszcz, Barcin, Ostrowo, Ludziska, Gębice, Skulsk, Broniszewo, Warzymowo, Brdów and Modzerewo.²⁰⁵

Cuyavia and Dobrzyń land: number of churches

Cuyavia and Dobrzyń land had a total of 184 parish churches in three dioceses, including 13 parishes stretched beyond that territory and 10 parishes with centres in neighbouring territorial units. Of the parishes with seats in the analysed area, 71 lay in Brześć Voivodeship, 46 in Inowrocław Voivodeship, and 57 in Dobrzyń land. Of the total church count, seven were filial parishes with own districts – four in Brześć Voivodeship, two in Inowrocław Voivodeship, and one in Dobrzyń land. 31 parishes had their seats in towns (14 in Brześć Voivodeship, 10 in Inowrocław Voivodeship, seven in Dobrzyń land), 143 in rural settlements (57 in Brześć Voivodeship, 36 in Inowrocław Voivodeship, 50 in Dobrzyń land). On average, Cuyavia and Dobrzyń land had one church per 54 km², Brześć Voivodeship – per 46 km², Inowrocław – per 60 km², and Dobrzyń land – per 53 km².

ANNEX
LIST OF CATHOLIC CHURCH ADMINISTRATION UNITS IN CUYAVIA
AND DOBRZYŃ LAND

This list presents administrative divisions as at the close of the sixteenth century. It covers parishes falling – in whole or in part – within the borders of Cuyavia and Dobrzyń land. This includes parishes whose churches lay beyond this territory, but which held villages in Cuyavia and Dobrzyń land. We used * to mark seats of parishes whose borders stretched beyond Cuyavia and Dobrzyń land, and ** to denote parish seats situated outside of this region. The list is arranged in alphabetical order and presents the names of parochial seats. If the contemporary name differs from the one used in the examined period, we provided the present-day name in brackets. Towns are marked with the letter ‘T’. For subsidiary churches with own districts, we specified the name of the parent parish in brackets, preceded with the letter ‘f.’.

Włocławek diocese

Kruszwica archdeaconry

Bydgoszcz deanery

Bydgoszcz T., Byszewo, Dąbrówka (Dąbrówka Nowa), Dobrecz, Fordan T. (Fordon, part of Bydgoszcz), Koronowo T., Osielsko, Solec T. (Solec Kujawski), Strzelewo, Włóki, Wtelno, Wodzino (Wudzyn), Żołędowo

Inowrocław deanery

Barcin** T., Branno, Brodnia (Brodnia), Dąbrówka (Dąbrówka Barcińska), Dźwierzno (Dźwierzchno), Gniewków T. (Gniewkowo), Góra, Inowrocław T., Jaksice, Kobielice, Kościelec, Łabiszyn** T., Liskowo (Liszkowo), Murzyno (Murzynno), Orłowo (f. Podgórze), Ostrów, Ostrów, Parkanie (Parchanie), Pęchowo, Pieranie, Płomykowo (Płonkowo), Sędzino (Sędzin), Staromieście (part of Inowrocław (f. Inowrocław T.)), Szawłowice (Szadłowice), Tuczno

Kruszwica deanery

Gębice T., Kościeszki*, Kruszwica T., Ludzicko (Ludzisko), Ostrowo, Polanowice, Rzodkwino (Rzadkwin), Skulsko* T. (Skulsk), Sławsko (Sławsk Wielki), Stodoły, Strzelno T., Warzymowo (Kolonja Warzymowska)

Kruszwica and Włocławek archdeaconries

Inowrocław and Nieszawa (Raciążek) deaneries

Podgórze T. (Podgórz, part of Toruń)

Pomerania archdeaconry

Świecie deanery

Niewieścín**, Serock**

Włocławek archdeaconry

Brześć deanery

Białotarczek* (Białotarsk), Błędna (Błenna), Boniewo, Brzeście T. (Brześć Kujawski), Chalno, Choceń, Chodecz T., Dąbie (Dąbie Kujawskie), Grabkowo, Kłobia, Kłobia Mała (Kłóbka), Kłotno (Kłótno), Kościół (Kościelna Wieś), Kowale T. (Kowal), Kruszyn (Kruszyno), Lubień Kujawski T. (Lubień), Lubomin (Lubomino), Lubraniec T., Modzurowo, Osiećiny, Pierowa Wola (Wola Pierowa (f. Lubień)), Przedecz T., Śmiłowice, Świerczyno (Świerczyn), Wieniec, Wisłka Szlachecka (Wistka Szlachecka), Włocław T. (Włocławek), Zgłowiątka (Zgłowiączka (f. Lubraniec))

Nieszawa (Raciążek) deanery

Bądkowo, Bobrowniki T., Chełmca (Chełmca Duża), Chlewiska, Grabie, Koneck, Łowiczek (Łowicz), Lubanie, Nowa Nieszawa T. (Nieszawa), Ostrowąs, Ostrowite, Przypust (f. Nowa Nieszawa T.), Raciąż T. (Raciążek), Świniarzewo (Siniarzewo), Słońsko (Słońsk Górny, part of Ciechocinek), Służewo T., Straszewo, Szpital Nadolny (Szpetal Dolny), Zaduszniki, Zbrachlino (Zbrachlin)

Radziejów deanery

Brdowo** T. (Brdów), Broniewo, Bronisław, Broniszewo, Byczyna, Bytom (Bytoń (f. Lubraniec)), Chełmce, Izbica T. (Izbica Kujawska), Kaczewo, Krzywosądz (Krzywosądz), Lubotyń, Mąkoszyno (Mąkoszyn), Orle, Ostrów (Ostrowo), Piaski, Piotrkowo (Piotrków Kujawski), Płowce, Połajewo Stare, Radziejów T., Rzeczyca, Sadlno, Witowo

Płock diocese

III.2.2a.6 REFORMATION IN CUYAVIA AND DOBRZYŃ LAND IN THE SECOND HALF OF THE SIXTEENTH CENTURY

Arkadiusz Borek

Starting with the volume on Sandomierz Voivodeship, the AHP series has embarked on the task of mapping Protestant communes or Protestant churches. Depending on the materials available, research results have been presented in different forms: Sandomierz, Cracow and Greater Poland volumes present 1:500,000 maps of Protestant commune networks,¹ whereby individual denominations were marked only on maps of AHP Greater Poland. The Sieradz and Łęczycza volume spared the Reformation only a page of its commentary and did not provide a single map.² Moreover, slightly different definitions were adopted for the subject of interest. Up to the Cracow volume (included), a commune of Reformed denomination did not necessarily need a church of its own to be placed on the maps.³ In the Greater Poland volume, however, we assumed that a commune should have at its disposal a place for religious assemblies.⁴ Different criteria were applied for congregation mapping – Cracow and Sandomierz volumes present communes which had existed for at least 10 years.⁵

The intention behind summarising the methods employed in the AHP series to date for presenting communes of non-Catholic denominations is to illustrate that the cartographic visualisation of this issue is quite problematic. The available source base determines the possibilities in this respect. It is necessary to tackle numerous conceptual difficulties. Before I move on to discussing the mapping methodology applied in the present volume, I must therefore list the sources and subject literature we have at our disposal, along with the basic facts on Reformation history in Cuyavia and Dobrzyń land.

Of the sources traditionally consulted when working on the AHP series, *i.e.* ASR⁶ and the files prepared by Maria Siapyłło and Waław Urban,⁷ only the former proved useful, and to a limited extent. All in all, the canonical visitations of Włocławek diocese proved to be of highest informative value. Owing to the chronology of their oldest records, Płock visitations were of minor importance. The full list of visitations used has been presented in the chapter on Catholic Church administrative borders (see A. Borek, *Catholic Church administration borders* in this volume). Catholic visitations not only recorded the seizure of churches by Protestants for worship purposes and instances where a Protestant patron refrained from appointing a priest, but also provided information on worshippers of different denominations residing in a given parish. Apart from the visitations themselves, we solved several cases

⁷ Both files are kept in the Early Printed Books Department at the University of Warsaw Library (BUW).

by turning to the list of churches, broken down into churches with pastors and vacant ones, which most probably dates to the first half of the 1570s.⁸

When one is confined to a single source which gives a broader overview of the analysed issues, it is vital to make use of the literature of the field. The relevant publications on Cuyavia rely strongly on the Włocławek visitations, which have been used here directly. We thus reached for Henryk Merczyng's⁹ findings based on Józef Łukasiewicz's study on the Unity of the Brethren in Greater Poland, and on the above visitations as well.¹⁰ Zenon Guldon, by making use of the sources and publications presented herein, marked the Protestant churches and seized Catholic churches.¹¹ The literature base focused strictly on Reformation in Cuyavia is scant. It is possible to enumerate the texts by Lucjan Dombek,¹² Marian Pawlak,¹³ Wojciech Sławiński,¹⁴ and recently Tomasz Krzemiński,¹⁵ whereby the first author produced papers of greatest importance. As concerns Dobrzyń land, a publication on Reformation in this area in the analysed period has yet to present itself to us.¹⁶

In his dissertation on Protestantism in Cuyavia, Lucjan Dombek distinguished two periods: from the beginnings (mid-sixteenth century) to about 1585, and from 1585 to 1645 (disbanding of Łabiszyn congregation). Dombek described the former period as one of development, and the latter as a time of Counter-Reformation, thus the fall of Reformation in Cuyavia. He found Inowrocław, Brześć, Radziejów, and Bydgoszcz districts to have been most strongly impacted by the new denominations. Dombek took note of the absence of Protestantism in Kowal district.¹⁷ In Cuyavia, Reformation achieved its first successes thanks to Radziejów Starosta Rafał Leszczyński, one of the wealthiest magnates and most active advocates of Protestantism in the second half of the sixteenth century.¹⁸ It is believed that Leszczyński inspired Cuyavia's remaining nobility to side with the new religious movements. It was Leszczyński who organised the Calvinist congregation in Radziejów in 1554, and persuaded Andrzej of Przasnysz (also dubbed Prażmowski) to assume the position of senior pastor there. Andrzej of Przasnysz was an outstanding preacher, polemist and Calvinist activist in Poland. Before converting to Calvinism, he was a parson or vicar at St. John's Church in Poznań, yet was exiled by the Poznań bishop in 1549, and died in 1592.¹⁹ These efforts led to the establishment of Cuyavia's main Protestant centre. After Rafał Leszczyński stepped down from his office, care over the congregations was passed onto Radziejów starostas: Jan Leszczyński, son of Rafał, and next to Świętosław Orzelski.²⁰ Andrzej of Przasnysz, already mentioned above, had been active in Cuyavia before these events. Exiled from Poznań, he settled in Lisewo in Bydgoszcz district, where he operated under the supervision of Jakub

⁸ MHDW 21, pp. 229–232. H. Merczyng dated this list to before 1571 (H. Merczyng, *Zbory i senatorowie protestanczy w dawnej Rzeczypospolitej. Z mapą Dawnej Polski pod względem kościelnym ewangelickim*, Warszawa 1904, p. 23, footnote) based on information about a Protestant minister called Jerzyk, who was to die in 1571. Yet the same Jerzyk is mentioned again in 1577 (MHDW 17, p. 118). A brief comparison of the list of clergymen presented in this record with the 1577 visitation demonstrates that the first half of the 1570s is a more likely date for this source than the late 1560s – many clergymen appear on both lists, but many had already been replaced.

⁹ H. Merczyng, *Zbory i senatorowie protestanczy w dawnej Rzeczypospolitej*.

¹⁰ J. Łukasiewicz, *O kościołach Braci Czeskich w dawnej Wielkiej Polsce*, Poznań 1835.

¹¹ Guldon, *Kujawy*, p. 39.

¹² L. Dombek, *Reformacja na Kujawach w XVI wieku*, PKHBTN, t. 3, 1966, pp. 55–89.

¹³ M. Pawlak, *Reformacja na Kujawach w świetle wizytacji duszpasterskich biskupów Stanisława Karnkowskiego i Hieronima Rozrażewskiego z lat 1577–1584*, [in:] *Polska w kręgu polityki, kultury i gospodarki europejskiej. Księga pamiątkowa z okazji 70-lecia urodzin prof. Maksymiliana Grzegorza*, ed. Z. Zyglewski, Bydgoszcz 2007, pp. 178–198. From a practical perspective, the entirety of this text is based solely on visitation data, and is plagued by content-related errors, which disqualifies it as a source of information.

¹⁴ W. Sławiński, *Udział różnowierców kujawskich w toruńskim synodzie generalnym 1595 roku*, ZK, vol. 13, 1998, pp. 65–76. This publication fails to touch upon the issues of greatest concern to us in this volume.

¹⁵ T. Krzemiński, *Protestanci na Kujawach wschodnich od XVI do połowy XX wieku*, [in:] *Ewangelicy w regionie kujawsko-pomorskim na przestrzeni wieków*, ed. J. Kłaczko, Toruń 2020, pp. 97–170. The remaining part of the volume discusses later phenomena which do not fall within the scope of this publication.

¹⁶ A paper was published only on a commune established in Lipno at the close of the eighteenth century; K. Kłodawski, *Z dziejów parafii ewangelicko-augsburskiego wyznania w Lipnie (od końca XVIII wieku do roku 1914)*, „Notatki Płockie”, vol. 53, 2008, pp. 3–12.

²⁰ L. Dombek, *Reformacja na Kujawach*, pp. 84.

Niemojewski.²¹ Jakub, and his brothers Jan and Wojciech, represented one of the most powerful families who supported Reformation in Cuyavia, and were also famous for participating in dietines and engaging in religious polemics.²² The Zakrzewskis also deserve a mention. Filip was the most active representative of this family. His name has already been mentioned in the dispute over Świniarzewo church (Siniarzewo, see A. Borek, *Catholic Church administration borders* in this volume), and he also authored religious writings.²³ In terms of property, Brethren senior Jan Krotoski was a major figure. His estates encompassed *i.a.* Łobżenica, Barcino (in Kalisz Voivodeship, on the Greater Poland-Cuyavia border), and Pakość, and he served as Inowrocław Voivode.²⁴ Representatives of the above families took part in the 1595 Toruń Synod,²⁵ which confirms their active involvement in advancing Protestantism in Cuyavia. In periods when Reformation progressed across the analysed area, it seems that Protestants enjoyed much more power than attested by visitations from the last quarter of the sixteenth century. The lack of decisive actions taken by Włocławek bishops created favourable conditions for Protestants. A sharp change occurred in 1567, when Stanisław Karnkowski took over the bishopric.²⁶ The fall of Reformation became increasingly visible in the late sixteenth century. Radziejów congregation was closed in 1615, and in 1627 the last congregation in the analysed area was situated in Świerczynko.²⁷

Calvinism and the Unity of the Brethren Church were Cuyavia's dominant Protestant denominations. On 18 September 1565 in Liszkowo, Andrzej of Przasnysz, as head of Cuyavian Calvinists, entered into an amicable settlement with the Unity of the Brethren and adopted their faith with negligible liturgical differences. The churches of the two congregations were to be shared. Andrzej of Przasnysz was probably persuaded by his patrons, Rafał Leszczyński (then patron) and Jakub Niemoyewski (former patron), who had already joined the Church of the Unity of the Brethren.²⁸ The statement of Klemens, a minister in Kościół (Kościelna Wieś), stands proof to the dominant position of Radziejów congregation. Although initially ordained a priest of the Augsburg confession, Klemens adopted the doctrine of Radziejów congregation²⁹ after accepting the post in Cuyavia³⁰ (before 1584).

Nontrinitarianism also gained some popularity in Cuyavia. From the beginning of the 1560s, Jan Niemojewski stood at the helm of this movement. With the remaining Niemojewski brothers standing by the Unity of Brethren,³¹ Jan was the main representative and propagator of Nontrinitarianism, and worked together with Marcin Czechowic. In the course of time, after moving to Lublin, Jan became one of the movement's central figures.³² The aforementioned Filip Zakrzewski was another active (yet definitely less radical) representative of the Polish Brethren.³³

²¹ Literature of the field often reiterates an item of information given by J. Łukaszewicz, *i.e.* that Andrzej settled near or with Jakub Niemojewski in Liszkowo (J. Łukaszewicz, *O kościołach Braci Czeskich*, p. 341), which is a mistake arising from the phonetic proximity of Lisewo (held by the Niemojewski family) and Liszkowo (property of the Kaczkowski family), and the fact that both churches were converted into congregations. J. Tazbir claimed that Jakub Niemojewski gave shelter not to Andrzej of Przasnysz, but to Wawrzyniec (Laurentius) Discordia of Przasnysz (idem, *Niemojewski Jakub*, [in:] PSB, vol. 23, p. 11).

²² J. Łukaszewicz, *O kościołach Braci Czeskich*, p. 341; J. Płokarz, *Jan Niemojewski: studium z dziejów arjan polskich*, „Reformacja w Polsce”, vol. 2, 1922, no. 5–6, pp. 71–117; L. Dombek, *Reformacja na Kujawach*, pp. 59, 60–61.

The organisational structure of Cuyavia's congregations remains unclear. There are numerous references about the congregations of Greater Poland and Cuyavia being divided into districts, but they do not provide a basis for drawing any conclusions. The districts of Cuyavia-Pomerania, Cuyavia, Radziejów, Inowrocław and Kcynia appear in different contexts in subsequent years. It is not certain how this organisational structure should be understood in the light of the 1565 settlement between the Unity of the Brethren and the Evangelical Reformed Church. Furthermore, there is no basis for determining the boundaries of these districts. However, it can be stated that in the late sixteenth century the Cuyavian district encompassed the northern part of Greater Poland as well.³⁴

Few records testify to the presence of Protestants in Dobrzyń land, especially the part which overlapped with Płock diocese. The Reformation advanced at a very slow pace in Płock diocese, and yet when compared with the Mazovian part of the dioceses, Dobrzyń land archdeaconry was most strongly influenced by new religious movements.³⁵ It has been established that Lutherans could be found among the nobility of this land ever since 1550. The proximity of the Duchy of Prussia stoked the popularity of this confession. Many churches were seized.³⁶ In his 1595 report addressed to Rome, Płock Bishop Wojciech Baranowski mentioned the capture and desecration of two churches in Dobrzyń archdeaconry at the end of the sixteenth century.³⁷ Based on the visitation, we found that Wierzbick church was one which fell victim to worshippers of Reformed denominations (n; see below in this chapter, probably the location of congregation). We did not succeed in identifying the second church. It has not been clarified whether the parish functioned without a parson or the temple was converted into a Protestant place of worship. We are also not aware of Protestants using any churches built by themselves.

Reformation-induced changes in Cuyavian towns escape any tracing attempts. Radziejów congregation clearly had connections with nobility displaying Protestant sentiments, but not townspeople with such inclinations. It is only known that new religious movements gained greater ground among the burghers of Bydgoszcz³⁸ and Nieszawa (see below in this chapter). In general, the Cuyavian Reformation left its mark on noble estates, but reached royal property only through Rafał Leszczyński's activity as Radziejów Starosta. The Reformation trickled down to the lower classes from Dutch-type settlement, starting from the turn of the seventeenth century. This, however, was a very different phenomena from the Protestantism of nobility in the second half of the sixteenth century.³⁹

Ultimately, we presented the spatial reach of Protestantism on the 'Reformation in Cuyavia and Dobrzyń land in the Second Half of the 16th c.' map by depicting three phenomena. First, we marked Protestant churches, broadly understood as places where worshippers of other denominations gathered to pray collectively. This definition applies to both seized Catholic churches and settlements where Protestants had their own places of prayer. The locations of the latter were suggested by information that local non-Catholics gathered in the manor of a specific nobleman, or by a source mention about a minister pastor. The second hint at Protestant presence were instances where a Catholic church functioned without a parson, because its patron was a Protestant (Zenon Guldon adopted a similar assumption⁴⁰). Thirdly, we looked for records of Protestant presence in a parish. Visitations describe this phenomenon in two ways: either a general mention about the presence of Protestants in a parish, or by pointing out specific settlements. The map does not reflect references to the former, as this would necessitate highlighting almost all the parishes in Cuyavia. As for larger areas, in the second half of the sixteenth century Protestants are not mentioned at all only in the north-western part of Bydgoszcz district (estates of Koronowo Monastery), the vicinity of Raciążek set of property and the centre of

³⁴ H. Gmiterek, *Bracia czescy a kalwini w Rzeczypospolitej*, pp. 144–145; J. Dworzaczkowa, *Bracia czescy w Wielkopolsce*, pp. 53, 103; see also: M. Ptasiński, *O ustroju kościoła. Uwagi na marginesie edycji Akt synodów prowincjonalnych Jednoty Litewskiej 1626–1637*, „Odrodzenie i Reformacja w Polsce”, vol. 56, 2012, pp. 206–209.

⁴⁰ Guldon, Kujawy, p. 39.

Kowal district. On the map, therefore, we only marked the presence of non-Catholics in specific settlements. We assigned equal importance to information about a Protestant residing in a given village and a Protestant owning a settlement, and treated such details as the outcomes of Reformation impact.

The map gives a collective picture for the whole second half of the sixteenth century. We did not adopt any time-related criteria concerning the period of congregation activity or Protestant presence in a given settlement. Thus, this is the maximum spread of the Reformation in Cuyavia arising from sources dating to the second half of the sixteenth century. This presentation was based on the Catholic parish network, owing to the specificity of the main source constituted by Church visitations. As the source base covering Dobrzyń Archdeaconry dates to a late period, the map gives a rather partial picture.

The difficulty in drawing an accurate map of Protestant churches, as defined above, lies in the mobility of minister pastors reported by sources. Before 1577, Andrzej of Przasnysz transferred the minister pastor from Płowce to Góra.⁴¹ Andrzej himself probably preached in different settlements.⁴² Minister pastor Walenty Neothebel emerges in two different (nearby) villages over a period of two years.⁴³ Minister pastors from other settlements visited Boniewo to conduct funerals, as this settlement did not have a permanent Protestant pastor.⁴⁴ This paves the way for presuming that such short-lived places of collective prayer were much more numerous. After all, the worshippers themselves covered some ground. Brześć Judge Hieronim Bieliński, residing in Kłobia Mała (Kłóbka) Parish, visited Radziejów for religious purposes (so the visitation suggests).⁴⁵ Protestants of Błędna (Błenna) and Zbrachlin parishes were among those who took similar trips.⁴⁶

Of course, it is not possible to dispel doubts concerning the reliability of information given by visitors on the issues of interest to us (especially on the faith of individuals), all the more that the visitors themselves obtained that information from a local parson or other witnesses, e.g. provisors (*vitrici*). In general, however, visitors seem to give opinions on this matter prudently, and strive to differentiate between Protestants on the one hand, and the excommunicated and those who do not practice confession on the other hand. We therefore took into account only unambiguous information about Protestants, and dismissed any details about any persons not taking Communion or whose faith was surrounded by any unspecified doubts. It is rather unlikely that Catholic Church administration would be interested in overestimating the Reformation's reach in its reports, or that it would strive to differentiate between actual worshippers of other denominations and the unruly nobility reluctant towards Catholic Church institutions.⁴⁷ Church visitations can therefore be recognised as a quite reliable source on this issue.

On the map, we only assigned confession to congregations. By virtue of the abovementioned 1565 settlement between Radziejów congregation and the Unity of the Brethren, we did not differentiate between churches of these two denominations. In the map legend, they are referred to collectively as 'Reformed and Unity of Brethren'). Almost all churches belonged to these united confessions.⁴⁸

⁴¹ MHDW 17, p. 70.

⁴² ASR 2, p. 100.

⁴³ Repertorium 77, p. 154; W. Neothebel, „*Acrostichis*” *własnego wyobrażenia*, p. 20.

⁴⁴ MHDW 20, p. 102.; ADWł, sign. 0213/1, p. 257.

⁴⁵ MHDW 22, p. 12.

⁴⁶ MHDW 17, p. 49; MHDW 22, p. 73.

⁴⁷ A visitor described the Catholics of Pieranie Parish as equally adept in persecuting the Catholic Church: 'Parochiani nobiles promiscue religionis, sed catholici excepta fidei confessione in omnibus hereticorum mores induerunt'; AAG, E1, f. 71v. In the reports written for Rome, Płock Bishop Wojciech Baranowski also reported that Catholic gentry often simply seized Catholic Church property, and hired travelling low-wage priests instead of duly presenting parsons; W. Müller, *Diecezja płocka od drugiej połowy XVI wieku do rozbiorów*, p. 167.

⁴⁸ The *List of Protestant Congregations Active in the Commonwealth of Poland from the Sixteenth to the Eighteenth Century*, edited by M. Ptaszyński and available at www.atlasfontium.pl (access: 31.01.2020) proposes a division of Cuyavia's congregations between those of the Unity of the Brethren and the Evangelical Reformed Church. Ptaszyński restated this information, supplemented with a brief commentary, on the margin of the scientific review; Ptaszyński, *O ustroju kościoła*, p. 208. However, he did not comment on the 1565 consensus, and focused on early seventeenth-century agreements like other authors. In my opinion, the query across sources dating to the second half of the sixteenth century conducted for the purpose of drafting this text did not provide any grounds for such a classification of Cuyavian congregations. Information on agreements reached at the beginning of the seventeenth century, which only mention incorporating Cuyavian senior pastors directly into Brethren structures (ASR 4, p. 310), corroborate that earlier divisions should be perceived as organisational ones. The constitution of this division was aimed rather at ensuring that Andrzej of Przasnysz continues to occupy the dominant position of Cuyavian commune leader. Different source mentions might suggest that the Unity of Brethren bore organisational responsibility for churches to

This follows also from the list of Cuyavian participants of the 1595 Toruń Synod.⁴⁹ As direct information is scant, in most cases the confession of a congregation was determined based on the context provided by literature of the field, e.g. information on the patron.

Of the congregations listed in literature of the field after Henryk Merczyng, we did not mark the Dźwierzchno (Dźwierzno, c) church on our map.⁵⁰ Merczyng included this church on the basis of an erroneous interpretation of a fragment of a list of vacant churches. The publisher mistakenly construed the word *odardum* as the name of a priest, instead of the adjective *odartus* in the accusative case.⁵¹ The priest, who was Catholic as indicated by the meaning of the word *sacerdos* used in the list, was simply very poor. Moreover, Dźwierzchno was a village held by Włocławek bishops, which practically precludes the presence of a Protestant minister.

Based on the consulted subject literature, Zenon Guldon marked Radojewice (n) congregation on his map.⁵² We were not able to find the information he used. This is most probably an error, and the congregation was to be placed in Niemojewo⁵³ (see below).

Lucjan Dombek listed Przedecz and Inowrocław among the churches re-captured by Bishop Stanisław Karnkowski from Protestants.⁵⁴ The provenance of the information on Przedecz is not clear, as it is not indicated in the material cited by Dombek. The mention about Inowrocław comes from the *Ratio Rerum* of Włocławek diocese issued by Karnkowski for Hieronim Rozdrażewski upon Rozdrażewki's assumption of Włocławek bishopric. This fragment, however, refers to towns particularly inclined to heresy.⁵⁵ There is no mention of any Protestants in Inowrocław.⁵⁶ Hence, we did not place these two towns on the map.

Some interesting developments occurred in Lubraniec. About 1568, Jakub Chlewicki, owner of the town since the 1550s and Calvinist, exiled the local Canons Regular ca. 1568. Nevertheless, the church was neither converted into a Protestant place of worship nor permitted to stay without a parson. Chlewicki appointed his relatives as lay provosts, which Church authorities accepted, and even approved. Although the nominees did not exhibit high-level pastoral skills, they were Catholic after all.⁵⁷ Thus, Lubraniec has not been labelled as a congregation on the map.

In total, the agreed list of congregations in Cuyavia and Dobrzyń land contains 28 Protestant churches. Most are former Catholic Churches seized by patrons, which were re-captured mainly by the Catholic Church already at the turn of the seventeenth century. We identified seven churches, which remained vacant due to the Protestant faith of their patrons, and 81 settlements with worshippers of other denominations (three are not marked on the map, as their location is unknown). The Reformation left its most visible mark in central Cuyavia – in the area stretching from Niemojewski family estates in the north-west to Radziejów Gord Starosty in the south, covering the south-west of Inowrocław

the north and east of Inowrocław in the second half of the sixteenth century. All the same, there are insufficient grounds for any attempts at boundary delimitation. Interpreting the confession of a **church** and its 'priest' separately also compounds the issue; see: J. Dworzaczkowa, *Bracia czescy w Wielkopolsce*, pp. 55, 197; *Bracia czescy – kalwiniści – ewangelicy reformowani. Problem terminologii*, „Biblioteka”, vol. 9 (18), 2005, pp. 143–148; see also ASR 4, p. VIII.

⁴⁹ W. Sławiński, *Toruński synod generalny 1595 roku*, pp. 302–305. Nonetheless, this list is limited in geographical scope and cannot constitute the only basis for outlining the divisions between Brethren and Calvinist denominations.

⁵⁰ H. Merczyng, *Zbory i senatorowie protestancy w dawnej Rzeczypospolitej*, p. 25. Cited after Merczyng by Z. Guldon; Guldon, Kujawy, p. 39.

⁵¹ MHDW 21, p. 231.

⁵² This church is not among those added by Guldon on the basis of his own query, since those churches, possibly by mistake, were not placed on the map; cf. Guldon, Kujawy, map and p. 39.

⁵³ Niemojewo is mentioned in a short popular scientific article by Z. Czapla titled *Heretics in Cuyavia* (Z. Czapla, *Heretycy na Kujawach*, „Dziennik Kujawski”, 5 XII 1926), which Z. Guldon used and which mentions a minister in that settlement. The article also mentions Radojewice, albeit in a different context.

⁵⁴ L. Dombek, *Reformacja na Kujawach*, p. 75. Dombek also listed Boniewo (and erroneously gives references in footnote to: M. Borucki, *Ziemia kujawska pod względem historycznym, jeograficznym, archeologicznym, ekonomicznym i statystycznym*, Włocławek 1882), but this is a mistake.

district, the bulk of Radziejów district and the western part of Brześć district. As emphasised above, however, Protestants were present in all Cuyavia.

Protestant Churches

Brześć Voivodeship

Boniewo, located in Brześć district – in the early 1580s, Jan Siewierski (church patron) persuaded the local parson to give up the benefice and attempted to replace the parson with a minister, although the parson returned to Boniewo on Sunday once in two weeks to apparently celebrate mass. Siewierski acted together with Sebastian Osiecki to achieve this goal, but the two failed to reach an understanding on the minister's wages.⁵⁸ In the end, Boniewo did not acquire a permanent minister. Still, visitations from the close of the sixteenth century and the first half of the seventeenth century state that Boniewo became Cuyavia's main Protestant necropolis. The dead were brought to Boniewo *ex tota terra Cuiaviense*, and a non-Catholic minister, most often from Radziejów, participated in each funeral.⁵⁹ Hence Boniewo is labelled as a settlement with a non-Catholic church. It was not until 1682 that the Catholic church was reconsecrated.⁶⁰

Borucin, located in Brześć district – is believed to have had an Arian congregation at the turn of the seventeenth century.⁶¹

Broniewo, located in Radziejów district – was the property of the Zakrzewski family, with a church under their patronage. A Catholic parson was still present at the end of the 1570s.⁶² For a short period, Protestant service was probably held, but the patron shut the church down in 1584 in the absence of worshippers.⁶³ Catholics reclaimed the church before 1624, as the next Zakrzewski generation reverted to Catholicism.⁶⁴

Bytoń, located in Radziejów district – when Jan Chlewicki exiled Canons Regular from Lubraniec (see above in this chapter), to whose congregation Bytoń Parish had been incorporated, Rafał Leszczyński, as owner of Radziejów Gord Starosty, to which Bytoń belonged, seized Bytoń's church and church property.⁶⁵ Drawing from local tradition, Stanisław Muznerowski argued that this was connected with the introduction of a Protestant minister.⁶⁶ Taking into account Leszczyński's nature and similar actions in Płowce, the existence of a Protestant church in Bytoń should be considered probable.

Grabie, located in Brześć district – it is possible that this settlement had a minister for a short period at the beginning of the 1590s;⁶⁷ a Protestant funeral took place there.⁶⁸

Izbica, located in Przedecz district – the last sixteenth-century visitation does not unequivocally confirm the existence of a Protestant place of worship, yet it is highly probable given later developments⁶⁹ and the fact that the town owner⁷⁰ was of a non-Catholic denomination. The congregation perished in 1627.⁷¹

Koneck, located in Brześć district – the only mention of a minister, or rather a parson who stripped the church of its furnishing, probably in keeping with the principles of reformed denominations, dates

to before 1577.⁷² There seems to be no connection with later information on Protestant funerals (held after a Catholic parson had been reinstated).⁷³

Kościelna Wieś, located in Brześć district – the first mention of the church being seized by Protestants dates to 1577,⁷⁴ and the presence of a minister was confirmed in 1584.⁷⁵ The church was reconciled in the years 1609–1615.⁷⁶

Kruszwica, located in Kruszwica district – Adam Baliński, who served as starosta of Kruszwica at the time, maintained a Brethren minister in Kruszwica Castle in the late sixteenth century,⁷⁷ according to Józef Łukaszewicz.

Płowce, located in Radziejów district = first belonged to Radziejów Gord Starosty, and was later taken over by the Leszczyński family (see M. Słomski, *Ownership affiliation of settlements* in this volume). Rafał Leszczyński introduced a Calvinist minister, who was then transferred to Góra. The church was reclaimed by Catholics before 1594.⁷⁸

Radziejów, located in Radziejów district – was the heart of the Reformation in Cuyavia. The former St. John the Baptist parochial church housed the reformed congregation.⁷⁹ Starosta Rafał Leszczyński brought minister Andrzej of Przasnysz to Radziejów in 1554. The congregation survived until 1615.⁸⁰

Warzymowo, located in Kruszwica district – the local church was probably seized in the 1550s and reclaimed in the second half of the 1580s.⁸¹

Zakrzewo, located in Brześć district – was the property of the Zakrzewski family, and the presence of Protestant minister was confirmed in 1582 (see also A. Borek, *Catholic Church administration borders* in this volume).⁸²

Inowrocław Voivodeship

Branno, located in Inowrocław district – non-Catholics seized the church in the 1580s.⁸³ A minister was mentioned in 1594 for the first time, but he did not permanently reside in Branno.⁸⁴ It was reclaimed by Catholics during the seventeenth century.⁸⁵

Bydgoszcz, located in Bydgoszcz district – the saltworks manager Zuchokowski(?) allegedly organised Protestant gatherings in 1582.⁸⁶ At the close of the sixteenth century, a hospital for non-Catholics operated in the Osielsk suburb.⁸⁷ Reformation attracted some supporters in Bydgoszcz.⁸⁸

Gądecz, located in Bydgoszcz district – Wojciech Gądecki brought a minister from Lisewo to Gądecz, ca. 1582.⁸⁹

Góra, located in Inowrocław district – Góra church was occupied by Protestants in as early as 1557.⁹⁰ In 1577, Radziejów senior pastor Andrzej of Przasnysz transferred the minister from Płowce to Góra, despite the fact that Góra had a Catholic parson at the time (perhaps this is a reference to

Niemojewe, see below).⁹¹ The 1582 visitation attests to the capture of Góra church.⁹² Catholics reclaimed the parish in the seventeenth century.⁹³

Lisewo Kościelne, located in Bydgoszcz district – was a village of the Niemojewski family. It was probably the oldest Protestant church in Cuyavia where Andrzej of Przasnysz commenced his activity (see above). The presence of minister was confirmed in 1577.⁹⁴ It was reclaimed by Catholics in 1611 (see A. Borek, *Catholic Church administration borders* in this volume).

Liszkowo, located in Inowrocław district – minister present probably already since 1550s.⁹⁵ The church was reclaimed by Catholics before the end of the sixteenth century.⁹⁶

Ludziska, located in Inowrocław district – presence of minister (of two years by that date) confirmed in 1577.⁹⁷ Parish may have been reclaimed by Catholics in 1599.⁹⁸

Miedzyń, located in Bydgoszcz district – in Fordon (Fordan, r) Parish. Shortly before 1597, Wojciech Gądecki allegedly constructed a church visited also by Scots and certain Bydgoszcz burghers.⁹⁹ As the Miedzyń church and the Gądecz house of prayers shared the same patron, the latter ought to be considered to have been the former's predecessor (see above in this chapter). This leads to the conclusion that it should not be seen as a continuation of some Bydgoszcz church, as sometimes claimed in subject literature.¹⁰⁰

Modliborzyce, located in Inowrocław district – a village in Parchanie parish. Ca. 1581, Walenty Neothebel, author of political and religious writings, served as minister there, under the patronage of Sebastian Osiecki, the village owner.¹⁰¹

Niemojewe, located in Inowrocław district – was the property of the Niemojewski family. An Arian congregation was active there since 1563.¹⁰² The 1577 visitation notes that non-Catholic nobility of Góra parish gathered in the home of Jan Niemojewski, who kept a preacher by the name of Marcin.¹⁰³ The 1577 cannot refer to Jan Niemojewski, the Arian activist who then stayed in Lesser Poland after renouncing his estates.¹⁰⁴ These are references to his Calvinist nephew.¹⁰⁵ The mark of the two denominations assigned to this location corresponds to the chronology of their presence in this settlement.

Pakość, located in Inowrocław district – the Catholic church was converted to a place of worship of the Unity of Brethren, but it was reclaimed by Catholics in the late sixteenth century.¹⁰⁶

Pieranie, located in Inowrocław district – was the property of *i.a.* Sebastian Osiecki, seized before 1577.¹⁰⁷ The presence of a minister was confirmed in 1582 – the aforementioned Walenty Neothebel held this position at the time.¹⁰⁸ The church was reclaimed by Catholics during the seventeenth century.¹⁰⁹

III.2.2.7 MAZOVIA

Anna Dunin-Wąsowiczowa

For the sake of general orientation, we supplement our description of the **borders of Church administration** with the structural pattern of Church administration in Mazovia in the sixteenth century, provided in Annex I.

So far, the research on the course of the borders of Church administration brought a much simplified knowledge about the outline of diocese, archdeaconry, or deanery borders.¹ A more complete reconstruction of the borderlines required the range of individual parishes be determined, as they together showed the outer boundaries of a higher-rank unit of Church administration.

At the end of the sixteenth century, there were 447 parishes in Mazovia, of which more than 100 lay in towns. All parishes were usually catholic at the time, except for the few seized by other denominations – like Sierzchowy, Zwola or Suserz.²

The vast area of the three Voivodeships of Mazovia was the place where the borders of several dioceses met in the sixteenth century. They differed from the borders of State administration. **Płock diocese**, that is **the archdeaconries of Płock, Pultusk** and a fragment of **Dobrzyń archdeaconry** – encompassed the Voivodeship of Płock, the northern part of Mazovian Voivodeship, and the north-western part of Rawa Voivodeship.

The archdeaconry of Warsaw, a Mazovian exclave of **Poznań diocese**, stretched over the Voivodeships of Mazovia and Rawa.³

The archdiocese of Gniezno entered the territory of Mazovia from the south and southwest as **Łowicz archdeaconry** (deaneries of Łowicz, Skierniewice, and a major part of Rawa), which was isolated

from two great deaneries: Łęczyca and Rawa in the sixteenth century, and as fragments of **Łęczyca archdeaconry** (Kutno deanery, which in Mazovia encompassed the parishes: Głogowiec, Kutno and Jemielno, the latter parish was in turn a subsidiary of the parochial church in Grochów).⁴ In the south, part of **Kurzelów archdeaconry** belonged to Gniezno Archdiocese (parishes in Wyśmierzyce, Jasiona, and Stromiec).⁵ **Cracow diocese** was represented by one parish, Głowaczów, situated near the border with Sandomierz Voivodeship. The parish belonged to **Radom archdeaconry**.⁶ **Włocławek diocese**, on the other hand, situated on the border of Rawa Voivodeship, supervised one parish, Biało-tarsk, and its subsidiary church in Łanięta, which belonged to the deanery of Brześć Kujawski, Włocławek archdeaconry.⁷ All aforementioned dioceses were subject to the Gniezno metropolis. Any parish situated in Dąbrowa, in the peripheries of Mazovia, belonged to **Łuck diocese**, in Lwów metropolis.⁸

The map reconstructs the borders of higher-rank units of Church administration (diocese and archdeaconry) and parishes. Changes from the second half of the sixteenth century, related to the isolation of Stanisławów deanery from the deaneries of Nur and Wyszaków, were illustrated on p. 310.

Given the brevity of this commentary, detailed description of the borders will be avoided. We will only highlight certain problems, which occurred during the reconstruction and the obtained degree of accuracy of the boundary lines depicted on the map.

The borders of the **Archdiocese of Gniezno** were determined on the basis of source data from the beginning of the sixteenth century (1511–1523) and random information from the end of the sixteenth century.⁹ The comparison of the border with the borders of Poznań diocese (Warsaw archdeaconry), reconstructed on the basis of the first surviving parochial visitation from 1598–1603, showed no differences.

In the sixteenth century, a separate Łowicz archdeaconry was isolated from Rawa and Łęczyca deaneries. The archdeaconry consisted of three deaneries: Łowicz, Skierniewice and Rawa, and the original division of parochial churches between the old deaneries (Rawa deanery most of all) underwent basic changes.¹⁰

To the northwest, **Płock diocese** went outside the borders of Mazovia.¹¹ In the north – apart from a short fragment of junction with Chełmno Voivodeship and Chełmno diocese – the diocese border overlapped the border of Mazovia, and thus the border of the Crown and the fiefdom of the Duchy of Prussia, neighbouring on Pomesania and Warmia dioceses. In the northwest the diocese bordered on Vilnius diocese, which supervised the northern part of Podlaskan Voivodeship, to the River Narew, and south of the Narew – with Łuck diocese.¹² These borders were stable in the end of sixteenth century, and there were no significant difficulties with the reconstruction.

Detailed reconstruction of the sixteenth century settlement allowed us to establish that the border of the Płock diocese crossed the line of the Vistula in several places, previously unknown. For instance, Pomocna and Suchodół (Zakrzewo parish), villages situated on the left bank of the Vistula in Gąbin district, belonged to the deanery in Wyszogród, Płock diocese. This was probably a result of ownership connections, as these villages belonged to Płock bishopric. In the same Zakrzewo

parish, so in Płock diocese, there were also settlements located on the marshes of the Vistula – Nieznachy.¹³

In the south, Płock diocese bordered on Warsaw archdeaconry – an exclave of Poznań diocese inside Mazovia. Here the border was still debatable in the sixteenth century, particularly along the fragment running from the Vistula towards the River Liw.¹⁴

It must be emphasized that the stabilization of the controversial fragment of the border between the dioceses of Płock and Poznań, between the Okuniew and Liw, was connected with the process of reorganization of the parochial and diaconal network in this area, which lasted throughout the sixteenth century.

It was extremely difficult to draw the borderline between the two dioceses on the map of Mazovia. Our working assumption required us to lead the border in such a way so that it would run between individual settlements, placing them in their parishes, without dividing the parishes into parts situated in both dioceses. The assumption formulated was almost a truism – the parish was after all the smallest unit of Church administration within a single diocese – yet it proved difficult to fulfil. The division of the controversial area along an old road to Lithuania, running from Warsaw to the Liw, conducted in 1547–1548 on the basis of an agreement between Benedykt Izdbieński, the bishop of Poznań, and Andrzej Noskowski, the bishop of Płock,¹⁵ either broke the rule, or used an earlier, unknown to us, parochial layout of this territory. The parochial, and district, affiliation of several settlements located in the said area is not well attested to for the end of the sixteenth century. This made our source query difficult, as this was a place, where the borders of several lands met (Warsaw, Czersk, Nur, and Liw). The situation is particularly relevant in the cases of royal villages, affiliated at the time rather to starosta's districts and leases, not to districts.

As a result, this fragment of diocese border presented on the map of Mazovia reflects the state from 1548, with minor corrections regarding several settlements, when later data allowed us to identify fragments of the parochial border with the diocese border. Below we provide an explanation for several controversial fragments of the borderline.

There were some difficulties with the reconstruction of the fragment running east of Okuniew. The 1548 arrangement led the border through this settlement. One part was to belong to Płock diocese, the other – to Poznań diocese. At the close of the sixteenth century Okuniew was a parochial seat. When the border was being drawn in 1548, the settlement had had town rights for 10 years, and so it had its own parish, established between 1538–1540. However, it does not appear in the list of parishes of Nur deanery. At the beginning of the seventeenth century, the entire Okuniew parish belonged to the diocese in Płock¹⁶ and this is the state presented on our map of the end of the sixteenth century.

The sixteenth century fiscal sources and the materials from the eighteenth and nineteenth centuries place the village Budziska in Okuniew parish, so in Płock diocese. The arrangement from 1548 leaves the village on the side of Poznań diocese, and that is how it was marked on our map.

Further to the east, we meet another obstacle. Pustelnik, a parochial village (parish erected in 1540) lay on the side of Płock diocese, and Goździówka village – inside Poznań diocese. The foundation docu-

¹³ ADP, no. 6, ff. 178–180. According to a text from 1511–1512, Wituski were a settlement identified with Nieznachy, that is a settlement of the fishermen called Nieznachy situated on one of the Vistula's sandbanks, called Piasek, which belonged to a nobleman called Wituski (Ulanowski, *Visitationes*, p. 94). However, the visitation from 1598 lists Nieznachy and Wituski separately (no. 6, f. 180).

¹⁴ The fifteenth century conflict between the parson of Liw (Poznań diocese) and the parson of Pniewnik (Płock diocese) about the tithe collected alternatim from some of the villages and about the parochial law continued into the sixteenth century, and the register of the income from this tithe from 1667 tells us that the matter was still not settled in the second half of the seventeenth century; Knapiński, *Notaty, Pniewnik parish*, p. 511. An attempt at dividing the controversial area can be found in an agreement between Benedykt Izdbieński, the bishop of Poznań, and Andrzej Noskowski, the bishop of Płock, from 1547, ratified by the chapters in Piotrków in 28 January 1548. The border was set on the old road to Lithuania. The following villages were ascribed to Poznań diocese: Goćław, Sulejów, Długa, Okuniew, Budziska, Goździówka, Sokole, Rakowiec, Rudzienko (and Rudno), Czarnogłowska Wola, Czarnogłów, Osówno, Wyrzyki, Czerwonka, Liw Stary and Liw Nowy, and the following to Płock diocese: Praga, Kamion, Grochów, the other part of Okuniew, Michałowo, Pustelnik, Stanisławów, Osowieńska Wola that is Nowa Wieś and Skarzyn; Now2, pp. 38, 548.

¹⁵ Cf. footnote above.

¹⁶ Stanisławów deanery in 1628 (ADP, *Akta Konsystorza*, no. 59, pp. 92–114). It seems that one of the parts of Okuniew could be identified with the village called Długa Okuń, which between 1569 and 1570 was called Długa Okuniowe or Długa Okuniowej; the village belonged to Długa parish, so to the diocese of Poznań.

ment of the parish in Pustelnik from 1540 lists Wola Goździowa, which we identify with Goździówka, among villages belonging to this parish. This finds confirmation in the materials from the eighteenth century, which testify that Goździówka belonged to Pustelnik parish. The village was not listed in the 1609 visitation of Pustelnik parish (Stanisławów deanery of Płock diocese), nor in Mińsk parish (Liw deanery, Poznań diocese) by the visitation from 1660. The situation from the end of the eighteenth century proves the diocese border arranged in 1548 had been changed.¹⁷

Sokole, a village listed in 1548 on the side of Poznań diocese, was inspected in 1609 in Stanisławów parish, which belonged to Płock diocese.¹⁸

Some difficulties occurred again near Dobre parish. Rev. J. Nowacki, the author of *Dzieje archidiecezji poznańskiej* ('The History of the Diocese in Poznań'), suggested that the major part of this parish belonged to Poznań diocese, claiming it would be quite an exceptional case at least, when a part of a parish was made dependent on the jurisdiction of the bishop of a different parish.¹⁹ Nowacki based on the range of the parish recorded in the sources from the second half of the sixteenth century, but at the moment of foundation in 1530, Dobre parish consisted only of the following villages: Żadna alias Dobre, Makowiec, Rakowiec, Brzeźnik, Brzozowica and Kobylałaka.²⁰

Of the villages listed in 1530 only Rakowiec was ascribed to Poznań diocese in 1548. We possess no Church source material which would allow us to determine the parochial affiliation of this village in the later period. It should, however, be noticed that tax registers from 1578 and 1663 place Rakowiec in Czerwonka parish, so one in Liw deanery of Poznań diocese. Still, the fact that also Dobre, a parochial seat, was listed under Czerwonka parish, suggest this was a mistake.

The analysis of the sixteenth–eighteenth century parochial affiliation of the remaining villages ascribed to Poznań diocese, and noted by the lan tax register from 1563 in Dobre parish, leads us to the conclusion that somewhere in the sixteenth century these villages became part of parishes neighbouring on Dobre parish, but located already in Poznań diocese.²¹ This is the state depicted on our map.

Similar is the case of the last fragment of the borderline between the dioceses, where Skarzyno village was listed to Płock parish in 1548, while the neighbouring Wyrzyki – was listed to Poznań parish. In the second half of the sixteenth century, both villages: Skarzyno (Skarzyno Koszewnica) and Wyrzyki (Skarzyno Wyrzyki) paid the lan tax with other villages from Czerwonka parish, situated in Poznań district. The affiliation of these two villages to Czerwonka parish is confirmed by Church sources from 1617.²²

The border between **the archdeaconry of Płock and the archdeaconry of Pułtusk** is uncertain at the point of junction between Przasnysz and Pułtusk deaneries. Podosie parish is listed – quite consistently in the sixteenth century and in the beginning of the seventeenth century – in both these deaneries at the same time in the years 1506²³ and 1628²⁴ (rural deanery of Pułtusk – and Przasnysz deanery). In 1530 the list of parishes in Pułtusk archdeaconry mentions Podosie only in Pułtusk deanery, and in the 1632 the villages are listed only in Pułtusk deanery.²⁵ On our map, the entire parish was outlined with the archdeaconry border, showing an alternative affiliation of this parish to both deaneries.

Here we should mention (perhaps it will help us highlight the situation) that reconstruction work on the borders of Pułtusk archdeaconry allowed us to believe this border, led when the archdeaconry was isolated by virtue of the 1443 act, ran differently.²⁶ This border in general overlapped with the contemporary political border, namely the eastern border of the Duchy of Płock. The course of the borderline could be roughly reconstructed on the basis of the 1443 document and the list of parishes in Pułtusk

archdeaconry from 1530, which could have preserved the layout of the old form.²⁷ Then, between the fifteenth century and the end of the sixteenth, probably due to the development of the parochial network in eastern Mazovia, the spatial organization of archdeaconries changed, and the borders of Pułtusk archdeaconry moved to the east, resulting in the incorporation of Przasnysz and Ciechanów deaneries – which so far had remained in Pułtusk archdeaconry – to Płock archdeaconry.

The deanery of Stanisławów was separated from Nur deanery at the end of the sixteenth century (1593).²⁸ The border of this deanery could be reconstructed on the basis of the list of parishes in Pułtusk archdeaconry from the beginning of the seventeenth century.²⁹ The foundation of the deanery was related to the development of the parochial organization, extremely intense in the sixteenth century in this area, which encompassed the borderland territories of the lands of Warsaw, Nur, Liw, and Czersk.

The analysis of the reconstructed deanery borders within Płock diocese found some major shifts of the borders in the sixteenth century between the deaneries of Wizna and Łomża,³⁰ Ciechanów and Przasnysz,³¹ Płońsk and Mława.³²

The reconstruction of the borders of Warsaw archdeaconry, which belonged to Poznań diocese, met with no severe difficulties, apart from those already mentioned, concerning the division of Płock and Poznań dioceses. The range of the archdeaconry was determined on the basis of the visitation of parishes in Warsaw archdeaconry, conducted in bishop W. Gośliński's days between 1598 and 1603.³³

The parochial network developed in Mazovia in the sixteenth century, particularly in the territories of new settlement. And so, in the borderlands of Warsaw, Nur, Czersk and Liw lands, only in Nur deanery, nine new parishes were founded:

Złotoria (1502),³⁴ Stoczek that is Miednik (1518),³⁵ Jelonki (1510),³⁶ Stanisławów (1525),³⁷ Sadowne (around 1529),³⁸ Dobrze (1530),³⁹ Postoliska (1531–1540),⁴⁰ Pustelnik (1540)⁴¹ and Okuniew (1540),⁴² which justifies the reorganization of Church administration in this area, shown by the separation of a new deanery – Stanisławów – in 1593.

Nearby, in Wyszaków deanery, a parish was established in Lubiel (1547),⁴³ in Liw deanery of Warsaw archdeaconry – in Cegłowo (before 1533),⁴⁴ Wierzbno (1583),⁴⁵ in Garwolin deanery – in Kuflewo (1515),⁴⁶ Siennica (1528),⁴⁷ Zwola (1529),⁴⁸ Jastrzębie (1547),⁴⁹ and Glinianka that is Wawrzyńczewo (1556).⁵⁰

All the remaining newly-established parishes lay mostly in northern Mazovia: in Mława deanery – Niedzborz (Pokrytki – 1502),⁵¹ in Łomża deanery – Białaszewo (1533),⁵² in Wizna deanery –

Map 1. The separation of Stanisławów deanery at the close of the 16th century

Nowa Wieś (Nieradowo 1535),⁵³ in Przasnysz deanery – Chorzele (1551),⁵⁴ and in Szeńsk deanery – Zieluń (1578).⁵⁵

The range of Dobre parish can serve as an example of the difficulties in determining the parochial affiliation of settlements in newly-erected parishes. We have the foundation document from 1530, but lack any sixteenth century confirmation of parochial affiliation for the villages created in the sixteenth century in the vicinity of the parish. Tax registers list different parochial and district affiliations in different years.

The following settlements, probably incorrectly listed in neighbouring parishes by fiscal sources from the sixteenth century, were ascribed to this parish, either on the basis of the foundation document from 1530, or the eighteenth century sources: Brzozowica,⁵⁶ Kobyła Łąka,⁵⁷ Żukówka,⁵⁸ Rynia,⁵⁹ and

⁵³ ADP, Akta Kapituły Płockiej, no. 3, f. 167.

⁵⁴ „Rocznik Diecezji Płockiej”, p. 59.

⁵⁵ Ibidem, p. 157 (incorrect date, 1578 instead of 1588); ADP, no. 274, f. 12v.

⁵⁶ Brzozowica – tax registers from the sixteenth century – Postoliska parish or Jadów parish, foundation document of Dobre parish from 1530 and Taryfy 1789–1790 – to Dobre parish.

⁵⁷ Kobyła Łąka – tax registers from the sixteenth century in Wodynie parish in Czersk land or Jadów parish in Kamieniec district; ascribed to Dobre parish on the basis of the foundation document of the parish from 1530.

⁵⁸ Żukówka – tax register from 1552 and 1563 Jadów parish, 1569 Stanisławów parish. Czaykowski – Dobre parish.

⁵⁹ Rynia – tax registers from the sixteenth century in Kamieniec, Liw or Warsaw district, 1576 – Niegowo parish, 1580 – Stanisławowo parish; retrogressively ascribed to Dobre parish on the basis of: Czaykowski, Tabela 1827 and SGKP.

Czernik.⁶⁰ The destruction of some of these villages in the eighteenth century, as well as ownership changes in this territory,⁶¹ made it difficult to reconstruct the sixteenth century parochial affiliation on the basis of the later situation. Therefore, the obtained results should be treated as a hypothesis.

Subsidiary churches were shown on the map, if they had had separate districts in the sixteenth century.⁶² However, they were not marked with any special sign, which would allow us to distinguish between them and parochial churches.⁶³

Often, laborious efforts were required in order to determine whether a subsidiary church had its own district in the sixteenth century. For instance, since 1427⁶⁴ there was a church in Głowno, which had a subsidiary district still operating in the sixteenth century, as proven by the fact that Warchałow, a village abandoned and turned into a demesne in the beginning of the sixteenth century, belonged *sub parochiali in Głowno*.⁶⁵ The range of the parish reconstructed on the basis of later sources, i.e. the document of the foundation of the parish from the seventeenth century, encompassed the following villages, ascribed to Domaniewice parish at the beginning of the sixteenth century: Ruchna, Kamień, Grodnów, Borówko, Ostrołęka and Poleniec. It should be mentioned that Domaniewice parish lay in Sochaczew district, but the subsidiary district, i.e. Głowno parish, in the district of Rawa.

The map does not show subsidiary churches without a district, which existed in Mazovia at the time, as well as chapels (e.g. Bełchów, Trojanów, etc.). Annex II provides information on the density of the Mazovian parochial network in the end of the sixteenth century. The size of parishes inside each land was given in absolute numbers and in percentages.

ANNEX I CHURCH ADMINISTRATION NETWORK IN MAZOVIA IN THE SIXTEENTH CENTURY

Płock diocese

Płock archdeaconry

PŁOCK DEANERY (before 1506 part of Płock deanery): Płock, Imielnica, Miszewo Śledziowe, Słupno, Miszewo Murowane, Miszewo Garwaskie, Świąciniec, Radzanowo, Woźniki, Zagroba, Ciachcino, Trzepowo.

BIELSK DEANERY (ditto): Bielsko, Słupia, Łęg, Biskupice, Drobin, Koziębudy, Raciąż, Krajkowo, Drozdowo, Baboszewo, Gralewo, Rogotworsk, Góra, Żochowo, Starożeby.

GOSTYNIN DEANERY (ditto): Radziwie, Dobrzykowo, Ciechomice, Gostynin, Mních, Sokołowo, Solec, Duninowo.

⁶⁰ Czernik – tax registers from 1562 – Stanisławów parish. Retrogressively ascribed to Dobre parish on the basis of Taryfy 1789–1790, Czaykowski and Tabela 1827.

⁶¹ „Odgraniczenie dezertów Czernika i Żukówki prawu urodzonego Pawła Białobrzieskiego podległych z przyłączeniem Ryni i Głębozczy”; VL, vol. 8, p. 147 (year 1775).

⁶² In Mazovia they contain: Imielno (subsidiary church of Grochowo parish), Głowno (subsidiary church of Domaniewice parish), parishes Góra and Nowe Miasto (initially, at the close of the sixteenth century, Nowe Miasto was the subsidiary church, but the town developed and the parish was granted full rights, while Góra became its subsidiary), Łanięta (subsidiary church of Białotarsk parish), Wielka Wola (subsidiary church of the parish of St. John in Warsaw), Poniatowo (subsidiary church of Chamsk parish) and Niechłonin (subsidiary church of Sarnowo parish) and other.

⁶³ As subsidiary churches, which had their own district, could with time become autonomous, like e.g. in Duczymin, separated from Krzywonoga Wielka parish in 1496 as a subsidiary church (ADP, *Episcopalia*, no. 15, f. 155 – Kartoteka SHGM). Similarly, in the second half of the sixteenth century we can list Solec – subsidiary church of the parish of St. John in Warsaw (later replaced by Jazdów parish), Czerwonka, subsidiary church of the parish in Liw, Cegłów, subsidiary church of the parochial church in Kiczki, and Czermno, subsidiary church of the parish in Troszyn (Register of the tax collected from the clergy in 1561, AGAD, ASK, I 27, ff. 272v, 282v, 283v, 287), which appear as autonomous parishes in the visitation conducted at the turn of the sixteenth and seventeenth century.

⁶⁴ Łaski LB, II, p. 343.

⁶⁵ *Ibidem*, pp. 233, 343.

SIERPC DEANERY (ditto): Brwilno, Biała, Proboszczewice, Sikorz, Borzewo, Mochowo, Kurowo, Goleszyno, Kisielewo, Borkowo, Sierpc, Lutocin, Biezuń, Rościszewo, Zawidz, Jeżewo, Gozdowo, Benisław.

CZERWIŃSK DEANERY (before 1506 part of Czerwińsk deanery, which was divided into three smaller deaneries: Czerwińsk, Płońsk and Wyszogród): Radzymin, Żukowo, Naruszewo, Krysko, Grodziec, Radzikowo, Czerwińsko, Kociszewo, Miączyno, Smoszewo, Kamienica, Kroczewo, Zakroczym.

PŁOŃSK DEANERY (ditto): Pomnichowo, Wrona, Wrońska Joniec, Gromadzino, Płońsko, Wierzbowiec, Sulerzyż, Sarbiewo, Glinojec, Unierzyż, Strzegowo, Unieck.

WYSZOGRÓD DEANERY (ditto): Łętowo, Zakrzewo, Wyszogród, Rębowo, Kobylniki, Orszymowo, Bodzanów, Blichowo, Łubki, Daniszew, Bolkowo, Pilichowo, Kucice, Gumino, Skołatowo.

MŁAWA DEANERY (before 1506 part of Zawkrze deanery, which was divided into Mława and Szreńsk deaneries): Bogurzyn, Podkrajewo, Mława, Szydłowo, Wieczfnia, Kuklino, Janowiec, Wyszyny, Grzebsk, Żmijewo, Stopsko, Żeromino, Dąbrowa, Niedzborz (Pokrytki foundation 1502), Lekowo, Małużyno, Dziektarzewo (in 1599 in Płońsk deanery).

SZREŃSK DEANERY (ditto): Grodzanowo, Radzanowo, Zgliczyn, Szreńsk, Kuczbork, Zielona, Chamsk, Karniszyn, Lubowidz, Nick, Niechłonin, Dłutowo, Sarnowo, Poniatowo, Zieluń (founded in 1578), Lipowice.

CIECHANÓW DEANERY (before 1506 part of Ciechanów deanery, which was divided into two deaneries: Ciechanów and Przasnysz): Ciechanów, Zembok, Łysakowo, Grudusko, Czernice, Kożyczyno, Pałuki, Ciemniewo, Kraszowo, Sońsko, Łopacino, Królewo, Sąhocino, Nowe Miasto, Ciekysno, Nasielsko.

PRZASNYSZ DEANERY (ditto): Przasnysz, Węgra, Pawłowo, Dzierzgowo, Krzynowłoga Wielka, Krzynowłoga Mała, Bogate, Zielona, Krasne, Węgrzynowo, Makowo, Karniewo, Gołymino, Duczymino, Chorzele (founded in 1551), also Podosie parish was ascribed to Przasnysz deanery in 1506 and 1628, in 1598 it was not inspected on Płock archdeaconry.

Pułtusk archdeaconry

PULTUSK DEANERY: Pułtusk, Dzierżenino, Serock, Zegrze, Smogorzewo, Pokrzywnica, Winnica, Klukowo, Szyszki, Przewodowo, Gąsiorowo, Gzy, Szwelice, Szekowo, Rożan, Sieluń, Sielc, Podosie, Gąsowo.

ŁOMŻA DEANERY: Łomża, Ostrołęka, Nowa Wieś or Nieradowo (founded in 1535), Miastkowo, Nowogród, Płocko, Poryte, Kolno, Lachowo, Grabowo, Wąsosz, Niedźwiadna, Słucz, Radziłowo, Romany, Przytuły, Jedwabne, Burzyno, Dobrzyjałowo, Grajewo, Białaszewo (founded in 1533).

WIZNA DEANERY: Wizna, Drozdowo, Piątnica, Puchały, Zambrowo, Somowo, Smlodowo, Lubotyń, Piski, Szepankowo, Kleczkowo, Troszyno, Goworowo, Rzekuń, Rudki, Zawady, Kołaki.

In 1593 the deanery of Stanisławów was separated from the deaneries of Nur and Wyszkowo.

WYSZKÓW DEANERY prior to 1593: Wyszkowo, Pniewo, Obryte, Zambska, Długosiodło, Wąsowo, Czerwino, Ostrowia, Złotoria (founded in 1502), Zaręby, Wronie (later Andrzejewo parish), Rosochate, Czyżewo, Jelenie (founded in 1510), and Lubiel (founded in 1547).

WYSZKOWO DEANERY after 1593: Wyszkowo, Pniewo, Obryte, Zambska, Lubiel, Długosiodło, Wąsowo, Czerwino, Ostrowia, Jelenie (founded in 1510) and Lubiel (founded in 1547).

NUR DEANERY prior to 1593: Nur, Zuzela, Brok, Brańsk (Brańszczyk), Kamieniec (Kamieńczyk), Jadowo, Korytnica, Pniewnik, Niegowo, Dąbrówka, Tarchomin, Kamion, Nowydwór, Wieliszewo, Barcice, Zatory, Kamionolas, Sadowne (founded in 1529), Stok (Stoczek, founded in 1518), Stanisławów (founded in 1525), Klembowo, Cygowo, Pustelnik (founded in 1540), Radzymino, Kobyłka, Okunino, Żadne or Dobre (founded in 1530).

NUR DEANERY after 1530: Nur, Zuzela, Brok, Złotoria, Andrzejewo (formerly Wronie parish), Rosochate, Czyżewo, Jadowo, Kamionlas, Sadowne, Stoczek that is Miednik, Korytnica, Pniewnik, Dobre.

STANISŁAWÓW DEANERY: Niegowo, Stanisławowo, Klembowo, Cygowo, Pustelnik (founded in 1540), Dąbrówka, Radzymino, Kobyłka, Okunino, Tarchomin, Kamion, Wieliszewo, Postoliska (founded 1531–1540), Chotomowo, Okuniewo (founded 1540).

Gniezno archdiocese

ŁOWICZ ARCHDEACONRY (separated from Łęczycza archdeaconry in the 1520s; the division into three deaneries introduced at the close of the sixteenth century).

ŁOWICZ DEANERY: Łowicz (the parish of the Holy Virgin), Łowicz (the parish of the Holy Spirit), Złaków, Kocierzewo, Kapin, Bednary, Nieborów, Pszczonów, Kołacinek, Dmoszyn, Domaniewice, Głowno, Chruślin, Bolemów.

RAWA DEANERY: Rawa, Stara Rawa, Kurzeszyn, Boguszyce, Sierzchów, Łęgonice village and town, Nowe Miasto (Góra), Michałowice, Rzeczyca, Inowłódz, Lubochnia, Tobiasze, Małecz, Ujazd, Budziszewice, Czerniewice, Krzemienica.

SKIERNIEWICE DEANERY: Skierniewice, Żelazna, Maków, Wysokienice, Głuchów, Żelechlinek, Janisławice, Białynin, Jeżów, Słupia, Lipce, Godzianów, Bełchów.

Poznań diocese

Warsaw archdeaconry

LIW DEANERY: Wierzbno (founded in 1583), Czerwonka, Liw, Niwiska, Oleksin, Wodynie, Cegłowo (founded before 1583), Jakubowo, Mińsk, Długa, Wiśniewo, Kałuszyno, Grębkowo.

GARWOLIN DEANERY: Garwolin, Łaskarzew, Tarnów, Wilga, Radwanków, Osiecko, Karczewo, Zerzeń, Więzowno (founded 1589–1597), Glinianka (founded 1556–1564), Kołbiel, Siennica (founded 1528), Kiczki, Kuflewo (founded 1515–1548), Żeliszew or Łukowiec (founded in 1532), Latowicz, Seroczyn, Stoczek, Parysewo, Jastrzębie or Borowie (founded 1547), Miastkowo, Zwola (founded in 1529).

WARKA DEANERY: Warka, Wrociszewo, Promna, Boglewice, Drwalewo, Pieczyska, Chynowo, Sobikowo, Konary Ostrołęka, Mniszewo, Roznieszewo, Magnuszewo, Grabowo.

GRÓJEC DEANERY: Przybyszew, Mogielnica, Lubania, Lewin, Cielądz, Wilków, Błędów, Jeziora, Worów, Grójec, Jasieniec, Łęczeszycze, Lewiczyn, Goszczyn.

MSZCZONÓW DEANERY: Tarczyn, Mszczonów, Biała, Żdżar, Chojnata, Sadkowice, Ojrzanów, Jaruzel, Lutkówka, Osuchów, Regnów, Babsko, Skuły, Rembierkowo.

PIASECZNO DEANERY: Czersko, Góra, Cieciszewo, Powsino, Milanów, Służewo, Jazdów (founded in 1593 replacing Solec), Babice, Wawrzyszewo, Wielka Wola, Raszyn, Piaseczno, Jazgarzew, Prażmów.

BŁONIE DEANERY: Błonie, Zaborowo, Leszno, Głusko, Kazuń, Łomny, Kiełpino, Borzęcin, Żbików, Pęcice, Nadarzyn, Brwinowo, Grodzisko, Żukowo, Rokitno (St. Adalbert parish), Rokitno (St. Jacob parish), Pawłowice.

SOCHACZEW DEANERY: Sochaczew, Kozłów Biskupi, Kozłów Szlachecki, Rybno, Brzozowo, Giżyce, Młodzieszyn, Kamion, Mistrzewice, Brochów, Zawady, Kapinos, Kaski, Wiskitki, Białynin.

GĄBIN DEANERY: Gąbin, Osmolino, Sanniki, Kiernozia, Luszyno, Pacyna, Suserz, Trąbki, Strzelce, Troszyno, Czermno (founded in 1530), Życko, Piotrkowo, Howo, Jamno.

Administrative affiliation of individual parishes located in the borderlands of Mazovia and subject to neighbouring units of Church administration looks as follows:

Gniezno archdiocese

ŁĘCZYCA ARCHDEACONRY: parishes Głogowiec, Kutno, Jemielno (subsidiary of Grochów), originally in Bedlno deanery, then Kutno deanery.

KURZELÓW ARCHDEACONRY: parishes Wyśmierzyce, Jasionna, Stromiec.

Płock diocese

DOBRZYŃ ARCHDEACONRY: parishes Bądkowo and Rokicie in Dobrzyń deanery, Skrwilno parish in Rypin deanery.

Włocławek diocese

WŁOCŁAWEK ARCHDEACONRY: Brześć Kujawski deanery: Białotarsk parish and its subsidiary church in Łanięty.

Cracow diocese

LUBLIN ARCHDEACONRY: Głowaczów parish, originally in Radom deanery, later Zwoleń deanery.
ŁUCK DIOCESE
Dąbrowa parish.

ANNEX II NUMBER OF PARISHES IN MAZOVIA

Number of parishes in Mazovia in the end of the sixteenth century according to their size (in absolute numbers)* (parishes divided between land were counted twice)

III.2.2.8 PODLASIE VOIVODESHIP

Bogumił Szady

The boundaries of the Łuck and Wilno dioceses in Podlasie

The Voivodeship of Podlasie lay in the second half of the sixteenth century within the boundaries of two Roman Catholic dioceses – Łuck and Wilno. This very fact points to the historical attachment of Podlasie to the Grand Duchy of Lithuania and the Ruthenian lands (Volyn). Podlasie came to an end with the boundaries of the aforementioned dioceses to the west. At the same time both dioceses covered in their scope areas lying far to the north and west of Podlasie, extending all the way to Bratslav Podole (the diocese of Łuck) and the borders of Livonia (the diocese of Wilno). For this reason the description of Church boundaries will include the western and southern fragments of the borders of both dioceses, which almost ideally match with the borders of the Podlasie Voivodeship and to large degree are marked (demarcated) by rivers.

Running through the territory of the voivodeship was the boundary of the Gniezno metropolitan, to which belonged the diocese of Wilno, and the Lwów metropolitan. Controversy is aroused amongst historians over the metropolitan affiliation of the diocese of Łuck. Much attention has been devoted to the matter by Jan Fijałek and Władysław Abraham in writing about the beginnings of the Latin Church in the Ruthenian lands. The source of this controversy as to metropolitan affiliation of the Łuck diocese was its very genesis in the first half of the fifteenth century and relations with the diocese of Volodymyr that had earlier functioned within the same areas. The shaping of the boundaries of the Łuck diocese as well as its metropolitan affiliation enters into the context of the political and territorial disputes had by Poland and Lithuania at the beginning of the fifteenth century as well as the plans of Duke Vytautas to make the Latin Church in Lithuania free of influences from the Crown and the metropolitan of Galicia (Lwów) through the calling into being of a separate metropolitan for the Grand Duchy of Lithuania. This was to have incorporated, among others, the Włodzimierz diocese,¹ the continuator of which was the diocese of Łuck. Given the absence of a foundation document for the diocese and its fairly circuitous beginnings in relation to the diocese of Włodzimierz, its official name in the second half of the sixteenth century leads one to the legislative sources of the Catholic Church from this period. As equally the synod acts, the documents appointing bishops as well as the first known relations ‘ad limina’ make use of the terms: dioecesis Luceoriensis (Łuck diocese). In the sixteenth century employed was also the term ‘Janów diocese’ which might have resulted from the fact that Janów was the residence of the bishops of Łuck and an important ecclesiastical centre.² Only in the seventeenth century did the dual name: the diocese of Łuck and Brześć start to be widely used, which was associated with the creation of the archdeaconry of Brześć, to which the parishes in Podlasie and those of the Brześć Litewski Voivodeship belonged.³ It follows to accept from the formal

point of view that the Włodzimierz diocese was joined to the Galicia metropolitan at the moment of its creation in 1375. In 1400, at the request of the Lithuanian Duke Vytautas, and nominated by Pope Boniface IX, the bishop of Włodzimierz became Grzegorz of Buczków (Buczowski), the Dominican prior at Łuck. This same pope, on the request of Władysław Jagiełło, appointed in 1404 the first Łuck bishop Świętosław, the son of Jarosław, and of the Carmelite order.⁴ In this way the political and territorial dispute between the Crown and the Grand Duchy of Lithuania transferred itself onto Church ground.⁵ This was to be only despatched with the death of the two bishops in question – in 1425 on the strength of the decision of Pope Martin V transferred to Łuck was the seat of the Włodzimierz diocese.⁶ In as far as there is no doubt as to the affiliation of the Łuck diocese to the Galicia (Lwów) metropolitan in the fifteenth century there appear in the sixteenth century traces of an actual, though never in fact formalised, overlordship of the Gniezno metropolitans over the Łuck diocese. This is borne out by appeals made on disputed matters and directed from the territory of the Łuck diocese to the archbishops of Gniezno and their officials.⁷ Bolesław Kumor and Wiesław Müller present in their works by a fundamental difference in views in reference to the metropolitan affiliation of the Łuck diocese. The first of these two considers that the diocese of Łuck changed its metropolitan affiliation in the sixteenth or seventeenth century and went under the authority of Gniezno, although not formal sanctions in any documentation whatsoever have been found.⁸ A different position is presented by Müller, who approaching matters from formal-legal premises categorically includes the Łuck diocese to the Lwów metropolitan.⁹ Kumor's opinion is backed by Królik in his monograph on the Łuck diocese, while Müller is supported by Stanisław Litak in his works on the territorial administration of the Latin Church.¹⁰ At the turn of the seventeenth century metropolitan affiliation was controversial as is borne out by the fragment of the account of the Lwów archbishop Jan Dymitr Solikowski of 1600, who unequivocally considered it to be part of his metropolitan, pointing out in this that the diocese of Łuck groundlessly referred itself to Gniezno, even though the papal bulls, documents, chronicles, custom and the geographic proximity showed its affiliation to the Lwów metropolitan.¹¹ Taking into consideration that fact that the administrative boundaries and territorial divisions were formal-legal in character, and given the lack of any papal approval for a change in metropolitan affiliation for the Łuck diocese, on the main map as well as on the map of the administrative boundaries of Podlasie in the second half of the sixteenth century it has been included within the Lwów metropolitan.

The initial extent of the Włodzimierz diocese, as well as of its successor, the diocese of Łuck is hard to ascertain. Without doubt it was connected to the units of state administration as well as the Orthodox diocese of Włodzimierz that had earlier functioned on these lands. There dominates the conviction as to its extensive territorial scope encompassing the lands of Łuck, Włodzimierz, Brześć, and Drohiczyn, and during the initial phase of its the existence also the lands of Chełm, Belz and the whole of Podole.¹² It is worth adding that during the initial stage in the building of the structures of

⁴ Władysław Jagiełło's support for the Bishop of Łuck Świętosław is a matter of contention. In the older subject literature there existed the view that Świętosław did enjoy the support of Jagiełło. Yet in the light of recent research the reverse seems the case – with his taking over of Łuck cathedral he coming in for royal opposition and not simply that of the Grand Duke Witold; T. Graff, *Episkopat monarchii jagiellońskiej w dobie soborów powszechnych XV wieku*, Cracow 2008, pp. 63–65; idem, *Świętosław*, [in:] PSB, vol. 51, p. 548.

¹² That at least the Drohiczyn land belonged to the Włodzimierz diocese is borne out by the document of the Włodzimierz bishop Grzegorz for the years 1414–1424 (Węgrów, Sokołów, Kuczyn); J. Fijałek, *Biskupstwa wołyńskie Polski i Litwy*, p. 20; T.M. Trajdos, *Kościół Katolicki na ziemiach ruskich*, pp. 104–105, map 2: The Łuck diocese in 1434; Jaszczolt, *Fundacje kościelne*, p. 20.

the Roman Church in the Piast state (here up until the twelfth century) the western part of Podlasie was sometimes included by historians within the boundaries of the diocese of Gniezno and later of the diocese of Płock.¹³ A full though at the same time fairly general description of the diocese of Łuck in the modern period was prepared by Bolesław Kumor in his synthetic work. The diocese of Łuck in its Podlasie part bordered to the west with the dioceses of Płock and Poznań, while to the south with the diocese of Cracow. The boundary of the metropolitan dividing the diocese of Łuck from that of Wilno, which belonged to the Gniezno metropolitan, ran latitudinally through the Podlasie voivodship. The boundaries of the diocese of Łuck with those of Płock, Cracow and Poznań corresponded, with only minor exceptions, with the borders of the units of state administration which divided Podlasie from Mazovia and Lesser Poland. These have been described in previous volumes of the AHP.¹⁴

The border between the diocese of Łuck and the Cracow diocese was in the Podlasie part fairly short and corresponded exactly with the border of the Podlasie and Lublin Voivodeships, which ran along the length of the River Liwiec. Most likely a natural course following the further flow of the Liwiec constituted the boundary between the Łuck diocese and the Czersk archdeaconry of the Poznan diocese. And on this stretch it corresponded with the border between the Voivodeships of Podlasie and Mazovia. Below Węgrów there started the boundary of the diocese of Łuck and Płock, which in its northern stretch corresponded to the voivodeship border. At the level of the parish of Prostyń it turns to the east running along the banks of the River Bug and subsequently between Nur (Mazovia) and Ciechanowiec (Podlasie) it heads north, running parallel with the border between the Voivodeships of Mazovia and Podlasie. Only the parish of Długa Dąbrowa (present-day Dąbrowa Wielka) in the deanery of Brańsk was divided between two secular administrative entities. The majority of the parish together with the parish church belonged to the Podlasie Voivodeship. Although several villages from the environs of Długa Dąbrowa (Dąbrowa-Michałki, Dąbrowa-Kity (Dąbrowa-Gospodarze), Dąbrowa-Szatanki (Dąbrowa-Sienica), Dąbrowa-Nowa Wieś and Dąbrowa-Modzele) were part of the Mazovian Voivodeship and lay within its borders. The foundation document for this parish of 1423, finally edited in 1493, enumerates a series of tithe villages, wherein all lay in the Podlasie Voivodeship: Miodusy, Kaczyno, Święck Wielki (Święcko), Brzóska Stare (Brzóska), Średnica, Mystki-Rzym (Mysłki), Włosty-Olszanka, Plewki, Gieralty and Szepietowo.¹⁵ Taking into consideration the earlier origins of the parish one may conjecture that the boundaries of the diocese in this region had been shaped and formed before the stabilization of state and administrative boundaries in the sixteenth century.¹⁶ The fact that within the territory of the parish lay the settlement of Święcko, that is the capital of the former medieval castellany as well as the seat of a vast parish¹⁷ earlier belonged to the diocese of Płock, may constitute evidence that the primary territory of the parish belonged in its entirety to this castellany and was only divided at a later period as a result of political developments that resulted in its collapse and the incorporation of a part of it into that of Drohiczyn.¹⁸ The division of this parish between two voivodeships is confirmed also by later sources, including the parish sketches of Karol Perthées of the second half of the eighteenth century.¹⁹

The extent of the Wilno diocese in the modern era corresponded to – as Władysław Semkowicz has written – the political territory of Lithuania proper, wherein he immediately noted its proximity with the dioceses of Samogitia and Łuck, which covered southern Podlasie. Unfortunately he did not

devote more attention to the actual shaping of the boundaries of the diocese.²⁰ Analysis of the development of the parish network as presented by Jerzy Ochmański shows that this was not a one-off act but rather a long-term undertaking connected with the process of the Grand Duchy of Lithuania's adoption of Christianity.²¹ The Wilno diocese in its Podlasie part neighboured the diocese of Płock to the west – the border looking from the south northwards was demarcated by rivers the Narew (from the mouth of the Ślina tributary), then the Biebrza tributary from its entry into the Narew as well as the Ełk from its mouth into the Biebrza. According to T. Krahel 'the formation of a border along this section was certainly linked to the assimilation into Lithuania of Podlasie by Grand Duke Vytautas.' At the level of Lake Toczyłowo the border of the Wilno and Płock dioceses reached the political boundary with the Prussians. The scope of the Wilno diocese in the northern part of Podlasie was defined by the state boundary marked out following the Treaty of Melno in 1422. The only exception, but here concerning the eighteenth century, was the affiliation of the Prussian village of Zawady-Tworki (Zawady) to the parish in Rajgród.²²

Some attention needs to be paid to the boundary of the dioceses of Łuck and Wilno within Podlasie as well as the reasons for the divergences between the voivodeship borders and those of the dioceses. The extent of the Łuck diocese to the north, in the territory of the Podlasie Voivodeship, was demarcated in the broadest of senses by the course of the River Nerew, with the parish areas belonging to the Łuck diocese often encroaching on its right bank. Such a picture is presented by the maps of Tadeusz Trajdos developed for 1434 as well as by Bolesław Kumor for the year 1520.²³ According to Tadeusz Krahel the boundaries between the Łuck diocese and that of Wilno was formed for a fairly long time in its Podlasie stretch.²⁴ The northern extent of the Łuck diocese was marked by the parishes of Tykocin and Suraż in the Bielsk deanery (present-day Bielsk Podlaski). The shape of the borders between the Łuck and Wilno dioceses was a consequence of the scope of the earlier Orthodox dioceses operating in this area as well as the state borders modelled on the structures of the Ruthenian local principedoms. Podlasie was not a homogenous administrative area in the Middle Ages – it was divided into a southern part (Galicia-Włodzimierz, with Drohiczyn, Mielnik, Suraż and Bielsk) and a northern one (Mazovian-Lithuanian, with Goniądz, Knyszyn and Rajgród) and was already demarcated as such in the thirteenth and fourteenth century.²⁵ In 1358 established and agreed to was a border between Mazovia and the Grodno principedom belonging to Lithuania, which stretched to the south to the small River Niewodnica, a right tributary of the Narew; the Drohiczyn land thus stretching out beyond.²⁶

The research problem awaiting a more detailed examination is the origins of the division of the subsequent Bielsk *powiat* (district) between two dioceses and metropolitans. Probable seems the scenario whereby such a construct of Church boundaries took place at the turn of the fifteenth century (the creation of the Galician metropolitan along with the subordinate to it of the suffragan bishoprics of Halicz, Przemyśl, Włodzimierz and Chełm – 1375, and the establishment of the Wilno diocese in 1388) under conditions of political conflict, and here in particular the period of rivalry over influence in Podlasie between Poles (Mazovians), Lithuanians and the Teutonic Knights. This political rivalry was to find its expression in the short-lived parallel functioning of the Łuck (Crown) diocese as well as that of Włodzimierz (Lithuanian) as well as attempts to bring into being a Church metropolitan for Lithuania as has been mentioned earlier. On the basis of the deliberations of Tomasz Jaszczółt and Emil Kalinowski one may conjecture that the boundaries of the Bielsk land was formed later when

seen in relation to the Church borders operating in this territory.²⁷ Both of the mentioned authors see as possible an initial and short-lived affiliation of the Drohiczyn land, from which the Bielsk land was partially distinct, to the dioceses of Płock and Wilno. One may talk about connections with the Płock diocese already in the period of the early Middle Ages (twelfth–thirteenth century), pointing to the act of transfer on the part of Konrad Mazowiecki in 1237 of Drohiczyn and environs to the Knights Templars as well as the above given example of the fortified parish settlement at Święck Wielki (Święcko). The authority of the bishops of Płock may have also extended to these territories during the short rule over Podlasie by the Mazovian dukes at the end of the fourteenth century (1390–c.1400). In turn the thesis as to the Drohiczyn land belonging to the Wilno diocese makes recourse to the political control exercised by Lithuania over this part of Podlasie as well as the transfer to the Wilno bishopric of two villages lying in the southern part of the Drohiczyn land – Jarnice (Jarnicze) and Wasilew.²⁸ The jurisdiction of the bishops of Płock and Wilno over Podlasie given the borderland nature of the territories as well as the numeral advantage of the Orthodox was never to constitute lasting territorial control as such. Political factors could play a significant role in the changing of Church boundaries. In 1388 Vytautas was merely a Brześć-Grodno duke, hence it is understood that he gave villages in the Drohiczyn land to the bishopric of Wilno. At the beginning of the fifteenth century already as lord of the entire Grand Duchy of Lithuania, and in wanting to strengthen the material bases of the Włodzimierz bishopric, then that of Łuck, he presumably acted so that the southern part of Podlasie entered into his composition. Though given the absence until the end of the fourteenth century of fact of Roman-Catholic parish structures as such this control was to be rather nominal and missionary in character.²⁹

The Bielsk land in their modern era boundaries was comprised of the sum of three territories – a part of the Drohiczyn land (with towns at Bielsk and Suraż), a part of the former Święck castellany, as well as a part of the Wizna land together with the district of Goniądz.³⁰ The Goniądz starosty had been brought under Witold's control already at the end of the fourteenth century (the Peace of Salin with the Teutonic Knights in 1398) and had been placed under the jurisdiction of the bishop of Wilno. Somewhat later, probably after 1405, after its temporary holding by Janusz I Duke of Mazovia, the Drohiczyn land along with the Święcko castellany returned to Witold, wherein they were connected to the Włodzimierz diocese (Łuck).³¹ This fact is confirmed by a document of Aleksander V of 1409 ordering the Cracow bishop Piotr Wysz to resolve the conflict as to Church authority over Volyn and Podlasie raging between the Włodzimierz bishop Grzegorz, and the Łuck nominee Świętosław. It is difficult to determine exactly the scope of the territories comprising the Włodzimierz diocese, for the document of 1409 only enumerates the names of the main towns, including among them 'Droiczin'.³² This is a period so pivotal that it corresponds with a time of moulding the administrative independence of the Bielsk land. All the boundary parishes of the Łuck diocese situated in the sixteenth century on the southern side of the Narew (Tykocin, Waniewo, Suraż and Narew) also covered settlements lying on its northern banks. This presumably resulted from the fact of the later registers of the Lithuanian parishes situated closer to the Narew (Trzcianne (Trzciane), Turośń Kościelna (Turośna), Juchnowiec Górny (Juchnowiec-Dwór), Niewodnica Korycka (Niewodnica Koryckich), Choroszcz, Dobrzyniewo

²⁷ The case of one of the oldest parishes within the Mielnik land that at Dziadkowiec (Dziadkowicze) (1431), may serve as an example of the later transformation of *powiat* (district) boundaries in Podlasie in relation to ecclesiastical divisions, this parish being divided between three *powiats* (districts); Jaszczółt, *Fundacje kościelne*, p. 41.

²⁸ There existed in the fifteenth century two separate villages of Wasilew. Wasilew Szlachecki belonged to the minor nobility Wasilewski family, while the second village named Wasilew was given by Witold to the Wilno cathedral, and after the year 1407 to the bishopric of Włodzimierz and Łuck; Jaszczółt, *Osadnictwo*, p. 175.

³⁰ H. Rutkowski, *Odpowiedź na krytykę*, pp. 231–232.

³¹ The taking over of power within the Drohiczyn land on the part of Witold presumably took place in stages. Already by 1400 he could have had command over the most northernly situated gord of Suraż; M. Sokół, W. Wróbel, *Kościół i parafia pw. Bożego Ciała w Surażu*, p. 28.

³² W. Abraham, *Sprawozdanie z poszukiwań w archiwach i bibliotekach rzymskich do dziejów Polski w wiekach średnich za lata 1899-1913*, AKH, ser. 2, vol. 1, 1923, p. 59.

Kościelne (Dobrzyniewo), Knyszyn) were in relation to the older Church centres at Suraż and Tykocin. All the mentioned Lithuanian parishes – besides Trzcianne (1496) and Choroszcz (1459), arose in the sixteenth century, meaning that their territorial extent in a northerly direction was limited by the influences exerted by the already existing parishes of the diocese of Łuck.

Deaneries and parishes

The Łuck diocese

At the turn of the seventeenth century the territorial structure of the Podlasie part of the Łuck diocese was based on a two-tier division into deaneries and parishes. Problematic remains the terminology used in historical sources to determine Church administrative units of a middle rung, which might suggest the functioning at this time of archdeaconries. In the Łuck diocese synod acts of 1589 it had been divided into three parts (*partes*) as well as seven rural deaneries. This raises the question as to whether the said *partes* (Mielnik, Janów, and Sarnaki) may be treated as being equal to archdeaconries.³³ Taking into consideration the later structure of the diocese and its division into two archdeaconries (Brześć and Łuck) authenticated in the seventeenth and eighteenth century then these parts cannot be treated as archdeaconries. This is also borne out by the fact that in the content of the entire chapter on synodal acts ‘De archipresbyteris seu decanis ruralibus’ the personage of an archdeacon appears only in the singular as the bishop’s representative or assistant in the running of a diocese.³⁴

The establishment of the list of deacons and the Latin parishes belonging to them and functioning within the Podlasie part of the Łuck diocese is not overly problematic. One may merely quantify or prepare a explanatory commentary or gloss which will deal with the differences between the theses contained in the subject literature and the view of the parish network presented on the main map as well as on the map depicting Church structures. The most important findings on deanery and parish division within the Łuck diocese in the modern era along with a map have been brought to us by the works of Ludwik Królik.³⁵ Podlasie parishes functioning in the mid sixteenth century have also appeared on Jan Jakubowski’s map of the Grand Duchy of Lithuania. Unfortunately their number is far from comprehensive and complete, while the author has not given the basis for the reconstruction of the parish network, while the cartographic symbolisation makes any unambiguous interpretation of the map’s content impossible.³⁶ Ludwik Królik has indicated two fundamental sources allowing one to establish a list of parishes functioning around the year 1600. The first of these is a list of parishes contained in the already mentioned synodal acts of 1589. This was published by Zenon Chodyński,³⁷ and subsequently commented on by J. Sawicki.³⁸ As Sawicki has established the actual manuscript from this synod has not survived, being destroyed during the Second World War. The second source is a list of parishes of the Łuck diocese found in the acts of the Janów diocese office for the years 1604–1607.³⁹

In the light of the synod of Łuck in 1589 there were to be found across the ‘Podlasie diocese’ all in all 95 parishes. Within the boundaries of the Podlasie Voivoidship there were 69 parishes arranged into two divisions (*partes*) – Mielnik (three deaneries: [Brańsk], [Drohiczyn], [Bielsk]) and Sarnaki (two deaneries: [Łosice], [Węgrów]).⁴⁰ There is no confirmation in the sources for Ludwik Królik’s

³³ L. Królik supposes that this division could have occurred in the mid sixteenth century. He points to the synod called into being by bishop Walerian Protasiewicz-Suszkowski in 1554; idem, *Organizacja dekanalna diecezji łuckiej i brzeskiej w XVII i XVIII wieku*, Lublin 1981, p. 11.

³⁹ ADS, sign. D 18, ff. 108–108v.

⁴⁰ The names of the deaneries given in square brackets are symbolic and come from the names of the subsequent seats of these self same deaneries. The synod acts gave neither the names of the deaneries nor their seats claiming only that deans were selected by the bishop from amongst the parish priests belonging to each deanery; *Acta synodi dioeceseanae Luceoriensis*, p. 28.

statement to define these *partes* as deaneries. For this term does not refer to seven deaneries but to three parts of the diocese (Janów Podlaski (Janów), Mielnik, Sarnaki). Ambiguous in the light of this source is the affiliation of the vacant parish of Jarnice mentioned twice – once within the deanery of [Łosice] and then [Węgrów]. L. Królik included it within the deanery of [Łosice].⁴¹

Fundamental in establishing the network of deaneries and parishes at the turn of the seventeenth century is the list of parishes outlined in the acts of the Janów diocese office for the years 1604–1607.⁴² It is, unfortunately, undated as well as not containing any additional information making for its ready interpretation. Ludwik Królik dates it at 1604 and relates it to the records of parishes compiled by Marcin Szyszkowski mentioned in the synod acts of 1726.⁴³ Such an interpretation raises doubts though for the Janów diocese office does not contain any information about the need for repair work on churches mentioned by the synod of 1726.⁴⁴ A more discerning analysis of the corrections and amendments in the list for the years 1604–1607 favours the conclusion that it both reflects the structure of deaneries and parishes at the end of the sixteenth century and the changes introduced at the beginning of the subsequent century (e.g., the allocation of the deanery at Szereszów). The list of parishes was not to undergo significant changes between the years 1589 and 1604–1607. There were to appear, however, two additional parishes Sady (a new foundation, the deanery of Drohiczyn)⁴⁵ and Rusków (Ruskowo) (taken over by Protestants, the Łosice deanery).⁴⁶ L. Królik has included within his work also the parish of Gródek (on the River Bug) within the deanery of Węgrów. Yet such a conclusion has its basis on lists of churches *per se* and not parishes as such. In Gródek there presumably functioned a chapel with no parish rights or separate chaplaincy.⁴⁷

On the main map as well as the thematic one devoted to Church administrative structures represented is the deanery division in accordance with the synodical enumeration of 1589. The vast majority of parishes had been given their deanery affiliation by the beginning of the seventeenth century. The most significant redeployments happened between the deaneries of Drohiczyn and Brańsk as well as Łosice and Węgrów, equally borne out by the corrections and amendments visible in the register of 1604. The Drohiczyn deanery lost, at the turn of the seventeenth century, in favour of Brańsk four parishes: Dołubowo (Dołobowo), Dziadkowice, Pobikry (Pobikrowy) and Rudka. According to L. Królik this reallocation was motivated by practical considerations – closer proximity to the seat of the deanery.⁴⁸ In turn the deanery of Łosice was to become smaller to the tune of two parishes to the benefit of Węgrów: Mokobody (Mąkobody) and Suchożebry.

Before registers and overall statistics are given, several problematic situations require qualification: these being chiefly connected with the question of the localisation of the parish church as well as parish independence as a Church administrative unit. Here preserved are the principles employed in the whole AHP series, where the main role is played by the formal criterion of the territorial functioning of a parish.⁴⁹ On the main map as well as on that showing Church boundaries in a uniform way have been included both churches with full parish rights as well as affiliated churches that possessed their own administrative district. Sometimes these have been classified in source materials as parish

⁴⁴ „Verum quoniam iuxta connotationem anno 1604 de mandato reverendissimi olim Martini Szyszkowski episcopi Luceoriensis factam constat, et in infra sequentibus oppidis villisque nimirum, 1. in Winnica, 2. in Przyłuk (...) 15. in Kalnik ecclesiae parochiales debere reperiri, ut et inibi cultus Divinus innovetur”, Synod 1726, f. Aav.

⁴⁵ In the register of 1604, there appeared in the very same line next to the Drohiczyn parish, the name Sady. The church at w Sady was founded in 1596 by Krzysztof Sadowski. The parish cannot be marked on the map because it came into existence only in 1607 on the strength of a settlement between the Drohiczyn parish priest and Stanisław Sadowski, Krzysztof's brother. The parish priest gave permission at the time for the separation of the church at Sady as well as bestowing it with villages from the Drohiczyn parish, which were to form the new parish of Sady: Sady, Koczery (Koczerhy) and Miłkowice. On the 14 July 1607 Reverend Stanisław Burzyński was designated to the “newly canonically erected parish church”; ADS, sign. D 18, ff. 166–168; ADS, sign. D 149, ff. 325v–328.

⁴⁶ For the subject of the parish at Rusków see below.

⁴⁷ ADS, sign. D 18, f. 108v (Gródek, capella [presented in curly brackets, the word capella crossed out]). Allegedly mention of the parish at Gródek in the synod acts of 1726 have not been confirmed, Synod 1726, ff. Bb–Bb2v.

branches (*ecclesia filialis parochialis*) or parish subsidiaries (*ecclesia parochialis filialis*). Included have also been those parishes (churches and districts) which were temporarily taken over by Protestants during the Reformation.⁵⁰

Despite their limited source authentication, represented on the map are the parishes in Krześlin and Rusków. The first of these is mentioned by the synodical records of 1589 and the parish census of 1604,⁵¹ and also later registered dating it up to the end of the seventeenth century.⁵² One may speculate over the inclusion of villages belonging to the manor house at Krześlin into the Suchożebry parish in the visitation acts of 1662–1664. It results from these that in Krześlin there was a chapel ('aedicula in forma templi') only for the use of the Wodyński family, while the sacraments were always administered in the parish church in Suchożebry.⁵³ The synod acts of 1589 do not mention the parish in Rusków. In 1604 there appears information about a parish church in this settlement yet with the annotation that it had been taken over by Protestants ('Russowo prophanata'). The foundation document for this parish was registered in 1493, yet this was presumably a dozen or so years after its actual establishment.⁵⁴ SGKP states that the church in Rusków was taken over by Protestants from 1580 to 1619.⁵⁵ In the acts of the provincial synod for the Lithuanian Brethren of 1615 can be found the annotation that the community at Rusków was in a state of collapse.⁵⁶ Shortly after, because in 1619, the church at Rusków was taken over by Roman Catholic clergy.⁵⁷

Somewhat more complex was the situation of the parish at Wierzchuca. It was founded here in 1469.⁵⁸ Analysis of sources from the second half of the sixteenth century and from the seventeenth century lead one to the conclusion that this parish, taken over by Protestants, was not returned to normal practice and for this reason it has been overlooked on the main map as well as on that of Church boundaries. The last time the parish name ('Wierchuczka') is to appear in the register of those who had not paid their taxes to the Łuck bishopric for the years 1567 and 1568 (the so-called silver tax) as well as in the tax register of 1576 ('Parafia Virschuczka').⁵⁹ Later, that is in the registers of 1589 and 1604, the name fails to appear. The visitation acts for the years 1662–1664 contain copies of documents that show an attempt to reactivate the parish in the seventeenth century.⁶⁰ This was, however, not to take place and Wierzchuca appears in the eighteenth century as a settlement within the parish of Śledzianów.⁶¹

The Church relations of the settlements of Miedzna and Międzylesie require more detailed analysis. In the synod acts of 1589 and the register of 1604 mentioned is also the parish of Międzylesie. In the subject literature it is identified with the parish of Miedzna.⁶² Given the existence in the seventeenth and eighteenth century of the two separate settlements of Miedzna and Międzylesie, separated by a distance of around 9 km as the crow flies, it follows to ask about the location of the parish church in the sixteenth century. Cartographic sources from the turn of the nineteenth century (Heldensfeld, Perthées), and following on from these the main map in the current work, show a church at Międzylesie (nowadays Miedzna). The parish at Międzylesie has fifteenth-century origins (1470), and so was established before the founding of the town (charter from 1531).⁶³ Sources from the sixteenth and

seventeenth century use both names in relation to the very same settlement. The most convincing piece of evidence as to the location of the St. Stanisław parish church in Międzyzlesie is an entry in the canonical institution for Baltazar ‘a Stanislawow’ of 1586 (following the recovery of the church from the Calvinists). The title of this entry reads: ‘Institutio Mieczna’, while in the content for the entry there appears the wording ‘ad parochialem ecclesiam in Miedzieliesze.’⁶⁴ Also the tax register for 1580 mentions ‘Miasteczko Miedzna’ (‘the small town of Miedzna’), and then there appears ‘Parochia Miedzilieska’ (‘the Miedzilieska parish’), to which belong ‘Thorzowa and Miedzna with villages.’⁶⁵ Also the visitation of 1662 uses the term ‘Ecclesia Miedzilesensis’, wherein in the description content for the parish there appear two names Miedzna and Międzyzlesie.⁶⁶ It follows to accept that the name Miedzna appearing in sources from the fifteenth and sixteenth century refers to the village on whose land the later town of Międzyzlesie was to be located.⁶⁷ Hence it definitely follows to reject Ludwik Królik’s conjecture that the parish of Miedzna came into existence between 1589 and 1604.⁶⁸

Taking into consideration the procedure for parish settlements designation in the AHP (the settlement’s symbol where the parish church was to be found), it follows to better explain the relations of the settlements of Kożuchów (Kożuchowo) and Kożuchówek. On maps dating from the second half of the eighteenth century (Perthées, Heldensfeld), there appears the village of Kożuchówek, where there is a church as well as the village of Kożuchów Wielki lying to the north-west of it. In turn, in the written sources from the second half of the sixteenth century, there appears only a single settlement of Kożuchów (written down as Kożuchowo, Kożuchowo Wielkie). What is important is that this also concerns Church sources giving parish names such as Kożuchowo⁶⁹ and Kożuchów.⁷⁰ It results from this that in the sixteenth century there existed but a single village of Kożuchów, but that the church was somewhat too distant, located in what subsequently was to be the village of Kożuchówek. In the seventeenth and eighteenth century the name Kożuchówek appears in the sources with the element of ‘parish’ (‘Plebański’) or ‘the blessed’ (‘na poświętnem’).⁷¹ This was presumably a parcel given to the church in the fifteenth or sixteenth century that was at a later period to be transformed into a separate settlement – still in the visitation of 1662 the site of the church was described as secluded and poorly populated.⁷² The marking on the main map of Kożuchów with the parish symbol indicating the parish seat need to be understood in the context of the actual church being located at a distance of approximately 1.5 km to the north east of the village.

The methodology adopted within the AHP for parish place naming has resulted in the parish of Juchnowiec being noted within the village of Juchnowiec Górny (Juchnowiec-Dwór). The Juchnowiec parish church, founded by Stanisław Włoszek, was situated in the modern era 1 km to the north east of Juchnowiec Górny (Juchnowiec-Dwór), at the spot of the contemporary village of Juchnowiec Kościelny – on the map by von Stein it is marked as ‘Kirche und Krug Juchnowiec’.⁷³ Similar circumstances decided about the location of the symbol for the parish church in the village of Niewodnica Korycka. The church in Niewodnica Korycka was endowed by Andrzej and Elżbieta Koryccy in 1596 ‘at our Niewodnica estate’, about 2.5 km to the north west of the village of Niewodnica Korycka, and here according to Józef Maroszek and Waldemar F. Wilczewski – ‘in immediate proximity to the manor house.’⁷⁴ On Perthées’ map the village of Niewodnica, situated to the north-west of Niewodnica Korycka, has been annotated with the symbol of a church. A similar picture is presented by von Stein’s map, where the church has been marked right next to the Niewodnica manor house (Hof Niewodnica, present-day Niewodnica Kościelna).

Certain difficulties accompany the correct location of the parish seat at Kadłuby – Ceranów (Czeranów) at the turn of the seventeenth century. In the parish register for the Łuck diocese of 1589 there is mentioned a parish at Kadłuby,⁷⁵ while in a subsequent register analysed for 1604 – at ‘Czeranów’.⁷⁶ The first church at Kadłuby existed already by 1488, though the actual foundation documents and the establishment of the parish itself were ascribed to the year 1508.⁷⁷ According to Tomasz Jaszczółt ‘A part of Ceranów, in which the church was constructed, bore until the mid sixteenth century the name Kadłuby.’⁷⁸ The location of the parish seat in Kadłuby results from the fact that on the main map Kadłuby and Ceranów have been designated as separate settlements. Kadłuby was in the second half of the sixteenth century absorbed by Ceranów – though it still appears in the registration of 1567,⁷⁹ but later the settlement bearing such a name disappears.

The parishes of Łosice and Hadynów in the register of 1604 were comprehended as a single registration entry (‘Łossicze et Hadinow’). Taking into consideration the title of the register: ‘Ecclesiae parochiales dioecesis Luceoriensis’ it follows to establish whether there should be two or just a single parish on the map. The church at Hadynów had older, fifteenth century, records. At the beginning of the sixteenth century, immediately following the founding of the town in 1505, a church was founded in neighbouring Łosice.⁸⁰ In the Sigismund I’s foundation charter document of 1511 there is talk of joining the filial church in Hadynów to the Łosice parish.⁸¹ In the synod register of 1589 both churches are still referred to as being parish churches.⁸² In the seventeenth century the church at Hadynów appears sometimes as being a dependent of the parish in Łosice (hence the appearance in one register position of 1604), though it was not to lose its own separate administrative district, to which the separate church registers bear witness. That both parishes were maintained in the sixteenth century as separately functioning entities from an administrative perspective is borne out by the fact that right until the end of the eighteenth century their own parish districts were in existence.⁸³

The church at Starejwsi (Starej Wsi) had the status of a filial church with its own parish district. The parish at Jakimowicze, for such was the initial name of Starawieś, was separated from the Węgrów parish in the second half of the fifteenth century. According to Tomasz Jaszczółt, and here after Aleksander Jabłonowski, the initial church was raised in 1473 and was dependent on the parish at Węgrów. In the years 1474–1477 it acquired parish rights – while in 1477 mentioned is Mikołaj, a parish priest from Jakimowicze. One may conjecture that the material situation of the parish was not that good which might have been the result of the constant divisions of estates at the turn of the sixteenth century. In the period of the Reformation the churches at Starawieś and Węgrów were taken over by Protestants, after which a Protestant congregation was created in Węgrów. Following the regaining of the churches for the Catholic clergy at the beginning of the seventeenth century, the parish at Jakimowicze was affiliated to Węgrów,⁸⁴ yet – and this is borne out by the act of the Łuck synod of 1726, it did not relinquish its parish district.⁸⁵

As one of the register positions in the parish register of 1604 appear Suraż and Poświętne (Poświętne) in the Bielsk deanery. The church and parish at Suraż is among the oldest in Podlasie and could have been founded from the endowment of Duke Witold. Towards the end of the fifteenth century a chapel was to appear within its territory at Wilkogrzeby, which it follows to identify with Poświętne. Attempts at a formal separation undertaken in the sixteenth century were rejected by the

parish priest at Suraż – and a formal division occurred only in 1808.⁸⁶ Despite this in all the parish registers for the years 1604–1750 Poświętne appears as a separate parish. In the visitation of 1662-1664 its parish district is given: ‘Villas haec ecclesia habet iure parochiae sibi subiectas pro administratione sacramentorum.’⁸⁷ This distinction was also confirmed by the synod acts of 1726.⁸⁸ The joining (affiliation) of the church at Poświętne to the parish in Suraż, is marked in a document of 1536, yet this did not result in a relinquishing of the parish district.⁸⁹ In the parish records for the year 1589 mentioned separately are: ‘Soraz’ and ‘Poświętne’.⁹⁰ ‘Parochia Poswiaczienska’ also appears in the noble register for the Bielsk land swearing allegiance to the Polish Crown in Bielsk in 1569,⁹¹ in the quoted register of those who had not paid taxes from the Łuck bishopric for the years 1567 and 1568 (the so-called *srebrszczyzna*)⁹² as well as in the tax registers of 1578 (‘Paraphia Poswaczienska’) and 1591 (‘Paraphia Poswiaczinska’).⁹³

Though a division and a parish district as such were not to be maintained by the parish at Budzieszyn following its incorporation into the provostship at Mokobody for the years 1539–1541. The parish at Budzieszyn was founded in the fifteenth century (the first mention being in 1458).⁹⁴ The joining of the old parish (Budzieszyn) with the new (Mokobody) took place not long after the bestowing of town rights on the village of Mokobody in 1496 and the funding there of the construction of a parish church. The year 1513 appears in the subject literature as the date for the foundation of the parish and church of St. Jadwiga in Mokobody.⁹⁵ Though this is not entirely accurate for in this year funded was only the mansionary which cannot be treated as being comparable to founding a parish and is rather merely the harbinger of its establishment as a parish as such.⁹⁶ As a result of the earlier merger of parishes certain historians treat the endowment of the church at Budzieszyn as the beginnings of the functioning of the parish at Mokobody.⁹⁷ The matter of the joining together of both benefices must have resulted in disputes and conflicts given that it was deemed necessary to convene in the seventeenth century a commission and confirm the joining of the abandoned (‘desertata’) parish at Budzieszyn to the parish of St. Jadwiga in Mokobody (1646).⁹⁸

After taking into consideration the above comments on the status of individual parishes, their localization and territorial integrity, one may find on the main map and on the map dealing with Church administrative divisions 70 parishes of the Łuck diocese distributed across the territory of the Podlasie Voivodeship including Dąbrowa Wielka (Długa Dąbrowa), with a few settlements finding themselves in Mazovia. This figure does not include parishes in Biała Podlaska (Biała), Milejczyce and Janów (Janów Podlaski), the seats of which were situated on the territory of the Brześć Litewski Voivodeship, while only a few settlements belonged to the Podlasie Voivodeship, about which more later. Nineteen parishes found themselves in towns (of which seven were royal properties and 10 – noble) as well as 51 in villages (of which 48 belonged to the nobles, two – to the Church, while one was of a mixed noble-Church mix). The number of parishes in the individual deaneries as well as the average area falling to each of them is given in Table 1.

Table 1. Number of parishes as well as their average surface area in the individual deaneries (the Podlasie part of the Łuck diocese)

Deanery	Number of settlements	Surface area of deanery	Average km ² for 1 parish
Bielsk	15	2,958	197
Brańsk	10	927	93
Drohiczyn	13	1,671	128
Łosice	16	1,417	89
Węgrów	16	1,312	82

Key to the development of the parish network in the Podlasie part of the Łuck diocese was the fifteenth century. The beginnings of parish activity for 58 parishes, which constituted 83% that were in existence around the year 1600 falls within this period (Figure 1). The characteristics and mechanisms for the development of the parish network in Podlasie differs from that observed in other parts of the Commonwealth. The first difference in contrast to the lands of Greater or Lesser Poland is the fact that the network of Latin churches came into existence in territories partly inhabited by Orthodox Christians, who had in these areas their own parishes. The second significant difference was the greater and speedier participation of the nobility than was the case in the central Crown lands, in the process of the endowment of new churches. This was the result of the later adoption of Christianity by Podlasie and here under conditions of the numerous landed endowments already functioning for the Mazovian and Lithuanian nobility. The initiative for the construction of the structure of the Latin Church lay in the hands of the bishops of Łuck, the authorities or nobility, whereby the Łuck bishops were chiefly involved in administrative-legal aspects,⁹⁹ while the king and nobility ensured the material conditions for the established parishes.

The overwhelming majority of parishes (60, i.e., 86%) came into existence on the initiative of private landed estate owners, something quite natural and corresponding with the structure of land ownership in Podlasie (see Figure 1). The statistics given on Figure 1 are collective and introductory in character. They need to be treated carefully for the data on the beginnings of parishes therein assembled as well as the type of endowment is, in many cases, fairly hypothetical in character. This particularly concerns the exact date when parish rights were obtained, the establishment of which is, given the absence of a source base, sometimes extremely difficult. This may be observed in the varied interpretations made by historians themselves. Here the main information is to be found in the already cited works by Aleksander Jabłonowski¹⁰⁰ and Tomasz Jaszczółt (for the entire voivodeship),¹⁰¹ Ludwik Królik (for the entire diocese)¹⁰² as well as Dorota Michaluk (for the Mielnik land),¹⁰³ supplemented by monographic works into the history of parishes or studies of a regional character (monographs on settlements or regions). Discrepancies in the chronology regarding the beginnings when Podlasie parishes functioned are the result of an array of factors but the most common is treating the very first mentions of a parish or the very endowment documents as being equal to the date the parish arose.¹⁰⁴

The Wilno diocese

In a similar way to the diocese of Łuck, it is also difficult in relation to the sixteenth-century Wilno diocese to talk about a division into rural deaneries (territorial, 'ruralis') in their classical modern understanding. According to Tadeusz Krahel 'the developing parish network within the Wilno diocese

⁹⁹ Only the parish at Skrzyszew was founded by the bishops of Łuck.

Figure 1. The development of the parish network in the Podlasie part of the Łuck diocese up to the end of the sixteenth century (according to the nature of the founding donations)

was for a long time not organised into deaneries.’ One may search for the beginnings of such a division in the mid sixteenth century – in tax registers for the years 1553 and 1559, where we find parish churches being grouped into five demesnes: Troki, Mejszagoła, Antokol, Miedniki and Rudomina.¹⁰⁵ It is difficult to say whether the diocese synod of 1555 in recommending the establishment of rural judicial vicars ‘one for each deanery’ had actually these administrative divisions in mind.¹⁰⁶ Despite certain doubts¹⁰⁷ one may tentatively suppose that a certain division of the Wilno diocese into five parts lasted until the beginning of the seventeenth century, wherein the names of these parts given in the account of 1604 only partially correspond to the division conveyed in the taxation lists of a half a century earlier: Wilno, Niemenczyn, Rudniki, Rudomina and Miedniki. Here there can be no doubts that the account refers to rural deaneries (‘Dioecesis haec in quinque distincta est partes, quibus aliquot proprii praesunt decani rurales’).¹⁰⁸ Under the rule of Bishop Abraham Wojna the number of deaneries grew, but this figure was not a stable one – in 1608 there is talk of 12, while in 1635 a list is produced that enumerated just 10 deaneries, amongst which there appears the deanery at Knyszyn.¹⁰⁹ In the course of the subsequent two decades the network of deaneries underwent extensive growth – accounts on the state of the diocese of 1651 talk of 26 deaneries, amongst which there appear two from Podlasie: Knyszyn and Augustów.¹¹⁰ Such a state of affairs was to last in Podlasie until the end of the eighteenth century.¹¹¹

The source information available does not allow for one to implement a deanery division amongst the parishes of the Podlasie part of the Wilno diocese for the turn of the seventeenth century. Władysław Semkowicz in his work on the subject of a historical map for the Wilno diocese (unfortunately without the map itself) openly advances the possibility for a reconstruction of the deanery network for the period up until the second half of the seventeenth century. Incomprehensible is his ascertainment that the reputed deanery division broadly outlined from the visitation in the mid seventeenth-century had been in existence from the very beginning.¹¹² Presumably he was unaware of the descriptions for the organisation of the Wilno diocese given in the mentioned tax registers as well as in the accounts of bishops. Extremely valuable as far as the reconstruction of the deanery network at the end of the sixteenth century is concerned is the list of parishes of the Wilno diocese of 1598 published by Jerzy Ochmański, and included in the taxation subject register for bishop, capitular, parish estates. He confirms the division of the diocese into the five parts given in the registers for the years 1553 and 1559. Unfortunately this register did not include those parishes in Podlasie which after 1569 paid tax to the Crown treasury.¹¹³ Taking into consideration the distribution of the ‘deaneries’ of the Wilno diocese as outlined in the sources and accounts as parts, sections, demesnes, the Podlasie parishes at the end of the sixteenth century may be included within the Troki part, as it had been in the aforementioned registers of 1553 and 1559. This is, however, merely a hypothesis and one not based on historical sources.

Parish churches in the Podlasie part of the Wilno diocese came into being later than was the case for those belonging to the Łuck diocese. This is well illustrated by Figure 2. In the first 100 years of its functioning the Wilno diocese parishes in Podlasie were founded exclusively from royal endowments (see Figure 2). Only in the sixteenth century did the foundation movement expand into noble estates, including, amongst others the possessions of the Radziwiłł family (Dobrzyniewo Kościelne, Kalinówka Kościelna (Kalinówka), Knyszyn). The number of works devoted to the development of parish structures within the Wilno diocese means that a reconstruction of the state of affairs as of the end of the sixteenth century is not overly problematic.¹¹⁴ The compilation of materials prepared by J. Ochmański for the mid sixteenth century covers 13 parishes of the Wilno diocese situated within the territory of Podlasie. Amongst which is to be found the parish at Choroszcz, the settlement itself

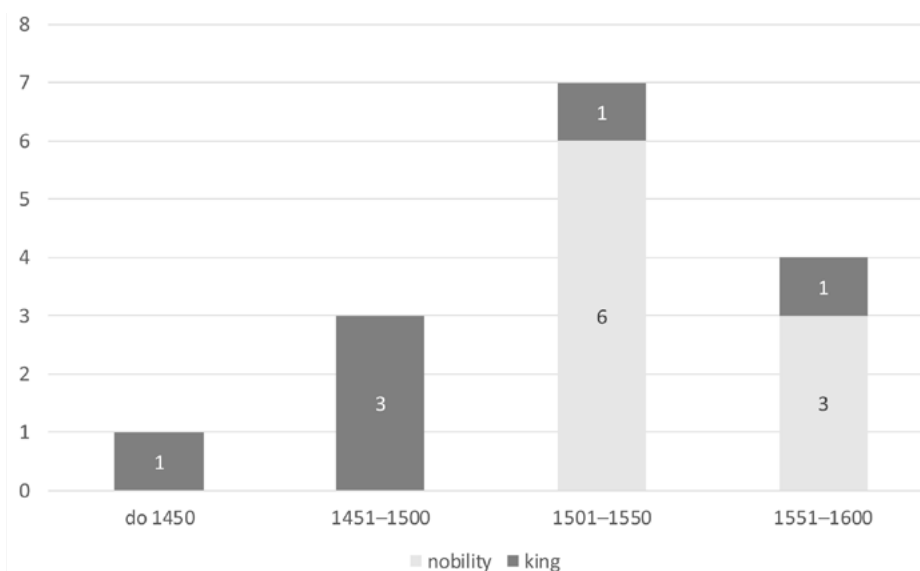

Figure 2. The development of the parish network in the Podlasie part of the Wilno diocese up to the end of the sixteenth century (according to the nature of the founding donations)

¹¹⁴ Ibidem, pp. 23–60; S.K. Olczak, *Rozwój sieci parafialnej w diecezji wileńskiej do II poł. XVIII w.*, „Studia Teologiczne: Białystok, Drohiczyn, Łomża”, vol. 5–6, 1987–1988, pp. 102–113.

as well as its environs was the subject of boundary disputes and, in 1558, its owners still included it within the Podlasie Voivodeship. But at the moment of concluding the Union of Lublin, the Choroszcz estates were not incorporated into the Podlasie Voivodeship because their lord Grzegorz Chodkiewicz did not swear allegiance to the Polish Crown. Such a situation was to have continued until the end of the eighteenth century.¹¹⁵ By the end of the sixteenth century three additional parishes had come into being – in Augustów (1565), Niewodnica Korycka (1596) as well as Grabowo (before 1571).¹¹⁶ In total there were by the end of the sixteenth century 15 parishes in the Podlasie part of the Wilno diocese, without Choroszcz that was in point of fact a part of the Troki Voivodeship.: four in royal towns as well as in villages: six noble, two royal, one Church, and two royal-noble.

Parish districts

A reconstruction of the parish districts in Podlasie in the second half of the sixteenth century causes many problems because of the denominational structure of its inhabitants as well as the limited source base. This was an area inhabited in many parts by an Orthodox population which was obviously not subject to Catholic ministry. For this reason there is an absence in certain regions of information as to the affiliation of many villages to Latin parishes. The limited number of tax registers, discrepancies in the information given regarding parish affiliation to particular settlements as well as an absence in Church visitations for the period in question makes a reliable and comprehensive reconstruction of the parish network impossible. The extent of parish districts presented on the main map as well as in the List of settlements has been drawn up through the use of a retrogressive method with reference to the first relatively comprehensive registers supplying the parish affiliation of settlements as established on the synod acts of 1726 (for the Łuck diocese) and of 1744 (for the Wilno diocese). The drawback of employing such a solution is, obviously, the long period of time that separates the source used in the retrogression and the studied period itself (over 100 years). Such a worry is somewhat mollified by the small number of changes within the parish structure that occurred in this period. The synod for the Łuck diocese of 1726 enumerates 73 parishes in five Podlasie deaneries for the Łuck diocese (Węgrów – 19, Bielsk – 16, Brańsk – 14, Drohiczyn – 11, Łosice – 13).¹¹⁷ Two parishes mentioned at the turn of the seventeenth century are omitted – Krześlin (Krześlino) and Kadłuby. Krześlin as a settlement appears within the parish of Suchożebry, while Kadłuby was not mentioned because the settlement along with the parish was absorbed into the parish of Ceranów.¹¹⁸ As a result of the lack of source information as to the scope of the parish at Krześlin and also the poor level of verification with regard to its functioning it has been treated on the map and in the List of settlements as a single-village parish. Besides Ceranów, which follows to be treated as a continuation of the parish at Kadłuby, in the course of the seventeenth century there appeared four new parishes: Huszlew (1666), Niemirów (Niwicze) (1620),¹¹⁹ Strabla (1616)¹²⁰ and Stara Bordziłówka (Borzyłowa Wola) (1647).¹²¹ Analysis of the Wilno diocese synod for the year 1744 shows that also in the part of Podlasie belonging to the Wilno diocese the growth in the number of parishes was not great. In addition their status with regard to parish rights is not completely clear (Brzozowa, Karpowicze). This all allows one to adopt the working

hypothesis that the stability of the parish network equally brought along with itself a relative durability in the affiliation of a parish settlement. The geographic location of the new parishes shows that new endowments concerned chiefly the south-east border region of the voivodeship and in particular the Mielnik land (Huszlew, Niemirów).

It is difficult to unequivocally indicate from which parish that Huszlew was allotted. Its initial catchment area encompassed the following settlements: Huszlew, Ogrodniki,* Felin (Androsze), Bronin (Wólka), Żurawłówka, Mielniki (at present an abandoned former settlement), Zawadki (Zawadka),** Pieczniki,* Mostów (Mostowo), Kolonia Mostów (Prusinowo, Pruśniewo, Prosnów),** Waśkówka (Wólka Waśkowska, Wólka Wośniewska).**¹²² All these settlements are listed as being part of the parish district for this parish as of 1726.¹²³ It is unknown, because of a lack of sources, to which either singular or plural parishes the mentioned settlements belonged prior to the creation of the parish at Huszlew. Dorota Michaluk has ascribed the majority of them to the parish at Górki, besides Mostów, which was under the jurisdiction of the parish in Sarnaki.¹²⁴ The actually endowment, founding and creation of the parish in Górki she moves right back to the second half of the sixteenth century (1577).¹²⁵ More reliable are possibly the findings of Tomasz Jaszczół, who includes the parish in Górki as being one of the oldest in the Mielnik land and moves its 'terminus ante quem' to the year 1478 (the mention of a parish school teacher), that is dated before the year 1490 and the foundation document issued by Grzymała, the lord at Hruszniew and Szczekatowo.¹²⁶ It is probable that at the end of the sixteenth century the mentioned settlements were affiliated with the parish at Łosice, which could also have been caused by the temporary occupation of the church at Górki by Protestants.¹²⁷ The reasoning here being the entry of the settlement at Mostów within the Łosice parish as seen in the tax register of 1588.¹²⁸ The two earlier registers had affiliated this settlement with the more distant parishes in Mielnik or Sarnaki.¹²⁹

The founding document for the parish at Niemirów of 1620 did not demarcate the parish district. However, one may suppose, taking into account the later extent of the parish, that it corresponded to the tithe district and initially encompassed: Niemirów (Niwicze), Gnojno, Sutno (Sutino), Wólka, Ponikwy,** Kobylany,*¹³⁰ Mętna.**¹³¹ The registered legal entry of the founding document at the town of Mielnik publically calls on all interested parties that might oppose the endowment as a result of loss of remuneration or tithe 'littera cridae in vim citationis'. This was to have been announced in the three parishes neighbouring Niemirów, Mielnik, Wysokie Mazowieckie (Wysokie) as well as Stawy, which shows that the aforementioned settlements had earlier belonged to these parishes.¹³² One may with a high degree of probability, and here on the basis of tax registers and geographical location, conjecture that the majority of these belonged to the parish at Mielnik, Ponikwy to the Stawy parish, while Mętna to that at Wysokie.¹³³

From the moment of its foundation in 1616 right up until the issuing of its erection document in 1723, the formal legal status of the parish at Strabla was unclear. Piotr Karwowski conjectures that this is a reestablishment of the parish following the loss of the original documents from the first half of the seventeenth century.¹³⁴ Bishop Stefan Bogusław Rupniewski's document ascribes the parish to the

¹²² * – unknown settlement localisation; ** – a settlement mentioned later or lying outside of the Podlasie Voivodeship boundaries.

¹²³ Synod 1726, ff. Ee2v–Ffv. In the light of treasury sources from the second half of the seventeenth century this was a single-village parish; Laszuk, Zaścianki p. 18.

¹³³ Straight after the founding of the church at Niemirów, and here in 1620, the Mielnik parish priest came to an agreement with the newly founded parish priest in Niemirów, in which it was stated that the tithes from the village of Ostrowiec and Sutno had been for ages given to Mielnik; ADS, sign. D 20, ff. 182v–183.

¹³⁴ P. Karwowski, *Kult Matki Bożej w parafii w Strabli*, p. 199.

Bielsk deanery and precisely outlines its district as Strabla, Mulawicze (Moławicze), Lesznia (Leśna), Biały Dwór (the farmstead),* Łapcie.¹³⁵ In the earlier foundation document there had appeared instead of the farmstead the unidentified settlement of 'Gatica'.¹³⁶ On the basis of tax registers from the second half of the sixteenth century one may conclude that Strabla and those settlements that comprised its parish in the seventeenth century had earlier belonged to the extensive parish at Suraż.¹³⁷ However, one cannot exclude the possibility that the Strabla parish was carved out from the parishes at Suraż and Bielsk, for in 1617 protests against the founding of a church and parish were voiced by the Suraż and Bielsk parish priests.¹³⁸

The parish in Stara Bordziłówka (Borzyłowa Wola) was established in 1647.¹³⁹ The foundation document sheds interesting light on the administration of the Latin Church in this part of Podlasie in the seventeenth century. For this document clearly indicates that the settlements incorporated into the district parish at Stara Bordziłówka had earlier not been formally registered to any of the existing district parishes. The inhabitants of two of the places mentioned, Droblin and Koszelówka, made use of services at the nearest church, situated in Górki.¹⁴⁰ Claims on the other settlements incorporated into the new parish – Stara Bordziłówka, Wygnanki,** Kiełbaski,** Witulin, Ossówka (Wola Osowska) – could be made though by the parish in Biała Podlaska (Biała) situated in the Brześć Litewski Voivodeship.¹⁴¹ It consequently follows to accept that at the turn of the seventeenth century the parish in Biała was expanding its jurisdiction across the territory of the Podlasie Voivodeship. This presumably concerned equally the settlements at Kolonia Kajków (Kajków) as well as Cicibór Mały (Cicibór), even though in the tax registers for the years 1577 and 1580 these settlements were mentioned as under the tutelage of the parish in Sarnaki. Known are cases from other areas of the Crown, where the seat of a particular parish lying beyond the borders of the voivodeship, the tax registers covered the settlements belonging to it within the framework of whatever border parish lay within the structure of the voivodeship or district (*powiat*) from which the taxation was taken.¹⁴²

The synod of the Wilno diocese of 1744 cited only two new entities from amongst the parishes situated in Podlasie in relation to the list established for the second half of the sixteenth century. The formal status of the parish at Brzozowa is in doubt right up until the eighteenth century. Even though the diocese synod of 1744 recognised this church to be a parish church, ascribing to its parish district equally the village of Bobrówka and the farmstead at Grodzisk, there are no strong bases to suppose that it had had bestowed on it such a status in the second half of the sixteenth century.¹⁴³ In the light of the visitation of 1633 at Brzozowa was to be found a filial church of the parish at Kalinówka Kościelna (Kalinówka) and the same settlement was mentioned amongst those settlements belonging to the parish.¹⁴⁴ The descriptions of Lithuanian parishes from the second half of the eighteenth century

¹³⁹ Michaluk, *Ziemia mielnicka*, p. 125.

¹⁴⁰ “[...] nobiles et incolas villarum Droblin et Kosielówka – quod nulli hucusque ecclesiae parochiali iure parochiae adscripti sint, ad ecclesiam vero parochialem Gorecensem in qua tanquam viciniori sacramenta ecclesiastica hucusque percipiabant”, ADS, sign. D 26, f. 380. Problematic is the very Church affiliation of the village of Koszelówka – within the territory of the parish of Górki there functioned two settlements of the very same name – one lying next to Stara Bordziłówka, while the second approximately 10 km to the north between Wólka Nosowska and Dubicze (in the territory of the Brześć Litewski Voivodeship). In 1726 both Wólka Nosowska, as equally Koszelówka (Brześć) were counted as part of the parish at Górki. Wólka Nosowska had been incorporated within this parish already in the endowment document of 1490. However, it is difficult to point to the moment when the village of Koszelówka (Brześć) was included; ADS, sign. D 148, f. 25 (year 1490); Synod 1726, ff. Ee2v–Ffv; Michaluk, *Ziemia mielnicka*, p. 64 (the founding of both settlements is dated to the years 1580–1662).

¹⁴¹ “[...] tum et alias villas convicinas et adiacentes nulli vero hucusque ecclesiae iure parochiae adscriptas videlicet Borziłówka, Wygnanki, Kiełbaski, Witulin, Osówka salvis nihilominus iuribus et privilegiis ecclesiae parochialis in Biała si qua ad dictas villas expressa habuerit”, ADS, sign. D 26, f. 380.

¹⁴² ASK I 47, ff. 554, 765v. The settlement of Ciciborek (nowadays Cicibór Mały), together with the surrounding villages of Terebela and Hrud, appears in the synod register for the parish of Biała of 1726; Synod 1726, ff. Aav–Bb.

present a similar situation.¹⁴⁵ In this situation the only one that it follows to recognise as a new parish founded up to 1744 is the single-village parish of Karpowicze (Brzozowo-Karpowicze). As results from the visitation conducted in March 1700 it had been endowed in 1617 by Józef Karp, the Wołkowysk marshall, owner of the village of Brzozowo, and which, in the seventeenth century, started to function under the name Karpowicze. From the content of the rights bestowed by the Bishop of Wilno, Eustachy Wołłowicz, for the foundation of a new parish it results that the owner of Brzozowa had earlier paid tithes to the parish at Dolistowo Stare (Dolistowo).¹⁴⁶

The construction of parish structures was to occur with a significant lag with regard to the development of settlements themselves. This was to mean that many settlements did not, in the second half of the sixteenth century, have a permanent parish affiliation and that their accreditation to specific parish districts conveys rather the scope of the influence of given Church centres than the demarcating of the precise borders of Roman Catholic parishes as such, and which did not cover the entirety of the denominationally mixed area of Podlasie. Still in the eighteenth century numerous inhabitants of many villages on this denominationally varied area were unable to point out which Catholic parish their settlement administratively belonged to. An example may be served by a series of villages of the Bielsk parish whose inhabitants in the first half of the eighteenth century made use of services provided by Uniate churches or the protection of the Bielsk Carmelites.¹⁴⁷

Particularly dynamic and unclear is the parish affiliation of many settlements in the south-eastern part of the Mielnik land. This was partly the result of the impact of ownership relations, including the frequent divisions of estates, on the weak territorial cohesion of parishes (enclaves, exclaves). According to Dorota Michaluk 'the surrounding of the whole territory of an estate with the borders of a single parish was a common practice.'¹⁴⁸ The unclear extent of particular parishes and the changeability in parish affiliation amongst individual settlements can be well seen in the consensus and tax registers from the second half of the sixteenth century.

After considering the changes brought about by the appearance or disappearance of a parish a retrogressive analysis has been conducted involving the comparison of information about parish affiliation from 1726 (Łuck diocese) and 1744 (Wilno diocese) as well as that contained in the sources from the second half of the sixteenth century, chiefly in the tax registers. It follows to repeat that the parish affiliation contained within tax registers for the Podlasie Voivodeship is far from being unequivocal and is extremely doubtful. The biggest role with regard to the tax registration was played by the property ownership order. In many cases with the aim of establishing parish affiliation it is necessary to make recourse to the endowment documents as well as to seventeenth-century visitations, which often speak openly about the parish district, while sometimes only giving place names and here merely through a characterisation of the benefice endowment. It follows to remember that as in other Polish dioceses the parish district does not necessarily always correspond with the tithe district.¹⁴⁹ As far as the Łuck diocese is concerned the fundamental verification material in the application of the retrogressive method has been supplied by the canonical visitation of 1662–1664¹⁵⁰ as well as the collection of rights and privileges of the Łuck diocese listed in the eighteenth century.¹⁵¹ Employed chiefly for the Podlasie part

of the Wilno diocese have been the visitations of 1633¹⁵² and 1700.¹⁵³ Other visitations of the Wilno diocese did not encompass the Podlasie deaneries,¹⁵⁴ while the minutes of the bishop suffragan Mikołaj Słupski are known to us only through the copies drawn up by Jan Kurczewski.¹⁵⁵ More valuable in terms of information are the inventories of certain Podlasie parishes prepared for the requirements of the 1674 visitation.¹⁵⁶

Given the lack of information on parish affiliation in the above mentioned sources it has sometimes been necessary to make recourse to sources from the second half of the eighteenth century – first and foremost here is Karol Perthées's 'Geograficzno-statystyczne opisanie parafii Królestwa Polskiego' from the end of the eighteenth century as well as the analogical, though markedly richer in content, descriptions of Lithuanian parishes published by Wiesława Wernerowa.¹⁵⁷ The subject literature was also taken into consideration. In accordance with the method adopted for the AHP series, which assumes that parishes be treated first and foremost as units of Church administration, and not taxation or state entities, greater score was placed on sources of Church provenance even if this information came from the seventeenth or eighteenth century. It follows to add that the taxation sources for this area did not specify whether a given parish belonged to the Latin Church or was Orthodox in denomination. In the most difficult and the weakest in relation to cases of source authentication, there is noted in the List of settlements reference that a given parish could have been of a different denomination than the one stated on the parish map (parish X or Y).

There is need for a separate comment regarding the determining of parish affiliation for those settlements with an indeterminate location, one approximated or uncertain. These are often settlements that are poorly authenticated in the sources, which additionally makes it difficult to assign them to the appropriate parish. In order to conclude as probably as possible, and here given the lack of source information, endeavours have been made to employ all indirect forms of evidence. Consequently taken into consideration has been the parish affiliation of upper-level settlements or of other settlements situated in the same area or property demesne. Also taken into analytical consideration has been source context, for example e.g., the parish affiliation of settlements jointly paying taxation or that are included in the same registration entry. In one case, the village of Stelokowo in the Drohiczyn land, which is mentioned only once in the list of nobles swearing allegiance to the Crown in 1569, it was impossible to establish even a hypothetical parish affiliation.

The most hypothetical as well as uncertain and here in the light of the source information assembled, turned out to be a series of parishes in the Mielnik land – and here in particular the matter concerns the borders and boundaries between the parishes of Górki, Łosice, Hadynów and Niemojki. These did not constitute territorially cohesive areas centred around a parish church but rather a mosaic of criss-crossing fragments of parishes separated from their own parish church by settlements belonging again to yet other parishes. Poor on testimony is also the parish in Mielnik. The extent of this parish was de facto demarcated thanks to information on the affiliations of neighbouring settlements: Górki, Sarnaki and Siemiatycze. In a way similar to the above given extent for the parish at Górki, it seems that the boundaries for the Podlasie Voivodeship were encroached on by parishes from the neighbouring Brześć Litewski Voivodeship. This is seen in the case of the settlements at Bonin and Raczki ascribed in the synod acts of 1726 to the parish at Janów as well as of the hamlets of Gruzka (Hruska), Pokaniewo, Żerczyce, Zabłocie (Melechowicze) and Zalesie to the Milejczyce parish.¹⁵⁸

Sometimes the sources for parishes in the Mielnik land result in completely conflicting conclusions. An example of such may be served by the affiliation of the settlement of Dąbrowa (Duplewicze) (parish Drohiczyn, Rusków, Przesmyki, Knýchówek) or Łysów (Łysowicze) (parish Rusków, Przesmyki, Niemojki). The village of Duplewicze was registered both in the military rolls of the Lithuanian army

of 1565 and in the taxation list of 1588 in the parish of Drohiczyn.¹⁵⁹ In 1580 this settlement, treated together with Tokary, appears in the parish of Przesmyki,¹⁶⁰ in a similar way to the poll tax register of 1673.¹⁶¹ For if the matter relates to Church sources this village appears in the tithe district in the copy of the endowment document for the parish of Rusków from the second half of the fifteenth century as well as in the tithe district for the parish at Przesmyki.¹⁶² In turn the synod register of 1726 as well as ‘Geograficzno-statystyczne opisanie parafii Królestwa Polskiego’ incorporates this settlement within the parish at Knychówek.¹⁶³ Taking into consideration the fact that information on the endowment of the parish at Rusków is from the fifteenth century and that in the interim the parish was occupied by Protestants, one should take as the most probable the turn of the seventeenth century for the information of Duplewicze’s affiliation to the parish at Przesmyki, but one equally cannot exclude an association with the parish at Knychówek, which also finds its relevant annotation in the List of settlements. As far as Łysów is concerned, a settlement of a similar sounding name (‘Lisowicz’) appears in the Międzyzlesie parish in the taxation registration of 1580 under the heading ‘Krzesslino’. Presumably such a notation results from the fact that Krześlin and Łysów belonged to the same estate complex.¹⁶⁴ In a way similar to Duplewicze the village of Łysów was mentioned in the endowment district in the founding document for the parish at Rusków.¹⁶⁵ In turn the poll taxation register of 1673 enumerates this settlement as part of the parish of Przesmyki.¹⁶⁶ As more reliable – and hence adopted on the map – should be regarded the affiliation of this village to the parish at Niemojki, for the eighteenth-century Church sources register it thus. A similar solution is adopted in the case of Wólka Łysowska.¹⁶⁷ An example of another fairly clear discrepancy between sources in the context of determining the parish affiliation of settlements within the Mielnik land may be served by the example of the village of Mężenin on the Bug River (Mężenino). The taxation registers from the second half of the sixteenth century (1577, 1580, 1588) accredit this settlement with being in the parish at Sarnaki.¹⁶⁸ This presumably results from the parish at Rusków having been taken over by Protestants. In the poll tax register of 1673 the village is situated within the parish of Rusków, something confirmed by Perthées’s parish description.¹⁶⁹ For otherwise unknown reasons the synod register of 1726 included this settlement within the parish of Drohiczyn, the other side of the river.¹⁷⁰

As far as the Drohiczyn land is concerned, the village of Łazów (Łazowo) is worthy of attention because of its dubious parish affiliation. The treasury and census sources from the second half of the sixteenth century are not able to precisely resolve this ambiguity. In the light of the military rolls of 1565 this village is mentioned twice over – as being within the parish of Kadłuby (subsequently Ceranów) as well as in the parish of Mokobody and Sterdyń (Sterdynia) (Маковецка и Стердынська).¹⁷¹ In 1567 the village of Łazów appears under the common heading of the parishes of Prostyń, Zembrów (Zembrowo) and Sterdyń.¹⁷² T. Jaszczółt has ascribed this settlement to the parish of Sterdyń.¹⁷³ Such a pertinence has been shown by the taxation registers for the years 1578, 1580 and 1588, which place Łazów within the Orthodox parish of Łazów and the Latin one of Sterdyń.¹⁷⁴ A different interpretation results from an analysis of sources of Church provenance – for Łazów appears within the tithe

district of the parish at Zembrów, and is not mentioned in the erection document for the parish at Sterdyń.¹⁷⁵ Such (Zembrów) a parish affiliation for the settlement is also given by the synod acts of 1726 as well as Perthées's materials from the second half of the eighteenth century.¹⁷⁶ As was said earlier the discrepancies in the attributing of parish affiliation between sources secular (tax registers, inventories, military rolls) and Church ones (visitations, synod acts, the parish sketches of Perthées) works to the favour of Church sources even if the information is from the seventeenth and eighteenth century. Such was the case in the Drohiczyn land, for example in the case of the village of Klukowo (parish Siemiatycze), Wierzchuca Nagórna, Wierzchuca Nadbużna (Wierzchuca Nadolna) (parish Śledzianów), Bryki (parish Ostrożany), Andryjanki (Andrianki) (parish Boćki), Kozłowo and Mierzynowo (parish Pobikry), Pełch (parish Perlejewo (Pierlejewo)).

Poorly certified in the sources is the parish affiliation of the villages of Hołowienki, Sabnie and Grodzisk (Grodzisko). These villages were inhabited by Ruthenians, and were presumably not under the jurisdiction of any of the surrounding Latin parish.¹⁷⁷ For this reason more probable appears their connection with the parish of Zembrów as seen in Perthées's sketches of the Crown parishes,¹⁷⁸ than the earlier mentions of their affiliation to the distant parish of Skrzyszew (Skrzeszewo) (taxation registers of 1578 and 1580) or to the parish Jabłonna Lacka (poll taxation list of 1674).¹⁷⁹ However, included within the parish of Jabłonna were the entire environs of Tchórznica (Tchórznica, Tchórznica Szlachecka (Tchórznica-Wyszki), Tchórznica Włościańska (Tchórznica-Mnich)). It is difficult to explain the ascribing of the settlement of Tchórznica Szlachecka (Tchórznica-Wyszki) to the parish at Zembrów as noted in the Łuck synod acts of 1726¹⁸⁰ – this settlement equally appears in the endowment description for the parish of Jabłonna from 1663 as well as in the list of settlements for this parish found in Perthées's sketches.¹⁸¹ The description of the endowment of the parish at Jabłonna in 1663 provides important information about the relations between tithe districts and the parish at Jabłonna and Skrzyszew. In accordance with the content the borderline settlements of Wierzbice-Guzy, Wierzbice-Strupki, and possibly also (the term 'Quae quidem villae praefatae' is not precise here) the villages of Kamianka (Kamianka Ruska) and Niemirki (Niemierki), paid tithes in an alternate manner to the parish at Skrzyszew and Jabłonna in turn. However, as the inhabitants of those villages took sacraments in the church at Jabłonna that was situated nearby, it was to that very parish that future tithe payments were to be made from these settlements.¹⁸² The affiliation of the settlement of Czekanów is fairly problematic in this area, the inhabitants of which were obliged in the seventeenth century to pay benefits to as many as three parishes: Jabłonna, Skrzyszew and Mokobody.¹⁸³ Traces of this unclear or divided affiliation of Czekanów were to last right up until the eighteenth century, when Perthées' parish sketches register this settlement as equally in the parish of Jabłonna as in Skrzyszew, wherein in the description of the first of these at the point of 'Czekanowa vel Czekanów' there appears an annotation in red ink 'vide parafia Skrzyszew.'¹⁸⁴ It is a paragraph found in the Łuck synod acts that ultimately decided on accrediting this village to the parish at Skrzyszew, for here the village is referred to as being in that parish.¹⁸⁵ The taxation registers for 1578 also show the parish of Skrzyszew as being the correct one for Czekanów.¹⁸⁶ Contradictory source evidence may also be found in relation to the village of Obniże, which in the taxation registers of the second half of the sixteenth century was included within the

¹⁷⁵ ADS, sign. D 149, ff. 189v, 209v.

¹⁷⁶ Synod 1726, ff. Bb–Bb2v; Szkice Perthéesa, vol. 12, f. 23.

¹⁷⁷ Jaszczółt, Osadnictwo, p. 161.

¹⁷⁸ These settlements were not mentioned *expressis verbis* in K. Perthées's accounts of the parish. This may be explained by the fact that the populace inhabiting these settlements were in their entirety of the Eastern Rite and belonged to the parish of Grodzisk; Szkice Perthéesa, vol. 12, f. 23.

¹⁷⁹ ASK I 27, f. 925v (year 1578); ASK I 47, f. 529v (year 1580); Laszuk, Zaścianki, p. 105; Jaszczółt, Osadnictwo, pp. 161–162 (the parishes of Skibniew-Podawce (Skibniewo-Podawce), Zembrów and Nieciecz Włościańska (Nieciecza)).

¹⁸⁰ Certainly the distance from the parish church could have here been significant. The inhabitants of this village would have had to have covered 3 km to reach the church in Zembrów, while to Jabłonna almost 7 km as the crow flies.

¹⁸⁶ ASK I 27, f. 925v.

parish of Drohiczyn, while in Perthées's materials from the second half of the eighteenth century this village was included as equally in the Drohiczyn parish as in that of Śledzianów. In a way similar to the case of Czekanów, affiliation on the map and in the List of settlements is marked on the basis of information from the synod acts of 1726 (parish at Śledzianów).¹⁸⁷ Sometimes, as in the case of the villages of Czarna Cerkwiewna (Czarna), Czarna Średnia (Czarna) or Płatowo the evidence relating to parish affiliation is information about the parish affiliation of other neighbouring settlements and the ownership and property relations with a particular estate complex (parish at Rudka).

The discrepancies between sources or their inadequacies also make the job of parish district reconstruction for the Bielsk land difficult and in many cases have lowered the reliability of the solutions and or the conclusions advanced and drawn. This particularly concerned the most easterly parishes of Narew, Kleszczele, Boćki and Bielsk. In a similar way to the south-easterly part of the Mielnik land, the presence of Catholics was scattered meaning that parishes were not cohesive territories, but rather a mosaic of merging fragments from various parishes. One may see this also in the taxation registers, which often subordinate settlements in this area to Orthodox parishes. The oldest Catholic parish in the region was the parish at Bielsk, which according to tradition came into being at the close of the fourteenth¹⁸⁸ or the beginning of the fifteenth century.¹⁸⁹ Eugeniusz Beszta-Borowski has devoted in his extensive monograph on the parish a separate subchapter to the territorial changes that occurred within the Bielsk parish. He considered that Catholics residing subsequently in neighbouring parishes (Boćki, Kleszczele, Łubin Kościelny (Łubino), Strabla) would have initially taken sacraments in the church in Bielsk. For this reason employed here also was the progressive method – in the case of a lack of information on the parish affiliation of settlements lying on the border of the Bielsk parish and the parishes established in this area in the sixteenth century sometimes the premise is adopted that they still remained within the framework of the original Bielsk parish (the absence of confirmation as to a change in affiliation). A more exact list of settlements belonging to this parish is only given for the eighteenth century.¹⁹⁰ Adopted for several settlements deprived of the relevant mentions in the Church sources and lying on the border of the Bielsk parish with the parishes of Boćki and Suraż, was the parish affiliation as noted in the poll taxation register of 1674 (the parish of Boćki: Toporki (Toporowo), Baranowce (Baranowczyzna), the parish of Bielsk: Płoski (Płoski)).¹⁹¹ As far as the extent of the Narew parish is concerned information is scarce indeed, while the author of a monographic work devoted to the history of this parish presented its district from the beginning of the seventeenth century in the form of a scheme (ellipse 4 by 10 old Polish miles).¹⁹² Most valuable in this context are the two documents of Zygmunt August directed to the Bielsk forester and starost on the matter of the Church affiliation of subjects from the newly inhabited Bielsk forest administrative region.¹⁹³ In the most doubtful cases, and here given the absence of source authentication, taken into consideration was also later affiliation to districts separated from the Narew parish (Kuraszewo (Kuraszowo), Narewka) – this refers to places such as Nowokornino (Kornino Nowe), Podrzeczany (Porzeczce), Rakowicze. For the same reason the boundaries of the parish of Narew, and with the same the Bielsk deanery, were shifted somewhat to the east beyond the borders of the Podlasie Voivodeship itself. It is difficult to establish the Church affiliation of these wooded, wild and uninhabited areas in the sixteenth century. The extent of the filial parish at Narewka,¹⁹⁴ marked out in the second half of the eighteenth century,

was to decide on extending the boundaries of the parish at Narew beyond the voivodeship borders. Also in reference to the parish of Kleszczele, given the lack of exact information as to its size and area in the sixteenth and seventeenth century, retrogressively was incorporated the area occupied in the eighteenth century by several settlements that belonged to the Brześć Litewski Voivodeship, and mentioned within its boundaries in the acts of the Łuck synod of 1726.¹⁹⁵ Other particularly doubtful cases in the Bielsk land include the affiliation of the mill settlement Solniki (Brańsk parish), and the villages of Koryciski (Koryciszcza) (Kleszczele parish), Miękisze (Bielsk parish), Kleszczewo (parish Kobyolino Poświętne, an exclave on the voivodeship border and that of the parish at Tykocin). No great doubts though were raised by the affiliation to the parish at Boćki of the village of Bystre, lying already within the territory of the Brześć Litewski Voivodeship.¹⁹⁶

The difficulties highlighted above in the ordering of many locations to their relevant Church unit also concerned those Latin parishes situated further to the north and located on the eastern border of the Bielsk land: Suraż, Białystok, Juchnowiec Górny (Juchnowiec-Dwór), Niewodnica Korycka, Knyszyn, Dobrzyniewo Kościelne, Jasionówka and Kalinówka Kościelna (Kalinówka). Marta Sokół and Wiesław Wróbel maintain that the initial territory that made up the parish of Suraż was more expansive and extended both into later parishes of the Łuck diocese as into the Wilno diocese. According to them the parishes of Poświętne (Wielkogrzeby) (Łuck diocese), Turośń Kościelna (Turośna) (Wilno diocese), Pietkowo (Łuck diocese), Juchnowiec (Wilno diocese), Białystok (Wilno diocese), Niewodnica (Wilno diocese) were formed over the course of the fifteenth and sixteenth century. They also conjecture that the extent and scope of the parish at Suraż could have extended into the territories of the later formed parishes at Płonka Kościelna, Sokoły and Kobylin-Borzymy (Kobyolino Poświętne).¹⁹⁷ Doubts concerning parish affiliation concern particularly the villages widely scattered over a huge area that belonged to the Suraż starost and named within the parish of Suraż, the inhabitants of which in effect used the services of the near-by parish churches at Niewodnica (Oliszki) or Juchnowiec (Hryniewiczze, Pomigacze (Pomihacze)). Within the composition of the new parishes carved out of the parish at Suraż were mainly the estates of the founder, so the royal villages were still formally within the original parish at Suraż.¹⁹⁸ This could have been the case with the parish in Białystok. The area covered by this parish, one exceeding the borders of the Podlasie Voivodeship, points to its territory being established and shaped already at the beginning of the sixteenth century, that is before the division of the Białystok estates between the Raczkowicz and Chodkiewicz families.¹⁹⁹ As there is no complete information about its territorial extent at the end of the sixteenth century, it was decided to mark out its approximate extent on the basis of information derived from an endowment document of 1581 as well as a visitation conducted in 1633.²⁰⁰

Demesne areas, particularly those of the starost, as a result of the development of settlement networks did not always create territorially cohesive wholes, which meant that the newly endowed parishes on noble estates broke up areas previously covered by an older royal parish into two or three parts. Given the changing property relations it is not possible to treat any connection between the parish district and that of the demesne as permanent and unchanging. This may be seen, for example, in the

¹⁹⁶ ADS, sign. D 149, ff. 256–257 (year 1528); Synod 1726, ff. Bb2v–Cc2. It is difficult to explain why these settlements were passed over by A. Wawrzyńczyk in his work: eadem, *Rozwój wielkiej własności na Podlasiu w XV i XVI wieku*, Wrocław 1951 (map).

¹⁹⁷ M. Sokół, W. Wróbel, *Kościół i parafia pw. Bożego Ciała w Surażu*, pp. 61–67.

¹⁹⁸ Ibidem, p. 68.

¹⁹⁹ According to T. Krahel the Białystok parish was not carved out of the parish at Suraż. His claim is based on the conjecture that the parish following its foundation must have belonged to the self same diocese as its mother parish. However, given the conditions within which the political and ecclesiastical boundaries were etched in Podlasie this rule does not necessarily apply; idem, *Zarys dziejów parafii Wniebowzięcia Najświętszej Maryi Panny w Białymstoku*, [in:] *Bazylika katedralna w Białymstoku. village of Klepacze, which constituting a part of the Suraż starost in the first half of the eighteenth century was counted as belonging to the parish at Niewodnica,²⁰¹ while in the second half of the century it was already within the parish at Suraż.²⁰² According to Józef Maroszek and Waldemar F. Wilczewski the village of Klepacze was to change its parish affiliation several times.²⁰³ Complicated was also the parish affiliation of villages lying within the district of Niewodnica, divided between the parishes of Juchnowiec and Niewodnica. The village of Zofiówka (Safiejewo) despite being subordinated in the synod acts of 1744 to the parish at Dobrzyniewo, was deemed to be a part of the parish at Knyszyn.²⁰⁴ Poorly certified is the parish affiliation of such settlements as Wojszki (parish of Juchnowiec),²⁰⁵ Kuczyn (Kuczyno-Bogdańce) (parish of Trzcianne).²⁰⁶

As is known from other areas of the Commonwealth the carving out of new parishes was not always a simple process involving the allocation of a whole and cohesive fragment to one or several parishes, with the aim of subordinating the said to the newly created parish entity. It was always connected with the loss of a part of the endowments of existing benefactors, something that resulted in protests. The evidence encountered in the sources on the division of endowments from one settlement between two parishes, decisions as to the payment of tithes from farmsteads and villages to two different parishes or the payment of 'alternatim' dues are the result of compromises taken in the matter. Given that in the AHP farmsteads are not presented as separate settlements as such, with rare exception when they function apart from a village and here under their own name, the majority of examples when a village and farmstead belonged to two different parishes is presented through the stating of a dual parish affiliation. Several cases of this ilk occurred on the territory under research; with the majority of these relating to the Bielsk land. Dual parish affiliation has been introduced in the case of the village of Szpakowo, where the farmstead (Szpakowo Farmstead) is registered in the sources at the parish of Goniądz, while the village itself at the parish in Kalinówka. This state of affairs lasted from the moment of the foundation of the parish in Kalinówka in 1511 right up until the end of the early modern era. Admittedly the foundation document presented by Mikołaj II Radziwiłł does not state this name either in the endowment area or in the pastoral area of the new parish, but this is mentioned in the royal confirmation of 1534 in which the monarch bestows on the parish priest at Kalinówka, among other things, the tithes from two villages – Boguszewo and Szpakowo. The realisation of this endowment was to already face difficulties in the sixteenth century. This may have been caused by the village inhabitants being already obliged to provide funding for the parish and Hospital of the Holy Spirit at Goniądz. One may suppose that the boundary between the parishes of Goniądz and Kalinówka were shaped on the meanders of the River Niereśla (Nereśl) – the manor house and village of Szpakowo lay on two banks of the same river. Such a state of affairs is presented by Karol Perthées's descriptions of Lithuanian parishes in 1784.²⁰⁷

The synod of the Wilno diocese of 1744 twice mentions the name Boguszewo in the parish of Trzcianne and in the parish of Kalinówka.²⁰⁸ Somewhat more precise is the visitation of 1633 and Karol

Perthées's descriptions of parishes of 1784, showing that the manor house at Boguszewo belonged to the parish at Kalinówka while the village to the parish at Trzcianne.²⁰⁹ Doubts arise, however, over the two-part division proposed by Marta Sokół and Wiesław Wróbel for the settlement of Kowale – Kowale (buzuńskie) belonging to the parish at Turośń and Kowale (suburbs) connected with the parish at Suraz.²¹⁰ In the light of the description of the parish in 1784 the village of Kowale belonged to the parish at Turośń.²¹¹ Given the act of the Wilno synod of 1744, one cannot exclude also a form of dual parish affiliation (Augustów, Bargłów Kościelny (Bargłowo)) for the village of Borsuki, something poorly covered within the source materials.²¹² Borsuki was the property of the Augustów parish priest, however the inventories preserved from both parishes of 1674 clearly show that this settlement belonged to the parish at Bargłów.²¹³ Similarly the name Jaskra appeared twice in the synod acts of 1744, in the parishes of Knyszyn and Kalinówka²¹⁴ – other sources fairly explicitly ascribe the settlement only to the parish at Kalinówka.²¹⁵ The village of Zubowo appeared twice in the Łuck synod acts of 1726 – in the parishes of Bielsk and Narew²¹⁶ – but as there is no certainty that the matter concerns the self same settlement it has been decided to affiliate this settlement to the parish at Bielsk.²¹⁷

III.2.2a.8 THE ORTHODOX CHURCH

Piotr Guzowski, Marzena Liedke

The main assumption within the present chapter is to draw attention to the Orthodox Church geography in the Podlasie Voivodeship in the second half of the sixteenth century i.e., a description of the administrative structures of the Orthodox Church, its boundaries, parish and monastic networks as well their presentation on the map. However, it is not our intention to present yet again the history of Orthodoxy in these territories; for the history of the Orthodox Church in Podlasie has seen an array of publications. It has also found its place in the synthetic presentations of the history of the eastern Churches or monographic presentations of particular eparchies. As a result of the chronology adopted in the Podlasie volume of AHP the question of the Uniate Church in relation to the above mentioned questions is also not dealt with in detail, rather only touched on in the final paragraph on the issues arising from the Union of Brześć.

Under the auspices of an introduction we shall, however, recall the fundamental historical and legal questions and issues that enable one to understand the processes in shaping Orthodox Church structures within the geographical context as well as the quality and dimensions of the parish network. And here by far the most useful has turned out to be the fundamental work by Ludomir Bieńkowski.¹ In addition utilised have been the synthetic publications by Antoni Mironowicz,² Andrzej Gil and Igor Skoczylas³ as well as by Józef Maroszek.⁴ In turn the fundamental work on the Orthodox Church parish network in Podlasie remains the book by Antoni Mironowicz: *Podlaskie ośrodki i organizacje prawosławne w XVI i XVII wieku* (Białystok 1991). Despite the rather broad treatment territorially (covering equally the western divisions of the Lithuanian Voivodeships of Nowogródek, Troki and Brześć Litewski as well as Royal Lublin) and concentrating on the seventeenth century, the author brings together fundamental information about Orthodox religious centres in part critically verified by exacting reviewers of this work⁵ as well as researchers undertaking this subject matter at the turn of the twenty-first century. The development of Orthodox Church structures in the Mielnik land was the subject of interest for Dorota Michaluk,⁶ while in the case of the western part of the Drohiczyn land, the realm of Tomasz Jaszczółt.⁷ In the case of the parish network of the Włodzimierz eparchy here the last word belongs to Andrzej Buczyło's PhD, which reconstructed an Orthodox parish network at the moment the Union of Brześć was concluded.⁸ A lot of detailed information was also supplied

¹ And to this we refer to specific information that concerns both the rights, entitlements as well as the endowments of particular offices and spiritual organs of the Orthodox Church; Bieńkowski, *Organizacja Kościoła*, pp. 780–1048.

by Józef Maroszek's publications,⁹ the older works by Jerzy Wiśniewski connected with settlement and colonisation¹⁰ as well as the less academic books by Grzegorz Sosna and Antonina Troc-Sosna.¹¹ The mentioned authors have had to struggle with the exceptionally poor source materials available. In the case of Podlasie royal estates the greatest amount of data on functioning Orthodox churches and possibly also their remunerations is supplied by the registers of the Vokod Reforms and ducal and royal property inventories. In turn the taxation of the Orthodox clergy allow crown taxation records to be used, which will be important first and foremost within the context of nobility property. Relatively rarely can historians make use of preserved foundation charters or the remuneration documents of individual Orthodox churches. Their content, often preserved in the form of seventeenth and particularly eighteenth-century copies and transumptms often show that historians are actually dealing with falsifications (e.g., the foundation documents of the Orthodox churches in Siemiatycze,¹² and Sawice¹³). Sometimes even source information about non-preserved yet earlier existing foundation bears witness to falsifications connected with describing a parish's origin (the Orthodox church in Żerczyce, for example).

The genesis of Orthodoxy in Podlasie and the Orthodox Church's legal situation

The history of Ruthenian political and certain religious influences across the area broadly understood as Podlasie may go back to the period when its southern expanses were still under the control of Kijów Rus' in the tenth century. It was then that the towns, to Mielnik, Drohiczyń, Suraż, Bielsk, Brańsk or Kamieniec were raised by Ruthenian princes, and to where local Ruthenians and newcomers from Volyn came to settle.¹⁴ From the end of the twelfth century Drohiczyń land came under the control of Casimir II the Just (1192/1193), but as a result of later Polish-Ruthenian conflicts¹⁵ it was to find itself under the rule of Daniel Romanowych, the Halych prince, who was, ultimately, crowned king in the 1253 at the Drohiczyń Mother of God Orthodox Church with the consent of Pope Innocent III.¹⁶ He died in 1264 and the weakened Kingdom of Galicia and Volyn was to be invaded several times by the Lithuanians. The lands of interest to us were set ablaze by the conflict between them and Mazovia.¹⁷ As a result of these conflicts the lands of Drohiczyń and Brześć Litewski were incorporated into the

Lithuanian state from more than likely 1340,¹⁸ and here with certain breaks,¹⁹ were to be found within the borders of the Grand Duchy of Lithuania,²⁰ before the official conversion of Lithuania to Christianity in 1387. Christianity was present (and here both in its Catholic as Orthodox guise).²¹

While the Galicia-Volyn Chronicle informs us that already in 1253 there was an Orthodox church at Drohiczyn. There was a church in Mielnik, constructed before even 1260, as well as in Bielsk functioning since 1289.²² One may cautiously speculate that relatively early Orthodox churches were erected in the environs or in the same towns raised by the Ruthenian princes, and here functioning as castle churches (for example, the recalled Orthodox church in Mielnik). However, we do not have at our disposal any sources that would be able to confirm such a state of affairs. The Orthodox churches that arose together with the initial Ruthenian settlement of Podlasie found themselves initially under the jurisdiction of the Turów bishopric created around 1088.²³ However later, already in the twelfth century, together with affiliation to the Kingdom of Galicia and Volyn, they started to come under the supervision of the diocese of Włodzimierz,²⁴ constituting a part of the Galician metropolitan see which encompassed in addition the dioceses of: Galicia, Przemyśl, Łuck, Turów, and Chełm.²⁵ The metropolitans of Kijów who had since 1308 combined the administration of two Orthodox provinces, Galicia and Kijów, proclaimed their claims to rule the metropolitan see that had come into being in 1303. Independence for the Galician metropolitan see was restored thanks to the Prince of Volhynia, Lubart Dymitr (son of Gediminas) and Bishop Teodor, but in 1347 it was annulled as a consequence of the efforts of the Muscovite prince Simeon Gordy (the Proud).²⁶ In 1354 the patriarch of Constantinople sanctioned inclusion within the centre of Orthodox authority that had been created at Nowogródek for those lands that entered into the composition of the Grand Duchy of Lithuania (as the metropolitan see of Lithuania).²⁷ However, claims of authority over the whole of Rus' were proclaimed by the Kijów metropolitans residing at Włodzimierz on the Klyazma River yet subordinated to Moscow.

The situation was complicated in the second half of the fourteenth century following the inclusion of Kijów within the Lithuanian state, the rulers of which strove to make the Orthodox Church on their lands independent of any hitherto existing metropolitans. Finally, in 1458, the Orthodox metropolitan of Kijów was created. Its jurisdiction paralleled with the then state boundaries, while the 'Lithuanian' metropolitans adopted the title of metropolitans of 'Kijów,²⁸ Galicia and all Rus'. In 1509 this title was renewed and it was formally recognised by the state authorities of the Polish Crown and the Grand Duchy of Lithuania.²⁹ Though the metropolitans were to reside in Nowogródek or Wilno.³⁰

³⁰ *Ibidem*, p. 128.

The most senior hierarches of the Orthodox Church in the Grand Duchy of Lithuania and in the Polish Crown came under the authority of the patriarch of Constantinople,³¹ but this authority was not that exacting and chiefly manifested itself in the formal confirmation of candidates (and in the sixteenth century ones already nominated by the king) for metropolitan.³² From the end of the 1580s attempts were made to strengthen this dependence.³³ The authority of the metropolitan within the territory of his province was also severely limited and chiefly as a result of the law of service given to the monarch, who in the sixteenth century took over a significant part of the canonical rights and entitlements of metropolitans and synods. He was to have a decisive say in the appointment of the clerics at the levels of metropolitans, bishoprics, hegumen or archimandrite, often deriving profit from it. As the main patron he took care of Church property³⁴ and also established parishes on royal estates. Almost a half of settlements (45%) in which were found Orthodox churches in the Podlasie Voivodeship, were a part of royal estates. He also gave permission for the holding of synods. Often these prerogatives were used more in the interests of the monarch than of the Orthodox Church itself.³⁵

Tough the metropolitans possessed the right to judge and punish bishops, they had few possibilities to actually enforce their decisions (bishops were appointed by the king). They also did not have the right to sit in the Commonwealth's *Sejm* (Diet), so matters were consequently different than was the case for the heads of the Catholic provinces of Gniezno and Lwów as well as the suffragan bishops of the dioceses subject to them. Hence in practice the chief and actually practiced prerogatives of a metropolitan was the ordaining of bishops presented (in the sixteenth century) by the monarch and the calling into being of synods, for which the metropolitan needed the monarch's permission.

The above indicated monarch influence on the functioning of the 'Greek' Orthodox Church was, on the one hand, the entailment while on the other the effect of the legal position of this Church in the Grand Duchy of Lithuania and the Polish Crown. For in none of the parts that were to comprise the future Commonwealth was the Orthodox Church to obtain the status of the ruling denomination. The Roman Catholic Church had a permanent, and even given successes of the Reformation, leading position in the Crown, while in Red Ruthenia, in founding the Galician metropolitan in 1367 (renamed the Lwów archbishopship in 1412) Catholicism was already being strengthened and fortified by Casimir the Great.³⁶ In turn, the conducting of the official process of Christianisation in the Grand Duchy of Lithuania as a result of the creation of the Union of Krevo was through the adoption of Catholicism even though Orthodoxy had been present amongst the Lithuanian dynasties (including through marriage with Ruthenian princesses) for centuries and was the ruling religion in the Ruthenian areas occupied by the great Lithuanian dukedoms. A series of resolutions and decisions were taken during the period in which Lithuania officially adopted Christianity that were to ensure the Catholic Church a ruling position. This resulted in a limiting in the functioning of the Orthodox Church; for at this time there was no such concept of equal rights amongst Churches.³⁷

It is worth pointing out from amongst the limitations imposed on the Orthodox, and which was to have an impact on the development of the parish network within both the Grand Duchy of Lithuania

³¹ Bieńkowski, *Organizacja Kościoła*, p. 788. It should be considered also that "from this time the Kijów archdiocese over the course of the subsequent decades was as equally in communion with Rome as Constantinople"; A. Gil, I. Skoczylas, *Kościół wschodnie w państwie polsko-litewskim*, p. 94.

³² Formally metropolitans were to have been elected by a bishopric synod. In practice, and here particularly in the earlier period, they were nominated by the patriarch and sent to the Grand Duchy or to the Crown for ratification. Candidates could be selected by the local synod or, in the sixteenth century, through nomination by the ruler. They had to be anointed and (later by this only) on the blessing of the patriarch; Bieńkowski, *Organizacja Kościoła*, p. 790.

³³ *Ibidem*, p. 794.

³⁴ K. Chodynicki, *Kościół prawosławny a Rzeczpospolita Polska. Zarys historyczny 1370–1632*, Warsaw 1934, pp. 33, 118.

³⁵ It would happen, for example, that the bestowing on someone of a bishopric was treated as a reward for loyal service, for example, military service, and it would be bestowed even on laymen burdened with families; Bieńkowski, *Organizacja Kościoła*, pp. 791, 798; A. Mironowicz, *Kościół prawosławny w dziejach dawnej Rzeczypospolitej*, pp. 34–35.

³⁶ The Latin bishoprics in Rus' were subordinated to the Lwów archbishopric, these being: Przemyśl, Łuck, Kamieniec, Kijów and Chełm. However, under his rule Orthodox law was preserved and maintained in these territories; A. Mironowicz, *Kościół prawosławny w dziejach dawnej Rzeczypospolitej*, p. 23.

³⁷ See, among others, W. Kriegseisen, *Stosunki wyznaniowe w relacjach państwo – kościół między reformacją a oświeceniem (Rzesza Niemiecka – Niderlandy Północne – Rzeczpospolita polsko-litewska)*, Warsaw 2010, p. 10.

and in the Polish Crown, was a ban on the construction of new or the conversion and extension of old Orthodox churches. This was more than probably in force from the moment Lithuania officially adopted Christianity. Reference about this is also to be found in the Wieluń-Kalisz statute of 1420 “O schizmatykach” referring its resolutions to the areas of the Gniezno province.³⁸ Limitations were also introduced by Władysław Jagiełło and Witold,³⁹ and were later to be renewed by subsequent monarchs.⁴⁰ However, this did not mean that no ‘Greek’ churches could be erected on receipt of special permission from the ruler.⁴¹ These restrictions were only to refer to Lithuania strictly and to be in force on royal estates and in royal towns.⁴²

Of significant impact on the place occupied by the Orthodox Church in the political life of the state was also the fact that the Orthodox hierarchs could not sit on the state council, nor in the future in the senate of the Commonwealth (later and to no avail the initiators of the Union of Brześć would demand this right). This ban was to have a significant influence on the lack of interest shown in fulfilling any religious rank amongst the Orthodox representatives of noble lines and wealthy nobility. There was consequently lacking any factor that would result in a strengthening of the Orthodox hierarchy. The secular Orthodox representatives of the mentioned social groupings managed in the years 1563–1568 to overcome the limitations in their political rights in effect from the Union of Horodło.⁴³ However, the religious processes connected with the expansion of the Reformation and subsequently with the activities of the Counter Reformation was to reduce in the sixteenth century the number of Orthodox magnates. This was to have a significant effect on the state of parish networks and the general position of the Orthodox Church; for on these estates they could administer in the case of parishes the canonical right to erect places of worship: in this case new Orthodox churches, the application of parish constraints,⁴⁴ as well as, on the other hand, the liquidation of parishes by, for example, their transformation into houses of worship of another denomination.⁴⁵ Hence the number of Orthodox churches on a given estate as well as the conditions of parish finances depended on the will of their secular patron. In the area of Crown-held Podlasie, in the case of large landed properties, this problem did not appear as intensively in the sixteenth century as it did in relation to Catholic places of worship or the territories of the Grand Duchy of Lithuania; for the estates of such Orthodox magnates like the Chodkiewicz family, lay chiefly on the Lithuanian side (Zabłudów, Supraśl). However, even here with time, particularly after the concluding of Church union, changes started to occur, for example the Orthodox church in Boćki (owned by the Sapięha family) was converted into a Uniate church.

Burghers also constituted secular patrons of the Orthodox Church, particularly at the end of the sixteenth century, at the time of the Union of Brześć. For in the 1580s Orthodox brotherhoods became active in the capacity of reformers of spiritual life amongst the Orthodox. These brotherhoods were especially important and active in Lwów and Wilno, where they even obtained the right of stauropegion i.e., they were taken directly away from their dependence on bishops and placed under the direct jurisdiction of the patriarch.⁴⁶

⁴³ M. Liedke, *Od prawosławia do katolicyzmu. Ruscy możni i szlachta Wielkiego Księstwa Litewskiego wobec wyznań reformacyjnych*, Białystok 2004, pp. 41–42.

⁴⁴ A. Mironowicz, *Podlaskie ośrodki*, p. 76.

⁴⁵ Particularly in the day of the Reformation, and later the Counter-reformation, although not always, together with the change in confession, on their lands there was carried out an eradication of all Orthodox churches. And for certain the condition of those that remained did not improve.

⁴⁶ Secular members of the brotherhoods were in charge of morality and the leadership of not only laymen but the clergy as well, being able to accuse them of shortcomings and misdemeanours before the bishop. They founded schools, did charitable works, maintained clergymen and Orthodox Church staff, maintained monasteries at brotherhood Orthodox churches;

Within the Podlasie Voivodeship the first Orthodox Church brotherhoods came about in 1594 and functioned at the cathedral church of the Epiphany (Bogoyavlenie) in Bielsk. Its charter envisaged the founding for its members – chiefly representatives of the furrier guild – of schools, hospitals and a poorhouse for the sick and destitute.⁴⁷ From the moment of the Brześć synod it was to become one of the main anti-Uniate centres in Podlasie. In 1599 called into being was a brotherhood at the Bielsk church of the Resurrection,⁴⁸ in Drohiczyn and Kleszczele, Orthodox brotherhoods were established in the seventeenth century.⁴⁹

Dioceses

The Kijów metropolitan was divided into dioceses (eparchy), at the head of which stood bishops. The spiritual and organisational life of the diocese fell under their care. The bishops gave permission, for example, for new parishes to be formed, they ordained lay clergymen and monks, they approved those chosen by patrons to be parish priests or monastery hegumens.⁵⁰ Yet they did not actually visit their dioceses – because the extent of the territories entrusted to them made this impractical,⁵¹ so the duty fell to protopopes (archpriests). Given the symbolic power of the metropolitan and the relatively little significance of the rarely called synods, bishops gained in fact a large amount of independence, an independence only seriously limited by the secular patrons of the Church and the growing role of the secular Orthodox brotherhoods instigated by the Constantinople patriarch.⁵² It is worth adding that in the case of Orthodox Church higher clerical office these were not reserved exclusively for the nobility, and if their representatives decided on a spiritual career then these were chiefly those from less significant families. For the magnates (see above) were uninterested in taking up Orthodox clerical functions.

Yet bishops could take advantage of their incomes for private and clerical purposes.⁵³ The basis of which was land – small towns, villages, farmsteads. In addition, priests in possession of parish benefices presented bishops with tithes as a mark of respect and subservience (*kunica* or *kunica soborowa*, *katedratyk* service and respect payments made to bishoprics). They also received payments for parish chrism (myron); there was also payment to mark a visit itself but as has been noted above these visits were rarities. Bishops also received payments for the ordaining of priests. An additional source of income was that derived from the leasing of archimandrite monastery complexes.⁵⁴ A metropolitan also gained profit from his own, largest Kijów diocese. Bishops took advantage of the help of cathedral kliros (*kryłos*) (with its seat in the capital), that is of the organs of the administrative and court authorities whose members were elders of the parish Orthodox churches from a centre being a bishopric seat.⁵⁵

Bishops by dint of office were able to attend with a carrying vote Orthodox Church provincial synods (local religious councils). They were, next to the metropolitan, the central and collegiate organ

Bieńkowski, Organizacja Kościoła, p. 832 f. Similar pastoral functions in relation to rural parishes were provided presumably by rural brotherhoods, i.e., collectives though there is actually little known about their functioning as such (also within the context of the Podlasie worship Voivodeship); *ibidem* p. 829.

⁴⁷ Mironowicz, *Bractwa cerkiewne w Rzeczypospolitej*, pp. 86–93.

⁴⁸ G. Sosna, D. Fionik, *Dzieje cerkwi w Bielsku Podlaskim*, Białystok 1995, p. 158.

⁴⁹ *Ibidem*, pp. 119, 127, 134–135.

⁵⁰ The competences of bishops included care for the purity of faith, the morality of the clergy and the faithful, the fulfilment by them of their duties as well as caring for the spiritual matters of the diocese's lay persons; Bieńkowski, *Organizacja Kościoła*, p. 802.

⁵¹ *Ibidem*, p. 808.

⁵² *Ibidem*, p. 802 f.

⁵³ It follows here to mention that the question of remuneration for the clergy at various layers was of especial significance in the case of the Orthodox Church; for the clergy in this case could marry and therefore the costs involved were higher than was the case with the Catholic clergy. In addition even the upper members of the hierarchy often, including also monastic superiors, had their own families the maintenance of which was undoubtedly supplemented by Church funds.

⁵⁴ Bieńkowski, *Organizacja Kościoła*, p. 803 f.

⁵⁵ Their competencies are comparable to chapter houses in the Catholic Church although they were widened to encompass the competencies of a consistory court, while on the other hand these same powers were not specified in their scope within canonical law; Bieńkowski, *Organizacja Kościoła*, p. 805 f.

of Church authority.⁵⁶ Initially, and here in the fifteenth and first half of the sixteenth century, these gatherings were sporadic in nature, with it only being in 1589 that we observe at the request of the Patriarch Jeremias II of Constantinople their annual occurrence. These yearly meetings took place at Brześć Litewski, and were called into being by the metropolitan with the permission of the ruler. Beside bishops they were attended by protopopes, the superiors of monastic orders, and from the moment of their sanctioning by Patriarch Jeremias II, by representatives of Church brotherhoods and lay patrons as well. These synods were mostly called to resolve organisational matters and issues connected with Church reform. They also had the powers to act as a metropolitan court in affairs amongst bishops or bishops and other parties.⁵⁷

From 1514 onwards the dioceses lying within the territory of the Grand Duchy of Lithuania came into the composition of the Kijów metropolitan: Kijów, Połock, Turów-Pińsk, Łuck and Włodzimierz; as well as within the Crown territories of Chełm, Przemyśl, Galicja.⁵⁸ The Orthodox Church in Podlasie was subject to two dioceses – Włodzimierz and Kijów. The diocese of Włodzimierz was composed of two ‘Church-organisational units: the krilos-officialities: of Włodzimierz (with the capital in Włodzimierz) and of Brześć Litewski (with the main institution in Brześć which since 1566 had been the voivodeship capital).’⁵⁹ These were separated from each other by part of the Chełm diocese beyond the Bug River.⁶⁰

The boundary between the two Orthodox eparchies of Włodzimierz and that of the metropolitan ran through the territory of the Podlasie Voivodeship in the land of Bielsk. Unfortunately details on the affiliations of particular parishes to particular bishoprics is only available from the eighteenth century onwards and concerning then the Uniate Church.⁶¹ Antoni Mironowicz has attempted to reconstruct the jurisdictional range of dioceses at the beginning of the epoch, although he himself has admitted that ‘establishing the boundaries of individual Orthodox eparchies before the year 1596 is still purely hypothetical in character.’⁶² However, he has drawn attention to the fact that the extent of the Brześć part of the Włodzimierz bishopric ‘corresponded, with only minor differences, with the extent of the Catholic diocese of Łuck [...] the boundary between the Catholic diocese of Wilno and that of Łuck ran in the sixteenth century along the River Narew, leaving Tykocin, Suraż and Narew within the latter bishopric.’⁶³ In the case of Orthodox dioceses a significant role was not only played by state and Roman Catholic administrative divisions but also by the extent of Belorussian and Volyn settlement as well as property ownership relations, amongst which of especial significance was the granting of the Błudowska Forest and Suraż Forest along with the estates at Choroszcz to Ivan Chodkiewich.⁶⁴ One may therefore state that the basic boundary division for jurisdiction between the Orthodox eparchies was for certain the River Narew but as a result of settlement and colonisation coming from the south, the border on the side of the Forest of Bielsk was somewhat shifted to the north: leaving within the boundaries of the Włodzimierz eparchy the churches in the villages of the Bielsk estate (Ryboły, Puchły). According to Antoni Mironowicz equally both the Suraż Orthodox churches (on both sides of the River Narew) belonged to the Włodzimierz bishopric.⁶⁵ In turn Andrzej Buczyło, approaching matters from the state of administrative divisions in the Uniate period, considers Suraż to have remained within the metropolitan diocese, in a similar way to the parishes at Ryboły and Puchły.⁶⁶ Both authors agree that

⁵⁶ Ibidem, p. 792; A. Mironowicz, *Kościół prawosławny w państwie Piastów i Jagiellonów*, p. 210.

⁵⁷ Change in provincial synods were in the fifteenth century the (because in the sixteenth century election was exclusively the king's prerogative) electoral synods whose task was the selection of the metropolitan (from amongst three candidates); Bieńkowski, *Organizacja Kościoła*, p. 797. Canon law also foresaw annual meetings of diocese synods to decide on matters more local in character but they were not summoned in the sixteenth century; ibidem, p. 797.

⁵⁸ Ibidem, p. 794.

⁶⁴ Mironowicz, *Podlaskie ośrodki*, p. 69.

⁶⁵ Ibidem.

⁶⁶ Buczyło, *Kształtowanie się sieci*, p. 30.

further to the west from Suraż the boundary between the eparchies was the River Narew right up to the Tykocin estates, which were to be found on the metropolitan side of the divide.⁶⁷

It is difficult having at one's disposal an extremely modest source base to unequivocally show which of the proposed options for the boundary course between the eparchies in the Podlasie Voivodeship best reflects the reality of the second half of the sixteenth century. Consequently it has been decided not to present this division on the map. Undoubtedly Andrzej Buczyło employed in his deliberations a broad source base (using visitation), but again here only eighteenth century ones. And so with regard to an earlier period we can but speculate. The proposal that the villages of Puchły and Ryboły be placed within the territory of the eparchy of Włodzimierz results, and here according to Antoni Mironowicz, from the fact that these two settlements were the property of the Bielsk estate,⁶⁸ while the capital of these lands was equally the place of administration for the protopope subject to the Włodzimierz eparchy. However, it follows to note here that the aldermanship belonging to the Bielsk starost was to be found at Ryboły, but Puchły was a nobility village (holding). And also both places were located much closer to Zabłudów than they were to Bielsk, and therefore the seat of the metropolitan eparchy protopope. Consequently, given the state of current research one may only take as hypothetical the jurisdictional affiliation of the Suraż Orthodox churches. Admittedly Antoni Mironowicz has categorically stated that 'undoubtedly, however, both Suraż Orthodox churches together with the chapel at Zawyki belonged to the Włodzimierz bishopric',⁶⁹ but he does not back up this opinion with a single footnote, any source references, or work cited. We may conjecture that the earlier Ruthenian settlement and colonisation that came here from the south⁷⁰ initially connected the Orthodox populace with the Włodzimierz eparchy, though it is difficult to unequivocally determine that such a situation was actually the case in the second half of the sixteenth century.

The overwhelming majority of Orthodox parishes within the Podlasie Voivodeship were to be found in the Brześć part of the Włodzimierz diocese. In the second half of the sixteenth century there were churches in 52 villages and towns while the Orthodox churches from only eight settlements belonged to the metropolitan diocese (accepting the River Narew to be the boundary between the eparchies, without shifting it to the north as proposed by A. Mironowicz).

Protopope areal divisions

Dioceses were divided into protopope areas (archdeaconry), these being the bishops' representatives, and in relation to the structure existing within the Catholic Church the functional equivalents of deacons. And at their head stood the protopopes.⁷¹ It is estimated that in the sixteenth century they enjoyed a broad range of entitlements. First and foremost they oversaw the parish clergy, and carried out visitation. They also acted in a legal court fashion (at the first instance) and judged those clergy subordinate to them, being able to administer and impose punishments if infringements and negligence were proven. They also were involved in matters of the faithful, for example separating married couples, or issuing dispensations in relation to obstacles in marriage. More than likely they also collected tithes from the clergy and paid these to the bishop.⁷² It is thought that such a broad range of competences resulted from a neglect of duties and a weakening of the authority of the bishops.⁷³ The title of protopope was also used as an honorary title by priests of the more important parishes or the most important priests in a given parish (*protjerej*).⁷⁴ Protopopes possessed their own benefices, while

⁶⁷ Mironowicz, *Podlaskie ośrodki*, p. 69; Buczyło, *Kształtowanie się sieci*, p. 30.

⁶⁸ Mironowicz, *Podlaskie ośrodki*, p. 69.

⁶⁹ *Ibidem*.

⁷⁰ *Słownik starożytności słowiańskich*, vol. 5, Wrocław 1975, pp. 483–484.

⁷¹ In relation to Crown lands these were called governors while in the case of the Grand Duchy – protopopes; Buczyło, *Kształtowanie się sieci*, p. 31. This was not always consistently implemented for at the Przemyśl eparchy both forms were employed; A. Krochmal, *Archiwum historyczne eparchii przemyskiej*, Warsaw–Przemyśl 2016, pp. 200–201.

in addition they collected court payments as well as payments from the clergy subordinated to them.⁷⁵

The bishop's representatives resided as a rule in the county or district towns,⁷⁶ for it was convenient to adapt the organisational structure of the Orthodox Church to those divisions resulting from state administration. The number of protopope areas underwent modification in conjunction with the development of a parish network although it could display an uneven number of parishes. In the Podlasie Voivodeship of the second half of the sixteenth century, and even in the seventeenth century, there is an absence of detailed data on the affiliation of particular places of worship to given existing protopope areas. This may, however, show that across the territory of Podlasie broadly understood, within the Włodzimierz diocese, there functioned three Church administrative representations: Bielsk, Drohiczyn and Brześć Litewski. The last of which was to find itself in the second half of the sixteenth century beyond the borders of the voivodeship but presumably it still controlled a part of the parishes located within the Mielnik land. In turn, in the metropolitan diocese for the major part of the sixteenth century the Podlasie parishes probably were initially subordinate to the Grodno protopope area lying beyond the voivodeship boundaries, although in the second half of the sixteenth century as a result of an increase in the number of parishes an additional Podlasie protopope area was established with its seat at Zabłudów, lying already within the Grand Duchy of Lithuania.⁷⁷

Parishes

The smallest organisational and territorial unit of the Orthodox Church were the parishes that entered into the composition of particular protopope areas (archdeaconry). An Orthodox parish functioned in every location and small town across the Ruthenian lands, with some even boasting several parishes.⁷⁸ In the sixteenth century there was noted a significant growth in Orthodox parishes,⁷⁹ with a momentary break from this trend at the height of Reformation successes.⁸⁰ New parishes came into existence not simply for religious reasons but equally as a result of material needs; for even one poorly endowed still brought the patron as well as the bishop a certain profit.⁸¹

Orthodox parishes could have their own branches and chapels, for example at cemeteries. The reasons for founding branches, and consequently churches subordinated to the parish structure, were more often than not of a demographic and/or financial nature. It was simply cheaper to construct merely the Church building for this did not have to bring with it the additional expense of paying for a clerical living. This also occurred in situations where the number of eventual parishioners was small. Branches sometimes saw the transformation of hitherto Orthodox parishes, and this occurred when for concrete reasons the number of parishioners fell or the remuneration paid to the clergy turned out to be insufficient. It would happen that in the environs a new church was built designed to replace the old but that the earlier church was not dismantled and continued to function though now as a branch church.⁸² Services could take place regularly in Orthodox parish branches, it could even entail a separate living, while at a later period separate registers of births, marriages and deaths were even kept by them⁸³ (although one needs to add that in the case of the Orthodox Church the recommendation that the registrations of births, marriages and deaths be conducted in churches was only to appear under Metropolitan Piotr Mołyła (1596–1647), with a subsequent period of several dozen years to see its actual realisation⁸⁴). There also functioned Orthodox Church – chapels, parishes without

their own income, where services were conducted irregularly, most often to mark the major Christian feast days.⁸⁵

It is extremely difficult to estimate the number of priests and deacons serving in parish churches or their branches, for the majority of the source material is scant and does not lend itself to statistical study and application. That said Antoni Mironowicz has attempted to calculate the numerical state of the clergy and according to him in Podlasie in the sixteenth century (here understood in a broader sense than simply the Podlasie Voivodeship), there were 207 clergymen, with this working out at on average 1.42 for each parish in the area.⁸⁶ The basic responsibilities of the parish clergy were taking care of Church buildings, the running, and here with the participation of deacons, of parish schools.⁸⁷ However, first and foremost the whole array of pastoral duties, including conducting services, administering the sacraments at various occasions, particularly weddings, christenings and funerals. The average number of parishioners to which these sacraments were to be administered in the Voivodeships of Rus, Podole, Volyn, and Bielsk was from 250 to 500 persons.⁸⁸ Given the similar levels of population density of Volyn and Podlasie as well as the similar ethnic and social structure of Orthodox believers one may assert that these are figures as equally representative for the sixteenth-century Podlasie parishes of the Brześć Litewski part of the Włodzimierz eparchy.

Remuneration for the clergy differed though if the matter concerns the total amount paid it was often so small that it was difficult for a priest to support himself and his family on such a sum, forcing the clergy to grow their own food.⁸⁹ In the Orthodox Church the practice was for the consecration and establishment of new parishes without recourse to whether they actually had a sufficient living or not.⁹⁰

The basis for an Orthodox priest's income was land. It is shown that in Volyn and Red Ruthenia this was most often half a mansus (approximately 8.4 hectares),⁹¹ while on lands to the north the area was greater – being two manus: equalling 33.6 ha,⁹² while more land was given to priests (across Podlasie broadly understood to be around 2.46 voloks) in Crown lands, with less on private estates (2.18).⁹³ This was significantly less than the incomes of the Podlasie Roman Catholic parishes.⁹⁴ Also the material basis for Orthodox monasteries in Drohiczyn barely exceeded 2 voloks. Somewhat richer was the Monastery of St. Nicholas in Bielsk which not only had voloks in the town-held villages but also plots held in the Bielsk itself.⁹⁵ This was nevertheless incomparably small to what the cloister in Supraśl received from its initial benefactors – the Chodkiewicz family and Józef Sołtan; lying just beyond the voivodeship borders it had at its disposition, and from its very inception, several dozen villages and farmsteads as well as forests.⁹⁶ Various rights and freedoms constituted supplements to the livings enjoyed by the clergy and monastic houses.⁹⁷

⁸⁵ Buczyło, *Kształtowanie się sieci*, p. 62.

⁸⁶ Particularly in urban centres there could be several clergymen; on the other hand not all parishes had deacons; Mironowicz, *Podlaskie ośrodki*, p. 81.

⁸⁷ A. Mironowicz, *Szkolnictwo prawosławne na ziemiach białoruskich w XVI–XVIII wieku*, „Białoruskie Zeszyty Historyczne”, 1994, no. 2, p. 21. According to J. Łukasiewicz there were a lot of them (idem, *Historia szkół w Koronie i Wielkim Księstwie Litewskim od najdawniejszych czasów aż do roku 1794*, vol. 1, Poznań 1849, p. 349), while M.B. Topolska considers that with the exception of large towns they appeared rarely (eadem, *Czytelnik i książka w Wielkim Księstwie Litewskim w dobie Renesansu i Baroku*, Wrocław 1984, p. 60).

⁸⁸ Bienkowski, *Organizacja Kościoła*, p. 817.

⁸⁹ Better off priests made use of the services of hired servants; *ibidem*, p. 825. It would happen that a clergyman together with his family would be kept by the lord of the manor – receiving from him food, clothing etc.; *ibidem*, p. 824.

⁹⁷ These were easements, common forests, the setting up of wild bee hives, the right to hunt and fish, the right to freely grind grain for the needs of the Orthodox priest or for monks, the right to brew beer without duty or take one's fill of mead, also for their own use, more rarely for sale, or if necessary to receive market fees with the agreement of the lord/master on fairdays. The clergy also received from the parish offerings of grain (skopszczyzna, tithes), gifts in kind to mark Christmas and Easter as well as payments for religious services: sometimes the parishioners themselves paid for the purchase of, for example, Communion wine, or lighting for the church etc.; L. Bienkowski, *Organizacja Kościoła*, p. 823 f.

Within the sixteenth-century boundaries of the Crown Podlasie Voivodeship there were Orthodox churches functioning in at least 60 locations: 29 in the Bielsk land, 18 in the Drohiczyn land, and 13 in the land of Mielnik. This number relates to parishes, while in cities and towns it would happen that several parishes functioned. Four or five parishes (if we consider that a parish was founded at the St. Nicholas monastery) were to be found in sixteenth-century Bielsk. A similar situation existed in Drohiczyn where at least five parishes were in operation, of which one was connected with a monastic house, and even six if one considers that the hospital or refectory church of St. Barbara was the church of an independent community, and not a branch of the Holy Trinity Orthodox church. There were two Orthodox parishes in operation in Kleszczele, Łosice, Mielnik, Suraż and possibly in Gruzka (Hruska). With immense caution, taking into consideration the earlier mentioned reservations and first and foremost the scant rudimentary sources, one may state that there were in existence at least 73 Orthodox parishes across the territory of the Podlasie Voivodeship in the second half of the sixteenth century. However, any reconstruction of the parish districts from this period is an impossibility. Potential pointers as to their extent can be provided by the documentation created by the Uniate Church in the eighteenth century, but it follows to remember that this refers to a different settlement and denominational situation. As a result of the absence of possibilities to provide a detailed and unequivocal reconstruction of Church administrative divisions, it was decided that information about Podlasie Voivodeship churches and parishes would be grouped together according to the state structures in existence in the second half of the sixteenth century.

Orthodox churches/parishes in the Bielsk land

The majority of the Orthodox parishes of the Bielsk land entered into the make up of the Brześć Litewski part of the Włodzimierz diocese. The first information we have on the existence of an Orthodox Church in Bielsk⁹⁸ comes from the Galicia-Volyn Chronicles. In the year 1289, among the services attributed to Vladimir Vasilkovich in propagating the faith, there is also the mention of an endowment of an otherwise undefined Orthodox church in the town.⁹⁹ According to A. Mironowicz and A. Buczyło this was the church of the Birth of Our Blessed Virgin Mary (*Preczystestieńska*) – the later castle Orthodox church was to also bear the same designation.¹⁰⁰ A preserved fragment of the Voloč Reform register for the years tells us that a further three Orthodox churches were operational in the town: these being of St. Michael the Archangel and Epiphany (*Bogoyavlenskaya*), of The Holy Trinity (*Troitsa*) and of the Resurrection (*Voskresenie*).¹⁰¹ Other items of source literature point to the operations within the town itself of the Orthodox monastery and church of St. Nicholas.¹⁰²

In Brańsk both a priest and sacristan were noted down in the starost inventory of 1558. The very same source mentions a ‘Ruthenian priest’ in Malesze and Hodyszewo.¹⁰³ The register of the Voloč Reforms for Kleszczele, and here for the year 1560, informs us about the existence of the Orthodox church of Saints Nicholas and George the Martyr (*Jura*).¹⁰⁴ From amongst other Orthodox churches on royal estates and lands the inventory of 1560 confirms the existence of the ‘Ruthenian Orthodox church’ in Narew¹⁰⁵ as well as Klejnik (Zygmunów)¹⁰⁶ and Łoknica.¹⁰⁷ The last of these churches was not to function for long, for none of its clergy appear in any taxation register following the inclusion

of the Podlasie Voivodeship to the Crown. Andrzej Buczyło explains this through the creation of a new Orthodox church in neighbouring Czyże, the clergy for which were covered in the taxation register for 1578.¹⁰⁸ In the reports of the royal estates of 1576 there are noted Orthodox churches at Dubicze¹⁰⁹ and Rajsk.¹¹⁰ They existed also at Pasyunki¹¹¹ and according to the taxation register equally in Proniewiczze.¹¹²

In the Bielsk district in the sixteenth century, and here on private estates, there functioned one or two Orthodox churches in the village of Gruzka (Hruska).¹¹³ Possibly from 1513 or 1528 onwards there existed an Orthodox church in Boćki founded by Ivan Sapieha¹¹⁴ as well as at Kośna being in the hands of Paweł Sapieha and noted in the register of the Vokol Reform for Kleszczele.¹¹⁵ There was also an Orthodox clergyman in Hryniewiczze Duże¹¹⁶ and Pietkowo.¹¹⁷ An Orthodox church, possibly under the dual denomination of St. John Chrysostom and St. Simeon Stylites, was to function from the first half of the sixteenth century in Orla.¹¹⁸ A taxation register of 1577 also points to an Orthodox clergyman deriving from Podbiele¹¹⁹ and Kruhła.¹²⁰

The Orthodox churches of the Bielsk land lying to the north of the line of the Narew more than likely belonged to the metropolitan diocese. These were located first and foremost within royal estates; amongst which are the two Orthodox churches at Suraż: on the left bank of the Narew the Spaska Orthodox church while on the right bank the church of St. Peter and Paul.¹²¹ Besides that an Orthodox church was in operation in Tykocin,¹²² Święciciele (Ciełuszke)¹²³ and Rybołe¹²⁴ as well as in Boguszew that was partly the king's property.¹²⁵ In Augustów there was an Orthodox church founded in 1553, and for its endowment two voloks of municipal land was provided¹²⁶ and two in

¹¹⁷ Denis, an Orthodox priest from Pietków, a Bielsk burgher appears on the pages of the unpublished book of the Lithuanian Metrica; RGADA, sign. 389, op. 1, no. 36, ff. 72–72v, 93v–94, 108–109. We would like to here thank Dr. Andrzej Buczyło for this information.

¹¹⁸ According to A. Mironowicz there were two Orthodox churches in Orla: St. John the Evangelist founded by Jesko Iwanowicz circa. 1500 and the church of St. Simeon Stylites, founded by Bohusz Bohowitynowicz around 1516; Mironowicz, *Podlaskie ośrodki*, p. 75. However, it seems that it is A. Buczyło who is correct in arguing that there only functioned in the town a single church of a dual dedication: the use of the singular to describe the church in a document of 1525 of the settling in Orla of the Orthodox priest Karp and the deacon Zachariasz as well as the taxation register of 1577, which also informs one as to the payments incurred by a solitary priest; Buczyło *Kształtowanie się sieci*, p. 123; ASK I 47, f. 414; AR VIII 435, f. 3; In turn, M. Sierba shows the lack of direct sources as to the founding of the church by Jesko Iwanowicz, although he considers possible the functioning of two Orthodox churches: the estate church of John the Evangelist (earlier John Chrysostom) and the parish church of St. Simeon Stylites; idem, *Radziwiłłowskie dobra Orla (1585–1695)*, Białystok 2017, pp. 184–185.

¹²⁵ LWP 1602, p. 29; ASK I 47, f. 829.

¹²⁶ In hitherto subject literature the foundation document of 1553 is taken as the base information as to the Augustów Orthodox church; J. Wiśniewski, *Dzieje osadnictwa w powiecie augustowskim* p. 115; J. Maroszek, *Pogranicze Litwy i Korony*, p. 412; G. Sosna, A. Troc-Sosna, *Zapomniane dziedzictwo*, pp. 20–21. However, it is possible that this referred to Augustów in the Chełm land, while we may talk about the founding of the Orthodox church in Augustów in the Bielsk land in the case of the document of 29 October 1569 entered into the unpublished Lithuanian Metrica book 53, f. 18v, in which the king informs

nearby Żarnów.¹²⁷ In 1551 the Orthodox church of the Transfiguration (St. Spas) was built in Knyszyn with the endowment of two voloks in the village of Chraboła.¹²⁸ A taxation register also points to the functioning of an Orthodox priest in noble village of Puchła.¹²⁹ A. Mironowicz, in his work on Orthodox centres within Podlasie, also enumerates Kożany and Kaniuki as parish centres in the second half of the sixteenth century. He points to the register edition of 1580 as his source base (Kożany)¹³⁰ as well as the study by A. Jabłonowski on Podlasie (Kaniuki).¹³¹ In both places there is, however, no information about there having been Orthodox churches in the indicated settlements. However it is worth noting that in the inventory of the Suraż aldermanship of 1558 in the description of the village of Doroszka (bordering with Kożany) there is mentioned a half-volok belonging to the “Orthodox priest Jurgowski”,¹³² while it is known that at a later time the Orthodox church in Kożany was named after St. George, the patron saint. In the case of Kaniuki we have not found any other confirmation as to the existence of an Orthodox church in the sixteenth century, in a similar way to the case of the alleged church at Nowy Berezów.¹³³

A huge influence was exerted on the relatively small number of churches and parishes in the northern part of the Bielsk land, and here the matter goes beyond mere ethnic relations, by the decision of Grzegorz Chodkiewicz, the owner of estates on the borderlands of the Voivodeships of Novogrod, Troki and Podlaskie, to not swear an oath of loyalty to the King and the Polish Crown. In this way the former Chodkiewiczow estates with Orthodox churches in, among other places, Choroszcz, Fasty, Dojlidy as well as the Błudowska Forest remained within the boundaries of the Grand Duchy of Lithuania.¹³⁴

Orthodox churches/parishes in the Drohiczyn land

The first Orthodox church in the Drohiczyn land to be individually named in the sources has its mention in the already referred to *Galician-Volyn Chronicle*.¹³⁵ Here reference is to the church of the Mother of God, possibly on the castle hill, built in Drohiczyn by Daniel Romanovich before the year 1253.¹³⁶ Late medieval Orthodox churches of the Pure Mother of God (Prichisteskaya) and of St. Nicholas, the clergy of which are known from the mid sixteenth century.¹³⁷ From the beginning of the sixteenth century the Orthodox church and monastery of the Holy Trinity had existed already in the royal town,¹³⁸

that Pilchowski allocated 2 voloks for the Orthodox church and appointed Łukasz Rozumowicz priest (we would like to thank A. Buczyło for the suggestion).

¹²⁷ LWP 1570, 1576, p. 112.

¹²⁸ J. Maroszek, *Pogranicze Litwy i Korony*, p. 206; LWP 1602, p. 9.

¹²⁹ ASK I 47, f. 633.

¹³⁰ Mironowicz, *Podlaskie ośrodki*, p. 268 points to Podlasie I, p. 113. But neither in this part of the edition nor in the source original is there any information about the Orthodox church; ASK I 47, ff. 614–614v.

¹³¹ Mironowicz, *Podlaskie ośrodki*, p. 228, after: Podlasie II, p. 229.

¹³² AWAK 14, p. 53; J. Maroszek, *Pięć wieków Ziemi Juchnowieckiej*, pp. 43–44.

¹³³ A. Mironowicz (*Mironowicz, Podlaskie ośrodki*, p. 269) rather imprecisely cites the Crown Metrica (MK) journal XVIII, ff. 584. In reality the matter probably concerns the Crown Metrica, section XVIII, Inspections, sign. 64, f. 584, containing the inspections for the Crown lands for the second half of the seventeenth century, where talk is, among other things, that “the church is in this village Uniate to which belongs volok no. 2”, from which it is not possible to postulate that an Orthodox church existed there in the sixteenth century. A. Buczyło (*Kształtowanie się sieci*, p. 178) draws attention to the fact that the village of Nowe Berezowo was founded in 1611, so the Orthodox church must have come into being somewhat later.

¹³⁴ J. Maroszek, *Pogranicze Litwy i Korony*, p. 114.

¹³⁵ See T. Jaszczółt, *Drohiczyn* in AHP Podlasie volume and in chapter III.6.8.8 in this volume.

¹³⁶ *Kronika halicko-wołyńska*, p. 239.

¹³⁷ AWAK 33, pp. 35, 39–40.

¹³⁸ According to A. Mironowicz (*Mironowicz, Podlaskie ośrodki*, p. 104) the Orthodox church of the Holy Trinity was founded in 1494 and for this he points to the funding document talking about bestowing on it of “6 hands of honey”. Attention has also been drawn to the fact that more than likely the document of 1494 concerned the Roman Catholic church also of the Holy Trinity, whose parish priests in the sixteenth century collected rent in this very form; see Buczyło, *Kształtowanie się sieci*, p. 86. Possibly the Orthodox church had been built earlier already at the end of the fourteenth century, while at the beginning of the next an Orthodox monastery was found at the same location; see J. Maroszek, L. Postołowicz, *Fundacje sakralne w Drohiczyńnie – jako przejaw mecenatu artystycznego*, „Białostoczczyzna”, 1986, no. 2, p. 13.

a branch church of which was possibly the Orthodox church of St. Barbara.¹³⁹ In the first half of the sixteenth century the monastery of The Transfiguration was equally established here,¹⁴⁰ while in the mid sixteenth century there is source mention of the church of St. Elijah.¹⁴¹

The earliest traces of Orthodox clergy functioning within noble estates on the Drohiczyń land is the annotation in the Drohiczyń court book of 1480 regarding the Ruthenian Orthodox priest Tomashovich 'of Ciechanowiec.'¹⁴² In 1503 there was also established the Orthodox parish of the Saints Kosma and Damian at Wysokie Mazowieckie.¹⁴³ While in the first half of the sixteenth century an Orthodox church functioned at Siemiatycze¹⁴⁴ and possibly equally in Sawice Ruskie inhabited by Ruthenian boyars (The Sawickis), and which became the holding of Maciej Sawicki in 1558: 'nec non iure patronatus seu collatura fundi et ecclesie ritus atque professionis Rutenice in bonis Savicze Ruskie.'¹⁴⁵ In the first half of the sixteenth century equally in operation were Orthodox parishes at Łazów,¹⁴⁶ Mordy,¹⁴⁷ Hołubla,¹⁴⁸ Wirów,¹⁴⁹ Kosów,¹⁵⁰ Krześlin¹⁵¹ and Rogów.¹⁵² In 1540 there is mention of the land of a 'Ruthenian priest' at Węgrów.¹⁵³ In the second half of the sixteenth century references occurs in the sources of an Orthodox church at Andryjanki¹⁵⁴ as well as Czarna Cerkiewna,¹⁵⁵ the priest of which, Mantur, held fields in the village of Żurobice.¹⁵⁶ Towards the end of the century, between 1587 and 1596, the Orthodox church of the Platform of the Holy Cross was also founded in Seroczyno.¹⁵⁷ Taxation registers for the years 1580 and 1588 also supply information about an Orthodox priest, a tax payer from Małobody.¹⁵⁸ We may conjecture that an Orthodox place of worship was also in operation in Sokołów. Although the first concrete information about the church is from 1612, the historical division of the town into a Polish and Ruthenian part, as well as the presence of Ruthenians in the area, had already found its reflection in descriptions in the charter document, which indirectly proves the functioning of an Orthodox place of worship.¹⁵⁹ In the second half of the sixteenth century there also operated an Orthodox church at Twarogi Ruskie, proof for which is the Orthodox priest's volok noted down in 1560 when land in this village was sold.¹⁶⁰

¹³⁹ AWAK 33, p. 114. A. Mironowicz (Mironowicz, *Podlaskie ośrodki*, p. 164) concedes that this was an independent parish Orthodox church, while A. Buczyło (Buczyło, *Kształtowanie się sieci*, p. 87) shows that the source in this matter is not unequivocal in its meaning.

It is difficult to establish the status of Orthodox churches that were to appear in the sources for the very first time in 1604 as Uniate houses of worship but which had been in existence for some time (Grodzisk and Gródek). A. Mironowicz acknowledges that they came into being before 1596 and that they were initially Orthodox churches, while in turn A. Buczyło has pointed out that they were to be found on lands belonging to the bishops of Płock and that as a result of Church patronage they could have already been founded as Greek-Catholic churches.¹⁶¹ An Orthodox priest from Gródek has already appeared in the sources in 1601.¹⁶²

Orthodox churches/parishes in the Mielnik land

The oldest written entries concerning places of Christian worship for the Orthodox denomination within the Mielnik land refer to Mielnik itself. According to the account contained in the *Kronika halicko-wołyńska* at the Orthodox church of the Mother of God was to be found and already at the beginning of the second half of the thirteenth century the miraculous icon of Christ the Saviour.¹⁶³ Academic literature directed to the general public makes reference to the presence of this medieval holy image, one hidden allegedly from the Tatars in the forests along the Bug, and derived from this the worship of Grabarka Hill. In the subject literature continuity in the functioning of a medieval parish and the identifying of it with the early modern Orthodox church of the Birth of the Virgin Mary is adopted.¹⁶⁴ In the inventory for the Mielnik and Łosice starosty of 1551, information appears confirming equally the existence of a second Orthodox church in Mielnik, and here that of the Resurrection.¹⁶⁵ This same document confirms the existence of two Orthodox churches in Łosice: that of the Assumption and St. Michael's.¹⁶⁶ Presumably at least one of these had operated in the town earlier, probably before the bestowing on the municipality of Magdeburg Rights in 1505, since the first Roman Catholic church was built in 1511 and the local community much surely have been in possession of some place of worship. The document giving town rights equally guaranteed the inhabitants four fairs a year, of which two were to fall on the Assumption and the feast day of Michael the Archangel.¹⁶⁷

The inventory of the starosty of Mielnik and Łosice for 1551 confirm the existence of Orthodox churches at Kornica¹⁶⁸ and Żerczyce.¹⁶⁹ In turn the inventory of 1560 enumerates an Orthodox church in Żurobice, where Orthodox priest held voloks already in 1534,¹⁷⁰ and at Próchenki.¹⁷¹

¹⁶¹ Mironowicz, *Podlaskie ośrodki*, p. 257; Buczyło, *Kształtowanie się sieci*, pp. 151, 472.

¹⁶² NGAB, Mińsk, sign. 1715-1-108, f. 1074.

¹⁶³ *Kronika halicko-wołyńska*, p. 406. It was to have been much venerated – as one of the later editors of the source added. Academic literature directed to the general public makes reference to the presence of this medieval holy image, one hidden allegedly from the Tatars in the forests along the Bug, and derived from this the worship of Grabarka Hill. However, J. Maroszek has suggested that there are no other accounts as to the development of the worship of a Saviour icon in late medieval Mielnik, while information about Grabarka Hill as the place of worship is to only appear in sources several hundred years later, here already in the early modern era. As a consequence, for this researcher the account of a miraculous icon relates to the town of Brześć Litewski as earlier mentioned in the *Kronika halicko-wołyńska*, and not to Mielnik itself; J. Maroszek, *Ośrodki kultowe nadbużańskiego Podlasia miejscem spotkań różnych wyznań*, [in:] 497. rocznica urodzin województwa podlaskiego. Referaty z sesji historycznej, Mielnik, 29 sierpnia 2010 r., ed. A. Tobota, Białystok 2010, p. 159.

¹⁷¹ ASK LVI 171, f. 218.

The inventory for the starosty of Mielnik and Łosice of 1551 conveys the information that in the village of Szpaki there are to be found voloks bestowed on the Orthodox church at Ostromęczyn (Chłopków).¹⁷² Ostromęczyn (Chłopków) up until 1512 had also belonged to the monarchal estates and therefore the Orthodox church had presumably been founded there before Sigismund the Old bestowed the settlement on Niemira Hrymalicz.¹⁷³ The Niemir family also owned the village of Gnojno, where the Orthodox church of St. Praxedes the Martyr was situated.¹⁷⁴ The instructions from the will of Bohusz Michał Bohowitynowicz of 1529 confirm the existence of an Orthodox church in Witulin.¹⁷⁵ Witulin, in a way similar to Nosowo, where the Orthodox church was raised before 1542, as is borne out by the document of Sigismund the Old. From this very year confirming the earlier bequeathment for the sake of the church,¹⁷⁶ had an altered administrative affiliation and this already in the first half of the sixteenth century,¹⁷⁷ but royal taxation sources note a taxation collection from Witulin from a certain Kasper Dembiński¹⁷⁸ and at Nosowo from Teodor Lacki.¹⁷⁹ In the environs of these settlements an Orthodox parish functioned at the chapel of the Holy Trinity at the manor house in Witulin, which encompassed the village of Bukowiec.¹⁸⁰ There were equally Orthodox churches on the Woźniki estates, which in the sixteenth century belonged to, among others, the Kiszka family. We may learn from Mikołaj Kiszka's document of 1588 about the existence of the Orthodox church of the Raising of the Cross in Chotycze as well as the founding of a church in Mszanna.¹⁸¹

Orthodox churches were equally operative in the most southernly parts of Podlasie, which had permanently been incorporated into the Mielnik land only in the first quarter of the seventeenth century. The most important of which being the Międzyrzec estates of Bokowicze and Kozierydy.¹⁸² In Międzyrzec an Orthodox house of worship (under the denomination of St. Nicholas) was presumably in operation already in the fifteenth century, while in the second half of the subsequent century the church of St. Peter and Paul was built.¹⁸³ In addition, in the sixteenth century, there were equally operational Orthodox churches in this area at the villages of Szóstka, Dołha, Horodyszczce, Jabłoń and Gęś.¹⁸⁴

Monasteries and nunneries (monastic houses)

Within Orthodox Church structures it is essential to note the important form of life and religious service led by a part of the clergy and monks, this constituting the work of the monastic houses. These did not constitute a network of religious orders of a set monastic rule (in the Orthodox Church different monastic rules were not practiced but only a single practice known as the Rule of Basil the Great), though at times in the fifteenth and sixteenth century it could be subject to transformation at 'ordinary parish centres served by "white" clergy.'¹⁸⁵ Monastic houses played a significant religious and cultural role in the life of the Church (particularly in preserving the Slavonic-Byzantine tradition in the day of the Reformation's expansion and subsequently the activities of the Counter-Reformation¹⁸⁶). They equally constituted evidence of the views and attitudes of their relevant founders, for they were founded by princes, magnates, and even the better-off nobility. In the same way as the Catholic monastic houses, Orthodox orders became the place of abode of widows and widowers, and not only from the families of founders and funders. They could also become a life choice for their sons though more frequently daughters, for Orthodoxy also had female orders. From our perspective it is also important that they were to have been and indeed were a bastion of clerical staff, as well as being centres of political-religious views, particularly in the day of the Union of Brześć. Monastic houses were also to play a role in the Orthodox educational system, as cloister schools were in operation at male monastic houses.¹⁸⁷

Monasteries, inhabited chiefly by lay-monks, priests and deacons, were subject to the authority of a bishop, although in practice they were notably influenced by their founders and funders, who were able to appoint their own archimandrites (abbots) and hegumen (priors), that is those running

a monastic house. Such nominations often had little in common with the quality of life or the theological knowledge of the candidate and was often merely a form of reward on the part of the ruler. This was to impact in an obvious way on the mental, religious, and cultural formation of the monks at this time.¹⁸⁸ A significant reform of monastic life was only conducted in the seventeenth century, one that also involved the Uniate Church (here chiefly the reforms of Józef Welamin Rutki).

The first half of the sixteenth century was a period of expansion for Orthodox monastic orders in the Grand Duchy of Lithuania, although these new monastic houses were to appear chiefly beyond the borders of the future Crown Podlasie Voivodeship.¹⁸⁹ Within the post-Union of Lublin borders of the Podlasie Voivodeship Orthodox monasteries were to be found in Bielsk and Drohiczyn. As results from the register of the Voloč Reform of 1560 they presumably were established at the turn of the sixteenth century, with the monastic house of St. Nicholas in Bielsk being relatively well endowed.¹⁹⁰ Thanks to which there was a cloister hospital and a parish school functioning at the monastery.¹⁹¹ In Drohiczyn from the beginning of the sixteenth century, a monastery functioned at the church of the Transfiguration (known in sources from 1509 onwards).¹⁹² Unfortunately we do not have at our disposal any source information that speaks of the numbers of such gatherings, nor of their social activity, although the very fact that they were functioning in the county town, at a place that lay on an important trade route allows one to conjecture that their religious role and cultural impact must have been significant.

However, there can be no doubt that for the Orthodox inhabitants of the Podlasie Voivodeship those monasteries that lay beyond the voivodeship's borders were of great significance. And here the matter concerns first of all the monastery of the Annunciation Supraśl (in the Grodno powiat),¹⁹³ and to a lesser degree the order at Jabłeczna (Brześć Litewski powiat) propagating the popular sixteenth-century worship of St. Onuphrius.¹⁹⁴ The first of the monasteries mentioned was to become the monastic centre 'of the greatest significance in the sixteenth century found on the territory of the Grand Duchy of Lithuania,'¹⁹⁵ but with time it was to accept the Union of Brześć, while the monastery at Jabłeczna, which initially was only regional in significance, was to remain true to Orthodoxy.

The Orthodox Church after the Union of Brześć – the legal position and organisational structure.

As a result of the activities of the Ruthenian episcopate and the monarchy over the period 1590–1596 crystalised and put into effect were steps aimed at Church union. Given the wealth of subject literature¹⁹⁶ we will not here describe the course of these events. Though it does follow to recall that

ultimately at the Brześć Synod of 1596, the union between the Orthodox Church and the Roman Catholic Church was supported by six Orthodox bishops with two being opposed, the bishops of Lwów and Przemyśl. They had gained the support of Konstanty Wasyl Ostrogski, a part of the Orthodox Church Brotherhoods, the monasteries, the nobility and the burghers.

Following the announcement of Church union, the Uniate Church became the only legal Ruthenian Church, while Orthodoxy was banned, although in practice still tolerated by the authorities.¹⁹⁷ The bishops of Lwów and Przemyśl preserved their positions. The heads of the Metropolitan diocese – Michał Rahoza and of Włodzimierz – Hipacy Pociąg, under whose jurisdiction the centres of Orthodoxy in the Podlasie Voivodeship remained, accepted the Union when a significant part of lay society along with the monasteries rejected it.¹⁹⁸ The decision as to whether to embrace or reject the Union was impacted in the case of individual parishes by numerous factors, and here first and foremost the attitude of the funders and priests. As Andrzej Buczyło has written: “In the subject literature a long time ago a farewell was said to the once binding view (...) that the Uniate Church was a Church without faithful created by its hierarchs, while the faithful and the ordinary clergy were to have sided *en masse* for Orthodoxy.”¹⁹⁹ Unfortunately we do not have many turn-of-the-seventeenth-century sources from the period of conflicts over the Church. Without doubt the Union of Brześć aroused resistance, while its opponents also in alliance with Protestants,²⁰⁰ managed if not in annulling it then at least returning the legal status previously enjoyed to Orthodoxy and regenerating its hierarchy.²⁰¹

Thanks to these efforts in the years 1607 and 1609 the Sejm constitutions recognised the Orthodox Church in the Commonwealth and its rights,²⁰² while Sigismund III Vasa promised that the spiritual positions within it would be granted to the Orthodox. However, following the death of the bishop of Przemyśl the king named Atanazy Krupecki in his place, who became a Uniate bishop.²⁰³ So at this time the non-Uniate Orthodox Church had in organisational terms but a solitary diocese (Lwów), while on the territory of the Podlasie Voivodeship the job of acting as leaders of those parishes that had chosen not to accept the Union was taken up by Zabłudów (in part Metropolitan), Bielsk and Drohiczyn (in part Włodzimierz) protopopes, who had been superiors in the respective monasteries there.²⁰⁴

The Orthodox both in the Grand Duchy of Lithuania as equally in the Crown continued to undertake actions aimed at improving the situation of their Church. In 1620 there took place an illegal attempt to regenerate the Orthodox Church structures in the Commonwealth as a result of the Patriarch of Constantinople’s envoy, Teofanes. In secret he ordained a metropolitan (Hiob Borecki) in Kijów as well as bishops for the dioceses of Przemyśl and Połock, Włodzimierz and Łuck, Chełm and Pińsk.²⁰⁵ This hierarchy was not recognised by the king, who referred to the tradition of bishops being appointed by the monarch. ‘The bishops nominated by Teofanes to the Włodzimierz-Brześć cathedral Leoncjusz Karpowicz and Izakiasz Kurcewicz did not take up the administration of their eparchies,’²⁰⁶ while the Podlasie Orthodox churches were to be subordinated to the Chełm-Belz bishop, Pasjusz Hipolitowicz, who resided at the monastery in Jabłeczna.²⁰⁷ Only after the death of Sigismund III Vasa did the legalisation of the Orthodox Church hierarchy occur and this from 1632 to 1635. The Orthodox Kijów metropolitan was resumed, who following the death of the Uniate Józef Welamin Rutski was to take over cathedral estates in the Kijów Voivodeship. After the death of the bishop of Przemyśl there

was also to take place the taking over of the Przemyśl bishopric. The remaining Orthodox bishoprics were Łuck and the newly created see of Mstislaw (Belarus).²⁰⁸ In order to adhere to the customs and sixteenth-century practices new bishops chosen by the king were ordained.²⁰⁹ These decisions were ratified by the Sejm of 1635. At the same time the Uniates were confirmed as having their own Kijów metropolitan with the bishoprics of Połock, Włodzimierz, Chełm, Pińsk and Smoleńsk, giving them in practice seven bishoprics (with the additionally held bishopric of Przemyśl). However, as a result of activities, legal and illegal restricting the Orthodox Church post 1596, the Orthodox metropolitan consisted of five dioceses: those of the Kijów Orthodox metropolitan, Lwów, Łuck, Przemyśl and Mścisław. In 1649 the Chełm bishopric was also added to the Orthodox metropolitan, while in 1650 the diocese of Chernikiv was reinstated.²¹⁰

Consequently from 1635 there existed two Kijów metropolitans: an Orthodox one and a Uniate. The relegalised Orthodox Church, again recognised by the monarch, was characterised in its functioning, and here particularly in the first half of the seventeenth century, under the governance of Metropolitan Peter Mohyła, by its strivings for organisational reform and attempts at a religious-cultural renewal within the faithful. However, this was to occur in highly unfavourable conditions and in no way prevented further Orthodox centres joining the Uniates.²¹¹

Map 1. Orthodox parish seats in the Podlasie Voivodeship in the second half of the 16th century

III.2.2b.8 PROTESTANT COMMUNITIES AND PARISHES

Piotr Guzowski, Marzena Liedke

The genesis and conditions for the development of the Reformation in Podlasie

The history of Protestant churches (*zbórs*) in the Podlasie Voivodeship, despite its inclusion in the Crown in 1569, is connected to the Reformation history in the Grand Duchy of Lithuania itself. For the new denominations were supported in Podlasie by the Lithuanian noble families that had estates and properties also in the area.

‘Heretical’ ideas had permeated into the Grand Duchy of Lithuania by various routes already in the fifteenth century. Then known were probably the concepts of Jan Hus,¹ and from the east when the Judaizers and Metropolitan Zosimus were exposed, who shared their views, there commenced a wave of persecution of members of the movement who fled to the borders of the Grand Duchy of Lithuania and with the same propagated their views.²

In the first half of the sixteenth century initially in its Lutheran division, the ‘western’ Reformation reached the Polish and Lithuanian lands. Luther’s views penetrated through the Lithuanian-Prussian and Lithuanian-Livonian border³ and equally as a result of, among others, the Lithuanian Franciscans: Franciszek Litwin, Wojciech Kozabovius, Stanisław Rapagellanus as well as the lawyer Abraham Kulwieć, not to mention Jan Tertyłowicz Batocki.⁴ The initial adherents of the Reformation had emigrated, most often to nearby Königsberg. However, relatively quickly, chiefly as a result of educational tours of university centres covered by the Reformation within the territory of Germany, but also Königsberg, possibly because of the involvement of preceptors – foreigners, many of the Lithuanian nobles had encountered these religious innovations: initially in its Lutheran guise. However in the Crown, and through contact with it also in the Grand Duchy of Lithuania, greater popularity amongst the nobility and landed nobility was slowly being enjoyed by Calvinism, although adherents of Lutheranism were still to be found in some magnate houses and amongst several rich noble families.⁵ However, these did not have their estates and holdings in Podlasie. Consequently in the sixteenth century there were no Lutheran communities located in the area – leading protectors of the Reformation were no longer interested in Lutheranism because there were no large settlements with a German patriciate that willingly

¹ Their spread was connected with Zygmunt Korybutowicz’s involvement in the struggle for the Czech throne – J. Wolff, *Kniaziowie litewsko – ruscy od końca XIV w.*, Warsaw 1895, p. 179; E. adopted the teachings as they had in Wilno and Kowno.⁶ However, and here with time on the magnate estates, particularly the Radziwiłłs of Birże, it was possible for Lutheran churches and communities to function, for example at Kiejdany (1640). Moreover, in opposition to reformist evangelicals, the Lithuanian Lutherans did not create an organised Church as such. 'In the seventeenth century they did not draw in new adherents from noble circles. While a significant part of the Lutheran nobility in the Grand Duchy of Lithuania, and here chiefly of a Livonian provenance, converted at this time to Catholicism.'⁷

The return from exile of Jan Łaski the Younger (John à Lasco), a leading Polish religious reformer of the mid sixteenth century, meant that within the Polish Reformation camp and consequently, as we have noted earlier, also within the Lithuanian, initially victorious were the views of John Calvin.⁸ However shortly the ideas of the Polish Brethren started to take hold of a part of the magnates and nobles, that is the Anti-Trinitarians called by their opponents Arians, who in 1562 and in subsequent years left the Calvinist Church, creating their own denomination. Therefore, thanks to magnate protection, within the area of interest to us Calvinists and Anti-Trinitarians had their own temples and communities.

The roots of Reformation ideas in the Grand Duchy of Lithuania are traditionally connected with the Radziwiłł family. The first Lithuanian magnate to adopt Lutheran ideas, was, most probably, Jan Radziwiłł (*incisor Lituaniae*), while Lutheranism initially interested his brother, Mikołaj Radziwiłł known as 'Czarny' (the Black). A similar situation was the case in some Lithuanian noble families. In 1553 'Czarny' called into being the first community at the castle in Brześć Litewski, far from Wilno – the centre of Catholicism in Lithuania.⁹ He turned to Calvinism and consolidated this denomination on his estates. This was also adopted by a significant number of noble families who had started their connection with the Reformation from Lutheranism, like the Talwosz or Billewicz families (later they were faithful mainstays of the Helvetic Confession). However, 'Czarny' later was to succumb to anti-Trinitarian views and following the schism of Lesser Poland Protestantism, splitting into the greater Congregation (Calvinist) and lesser ('anti-Trinitarian'). He favoured an openness to the latter even removing Calvinist ministers from the congregations on his estates,¹⁰ although he never did officially renounce Calvinism as such. Yet when he died prematurely in 1565, his properties were inherited by his sons who converted to Catholicism. The Reformation continued to be supported by Mikołaj Radziwiłł 'Rudy' (the Red), 'Czarny's' cousin. Red founded congregations and passionately supported reformist evangelism,¹¹ a policy continued by his heirs, particularly his son Krzysztof the 'Piorun' (the Thunderbolt), his grandson of the same name as well as his great grandsons: Janusz (the son of Krzysztof II) and Bogusław (the son of Janusz, the Wilno castellan).

Related to the Radziwiłł family were the Kiszaków family. Anna of Kiszaków was the mother of Mikołaj and Jan Radziwiłł, while Stanisław Kiszka, the Vitebsk voivode, an adherent of Calvinism, married Anna, the daughter of the last male representative of the Radziwiłł line in Goniądz and Medele, Jan. Anna was to soon become widowed and on her estates, as well as those of her children's, which she managed, she actively supported Calvinism ('under the reign of August His Majesty when a Catholic priest died she passed on the parishes to a dozen or so Evangelist preachers'¹²), and when she became interested in the anti-Trinitarian doctrine she zealously promoted it. Her son Jan was to exhibit a similar religious attitude, the *incisor Lituaniae*, and subsequently Wilno castellan and general

⁶ Lutheran communities appeared equally in certain settlements located on the borderlands of the Duchy of Prussia and Livonia; *ibid*, pp. 102–110. The first Lutheran churches were founded in, for example, Żejmely, Dziewałtów, Mejszagoła, Rykonty, Taurogi, Szkudy, Szawkiany, Skirstymoń, Ejragoła, Gojcieniszki, Wolanów and Wiszniewo.

Samogitia starost.¹³ However, he was to marry Elżbieta Ortrogska a Catholic (on her mother's side). He died without heirs in 1592, while the estate bequeathed to his wife was transferred to her subsequent husband, Krzysztof Radziwiłł, the Wilno voivode and grand Lithuanian hetman. He, as the chief guardian of reformed evangelists in the Grand Duchy of Lithuania, re-Calvinised the lands. At a later stage shelter was to be found on Radziwiłł estates for the persecuted anti-Trinitarians (see below). In turn his brother Stanisław Kiszka converted to Catholicism and removed the heretical anti-Trinitarianism from his holdings and estates.¹⁴

Consequently the religious activity of magnates was to have a substantial significance for the creation of Protestant parishes, here chiefly Calvinist and anti-Trinitarian. They commenced their work in buildings confiscated from Catholics or the Orthodox, though equally they were founded *in cruda radice*: 'The example of Mikołaj 'Czarny' Radziwiłł [...] forced all into almost blind emulation. The Lithuanian nobility [...] rejected in droves the religion of their fathers both the Catholic and Greek and introduced into their estates and royal leased lands Calvinism, forming new parishes, but also setting up parishes in the churches of Catholics and the Orthodox.'¹⁵ In time founding work based on the magnate example was also carried out in Podlasie by the middle nobility, applying the principle of *cuius regio eius religio*.¹⁶

Reformed Church

The Lithuanian Reformed Church (*Jednota Litewska*) was one of the three the Reformed Churches in the Polish-Lithuanian Commonwealth.¹⁷ It was synodical-presbyterian in structure with a provincial synod as the main organ of authority as well as a huge role being played by the secular patrons of the various churches and of the Church as a whole.¹⁸ Administratively the Lithuanian Reformed Church was divided into districts, and these in turn into parishes. The first two districts were Wilno and Podlasie (known also at the beginning of the seventeenth century as Brześć¹⁹) were formed around 1560. The first was headed by Mikołaj Wędrogowski, while the second administered by Szymon Zacjusz of Proszowice,²⁰ while in the seventeenth century there functioned in addition Nowogódek, Ruthenian, Zawilejski and Samogitian. A unique organisational feature of the Lithuanian Church was the possibility of change in the district affiliation of individual parishes.²¹ It depended on the superintendent's state of health or if the district had too great of an expanse; thus creating difficulties for the superintendents to

effectively reach the most distant parishes or the administrators of these organisational units, resulting in affiliative alterations.²²

Decisions over such changes were the realm of the provincial synod as the main organ of authority for the Lithuanian Reformed Church. It convened once a year and took decisions on matters of faith, relations with other Reformed Churches, education and schooling, religious publications, clerical discipline, the moral matters of the faithful etc.²³ A lot of room during sessions was taken up by the legal and financial matters of the Lithuanian Church and its individual congregations.²⁴ The course of the synod was in line with protocol and minutes. Participation at sessions saw the secular patrons of the community attend, both nobility and burgher in origin as well as clergymen together with their superintendents.

The position held by the superintendents is difficult to compare to, for example, that of bishops in the Catholic or Orthodox Churches. Firstly, the Lithuanian Reformed Church structure was not episcopal; secondly, although they had a lot of responsibilities and administrative-disciplinary powers, they did not enjoy the privileges *per se* of the Catholic and Orthodox hierarchies. Finally, they did not gain from their benefices such notable material benefits. They were financially dependent, as with the entire Church, on their secular patrons. Their remunerations were more significant than was the case for many other ministers as a result of better off parishes, they were less often moved from parish to parish and consequently could count on a degree of stability but they paid for this by having extensive duties and obligations. Besides the standard ministry to be performed in their parishes, they were responsible for calling district synods at which more local matters could be decided on than those dealt with at provincial synod level (although in practice the latter also debated on matters, such as the equipping and repair work of individual churches as well as the disciplining of their clergymen), time consuming visits to the parishes under their jurisdiction and the supervising of their ministers.²⁵ At the beginning of the seventeenth century they were also responsible for the registering of parishes in the districts under their jurisdiction as well as the ministers and finances of particular churches. Formally all those in charge of districts were equal to each other. Only in 1636 as a result of introducing improvements in district supervision was the office of senior superintendent introduced.²⁶ This position was to be withdrawn together with the death of the first holder of the office,²⁷ and only to be reinstated in 1832.²⁸

Their subordinates, the ministers, were obliged to live by their parishes,²⁹ and were first and foremost responsible for the spiritual well being of the faithful, ensuring, in some of the parishes, functioning of parish schools, the maintaining of Church and parish buildings in good repair³⁰ and providing their detailed inventory prior to being moved to another parish.³¹ Their responsibilities involved attending provincial and district synod³² and participating in the meeting sessions of individual parishes at which both the patrons and faithful of a given congregation sat and dealt with their affairs. In the sixteenth century pastors did not yet conduct baptismal registers; the first to appear in the Grand Duchy of Lithuania was in the first half of the next century, although such a practice had sporadically been noted within the territory of the Crown already at the end of the sixteenth century.³³ It happened that ministers of limited income would work on the land or take on duties to supplement

their salary and improve their financial situation. This was not always fitting work for a minister.³⁴ The synods attempted to prevent such situations by attempting to find solutions to the financial problems of the clergy.³⁵

Remuneration for both superintendents and pastors was, traditionally, land, though also they were guaranteed payment in kind. One needs to add, however, that occasionally they had to support a teacher or to pay for repairs to congregation buildings from the salary given. The size of the endowments obviously varied much and were not necessarily sufficient for a decent life for the minister and his family (for both pastors and the superintendents recruited from them could marry). In general the better off parishes went to deserving pastors and superintendents who had served their time as such, though it also happened that certain clergymen almost immediately enjoyed a firm financial footing following being ordained and obtained the favours of a well-to-do patron, who would then ask the synod for a mission for his candidate for the parish maintained by him.

The dependence on secular benefactors meant that along with changes in the patron's denomination, or the passing on of estates to non-Calvinist heirs, those parishes that had come into being in former Catholic churches became the objects of court dispute and often the Unity ended up losing these properties. A more stable situation existed with regard to those that had been founded *in cruda radice*, immediately as Calvinist congregations, and where the Reformed Church possessed their charters and founding documents. For the Lithuanian Church had obtained legal personage, while its legal attorney defending the interests of the community was a congregational actor chosen from the ranks of noble patrons.

All of the congregations that functioned and had been founded in Podlasie in the sixteenth century belonged to the Podlasie district (this was to function until 1799), covering the territories making up the voivodeship in the years 1513–1520. Despite in 1566 the separation from it of the Brześć, Kamieniec and Kobryń lands, and subsequently the addition of the Bielsk, Drohiczyn and Mielnik lands to the Polish Crown in 1569, the Podlasie district covered the congregations from the territory of the former voivodeship already situated on both sides of the border.³⁶ After 1569 they lay within the Crown territories of the Podlasie Voivodeship, and within the Lithuanian Voivodeships of Brześć Litewski, Nowogródek and Troki. These have been the subject of several separate studies,³⁷ while the subject of the Reformation in Podlasie has also been explored by the authors of the most important works on the history of Reformation denominations in the Grand Duchy of Lithuania.³⁸ Usually both general studies,³⁹ as equally monographs have concentrated on the later period.⁴⁰ This is the result of not

³⁴ For example, conducting activities designed to obtain the best living at the cost of one's colleagues; see, among others, LMAVB, sign. 40-1136, f. 115.

³⁵ *Ibidem*, f. 149.

³⁶ Concrete information on the territorial extent of the district, which here we only have at our disposal for the beginning of the seventeenth century – that is for the period from which synodal acts have been preserved, shows that the majority of the district communities were located on the Lithuanian side. Regulation in this matter occurred in 1614 (“to the Brześć superintendent belonged: Brześć, Grodno, Pińsk, Słonim”, and so did the Church communities from the area of these districts (*powiats*)) and in 1627 when the communities in Sielec, Pietuchów and Świsłocz were joined to these; J. Grodzki, *Czynniki wpływające na organizację dystryktu podlaskiego Jednoty Litewskiej w pierwszej połowie XVII w.*, [in:] *Granice i pogranicza*, ed. P. Guzowski, M. Liedke, W. Walczak, Białystok 2019, p. 51.

only the dynamic development of the reformist evangelicals during the course of the first half of the seventeenth century but also because of the much richer source base available. An especial role was played out in this by the acts of the provincial synods of the Lithuanian Unity, which took place annually in Wilno and made decisions on, among other things, the affiliation of congregations to particular districts (chiefly dependent on the health condition and the scope of responsibilities befalling individual superintendents, that is the preachers that stood at the head of the districts). The oldest preserved sources of this type are from the years 1611–1625,⁴¹ therein documenting the organisational structures of the evangelist-reformists from a period exceeding the scope of the AHP. The district synodical acts for this district have not survived. Consequently the materials connected with the activities of secular players, particularly the magnate patrons of the congregations are especially valuable, of individuals who in several cases transformed churches and communities initially organised on Calvinist lines into anti-Trinitarian ones.

Reformed congregations

A congregation (*zbór*) was as equally the church as the community of the faithful that attended it. On the territory of the Bielsk, Drohiczyn and Mielnik lands nine Calvinist congregations were founded in the second half of the sixteenth century, of which three in time were to be transformed into anti-Trinitarian parishes, commonly referred to as ‘Arians’. As actual locations for the functioning of Calvinist congregations within the Drohiczyn land the following were cited: Miedzna, Mordy, Węgrów, Sokołów, Siemiatycze and Suchożebry, in the Mielnik land: Górki and Rusków, and in the Bielsk land: Waniewo.

The appearance of the first Protestant congregations in Podlasie is connected with the already mentioned activities of Mikołaj Radziwiłł ‘Czarny’, who, following the founding of a Protestant church in the Grand Duchy of Lithuania at Brześć Litewski (1552–1553),⁴² removed the Catholic priest from the church at Mordy, and in his place installed an Evangelist preacher. In 1563 a synod was held in Mordy which in character was already anti-Trinitarian.⁴³

In 1558 Anna née Radziwiłł Kiszczyna, already as a widow, removed Walenty Suchodolski, a Catholic priest from the church and presbytery at Węgrów and brought in Evangelist clergymen; an act which brought with it a legal dispute of many years standing.⁴⁴ The first preacher of the Węgrów congregation was Piotr of Goniądz, also an adherent of the anti-Trinitarian doctrine⁴⁵ and it is taken that from around 1563 the church started to be anti-Trinitarian in character.⁴⁶ Shortly its patron was to become Jan Kiszka, Anna’s son. Following his death in 1592 the Węgrów congregation was again to take on a Calvinist character and here under the influence of the subsequent husband of Elżbieta Ostrogska, Krzysztof Radziwiłł ‘Piorun’ (the Thunderbolt). A legal dispute over the church building and its estates was to rage with the Catholic Church, with the church itself remaining shut.⁴⁷ In 1596 an agreement was reached with the Łuck Bishop Bernard Maciejowski, on the strength of which the land belonging to the parish church was returned to the Catholics,⁴⁸ but the church itself was to remain Protestant until around the year 1630. Then it passed into the hands of the Roman-Catholic parish, while the reformist Evangelists received a new wooden church endowed for by Krzysztof II Radziwiłł.⁴⁹

Anna Kiszczyna after 1563 also took possession of the Roman Catholic church in Sokołów, forming an evangelist congregation. More than likely already after a lengthy period of holding the family estates on the part of her son, Jan Kiszka, the church became anti-Trinitarian and was to remain so up until Jan Kiszka's death in 1592.⁵⁰ In this same year there was to appear in the sources a Roman Catholic parish priest at Sokołów (and Węgrów) – Szymon of Urzędów.⁵¹

Around 1560 equally the Roman-Catholic church in Ruszków was transformed into an Evangelist congregation by its owner, Katarzyna Raczkowa, the widow of Stanisław Raczka, the parliamentary representative for the Mielnik land. Although by 1614 there is word of its collapse,⁵² it was to function as a Calvinist church until about 1619, when Catholic intromission and reconciliation with the Church occurred.⁵³

In Miedzna the local Roman Catholic church was to have been handed over to the evangelists by the town's owner, Jan Wodyński, in the second half of the sixteenth century, the future voivode for Podlasie. This was presumably to have happened after 1560 but already in the 1580s the sources note a return of Catholic parish priests brought in by Wodyński and his mother, Katarzyna née Kosiński, *secundo voto* Stanisławow Kryska.⁵⁴

We are able to say somewhat more about the congregation at Górki. According to Tomasz Dobrowolski, the Roman Catholic parish here was changed into a Calvinist congregation by Stanisław Niemira, the Ostromęczyn owner.⁵⁵ According to register of the unpaid taxation on the part of the parish priests of the Łuck diocese and here for the years 1567–1568 there was noted in the entry for Górki the annotation 'hereticus'.⁵⁶ The wife of Stanisław Niemira was Jadwiga Firlejówna, the daughter of the Lublin and Ruthenian voivode Piotr Firlej, who had earlier acted as guardian for her future husband then a minor. Although Piotr Firlej himself was to have died as a Catholic, his sons converted to Calvinism and were to become powerful Protestant protectors in the lands of Lesser Poland.⁵⁷ Possibly Piotr Firlej's daughter also belonged to the Reformed community. The parish was to thus function until at least 1588.⁵⁸

In older subject literature it is accepted that the Calvinist congregation founded by Krzysztof Radziwiłł 'Piorun' functioned in Siemiatycze from the year 1588.⁵⁹ However, according to Aneta Średzińska, a Calvinist preacher was in residence as early as 1565.⁶⁰ His presence was to have resulted from the transformation of the parish church into a Protestant congregation by the Olelkowicz dukes.⁶¹ At that time the Roman Catholic parish priest Brzozowski became pastor and was sued by the Janów episcopal consistory for illegally taking possession of the parish.⁶² In 1579 again a Roman Catholic priest was to appear in Siemiatycze – Father Bartłomiej Lazarowicz.⁶³ The Protestant community had presumably ceased to exist by then and before the town found itself in the possession of the evangelist Krzysztof Radziwiłł 'Piorun' or Lew Sapięha, who had married his daughter, and having been born into Orthodoxy, was a magnate with a reformist episode in his life characteristic for the epoch, though one finally to be a passionate Catholic. Consequently, a second verification of the notion ventured by Józef Łukasiewicz in the subject literature is required and here with regard to the Protestant commu-

nity at Siemiatycze at the end of the sixteenth century,⁶⁴ and in particular the acts of the synod of the Łuck diocese of 1589 mentioning the local parish as among others filled and functioning within the framework of the Mielnik deanery.⁶⁵

A register of unpaid Lithuanian taxation for the years 1567–1568 informs one of two Protestant churches where the term ‘hereticus’ designated the parishes at Suchożebry in the Drohiczyn land and Waniewo in the Bielsk land.⁶⁶ In 1565 a court case was held before the Janów consistory against ‘Alberto heretico et occupatore ecclesie in Suchożebry’.⁶⁷ Possibly the Catholic church was changed into a Protestant community by Krzysztof Olędzki, the Brańsk starosta and owner of the settlement, or by his brother Janusz, who was acting as guardian for the children of the deceased Krzysztof and was the heir to the office of Brańsk alderman. Janusz was to found the Lithuanian line of the Olędzki family, evangelist reformers who acted as guardians and protectors of the Protestant congregations in the Grand Duchy of Lithuania and here still in the seventeenth century.⁶⁸

In Waniewo, brought by Elżbieta Radziwiłłówna to her marriage with Hieronim Sieniawski, a conversion of the Catholic church to a Protestant congregation took place around the year 1559. At this time a dispute in the Janów consistory with the owners over the control of the Church benefice raged, one which was to result in Father Piotr Milewski resigning from his position at the presbytery.⁶⁹ Hieronim Sieniawski, then the Halocz chamberlain, was a protector of Protestantism (although he was to die as a Catholic).⁷⁰ Presumably the Reformed congregation functioned up until the moment Waniewo was sold to Jerzy Olekiewicz or was given in perpetuity through his widow – Katarzyna Tęczyńska.⁷¹

Reformed evangelism turned out to be a denomination that had developed a stable administrative and organisational structure as well as having obtained a legal personality. Therefore despite the relatively strong support for anti-Trinitarianism in the second half of the sixteenth century on the part of some of the Lithuanian nobility, and here also in Podlasie, and later the Counter-Reformation steps on the part of the Roman Catholic Church,⁷² new Reformed congregations and here chiefly *in cruda radice* arose within the territory subordinate to the Lithuanian Church towards the end of the sixteenth and in the first half of the seventeenth century. These were also located in the Podlasie district, but the majority of new congregations of this district arose in territories situated within the borders of the Grand Duchy of Lithuania itself. And so in the second half of the sixteenth century a Calvinist endowment was carried out in Sidra in the Grodno district of the Troki Voivodeship (according to J. Łukaszewicz thanks to the Naruszewicz or Hołowczyński family,⁷³ at present ascribed to Ostafi Wołłowicz, as results from his will⁷⁴). In 1589 Krzysztof Radziwiłł ‘Piorun’ founded the Evangelist congregation in Sielec (the Brześć district of the Brześć Litewski Voivodeship), which was to function until the mid eighteenth century).⁷⁵ Congregations were also situated in Świsłocz (Wołkowysk district, Nowogródek Voivodeship), Jamno, Niepokojczyce (both situated in the Brześć district in the Brześć Litewski Voivodeship), Nurzec (Bielsk district, Brześć Litewski Voivodeship), (where the endowments came from the noble families of the Piekarski and Kochlewski lines), and also Pietuchów, that is the later Izabelin (Wołkowysk district, Nowogródek Voivodeship), or in 1608 in Zabłudów (Grodno district, Troki Voivodeship),⁷⁶ where in the seventeenth century and at the beginning of the eighteenth century resided the Podlasie superintendents.

The subject literature points also to Dokudów (Brześć district in the Brześć Litewski Voivodeship), Nurzec (Bielsk district, Brześć Litewski Voivodeship), Nurzec (Bielsk district, Brześć Litewski Voivodeship), which functioned until around 1596.⁷⁷ This was initially a branch of the parish church in Biała, which converted into a Calvinist congregation in around 1555, and together with it the church at Dokudów became a Protestant church. Both churches presumably functioned for some time as Arian centres of worship and here under the patronage of Mikołaj Radziwiłł ‘Czarny’,⁷⁸ while in the day of Mikołaj Krzysztof ‘Sierotka’ (the Orphan) Radziwiłł they were to be turned into Roman Catholic places of worship. This congregation was mistaken in the subject literature with a Calvinist congregation functioning in the seventeenth century and at another Dokudów situated that was situated in the Lida district of the Wilno Voivodeship, initially within the boundaries of the Wilno district, while from 1653 in that of Nowogródek.⁷⁹

However, in the Crown part of the Podlasie district there came into existence, although only at the beginning of the seventeenth century, a Calvinist congregation at Orla (around 1615–1617) one important from the point of view of the integration of the Reformed Churches in the Commonwealth.⁸⁰ For it is worth noting that the Podlasie district of the Lithuanian Church, and in particular Radziwiłł (and royal) Orla fulfilled the role of being a unifying force for all the three Calvinist Churches of the Commonwealth. And it was to be at this centre as the most conveniently situated that the general synods of Calvinist clergy and secular representatives from Lesser Poland, Greater Poland and the Grand Duchy of Lithuania would convene and devote themselves to the most important doctrinal, organisational and political matters. As was the case in 1644 over the matter advanced by Władysław IV Waza for 1645 of the so-called *colloquium charitativum* that was meant to bring about understanding and tolerance amongst the Christian denominations of the Commonwealth.

The elders of the Podlasie district in the sixteenth century were – the earlier mentioned Szymon Zacjusz, who moved from Wilno (and subsequently was redeployed to the deserted Cracow congregation) and Mikołaj Trzciniński, who resided in Brześć and died in 1614.⁸¹ Tadeusz Wyszomirski has written that the office of Podlasie superintendent was held by Maciej Krowicki, who had his seat at Węgrów,⁸² but here according to Józef Łukaszewicz, this clergyman ‘at the Mordy synod of 1563 was selected an elder of the Socyn congregations in Podlasie.’⁸³ He could not therefore be a Calvinist superintendent. Podlasie administrators did not have a designated permanent seat: ‘The normal home for elders [superintendents] of the Podlasie district was in former times Siedlce [here matters refer to Sielec in the Brześć district of the Brześć Litewski Voivodeship – P.G. and M.L.⁸⁴], Węgrów,⁸⁵ and later Zabłudów’,⁸⁶ although elsewhere this author has also enumerated Brześć (as Mikołaj Trzciniński’s place of residence).⁸⁷

Lesser congregation

The return of Jan Łaski the Younger to the country in 1556 was to significantly impact on a crystallising of Protestantism within the Calvinist spirit in Lesser Poland and the Grand Duchy of Lithuania; though shortly as a result of the Italian anti-Trinitarians including Jerzy Blandrata (Giovanni Biandrata), many ministers as equally their wealthy protectors started to move towards anti-Trinitarian views. This was to be the concern of the already mentioned Mikołaj Radziwiłł ‘Czarny’, Jan Kiszka, as well as, and here with influence on Białystok estates (see further) Ostafi Wołłowicz, the vice-chancellor of the Grand Duchy of Lithuania. In 1562 a schism occurred resulting in the creation from a single congregation of the so-called Lesser congregation (*Zbór Mniejszy*), assembling the adherents of anti-Trinitarianism. At the synod held in Pińczów in 1563 this state of affairs was ratified. Although none of the already mentioned magnates officially went over to the side of this denomination, the support they provided the anti-Trinitarians depleted the network of Calvinist congregations. We do not know as much about the organisational structure of Unitarianism in Poland as we do in the case of reformist Evangelists because the synodical acts of the Unitarians, equally those from the seventeenth century, were lost and we know of them only from descriptions and information gleaned from various sources, with Stanisław Szczotka in the inter-war years providing an approximation of them.⁸⁸ We know that *Ecclesia Minor* was not divided into districts, but that the Polish Brethren conducted their synods on, according to S. Szczotka, principles modelled upon the Calvinist. Hence called to session were general synods and provincial ones with the participation of laymen as well as the holding of councils at which only the clergy attended.

General synods met once a year. These were the equivalents of the Calvinist provincial synods and involved themselves in similar matters, that is theological questions, the expansion and extension of the congregation network as well as its maintenance, issues of education, publication, the ordaining of new ministers, matters of the faithful’s morality, care for orphans and widows etc.⁸⁹ The provincial synods, the equivalent of the Calvinist district ones, involved themselves in matters more local in nature, while the synods with issues of faith and theology although they did also address administrative-economic questions.⁹⁰ The meetings of the synods were minuted and protocoled. The anti-Trinitarians had their own network of parishes, while the responsibilities of ministers included the teaching of the fundamentals of the faith, the carrying out of the two sacraments of baptism and communion, and the holding of weddings. Ministers were helped in the running of their parishes by deacons as well as secular elders, looking after the finances of the congregation and acting charitably.⁹¹

After 1658, having been accused of collaboration with the Swedes, the anti-Trinitarians were forced to leave the country or convert back to Catholicism, although tolerated, and presumably fictionally, a return to the adoption of Calvinism. The latter was taken up the most willingly,⁹² although the authorities of the Lithuanian Unity came out strongly against the anti-Trinitarian ideology. For the years 1658–1662 they were deemed illegal as a denominational congregation/ community in the Commonwealth (the last synod being held in 1662 and most probably in Zabłudów⁹³).

Anti-Trinitarian congregations

The loss of Unitarian synodical acts (see earlier) has also hampered attempts to create a picture as to the full extent of the congregation network belonging to this denomination, forcing historians sometimes to mere speculation as is the case with the supposed anti-Trinitarian church in Białystok (see further). Consequently, in a similar way to Calvinist congregations, researchers utilise archives and

works on the large landed estates or, more generally, about the history of the Reformation.⁹⁴ Paradoxically, in contrast to the Arians' social principles, their churches would not have been able to function without the material support of wealthy and influential protectors.

On the map as an anti-Trinitarian congregation has been marked Suraż in the Bielsk land endowed by the Suraż starosta as well as Mordy, Sokołów and Węgrów in the Drohiczyn land, and these on the estates of the Kiszka and Radziwiłł families.

Marceli Kosman has written about Mikołaj Radziwiłł 'Czarny', that he was a child 'of the era of humanism, of a generation searching for the genuine interpretation of faith, hence his doubts and ultimate adoption of the evocative arguments of anti-Trinitarianism.'⁹⁵ He therefore led to a schism amongst Lithuanian Evangelists. One of the effects being the transformation, in around 1563, of the congregation at Mordy into an Unitarian church. This was to function up until the moment the settlement was taken over by the Catholic Ciecierski family in 1571.⁹⁶

Unitarianism was also adopted by Anna Kiszczyna née Radziwiłł, who transformed evangelical congregations into anti-Trinitarian ones – first in Lithuanian Kiejdany, and then in Węgrów.⁹⁷ Her son, Jan Kiszka also established there a printing press around the year 1570, while the town itself became the location for regular Unitarian synods (beginning from 1565).⁹⁸ Janusz Tazbir has written that 'Despite purporting Unitarian views as well as supporting Arians, Kiszka never formally joined the congregation: for he was never immersed.'⁹⁹ Conflicts with the leading representatives of the radical Unitarian current, with Piotr of Goniądz and Szymonem Budny, were not to hinder him from conveying to his heirs in his last will and testament that they maintained anti-Trinitarian ministries on his estates.¹⁰⁰ In the case of Węgrów in 1592, following the death of Jan Kiszka, the congregation were to find themselves in the hands of Calvinist clergy (Węgrów was situated on the estates of the Calvinist Radziwiłł family), while the parish at Sokołów – under Catholic priests.¹⁰¹

The Unitarian congregation in Suraż was founded by Paweł Orzechowski following his taking up of office as Suraż starost in 1590. The patron followed this example on his own estates in the Lublin Voivodeship, in the small town of Piaski and the village of Krupe. As opposed to the churches on the family estate, ones looked after following Paweł's death (in 1612) by his son Stanisław,¹⁰² the Arian Suraż congregation 'was however ephemeral and collapsed, more than likely after its founder's death'¹⁰³ although it was presumably still functioning in 1618.¹⁰⁴

It is worth noting the possible existence of an Arian congregation in Ciechanowiec that belonged to the Kiszka family. For Aneta Średzińska has drawn attention to the fact that according to *Gazeta Białostocka* of 1913, up until the beginning of the twentieth century there were preserved, in the magnate part of the town, fragments of the walls of a building that was referred to by the local inhabitants as the 'Arian church' or simply 'the Arian'.¹⁰⁵ On the other hand, it follows to note that the Kiszka line succeeding in line in Ciechanowiec (as opposed to the line succeeding in Węgrów) for the entirety remained Catholic.

The subject literature also recalls an anti-Trinitarian congregation endowed in the 1560s by Jan Kiszka at Kostrów near Węgrów, which was to have ceased to have existed by the end of that century following the death of its founder and funder.¹⁰⁶ Although, we do not know of any localisation with such a time in proximity to the town, Henryk Merczyng has, however, located a congregation in another Kostrów, this being situated in the district of Pińsk in the Brześć Litewski Voivodeship.¹⁰⁷

However there is in turn no certainty as to the confirmed functioning of a Calvinist or anti-Trinitarian congregation in Białystok, which from 1569 was to find itself within the Crown. That a church of another faith was to have existed was to have found credence in the fact that the heir to Piotr Wiesiołowski the elder, equally Piotr by name, the son of Katarzyna née Wołłowicz, was under the protection of his uncle the vice-chancellor of the Grand Duchy of Lithuania, Ostafi Wołłowicz. This Lithuanian magnate had rejected Orthodoxy in favour of Calvinism, and had subsequently having become interested in the ideology of the Polish Brethren strongly supported both Evangelists and anti-Trinitarians. In 1556 he took over the guardianship of his sister's orphaned children from her marriage with Piotr Wiesiołowski, strongly impacting on their education and upbringing, sending Jan and Piotr to study at the Protestant universities in Königsberg and Tübingen.¹⁰⁸ It is conjectured that such an education and influence exerted by this anti-Trinitarian supporting uncle could have resulted in consent being granted to Calvinists or anti-Trinitarians to take from the Catholics this wooden church.¹⁰⁹ On the other hand, Piotr Wiesiołowski the younger was to have converted from Calvinism to Catholicism in 1579, more than likely as a result of his marriage to Zofia née Lubomirski,¹¹⁰ while in 1581 in Białystok there was commenced the construction of a new wooden Catholic church.¹¹¹ Janusz Tazbir has considered it probable that the Calvinist congregation only functioned between the years 1591 and 1617, when a stone Catholic church was erected, but this fact has not found its confirmation in the sources.¹¹² A sound argument for the possibility of such a congregation existing at the turn of the seventeenth century or earlier is a fragment of the charter (privilege) granted by Jan Kazimierz for the year 1661 in which the living of the Białystok parish is returned from before the period of 'deoccupationis ab hereticis', as well as stating that the founders Piotr Wiesiołowski and his son Krzysztof erected and built a church of brick 'post vindicationem eius de manibus hereticorum'.¹¹³ Józef Maroszek is of the view that the need to return the living resulted from the occupation of the settlement in 1655 by the Swedes, and later the Russians, and not by Calvinists at an earlier period.¹¹⁴ Also Wiesław Wróbel points to the noting in the sources of a Catholic parish priest Maciej Faszczka for the years 1599–1604.¹¹⁵ Equally the absence of mentions about the Białystok Calvinist congregation in the oldest preserved (from 1611) acts of the synods of the Lithuanian Unity suggests that if in point of fact there did exist for a time a Protestant church in Białystok, then it is rather during the period 'of Piotr Wiesiołowski's infancy, or his childhood years when he adhered to Calvinism' as Tadeusz Wasilewski has written,¹¹⁶ that is before the year 1579.

The anti-Trinitarians were to have settled later, already in the first half of the seventeenth century, in the part of Białystok belonging at the time to the Grand Duchy of Lithuania, that is in Dojlidy (leased from 1629 by Samuel Przykowski, an anti-Trinitarian), an estate of the Zabłudów demesne belonging to the Radziwiłł family as well as in Zabłudów itself. Presumably, with the permission of Krzysztof Radziwiłł, services took place there in private houses.¹¹⁷ There were also leases of Radziwiłł estates in the parts belonging to the Crown. Despite the condemnation of the anti-Trinitarian ideology by the authorities of the Lithuanian Reformed Church, the wealthiest of its secular patrons supported the settlement of Unitarians, although in 1662, not wanting to be accused of offering them protection, Bogusław Radziwiłł ordered them to leave his estates and to move to Prussia.¹¹⁸

Hence in Podlasie in the second half of the sixteenth century it was chiefly Calvinism and anti-Trinitarianism from amongst the Protestant denominations that took root, and consequently it was only

Calvinist and anti-Trinitarian congregations that came into being. The latter generally did not function for long at all. Some churches and congregations under the influence of patrons sympathising with anti-Trinitarianism or Calvinism changed their denominational affiliation, and even several times. A part of them came into being on the basis of Catholic churches while others were to be founded *in cruda radice*. These were the endowments of magnates and the middle nobility.

ANNEX

LIST OF PROTESTANT RELIGIOUS COMMUNITIES IN THE PODLASIE VOIVODESHIP

The listing shows the state of development of Protestant communities in the Podlasie Voivodeship in the second half of the sixteenth century. Incorporated have been those religious communities confirmed as existing. The names of settlements are given alphabetically with the letter 't' indicating towns.

Bielsk district

Reformed congregation: Waniewo t.

Anti-Trinitarian congregation: Suraż t.

Drohiczyn district

Reformed congregations: Miedzna (a former town, at present a village), Mordy t., Siemiatycze t. Sokołów (Sokołów Podlaski) t., Suchożebry, Węgrów t.

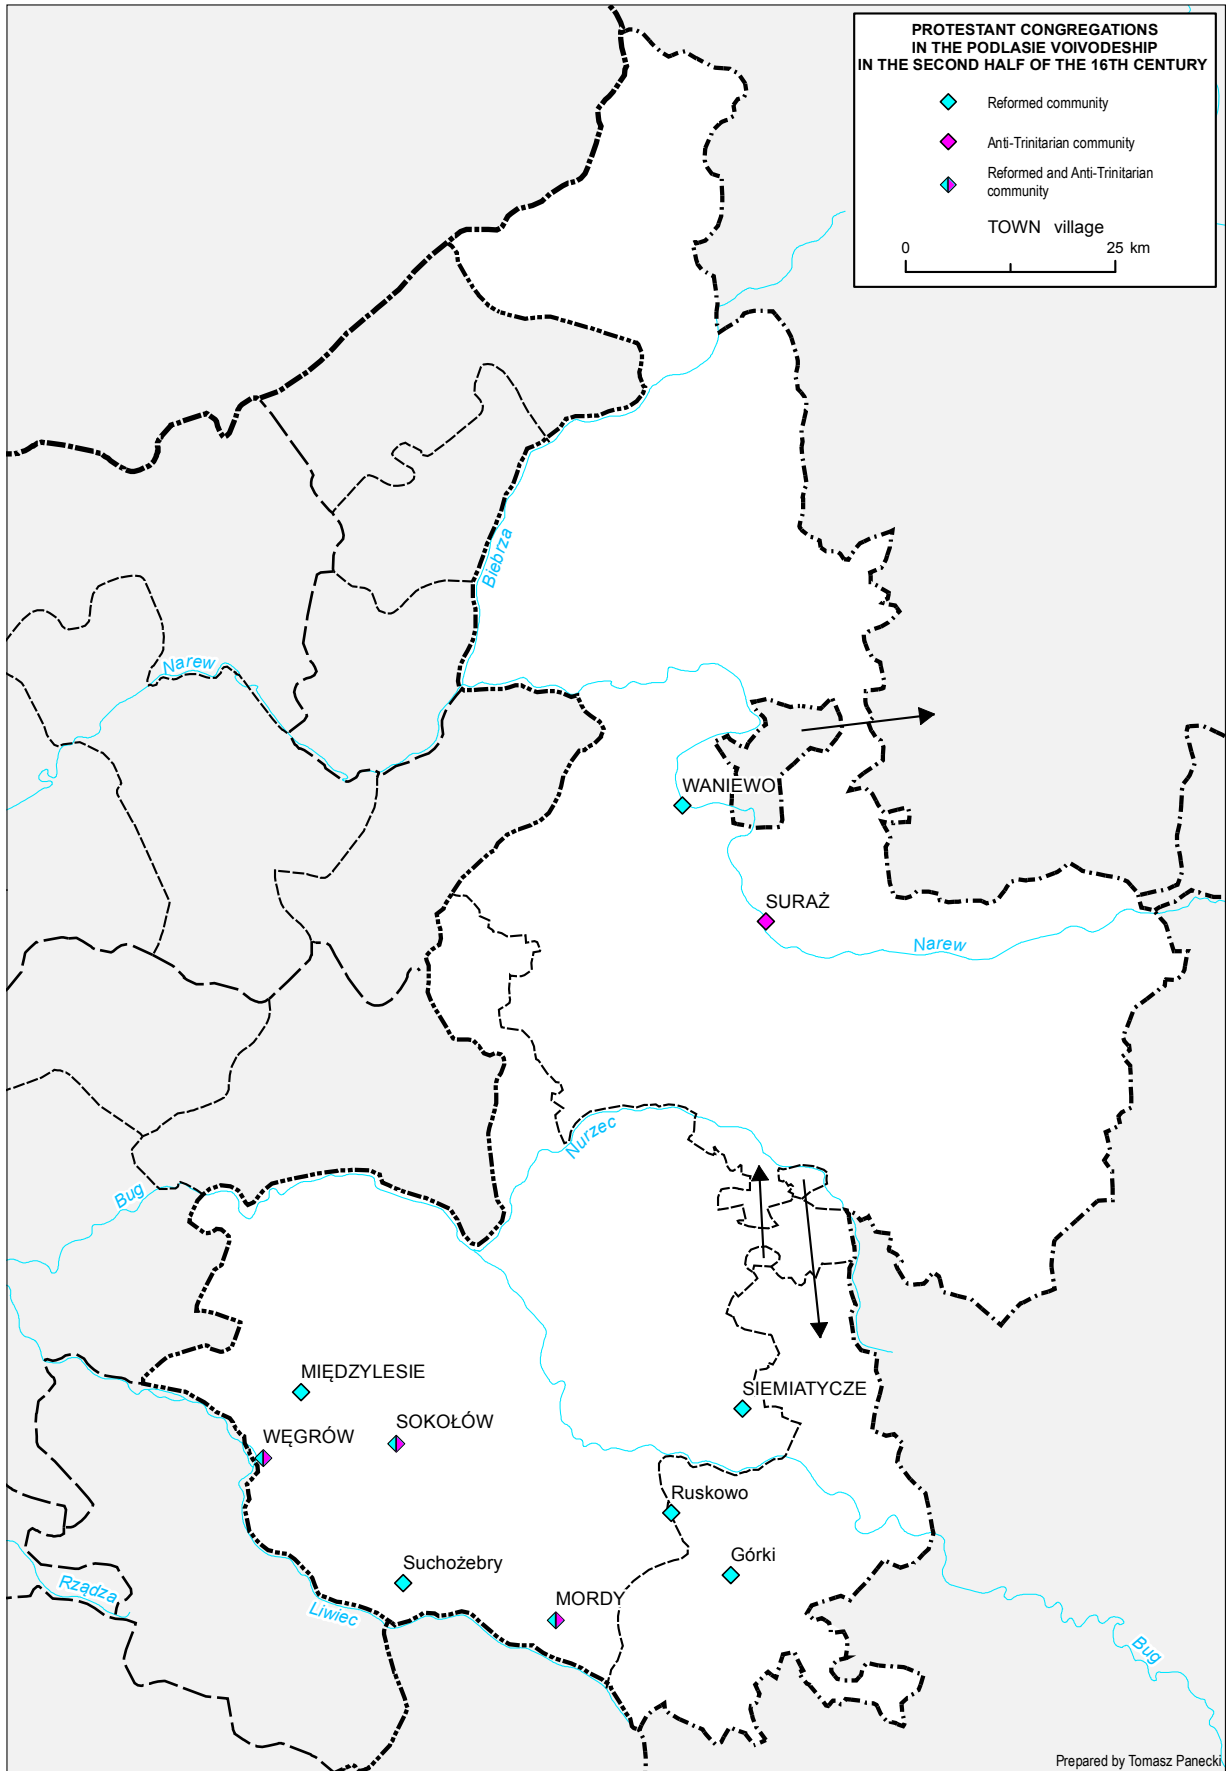

Anti-Trinitarian congregations: Mordy t., Sokołów t., Węgrów t.

Mielnik district

Reformed congregations: Górki, Rusków.

III.2.2.9A ROYAL PRUSSIA, PART 1 (1961)

Marian Biskup

Chełmno Voivodeship¹

The ecclesiastical division saw Chełmno Voivodeship falling under two dioceses: Chełmno and Płock dioceses. The predominant area of the voivodeship – 4,491 km² – fell under the jurisdiction of Chełmno bishopric, enlarged during Reformation by the acquisition of lands in the upper Drwęca and on the right bank of the Ossa (which had previously belonged to the Pomesanian Bishopric).² The lands on the left bank of the Drwęca, the old Michałowo Land and the village of Elgiszewo on the right bank of the Drwęca both fell under the jurisdiction of Płock diocese, while the land of the Polskie Brzozie parish was owned by the Bishop of Płock. The entirety of area under the influence of Płock diocese was 163 km².

The number of parishes in Chełmno diocese was 112, in Płock diocese –seven, bringing their overall number to 119;³ in this number, there were 105 rural parishes and 14 urban parishes. One parish incorporated from one to seven settlements.⁴ The size of individual parishes was between 6.5 km² to 134 km², with the average size being 39.1 km².

The parochial network in Chełmno diocese in the second half of the sixteenth century took its shape in a series of transformations which had occurred following the Polish-Teutonic wars of fifteenth century, as well as a consequence of the spread of Reformation which had made great progress in the first half of the sixteenth century. The sharp fall in the number of parishes (down by 20%) was a direct result of these changes: 19 parishes had been liquidated, while 10 previously parochial churches were downgraded and incorporated into other parishes.⁵

Malbork Voivodeship⁶

Most of the voivodeship fell under the influence of Pomesania diocese, administered at the time by the bishops of Chełmno. Since the thirteenth century, Only the north-eastern part, including Tolkmicko and the territory of Elbląg, east of the river Elblązka, had already belonged to Warmia diocese.⁷ However, due to the spread of Protestant faiths in the region, the territory of Elbląg (apart from a small

¹ MPK, p. 29.

² A more in-depth analysis can be found in M. Biskup, *Podziały administracyjne województwa chełmińskiego w drugiej połowie XVI w.*, Poznań 1956 (SMDWP, vol. 1, no. 2), p. 109ff.

³ Moreover, the village of Elgiszewo belonged to Ciechocin parish, while the village of Łąszewo belonged to the Grażawy parish in Dobrzyń land, both in Płock diocese. Thus, the actual number of parishes in the voivodeship should be 121.

⁴ For a more comprehensive list cf. M. Biskup, *Podziały administracyjne województwa chełmińskiego*, p. 126.

⁵ Comparison on the basis of date from St. Kujot, *Kto założył parafie w dzisiejszej diecezji chełmińskiej*, Toruń 1904–1905 (RTNT, vol. 11–12).

⁶ MPK, p. 30f.

⁷ J.M. Saage, *Grenzen des ermländischen Bistumssprengels seit dem 13. Jahrhundert*, „Zeitschrift für die Geschichte und Altertumskunde Ermlands”, vol. 1, 1860, p. 65; J. Bender, *Begrenzung, Einteilung und Kirchen der ehemaligen Diözese Pomesanien*, „Zeitschrift für die Geschichte und Altertumskunde Ermlands”, vol. 2, 1863, pp. 186–187.

enclave of the St. Nicolaus church in Elbląg) was practically removed from any jurisdiction of the Catholic Church. The actual size of Pomesania diocese thus, reflects the size of the voivodeship sans the territories of Elbląg and Tolkmicko – 1,466 km², while Warmia diocese administered the 118 km² of the region of Tolkmicko (without its Brzezina enclave).

The number of parishes in Malbork Voivodeship in the mid-sixteenth century was established based on the documentation from of royal demesne inspection, tax registers, and Church visitations:

parishes in Pomesania diocese (excluding the Elbląg territory)	50
parishes in the territory of Elbląg	10
parishes belonging to Warmia diocese	2
altogether	62

The number of settlements within a single parish in Pomesania diocese (excluding the territory of Elbląg):

one settlement	16 parishes
two settlements	12 parishes
three settlements	3 parishes
four settlements	2 parishes
five settlements	3 parishes
six settlements	2 parishes
seven settlements	2 parishes
eight settlements	2 parishes
nine settlements	3 parishes
eleven settlements	1 parish
thirteen settlements	2 parishes
fifteen settlements	1 parish
sixteen settlements	1 parish
altogether	50 parishes

In this count, an average of four settlements was under the jurisdiction of a single parish; the size of parishes was between eight km² and 113 km², with an average size of 29.3 km². For the entire Malbork Voivodeship, this would have been an average of five settlements per single parish, each of an average size of 33.8 km². There were 56 rural parishes and six urban parishes.

These numbers speak of a very dense parochial network, especially in the region of Pomesania diocese, which had the densest out of the three Royal Prussian voivodeships. The parishes containing numerous (more than ten) settlements present as striking outliers. This would have been the parochial model propagated in the region during the pre-Teutonic Polish Christianisation missions of Bishop Christian in the early thirteenth century; the parishes of Postolin, Dzierzgoń, Żuławka, and Tychnowy would in particular count as such relics.⁸ In Wielkie Żuławy, there is only one such parish, Lichnowy, which is undoubtedly among the oldest in the region. The great majority of parishes contain just one or two villages, which could, in turn, encapsulate up to six smaller settlements. These types of parishes were especially common in Wielkie Żuławy and Małe Żuławy, which is proof of these parishes being established during the sixteenth century Teutonic colonisation.

However, in the second half of the sixteenth century, most of the fifty parochial churches in Pomesania diocese (even with the exclusion of the territory of Elbląg) would have been abandoned

⁸ Cf. S. Kujot, *Dzieje Prus Królewskich*, part 1, Toruń 1913–1914, p. 716.

by the Catholic clergy due to the spread of Protestantism, particularly in Wielkie and Małe Żuławy. Some churches would have been taken over by Lutheran pastors.⁹ Over time, this process influenced the shape of the parochial network, especially when it came to the number of independent Catholic parishes, which would eventually fall drastically, as evidenced by reports from Church visitations at the beginning of the seventeenth century.¹⁰ The shape of the parochial network in Pomesania diocese depicted above was an echo of its pre-Reformation state; in the middle of the sixteenth century, the area was already undergoing radical changes.

Pomeranian Voivodeship¹¹

Pomeranian Voivodeship was divided among three dioceses: Wrocław diocese, the archdiocese of Gniezno, and Pomesania diocese.¹² Wrocław claimed the predominant part of the voivodeship, in an area between the Vistula, the Baltic Sea, and the Brda, which formed the so-called Pomerania Archdeaconry, to the size of around 9,723 km². The Archdiocese of Gniezno claimed the south-western part of the voivodeship, which included Człuchów and Tuchola districts up to the line of the Brda. They formed the so-called Kamięńsk Archdeaconry. The whole region under Gniezno influence had the size of around 2,939 km². Finally, a sliver of the territory of the town of Gdańsk fell under the influence of Pomesania diocese – an area size of 245 km², which ran along the right bank of the Vistula (the Vistula Spit and Szkarpa).

The number of parishes in the area of these dioceses:

Pomerania Archdeaconry (Włocławek diocese)	126 parishes
Kamięńsk Archdeaconry (Archdiocese of Gniezno)	67 parishes
Pomesania diocese	4 parishes
altogether	
	197 parishes

Ten settlements within the voivodeship belonged to parishes that had their parochial seats beyond the borders of the voivodeship. Seven settlements were in the area of influence of the Pomerania Archdeaconry, with four parochial seats in the territory of Lębork¹³ and three settlements of Kamięńsk Archdeaconry belonging to two parishes in Krajna.¹⁴ Altogether, 181 parishes were rural parishes, while 16 – urban parishes.

It is worth mentioning that during the period in question, the population inhabiting the territory of Gdańsk was becoming increasingly Protestant, which would bring forth the downfall of the hitherto Catholic parish system in the region; a similar phenomenon was occurring in and around Elbląg. The phenomenon affected the Pomeranian territories of Pomesania diocese especially hard and no written sources concerning the four parishes remain from the period. As such, these parishes had to be excluded from the count of the number of settlements in individual parishes in the voivodeship, bringing the number of parishes (in Wrocław diocese and the Archdiocese of Gniezno Archdiocese) down to 193.¹⁵

An additional list of settlements identified for the region of Pomeranian Voivodeship in the sixteenth century can be found in footnote number 24.

One parish could thus consist of one to twenty-seven settlements, with the average number of settlements being five. One-village parishes were most abundant in the Kamięnsk Archdeaconry (Człuchów district); parishes of size from one to four villages were predominant in the Pomerania Archdeaconry.

The size of a single parish could vary from as little as 7.5 km² to as much as 417 km², with the average size being around 65 km². Compared to the size of parishes in other voivodeships, these numbers seem to be much bigger; they were, in fact, inflated by large swathes of woodland in some of the parishes.

In conclusion, the entire area of Royal Prussia was divided into the following parts:

Chełmno Voivodeship	4,654 km ²
Malbork Voivodeship	2,096 km ²
Pomeranian Voivodeship	12,907 km ²
altogether	19,657 km ²

Royal Prussia was further divided into eleven districts (if Malbork Voivodeship was considered a single district, with the exclusion of the territory of the town of Elbląg), as well as four separate territories: *latifundium* of the Chełmno bishopric as well as the territories of three major urban centres – Gdańsk, Elbląg, and Toruń.

Ecclesiastically, the east of Royal Prussia was divided among Chełmno diocese and Pomesania diocese (as well as, to a lesser degree, Płock diocese and Warmia diocese); the west of Royal Prussia was shared among the dioceses of Wrocław and Gniezno. Share of individual dioceses for the whole Royal Prussia was as follows:

diocese	area size
Wrocław	9,723 km ²
Chełmno	4,491 km ²
Gniezno	2,939 km ²
Pomesania	1,711 km ²
Płock	163 km ²
Warmia	118 km ²
altogether	19,145 km ²

The remaining 512 km², which comprised of the territory of the town of Elbląg, was in reality outside of the sphere of influence of the bishops of Pomesania or Warmia. Until the beginning of the sixteenth century the territory of Elbląg had been split roughly in half among the two dioceses (which would have brought the total areas controlled by the Pomesanian diocese to 1,967 km² and by the Warmian diocese to 374 km²). However, the undisputed leading players in the region were Wrocław diocese and Chełmno diocese.

The number of parishes in Royal Prussia:

Chełmno Voivodeship	119
Malbork Voivodeship	62
Pomeranian Voivodeship	197
altogether	378

The average size of a parish in Royal Prussia was 52 km², with an average of five settlements in a single parish.

(1961)

Translated by Paulina Waclawik

III.2.2.9B ROYAL PRUSSIA, PART 2 (2021)

Tomasz Nowicki

The territory of Royal Prussia belonged to five Latin dioceses within to the metropolitan province of Gniezno/Gnesen (Chełmno/Kulm, Płock/Plock, Włocławek/Leslau, Gniezno/Gnesen, and Pomesanian), as well as one exempted diocese subordinate directly to the Bishop of Rome, i.e., the diocese of Warmia/Ermland.¹ The territorial share in the entire area of the province varied between individual bishoprics, which will be discussed below.

At the end of the sixteenth century, the vast majority of the territory of Chełmno Voivodeship was part of the diocese of Chełmno, although its capital and bishops' cathedral were not situated in Chełmno but in more centrally located Chełmża. Twenty-two villages, however, belonged to the diocese of Płock. Apart from one (Elgiszewo, parish of Ciechocin), they were included in parochial districts, the centres of which were located in Royal Prussia and formed a fairly compact complex in the vicinity of Brodnica. The border between Chełmno and Płock dioceses ran along the Drwęca River, diverging to the east only near the village of Pokrzydowo; then, after passing a parish village called Polskie Brzozie, it turned to the south, reaching near Radoszki, the border between Royal Prussia and the Dobrzyń land, which in this area ran along the Brenica River.² Meanwhile, the diocese of Chełmno almost entirely comprised the area of Chełmno Voivodeship. To its original territory, detached in the thirteenth century from the diocese of Płock and shaped under Teutonic rule,³ two deaneries previously belonging to the diocese of Pomesania were added in the sixteenth century: Łasin, with the parishes of Łasin, Mokre, Rogóżno, Szembruk, and Gubiny, as well as Nowe Miasto, with the parishes of Nowe Miasto, Skarlin, Szwarcenowo, Wonna, Chrośle, and Radomno. The official confirmation of this state of affairs by the Roman Curia did not take place immediately, but by the end of the sixteenth century the areas in question had already become an integral part of the diocese.⁴

For the most part, the boundaries of the diocese of Chełmno were identical to the external borders of Royal Prussia. The boundary line starting from the aforementioned fragment of Płock diocese located in Chełmno Voivodeship, ran along the Drwęca River, reached Vistula upstream of Toruń, and only beyond Grudziądz, having reached the border with the Duchy of Prussia, it changed its course towards the east. From there, it reached the territories belonging to the diocese of Płock again only in the vicinity of Lidzbark. At this point it changed its direction to the west, and, going mostly along the Brenica River, a left-bank tributary of the Drwęca, it reached that part of the territory of Płock diocese which belonged Chełmno Voivodeship near the parish of Radoszki.

Likewise, Malbork Voivodeship was situated on the territory of two dioceses. Its larger part belonged to the diocese of Pomesania, while the smaller one was part of the diocese of Warmia.

¹ On the efforts to incorporate the dioceses of Chełmno and Warmia into the metropolis of Gniezno, see B. Kumor, *Granice metropolii i diecezji polskich*, ABMK, vol. 18, 1969, pp. 305–308, 317–319. Cf. J. Wiśniewski, *Pomezania. Z dziejów kościelnych*, Elbląg 1996, pp. 101–102.

⁴ See *ibidem*, p. 332; A. Nadolny, *Granice diecezji chełmińskiej*, „*Studia Pelplińskie*”, vol. 16, 1985, p. 19; B. Dygdała, *Struktury parafialne diecezji chełmińskiej w XVII–XVIII wieku*, Toruń 2009, p. 102. Cf. J. Wiśniewski, *Pomezania*, pp. 176ff; M. Józefczyk, *Z dziejów religijnych Pomezanii w XVII w.*, vol. 1, Malbork 2012, pp. 15ff.

As noted above, the area of the diocese of Pomesania was significantly reduced as a result of the secularisation of Teutonic Prussia, conversion of the last bishop, Erhard von Queiss, to Lutheranism, and his renunciation of the administration of the diocese of Pomesania in favour of a secular ruler – Duke Albrecht Hohenzollern - which eventually occurred in 1527.⁵ Naturally, this decision concerned only that part of the diocese which included the newly created Duchy of Prussia. The southern parts of the former diocese of Pomesania, which were part of Chełmno Voivodeship, have been discussed above. The larger, northern part of the diocese, situated in Malbork Voivodeship was administered by the bishops of Chełmno with the consent of Rome. This state of affairs was fully sanctioned in a letter from Pope Clement VII to Wawrzyniec Gembicki, bishop of Chełmno, dated 16 April 1601, which confirmed the merging of the diocese of Chełmno with the diocese of Pomesania.⁶ It should be noted, however, that the diocese in question also encompassed the northern strip of Pomeranian Voivodeship, i.e. Vistula Spit, situated on a territory which belonged to Gdańsk.

The external borders of the part of the diocese of Pomesania located in Royal Prussia⁷ started from the area situated a little north of Kwidzyn, the official capital of Pomesanian bishopric in the Duchy of Prussia. Initially, the border overlapped with the border of the voivodeship, running not along the Vistula, but the Liwa, a former oxbow lake of the Nogat. It reached the Vistula only beyond Gniew, and then further it ran along the river, and the Vistula-Leniwka, up to Wisłoujście. The diocese encompassed the entire Vistula Spit up to the border with the Duchy of Prussia. Within Malbork Voivodeship, the diocese of Pomesania was separated from the diocese of Warmia by the Elbląg River and Lake Drużno. We should note that at the end of the sixteenth century this border existed only nominally, as it divided the territory belonging to Elbląg almost exactly in half, while all former Catholic churches were taken over by Lutherans.⁸ Further on, the border of the diocese, initially running along the Dzierżgoń River, overlapped with the border of the Duchy of Prussia. We should mention here the existence of two small enclaves which, while located within the territory of the Duchy of Prussia, belonged to Malbork Voivodeship. One of them was centred around the town of Rychliki (*Reichenbach*), and the other was the village of Stare Kusy (*Alt Kusfeldt*). Both were part of the diocese of Pomesania, but they remained under the authority of Elbląg.

The diocese of Warmia, as already indicated, was separated from the diocese of Pomesania by a line formed by Lake Drużno, the Elbląg River, and the waters of the Vistula Lagoon. It essentially comprised the Elbląg Upland (although in this case, by the end of the sixteenth century, all parishes of the former Elbląg deanery were claimed by Protestants).⁹ On the territory of Malbork Voivodeship within the diocese of Warmia, only two parishes were in Catholic hands: Tolkmicko and Podgrodzie (*Neukirch-Höhe*).

Considering the diocesan boundaries in Pomeranian Voivodeship, located on the left bank of the Vistula, it should be noted that apart from the aforementioned section of Pomesanian diocese covering a small fragment of Żuławy Wiślane and the Spit, the Voivodeship was divided between two Polish dioceses, i.e., Włocławek and Gniezno. The part administered by the bishops of Włocławek was much larger and formed the Pomerania archdeaconry of this diocese.¹⁰ The borders of this district, departing

⁵ See J. Wiśniewski, *Pomezania*, p. 153.

⁶ See M. Józefczyk, *Z dziejów religijnych Pomezanii*, vol. 1, p. 15. The text of the papal brief is included in vol. 2, *Źródła do dziejów XVII-wiecznej Pomezanii*, Malbork 2013, pp. 9–10. The papal letter by no means meant the liquidation of the diocese of Pomesania, which was still subject to Church law despite the lack of its own bishop. See W. Zawadzki, *Oficjalat pomezański w l. 1601–1821*, ZH, vol. 72, 2007, no. 1, p. 26.

⁹ The course of the border between Pomesania and Warmia on the Elbląg River was given by Carl Peter Woelke and Johann Martin Saage, editors of Warmian sources. See *Sedes archiepiscopales dioecesis Warmiensis* [in:] *Scriptores rerum Warmiensium oder Quellenschriften zur Geschichte Ermlands*, ed. C.P. Woelky, J.M. Saage, Braunsberg 1866 (*Monumenta historiae Warmiensis oder Quellensammlung zur Geschichte Ermlands*, vol. 3), p. 391.

¹⁰ The area was so distinct within the diocese of Włocławek, that a phrase *episcopus Wladislaviensis et Pomeraniae* was listed among the titles of the Włocławek bishops as early as in the sixteenth century. This title was first used by bishop Stanisław Karnkowski, and then by all his successors. Later on, the term *diocese of Pomerania* was used instead of an *archdeaconry*, and in 1766 Clement XIII even preconized Bishop Cyprian Wolicki as a separate Pomeranian suffragan bishop residing in Gdańsk. Nonetheless, the Pomeranian part of the diocese of Włocławek was never regarded as a completely separate, autonomous unit.

north-west from the Vistula past the Kozielec village, adjoined to the south the archdeaconry of Kruszwica of the diocese of Włocławek. North of Koronowo, the border reached the Brda River. From then on, the boundary of the diocese of Włocławek was based almost entirely on this river, ultimately reaching the state border; on the western side, the parish of Borzyszkowy was left, as it belonged to Gniezno diocese. Next, the boundary ran northwards to the Baltic Sea, mostly along the national border.¹¹ The whole northern Gdańsk Pomerania, together with the Hel Peninsula, belonged to the diocese of Włocławek. The eastern external border was based on the line of the Vistula, starting from the outlet of one of its branches, the Wisła-Leniwka, up to the aforementioned Kozielec village situated on the southern cape of the Świecie district.¹²

The remaining territory of Pomeranian Voivodeship fell under the jurisdiction of Gniezno diocese. The northernmost part of this Church unit, with Tuchola, Chojnice, Człuchów, Hamersztyn, and Biały Bór, was part of the Kamień archdeaconry, which also included territories belonging to the Kalisz Voivodeship.¹³ The southern border of the part of Pomeranian Voivodeship that belonged to the archbishops ran along the Kamionka River, a tributary of the Brda River. Then, starting from Debrzno (*Frydland*), along the Debrzynka River up to its outlet to the Gwda River, where it overlapped with the state border, running northwards along Gwda.¹⁴ Leaving Biały Bór on the Polish side, the border changed its direction to the east and north-east towards the parish of Borzyszkowy, where it reached the boundary with territories owned by the bishops of Włocławek, separated from the area belonging to Gniezno archbishops by the Brda.¹⁵

From the Middle Ages, Latin dioceses have been divided into smaller territorial units, commonly called archdeaconries and deaneries.¹⁶ A slightly different term for a deanery – archpresbyterate – was also used occasionally, in particular in the dioceses of Chełmno, Pomesania, and Warmia. The smallest unit of Church administration was a parish.¹⁷ We should note that in this commentary the term “parish” is unambiguously construed as a territorial district that comprises several, or even just one settlement or place. From the legal system’s standpoint, the map, therefore, sought to include canonically established churches with parish rights. Such a church should always have its own parish district and an endowment, particularly consisting of a plot of land. It was not relevant, however, whether the church was administered by an independent overseer, a deputy he had appointed, or even by a parson from a neighbouring parish.¹⁸

Cf. S. Chodyński, *Biskupi sufragani włocławscy*, Włocławek 1906, pp. 85–86; T. Nowicki, *Ministri ecclesiae. Służba kościelna i witrycy w diecezji włocławskiej w XVIII wieku*, Lublin 2011, p. 11.

¹¹ We should note that at the end of the sixteenth century, the boundaries of the diocese of Włocławek without a doubt encompassed the Lębork deanery, mentioned in the visitations of bishop Hieronim Rozdrażewski (see Fon. 1–3, pp. 39, 536). On the other hand, the visitations do not provide any reference to the parishes in the Bytów district. Marian Biskup and Andrzej Tomczak (see *Mapy województwa pomorskiego w drugiej połowie XVI w.*, RTNT, vol. 58, 1953, no. 1, p. 58) suggested, based on German findings, the ecclesiastical affiliation of Bytów to the bishopric in Kamień. Conversely, Bolesław Kumor (*Granice metropolii*, p. 300), while mentioning the claims of bishops of Kamień to the jurisdiction, emphasised how both districts were linked with the diocese of Włocławek, also in the sixteenth century. It is certain, however, that after 1637 both Lębork and Bytów districts were incorporated into the diocese of Włocławek, and remained there even after the area was seized by the dukes of Prussia in 1657.

¹² On the territory and boundaries of the diocese of Włocławek, including its Pomeranian part, see Z. Chodyński, *Brevis narratio historica de episcopatu Wladislaviensi et Pomeraniae*, [in:] *Statuta synodalia*, pp. VII–IX; Cf. *Diecezja chełmińska*, pp. 19–21.

¹³ In medieval times, however, the territory of the archdiocese reached as far as Słupsk – A. Gašiorowski, I. Skierska, *Początki oficjalatu kamińskiego archidiecezji gnieźnieńskiej (wieki XIV–XV)*, KH, vol. 53, 1996, no. 2, pp. 4ff.

¹⁴ Cf. A. Borek, *Church administration borders. A. Dioceses of Gniezno and Włocławek*, [in:] AHP Greater Poland.

¹⁵ Cf. *Diecezja chełmińska*, pp. 21–22. For a detailed description of the boundaries and territory of the archdeaconry, see A. Mietz, *Archidiakoniat kamiński archidiecezji gnieźnieńskiej. Struktura terytorialna i stan kościołów w czasach staropolskich 1512–1772*, Włocławek 2005, p. 24ff.

¹⁶ It bears mentioning that the borders of the archdeaconries were usually more stable than that of the deaneries.

¹⁷ The importance of a parish, including the purposes of state administration, has already been mentioned in the above comments. Cf. also S. Litak, *Parafie w Rzeczypospolitej w XVI–XVIII w.*, Lublin 2004, pp. 9–10.

¹⁸ In this context, we face the problem of differentiating between parish churches, subsidiaries with a territorial district, and subsidiary churches with no district, which can de facto be treated as public chapels. This issue was particularly important in Royal Prussia, where many formerly established and well-endowed parish churches were treated as subsidiary churches after the upheaval of the Reformation when some of them lost their endowment or saw a reduction in the number of worshippers.

The divisions of Church administration units presented above existed in Royal Prussia, although the smaller dioceses of Chełmno, Pomesania, and Warmia were not divided into archdeaconry districts in the period in question.¹⁹ In the dioceses of Włocławek and Gniezno, archdeaconries were either wholly or partly located within the territory shown on the maps.²⁰

Before discussing the internal divisions of particular dioceses, which territories were included in Royal Prussia, it is worth briefly noting key literature devoted to the Church territorial divisions for the late sixteenth century. For the Pomeranian part of Royal Prussia, the seminal study by Marian Biskup and Andrzej Tomczak, *Mapy województwa pomorskiego w drugiej połowie XVI w.* though published almost 70 years ago, remains the necessary starting point of any research due to its rich source documentation.²¹ For Chełmno and Malbork regions, a similar study was produced by M. Biskup alone.²² Both publications provide detailed information about the source base used for commentaries, lists and maps. Primary data about the Church administrative divisions are contained in the records of canonical visitations.²³ For the dioceses with territories belonging to Royal Prussia, the most valuable sources for the sixteenth century can be found in the Pomerania archdeaconry,²⁴ as well as in the dioceses of Warmia²⁵ and Płock.²⁶ Unfortunately, as far as the dioceses of Chełmno and Pomesania,²⁷ as well as the archdeaconry of Kamień²⁸ are concerned, no records from the sixteenth century have been preserved. The current data concerning the church network as researched by M. Biskup and A. Tomczak could

See *ibidem*, p. 49; T. Nowicki, *Liczba i sieć świątyń w archidiecezji pomorskiej w l. 1583–1781*, „Studia Pelplińskie”, vol. 28, 1999, p. 171; B. Dygdała, *Struktury parafialne*, p. 111.

¹⁹ There were, admittedly, archdeacons reported in the second half of the 13th c. in the dioceses of Chełmno and Warmia, but in the examined period, no archdeaconries existed in the post-Teutonic Knights' dioceses (see B. Dygdała, *Struktury parafialne*, p. 20).

²⁰ The small importance of the archdeaconry divisions in Royal Prussia was pointed out by S. Kościelak (*Dzieje wyznaniowe Prus Królewskich w XVI–XVIII w.*, [in:] *Prusy Królewskie. Społeczeństwo, kultura, gospodarka 1454–1772*, ed. E. Kizik, Gdańsk 2012, p. 205).

²¹ RTNT, vol. 58, 1953, no. 1. In part 1: *Rozmieszczenie własności ziemskiej* the study covers the distribution of land ownership. For the purposes of this commentary, part 2, determining the parish network, is more valuable.

²² M. Biskup, *Rozmieszczenie własności ziemskiej województwa chełmińskiego i malborskiego w drugiej połowie XVI w.*, RTNT, vol. 61, 1955, no. 2.

²³ The importance of visitations for the investigation of Church structures has been pointed out by many authors. It is enough to mention Stanisław Litak (*Parafie w Rzeczypospolitej*, pp. 29ff). On the significance of visitations for the study of Church structures, see also B. Dygdała, *Struktury parafialne*, pp. 17ff.

²⁴ In this case, the most important are the visitations carried out in the 1580s and 1590s during the administration of Bishop Hieronim Rozdrażewski (Wiz. G1a, Wiz. G1b, Wiz. G11 and editions in Fon. 1–3 [1897–1899] and in MHDW vol. 15). They provide excellent documentation of the state of the archdeaconry almost at the very end of the period under scrutiny. They can be supplemented by protocols of later visitations, particularly those of Bishop Bonawentura Madaliński (from years 1686–1687, Wiz. G20a), Archdeacon Krzysztof Szembek (from years 1701–1702, Wiz. G24), and Bishop Konstanty Szaniawski (from years 1710–1711, Wiz. G26). Occasionally, it was necessary to consult even later archives, i.e., visitations of Archdeacon Józef Narzymski (from years 1728–1729, Wiz. G40), Archdeacon August Kliński (from years 1745–1750, Wiz. G56) or the very thorough visitations of Bishops Antoni Ostrowski (from years 1765–1766, Wiz. G61, Wiz. G62, Wiz. G63a, Wiz. G63b), and Józef Rybiński (from years 1780–1781, Wiz. G69, Wiz. G70, Wiz. G71, Wiz. G72).

²⁵ In the case of the diocese of Warmia, a description made during the pontificate of bishop Marcin Kromer was of primary importance. It included information on churches in the Elbląg deanery which at the end of the sixteenth century were already administered by Protestants (AAWarm, Wiz. B1). Earlier visitations from 1565–1572 (Wiz. B3), and a later visitation from 1622 were useful as well (Wiz. B7).

²⁶ The parishes of the diocese of Płock situated within Chełmno Voivodeship were included in the visitations of 1599 (Wiz. 2), 1605 (Wiz. 4, as well as the edition in Fon. 14, pp. 649–659), 1618 (edition in Fon. 14, pp. 660–672). Moreover, significant additions were made to the editions of the visitation of 1763 (Fon. 14, pp. 673–738) and of 1775 (*Materiały do dziejów ziemi płockiej*, vol. 10: *Ziemia dobrzyńska*, elab. M.M. Grzybowski, Płock 1999).

²⁷ Unfortunately, for the dioceses of Chełmno and Pomesania the earliest visitations from the times of the rule of Bishop Piotr Kostka, i.e., from 1581 and 1588, were not preserved (see B. Dygdała, *Struktury parafialne*, pp. 59–60). However, slightly later protocols are available, primarily the incomplete visitations of Bishops Jan Lipski (from 1635, Wiz. C12) and Kasper Działyński (from 1640, Wiz. C13, pp. 219–265v), included in Curial records. Some information is also provided by an inventory of churches in the Chełmno deanery from 1641 (Wiz. C14). Considerably more data, also concerning parish villages, is supplied by the preserved visitations of Bishop Andrzej Leszczyński (from 1647, Wiz. C16 and the edition in Fon. 4) and Bishop Andrzej Olszowski (from 1667–1672 Wiz. C19 and edition in Fon. 6–10).

²⁸ The archdeaconry of Kamień has a visitation conducted in the years 1652–1653 by Archdeacon Stanisław Trebnica at the behest of Archbishop Andrzej Leszczyński (Wiz. K14 and the edition of Fon. 11–12). As a subsidiary measure, we had to refer to visitations conducted later, i.e., during the administration of Archbishop Michał Radziejowski (from 1695, sign. K15) and Archbishop Krzysztof Szembek (from 1743–1744, Wiz. K16).

be verified using the archival records from the seventeenth century and recent monographic studies supplied with source-documented lists of almost all parishes and places of worship.²⁹

We will examine the internal territorial structures of the Roman Catholic Church in Royal Prussia starting with the diocese of Chełmno. According to B. Kumor, at the end of the sixteenth century, the diocese consisted of 12 archpresbyterates.³⁰ 10 of them were listed in the records of the visitation of Bishop Jan Lipski in the book of the Chełmno Curia in 1635,³¹ while all 12, with their parishes, appear in the records of the synod held by Bishop Kasper Działyński in Lubawa in 1641.³² The same list of archpresbyterates can be found in the visitation records of Bishop Andrzej Leszczyński in 1647 and as such it remained until the nineteenth century.³³ Therefore, it may be assumed that at the end of the sixteenth century, the diocese of Chełmno was divided into the following archpresbyterates: Brodnica (10 parish districts), Chełmno (8), Chełmża (15), Golub (8), Grudziądz (4³⁴), Lidzbark (6), Lubawa (11), Łasin (5), Nowe Miasto (13), Radzyń (9), Toruń (14³⁵) and Wąbrzeźno (12). Thus, in the diocese of Chełmno there were an average of 9–10 parishes per deanery district, which makes a total number of 119 parishes and 474 corresponding settlements. An average parish of the diocese consisted of about five settlements (including the village with a church). 61 parishes (51%), thus more than half, comprised of one to four settlements, 41 (35%) possessed a parish district of five to nine settlements, and the least numerous in the diocese of Chełmno were parishes with 10 or more settlements (17 parishes, 14% of the total). It is worth adding that at the end of the sixteenth century there were probably five parishes occupied by Protestants. Among them were three churches in the vicinity of Toruń, namely Grębocin, Lubicz and Rogowo.³⁶ Further, Ostromecko,³⁷ located in the same deanery of Toruń but close to the bend of the Vistula, and a parish in Mokre within the deanery of Grudziądz.³⁸

The later visitations suggest that within the diocese of Chełmno there were several settlements which may have belonged to two different parishes, namely Folwark (parish of Radzyń),³⁹ Mlewiec (parish of Kiełbasin),⁴⁰ Wałdowo Królewskie (parish of Boluminek)⁴¹ and Łunawy Wielkie (parish of Chełmno).⁴²

²⁹ The studies of Bogusław Dygdała (*Struktury parafialne*) for the diocese of Chełmno, Mieczysław Józefczyk (*Z dziejów religijnych Pomezanii*, vol. 1 and 2) and Jan Wiśniewski (*Kościół i kaplice na terenie byłej diecezji pomezkańskiej 1243–1821*, Elbląg 1999) for the diocese of Pomesania, and Andrzej Mietz (*Archidiakoniat kamiński*) for the archdeaconry of Kamiń.

³⁰ B. Kumor, *Granice metropolii*, p. 334.

³¹ The following archpresbyterates were listed: Golub, Radzyń, Lubawa, Łasin, Toruń, Wąbrzeźno, Brodnica, Nowe Miasto, Chełmża, and Lidzbark. Therefore, the list omitted deaneries of Grudziądz and Chełmno. See Wiz. C12, pp. 78v–84v. Cf. B. Dygdała, *Struktury parafialne*, pp. 103–104.

³² See Fon. 24, pp. 133–135.

³³ See B. Dygdała, *Struktury parafialne*, pp. 103–104.

³⁴ Including one parish occupied by Protestants as late as the beginning of the seventeenth century.

³⁵ Including four churches that were still held by Protestants at the end of the sixteenth century.

³⁶ See Wiz. C19 pp. 17v, 108, 156v; Fon. 4. pp. 15, 194, 278, 805.

³⁷ According to B. Dygdała (*Struktury parafialne*, p. 45), Catholics recovered the church in the first decades of the seventeenth century. Indeed, in the visitations of 1640 and 1647, the parish was already administered by Catholics (see Wiz. C13 p. 221v; Wiz. C16 p. 7v; Fon. 4 p. 22).

³⁸ Similarly to Ostromecko, the church was still held by Protestants around 1620 (see B. Dygdała, *Struktury parafialne*, p. 45), but in 1640 and 1647 it was under the control of Catholics (see Wiz. C13 p. 226v; Wiz. C16 p. 16; Fon. 4 p. 44).

³⁹ Both visitations from the seventeenth century assigned the village of Folwark to two parishes: Radzyń (in 1647: Wiz. C16 p. 16v; Fon. 4, p. 46; in 1667–1672: Wiz. C19 p. 443; Fon. 6–10, p. 712) and Rywałd (in 1647: Wiz. C16, p. 18v; Fon. 4, p. 51; in 1667–1672: Wiz. C19, p. 468v; Fon. 6–10, p. 751). The parishes are adjacent to each other, but it is quite possible that in this case two entirely different villages were involved. Since each of them had a manor (*folwark*), they were recorded under that name in both parishes.

⁴⁰ Mlewiec was assigned doubly only in bishop Leszczyński's visitation of 1647, to parishes Kiełbasin (Wiz. C16, p. 9v; Fon. 4, p. 28) and Srebrniki (Wiz. C16, p. 10; Fon. 4, p. 28). This double affiliation is questionable, however, because Srebrniki was at that time a parish which was dependent on Kiełbasin, and perhaps for this reason it was listed both under the mother parish (under the name Mliwiec, but Srebrniki itself was omitted) and while describing Srebrniki (here under the name Mlewiec). In the next visitation under bishop Olszowski, Srebrniki was still recorded as a subsidiary of Kiełbasin, but without other villages. Mlewiec appeared only in the district of the parish of Kiełbasin (Wiz. C19, p. 29; Fon. 6–10, p. 71).

⁴¹ The dual affiliation of Wałdowo Królewskie is probable, as it was indeed located on the border between the parishes of Boluminek and Ostromecko. In 1647, it was recorded in both parishes (Boluminek: Wiz. C16, p. 7v; Fon. 4, p. 21; Ostromecko: Wiz. C16, p. 7v; Fon. 4, p. 22). However, in 1667–1672 it was only present in the parish of Boluminek (Wiz. C19, f. 163v; Fon. 6–10, p. 288).

⁴² Marian Biskup assigned Łunawy Wielkie to the parish of Chełmno (*Rozmieszczenie własności*, p. 79), but a visitation from 1647 noted this settlement only in the parish of Wabcz (Wiz. C16, p. 15; Fon. 4, p. 41). The next one, dated 1667–1672,

Potential double assignments were not included on the maps, and each village was assigned to a single parish centre as determined by M. Biskup. As there are no extant visitation records from the sixteenth century, it is not possible to confirm this statement, but the administrative affiliation to two parishes is actually indicated in the visitations records from 1647 and 1667–1672.

The parishes of Płock diocese located on the territory of Chełmno Voivodeship were part of the archdeaconry of Dobrzyń and the deanery of Rypin. The latter was created at the beginning of the sixteenth century as a result of the reorganisation introduced by Bishop Erazm Ciołek at the diocesan synod of 1506. The synodal census, known today only from copies made by W. Mąkowski in 1926–1939,⁴³ includes the deanery of Michałów, but only as a second name or even as a part of the deanery of Rypin. Later sources made no mention of such deanery, and, according to W. Müller, it is unlikely that it ever existed.⁴⁴ Supposedly, the deanery of Rypin was separated, together with the deaneries of Dobrzyń and Lipiny, from the deanery of Ciechanów, which was quite large and had already existed in the Middle Ages.⁴⁵ A. Borek⁴⁶ has demonstrated that this confusion resulted from the erroneous reading of W. Mąkowski's copies by H. Folwarski.⁴⁷

At this point, we should note that the village of Elgiszewo, which was situated on the territory of Chełmno Voivodeship, belonged to the parish of Ciechocin, located in Dobrzyń land in the Lipno deanery of Płock diocese. This administrative division of the diocese of Płock on the territory of Royal Prussia was also valid at the end of the sixteenth century, and significant reorganisations, also concerning parishes of the Płock bishopric located on the territory of Royal Prussia, occurred in 1643 through the creation of the deanery of Górzno.⁴⁸

Five parishes of the diocese of Płock comprised 20 villages located within the territory of Chełmno Voivodeship. Additionally, two villages were part of parishes that had their seats outside the borders of Royal Prussia. We should note that the discussed diocese included also a part of Brodnica, the so-called Przedmieście Mazurskie, situated on the left side of the river Drwęca. A hospital provostry of St. George was built there. The village of Michałowo was also located nearby; formerly it had a church, perhaps even a parish one. Interestingly, in the Chełmno visitations from 1647 and 1667–1672, Michałowo is listed among the villages in the parish of Brodnica, similarly to the provostry of St. George.⁴⁹ This could indicate that it belonged to the diocese of Chełmno. However, this is contradicted by earlier and later sources from Płock. "Brodnicza prepositura/prepositura ante Brodnicza" is mentioned in the Płock deanery census of 1506/10, in the deanery defined as "Rypin and Michałów".⁵⁰ The hospital provostry is also mentioned in the Płock visitation of 1597, as recently reclaimed from the Protestant burghers. Then, also the parish priest of Brodnica Jan Lubowski is known to have become a provost of St. George hospital, though instigated by the Górzno provost.⁵¹ The information does not, however, indicate that the hospital provostry in Mazurskie Suburb was a part of Brodnica parish. The Płock visitation explicitly ascribes it to Płock diocese. Similarly, the provostry and Michałowo is said to be the part of Płock bishopric, as evidenced by the Płock visitation from 1618. The information on its endowment was

ascribed it doubly, i.e., to Chełmno, including the value of tributes (Wiz. C19, p. 78v; Fon. 6–10, p. 151), and Wabcz, with the village name only (Wiz. C19, p. 97; Fon. 6–10, p. 177). Perhaps at that time, a distinction was already made between Łunawy Wielkie belonging to the parish of Chełmno and Łunawy Małe belonging to the parish of Wabcz.

⁴³ See Wiz. 9, p. 107.

⁴⁴ W. Müller, *Organizacja terytorialna diecezji płockiej w XVI–XVIII w.*, „Roczniki Humanistyczne”, vol. 15, 1969, no. 2, p. 161.

⁴⁵ See E. Wiśniowski, *Diecezja płocka u progu czasów nowożytnych*, „Studia Płockie”, vol. 3, 1975, p. 129; T. Żebrowski, *Zarys dziejów diecezji płockiej*, Płock 1976, p. 20.

⁴⁶ See A. Borek, *Church administration borders*, [in:] AHP Kujawy.

⁴⁷ Cf. H. Folwarski, *Erazm Ciołek, biskup i dyplomata*, Warsaw 1935, p. 110.

⁴⁸ W. Müller, *Organizacja terytorialna diecezji płockiej*, p. 161.

⁴⁹ The village is mentioned in the visitation of bishop Andrzej Leszczyński from 1647 (see C16, p. 19v; Fon. 4, p. 54) and the visitation of bishop Andrzej Olszowski from 1667–1672 (see C19, p. 314v; Fon. 6–10, p. 521).

⁵⁰ Wiz. 9, p. 107.

⁵¹ Wiz. 2, pp. 31–31v. The parishes of Rypin deanery were visited in 1597. The priest Jan Lubowski had many benefices and titles. In 1592–1601, he was a castle preacher, a provost of the church of the Holy Spirit in Malbork, and a parish priest in Pogorzała wieś. He was also a canon priest of Lublin and a provost of Brodnica. He died on 6 January 1605 (cf. Józefczyk, *Z dziejów religijnych Pomezanii*, vol. 1, p. 16).

provided by the former parish priest from Cielęta parish.⁵² The question arises, however, as to which parish both settlements might have belonged at the end of the sixteenth century.⁵³ The visitations do not include direct mentions of their affiliation. A definitive answer to that requires a broader query of the documents housed by the bishoprics and the consistory. A clear indication that the left-bank part of Brodnica belongs to Szczuka parish is confirmed by the eighteenth century sources.⁵⁴

The pre-Reformation division of the diocese of Pomesania consisted of a dozen or so deaneries, but after the Peace Treaty of Toruń (1466), within the borders of Royal Prussia, the northern part of the diocese lying entirely within the territory of Malbork Voivodeship was divided into five archpresbyterates: Dzierżgoń (13 parishes), Malbork (9), Nowy Staw (8), Sztum (13), and Żuławy (10).⁵⁵ Most likely this arrangement continued to exist at the end of the sixteenth century, as it is confirmed in the documents of the synod of Bishop Działyński held in Lubawa in 1641.⁵⁶ In addition, as noted above, the diocese of Pomesania at least nominally included parishes located in areas belonging to Gdańsk (Vistula Spit and part of Żuławy Wielkie, so-called Szkarpa) and Elbląg (Żuławy Elbląskie). Before the Reformation, they were most probably part of the Żuławy deanery. Eight former Catholic churches were identified in this area, i.e., in the territory belonging to Gdańsk: Bonsack (*Sobieszewo*), Kobbelgrube (*Stegna*), Pröbbernau (*Przebrno*) as well as Schönenbaum (*Drewnica*),⁵⁷ and in the territory belonging to Elbląg: Fürstenau (*Kmiecin*), Gross Mausdorf (*Myszewo*), Jungfert (*Marzęcino*) as well as Zeyer (*Kępkki*). Furthermore, the domain of Elbląg included the parish of Reichenbach (*Rychliki*), which functioned as an enclave within the territory of the Duchy of Prussia. Disregarding the parishes owned by Protestants, in the diocese of Pomesania there were on average 10 parish districts per one archpresbyterate. In total, excluding the parishes discussed above, the diocese of Pomesania comprised 53 parishes and 161 other settlements. Therefore, it can be easily calculated that a parish in this area consisted of four settlements on average. However, 2/3 of parishes consisted of a maximum of four villages (35 parishes, including as many as 16 districts made up of only one village with a church⁵⁸). The ones comprising more settlements (over six) were located mainly in the deaneries of Sztum and Dzierżgoń, while the smaller ones (up to five) were fairly evenly distributed throughout the diocese.

⁵² About Michałów itself, it is stated that “*in ea (villa) fuit templum muratum, verum collapsum, in profanos usus haereticis converterunt, maxime vero eiusdem villae scultetus, qui sibi cellarium ex hac materia fieri fecit*”. The sołtys mentioned above additionally cultivated two church łans (see Fon. 14, p. 666–667).

⁵³ It is possible that the case of Brodnica is similar to that of Mstów, situated on the Warta River on the border between the dioceses of Gniezno and Cracow. According to Henryk Rutkowski, the parish of Mstów was divided between these two dioceses. See: H. Rutkowski, *Church administration borders*, [in:] AHP Sieradz.

⁵⁴ At the beginning of the eighteenth century, the parishes in Cielęta and Szczuka as well as St. George Brodnica provostry were administered by a commendatory priest Bartłomiej Gościński (Wiz. 46, p. 556) Similarly, in 1724, the three churches were administered by one priest – Michał Bekierkiewicz (Wiz. 255, pp. 7–8). Another mention on the three churches administered together by priest Michał Chmielewski comes from 1763 (cf. Fon. 14, pp. 720ff). The visitation from 1775, in turn, explicitly denotes that the hospital prebend of St. George belongs to the parish of Szczuka, although at that time Michałowo was not mentioned among the settlements belonging to this parish (*Materiały do dziejów ziemi płockiej*, vol. 10, p. 163). S. Litak attributes the Brodnica suburb to the parish of Szczuka as well (cf. *Kościół łaciński w Rzeczypospolitej około 1772 r. Struktury administracyjne*, Lublin 1996, p. 262; idem, *Atlas Kościoła łacińskiego w Rzeczypospolitej Obojga Narodów w XVIII w.*, Lublin 2006, pp. 121, 272). The issue of the parish affiliation of Mazurskie Suburb is also not clarified by the Brodnica monograph under Jerzy Drygała, though it confirms that the provostry was a part of Płock diocese (cf. *Brodnica. Siedem wieków miasta*, ed. J. Dygdała, Brodnica 1998, pp. 139–140).

⁵⁵ It is necessary to note here that after the secularisation of the diocese in 1525, the southern archpresbyterates of Łasin and Nowe Miasto, located on the territory of Chełmno Voivodeship, were incorporated directly into the diocese of Chełmno. See J. Wiśniewski, *Kościół i kaplice*, pp. 62–62; idem, *Skutki sekularyzacji w oficjalacie pomezkańskim (w świetle wizytacji biskupich XVII–XVIII wieku)*, [in:] *Laicyzacja i sekularyzacja społeczeństwa nowożytnego (XVI–XVIII w.)*, ed. J. Wiśniewski, Olsztyn 2008, pp. 45–46.

⁵⁶ See Fon. 24, pp. 135–136.

⁵⁷ They were probably these four churches that were mentioned in the visitation of bishop Rozdrażewski from 1583, stating in the discussion of the churches of Gdańsk that *sunt et in insula quadam cognomine Nereia ad Laternam quatuor ecclesiae similiter ab haereticis occupatae* (Wiz. G1a, p. 2a; Wiz. G1b, p. 3; Fon. 1–3, p. 9). Cf. J. Fankiejcki, *Utracone kościoły i kaplice w dzisiejszej diecezji chełmińskiej podług urzędowych akt kościelnych*, Pelplin 1880, pp. 192–193.

⁵⁸ Parishes comprising a single village were characteristic of German colonisation in the Teutonic Knights' times. Cf. M. Biskup, *Parafie w Państwie Krzyżackim*, [in:] *Państwo Zakonu Krzyżackiego w Prusach. Podziały administracyjne i kościelne w XIII–XVI wieku*, ed. Z.H. Nowak, R. Czaja, Toruń 2000, p. 90.

The diocese of Warmia, similarly to the dioceses of Chełmno and Pomesania, was not divided into archdeaconries, although the records indicate that the post of archdeacon existed in the Middle Ages. The division into smaller territorial districts, also called here archpresbyterates, originated at least in the fourteenth century.⁵⁹ It was already firmly established at the turn of the fifteenth and sixteenth century, and at that time it encompassed 14 archpresbyterates.⁶⁰ In the case of the territory of the diocese of Warmia that was part of Malbork Voivodeship, we should note that at the end of the sixteenth century, two Catholic parishes, Tolkmicko and Podgrodzie (*Neukirch-Höhe*), were assigned to the deanery of Frombork. The same deanery also included the parish of Bludowo (*Bludau*), which belonged to a different voivodeship even though its territory partly overlapped with Malbork Voivodeship. It should be added that before the Protestants took over the churches in Elbląg⁶¹ and the lands on the Elbląg Upland, they were part of the Elbląg and Frombork archpresbyterate.⁶² It is also worth noting that the assignment of the village of Majewo (*Maibaum*) to one of the Catholic parishes raises some doubts. Even though it was located within the boundaries of the starosta's district of Tolkmicko, it was often pledged to Elbląg, which resulted in its inhabitants being Protestants.⁶³ Perhaps for this reason it was not recorded in any parish.⁶⁴

From the Middle Ages, the organisation of the territorial structure of the archdiocese of Gniezno and the diocese of Włocławek was based on a two-tier division, comprising archdeaconries and deaneries. Notably, the archdeaconries in both dioceses have a very early origin.⁶⁵ In the diocese of Włocławek, the division into three archdeaconries (Włocławek, Kruszwica and Pomerania) was already recorded in the thirteenth century.⁶⁶ The division into deaneries was similarly long-standing. At the end of the sixteenth century, parishes of the diocese of Włocławek situated on the territory of Pomeranian Voivodeship were grouped into 10 deaneries:⁶⁷ Gdańsk (19 parish districts), Gniezno (8), Mirachowo (13),⁶⁸ Nowe (18), Puck (13), Starogard (19),⁶⁹ Świecie (17), Tczew (16), and Wyspa Mniejsza (12).⁷⁰ The circumstances were slightly different for the Lębork deanery, which at that time was not part of

⁵⁹ A. Kopiczko, *Ustrój i organizacja diecezji warmińskiej*, pp. 162–163.

⁶⁰ See *Sedes archipresbyterales dioecesis Warmiensis*, pp. 386ff; cf. A. Kopiczko, *Ustrój i organizacja diecezji warmińskiej*, p. 163.

⁶¹ Before the Reformation, the town had two Catholic parishes, i.e., at St. Nicholas church for the Old Town and the Three Kings church for the New Town (A. Kopiczko, *Ustrój i organizacja diecezji warmińskiej*, p. 200).

⁶² The archpresbyterate of Elbląg included some parishes located in the territory of the archpresbyterate of Malbork: Elbląg, Przezmark (Preussischmark), and Pomorska Wieś (Pommehrendorf). The parishes of Milejewo (Trünz) and Łęcze (Lentz) belonged to the archdeaconry of Frombork. See *Sedes archipresbyterales dioecesis Warmiensis*, pp. 408–409, 414–415. However, in the second half of the sixteenth century, all settlements with churches belonging to the diocese of Warmia and located on the territory of Elbląg were assigned to the archpresbyterate of Elbląg only. See *Wiz.* B1, pp. 60v, 61, 62, 163, 164.

⁶³ According to Eugen G. Kerstan (*Die Geschichte des Landkreises Elbing*, Elbląg 1925, p. 264), the inhabitants attended services in a church built in 1599 in Nowe Monasterzysko (Neu Münsterberg), which was located in the Duchy of Prussia.

⁶⁴ Majewo could be included in the territorially closest parish of Bludowo (Bludau), but the analysed Warmian visitations from the turn of the sixteenth and seventeenth century do not mention the village. It is also not listed among the parish villages of Tolkmicko, Bludowo, or Podgrodzie in the visitation from 1729. (see A. Kopiczko, *Ustrój i organizacja diecezji warmińskiej*, p. 261).

⁶⁵ See T. Silnicki, *Organizacja archidjako­natu w Polsce*, Lwów 1927., pp. 96ff; J. Szymański, *Uwagi o organizacji archidjako­natu polskiego*, „Roczniki Teologiczno-Kanoniczne”, vol. 6, 1960, no. 3, pp. 33ff.; idem, *Powstanie i zanik organizacji prepozyturalnej w średniowiecznej Polsce*, „Roczniki Humanistyczne”, vol. 15, 1967, no. 2, pp. 49–84; A. ⁶⁶ Z. Chodyński, *Brevis narratio historica*, p. IX.

⁶⁷ This division was introduced at the beginning of bishop Rozdrażewski's time in 1582. Cf. S. Kościelak, *1000 lat gdańskiego Kościoła*, Gdańsk 1999, pp. 71–72.

⁶⁸ The terminology used was “decanatus Mirochoviensis seu/sive Kościerzynensis”, probably because of the seat of the dean, as explained in the records of the synod of Gdańsk in 1585 (see *Statuta synodalia*, p. 92; cf. MHDW 1, pp. 22, 25).

⁶⁹ In the case of this deanery, as noted by the publishers of Włocławek sources under the year 1583, the names “Zaborzensis seu Podlaszensis (postea appellabatur Stargardiensis)” were used: see MHDW 1, p. 22. However, in the records of the synod of Gdańsk in 1585, the deanery was called only Starogard. The same is true for the documents of the synods held in Subkowy in 1589 and 1598 (see *Statuta synodalia*, pp. 92, 93, 125, 147).

⁷⁰ In the records of the visitation of bishop Hieronim Rozdrażewski from 1583, this deanery was called “Minoris Insule seu Stobleviensis” (see *Wiz.* G1a, p. 2; *Wiz.* G1b, p. 1; *Fon.* 1–3, p. 7).

Royal Prussia. It was generally not included on the maps presented, except for a few villages located in Pomeranian Voivodeship which belonged to parish districts with seats within this deanery.⁷¹

It is possible that the town of Gdańsk with its dozen or so churches (at the end of the sixteenth century mostly occupied by Lutherans) and the adjacent areas constituted a separate Church territorial unit. Visitations and lists of churches quite clearly separate churches located in the town itself from the deanery of Gdańsk, but they do not explicitly state that this area constituted a separatedistrict. The 1583 census of deaneries lists all 10 but uses the term *rurales*, which may indicate that the town of Gdańsk, with its churches and adjacent settlements lying within its dominion, was treated as a separate and isolated ecclesiastical district.⁷²

Some problems arose with regard to the assignment of parishes forming the archdeaconry of Pomerania to their proper deaneries. This was primarily caused by the fact that visitations carried out during the pontificate of Bishop Hieronim Rozdrażewski, did not always accurately indicate deanery affiliation.⁷³ In general though, lists of churches included in the records of synods are definitely helpful. These are primarily the lists from the times when Bishop Rozdrażewski was active, from the synods held in Gdańsk (1585)⁷⁴ and Subkowy (1598).⁷⁵ In addition, similar lists from the years 1583 and 1598 were published by the editors of synodal statutes of Włocławek diocese.⁷⁶ The analysis of these lists is crucial, as it allows us to capture the changes occurring in the last twenty years of the sixteenth century. The organizational structure of Pomeranian deaneries at the end of the century is confirmed by the list presented to the synod held in Włocławek in 1620 and presided over by Bishop Paweł Wołucki.⁷⁷ It should be noted, however, that the reviewed lists of churches were not entirely reliable on the matter of the affiliation of parishes to deaneries. Some of them provide contradictory information, assigning the same parish to two deaneries.⁷⁸ Moreover, the names of certain settlements raise serious doubts over their interpretation.⁷⁹ Apart from these issues, the vast majority of Pomeranian parishes

⁷¹ The settlements in question were: Bzino, Nadole and Prusowo, situated on the left shore of Lake Żarnowieckie, which belonged to the parish of Osieki Lęborskie; Kętrzyno, which was part of the parish of Rozłazino; as well as Okalice and Zakrzewo, which belonged to the parish of Lębunia.

⁷² In historical literature, various researchers interpret the deanery affiliation of Gdańsk in different ways. S. Kujot (*Kto założył parafie w dzisiejszej diecezji chełmińskiej?*, RTNT, vol. 10, 1903, p. 231) believed that in the second half of the sixteenth century there were two deaneries of Gdańsk: urban and rural. Conversely, according to I. Subera (*Terytorium diecezji włocławskiej i pomorskiej*, „Prawo Kanoniczne”, vol. 4, 1961, p. 741) there was always just one Gdańsk deanery. Without a doubt, this was the case in the seventeenth and eighteenth century. On the other hand, sources from the sixteenth century clearly distinguish between rural deaneries and the territory of Gdańsk. The visitation from 1583 enumerated 16 churches “intra et extra muros”. The visitor of Bishop Rozdrażewski included also the parish on the Hel Peninsula and four unnamed churches on the Vistula Spit, which were located on the territory of Gdańsk, but, in fact, belonged to the diocese of Pomesania (see Fon. 1–3, p. 9; MHDW 1, pp. 20, 22). The exceptional treatment of Gdańsk is corroborated by the fact that in the mid-sixteenth century there were 155 priests in the town churches. A detailed survey of churches, benefices and hospitals in Gdańsk including the number of working priests shows that there were over 200 clergymen in Gdańsk (see Fon. 1–3, pp. 515–517). See M. Biskup, A. Tomczak, *Mapy województwa pomorskiego*, pp. 65–65; T. Nowicki, *Liczba i sieć*, p. 79; idem, *Plebani archidiaconatu pomorskiego w XVIII w. Studium prozopograficzne*, Lublin 2008; p. 44; S. Kościelak, *Katolicy*, p. 71.

⁷³ The editors of these sources also faced these difficulties, and at times their interpretation of the deanery affiliation of certain parish centres seems to contradict the source records (see Fon. 1–3, pp. 5–7, 222b–222c; cf. MHDW 15).

⁷⁴ See *Statuta synodalia*, pp. 93–94.

⁷⁵ Not only the list of deaneries and parishes was of importance here, but also the regulations which changed the deanery affiliation of some parishes in relation to the changes of 1582. According to this decree, parishes in Żukowo, Oliwa, Chwaszczyno, Kielno, Matarnia, Przodkowo, Szemud and Wielki Kack were added to the Gdańsk deanery. On the other hand, Niedamowo was included in the deanery of Mirachowo, which was detached from the deanery of Tczew, to which it had previously belonged. For similar reasons, the deanery of Starogard was expanded to include Kleszczewo, Szczodrowo, Garczyno from the Tczew deanery, as well as Dąbrówka, Jabłowo, Bobowo from the Nowe deanery. The newly created parish in Topolno was also incorporated into the deanery. See *Statuta synodalia*, pp. 147–148.

⁷⁶ See MHDW 1, pp. 22–26.

⁷⁷ Cf. *Statuta synodalia*, pp. 179–180.

⁷⁸ For example, in the list from the synod of 1598, Bobowo parish was listed in the deaneries of Starogard and Gniew (see *Statuta synodalia*, pp. 147, 148), while Nowa Cerkiew parish was listed in the deaneries of Nowe and Gniew in the list from the same year edited in MHDW 1, p. 26.

⁷⁹ For example, the names Zerenczino (deanery of Mirachowo) or Sędziszowo (deanery of Tczew) mentioned in the register appended to the records of the synod of Subkowo (see *Statuta synodalia*, pp. 147, 148) are completely unclear, as well as the names of parishes in the deanery of Gniew provided by the Włocławek editor of bishop's documents, Scierzawo and Proszyn (MHDW 1, p. 26).

could be unambiguously assigned to deaneries. For some, however, a thorough analysis of visitations and synodal records was required.⁸⁰

In the case of the archdeaconry of Pomerania, the Reformation brought about the most permanent and numerous loss of churches. The strongest and earliest influence Protestantism gained in Gdańsk itself.⁸¹ We should note that before the Reformation there were six territorial parishes in the Main Town: St. Virgin Mary, St. Catherine of Alexandria, St. John the Baptist, St. Barbara, St. Peter and Paul, and St. Bartholomew, as well as two further parishes in the New Town. However, the map does not include this detailed division, because just like in Elbląg, the Protestants took over all the parish churches in Gdańsk.⁸² The situation was similar in the area belonging to the largest town of Royal Prussia. The Catholic deanery of Steblewo (the so-called Wyspa Mniejsza) virtually ceased to exist, as all but one parish – in Giemlice – were taken over by Lutherans. There were also significant losses in the suburban deanery of Gdańsk, especially in the areas where the patronage was held by the magistrate. Several parish districts were permanently withdrawn from the Catholic Church, namely Lublewo,⁸³ Rokitnica (*Müggenhahl*),⁸⁴ Pruszcz (*Praust*)⁸⁵ and Przyjaźni (*Reinfeld*),⁸⁶ as well as at least three chapels or subsidiary churches in the parish of St. Wojciech, i.e., Juszkowo (*Gischkau*), Orunia (*Ohra*) and Wojanowo.⁸⁷ In the records of Rozdrażewski's visitations, these churches are listed and recognised as subsidiaries of the parish of St. Wojciech. However, it is impossible to determine if they can be treated as churches with districts, as they were not mentioned in the synodal lists of churches, apart from one piece of information about Orunia in the records of the Gdańsk synod of 1585.⁸⁸

Former Catholic parishes and churches were being taken over by Protestants not only in Gdańsk and within its dominion. Even at the beginning of the pontificate of Bishop Hieronim Rozdrażewski, a substantial number of churches in the whole archdeaconry had no Catholic priest, and the churches were turned into Lutheran places of worship. The visitations of that time show the process of reinstalling Catholic faith in these churches, which in many cases concluded successfully.⁸⁹ Nevertheless, at the end of the sixteenth century, Protestants owned well over 20 former parishes in the Pomerania archdeaconry, although if we include the churches in Gdańsk, the number certainly exceeded 30 sacral buildings. A number of other former Catholic parishes, due to the turmoil of the Reformation, essentially ceased to exist even before the end of the sixteenth century, e.g. in Poledno (deanery of

⁸⁰ For example, the deanery affiliation of the parishes of Czersk and Łąg was problematic. The list of deaneries of 1583 included these parishes in both deaneries (MHDW 1, pp. 22, 23), while the lists of 1598 (MHDW 1, p. 25; *Statuta synodalia*, p. 147) and 1620 (*Statuta synodalia*, p. 180) listed them only in the deanery of Mirachowo. However, most probably it is a mistake and we should adopt the interpretation proposed by Stanisław Kujot, who in the edition of Pomeranian visitations included both parishes in the deanery of Starogard (cf. Fon. 1–3, pp. 5–7, 222b–222c). In any case, they were assigned to this deanery throughout the seventeenth and eighteenth century. Cf. S. Kościelak, *1000 lat*, p. 74.

⁸¹ On the development of the Reformation in the town area, see S. Kościelak, *1000 lat*, p. 59ff; idem, *Katolicy*, pp. 34ff; idem, *Dzieje wyznaniowe Gdańska od XVI do początków XIX w.*, [in:] *Gdańsk protestancki w epoce nowożytnej. ⁸⁴ Visitations from the 1580s: Wiz. G1a, pp. 13, 108; Wiz. G1b, pp. 33, 184; Fon. 1–3, pp. 43, 215. Cf. J. Fankidejski, *Utracone kościoły i kaplice*, p. 184.

⁸⁵ Visitations from the 1580s: Wiz. G1a, pp. 12, 111v, 112v; Wiz. G1b, pp. 31, 188, 189; Fon. 1–3, pp. 40, 220, 221. Visitations from 90s: Wiz. G11, p. 60v; Fon. 1–3, p. 413. Cf. J. Fankidejski, *Utracone kościoły i kaplice*, p. 184.

⁸⁶ Visitations from the 1580s: Wiz. G1a, p. 107v; Wiz. G1b, p. 184; Fon. 1–3, p. 215. Cf. J. Fankidejski, *Utracone kościoły i kaplice*, pp. 194–196.

⁸⁷ See Juszkowo: Wiz. G11, pp. 53v, 55; Fon. 1–3, pp. 405, 406; MHGW 15, pp. 78, 79. Orunia: Wiz. G1a, pp. 112v, 113; Wiz. G1b, p. 189; Fon. 1–3, p. 221 and Wiz. G11, p. 55v; Fon. 1–3, pp. 405, 407; MHGW 15, pp. 78, 80. Wojnowo: Wiz. G1a, p. 111v; Wiz. G1b, p. 188; Fon. 1–3, p. 220; Wiz. G11, pp. 53, 54v; Fon. 1–3, pp. 404, 406; MHGW 15, pp. 78, 79. Cf. J. Fankidejski, *Utracone kościoły i kaplice*, pp. 183–186, 192, 194.

⁸⁸ *Statuta synodalia*, p. 93. A similar opinion is held by S. Kościelak, *Katolicy*, p. 73.

⁸⁹ For example, the catalogue of churches revindicated in July and August 1596 lists 20 localities, but by the end of the sixteenth century bishop Rozdrażewski managed to revindicate nine churches (Fon. 1–3, pp. 535ff.). Cf. *Diecezja chełmińska*, p. 79; S. Kościelak, *Dzieje wyznaniowe Prus Królewskich*, pp. 226–228.

Świecie).⁹⁰ It is possible that the parish and church in Michale (also deanery of Świecie) continued to exist until the end of the century.⁹¹ Examples can also be found in other deaneries, but the focus will be made on the Świecie one. The loss of a church did not always mean the disappearance of a parish district. Rozdrażewski's visitations bear witness to that, and a good example is offered by the parish of Święte Wielkie and the chapel in Sartowice, situated on its territory, to which the centre of the parish was somehow relocated in the mid-1580s or in the early 1590s. Sacraments were administered in the chapel of Sartowice on a regular basis, although nominally the seat of the parish remained in the church of Święte Wielkie.⁹² We should also note that in the second half of the sixteenth century, in the same deanery, a new Catholic parish was founded in Topolno.⁹³

Within the territory of the Pomerania archdeaconry, some settlements can be found that were situated on the border between two parish districts and appeared in the lists of villages of both parishes. An obvious example is the village of Radonia⁹⁴ on the border between the parishes of Lipusz

⁹⁰ Even the visitations of bishop Rozdrażewski from the 1580s mentioned a church that had long been destroyed, and included the village in the parish of Przysiersk (Wiz. G1a, pp. 25v, 50v; Wiz. G1b, pp. 65, 117; Fon. 1–3, pp. 83, 132). The events concerning the demolition of the church by Rafał Konopacki and the use of wood to build a dam on the lake are described in the visitation from the end of the 1590s (see Wiz. G11, p. 4v; Fon. 1–3, p. 344; cf. J. Fankidejski, *Utracone kościoły i kaplice*, p. 278). These events must have taken place before 1565, as the dam is already mentioned in the inspection of the starosta's district of Świecie in 1565 (see *Lustracja województwa pomorskiego 1565*, ed. S. Hozzowski, Gdańsk 1961, p. 178). On Rafał Konopacki, see W. Nowosad *Konopaccy herbu Odwaga – dzieje pomorskiej rodziny senatorskiej w XV–XVIII wieku. Studium genealogiczno-majątkowe*, Warsaw 2014, pp. 74–80. This source also provides information on conversion to Lutheranism and events related to the demolition of the church in Poledno.

⁹¹ The exact status of this one-village parish at the end of the sixteenth century is unknown. Even though it was listed among the churches of the deanery in 1598 and 1620 (see *Statuta synodalia*, pp. 148, 180) the visitation from 1583 already informed, similarly to Poledno, that “dudum ecclesia depopulate” (Wiz. G1a, p. 28v; Wiz. G1b, p. 73; Fon. 1–3, p. 94). However, the church in Michale most probably still existed at that time, as it is known that a year later it was “ab haereticis occupata” (Wiz. G1a, p. 58; Wiz. G1b, p. 129; Fon. 1–3, p. 148). Cf. J. Fankidejski, *Utracone kościoły i kaplice*, pp. 277–278; *Diecezja chełmińska*, pp. 604–605.

⁹² In 1583, the visitor described the parish of Święte assigning to it several settlements, including Sartowice (Wiz. G1a, p. 28v; Wiz. G1b, p. 73; Fon. 1–3, p. 93). Only Święte was named in the recommendations after the visitation (Fon. 1–3, p. 124). Likewise, the Bydgoszcz judicial vicar Sebastian of Szamotuły, Rozdrażewski's visitor, during the visitation in 1584, in the introduction mentioned only Święte, without Sartowice. In the description, he referred to four villages comprising it, without naming them (Wiz. G1a, p. 57v; Wiz. G1b, p. 128; Fon. 1–3, p. 147). At that time there was no separate protocol for Sartowice. The situation changed in the visitations from the 1590s. Then, apart from the protocol for the parish of Święte, there is also one for Sartowice. Moreover, the parish settlements, including Święte Wielkie, were listed by Sartowice. However, the protocol for the church in Święte shows that even though all the sacraments were transferred to Sartowice, it was treated as a subsidiary of Święte (probably without a separate parish district). (see Wiz. G11, pp. 118, 119; Fon. 1–3, pp. 364–366; MHDW 15 pp. 28–30). This state of affairs is confirmed by the lists of churches in the synodal acts of 1598 and 1620, where the name Sartowice does not appear even once, but Święte is listed every time (*Statuta synodalia*, pp. 148, 180). Cf. J. Fankidejski, *Utracone kościoły i kaplice*, pp. 276–277; *Diecezja chełmińska*, pp. 603, 604.

⁹³ The benefice was founded by Samuel Konarski, *chorząży* of Pomerania (see *Urządnicy Prus Królewskich. Spisy*, ed. K. Mikulski, Wrocław 1990, p. 127) The founding dates back to the 1580s, but probably the parish was not formally established until the 1590s. In the visitation of bishop Rozdrażewski in 1597, it was described as a parish with a district, including several neighbouring villages removed from the parishes of Gruczno and Niewieścín (see Wiz. G11, p. 5; Fon. 1–3, pp. 340, 344, 352). It was also mentioned in synodal records. For example, the synod of Subkowy in 1589 was attended by Wawrzyniec of Kraków, a commendatory priest from Topolno, while at the synod of 1598, Wojciech from Topolno, probably already a parish priest, was present. At that time, the church was formally incorporated into the deanery of Świecie and listed in the inventory of churches (see *Statuta synodalia*, pp. 125, 147, 148, 150). Cf. *Diecezja chełmińska*, pp. 611–614. At this point, we should mention that at the beginning of the seventeenth century another parish, not included on the map, was established in Sulęcyn (deanery of Mirachowo). It was also founded by the nobleman Reinhold Heidenstein. According to the authors of the historical study of the diocese of Chełmno (see *Diecezja chełmińska*, p. 404), the parish was created in 1595, but it was not mentioned in the visitation of the 1590s and the settlement is only listed among the villages of the parish of Parchowo (see Wiz. G11, p. 70; Fon. 1–3, p. 463; MHDW 15, p. 94). It was established formally only in 1616 when the church was consecrated. It is indicated by the records of bishop Szaniawski's visitation in 1711: “Fundamentum erectionis et inscriptio mansorum est, in Actis Civitatem Bernensem Anno 1616” (Wiz. G26, p. 71).

⁹⁴ In the visitation of 1583, the village was assigned to Lipusz. It was also reported, rather oddly, that three and a half inhabitants were paying half a *korzec* of rye and oats per *lan* to the parish (Wiz. G1a, p. 10; Wiz. G1b, p. 25; Fon. 1–3, p. 33). In the visitation of 1584, the visitor noted Raduń in the parish of Lešno but stated that *medietatem solvit in Lipusz* (Wiz. G1a, p. 123; Wiz. G1b, p. 203; Fon. 1–3, p. 241). From the 1590s, there is only a visitation of the parish of Lipusz, but the record informs that the village pays only half (Wiz. G11, p. 68v; Fon. 1–3, p. 461; MHDW 15, p. 92), while the editor reported in a footnote that the other half of tithes is given to Lešno (Fon. 1–3, p. 461, footnote. 3). In later visitations, from seventeenth

and Leśno, and possibly also Rybna⁹⁵ (parishes of Żarnowiec and Góry). More ambiguous cases are Borowski Młyn,⁹⁶ listed among settlements in parishes of Lipusz and Parchowo as well as Brody (or Bród),⁹⁷ assigned to the parishes of Gniew and Dzierżążno. Some examples can be found in the deanery of Świecie, in the visitations from the 1580s⁹⁸ and 1590s.⁹⁹

Overall, an average deanery in the archdeaconry of Pomerania, excluding the deanery of Lębork, had 15 parish territorial districts, without taking into account the division into parish and subsidiary churches. In total, 137 parishes were recorded in this area, comprising 1,029 settlements. Additionally, 18 settlements could not be assigned to any parish, and seven settlements had their parish centre located outside the area of Royal Prussia, which was discussed above. Disregarding the fact that at the end of the sixteenth century many parish districts were occupied by Protestants, an average parish in the archdeaconry comprised about seven to eight settlements. If the districts lost by the Catholics were to be excluded, an average parish would consist of just over eight settlements. The smallest ones (from one to four settlements) accounted for around 42% (58 districts), while the medium-sized ones included around 24% (33 parishes). More than 1/3 of districts were the largest ones, with 10 or more settlements (46 parishes).¹⁰⁰ However, taking into account the number of settlements in parishes, the smallest ones would include only 12% of all settlement centres, while the largest ones as much as 67%.

The fragment of Pomeranian Voivodeship which was under the jurisdiction of the archbishops of Gniezno was part of the archdeaconry of Kamień, existing since 1512. At that time, it was separated from the archdeaconry of Gniezno, which had existed earlier.¹⁰¹ The division into deaneries in this area, however, had earlier origins, and it was a continuation of the territorial organisation existing at least as early as the end of the fourteenth century.¹⁰²

As noted above, of the four deaneries belonging to the discussed archdeaconry, only Chojnice and Tuchola were located within the boundaries of Royal Prussia. They did not evenly cover the territory of the archdiocese that was part of Pomeranian Voivodeship. The deanery of Chojnice, with its 50 parishes, definitely covered a larger area. It also included three times more parish districts than the Tuchola deanery (16 districts). At the end of the sixteenth century, the discussed area included altogether 66 parishes, which encompassed 223 settlements. In addition, three Pomeranian villages belonging to parishes in the border area were part of the deanery of Sępólno, located outside of Pomeranian

and eighteenth century, Radunia was assigned to the parish of Leśno (e.g. 1686/1697: Wiz. G20a, p. 27; 1701/1702: Wiz. G24, p. 112).

⁹⁵ The village of Rybna was simultaneously listed in both parishes in the visitation of the 1590s. See Wiz. G11, pp. 91v, 100v; Fon. 1–3, pp. 306, 482. In the visitation from 1687, it is mentioned only in the parish of Góra (Wiz. G20a, p. 43v).

⁹⁶ The mill settlement Borowski (recognised by the editor of the visitation as Borowiec) was listed among the parish villages of Lipusz in 1583 (Wiz. G1a, p. 10; Wiz. G1b, p. 25; Fon. 1–3, p. 33, also note 1). It is not mentioned in the visitation of Parchów of the same year, but is included in the visitation of Gniewosz, which presents the state of the 1590s, under the name Borowy Młyn (Wiz. G11, p. 70v). The same source records it in the parish of Lipusz but under the name “Molendinum Borowski” (Wiz. G11, p. 68v; Fon. 1–3, p. 461; MHDW 15, p. 92). Presumably, in this case, it is the same settlement.

⁹⁷ Demesne village Brody or Bród (currently Brody Pomorskie) is located by the river Wierzyca, close to its estuary but upstream of Gniew. Visitations of bishop Rozdrażewski mention only Brody belonging to the parish of Dzierżążno (Wiz. G11, p. 21v; Fon. 1–3, p. 390; MHDW 15, p. 67). Similarly, an inspection of the starosta’s district of Gniew records Brok demesne (*Lustracja województwa pomorskiego 1565*, p. 151), probably meaning the same settlement as mentioned in visitations. Visitation of bishop Madaliński from 1687 suggests that they were separate but neighbouring settlements, as it assigns Brody Polskie to Dzierżążno (Wiz. G20a, p. 92v) and Bród Niemiecki to Gniew (Wiz. G20a, p. 94).

⁹⁸ In the visitations from 1580s, Bładzim was doubly assigned (parish of Lubiewo: Wiz. G1a, p. 26v; Wiz. G1b, p. 68; Fon. 1–3, p. 87 and Świekatowo: Wiz. G1a, p. 54v; Wiz. G1b, p. 122; Fon. 1–3, p. 139), but later on it was only listed in the parish of Świekatowo (Wiz. G11, p. 104v; Fon. 1–3, p. 368; MHDW 15, p. 32). Likewise, the village of Więckowo was in 1580s included in the parish of Przysiersk (Wiz. G1a, pp. 25v, 50v; Wiz. G1b, pp. 65, 117; Fon. 1–3, pp. 83, 132) and Gruczno (Wiz. G1a, p. 53; Wiz. G1b, p. 118; Fon. 1–3, p. 134), but later it was only assigned to Gruczno (Wiz. G11, p. 4; Fon. 1–3, p. 343; MHDW 15, p. 7).

⁹⁹ This refers to Gołuszyce, listed in the parish of Serock (Wiz. G11, p. 109v; Fon. 1–3, p. 375) and Łąki Polskie (Wiz. G11, p. 106; Fon. 1–3, p. 371; MHDW 15, p. 35) as well as Różanna in the parish of Przysiersk (Wiz. G11, p. 106v; Fon. 1–3, p. 371; MHDW 15, p. 35) and Łąki Polskie (Wiz. G11, p. 105v; Fon. 1–3, p. 354; MHDW 15, p. 18).

¹⁰⁰ These figures are slightly different when including only parishes occupied by Catholics: the smallest and largest parishes are each 38%, and the medium-sized ones still around 24%.

¹⁰¹ See A. Mietz, *Archidiakoniat kamiński*, pp. 21–22.

¹⁰² *Ibidem*, p. 33.

Voivodeship.¹⁰³ In contrast to the archdeaconry of Pomerania, the area in question was clearly dominated by smaller parishes with up to four settlements, which accounted for nearly 76% of all parish districts in the area (50 out of 66). Medium-sized ones comprised approximately 21% of all the parishes (14). There were only two parish districts with 11 villages (3%).¹⁰⁴ As already mentioned, numerous one-village parishes were typical for the German colonisation in the Teutonic Order times.¹⁰⁵ It was a situation similar to some areas of the diocese of Pomesania. On the other hand, it contrasts sharply with the archdeaconry of Pomerania, where there were parishes with more than 20 settlement units. However, it was characteristic of this part of Pomeranian Voivodeship at that time that Protestants used many of their own, newly-built churches.¹⁰⁶

At the end of the sixteenth century, the total number of parish districts on the territory of Royal Prussia was 397 (118 in the diocese of Chełmno, six in Płock, 61 in Pomesania, 9 in Warmia, 137 in Włocławek, 66 in Gniezno). In addition, there were nine parishes the centres of which were located outside the Prussian voivodeships, but their territories were partly within the borders of Royal Prussia. At the end of the sixteenth century, a significant number of former Catholic parishes were held by Protestants. In total, there were at least 60 such centres (5 in the diocese of Chełmno, 11 in the diocese of Pomesania, 7 in the diocese of Warmia, 22 in the diocese of Włocławek, and 15 in the diocese of Gniezno). Out of 397 parish districts of the Catholic Church, 35 were located in towns, 346 in villages, 10 in demesne villages, five in towns with a monastery (Kartuzy, Oliwa, Pelplin, Żarnowiec, Żukowo), and one parish settlement was referred to as a castle (Starogród). There was no town in Royal Prussia without a parish church.

Chełmno Voivodeship had 124 parish districts (including 8 on the territory belonging to Toruń). Malbork Voivodeship encompassed 66 parish districts (of which 12 belonged to the territory of Elbląg) Pomeranian Voivodeship had 207 districts (of which 20 belonged to the territory of Gdańsk).

ANNEX

OVERVIEW OF CHURCH ADMINISTRATION UNITS IN ROYAL PRUSSIA

This list reflects the ecclesiastical structures as they existed at the end of the sixteenth century. It includes parishes located within the boundaries of Royal Prussia, as well as the parish districts the churches of which were located outside the borders of the province, but with villages situated within the territory of Chełmno, Malbork and Pomeranian Voivodeships. Parish centres located outside the borders of Royal Prussia are marked with „*”, and those belonging to Protestants at the end of the sixteenth century – with „+”. The list was compiled in alphabetical order according to the names of parish seats at that time, with the current name in parentheses if it differed from the earlier one. Towns are marked with the letter “t.”.

The diocese of Chełmno

Archpresbyterate of Brodnica

Bobrowo, Brodnica t., Brudzawy, Kruszyny, Lembarg, Mszano, Nieżywięc, Pokrzydowo, Wrocki, Żmijewo

¹⁰³ Namely, Jadamkowo and Pamiętowo from the parish of Zalesie as well as Orzełek belonging to the parish of Kamień. Cf. A. Borek, *Church administration borders. A. Dioceses of Gniezno and Włocławek*, [in:] AHP Greater Poland.

¹⁰⁴ It was confirmed by the research of A. Mietz (*Archidiakoniat kamieński*, p. 57).

¹⁰⁵ See M. Biskup, *Parafie*, p. 90.

¹⁰⁶ A detailed account of Protestant centres of worship is given by A. Mietz, *Archidiakoniat kamieński*, pp. 90–108.

Archpresbyterate of Chełmno

Chełmno t., Czyste (Czyste Wielkie), Kijewo (Kijewo Królewskie), Lisewo, Sarnowo, Starogród, Szynych, Wabcz

Archpresbyterate of Chełmża

Biskupice, Chełmża t., Dźwierzno, Gostkowo, Gronowo, Grzybno, Grzywna, Kiełbasin, Nawra, Papowo Biskupie, Rychnowo (Wielkie Rychnowo), Srebrniki, Trzebcz Szlachecki, Unisław, Wielka Łąka, Zajączkowo

Archpresbyterate of Golub

Golub t., Kurkocin, Lipnica, Łobdowo, Ostrowite, Pluskowęsy, Radowiska Wielkie, Zieleń

Archpresbyterate of Grudziądz

Błędowo, Grudziądz t., Mokre+, Strzemięcín, Welcz Wielki, Wiewiórki

Archpresbyterate of Lidzbark

Boleszyn, Kiełpiny, Lidzbark t., Mroczo, Radoszki, Wlewsk

Archpresbyterate of Lubawa

Byszwałd, Grabowo, Grodziczno, Kazanice, Lubawa t., Prątnica, Rumian, Samplawa, Złotowo, Zwiniarz

Archpresbyterate of Łasin

Gubiny, Łasin t., Rogóžno, Szczepanki, Szembruk, Szynwałd

Archpresbyterate of Nowe Miasto

Brzozie Lubawskie, Chrośle, Gwiździny, Kurzętnik t., Lipinki, Łąkorz, Mikołajki, Nowe Miasto t., Radomno, Skarlin, Szwarcenowo, Tylice, Wonna

Archpresbyterate of Radzyń

Bursztynowo, Gruta, Jabłonowo, Linowo, Okonin, Ostrowite, Płowęż, Radzyń (Radzyń Chełmiński) t., Rywałd (Rywałd Królewski)

Archpresbyterate of Toruń

Bierzgłowo, Boluminek, Czarnowo, Czarże, Grębocin+, Kaszczorek, Lubicz+, Łążyn, Ostromecko+, Papowo (Papowo Toruńskie), Przeczno, Świerczynki, Toruń t.

Archpresbyterate of Wąbrzeźno

Chełmonie, Dębowa Łąka, Kowalewo (Kowalewo Pomorskie) t., Łopatki, Niedźwiedź, Nowa Wieś (Nowa Wieś Królewska), Orzechowo, Płużnica, Ryńsk, Wąbrzeźno t., Wronie

The diocese of Płock

Deanery of Lipno

Ciechocin*

Deanery of Rypin

Cielęta, Gorczenica, Gortatowo, Jastrzębie, Grążawy*, Brzozie, Szczuka

The diocese of Pomesania

Archpresbyterate of Dzierzgoń

Altmark (Stary Targ) Bągart, Dzierzgoń t., Fischau (Fiszewo), Königsdorf (Królewo), Lichtfelde (Jasna)+, Neumark (Nowy Targ), Notzendorf (Krzyżanowo), Posilge (Żuławka Sztumska), Reichenbach (Rychliki)+, Rozengarth (Rozgart), Schöwiese (Krasna Łąka), Thiergart (Zwierzno)

Archpresbyterate of Malbork

Altmünsterberg (Stara Kościelnica), Biesterfelde (Bystrze), Gnojau (Gnojewo), Gross Montau (Mątowy Wielkie), Malbork t., Mielenz (Miłoradz), Schönau (Kraśniewo), Warnau (Kościeleczyki), Warnersdorf (Pogorzała Wieś)

Archpresbyterate of Nowy Staw

Barendt (Boręty), Gross Lasewitz (Lasowice), Gross Lichtenau (Lichnowy)+, Kunzendorf (Końcewice), Liesau (Lisewo), Neukirch (Nowa Cerkiew), Neuteich (Nowy Staw) t., Schadwalde (Szawałd)

Archpresbyterate of Sztum

Braunswalde (Gościszewo), Deutch Damerau (Dąbrówka Malborska), Dietrichsdorf (Straszewo), Kalwe (Kalwa), Kiesling (Koślinka), Kranswalde (Koniecwałd), Neudorf (Nowa Wieś Sztumska), Pestlin (Postolin), Peterswalde (Pietrzwałd), Schroop (Szropy), Stuhmdorf (Sztumska Wieś), Sztum t., Tiefenau (Tychnowy)

Archpresbyterate of Żuławki

Fürstenwerder (Żuławki), Ladekopp (Lubieszewo), Lindenau (Lipinka), Marienau (Marynowy), Schöneberg (Ostaszewo), Schönsee (Jeziernik), Tannsee (Świerki), Tiege (Tuja), Tiegenhagen (Cyganek)

Parish districts of undetermined deanery affiliation

Bonsack (Sobieszewo)+, Fürstenau (Kmiecin)+, Gross Mausdorf (Myszewo)+, Jungfert (Marzęcino)+, Kobbelgrube (Stegna)+, Pröbbernau (Przebrno)+, Schonenbaum (Drewnica)+, Zeyer (Kępki)+

III.3 SETTLEMENT

III.3.1 LOCATION OF SETTLEMENTS

III.3.1.1 CRACOW VOIVODESHIP

Krzysztof Chłapowski

Our main rule adopted for detailed maps of sixteenth century Poland was to present the complete settlement network in the second half of that century. The methods used were described thoroughly in previous volumes of the series, in the chapters on the localization of settlements, and will only be repeated here.¹

Tax registers – the main sources used for the presentation of the settlement – fail to provide a complete list of settlements existing when the sources were written. The collectors did not record the names of settlements, which were not subject to taxation (demesnes), temporarily freed from taxation (newly-founded settlements, or settlements rebuilt after a natural cataclysm), or paying together with other settlements, e.g. towns (town villages).² Moreover, the registers were not free of inaccuracies, accidental omissions, and abuses. The latter usually meant undervaluation of the tax base, or omission of entire settlements. Hiding of a small village could have escaped the collector's attention, and a hamlet, being in fact an independent settlement, could have been formally treated as a part of a larger settlement of the same owner.

We were able to use tax records from 1593 and 1595 (this was an exceptional situation), and – for almost the entire territory of the voivodeship – the visitations from 1595–1599 (Cracow Voivodeship is an exception in this case), and could therefore find nearly all newly-located villages,³ as well as those, which did not appear in the registers for the already mentioned reasons. Other sources (earlier and later) provided – in few cases – information about small hamlets, which existed in the second half of the sixteenth century, but did not appear in the usual sources used while preparing this series of AHP.⁴

¹ See H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7; K. Pacuski, *Location of settlements*, [in:] AHP Sandomierz, in this edition III.3.1.2; K. Chłapowski, *Location of settlements*, [in:] AHP Sieradz, in this edition III.3.1.5.

² For the list and description of the registers see K. Chłapowski, *Źródła pisane*, [in:] AHP Cracow.

³ The examples are some of the newly-located settlements on Vlach law in the key of Muszyna belonging to Cracow bishopric, which did not appear in the registers from 1593 and 1595 and – obviously – in the visitation, but the dates of their foundation were determined by Stanisław Płaza and Bolesław Kumor on the basis of the sources collected in the Chapter and Metropolitan archives in Cracow (S. Płaza, *Sołectwa w powiecie sądecko-czchowskim w XIII–XVIII w.*, „Rocznik Sądecki”, vol. 9, 1968, pp. 5–148; B. Kumor, *Osadnictwo lemkowski i sieć parafialna w kluczu muszyńskim biskupstwa krakowskiego (do 1780)*, „Rocznik Sądecki”, vol. 24, 1996, pp. 9–23) and some of the settlements in the Duchy of Siewierz, which belonged to Cracow bishopric. The fact that they existed already in the sixteenth century was confirmed by Zdzisław Noga, basing on these sources (Noga, *Słownik*).

⁴ For instance, the village Biadaczów, listed in LDK, p. 59 (newly located, which belongs to Ojców starosta's district), then in the visitation from 1660 (MK L.XVIII, 24, f. 252, and in the register from 1680 (Rej. pob. 1680, p. 85) later appeared as Bodaczów (Quartermaster' Map; SGKP, vol. 1, p. 271), dziś część wsi Biały Kościół; settlement Balachówka mentioned in LDK, p. 55, later in nineteenth century XIX (SGKP, vol. 14, p. 323); a hamlet Strugi mentioned by Długosz (LB, vol. 3, p. 343), then in 1579 (J. Sygański, *Arendy klasztoru starosądeckiego*, Lwów 1904, pp. 10–11), in the eighteenth and nineteenth century (Mieg's Map; SGKP, vol. 11, pp. 417–418 – exact location provided here), now part of Chełmiec village; Brzana and Obidza – hamlets in Nowy Sącz district, mentioned in the fifteenth century and in the beginning of the sixteenth then in the second half of the eighteenth century, [in:] E. Pawłowski, *Nazwy miejscowości Sądecczyzny*, part 1: *Nazwy miast, wsi, przysiółków oraz dzielnic miejskich i wiejskich*, Wrocław 1971, pp. 19, 83, part 2: *Nazwy osiedli*, Wrocław 1975, pp. 54–55.

The map shows only independent settlements, which had their own name and comprised one, or several, groups of residential and utility buildings, whose dwellers exploited specified areas, more or less separated from the areas belonging to neighbouring settlements.⁵ New settlements were rarely founded in densely inhabited, and especially less forested areas, where ownership relations were stable (districts of Proszowice, Książ, and Lelów), whereas in the densely forested, piedmont, and borderland territories of Silesian, Nowy Sącz, Szczyrzyc, and Biecz districts new settlements were regularly, and frequently created (most of all in 'Żywiec country' of the Komorowski family, in starosta's districts of Lanckorona, Nowy Targ, Czorsztyn, Nowy Sącz, Biecz, the key of Muszyn of Cracow bishopric, the estates of the family Stadnicki in Biecz district). Inns were shown only on the map of roads, and in the commentary to the map.

The range of autonomy of individual villages was fluid at times, especially in case of demesnes and mills. Usually, they were included under the name of the nearest village, even if they lay several kilometres from the nearest buildings. Some of these small settlement points, more remote, or more visibly economically autonomous (for instance, demesnes belonging to larger estates, cultivated by peasants from several villages) were given their own names, and treated as separate settlements. The sources do not always show, whether such a settlement should be treated as a demesne, or as a village. It must also be noted that mills, or inns, located in a village, and not a separate settlement, could have their own name, often derived from the name (or nickname) of the miller, or related to services provided in the inn or the results of the services.

Due to the abundance of sources, and their diverse origins, we did not – in contrast to other volumes of this series of AHP – meet any major difficulties with identification of villages,⁶ or in determining, whether the recorded names denoted independent settlements, or just parts of settlements.⁷

In Cracow Voivodeship, there were no settlements of farm gentry, comprising small (at least three) hamlets under one name, and distinguished by an additional epithet, the second part of the name. Very few were the instances, when two villages had the same name, without a second, distinguishing epithet, where the differentiation occurred only in the seventeenth century, or never. Such settlements were marked with a single dot on the map, and in the index they were given a multiplication mark and a number, e.g. Branice x2, Wilkowisko x2.

When we lacked certainty, if a village belonging to two different great land owners (or when just one of the belonged to this category) constituted one settlement, or two having the same name, we obeyed the following rule: if there was no clear confirmation that these were two settlements in the sixteenth century, distinguished by means of a second part of the name (often an adjective pointing to the owner), then such a settlement, belonging to two owners, was treated as a single settlement.⁸

When in the sixteenth century there were two, or three nearby settlements of the same name (the differentiation with the second part of the name occurred later), we added a Roman number in the index.⁹

In Cracow Voivodeship, we found 16 suburbs given an individual name. They were marked as separate settlements on the map. Just as in previous volumes of this series, mills, ironworks, glassworks, and castles which could be localized precisely, were marked as separate settlement points.¹⁰

⁵ More on this subject: H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7.

⁶ For instance, in case of Podlesice village in Proszowice district, which was mentioned by Długosz (LB, vol. 2, p. 37) and then only in 1629 (Rej. pob. 1629, p. 151), we decided that Pokrzytowice, which in the sixteenth century were listed only in the 1597 visitation (AV Cap. 65, f. 326v) is probably the same village. Serafinowice, a village in Nowy Sącz district, visible still on Mieg's map, was identified as Zaprzewie, which was located in exactly the same place on Chrzanowski's map and later maps.

⁷ For instance, in case of Grodziec, a village in Silesian district, which was called 'Grodziec alias Łazy' in the register from 1589 (ASK I, 127, f. 215). Later these were – and still are – always two separate villages – Grodziec and Łazy – we decided that in the sixteenth century the name Grodziec denoted two later and present village. The village Grudzina in Książ district was often recorded as 'Grudzina alias Zegartowska Wola' in the registers, but because in the Middle Ages, in the 1595 register (BCzart, 329, f. 355), and later these were two separate villages, we did not identify Grudzina with Zegartowska Wola.

⁸ These were: Przeginia now Przeginia Duchowna and Przeginia Narodowa in Proszowice district, Sławice now Sławice Duchowne and Sławice Szlacheckie in Proszowice district, Łubno now Łubno Opacie and Łubno Szlacheckie in Biecz district.

⁹ There were two such instances, both in Silesian district: Rychwałd I now Rychwałd and Rychwałd II now Rychwałdek, and Międzybrodzie I now Międzybrodzie Kobiernickie, Międzybrodzie II now Międzybrodzie Żywieckie and Międzybrodzie III now Międzybrodzie Bielskie. We made the same distinction between Sikorka I and Sikorka II, situated on both sides of the border between Silesian district and the Duchy of Siewierz.

¹⁰ We located 35 ironworks, three mill settlements, four glassworks and 11 castles situated outside towns or villages, see J. Suproniuk, *Character and size of settlements*, [in:] AHP Cracow, in this edition III.3.2.1.

The diversity of the sources allowed us to find 24 demesne settlements with their own names, not related to any village.¹¹ It is dubious that this number would rise, provided we used other sources, but we cannot reject the possibility that some of the settlements known only from the 1595–1599 visitation were actually demesnes. Following the general rule, we did not mark on the map these demesnes, which were known only from sources created after the sixteenth century.

The term ‘localization of settlements’ denotes two operations. The first is the identification of a sixteenth century settlement with a settlement known from later, detailed cartographic records, and from lists of settlements from the end of the eighteenth century, Table 1827, or *Słownik geograficzny Królestwa Polskiego* (‘The Geographical Dictionary of the Kingdom of Poland’). The other is the localization of a given settlement on our map. We also used these works, whose authors had access to hard to reach or non-existent sources.¹² Sometimes, a settlement listed in the eighteenth or nineteenth century sources familiar to us could be localized thanks to the lists from *Urzędowe spisy nazw miejscowości i obiektów fizjograficznych* (‘Official Lists of the Names of Settlements and Physiographic Sites’), a series meant to cover the entire country, published in the 1970s. It contains a rich list of site names, gathered in the field, mostly in the 1960s, even if unequal in value. The abundance of names usually exceeds what can be found in the eighteenth and nineteenth century sources. The published volumes cover the vast majority of our area (except for Kłobuck, Częstochowa, Myszków, Zawiercie, and Bielsko-Biała districts from the old Katowice Voivodeship).

Settlements were localized on the basis of maps at a scale of 1:100,000 from the twentieth century, but according to their location on oldest detailed maps from the end of the eighteenth century and the first third of the nineteenth century. In most cases, the localization differed from the current one, due to numerous shifts caused by the division and integration of agricultural land (especially related to enfranchisement), rebuilding of the road network, river regulation, and urbanization-related changes, e.g. in the area now occupied by the Nowa Huta agglomeration. The reconstruction of the state of a given settlement was easier thanks to the maps of Wojskowy Instytut Geograficzny (‘The Military Institute of Geography’) from the Interwar Period, preceding the post-war settlement shifts, and – as a starting point – detailed maps from the end of the eighteenth century and the beginning of the nineteenth century. The localization of the vast majority of settlements presented on our map is certain, which could be described as certain identification with a settlement registered on the oldest detailed maps from the turn of the eighteenth and nineteenth centuries. The localization of settlements on these maps is usually close to the reality of the second half of the sixteenth century, or even earlier.

Certain localization was based on the maps by Mieg and Heldensfeld, and the Topographical Map, which are known for the abundance of marked settlement points, as well as the precision, with which their names were placed.¹³ W. Chrzanowski’s map played an auxiliary role. Even though its scale was slightly smaller than the scale of our map, the map itself was based on various, detailed maps.¹⁴

It is a known fact that in the period between the end of the sixteenth century, and the end of the eighteenth century, some settlements changed their location at times, due to floods, resulting in changes of the course of rivers, or fires, local relocations of road, and the foundation of towns on the site of old villages. These changes were usually small, not important for our map, and therefore – and also because they remain unrecognized – not included on our map.

Few settlements were localized in approximation. In such cases, we followed the two possible courses of action. A settlement located close to another settlement of certain localization was marked with a circle linked with the sign of the other settlement; in the key such villages were described as ‘villages of linked localization’, and the name of the village localized in approximation was not marked on the map, but only listed in the index.¹⁵ Other settlements of approximate localization were marked

¹¹ See *ibidem*.

¹² This means the works of S. Plaza, *Solectwa*; B. Kumor, *Osadnictwo lemkowski*; Noga, *Słownik*; J. Sygański, *Arendy klasztoru starosądeckiego*.

¹³ These maps allowed us to localize in a certain manner 20 hamlets, which do not exist now, and did not become parts of present-day settlements – five in Lelów and Nowy Sącz district, three in Książ and Silesian district, two in Szczyrzyc district, one in Biecz district and the Duchy of Siewierz.

¹⁴ See the chapter on cartographic sources.

¹⁵ The majority of such instances occurred in Szczyrzyc (15) and Nowy Sącz (11) district.

with separate circles, with a dashed line, and signed with separate names. According to our findings, such a settlement was probably situated on the site occupied today by a settlement founded later, or nearby, but there is no way we could confirm that for certain (in the first case), or we are unable to indicate its precise location (in the latter case).

As approximated location we understand, therefore, two different types of uncertain location: an uncertain identification and an approximate, estimated localization *sensu stricto*. Hypothetical identification of a sixteenth century settlement with a later settlement is possible only, when the similarity of names, or the order, in which the names were listed, suggested they could have meant one settlement, but we had no information allowing for certain identification. Approximate localization was used, when a settlement could be localized only in estimation, i.e. with error exceeding the permissible 1 km (4 mm on the map), because we were unable to find any trace of the old settlement on detailed and precise maps. In such instances, the localization was based on less precise information, e.g. source records suggesting the same owner ('attinencja', 'solvit cum' and such), names of fields in villages existing today, and names of parts of these villages, recorded in *Urzędowe spisy nazw miejscowości i obiektów fizjograficznych*.

We refrained from an approximate localization, when our information about the location of a settlement was too general, e.g. relating only to its parochial affiliation. Such a settlement was considered unlocalized, and its name appears only in the index of settlements, and in Table 1. Detailed research on settlement in smaller areas, using sources unknown to us, could confirm some approximate localizations in the future, or reduce the number of unlocalized settlements.

We were unable to localize, even in an estimated manner, 19 settlements from the sixteenth century (Table 1). At the end of the sixteenth century, there were 2,577 settlements in Cracow Voivodeship (without the Duchy of Siewierz), so the unlocalized ones are 0.7% of the total, more than in the Voivodeship of Sandomierz (0.3%), and the same as in the Voivodeships of Sieradz and Łęczyca (0.7%).¹⁶

Głębokki Dół, a village in Szczyrzyc district, was not included among the unlocalized settlements. The village was listed in the registers from 1581 and 1583,¹⁷ and we can read in the 1588 register that 'there only the demesne should not give anything, and it was not paid for'.¹⁸ It does not appear in any later source. We omit unlocalized demesnes, so Głębokki Dół was also not included. Likewise, the village Franciszowice, Silesian district, was excluded from our work. Since 1516 the village belonged to the burghers of Oświęcim, it was mentioned in the 1529 *Liber retaxationum*, and then only in the 1598 visitation, but we consider that last record to be copied from earlier sources, and the hypothetical identification with a much later village Pławy too risky.¹⁹ Gawszyce, a village in the duchy of Siewierz was also omitted. It was mentioned in 1529 for the last time, and the assumption is it had been abandoned.²⁰

Adolf Pawiński claimed that according to the register he published, there were 71 towns and 2,206 villages, i.e. 2,277 settlements, in Cracow Voivodeship in the second half of the sixteenth century.²¹ We had access to visitation from 1595–1599 for the entire area, and – secondly – the number of tax registers from the second half of the sixteenth century was quite significant (also, we could use the registers from 1593 and 1595). Thirdly, mills, ironworks and castles, which had their own name and could therefore be localized, were treated as separated settlements. Finally, settlement expanded in the forested piedmont areas along the borderland with the Habsburg country. Because of all that, we were able to verify the above numbers. In total, in relation to Pawiński's data, the number of settlements was increased by 16.7%, and was higher than in Sieradz and Łęczyca Voivodeships (15.75%), not to mention Sandomierz Voivodeship (13.8%).²² In Książ district the growth was definitely the lowest

(3.9%), it was average for the districts of Biecz (6.4%), Proszowice (7.0%), and Szczyrzyc (11.9%), and high in Silesian (14.2%), Lelów (16.8%), and the highest in Nowy Sącz district (32.2%). Lists of settlements in the duchy of Siewierz published by A. Pawiński are not from the sixteenth century, there would be no sense in comparing them.

Settlements in the discussed territory differed in size, from small hamlets, mill settlements to large cities. As such, the data contained in Table 2, related with density of settlement, is approximate. The density of settlement in Cracow Voivodeship (12.9 settlements per 100 km²) was higher than in the Voivodeship of Sandomierz (11.9). Although the mountain areas along the southern border were poorly inhabited, the remaining parts of the voivodeship are the areas of old, and very dense settlement, especially Proszowice and Książ districts, and almost entire Szczyrzyc district. Density of settlement depended also on forestation – high along the southern border and in part of Lelów district, as well as the lay of the land – piedmont areas are usually less inhabited than lowlands.

Table 1. Unlocalized settlements

District	Parish	Settlement	Last record
Proszowice	Bierków	Wielka Droga	1598
Proszowice or duchy of Siewierz	Chruszczobród	Przybysławice	1598 ^a
Książ	Kozłów	Stanowiska	1598
Książ	Mironice	Radziszów	1598
Książ	Sędziszów	Witkowiec	1595 ^b
Szczyrzyc	Chełm	Biernaszowice	1597
Szczyrzyc	Droginia	Ratanica	1597 ^c
Szczyrzyc	Królewką	Zakliczyn	1597 ^a
Szczyrzyc	Niegowiec	Stara Wola	1595
Szczyrzyc	Wieliczka	Wolica	1595 ^d
Nowy Sącz	Ilmanowa	Rzeka	1596 ^a
Nowy Sącz	Jakubkowice	Porzecze	1596 ^a
Nowy Sącz	Łososina	Wolaków	1597 ^a
Nowy Sącz	Nowy Targ	Zawada	1564 ^e
Nowy Sącz	Sądecz Nowy	Gocz	1608 ^f
Nowy Sącz	Sądecz Nowy	Hamplowa	1608 ^g
Nowy Sącz	Tęgoborze	Podgórze	1596 ^a
Nowy Sącz	Tropie	Załogoszczce	1680
Silesia	Oświęcim	Sparowice	1598

a – The only record.

b – In the sixteenth century Witkowiec always belonged to the same owners as Pawłowice, but – in our opinion – this does not mean they were situated close to each other.

c – In SGKP, vol. 9, p. 540 it is said that Ratanica was the name for a forester's lodge in Droginia.

d – Probably identical with Wólka, appearing only in 1629 and 1680 (Rej. pob. 1629, p. 86; Rej. pob. 1680, p. 95).

e – The 1564 visitation states: villa nova Zawada, they are locating a village between the town and the village Klukoszowa, which is called Zawada, because it stands in the way, where four serfs live (LK 1564, part 1, p. 47). This is the only information about this village.

f – SHGK, part I, no. 4, p. 764.

g – SHGK, part II, no. 1, p. 137.

Table 2. Density of settlement

District	Area in km ²	Number of settlements	Number of settlements per 100 km ²
Proszowice	3,293	607	18.4
Książ	1,451	215	14.8
Lelów	3,191	299	9.4
Szczyrzyc	3,394	527	15.5
Nowy Sącz	3,922	455	11.6
Biecz	2,163	281	13.0
Silesian	2,629	193	7.3
Cracow Voivodeship	20,043	2,577	12.9
Duchy of Siewierz	679	78	11.5
Duchy and voivodeship	20,722	2,655	12.8

Translated by Agata Staszewska

III.3.1.2 SANDOMIERZ VOIVODESHIP

Kazimierz Pacuski

The main rule for the preparation of a detailed map of sixteenth century Poland, was to present the complete settlement network, with site names for the second half of this century.¹ Our first task was to prepare a complete list of settlements. However, tax registers, the main source for the reconstruction of the state of settlement, do not – for all we know – list all settlements that existed at the time of the creation of the above-mentioned sources. Above all, the settlements which were not subject to taxation, were not mentioned, these were: monasteries forming individual settlement units, demesnes, and newly located villages, or settlements being rebuilt after a natural disaster (fire, flood) and temporary freed from taxation. We must also take into account possible imprecisions, accidental omissions, and finally: tax abuses. Admittedly, such abuses meant rather the lowering of the base for the taxation, not the omission of entire settlements, but it was possible, that the collectors failed to notice a concealed hamlet or small village, especially when it was peripherally situated.

Therefore, in order to fill in the missing data, from, after all, not so many surviving tax registers from individual districts of Sandomierz Voivodeship in the second half of the sixteenth century, we have decided to consult other sources.² These were, above all, the invaluable visitations of Cracow diocese from the end of the sixteenth century and the beginning of the seventeenth century. We also used inventories and visitations of royal and Church property from the sixteenth and seventeenth centuries, which provided information about, e.g. newly located settlements in the last quarter of the sixteenth century, which were not always listed in the documents of parish visitation.³

Our query in the sources also encompassed, as in the case of Mazovia, numerous earlier and later sources, as the settlements which did not appear in our sources from the second half of the sixteenth century, but which do appear in the sources from the second half of the fifteenth century and the first half of the sixteenth century, and then in the seventeenth and eighteenth century records, must have existed also in the second half of the sixteenth century, and were thus marked on the map.⁴ Few settlements attested to earlier, i.e. before 1550, and next only after the Partitions, were assumed aban-

¹ The rules applied for the localization of settlements on detailed maps of the sixteenth century were thoroughly explained by H. Rutkowski see: H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7. Some terms used in this text were taken from the quoted text of H. Rutkowski. See also I. Gieysztorowa *Osadnictwo*, [in:] WP, p. 24 f.

² These registers and other sources were compiled by K. Chłapowski (K. Chłapowski, *Źródła pisane*, [in:] AHP Sandomierz).

³ In the visitation of Sandomierz archdeaconry in 1604 names of settlements were omitted in as many as 14 parishes, which constituted 28% of their number; these were mostly the parishes which remained in the hands of reformed denominations. In other Church districts of Sandomierz Voivodeship within the boundaries of Cracow diocese this percentage was lower; no documents of visitation survived for parishes belonging to Gniezno archdiocese within Sandomierz Voivodeship.

⁴ For instance, in Opatów estates of Lubusz bishopric in the fifteenth century, there was a village Bielsz, according to Długosz's description it had an inn and a mill (Długosz LB, I, p. 638 f.). It was listed in 1519 because these estates were appropriated by Szydłowiecki (J. Wiśniewski, *Dekanat opatowski*, Radom 1908, pp. 300 f.), and then in the eighteenth century (since then it is called Bełcz). In the nineteenth century this was a small hamlet (Table 1827 – two houses, SGKP – four houses). Another example could be Borowno by the Kamienna near Ćmielów, listed in the estates of the family Szydłowiecki in 1510 (MRPS IV, no. 9775), and then – because of tithe – in a document of Piotr Brandysz (died in 1565), quoted by J. Wiśniewski, *Dekanat opatowski*, p. 110; according to Table 1827 this hamlet had four houses at the time.

done already before 1550 (their name persisted as a site name, which allowed their restoration later as a name for a settlement).⁵

Finally, we have marked some settlements mentioned in the sources from the first decade of the seventeenth century on the map, if the source indicated that this settlement had existed already in the sixteenth century. For instance, an visitation of Sandomierz archdeaconry in 1604 lists names of villages unknown to tax registers from the sixteenth century. Some of those villages must have had existed already in the end of the sixteenth century, as they appear in the inventories of royal property from this period;⁶ this supports the thesis that also other settlements, which do not appear in the sixteenth century sources, but are mentioned in this visitation, had been founded before 1600.⁷ Another example could be the mine called Szczukowskie Góry situated in the estates of the bishop of Cracow near Kielce in Chęciny district. Its functioning is proven since 1606 and we have assumed that the mine had already operated in the end of the sixteenth century.⁸

Apart from names that undoubtedly indicate separate settlements, other topographical names appear in the sources from the fifteenth–sixteenth centuries, and it is not always possible to determine, whether such a name was also a settlement name. Some of them are mentioned in the seventeenth century sources as names of separated settlements. However, we have not put them on our map, if there was no clear information about a settlement existing in a given area already in the second half of the sixteenth century. Przewłoka by the Vistula south of Pokrzywnica-Koprzywnica could be an example here, the village is mentioned in 1662 and is still known today. The name of this settlement does indeed derive from an old, early-medieval nomenclature (undoubtedly it was the place where boats on the River Koprzywnianka, or Koprzywnica, took a shortcut to the Vistula or the other way round here), however, in the fifteenth century it was still probably a field name, and in the sixteenth century it was not mentioned in our sources.⁹

We decided not to include settlements mentioned in the second and third decade of the seventeenth century and not attested to in earlier sources, although some of them could have already existed in the sixteenth century as separate villages. For instance, there is a demesne Kąpie (later: Kępie) near Pokrzywnica-Koprzywnica known in the seventeenth century and related to the nearby village Niedrzwica; perhaps earlier it was considered a part of this, or one of neighbouring villages.¹⁰ Another example is the mill Bykowiec on the River Łukawa, related to the village Góry Wysokie. It was mentioned in 1620, and on the Topographical Map it was presented as a separate settlement. In the sixteenth century tax registers this mill is, on the other hand, mentioned by Góry Wysokie

⁵ We did not include, for instance, Ocice near Machów. Prior to the fifteenth century it was a small village belonging to the Cistercians from Koprzywnica. After the village was deserted in the first half of this century, the monastery exchanged it for Siedleszany (Długosz, LB II, pp. 358–360; Długosz LB, II, p. 387). Ocice do not appear in the sources from the sixteenth–eighteenth century, nor on the oldest detailed maps from the turn of the eighteenth/nineteenth century. This village repopulated again in the nineteenth century (SGKP, vol. 7, pp. 369 f.), it appears on a Prussian map at a scale 1:300,000 from 1910, and later on WIG map 1:100,000 north-west of Machów.

⁶ In Bieliny parish (Sandomierz district) the visitation in 1604 recorded a village Kurzyna, unknown to the registers (f. 15); however, we know that it was a royal village, located in 1571 (MRPS V, no. 10663), it is described in the inventories of Sandomierz starosta's district from 1586 (Wola Kurzyńska), 1589, 1597 and later. However, a royal village Komorów, located in 1599 was not listed in the 1604 visitation; according to later data it belonged to Sławogóra parish.

⁷ For instance, in Górna parish, near the border with Przemyśl land, the 1604 visitation lists a village unknown to earlier sources – Dołęga, which belonged to a nobleman, not mentioning that it was a newly-located village. In 1662 it was described as *predium*, but there were serfs there; in the sixteenth century it could be a demesne, but we have no certainty.

⁸ This mine (lead ore) was listed in 1606 in parochial documents of Kielce collegiate; two baptisms of children born in the village connected with the mine were recorded; See J. Pazdur, *Dzieje Kielc do 1863 roku*, Wrocław 1967, p. 64. The visitation of Kielce deanery from 1598 contains no information about villages in this parish.

⁹ J. Nalepa paid attention to this Przewłoka J. Nalepa, *Krytyczne i metodyczne uwagi o nazwach miejscowych dawnego województwa sandomierskiego*, [in:] *Opuscula Slavica*, vol. 2, Lund 1973, p. 143. A. Wędzki did not use this name from Sandomierz, one of the few in the Polish lands, A. Wędzki, *Przewłoka*, [in:] *Słownik starożytności słowiańskich*, vol. 4, 1970, p. 390. The record of this name in Długosz: 'inter lacum Łanżek et Przewocze' (Długosz LB, II, pp. 321 f.) was naturally distorted. In the nineteenth century it was an average-size village with a demesne (SGKP, vol. 9, p. 181).

¹⁰ The name of the demesne was recorded by Bastrzykowski (A. Bastrzykowski, *Monografia historyczna parafii Jankowice Kość. Sandomierskie*, Warsaw 1927 p. 136), in the estates of Andrzej Boboła, a seventeenth century administrator of the tax on alcohol in Sandomierz district, and his wife, Marcjanna from the family Łapsza Trembecka; they owned Niedrzwica with a manor and demesne Kąpie, Postronna with a demesne, and parts of Zbigniewice, among others.

and not given any individual name, which seems to suggest that at that time the mill was treated as a part of the village.¹¹

We have also refrained from including names which appear only once, without any detailed data indicating that they were in fact names for a separate settlement. Therefore, we have omitted e.g. Zawierzbie, which appears once in a register from 1578 in Sandomierz district, but without information on payment,¹² or Miła listed only in the 1597 visitation of Słupia Nowa parish (it was probably an inn, and inns were usually included in a nearby larger village).¹³

On the map, we denoted only independent settlements with individual names consisting of one or several clusters of residential and farm buildings, whose inhabitants exploited specified area, more or less separated from the grounds of neighbouring villages.

Various factors, including topographical, property and economy related, or administrative-judicial ones, influenced the process of emergence of settlements.¹⁴ In a long-inhabited area, e.g. on fertile soils in the vicinity of Sandomierz, Opatów and Pokrzywnica-Koprzywnica, where the process of intensive concentration of the settlement network was advanced already in the early-medieval period,¹⁵ the borders between villages in the sixteenth century were usually clearly defined in the field and underwent only small changes. The stabilization of the borders was influenced by ownership relations – sometimes even permanent; especially in the case of villages belonging to Church institutions. The situation was different in larger forest complexes, areas subject to intensive colonization in the sixteenth century, e.g. in Sandomierz Forest; numerous newly-located settlements were created close to older ones. These new settlements were created in earlier undeveloped areas, both in royal and nobility estates; here, the borders between settlements stabilized later.¹⁶

The range of autonomy of individual settlements was fluid at times, and evolving in various directions. Most often this was the case with smaller settlements, like demesnes, ironworks and mills. They were usually given the name of the nearby village, even though the distance that separated them from the village buildings varied; sometimes they lay even several kilometres from the centre of the village. Yet, the more distant of these smaller settlement units, or more economically independent, like demesnes belonging to larger estates, where peasants from several village worked, were often given their own name and treated as separate villages. Similarly, a separate monastery or castle could be given a name, like Golez castle related to a demesne belonging to the Benedictines from Tyniec, situated for reasons of defense on a hill on the right bank of the Wisłoka.¹⁷

One type of settlement of farm gentry, common in Mazovia, did not appear in Sandomierz Voivodeship. Such settlements consisted of small hamlets, sometimes with only one manor, going under

¹¹ P. Małopolska, p. 176, Bastrzykowski (A. Bastrzykowski, *Monografia historyczna parafii Góry Wysokie*, Sandomierz 1936, p. 204 f.), mentions this mill in a description of an argument in 1620 between the canon of Dwikozy prebend in Sandomierz chapter, and the abbess of the newly-founded monastery of the Benedictine sisters in Sandomierz. A separate mill settlement was, in fact, marked on the Quartermaster' Map, but it was omitted in Table 1827 and SGKP.

¹² P. Małopolska, p. 168. This name was recorded in the register at the end of Osiek parish; settlements in this parish lay south of Pokrzywnica (Koprzywnica). In the end of the eighteenth century Zawierzbie was a part of a different parish – Samborzec near Sandomierz, and belonged to Cracow bishopric (Czajkowski); according to Table 1827 there were three houses there.

¹³ 1597 visitation, AV Cap. 8, f. 511. In the nineteenth century we know an identical name Miła for an inn village near Vilnius (SGKP, vol. 6, p. 432). Undoubtedly, the name Miła, given to a small village in Sandomierz Voivodeship near the Końskie–Odrowąż road, attested around 1830 by the Quartermaster' Map, also comes from the name of the inn (the course of the road on this fragment – see also K. Perthès's map of Sandomierz Voivodeship).

¹⁴ More about it: H. Rutkowski, *Location of settlements* [in:] AHP Mazovia, in this edition III.3.1.7.

¹⁵ See especially R. Mochnecki, *Zasięg pralasu na wyżynie kielecko-sandomierskiej* (map 1:300,000), Cracow 1937; *Studia sandomierskie*, 1967, passim; see also K. Pacuski, *Uwagi nad potencjałem gospodarczym Małopolski w XI w. w stosunku do innych dzielnic Polski*, KHKM, vol. 16, 1968, pp. 225–248.

¹⁶ See, for instance, the documents of the demarcation of royal estates and the estates of Stanisław Mielecki and Jan Tarnowski in the edge of Sandomierz Forest (Archiwum ks. Sanguszków 1897, vol. V. 1513–1547, no. 103, 129, 178 in 1519, 1524, 1528). The outer borders of these estates set, among others, along watercourses, were naturally more permanent than the borders of particular villages in these estates. About the colonization of these areas see M. Dobrowolska, *Osadnictwo Puszczy Sandomierskiej między Wisłą i Sanem*, „Krakowskie Odczyty Geograficzne”, 1931, no. 14. About appropriation of the edge of royal forests, and appropriation of these areas to nearby villages of the nobility see W. Pałucki, *Przynależność własnościowa osad*, [in:] AHP Sandomierz, in this edition III.3.3.2.

¹⁷ See Guerquin, Zamki, p. 138 (ibidem, bibliography). A village Podzamcze, later related to this castle did not exist in the sixteenth century. It is attested only in the eighteenth century; the Benedictines owned a nearby town Kołaczyce.

a common name and distinguished by means of an additional epithet (e.g. Zalesie Borowe, Zalesie-Grzymały, Zalesie-Lenki, Zalesie-Paczoski), where it was sometimes difficult to decide, whether these were separate settlements, or only parts of one village. H. Rutkowski stated: ‘In case of records in tax registers, which could denote separate settlements, or only parts of settlements, we usually assumed the first possibility, so as to not omit an existing settlement, rather than avoid taking parts of villages for separate settlements’.¹⁸ On the other hand, in Sandomierz Voivodeship we were not always certain, whether a village belonging to two different large property owners was in fact one village, or two separate settlements of the same name. This was mostly the case with villages, whose parts belonged to two different Church representatives, e.g. Cracow bishopric and a wealthy monastery. Given that large property owners usually preferred to separate their settlements, in terms of law and space, we followed the rule saying that a lack of clear proof that we were dealing with two settlements in the second half of the sixteenth century, distinguished by means of an epithet added to the name of a village, instructs us to treat a property of two different owners as one settlement.¹⁹

Suburban settlements with an individual name and clear spatial distinction, numerous in Sandomierz Voivodeship, were treated as separate settlements. Suburbs of Sandomierz, situated even several kilometres from the city walls belonged to this category; they consisted of clusters of demesnes belonging to burghers, as well as small hamlets owned by Sandomierz monasteries and churches, the nobility, or even the king. On the other hand, the main map does not show closer suburbs, tightly related to the city, and undoubtedly constituting its integral parts; they were presented on the map of Sandomierz.²⁰

As in the map of Mazovia, mills, ironworks or even glassworks and mines were treated as separate settlement points, if they had an individual name and a fixed settlement autonomy, allowing for their precise localization.²¹ Therefore we have omitted a significant number of these units – those without their own name and attested separate localization – which were treated as parts of already-marked settlements. Mills, appearing very often in tax registers and other sources, usually called by the miller’s name and situated near the village or in its vicinity, constituted parts of larger villages, not autonomous settlement points. Ironworks, usually called ores, were actually normally situated outside villages, but sometimes they deteriorated or moved, and having changed owner they also sometimes changed their name.²²

¹⁸ H. Rutkowski, *Location of settlements* [in:] AHP Mazovia, in this edition III.3.1.7.

¹⁹ Doły in Sandomierz district near Kunów could be an example of such a village. Part from the part belonging to the bishop of Cracow, there was a smaller part belonging to the abbot of Święty Krzyż monastery, with a mill (LR 1529, p. 350). For these parts the names Doły Biskupie and Doły Opacie formed later, attested on maps and in written sources since the turn of the eighteenth/nineteenth century, preceded by K. Perthées’s record on the map of Sandomierz Voivodeship from 1788/1791 (Doły Biskupie, Doły Opacie). Probably in the sixteenth century both these villages were already separated, but because they are not called with different names by the sources, we treated them a parts of a larger village; so only one settlement was marked here.

²⁰ About them see M. Buliński, *Monografia miasta Sandomierza*, Warsaw 1879, pp. 120–127. Some suburbs appear also in tax registers, like Chechły, suburbs of Ropczyce, in the fifteenth century called ‘Antiqua Robeczice seu Chechli’ (KDKK, no. 597, 605 from 1420, 1421). For the sixteenth century see P. Małopolska, p. 250 (y. 1581), 506 (y. 1536). Near Zawichost, next to Dziurów suburbs, which appears in Church sources from the fifteenth and sixteenth century and in the seventeenth-century registers, and probably – like the town – belonged to the Sisters of St. Clare from Cracow, we also marked a royal demesne, separately due to different ownership. The fields belonging to the demesne were scattered, but its buildings constituted an isolated cluster, administratively related to the royal castle situated in the Vistula’s clump. Information about the demesne come from the inventories from 1510 (ASK LIV 9, f. 90 – *predium zawichostense*) and from 1612 (ASK LVI 35, f. 4v – description of demesne buildings). See also LS 1564/1565, p. 155 f.

²¹ Baryczka mill in Radom district is a peculiar example here. In the visitation from 1598 (AV Cap. 14, f. 292), in Zwoleń parish, where the village Barycz is situated, the name Baryczka was also recorded, unknown here in fact. 11 km east of Barycza there is a village – Baryczka, attested in 1663 as a mill in Janowiec parish. The sixteenth century name, known only from visitations, could denote a demesne village, or a mill village, so this identification was considered as the most probably solution. However, we are not certain, whether in the sixteenth century Baryczka was a mill village, so in the index the term mill was marked with a question mark. ‘Grabcina’ mill was, on the other hand, omitted. It was mentioned in the 1597 visitation (AV Cap. 8, f. 507), Wzdół parish in Sandomierz district, but we are not certain about its identification with a mill called Grabka (1662), and then Grabków; in 1827 there were two houses in Grabków, and it was marked on the Quartermaster’s Map, then it disappeared (it belonged to the estates of Cracow bishopric).

²² Nomenclature changes could be seen on the example of glassworks in the estates of the family Szydłowiecki (Huta Jakubek, Radom district). In 1569 it was recorded as ‘Hutha ku Sidlowczowy’ (P. Małopolska, p. 325), but in other registers from the sixteenth century as ‘Vitreaia Jakubek’. We identify the glassworks with Hucisko Jakubek (poll tax in 1662), then

The variety of the sources we used allowed us to discern a group of autonomous demesne settlements, much bigger than in Mazovia, which had their own names and were not related to a village. Borów in Sandomierz district in the estates of the Tarnowski family – definitely large property owners – could be an example here. In the fifteenth century it was still a village. However, in the sixteenth century it did not appear in tax registers, but was listed among the estates of the family Tarnowski, and in 1662 it was clearly called ‘Borow praedium’. We can therefore assume, that already in the sixteenth century it was only a demesne, that is why it was not listed in the registers; consequently, we marked Borów as a demesne on our map. The fact that Borów survived as a demesne until the first half of the twentieth century was also important in this matter.²³ Because also in the centuries following the sixteenth separate, autonomous demesne settlements were rare, it does not appear, that the cartographic picture of their location presented on our map would change much, if we used further sources.²⁴

According to our rule, we did not distinguish demesnes connected to villages, treating them as integral parts of marked settlements. Perhaps some of the settlements marked on our map as villages or hamlets were, or became in the sixteenth century actual demesne settlements, devoid of serfs and *hortulani*, because the division between these two types of settlements was fluid. The term ‘praedium’ which appears in the sources was at times used also to denote settlements owned by the nobility, inhabited not only by the owner’s family and their servants, but also by several *hortulani*, e.g. the village called Gaj, where the well-known seventeenth century poet and historian Wespazjan Kochowski was born and where he spent much time, situated near Waśniów in Sandomierz district; in the second half of the sixteenth century the village paid for three *hortulani*, a mill and a quarter of a field.²⁵ According to the general rule, we did not mark demesnes known only from the sources created after the sixteenth century on our map.

Monasteries situated outside villages or towns, i.e. having features of separate settlement points of a specific nature, were marked on the map with a different sign. These were Benedictine monasteries: Sieciechów by the Vistula near the mouth of the Wieprz outside the city, also called Sieciechów, and Święty Krzyż situated on Łysa Góra (Łysiec), known for its great traditions; Cistercian monasteries situated outside located cities in Pokrzywnica (Koprzywnica) and Sulejów, but the latter was autonomous from the city located on the left bank of the Pilica, belonging to the neighbouring Sieradz Voivodeship; finally, a Bernardine monastery (for women from the nineteenth century), much younger than previously listed monasteries, lay in the vicinity of Łysica, it was called Święta Katarzyna.²⁶

Hucisko (Czajkowski, Perthées), Huta Szydłowiecka (Quartermaster’ Map), Huta (Hucisko) and finally Hucisko on the maps from the twentieth century. It was localized according to Heldensfeld’s and Topographical maps.

²³ According to Długosz (Długosz LB, II, p. 359) there were serf lans and two knights’ demesnes here. Borów was listed in 1527 among the estates of Spytek Tarnowski (MRPS IV, no. 15254), in 1571 – of Stanisław Tarnowski (MRPS V, no. 10626). On WIG map at a scale 1:100,000 this village was described as ‘Folwark Borów’ in 1938. Irzmanowice in the estates of the Święty Krzyż monastery could be another example. According to Długosz this settlement was turned into a demesne early (Długosz LB, II, p. 471); in the seventeenth or eighteenth century the name of this demesne changed to Wierzbontowice. In the nineteenth century it was a small hamlet, with only 1–2 houses (Table 1827; SGKP, vol. 13, p. 401).

²⁴ Only three royal demesnes were marked on the map of Mazovia in the sixteenth century: Buszyce in Sochaczew district, Szczawinek in Mszczonów district and Ruda in Przasnysz district (See H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7.). The fourth royal demesne was omitted, it was called Rąbież and situated 2.5 to the north-east from Dzbonie village (Zbonie on the map) in Ciechanów district (localization according to the Quartermaster’ Map and WIG maps), described in the visitations from 1565 (without a name) and 1617; LM 1565, part II, p. 5; LM XVII, part I, p. 57 f. The name of the demesne was mechanically identified with a village of the nobility Rąbież near Grudusko (Przasnysz district), and as a result the latter was incorrectly marked as royal property. The mistakes in localization on the map of Mazovia were clarified in the errata and corrected in this edition.

²⁵ In tax registers Gaj was listed not in Waśniów parish but in the neighbouring Grzegorzewice parish (the same in P. Małopolska, p. 185), as praedium Gaj appears in registers from 1577 and 1581. The family Kochowski owned Gaj already in the fifteenth century, it was a demesne village (‘solus haeres agros arat’, Długosz LB, II, p. 475). About W. Kochowski see especially his biography by F. Bielak and R. Pollak, PSB, vol. 13, pp. 218–220. The localization of the village was based on the detailed map by Heldensfeld (the location west of Kowalkowice confirmed by Perthées’s map), another localization near Waśniów can be found on the Quartermaster’ Map. According to Table 1827 there was only one house in Gaj, and then the village disappeared; the field name should be remembered by the locals, but it was not listed in Urzędowe nazwy.

²⁶ See *Kościół w Polsce*, vol. 1: *Średniowiecze*, ed. J. Kłoczowski, Cracow 1966, index and maps. On Łysa Góra, next to Święty Krzyż monastery, there were two inns in the times of Długosz (Długosz LB, III, p. 230), in 1529 at least one (LR, p. 350). About the location of Sulejów – city and abbey, see W. Pałucki, *Granice i podziały polityczno-administracyjne*, [in:] AHP Sandomierz, in this edition III.2.1.2.

We are moving now to proper issues of the localization of settlements. This term denotes in fact two processes. The first is the identification of a settlement attested to in the sources for the second half of the sixteenth century with a settlement known to us from later, detailed cartographic records, and also lists of settlements from the end of the eighteenth century, Table 1827, or the monumental *Słownik Geograficzny Królestwa Polskiego*. The second process is the proper localization of a given settlement on the map. Often we had to take into account the modern history of a given settlement, changes of its name and property affiliation in the seventeenth and eighteenth centuries. In such cases we have consulted archival materials, as well as former and more recent regional literature, which used sources that do not exist today, or are difficult to obtain, usually scattered and not catalogued. These sources were subject to necessary source evaluation.²⁷ Sometimes thanks to the lists of *Urzędowe nazwy miejscowości i obiektów fizjograficznych*, a post-war publication meant to cover the entire country and published in volumes for individual administrative units, whose publication was unfortunately stopped in the beginning of the 1970s, we were able to localize a settlement not mentioned in the seventeenth–nineteenth century sources known to us. This publication contains a rich set of now used site names, however uneven in value. For some areas there are visibly fewer names than there were earlier, as could be seen from the eighteenth and nineteenth century information. We have rarely tried to supplement the list with the information provided by field informants.²⁸

Settlements were localized on the basis of detailed maps of WIG at a scale of 1:100,000 from the first half of the twentieth century, but according to their localization shown on oldest detailed maps from the end of the eighteenth and first third of the nineteenth century. In many instances this localization was different from the twentieth century one, due to numerous transfers of settlements caused by e.g. allotment and enclosure of fields, mostly related to enfranchisement, reconstruction of road network, river regulations, urbanization changes, and to the building of new industrial sites in the nineteenth and twentieth centuries. Serious changes affected the settlement e.g. in the valley of the River Kamienna as a result of the regulation of this river, the building of new industries and the rebuilding of older centres. Lately, great changes in the settlement have occurred in the valley of the Vistula near Tarnobrzeg and Machów, where since 1958 there has been a sulphur mine. WIG maps from the Interwar period, i.e. from the period preceding the post-war settlement changes, have made the reconstruction of the former state much easier, and the accuracy of these carefully prepared maps is enough for our purposes.

The schematic sign denoting a settlement was placed on the map according to the rules of cartographic generalization, for located cities – at the location of the market square, for villages – at the church, manor, place around which the buildings concentrated, and for villages where the buildings were scattered – at the location of the old road knot, if the other elements were lacking.

The vast majority of the settlements presented on our map were those of certain localization, which should be identified in a certain manner – provoking no doubts – with a settlement registered in the oldest detailed maps from the turn of the eighteenth and nineteenth centuries.²⁹ The localization of settlements shown on these maps is undoubtedly usually close to the reality of the second half of the sixteenth century, and when old, historical buildings (e.g. church, castle, manor, mill) or old urban layout survived, we are almost certain that it corresponds to the state from the sixteenth century, or even earlier centuries.

²⁷ See the commentary on written sources. Rev. J. Wiśniowski's works were used, among others, which provided descriptions of parishes in particular deaneries, as well as comprehensive monographs of several parishes by Rev. A. Bastrzykowski. E. Wiśniowski's work proved very useful (E. Wiśniowski, *Prepozytura wiślicka do schyłku XVIII w. Materiały do struktury organizacyjnej*, Lublin 1976), a large volume devoted to the history of Dąbrowa district (*Dąbrowa Tarnowska. Zarys dziejów miasta i powiatu*, ed. F. Kiryk, Z. Ruta, Warsaw–Cracow 1974) and the study by E. Wiśniowski, *Z dziejów opactwa benedyktynów w Sieciechowie*, „Roczniki Humanistyczne”, vol. 7, 1958 (1960), no. 2, pp. 23–120.

²⁸ Our questions sent to commune offices were usually answered negatively.

²⁹ Młogolice (Wiślica district) could be an example of certain identification. This village lay near the border of Sandomierz Voivodeship, by the Nidzica, near Podolany, situated already on the right bank of the Nidzica, and belonging to Cracow Voivodeship; in the fifteenth and sixteenth century Młogolice and Podolany had a common owner (Długosz LB, II, 143 f., 146, 411, 420; P. Małopolska, p. 13, 216). We identify it with a village Cło, existing to this day. This certain localization was based on a record in the 1610 visitation ‘Młogolice alias Czło’; E. Wiśniowski, *Rozwój sieci parafialnej w prepozyturze wiślickiej w średniowieczu*, Warsaw 1965, p. 131, footnote 230, proceeded similarly.

However, sometimes specific examples, better grounded in the sources, show that also between the end of the sixteenth and the end of the eighteenth century changes in the location of particular settlements, especially small ones, must have occurred as a result of floods and related changes in stream channels, fires, changes in the local road network, and also the location of new towns on the grounds of old village settlements.³⁰ However, shifts below 1 km are not important in the generalized depiction of the settlement on the map at a scale of 1:250,000 (1 km in reality equals 4 mm on the map). The case of the town Ryczywół is a quite exceptional example of a serious change, which occurred in the first quarter of the nineteenth century: now the town lies 2 km from its previous location; on our map, as on the map of Mazovia, Ryczywół is situated near the voivodeship border, and was naturally marked in its former location, i.e. on the low flood bank of the Vistula, near the mouth of the rivulet Radomierza (Radomka).³¹

The localization of some settlements on our map is estimated (approximate). It was marked in two ways. A settlement localized separately was marked with a single circle, in discontinuous line and provided with its proper name. A settlement localized near a settlement of certain location was marked with an additional circle, linked with the circle marked with a continuous line; in the key such villages were described as 'villages of linked localization', and the name of the settlement localized in estimation was not put on the map, but listed in the index. A village presented on the map in this way could be a sixteenth century village situated in an area occupied by a given settlement, but we do not know its specific location. It could also be a village (or villages – marked with respective number of circles), related to a given area only hypothetically.³²

As such, estimated localization denotes two different kinds of uncertain localization: estimated localization *sensu stricto*, and hypothetical identification. The first kind was used when we were able to locate a settlement only in approximation, i.e. with a possible mistake over 1 km (4 mm on the map). These were the cases where we were unable to find any trace of the old settlement on detailed maps, and its localization could not have been specified precisely enough, but we localized it on the basis of other, less precise data. For instance, according to Długosz, the village Mistrzowice belonging to the Scholastic of Sandomierz lay somewhere in the vicinity of Zawichost, by the Vistula, as proven by the information that the Vistula flooded the fields; it bordered then on Piotrowice, Linów and Wola Linowska. So, we localized it by the Vistula, north of Piotrowice and east of Wola Linowska, near the future location of Babin.³³ Another example is Kamień near Opatów; it was mentioned several times by the sources as situated near Karwów, in 1662 the village Kamień was described as 'deserta'. We located it with Karwów on the basis of the information that in the

³⁰ For instance, a sixteenth century village Klimuntów had to be identified not with a future town Klimontow, founded by Zbigniew Ossoliński in 1604, which lost town rights in the nineteenth century, but with the neighbouring village Górki, described in 1662 as 'Klimuntów seu Gorki'. The town was founded on the grounds of Ramułtów village, as proven by the name (distorted) Rejmontowice, given to one part of the town (Urzędowe nazwy). So the sixteenth century Ramułtów was localized on town grounds.

³¹ About this transfer, caused by great flood damages, especially in 1808 and 1814 see T.P. Szafer, *Ze studiów nad planowaniem miast w Polsce w XVIII i początku XIX w.*, [in:] *Studia z historii budowy miast*, „Prace Instytutu Urbanistyki i Architektury”, vol. 5, 1965, pp. 61 ff. and footnotes: pp. 37–53; ibidem the reproduction of the plan of the old Ryczywół from 1813 (1:5,000) – p. 62 and later map 1:50,000 on the basis of Quartermaster' Map, showing former situation – p. 63. Old location of Ryczywół can also be found on Heldensfeld's map.

³² Nieciecza, a sixteenth century village, was localized in approximation together with Szczytniki, which still exists. In the fifteenth century Nieciecza was a village belonging to Koprzywnica monastery, situated by the Vistula, and was sold to Łukasz z Słupca (Długosz LB, III, p. 386). In the 1662 register it was described as 'absorpta Istula fluvio', but in present-day Szczytniki there remains a name 'Niecieckie' denoting a part of the village and fields. We localize Nieciecza only in approximation, because due to the changes of the Vistula's channel, the exact sixteenth century location of the village is impossible to determine. The name 'Niecieckie' could also denote the fields in the village Szczytniki, situated near the border with Nieciecza. Myślików in Pilzno district is a more hypothetical example. It appears in many tax registers from the sixteenth century near Biały Bór, which still exists, but we know that Biały Bór was a large village in the nineteenth century (SGKP, vol. 1, p. 197 – almost 4,000 morgen, including the forest). Myślików probably became part of this bigger village; however, we cannot reject the possibility, that it lay a bit further, several kilometres from our localization, certain for Biały Bór.

³³ In this area, the Scholastic owned also Marszów (with demesne). The location of Mistrzowice was provided by Długosz LB, I, p. 329, II, p. 493. Babin, situated in the area – attested in the registers from XVII–XVIII and on Heldensfeld's map, later it also disappeared – belonged to the scholastic as well, so it could be a continuation of Mistrzowice. This old village belonging to the scholastic must have been located already beneath the scarp, on a low, flooded bank of the Vistula, which often changed its channel here, thus influencing the location of the villages along the riverbank.

nineteenth century Karwów estates consisted of Karwów demesne, Pobroszyn, Kamień contiguity, Kamień village and Pobroszyn village.³⁴

Hypothetical identification of a sixteenth century settlement with a later settlement could apply to a modern settlement, or a settlement that has already disappeared, but is known to us from older maps. For instance, the village Bachowice in Pilzno district, property of Cracow bishopric, was identified in approximation with Dębina Łętowska, a hamlet of the bishopric village Łętowice, attested to from the second half of the eighteenth century. We know, that Bachowice bordered on the neighbouring village Zamoście, which belonged to a noble family and was situated already in Cracow Voivodeship.³⁵ Naturally, the margin of error for hypothetical identification could be larger than this approximate location. Of course, hypothetical identification may have a greater margin of error in the approximate location of the narrower concept.

However, we have refrained from any attempts at estimated localization, when our gathered information about the location of a village was too general, e.g. specified only its parochial affiliation.³⁶ In such cases a settlement remained unlocalized, and its name was only listed in the List. This does not mean, that there is no possibility of later localization. Thorough studies in the settlement of smaller regions, using sources unknown to us, could bring new results, and find relations which we were unable to discern.

Heldensfeld's map, Mieg's map and Topographical Map were our source basis for certain localizations. Obviously, these maps are distinctive in terms of the abundance of presented settlement points, provided with precisely situated name descriptions. For instance, the only record of Okręgów – a hamlet in Sandomierz district, could be found on the Topographical Map; this was a manor situated near the River Szeliga, on the left bank of the Koprzywianka, near its mouth flowing into the Świślina.³⁷

We have often used W. Chrzanowski's map. This map, although set at a less-detailed scale of 1:300,000, was based on various precise maps preceding the state presented on the Topographical Map. Only rarely were we forced to use later maps in order to localize a village: e.g. the small hamlet Pułaczów (on the borderland of the districts of Sandomierz and Wiślica) was found only on the Prussian map at a scale of 1:300,000 from 1910, we identified it with a sixteenth century name Puchaczów.³⁸

Of the cartographic materials used to localize settlements, only K. Perthées's and F. Czajkowski's maps could not have been accepted as a sole basis for certain localization, due to serious distortions, so settlements attested to only by these two maps, and then lost, were subject to estimated localization.

³⁴ SGKP, vol. 3, p. 891. Kamień belonged to Włostów parish (already in Długosz LB, II, p. 344). This suggest that it lay closer of Karwów than Pobroszyn, which belonged to Opatów parish. Today Karwów is a large village, consisting of the village proper and several colonies, so it could cover the area of this small hamlet. The name Kamień does not appear in other written and cartographic sources from the eighteenth and twentieth century known to us.

³⁵ Długosz lists Bachowice and did not provide any data about its location; they had only four serf lans; Długosz LB, II, p. 138. The information Bachowice bordered on Zamoście belonging to Piotr Breński (from 1460, Wojewódzkie Archiwum Państwowe in Cracow, town records of Pilzno, vol. 18, 106) was taken from the files of SHG Sandomierz, kept in Cracow division of IH PAN. Since the end of sixteenth century, there has been no information about Bachowice; in the second half of the eighteenth century Dębina appears in this area (Mieg's map), which was not mentioned by earlier sources. It was a hamlet of Łętowice, which belonged to Cracow bishopric, just like Bachowice. It could be assumed that Bachowice was incorporated into Łętowice in the seventeenth century, and in the eighteenth century a new village formed here, treated as a hamlet of Łętowice (today it is called Dębina Łętowska). Our identification is approximate, because Bachowice could also have been situated within a radius of several kilometres from the future Dębina.

³⁶ A peculiar example of many unlocalized settlements can be found in Chęciny district, in a small key of property of the abbot of Jędrzejów, between the River Pilica and Kurzelów. In the fifteenth and the first half of the sixteenth century only Rudniki lay here. Around 1470 it had three serf lans, and between 1527 and 1530 – six lans (Długosz LB, III, p. 372; P. Małopolska, p. 572). Soon, four other villages were created, as a result of active colonization of this area: Oblasy, Lipna Nowa, Wojciechów and Ruda Pękowiec, which appear in the sources since 1571, sometimes incorrectly described as property of the archbishop of Gniezno (P. Małopolska, p. 273). Two from these villages – Lipna and Wojciechów, appear still in the second half of the seventeenth century and disappear later, and were not localized. Undoubtedly, they lay in the area which belonged to Rudniki estates in the nineteenth century (see SGKP, vol. 9, p. 936).

³⁷ This settlement is known only from the 1565 register: 'Okręgłow nobiles': it is mentioned without any information about taxation in LS 1564/1565, p. 330. This Okręgłów is probably listed in Table 1827 in Michów parish (one house). The village ceased to exist then, and the name cannot be found even in the list of official names of this area.

³⁸ It was a small, newly-located village, which belonged to Jan Rusiecki, owner of Niedźwiedz village. The name Pułaczów can be found on WIG map 1:100,000 from 1938; in *Spis miejscowości Polskiej Rzeczypospolitej Ludowej*, Warsaw 1968 (according to the state from 1966), Pułaczów was described as a colony of Niedźwiedz. The Prussian map at a scale 1:300,000 from 1910 distorts the name, and calls this village Płaców.

Information on site names from these maps and materials related to their creation (the so-called parish descriptions of K. Perthées) played an irreplaceable role in our localization, allowing us to solve many serious difficulties with identification.

Table 1. Unlocalized settlements

District	Parish	Settlement	Last mentioned	Comments
Chęciny	Kurzelów	Lipna (Lipna Nowa)	1662	located before 1571, property of the Cistercians from Jędrzejów
Chęciny	Kurzelów	Wojciechów	1662	
Chęciny	Włoszczowa	Meszna	1673	known from 1577
Radom	Kowala Stępcocina	Brzyściany (Wrzeszczany)	1598	not listed in tax registers ^a
Radom	Radzanów	Krukowa Wola	1662	mentioned in the first quarter of the sixteenth cent. ^b
Radom	Regów	Ostrów	1598	only mention ^c
Radom	Regów	Sosnowy Łąg	1598	only mention
Stężyca	Wargocin	Piaski	1598	only mention
Wiślica	Gręboszów	Świnia Wola	1711	only mention in the sixteenth cent. from 1598 ^d

a) Mentioned by Długosz (Długosz, LB, II, p. 520) along with a not very convincing information about its affiliation to Chlewska parish. Then in 1529 (LR, p. 409) and in an visitation from 1598. As a property of petty gentry it could become a part of Parznice, a large village of petty gentry in Kowala Stępcocina parish.

b) Appears in the description of Radzanów parish, but without information about the tithe, Łaski LB, I, p. 663. Not listed in tax registers from the sixteenth century, in 1662 called Krukowa Wólka.

c) In Regów parish, according to registers from the second half of the seventeenth century, and data from the eighteenth century, there was a large village Matygi, unknown before. It lay north of Gołąb, on the right bank of the Vistula (see especially Heldensfeld's detailed photography). However, it was included in Radom district; it could be a continuation of one or both unlocalized settlements.

d) Noted by E. Wiśniowski (E. Wiśniowski, *Prepozytura wiślicka do schyłku XVIII w. Materiały do struktury organizacyjnej*, Lublin 1976, p. 182); in the visitations used by the author it appears until 1711.

In total, we were unable to localize, even in an approximate manner, nine sixteenth-century settlements. We know of 3,059 settlements situated in Sandomierz Voivodeship in the second half of the sixteenth century, so the unlocalized ones constitute only 0.3% of all settlements, several times less than in Mazovia (1.3%).³⁹ They did not exceed 1% in any of the districts. Usually these were small villages, poorly attested to in the source, which influenced our localization possibilities.

Table 2. Density of settlement

District	Number of settlements	Area in km ²	Number of settlements per 100 km ²
Sandomierz	742	6,082	12.2
Radom	613	5,241	11.7
Wiślica	502	3,074	16.3
Pilzno	440	3,988	11.0
Chęciny	286	3,176	9.0
Opoczno	266	2,457	10.8
Stężyca	210	1,772	11.9
Sandomierz Voivodeship	3,059	25,790	11.9

³⁹ See H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7. In the study on Lublin Voivodeship in the second half of the sixteenth century there were 1.3% unlocalized settlements, the same as in Mazovia.

Adolf Pawiński established in his calculations that in the second half of the sixteenth century there were 100 towns and 2,586 villages, i.e. 2,686 settlements.⁴⁰ This calculation was based on sixteenth century tax registers of varying quality. Our research, based on more complete source materials, increased Pawiński's number by 373 settlements, i.e. by 13.8%. It is more than we were able to accomplish for the three voivodeships in Mazovia (9.8%). The majority of settlements not appearing in the registers published by Pawiński was situated in the following districts: Chęciny (20.2%), Sandomierz (17.35), and Radom (16.6%), the lesser number of such settlements could be found in Opoczno (6.8%) and Pilzno (7.8%) districts. Undoubtedly, this is partly a result of complementing the gaps in the registers chosen by Pawiński, and partly – a reflection of intense colonization processes in woodland areas in the period later than chronologic range of the registers published by Pawiński (1569–1581). It must be noted that we have certainly not portrayed the actual state of the settlement in Opoczno district in the second half of the sixteenth century, because of the poor quality of the source basis used in the reconstruction of the sixteenth century settlement in this district; only the 1577 register remains from the second half of this century, it was published (not always carefully) by Pawiński. Additionally, there were no documents of visitations from the end of the sixteenth century from this part of Gniezno archdiocese. Some data concerning settlements omitted in this register was found in Church sources and registers from the first half of the sixteenth century.

The table showing the number of settlements in Sandomierz Voivodeship in the second half of the sixteenth century (Table 2) includes settlements of various size: from mill villages with only one manor and small hamlets having their own name, to cities with thousands of inhabitants, like Sandomierz or Tarnów. So these are not comparable units. The list shows, however, that the district of Wiślica was the most densely inhabited. This district had a significant amount of good soils and lacked large forest complexes, characteristic of other areas of the voivodeship. The density of the settlement was similar to the fertile territories of Sandomierz district, north of the Vistula. The least densely inhabited, despite the fact that we included many settlements omitted by Pawiński, was Chęciny district, representing peripheral settlement of Sandomierz Voivodeship also in the Middle Ages. However, the soils there were usually not very fertile, and largely covered with forest. On the other hand, Stężyca district, situated on the right bank of the middle Vistula, a peculiar continuation of the former castellany and then Sieciechów land, poorly inhabited at the wake of the late Middle Ages, reached the average for our voivodeship due to intense development of the settlement in the fifteenth and sixteenth centuries, minimally surpassing Radom district. Apart from Stężyca district, the differences in the density of the settlement in Sandomierz Voivodeship in the second half of the sixteenth century were usually a result of earlier, reaching many centuries back, differences in the development of the settlement in this part of Lesser Poland, as understood from the observation of medieval colonization processes in this area.

III.3.1.3 LUBLIN VOIVODESHIP

Stefan Wojciechowski

Our map shows all settlements whose existence in the Voivodeship of Lublin in 1564 was more or less confirmed, even if some of them were deserted at the time (whereas parts of settlements were not included, even if they had their own individual names).

We began with the files of settlements in parochial order, as this was the way settlements usually appeared in the sources. The main source basis were the tax registers from 1531–1580, and the visitations. The file of each settlement contained its old names and the modern name, the old and present parochial affiliation, the owner or owners, and then all social and economic elements mentioned in the sources. The listed variants of names allowed us to determine the proper name of a settlement, regardless of spelling which was often provided in latinized form but with no respect to any rules, as the Polish orthography had not yet been fully formed before the second half of the sixteenth century, and the transcription of Polish sounds into writing – used to denote Latin sounds – was largely arbitrary.

Settlement points were marked on carbon paper, and the concept map was prepared at a scale of 1:300,000. At this stage, villages already identified with modern settlements when their file was being created posed no further difficulties. However, in case of sixteenth century village names which could not be easily identified with modern settlements, the identification and localization of settlements was much more difficult, especially for those settlements which disappeared completely, and they are quite numerous in the Voivodeship of Lublin. With help of our earlier study on this subject,¹ maps from the eighteenth – twentieth centuries, and various additional data found in written sources, such as the seventeenth century tax registers, we narrowed the number of unlocalized settlements down to 12. Still, some of them could only be localized in approximation (e.g. Podbiele in Ostrów parish, Szczepanów in Świeciechów parish). Here follows the list of villages which we failed to localize even in approximation:

In Lublin district

- Baranów parish – Stoczek
- Kamionka parish – Śnieżna Wola
- Końska Wola parish – Lipcowa Wola, Wola Tenczyńska
- Lewartów parish – Stanisławów, Wilków

In Urzędów district

- Wrzawy parish – Oczerchów, Sinie Kozy

In Łuków district

- Łuków parish – Izdbiska
- Pruszyn parish – Zawady
- Trzebieszów parish – Koszuty
- Zbuczyn parish – Boruty

¹ S. Wojciechowski, *Zaginione osady w Lubelskiem*, „Pamiętnik Lubelski”, vol. 1, Lublin 1929.

The map provides the names of settlements in their sixteenth century wording and modern spelling. Significant variants of names were listed in the List.

In total, there were 915 settlements, including 36 towns, in the Voivodeship of Lublin.

Table 1. Towns and villages

District	Area in km ²	Total number of settlements		1 settlement per km ²	1 town per km ²	1 village per km ²	1 town per villages
		towns	villages				
Lublin	6,666	27	499	12.7	246.4	13.3	19
Urzędów	1,929	2	108	17.5	964.5	17.8	54
Łuków	2,089	7	272	7.4	298.4	7.6	38
In total	10,684	36	879	11.6	296.7	12.1	24

The arrangement of settlements points to their connection with physiographic conditions, although one must not forget that this arrangement depended also on social and political relations. The obvious dependence of man from natural environment was much more important in the past than it is now, and it was particularly crucial when a new settlement was founded in undeveloped area. When possible, people sought the most favourable conditions, both in terms of soil and the access to water, forest, etc. Soil type was especially important for the agricultural economy with its relatively poor development of agricultural engineering.

Hence, the high density of settlements in Zbuczyn parish was caused by the availability of good soils, better than in other territories: podsols, whereas in Tuchowicz parish the scattered settlements were the result of poor, sandy soils. Ostrów and Parczów, two large parishes in the eastern part of Lublin district covered mostly with forest, had and still have very poor sands, the area is also often water-logged. There were only five settlements on the sandy grounds situated on the right bank of the River Wieprz, between the village Czemierniki and Łańcuchów. However, the density of old villages, reaching back at least to the thirteenth century, was particularly high on good loess soils in the northern part of Lublin Upland (more or less to the line of Puławy, Końskowola, Kurów, Garbów, Dys and Łęczna).

In the century preceding the period depicted on our map the number of settlements in Lublin Voivodeship grew significantly. This growth was small in the areas already densely developed, such as on the banks of large rivers, even the ones flowing through large forests. On the other hand, new settlements were being founded since the third quarter of the fifteenth century and the middle of the sixteenth century in the lands between the Rivers Wieprz and Tyśmienica, or Wieprz and Minina, south of the downstream Wieprz and the Liwiec, and south of the Lublin Upland. These settlements usually belonged to the nobility: in the north, in Łuków land, they were inhabited by petty gentry, and in the south – by peasants.

Directly after the period presented on our map, that is in 1580–1620/26 several villages were created near Parczów (Kopina, Wola Tulnicka), Bystrzyca (Wola Rozkopaczewska, Wola Zawieprzycka, Zalesie), in Opole parish (Niezdów, Trzciniac, Trzebieszka) and in Goraj parish (Rzeczyca, Wola Kątecka). Several new villages were also founded elsewhere.

III.3.1.4 GREATER POLAND

Arkadiusz Borek, Michał Słomski

The main assumption behind the work on AHP is to show on the map a complete network of settlement in the Polish lands of the Kingdom of Poland (the ‘Crown’) in the second half of the sixteenth century. Apart from the settlements that functioned during the entire half-century, the map shows those localities which vanished or were chartered in the period concerned. The historical records and sources used to this end are specified in one of the preceding sections (see M. Słoń, *Written sources* in this edition). This chapter repeats the principles of localisation known from the previous volumes¹ and describes, in general terms, the settlement in Voivodeships of Poznań and Kalisz, with particular focus on the new colonisation in the north of Greater Poland. The term ‘localisation’ refers here to a two-stage methodology of reconstruction of a settlement network, consisting of (i) identification of localities mentioned in the records against those shown in the earliest cartographic representations (since the end of the eighteenth century; see T. Panecki, *Cartographic sources* in this volume); and, (ii) marking of the thus identified locality on the map.

Plotted on the map have been autonomous settlements having their own names and forming a settlement cluster whose residents used a certain defined area.² The ownership- or parish-based affiliation was not the decisive factor. A division into two localities is shown only for the cases where two separate names for each of the two localities have been found attested and the units concerned could be made spatially discernible.

The differentiation and separateness has varied as to scope, which is particularly true for demesne farms and farmstead or commercial facilities (water mills and ore mills/ironworks; saws/sawmills). In many a case, units of both categories formed parts of one and the same village, and in such cases are not shown as separate settlement points. In the event, however, that they formed a separate grouping of buildings bearing its own name, they would have been plotted on the map, provided that their location was certain. The spatial separateness between mills and settlements was completely ignored in the tax registers, and only if verified against the other records of relevance (written and cartographic), they could be localised in the map. The most glaring example is the mill called Gromadzki, in Kcynia district. The tax registers mentioned it together with Grocholino,³ a locality 10 km away of the mill, with several other localities between them. In the same district, the registers mentioned ironworks near Jaktorowo and Oleśnica,⁴ but it was the information from the hearth tax (*podymne*) register dated 1635 that has enabled us to mark them as separate facilities (and units)⁵.

The villages to which a two-part name applied, consisting of the shared name and its complementing segment, usually connected with a fragmented noblemen’s property (a common thing in Mazovia),

⁵ Podymne 1635, f. 73r.

which were grouped into at least three units, only appeared in the districts of Gniezno (Grzybowo, Gulczewo, Małachowo, Mikołajewice, Popowo, and Strzyżewo),⁶ Kalisz (Gać, Prusy), and Pызdry (Murzynowo, Nadarzyce). In most of the cases, singling out their parts was rather plain, since they remained autonomous at least until the nineteenth century. In some cases, it is quite possible that property ownership partitions were meant, rather than autonomous settlement units; however, following the adopted principle of deciding in favour of a given settlement's autonomy (separateness) if in doubt, they have been featured as such. With some localities, however, such interpretation proved to be weakly evidenced, and names appearing in the records – arguably referring to the divisions – has been treated as a variant of the locality's name (as in Dębsko, Kamień, Karmin, and Kościelec in Kalisz district).

Suburban settlements are plotted whenever they appeared as clearly separated settlement units with their own names (e.g. Świętopietrze outside Przemęt, or, Sarnówka by Sarnowo – the suburbs in Kościan district). Suburbs are treated as a part of the town or city in two cases: (i) when understood as an area strictly attached to the town (city) proper, even if the suburb bore its own name; and, (ii) when the suburb had no such name. So, though the suburban area of Żnin (Kcynia district) was called Rybaki, Piskorzewo, and Ostrów, it was not approached as a separate settlements unit, and so is not plotted on the map.⁷

The village called Leszczyńska Wieś, situated near Leszno, in Wschowa district, has not been plotted, either. The split into a town and its namesake village took place probably at the moment the town of Leszno was chartered, in 1547–9. Albeit Leszczyńska Wieś is marked on the maps by Karol H. Perthées and David Gilly, it does not appear in the tax registers used by us, and is not mentioned as a separate settlement point in the 1631 *podymne* register.⁸ Therefore, we do not have it marked on our map. The suburbs being part of conurbations and named, in most cases, with use of an adjectival name derived from the name of the locality to which the road led from the town or city through the suburb, are only reflected in the reconstruction plans of individual towns (incl. Wschowa, Dolsk, Pleszew, and other) and thus are not mentioned in the list. We have localised suburban villages which were singled out spatially and later on became integrated into their adjacent towns; in most cases, the maps by Perthées and Gilly, and the *Urmesstischblätter* proved sufficient for their localisation.⁹ One such example is Doktorowo near Grodzisk, Kościan district, today a western part of the town of Grodzisk. A specific form of suburban village appeared in the case of Kissy – the village near Wieleń and its namesake village near Czarnków (both in Poznań district), the latter being at times mentioned as a suburb.¹⁰ Presently, both of them are part of their respective towns, and are marked in the Rybaki Street area on both towns. Their establishment and the present-day names of the streets in their former locations have to do with the fishing character of both settlements.¹¹

It has at times happened, though, that with use of the earliest maps we could use, we have failed to find some of the suburban villages otherwise mentioned in the tax registers. This is true for Kwiatkowo, Sobótka Wielka (the towns in Kalisz district), as well as Wojszczyno near Lwówek (Poznań district). In any such case, we have deemed the localisation of the suburban village to be a tied one and thus have associated it with the town near which it was situated.

Witkowski, *Czasy nowożytne (od początku XVI w. do 1815 r.)*, [in:] *ibidem*, p. 90.

⁸ The appearance of the village of Leszno/Leszczyńska Wieś is mentioned in: A. Wędzki, *Najdawniejsze dzieje Leszna do roku 1547*, [in:] *Historia Leszna*, ed. J. Topolski, Leszno 1997; T. Jurek, *Zagadki najdawniejszych dziejów Leszna*, [in:] *Leszno i Leszczyńscy. Sesja naukowa z okazji 450-lecia lokacji miasta Leszna*, ed. A. Konior, Leszno 1997, pp. 13–21; *idem*, *Leszno*, [in:] SHGPoz, part II, p. 590.

⁹ The settlement around Poznań is as if a separate category; see P. Dembiński, *Poznań settlement complex*, [in:] AHP Greater Poland, in this edition III.6.24.4.

¹⁰ RPWP, pzn, 1563, no. 147.

¹¹ From Kissy near Czarnków, money was paid in the second half of the sixteenth century almost exclusively upon five to seven fishermen (RPWP, pzn, 1563, no. 147; RPWP, pzn, 1567, no. 192, 586; RPWP, pzn, 1576, no. 126; RPWP, pzn, 1577, no. 130–131; RPWP, pzn, 1580, no. 135; RPWP, pzn, 1581, no. 94, 134; RPWP, pzn, 1582, no. 92; RPWP, pzn, 1583, no. 129–130). For more on such settlement, see: H. Ludat, *Die Ostdeutschen Kietze. Mit einem Nachwortversehen*, Hildesheim–Zürich–New York 1984.

No inns or taverns are plotted in the main map that bore their own names which have been identified as settlement units;¹² their localisation is shown on the map of roads.

The map features the castles and abbatial monasteries that formed a separate settlement unit – that is, in the event that no permanent rural settlement was emerging and consolidating around the castle/monastery. The castle in Drahim, Wałcz district was such a separate settlement unit, as were the Cistercian monasteries in Łąd, Konin district, and Paradyż, Poznań district. Another separate settlement unit is, to our mind, the castle in Koło, Konin district, situated more than 1.5 km away of the town and separated from it by a creek of the Warta River.¹³

In line with the series' original assumptions, no deserted villages have been marked in the map, whose area was used in the second half of the sixteenth century as a farming soil for the demesne farms or serfs from the neighbouring villages.¹⁴ Since their locations are oftentimes known (surviving in the landscape names, or because of resettlement), their district and parish affiliations being recognisable, such information has been used to mark out the borders of the state and ecclesiastical administration. An exception to this assumption is the deserted village named Ostrówce (Ostroszcze), in Kcynia district. Only a tumbledown church stood there, whilst the locality was regarded a parochial centre with its own parish district until the middle of the seventeenth century (see A. Borek, *The Church administrative borders. A. Dioceses of Gniezno and Włocławek* in this edition).

The technological change mentioned in the introduction to this volume implied the need to more precisely specify the method of setting up a settlement point, which in turn stems from a much higher cartographic precision required in the work with the Geographical Information System (GIS). When preparing the preceding volumes, the plotting of a point in the map was all along based on making a given settlement with a two-dimensional sign which became, in relation to the cartographically elaborated area, a circle with the diameter of several hundred metres (in the real scale). Presently, a locality is marked by plotting a dimensionless point on the base-map equipped only with the coordinates, which translates into a much higher precision of initial marking. The point gains real dimensions only upon editing the map. Hence, more precise guidelines have been adopted with regard to putting the settlement points on the background map, as referred to in the preceding volumes.¹⁵ For towns (cities), the centre of the market square was marked, or another known central point of the former urban area's centre. In case of a parochial village, the parish church would be marked; in other villages, the clearly identifiable centre of the settlement, its geometric centre, the main crossing of the roads, or a facility that has, in all probability, remained in its former location (the manor). If information was available that strongly suggested to recognise another place as the settlement's centre, an appropriate modification has obviously been made. As a base-map on which localities were directly localised, used have been – as with the preceding volumes – the maps published by the Military Geographic Institute (WIG) in the 1920s/1930s. However, in some cases the location of a presently non-existent settlement was last plotted on a nineteenth-century map.

The series' main maps feature the locations of localities in one of the three options: definite, linked, or approximate. A definite majority of the settlements plotted in the map has a definite location (95%); consequently, while their localisation in the map should arouse no doubt, it has not always been an obvious thing. The potential 'shifts' of localities between the sixteenth and eighteenth centuries, caused by altered riverbed, fire, changes to the road network, or, simply, building developments could not be reflected here as they are by no means graspable or perceptible. As has been said, wherever possible, the centre of a settlement was marked based on the earliest buildings (church, manor), which in some cases nullified the alterations in question. The significance of these 'shifts' are additionally restricted by the map's scale (4 mm = 1 km). Linked location (2% settlements plotted) indicates that we have

¹² Górkki in Kościan district and the inn 'Bełzant', est. 1593 by the Lake Trzebieszki, have been recognised as such; S. Chmielewski, *Górkki*, [in:] SHGPoz, part I, p. 645; Żmidziński, p. 59. In 1598, the king confirmed yet-another privilege for the Bełzant inn, which is mentioned as a separate settlement unit also as of 1627; MK 142, k. 206v–207r; AP Poznań, Akta miasta Ujście, I/1, f. 17r.

only had information suggesting that a given locality was situated near or far from another settlement. This method mainly pertains to those villages which shared their name with another village or settlement, with addition of the adjective ‘Małe’ (Little) or another (as in the aforementioned villages with fragmented nobility ownership). Approximate location (1.3% settlements plotted) has been given to settlement points in two cases. First, if a given locality has been found in none of the available maps, while we had descriptive information on its location or other guideline regarding its location in regard to the nearby settlements (for Poznań Voivodeship, the SHGPoz was a priceless aid). The other group consists of where identification of the locality found in the relevant source before that in the earliest maps has proved doubtful. We would have not localise a locality when only having information about its parochial affiliation. Linked and approximate location is with respect to villages only (also if associated with a town/city): in the event that we were incapable of exactly localising a mill of demesne farmstead, it has not been plotted but is specified anyway in the List of settlements.

The initial difficulties with identification of some of the settlements, mainly in Wałcz district and in the Greater Poland and Margraviate of Brandenburg borderland, were caused also by the naming of localities. Names of settlements oftentimes appeared in the German form, which in a number of cases differed from the names used today. In such cases, dictionaries and linguistic studies have been helpful.¹⁶

Some of our localisation decisions call for justification. We have decided to treat Zawadka (Zawady) in Konin district as one locality, though there are premises for its splitting into two. Zawadka appears in the tax registers as a small royal village, whose size is confirmed by the canonical visitations.¹⁷ An exception is the appearance in the 1581 register of an additional insert portraying the village as much larger and richer, possessing a mill, without specifying the owner’s name.¹⁸ This information should probably be related to the Zawady referred to in *Teki Dworzaczka*, which in the second half of the sixteenth century belonged to the Cisnowski family and to Krzysztof Iwiński, forming a small demesne that moreover included Powiercie and Leśnica. Church records refer to a Zawadka in more than one parish – namely, Kościelec¹⁹ (probably the royal part) and Grzegorzewo²⁰ (the noble part). This actually points to two different villages. This being the case, the localisation of the noble-owned village would be definite – namely, the buildings with a mill on the Warta River, close to Powiercie, as visible in the maps. Where the royal village (part) should be placed in this context is uncertain. Fundamental is the statement that the estate of the *Starosta* of Koło, whose part was the royal village of Zawadka, was situated on the opposite side of the River Warta to that of the nobility’s Zawadka. The mention that the meadow of the Bernardines of Koło ‘is situated between the villages of Zawady nad Kościelec, along the Koło highroad’ is rather vague.²¹ The editors of the 1616 royal demesne visitation record indicate that the ‘Koło highroad’ is a road leading toward Kalisz. To be specific, it was the highroad set through Brudzew and leading toward Turek (see the map ‘Main roads in the end of 16th century’). It can be presumed that the description refers to the ‘royal’ Zawadka, which means that it needs to be localised east of the road, toward the location of the ‘noble’ Zawadka. With all the pieces of information taken together, along with the coincidence of the names, close location, and the fact that strictly localisation of the unit is impossible, finally one ‘Zawadka’ has been plotted – with mixed ownership, in the place identified with the noble segment.

The location of Mielżynek, Pyzdry district, varies in the earliest maps. The Gilly’s map clearly marks it south of Mielżyn;²² the later *Urmesstischblätter* sheet shows it as adjacent on the west.²³ We have followed the latter location, due to the map’s larger scale.

²³ UMTB, ark. 2002 (Mielżyn, 1830).

Mała Wieś and Wielka Wieś near Targowa Górka (Milesna Górka), Pyzdry district, have been plotted as definite locations. The location data are based on the information provided by regionalists.

The sixteenth-century location of Dębówko in Nakło district, being the present location of Dębówka Nowa, should be deemed certain. The development in the place of today's Dębówko Stare is only attested by late nineteenth-century maps,²⁴ and is not compact. Although in Gilly's map²⁵ Dębówko is moved northward against Krostkowo, this area is outside the actual scope of the map. The maps from the late eighteenth and early nineteenth century²⁶ clearly show developments directly west of Krostkowo, the place where Dębówko Nowe is today.

The localisation of Kościerzyn Mały and Kościerzyn Wielki (Kościerzyna), the villages in Nakło district, reversed in our map compared to the locations shown in the maps since the early eighteenth century, calls for a more detailed comment. The present location is based on the records regarding the parochial affiliation of these localities and their localisation with respect to Łobżonka. The tax registers consistently name Kościerzyn Wielki as part of Luchowa parish and Kościerzyn Mały within Glesno (Gliśno)²⁷ – the parishes situated, respectively, on the northern and southern side of the River Lubcza. A mid-seventeenth-century Church visitation record assigns 'Kościerzyn' to the parish of Łobżenica²⁸ (to which Luchowo, was affiliated; *The Church administrative borders. A. Dioceses of Gniezno and Włocławek* in this edition), whilst 'Kościerzyn Minor' (i.e. Kościerzynka) appears as an object of dispute between the parsons of Gromadno and Glesno. This suggests that the church in Gromadno had laid claims to the part of the village situated on one of the banks of the Łobżonka.²⁹ Also *Teki Dworzaczka* tell us that Kościerzyn Mały spanned both banks of the river,³⁰ whereas Kościerzyn Wielki is described as situated near Łobżenica and Trzeboń.³¹ According to the cartographic sources it is Kościerzyn Wielki that is located on both banks of the Łobżanka; opposite to Kościerzyn Mały is the village called Szczerbin (Szczerbinko), which also existed in the sixteenth century. It is therefore clear that the localities' names have been swapped. Based on the *regests* in *Teki Dworzaczka*, one concludes that the alteration took place probably in the late seventeenth/early eighteenth century, the moment when a 'Kościerzyna Spalona' ('Burnt' Kościerzyna) appears for some time.

The location of Wierzchosław in Kalisz district, which is at times identified with today's Żychlin, has been slightly corrected. In the earliest maps³² the settlement of Wierzchosław is closer to the road between Karsy and Sobótka, somewhat south-east of today's Żychlin built-up area – and it is right there that Wierzchosław is plotted on our map.

The location of the demesne farm and then mill settlement of Błotnino, Kalisz district, has been adopted as definite. It was identified as the 'Maślanka' mill shown on the maps, following the information of a miller named Maślanka who owned a 'Błotnino' mill as of 1612.³³ In this case, the miller's (nick)name has ousted the facility's original name.³⁴

The location of Gniezno district's village of Jeziercze (Jeziercza) has been deemed certain. The namesake demesne farm is marked in all the cartographic sources we have used. In 1534, the village appears as *deserta*.³⁵ The tax registers from the second half of the sixteenth century refer to only one smallholder (*hortulanus*) there.³⁶ The 1673 and 1674 head-tax (*pogłównie*) registers repeat the description

deserta.³⁷ According to the information provided by Jan Korytkowski, the forests near the village supplied timber to the Cathedral of Gniezno, and the settlement became completely deserted during the eighteenth century; its area was afforested and its former limits became unidentifiable. The local forest inspectorate was apparently named after the village.³⁸ In spite of the settlement discontinuity, it seems that the development identifiable in the midst of the forest is a trace of the once-village.

Pępowo Małe and Pępowo Wielkie have been recognised as separate settlements. The tax registers continually mentioned two settlements named Pępowo. Their identification was not facilitated by the lack of consistency in the records from different sources. The name Pępowo Małe (Pępowko) refers at times to the nobility's partition, whilst the tax registers named the latter Pępowo Wielkie. The SHGPoz³⁹ recognises this information as communications of property partitions – namely, the Gniezno custody and the noble share. The division of Pępowo was not reflected by the cartographic sources we have used; today, there is only one Pępowo. We have identified the two villages based on the difference in the names recorded in the tax registers, which is reflected in the River Dąbroczna dividing the locality into two parts in our map. Following the registers, the parochial centre is localised in Pępowo Małe, which belonged to the Chapter. The church's location in the custody partition is confirmed by the mention on the presentation by the Gniezno treasurer of the Pępowo parson in the mid-fifteenth century⁴⁰ and the information from the first quarter of the seventeenth century. In 1612, the treasurer part (*Pempowo s. Pempówko*) was purchased by Andrzej Konarzewski,⁴¹ who had already possessed a share in Pępowo Wielkie); in 1625, he is reported to have erected a new brick church to replace the former one,⁴² which evidently relates to the transfer of the custody partition together with the church and the right of patronage.

The relation between two localities in Gniezno district, parish of Modliszewko (Modliszewo Małe): Dębłowo and Przysieka, both appearing in the tax registers, is unclear. The difficulty appears because of the ownership parts in those villages and the onomastics. As per the tax registers, Klemens and Szymon Rudnicki (an uncle and his nephew), the two consecutive custodians of the Gniezno Cathedral, appear as the only payers at Dębłowo.⁴³ The village's affiliation to the endowment of the Gniezno treasurer benefice is also indicated by the information from 1535 and 1612,⁴⁴ while there is no such mention in the visitation records of the Chapter estates edited by Bolesław Ulanowski, or in the catalogues of canons compiled by Jan Korytkowski.⁴⁵ It is also known that the partition in that village was held by the Order of the Holy Sepulchre from Gniezno;⁴⁶ it is however described as *sortis in Deblowo Przesieka dicta*.⁴⁷ Associating this place with the Przysieka of the tax registers does not seem appropriate due to the clear determination that the Order's partition was situated in Dębłowo. That a royal partition was situated there as well, held on a lease basis, is likewise undoubtful.⁴⁸ The basic problem lies in the presence of a nobility's partition in Dębłowo, as confirmed by the 1659–65 visitation⁴⁹ (two noble partitions) and by *Regestr diecezjów*.⁵⁰ In the latter half of the sixteenth century, the Goryński family appears as the noble proprietors at Dębłowo⁵¹ – probably as leaseholders (*tenu-tarii*).⁵² As for Przysieka, Krzysztof Mileński appears as the payer. No mention has been found in

Teki Dworzaczka for the second half of the sixteenth century that would with certainty refer to this particular locality, all the more than two other namesake localities existed in Gniezno district at the time, one of them situated in the neighbouring parish of Sokolniki. No other mention of the locality in question has been found in any other record whatsoever. The 1581 register offers an interesting clue as it has the phrase *sive Deblowo vocata*⁵³ relating to Przysieka. Given the apparent difficulty in interpretation, it has been resolved that Dębłowo be identified with the Church and royal parts as well as with Dębłowo Królewskie, whereas Przysieka (Dębłowo) would be identical with Dębłowo Szlacheckie (the latter is attested in the aforementioned 1659–65 visitation record). Both localities are visible in the later maps, Przysieka's location being approximate. This solution probably simplifies the sixteenth-century settlement and ownership situation; the fragmentary information available makes any detailed interpretation ungrounded.

We have localised Rakoniewice in Kościan district, in the place of the former village of Rakoniewice, situated south-west of Rakoniewice the town, established in 1662 on the village's land,⁵⁴ and marked in the maps by Perthées and Gilly and in the UMTB. Czesram, also in Kościan district, is marked in the place of the parish church, in the north-eastern part of Golejewko. A church with the same name is plotted, beside Golejewko, in the Perthées and Gilly maps.⁵⁵ The location of Dębrzno in Poznań district has been determined as today's settlement of Ławica near Sieraków.⁵⁶ The placement of Gorzuchowo, Poznań district, south-west of Rogoźno is justified by the information in the Gilly map and the *Urmesstischblätter*, where the demesne farmstead of Gorzuchowo is marked north of Budziszewo (it does not appear in Perthées). Smyczyna Stara in Kościan district was technically deserted in the latter half of the sixteenth century; it was probably situated in the vicinity of today's forest settlement of Smyczyna. The present-day village named Smyczyna is approximately 2.5 km east of where Smyczyna Stara has been localised, being an extension of Smyczyna Nowa, first attested in 1608.⁵⁷ Trzebiec in Kościan district has been localised based on the information on a demesne farm named *Trzepiec*, west of Siemowo.⁵⁸ Trzcielín Mały and Trzcielín Wielki in Poznań district form one village today, called Trzcielín, through which a stream flows. We have localised these villages based on the *Urmesstischblätter*. East of the rivulet, *Trzcielino Königlich* is marked, and *Adlich* west of it.⁵⁹ The localities of Trzek and Widzierzewice (Poznań district), both situated east and north-east of Czerlenin, have been localised on the basis of the *Urmesstischblätter*, where they form separate settlement units.⁶⁰ The *Messtischblätter* sheet and the later maps feature a locality named Trzek in lieu of what had been Widzierzewice. Today, Widzierzewice (modern name, Wydzierzawice) form part of Trzek.

To begin our discussion of the approximate localisations, let us begin with Kobyllice village, Pyzdry district. It appears in the inventory of the estates of the Bishopric of Poznań dated 1564⁶¹ and in the tax registers dated 1553 and 1565.⁶² We have identified it as a western part of what is Ciężęń today. The basis was the 1565 register's phrase *Kobielicze sive alia Ciaszim*; the subsequent tax registers have *Ciązym Alia*. The first part of Ciężęń appeared once as *Ciązim koscielne* ('of the church'),⁶³ which

⁵³ RPWK, gnz, 1581, no. 205.

⁵⁴ Z. Kulejewska-Topolska, *Nowe lokacje miejskie w Wielkopolsce od XVI do końca XVIII wieku. Studium historyczno-prawne*, Poznań 1964, p. 15, footnote 66.

⁵⁵ Also, see S. Chmielewski, *Czesram*, [in:] SHGPoz, part I, p. 314.

⁵⁶ J. Luciński, *Debrzno*, [in:] SHGPoz, part I, p. 347, footnote 1.

⁵⁷ T. Jurek, W. Baran-Kozłowski, *Smyczyna*, [in:] SHGPoz, part IV, p. 568. Most entries concerning Smyczyna in the tax registers we have used is deserted and void of people; however, in the 1580s, the collection upon the mill, four smallholders, and a *rataj* (*arator/colonus*) was paid (RPWP, ksc, 1580, no. 589). The village was deserted probably around mid-sixteenth century, and was often described as such in property transactions (e.g., Teki Dworzaczka, Regesty, 7249 (no. 1393) 1534; 416 (no. 5) 1560f.).

⁵⁸ UMTB, ark. 2269 (Lubin, 1826). The WIG map mentions no name of the former demesne farmstead. A part of the village of Nowy Belęcin, named Czepiec, is presently located there; K. Górńska-Gołaska, G. Rutkowska, *Trzebiec*, [in:] SHGPoz, part V, p. 351.

⁵⁹ UMTB, ark. 1996 (Dombrowka, 1830). At the time the UMTB was compiled, Trzcielino Małe was called 'Królewskie' ['royal'], resulting from the takeover of Church estates by the state in 1796; cf. T. Jurek, *Trzcielín Kapiulny*, [in:] SHGPoz, part V, p. 338.

⁶⁰ UMTB, ark. 1999 (Kostschin, 1830).

⁶¹ Inw. bp. poz. 1564, p. 294.

⁶² RPWK, pzd, 1552, no. 45; RPWK, pzd 1565, no. 61.

⁶³ RPWK, pzd, 1576, no. 51.

suggests a reference to the present-day eastern part. Such a solution is rendered even more plausible by today's division of Ciężen into two parts. The solution in question being hypothetical, Kobylice has received an approximate location.

Hypothetical, in our view, is also the localisation of Wielka Wieś near Dźwierzno, Nakło district. Its singling out as a separate settlement unit in the second half of the sixteenth century does not raise any doubts, as it is treated as separate from Dźwierzno not only by the tax registers but also by a number of other records.⁶⁴ Upon the division of Dźwierzno and Wielka Wieś in 1566, two settlements were clearly named.⁶⁵ The deed of demarcation of Dźwierzno and Wielka Wieś, and that issued for Topola in 1579, indicate that Wielka Wieś was situated on the side of Topola⁶⁶ in the western part of today's Dźwierzno Wielkie. This fact is additionally confirmed by the information on the local demesne farm, which is moreover marked on the WIG map.⁶⁷ The limitation of Dźwierzno proper to a settlement on a pass between the lakes lends credence to its description as *Wieś Dzwierzno or Ostrów* in the 1579 division document. However, since there is no direct confirmation of Wielka Wieś in the cartographic records, it has been given an approximate location here.

A similar marking of Radziczek in Nakło district is based on the information on its parochial affiliation. Though the tax registers assigned Radzicz and Radziczek to the parish of Glesno,⁶⁸ the visitation records from the beginning and middle of the seventeenth century⁶⁹ mention that a part of the village belonged to the parish in Sadków (Satków). Following this information, the development in Radzicz south of the River Orla has been marked as Radziczek.

Parochial affiliation has determined the localisation against the local river of Kalisz district's Kliszewo and Kotynino localities. Kliszewo would be situated between Zagorzyn, the later Młyn Deska, Pruszków, and Kościelna Wieś (Kościół).⁷⁰ Except for the latter, all were situated on the right bank of the Prosna, and it was the location of the parochial village that has prevailed in the localisation of Kliszewo. Kotynino is said to have bordered on Osiek and Śmiłowo, itself being located not far from Radziszewska Struga (unlocalised).⁷¹ It belonged to Godziesze Wielkie (Godzieszewy) parish, and therefore the settlement has been located on the right bank of the Prosna.

An approximate localisation has moreover pertained to Bartodzieje, a settlement in Kalisz district. It is only featured on the Perthées map as a spot in a clearing amidst the forest. Since no other cartographic record shows it there, and there is no other related element in Perthées that might have provided a spatial context (such as a road or river), we have decided not to adopt this localisation as definite, given the map's low accuracy. Furthermore, the name of Bartodzieje was applied into the 1970s to a field in Stary Kiączyn – a locality further to the west compared to the Perthées localisation.⁷² In this particular case, in indicating the possible location, the latter information was taken into account.

The presently non-existent village of Zamysłowo, once in Kcynia district, has been given an approximate location, even though no direct information on the district's borderline is available. The decisive factor was the property ownership context as specified in *Teki Dworzaczka*, where the village appears beside those of Koźlanka, Rąbczyn, and Żabiczyn.⁷³ Another premise was the locality's affi-

⁷³ Teki Dworzaczka, Regesty, 5312 (no. 1392) 1523, 4662 (no. 335a) 1532, 11803 (no. 1398) 1576, 4318 (no. 56) 1578, 1039 (no. 1405) 1604, 2645 (no. 1408) 1613, 9922 (no. 58) 1668.

liation to the parish of Mieścisko. These data points quite clearly suggest that Zamysłowo must have been situated in the bend of the River Wełna, possibly between Koźlanka and Rąbczyn – and this is where its location is marked.

Bielawy village, of Poznań district, has been localised based on the information about its adjacency to Biezdrowsko, Chojnica, and Owińska.⁷⁴ Dobiertki in Poznań district, situated at the border between this district and that of Kościan, has been plotted based on the information about the village's location between Rogalin and Świątniki, and on its being situated on the right bank of the Warta.⁷⁵ Kościan district's Grobia has been plotted thanks to the information on the village's limits from around the mid-sixteenth century; as of 1547, a corner mound between Grobia, Sęczkowo, and Sęczkówek, and as of 1568, a corner mound between Grobia, Dłużyna, and Charbielin were mentioned.⁷⁶ Sienno in Kościan district, last mentioned in 1558, has been localised based on mentions in court registers; it was associated with Gronowo (Grunau), located north of Leszno.⁷⁷ The location of Poggenpol village in the district of Wałcz has been established on the basis of mentions of so-named wetlands in the border recesses between the Kingdom of Poland and the Duchy of Pomerania, near the Lake Kołbackie. The point standing for the locality is marked at the place of today's Polne village.⁷⁸

Approximate localisations refer in some cases to the localities that presumably were void in the period under discussion. For example, Radwankowo near Buk, Poznań district, appears as a deserted area already in the Poznań diocese's book of benefice; albeit the tax registers did mention the village's name, all the related entries were blank.⁷⁹

It is worth paying attention to Żmin in Kościan district, associated with Modrze village. The town named Żmin was established in the fifteenth century, which was then absorbed by the thriving village of Modrze, on whose land the town had been incorporated.⁸⁰ The space of those settlements has not been precisely distinguished; the royal demesnes' inventory of 1564 merely mentions that the land on which Żmin was founded was situated between Modrze and the village's manor.⁸¹ Therefore, Żmin has received a linked localisation, beside the village of Modrze.

Another instance of tied localisation is the villages called Chwarstnica and Mielęcín in Wałcz district. Chwarstnica appeared in the records earlier than Mielęcín (first attested in the fourteenth century), situated not far away from the former. Since the late fifteenth century, both villages were often described as *Swarsnycza alias Malentin*.⁸² The Wałcz district's tax registers mentioned these two villages separately – Chwarstnica as property of Stanisław Tuczyński and Mielęcín as that of Rudiger Wedelski.⁸³ A similar situation is the case with the locality of Lipia Góra, Konin district, which is associated with Sługocin based on a mention from the tax register for the years 1616–20 (*Slugocin seu Lipiagora*)⁸⁴ and the head-tax (*poglówne*) register of 1673 (*Lipiegory inclusa summa cum villa Slugocino*).⁸⁵ The tax registers have these villages appearing separately.⁸⁶ In Kościan district, Piotrowice

was most probably situated west or north-west of Goniębice. Mentions survive from the late fourteenth/early fifteenth century regarding two demarcations of the villages of Goniębice and Piotrowice from those of Klunowo and Żakowo.⁸⁷ The village was possibly absorbed in as early as the latter half of the sixteenth century by Goniębice, but ‘survived’ in the tax registers where amounts paid from the mills and windmills operating in Piotrowice were specified.⁸⁸ The village of Szamarzewo, Kościan district, appearing only in the tax registers, has been associated with Szymanowo village, following the suggestion expressed in the SHGPoz.⁸⁹

In the Voivodeships of Kalisz and Poznań, altogether sixty-five localities, 1.7% of all the settlements, have not been localised (see Table 1). This number is significantly higher compared to the preceding volumes in the series (0.3% for Sandomierz Voivodeship, 0.7% for Sieradz and Łęczyca Voivodeships, and 0.7% for Cracow Voivodeship).⁹⁰ This outcome is partly owed to the use of *Teki Dworzaczka*, which specify a number of localities not mentioned elsewhere.

Legend: * Date refers to the only mention of the locality.

The settlement in Voivodeship of Poznań in the second half of the sixteenth century is divisible into two main parts, separated latitudinally along the strip of the Warta, Notecka Primeval Forest, and the Noteć River. Only in the eastern edge of the forest – in the area of Oborniki, Rogoźno, and Ryczywół – the settlement was denser and, in its origins, mainly focused on the voivodeship's southern part.

The northern area of Poznań district and the district of Wałcz underwent in that period a rather scarce, though fairly intense, colonisation of the numerous primeval forests, swamps, and wastelands. The relatively densest settlement appeared in the area of Czarnków. Rather stable and numerous localities appeared in the western part of the area under discussion, in the neighbourhood of Człopa, Tuczno, and Mirosławiec (Frydland), right next to the state border with Brandenburg. Twenty-one of those settlements dated back to at least the fourteenth century; they are listed in the 1337 *Landsbuch* of the Brandenburg Margrave Ludwig.⁹¹ It was only at the end of the sixteenth century that the settlement network grew denser in that part of the voivodeship (for more on the progress of the colonisation, see below), mainly in the area of Ujście, Wałcz, and Czaplinek. Some of the settlements belonging to this part of Poznań district, situated north-east of Rogoźno, formed a segment of a somewhat denser settlement in the vicinity of Chodzież, a locality situated at the western edge of Kcynia district, Kalisz Voivodeship. The least dense settlement was definitely that in the area of today's Trzcianka, at the borderline of the districts of Wałcz and Poznań, and in the north-east of the region under discussion, in the vicinity of Jastrowie (these areas were more densely populated east of the Gwda, in Nakło district territory).

The main identifiable reason behind such a low population in the northern part of Poznań Voivodeship is the geographic conditions. The numerous and extensive forest complexes, swampy areas of the Noteć, the landform with numerous moraine hills, and sandy soils in the major part of the area all caused that the terrain was mostly not easy to colonise.⁹² The impact of border hassles between the Kingdom of Poland and the Duchy of Pomerania and, to a lesser extent, with Brandenburg, was no less considerable: they were gnawing primarily in Wałcz district and the locals had been suffering them since the fifteenth century. The picture was completed by the banditry and aggressive actions of Polish and foreign nobles.⁹³

The southern part of the voivodeship, with its dissimilar settlement profile, consisted of the remainder of Poznań district as well as of Kościan district and Wschowa land. The area of the largest settlement began in the vicinity of Rogoźno and, circumventing the eastern edge of the Notecka Primeval Forest, stretched southwards up to the voivodeship's frontier (the southern border of Kościan district, to be specific) and the state's border with Silesia; westwards, it reached the vicinity of Międzychód, Pniewy, and Lwówek, Opalenica, Grodzisk, Śmigiel, and Włoszakowice. Also in this part of the voivodeship, the settlement was unevenly distributed. The western ends, beginning with P[sz]czew, via Skwierzyna, Bledzew, Międzyrzecz, Trzciel, Babimost, Wolsztyn, up to Przemęt and, further on, the Wschowa land, was much more scarcely populated, compared to the eastern part of this administrative unit. Only in the western part of Kościan district, somewhat larger settlement aggregations were located in the area delineated by Babimost, Wolsztyn, and Zbąszyń.

The voivodeship's largest settlement cluster was the agglomeration of Poznań, with its suburbs, surrounding towns and villages.⁹⁴ In Kościan district, a fairly high population density appeared in the area

⁹¹ The settlements included: Arnsfelde (later, Gostomia), Bercholt, Bronikowo, Chwiram, Giżyno, Henkendorf, Knaken-dorf, Lubsdorf, Łowicz, Marcinkowice, Marta, Mielęcín, Miłogoszcz, Nakielno, Orla, Ruschendorf, Sadowo, Schulzendorf, Stralenberg, Stręczno, and Stubowo; see *Das Neumärkische Landbuch Markgraf Ludwig's des Aelteren vom Jahre 1337*, ed. L. Gollmert, „Historisch-Statistischer Verein zu Frankfurt a.O.”, vol. 2, 1862 (=Mitteilungen des Historischen Vereins zu Frankfurt), pp. 27–29; F. Schultz, *Das Deutsch Kroner Land im 14. Jahrhundert*, „Zeitschrift des Westpreussischen Geschichtsvereins”, vol. 39, 1899, pp. 44–58; B. Janiszewska-Mincer, *Osadnictwo ziemi waleckiej do początków XVI w.*, „Materiały Zachodniopomorskie”, vol. 9, 1965, pp. 621–630. Let us remark, though, that a number of the villages enumerated in 1337 were described as abandoned.

of Kościan, Śmigiel, and Charbielin, the longitudinal strip stretching between Śrem and Dolsk, on the one side, and ending in the area of Krobia, on the other, as well as the south-eastern vicinity of Grodzisk.

Colonisation was also attracted by the Warta River; a large number of localities were situated along both of its banks, from the river's entry into the voivodeship up to the area of Oborniki. Further on, in the Warta's longitudinal course, settlement – somewhat less dense but still considerable – tended to concentrate on the southern, left bank, up to Międzychód. While the Warta bonded the settlement network together, the other two large rivers of Greater Poland, the Obra and the Noteć, often posed barriers to the development of colonisation. On the Obra, which flowed through Kościan district and the western edge of Poznań district, towns (Krzywiń, Kościan, Zbąszyń, Trzciel, Międzyrzecz) and villages were situated, yet in the central part of the river's course its main bed and the numerous and vast flood plains were a serious barrier to the colonisation and settlement at that time.⁹⁵ The River Noteć itself did not favour settlement in its direct vicinity, though the towns of Czarnków and Wieleń, with their associated estates, were situated on the Noteć. The river's valley became actively colonised since in the late sixteenth and early seventeenth century, not infrequently by establishing villages inhabited by Dutch (or German) settlers, so-called *Olęders*.⁹⁶

The border between the districts of Poznań and Kościan was unevenly populated. East of Grodzisk and Opalenica, settlement in the border area of the two districts came across no obstacles and was continuous, whereas west of those towns the border was formed of pretty extensive primeval forests that stretched up to the western state border.

As a general observation, settlement/colonisation in the western part of Poznań Voivodeship (the vicinity of P[*sz*]czew, Międzyrzecz, and Trzciel) was much less dense, possibly because of the borderland location of those areas and their worse natural condition, with lower-quality soils and stronger developed hydrographic network.

The density of settlement in Kalisz Voivodeship can be outlined as rather evenly spread, with a diminishing trend observable northwards. The settlement network in Krajna area, Nakło district, was the scarcest and the most diverse. Even after the foundations that occurred during the sixteenth century, the division is clearly visible into the district's two regions: the weaker colonised north-western region and the south-eastern one, featuring a denser settlement. The borderline between them went from Kamień Krajeński to Ujście, extending toward the south-east in the area between Dźwierzno and Mrocza. A clear caesura between the settlement in the districts of Nakło and Kcynia was the Noteć River together with its boggy banks. In its central and southern part, Kcynia district was evenly populated. The territory around Chodzież, neighbouring in the west with the weakly populated areas of Poznań district, was separated with a strip of forests from that centre of the district. In the eastern part of Kcynia district, the parishes of Samokłęski and Łabiszyn were separated from the settlement's centre as well. The latter parish retained continuity in the east with the colonisation area in southern Cuyavia. The aforesaid central part of Kcynia district had its extension in the settlement in Gniezno district. The western part of the latter, together with the northern part of Pyzdry district, in the area between the Wełna and the Warta, was one of the most densely populated areas in Kalisz Voivodeship, particularly in the vicinity of Gniezno.

Compared to those, the eastern area of Gniezno district and the north-eastern area of Konin district had a sparser settlement network and bigger afforestation. In Konin district, settlement concentrated along the Warta, especially in the area of Koło (*Starosta's* district of Koło). Very low-populated was the area of forests between the districts of Konin and Kalisz; the latter was highly diverse in terms of settlement density. Apart from the Kalisz-Konin borderland, which was occupied by a large primeval forest complex, the border area with the southern part of Pyzdry district and further southwards, on the border with Silesia and Ostrzeszów district (the vicinity of Odolanów), was rather sparsely populated, with settlements situated almost only along the rivers. The situation was quite similar on the border with the district of Sieradz, south-east of Godziesze Wielkie.

One of the quite densely inhabited areas within the voivodeship was the central area of Kalisz district, where settlement was concentrated along the Prosna River, and the border area between Kalisz and Sieradz districts along the eastern section. Two settlement areas are discernible in the southern fragment of Pyzdry district. Its northern part was concentrated along the tributaries of the Warta and

⁹⁵ K. Górską-Gołąska, *Obra*, [in:] SHGPoz, part III, p. 384.

⁹⁶ M. Hlebionek, M. Targowski, *Osadnictwo olęderskie na ziemi wieleńskiej*, Wieleń 2014, pp. 27, 29.

was connected with the north-western settlement territory of Kalisz district. Its southern part tended to concentrate near the tributaries of the Oder [Odra] River and showed continuity with the settlement in the southern part of Kościan district. In Kalisz Voivodeship, settlement was clearly connected with the geological conditions. Sandy soils tended to be omitted; they appeared in the lowest populated north-western area of Nakło district,⁹⁷ the north-east of Kcynia district, the Konin-Kalisz borderland, and the southern fragments of Kalisz district.

* * *

In the Voivodeship of Poznań, the second half of the sixteenth century saw the most intense settlement development partly in Poznań district and in the entire district of Wałcz, in the areas situated north of the Notecka Primeval Forest and the River Noteć. The territory was highly afforested and had rather low-quality soils, an expanded hydrographic network and numerous lakes, especially in Wałcz district.⁹⁸ The colonisation was carried out in the estates owned by the king and noblemen; the progress of this action is shown in the tables below (with more exact data for the royal demesnes).

⁹⁹ Based on: LWWK 1564, pp. 178–82; LWWK 1569, ff. 41v–47r; LWWK 1628, pp. 33–64; K. Górka-Gońska, *Drahim*, [in:] SHGPoz, part I, p. 394. The study by E. Bahr, *Die Starosteien Draheim zwischen 1565 und 1632*, „Baltische Studien. Neue Folge”, vol. 57, 1971, pp. 27–42 has proved not quite useful as it is only based on the information from the 1564–5 and 1632 visitation records and thus does not satisfactorily discuss the development of settlement/colonisation in the *Starosta*'s district in the second half of the sixteenth century. Piotrkowska Pozn. Wał., pp. 84–85 mentions, within the Drahim *Starosta*'s district: Cieminko (Ceminy), a settlement absent in the present comment, probably being a seventeenth-century purchase (as per LWWK 1628, p. 40, the village has been the district's property for two years); and, Uraz (Gołagóra/Kolberg), also a village known from the seventeenth century (LWWK 1628, p. 41; also, see K. Górka-Gońska, *Gola Góra*, [in:] SHGPoz, part I, p. 528).

¹⁰⁰ As per a mention dated 1569, the village had two more years of rent-free period (*wolnizna*). Assuming that it was granted ten years of the period, it might have been established in 1560 or 1561. LWWK 1569, f. 44v.

¹⁰¹ As per a mention dated 1569, the village had four more years of rent-free period. Assuming that it was granted ten years of the period, it might have been established in 1563 or 1564; *ibidem*, f. 45r.

¹⁰² As per a mention dated 1569, the village's dwellers had enjoyed a rent-free period for four years, with six more to go; *ibidem*, f. 45r.

¹⁰³ As per a mention dated 1569, the village's dwellers had enjoyed a rent-free period for four years, with six more to go; *ibidem*, f. 45r.

¹⁰⁴ In 1569, the village is mentioned as founded in the same year: “*Swartenzeiek Nowi thego roku zasazadzeni*”; *ibidem*, f. 45r. U. Piotrkowska (Piotrkowska Pozn. Wał., p. 20) mentions the village, though the source reference she quotes (LWWK 1564, p. 182) only refers to Swartenzel Wielki.

¹⁰⁵ Piotrkowska Pozn. Wał., p. 65; cf. LWWK 1628, p. 43.

Róża	c. 1555 ¹⁰⁹
Sypnow	1570 ¹¹⁰
Brzeźnica	1577 ¹¹¹
Duderlak	1582 ¹¹²

¹⁰⁶ The village named Baugienbul appears in the 1582 tax register (RPWP, wlc, 1582, no. 6). Its name is also mentioned by Z. Boras, in the context of an agreement between serfs from the Pomeranian village of Patzke and a Polish village on the other side of the border in 1586 (idem, *Stosunki polsko-pomorskie*, p. 205, footnote 49: "Ein interim contract sowegen der Dörfer Patzkeund Poggenpful anno 1586 getroffen"). The Pomeranian description of the Polish-Pomeranian borderline mentions two units – Poggenpul, a 'Small' and a 'Big' one, through which the state border was set, identified as wetlands or lakes situated between the Lakes Kołbackie and Komorowo (K. Górska-Gołaska, *Poggenpul*, [in:] SHGPoz, part III, p. 719; T. Jurek, *Wielkopolska*, [in:] SHGPoz, part V, no. 3, p. 587). We presume that the locality was situated in the area of today's Polne village.

¹⁰⁷ LWWK 1628, p. 42. Piotrkowska Pozn. Wał., p. 57, perceives the villages of Prosino and Nowa Wieś as one locality. However, LWWK 1628 mentions two different localities.

¹⁰⁸ Based on: a document dated 19 April 1590, whereby Hieronim Gostomski, the then-*starosta*, transfers the *Starosta*'s district of Wałcz to his son Jan Gostomski (MK 135, ff. 752r–752v [=SMK IV, no. 891]), as corroborated on 15 Jan. 1593 by the king (MK 138, ff. 13r–14r [=SMK VII, no. 18]); BOss, 334, II, 'Inwentarz wałeckiego starostwa anni 1619 in Iulio oddany w aręndzie panu Mikołaiowi Nieborowskiemu przez pana Iana Gostomskiego starostę wałeckiego', ff. 381r–394r; Schmitt; Bocheński; HistPowWał; Bąk, Wałcz; K. Górska-Gołaska, T. Jurek, *Wałcz – starostwo*, [in:] SHGPoz, part V, no. 3, p. 500.

¹⁰⁹ Schmitt, p. 221; Bocheński, p. 71; HistPowWał, p. 341; Bąk, Wałcz, p. 66. The editors of Ignacy Bocheński's study state (ftn. 4, p. 71) that the village of Róża was deserted in 1582; as it seems, Duderlak was actually the case. The fragment the editors refer to (so does Bąk, Wałcz, p. 66) clearly states that in 1602 a plague raged in the district of Wałcz, which caused the dying out of the dwellers of Róża, a village set up in 1582, which neighboured on Brocz village owned by the Golec family (G. Brümmer, *Die Goltzen Herrschaft Brotzen. Geschichtliche Darstellung der Entwicklung eines ländlichen Bezirkes mit einem Anhang bisher ungedruckter Urkunden*, Danzig 1893, pp. 14–15). It is otherwise known that a privilege was granted in 1582 to Duderlak by the *Starosta*'s district of Wałcz (Schmitt, p. 220; K. Górska-Gołaska, [*Margrabska Droga*], [in:] SHGPoz, part III, p. 89).

¹¹⁰ In the foundation charter of 1570, the village was called Nałęcz (Schmitt, p. 223). The king's confirmation of the 1570 privilege is dated 1589: Schmitt, p. 223; Bocheński, pp. 53, 72; HistPowWał, p. 346; though L. Bąk has 1577 (Bąk, Wałcz, p. 67).

¹¹¹ K. Górska-Gołaska, *Brzeźnica*, [in:] SHGPoz, part I, p. 127; Piotrkowska Pozn. Wał., p. 15. In 1574, the mill 'on [the River of(?) Brzeźnica]' is reported to have been attacked by *Starosta* Andrzej Górka (Z. Boras, *Stosunki polsko-pomorskie*, p. 200). The HistPowWał authors (p. 318) that the 1577 foundation was secondary. An interpretive difficulty is caused by identifying Łodzia village of the Ujście *Starosta*'s district by some authors with Brzeźnica (as in K. Górska-Gołaska, *Brzeźnica*, p. 127). Also, see the erroneous mention in a *regest* in SMK VIII, no. 367, where a Łodzia inn is mentioned as of 1595 – otherwise, an inn in the village of Łodzia is referred to: "in usu et possessione pacifica tabernae in villa Lodzia ad capitaneatum nostrum Walcensem pertinente". These mentions suggest that a village so named still existed at the end of the 16 c. However, the 1619 inventory mentions no name of Łodzia, Brzeźnica appearing instead (BOss, 334, II, f. 391r). Apparently, the village's name had meanwhile been altered, or the land of Łodzia village absorbed into Brzeźnica village. Ignacy Bocheński has found in the Wałcz municipal registers a privilege for Brzeźnica dated 1601 r. (Bocheński, p. 56); F.W.F. Schmitt believes that the privilege confirms that Brzeźnica was established in 1600 (Schmitt, p. 219). All in all, it is somewhat plausible that Brzeźnica was set up on the land of Łodzia village, or the latter's land was absorbed by the later foundation of Brzeźnica; however, a newly-founded village of Brzeźnica was mentioned in 1586 (K. Górska-Gołaska, *Brzeźnica*; eadem, *Samborsko*, [in:] SHGPoz, part IV, p. 281).

¹¹² Bocheński, p. 61; Bąk, Wałcz, p. 67. Initially (1582) under the name of Róża, Duderlak/Dudyłany attested as of 1587 (Schmitt, p. 220; K. Górska-Gołaska, [*Margrabska Droga*], p. 89). Z. Boras provides unsettling information from the 1570s: a 1574 complaint submitted by the *podstarosta* [sub-*starosta*] of Szczecinek to the duke of Pomerania refers to a 'quite recently founded' village of Dudyłany, next to which another villages had apparently been set up by the *Starosta* of Wałcz. In 1576, the *starosta* is said to have invaded the Pomeranian [*sic*] village of Dudyłany (Z. Boras, *Stosunki polsko-pomorskie*, pp. 200–201).

Legend: * Re-founded/re-chartered.

¹¹³ Bocheński, p. 57; Bąk, Wałcz, p. 67. Budy was reportedly first mentioned in 1574–1584, with a mill initially operating at the place of the later settlement (Schmitt, p. 220; HistPowWał, p. 319; see also Piotrkowska Pozn. Wał., p. 15). Z. Boras (idem, *Stosunki polsko-pomorskie*, pp. 191–192) moreover mentions that *Starost* Andrzej Górka had a hunting manor built in what later became Budy village, by the River Plytnica – possibly earlier than the mill was put into operation. There is also a privilege for the administrator (*soltys*) of the village of Budy from 1590: MK 135, ff. 741v–742r [=SMK IV, no. 871].

¹¹⁴ Bocheński, pp. 65–66; HistPowWał, p. 336. A 1589 privilege for the village administrator (*soltys*): MK 135, ff. 513v–515r [=SMK IV, no. 551]. Bąk, Wałcz, p. 67, has 1589, whereas Schmitt (p. 217) dates the village at 1590. Interestingly, the Pomeranians stated in as early as 1576 that Nadarzyce had been set up on a Pomerania-owned land (Z. Boras, *Stosunki polsko-pomorskie*, p. 201).

¹¹⁵ Established in 1560 as a demesne farm, mentioned in 1586 as a village: Schmitt, p. 220; Bocheński, p. 66 (referring the 1560 mention to the existing village; this is repeated in Bąk, Wałcz, p. 66); HistPowWał, pp. 337–8; K. Górka-Gołaska, *Nowy Dwór*, [in:] SHGPoz, part III, p. 335.

¹¹⁶ Schmitt, pp. 222–3; Bocheński, p. 81 and footnote 50 therein; HistPowWał, p. 350. In these authors' opinion, Wiesiołka was re-founded; this statement is repeated by Piotrkowska Pozn. Wał., p. 77. Bąk, Wałcz, p. 67, observes, in turn, that the founding charter for Wiesiołka is from 1593, though some historical records would re-date the settlement's appearance back to the fifteenth century. Also, see the 1594 entry in Wałcz municipal register: Teki Dworzaczka, Regesty, 191 (no. 77a) 1594. The author of the dictionary entry believes instead that Wiesiołka emerged in the early 1590s (T. Jurek, *Wiesiołka*, [in:] SHGPoz, part V, p. 640). In any case, Wiesiołka is mentioned by a 1590 document containing the Wałcz *Starosta*'s district's first consent for transfer (MK 135, ff. 752r–752v).

¹¹⁷ HistPowWał, p. 323; Schmitt, p. 219, and Bąk, Wałcz, p. 67 have 1593.

¹¹⁸ The 1590 founding deed, as the king's *transumpt* [copy establishing the document's validity] from the same year, is published by G. Raddatz, *Geschichte des Dorfes Freudenfjör (Kreis Dt. Krone)*, „Grenzmärkische Heimatblätter”, 1934, no. 2, pp. 5–7; also, see Schmitt, p. 220; Bocheński pp. 71–72; HistPowWał, pp. 346–347; Bąk, Wałcz, p. 67; T. Jurek, *Szwecja*, [in:] SHGPoz, part IV, p. 859.

¹¹⁹ Schmitt, p. 218; Bocheński, pp. 53, 63; Bąk, Wałcz, p. 67; see also an entry in the municipal register of Wałcz, dated 1591, with the founding deed by the *Starosta* of Wałcz entered, along with the corroboration by the king from 1590: Teki Dworzaczka, Regesty, 160 (no. 30) 1591.

¹²⁰ Zbytno is apparently associated with the village called *Konieczbyczny*. The latter is twice referred to in the *Metrica Regni Poloniae* entries, namely: a consent for *in cruda radice* foundation of a thus-named village, dated 1589 (MK 135, ff. 490v–491r [=SMK IV, no. 530]); and, a corroboration of a privilege re. the *solectwo* [local territorial unit] thereat, 1595 (MK 139, f. 350r [=SMK VIII, no. 369]). It seems that the suggested name of the settlement had to do with the Lake Zbyczno, by which the village of Zbytno was later on situated. On the other hand, doubt is raised as regards unambiguous identification of the *Konieczbyczny* village as Zbytno, for the first mentioned privilege refers to no benefits potentially gainable by the founder from the Zbyczno Lake (in contrast to what is attested with regards to privileges for *soltyses* or residents of villages situated, broadly speaking, on a water; cf. K. Górka-Gołaska, *Krapskie jeziora*, [in:] SHGPoz, part II, p. 446) to mention but this aspect. The privilege corroboration information only quotes the title, without the document's content. The village is moreover absent in the above-enumerated *starosty*'s transfer documents from 1590 and 1593. Another negative premise may be the excerpt from the founding deed of the village of Szwecja, where, in determining the limits of the village to be founded, the settlement is mentioned that was to spread “usque ad campum quod iacet penes stagnum Zbyczno” (G. Raddatz, *Geschichte*, p. 7). We presume that these notices primarily illustrate the difficulties the Wałcz *Starostas* and their founders came across when colonising the area.

¹²¹ The king's corroboration, dated 1600, of the Wałcz *starosta*'s document issued in 1596 for the *soltys* in Leżenice, in recognition of his village founding merits: MK 145, ff. 116v–117v. L. Bąk mentions a privilege from only 1624, which refers to a resettlement of the village completed a few years earlier, and so dates it at 1620 (Bąk, Wałcz, p. 67).

¹²² Schmitt, p. 223; Bocheński, p. 53; HistPowWał, p. 326; Bąk, Wałcz, p. 67.

Table 4. Noble-owned villages in Walcz district until 1600, absent in the district's tax registers

Name of locality	Established or first attested
Fulbek	1570 ¹²³
Bysze	1592 ¹²⁴
Laczk	1594 ¹²⁵
Langenhof	1594 ¹²⁶
Warnięg	1595 ¹²⁷
Apelweth	1600 ¹²⁸
Byszki	1600 ¹²⁹
Hamer	1600
Nowy Golcz	1600 ¹³⁰
Schönholtzig	1600 ¹³¹

Table 5. Settlement development in Ujście *Starosta's* district, second half of the sixteenth century¹³²

Name of locality	Established or first attested
Jastrowie	1560 ¹³³
Hamer Stobnieński	1564 ¹³⁴

¹²³ K. Górską-Gołąska, *Fulbek*, [in:] SHGPoz, part I, p. 447. F.W.F. Schmitt identifies the settlement of Fulbek with the locality named Wielboki, situated on the Brandenburg side, right near the frontier with the Crown (Schmitt, pp. 250–251). Also, see *HistPowWał* (p. 325), where Fulbek is a village first attested in 1593. Fulbek is indeed referred to as a village at the beginning of the seventeenth century (Teki Dworzaczka, *Regesty*, 406 (no. 24) 1608; or, *ibidem*, 483 (no. 78) 1613). We could not however establish the exact date of founding of the village beside the mill mentioned in 1570, and hence Fulbek is marked in the main map as a mill settlement.

¹²⁴ *HistPowWał*, p. 319; K. Górską-Gołąska, *Bysze*, [in:] SHGPoz, part I, pp. 161–162.

¹²⁵ Schmitt, p. 248, has a Protestant preacher in office in Lack as of 1540, his successor being attested as of 1584.

¹²⁶ Teki Dworzaczka, *Regesty*, 14000 (no. 1401) 1594 (re. both localities mentioned in 1584). The entry by K. Górską-Gołąska, *Frydland*, [in:] SHGPoz, part I, p. 443, as part of discussion of the distribution of Frydland estate, mentions a demesne farm of Langenhof; also, see K. Górską-Gołąska, *Latzke*, [in:] SHGPoz, part II, p. 577.

¹²⁷ Teki Dworzaczka, *Regesty*, 202 (no. 31) 1595.

¹²⁸ F.W.F. Schmitt notes the foundation of a Protestant community church in this locality in 1586 (Schmitt, p. 249). It is probably on this basis that *HistPowWał*, p. 325, dates the village's establishment.

¹²⁹ For an annotation of the *Beskye* brothers (dated 1509), associated by authors with Byszki: *HistPowWał*, p. 319.

¹³⁰ F.W.F. Schmitt mentions a Protestant preacher in Nowy Golec, as at 1540 (Schmitt, p. 246).

¹³¹ Teki Dworzaczka, *Regesty*, 260 (no. 23) 1600 (re. all the localities enumerated in 1600); *HistPowWał*, p. 337. F.W.F. Schmitt names Schönholtzig as non-existing before 1754 (Schmitt, p. 244).

¹³² Based on: LWWK 1564, pp. 139–56; LWWK 1569, ff. 7r–19r; Ujście 1627; Żmidziński, pp. 49–69; also, *HistPowWał*; Bąk, *Walcz*. The map does not feature the village of Kotuń, apparently attested in 1592. The details given by F. Żmidziński are not quite certain; his dating of the village's establishment at the 1580s is probably based on later sources and on a temporal correlation with the founding of the nearby Kłapsztyn mill. Also the details given in footnote 57, p. 59 therein seem not quite precise. The author of the dictionary entry 'Kotonia', basing on the same source, only mentions a forest named Kotunia (K. Górską-Gołąska, *Kotonia*, [in:] SHGPoz, part III, p. 414; see also Bąk, *Walcz*, p. 68). Kotonia the village is referred to in the 1627 inventory of the *Starosta's* district of Ujście (AP Poznań, Akta miasta Ujście, I/1, ff. 19r–19v), or perhaps even in 1607 (K. Górską-Gołąska, *Kotonia*, p. 414 mentions a road from Biała Góra to a place called Kotunia, interpreting the latter as the former forest (with a question mark, though); Żmidziński that the village existed in 1607: Żmidziński, p. 59). The settlement is not featured on the main map as we have failed to find its attestation before 1600.

¹³³ LWWK 1564, p. 152; LWWK 1569, f. 16r; Żmidziński, p. 57; K. Górską-Gołąska, *Jastrowie*, [in:] SHGPoz, part II, pp. 56–57.

¹³⁴ Żmidziński, p. 57. As of 1564, mention of Hamer Stobnieński on the Pokrzywnica River; LWWK 1564, p. 140; also, see T. Związek, *Kuźnica w Stobnie. Uwagi osadnicze na marginesie edycji przywileju dla rudnika Jana Gelinghausa z 1560 roku*, [in:] *Fines testis temporum. Studia ofiarowane Profesor Elżbiecie Kowalczyk-Heyman w pięćdziesięciolecie pracy naukowej*, ed. M. Dzik, G. Śnieżko, Rzeszów 2017, pp. 127–147.

Name of locality	Established or first attested
Smolany	c. 1569 ¹³⁵
Gędek	1567 ¹³⁶
Pokrzywnica	1567 ¹³⁷
Głochotka Młyn	c. 1569 ¹³⁸
Kaczory*	c. 1577
Ptusza	1580 ¹³⁹
Skórka	1583 ¹⁴⁰
Plecemin	1584 ¹⁴¹
Krępa	1584 ¹⁴²
Dolaszewo	1586 ¹⁴³
Biała Góra	1586 ¹⁴⁴
Klapsztyn	1586 ¹⁴⁵
Dobrzyca	1590 ¹⁴⁶
Płytnica	1594 ¹⁴⁷
Czechy	1597 ¹⁴⁸

¹³⁵ Żmidziński, p. 57. The 1569 visitation record reads: “Hamer newly builde halve a mille from the vyllyge in the thyckett upon Lipnica [*recte*: Piltwica] River is working not as yett ... Bessyde that Hamer fewe logdes are newly inhabited of bloomeres”; LWWK 1569, f. 16r. The 1627 Ujście *Starosta*’s district revision mentions it as a ‘village beside Hamer’; Ujście 1627, ff. 18r–18v.

¹³⁶ Żmidziński, p. 57; K. Górską-Gołąska, *Gędek*, [in:] SHGPoz, part I, p. 473.

¹³⁷ The 1569 visitation has, “newely founded since two yeares”; LWWK 1569, f. 15r. The founding charter for the village is only from 1579; Żmidziński, p. 57, footnote 48; Bąk, Wałcz, p. 68; also, see K. Górską-Gołąska, *Pokrzywnica*, [in:] SHGPoz, part III, p. 720.

¹³⁸ As per the 1569 visitation, “the syxthe myll Simek Glochotka upon the brooke beyonde Lubianka”; LWWK 1569, f. 14r; Żmidziński, p. 57.

¹³⁹ Żmidziński, p. 57; K. Górską-Gołąska, *Ptusza*, [in:] SHGPoz, part III, p. 915.

¹⁴⁰ Żmidziński, p. 58. In 1564 and 1569, only the mill is mentioned (LWWK 1564, p. 140; LWWK 1569, f. 8r). Polaszewski, *Własność feudalna w województwie kaliskim w XVI wieku*, Poznań 1976, p. 84, gives the date 1588. As the mill operated on the River Głomia, it seems that the king’s confirmation of the holding by Stefan Chibor and his wife Anna the *solectwo* [territorial unit] at the village of Głomia, *penes molendinum Skorki sitam*, dated 1595, referred to the village that developed beside it (MK 139, ff. 349v–350r).

¹⁴¹ Żmidziński, p. 58; cf. K. Górską-Gołąska, *Plecemin*, [in:] SHGPoz, part III, p. 691, with a quote from the Poznań municipal register, 1616, noting that certain villages in the estate of Krajenka, Plecemin included, have ‘lately’ been founded by the *starostas* of Ujście.

¹⁴² Żmidziński, p. 58; Bąk, Wałcz, p. 68. We presume that this particular village might have been concerned by the permit for buyout of the *solectwo* ‘in pago Krampczigensi’, issued for Paweł Prinn in 1599 (MK 143, ff. 165r–165v).

¹⁴³ Żmidziński, p. 58; Bąk, Wałcz, p. 68 (the date given is 1585).

¹⁴⁴ Żmidziński, p. 58; K. Górską-Gołąska, *Biała Góra*, [in:] SHGPoz, part I, pp. 31–32; Bąk, Wałcz, p. 68 (the date given is 1585).

¹⁴⁵ Żmidziński, p. 59; K. Górską-Gołąska, *Klapsztyn*, [in:] SHGPoz, part II, p. 196. In 1591, the king confirmed to the miller Daniel Klapsztyn the possession of a mill, described as “molendini aquatici ad villam praefatam Białagora in capitaneatu Ustensi consistentis”; MK 136, ff. 273r–273v [=SMK V, no. 328].

¹⁴⁶ Żmidziński, p. 58; Bąk, Wałcz, p. 68.

¹⁴⁷ Żmidziński, pp. 59–60; Bąk, Wałcz, p. 68. In 1596, the king granted a *solectwo* and a mill in Płytnica village to Stanisław Łącki, a royal chancellor (MK 143, ff. 49r–50r). Interestingly, two years later, in 1598, the king allowed Paweł Prinn to redeem from Joachim Medach, a lodger in the village (Żmidziński, 60, note 62), a *solectwo* in the village named Now Płytnica (MK 142, ff. 63v–64r). Hence, either the bestowal to Stanisław Łącki had not been put into effect, or two different villages were meant (Płytnica and Nowa Płytnica). It is worth noticing, though, that the *starosta*’s district revision of 1627 only mentions one Płytnica (Ujście 1627, ff. 15v–17r). A village named Płytnica was situated also in the Duchy of Pomerania, north of Sypniewo and Nadarzyce, and is mentioned in the context of border disputes of the late 1560s/early 1570s (Z. Boras, *Stosunki polsko-pomorskie*, p. 194). This is, perhaps, why the village set up in *Starosta*’s district of Ujście was referred to as ‘new’. This would not point to the village actually concerned by the royal document of 1596, though.

¹⁴⁸ Żmidziński, p. 60; Bąk, Wałcz, p. 68.

Name of locality	Established or first attested
Garbaty Most	c. 1597 ¹⁴⁹
Ołędrowo (Ługi Ujskie)	1597 ¹⁵⁰
Zawada	1598 ¹⁵¹

¹⁵⁰ Żmidziński, p. 60; Bąk, Wałcz, p. 68; Z. Chodyła, *Ługi Ujskie – najstarsza osada ołędowska w Wielkopolsce (1597–1772)*, „Rocznik Nadnotecki”, vol. 30, 1999, pp. 25–58.

¹⁵¹ Żmidziński, p. 60; Bąk, Wałcz, p. 68. As of 1564, the unit is still mentioned as a mill; LWWK, p. 140.

¹⁵² Żmidziński, p. 60. There is, however, a king's bestowal for the mill of Jaracz, dated as of 1598, for Paweł Piątkowski, a musician to the royal court, in which the mill is described as part of Śmiłowo village: “molendinum Jaracz dictum ad villam Smielowo capitaneatus Ustensis consistentem” (MK 142, ff. 136v–137r). The mill is separately mentioned in the 1627 revision's list of the *starosta's* district's mills (Ujście 1627, f. 38r), F. Żmidziński notes a privilege for Walenty Kussow. Jaracz appears as a separate settlement unit in the earliest surviving visitation of the Archdeaconry of Kamień, 1652 (Panske, p. 349). In spite of certain doubts, we have decided to mark Jaracz as a separate mill settlement.

¹⁵³ Żmidziński, p. 60; Polaszewski, Własność, p. 84.

¹⁵⁴ Żmidziński, pp. 57–8.

¹⁵⁵ Based on: LWWK 1564, pp. 189–206; E. Raczyński, *Wspomnienia Wielkopolski to jest wojewodztw poznańskiego, kaliskiego i gnieźnieńskiego*, vol. 1, Poznań 1841; Schulz, Merktafel; Schulz, Quellen; Schulz, Netzegau; W. Dworzaczek, *Zastaw Wielenia Brandenburczykom*, „Zasopismo Prawno-Historyczne”, vol. 3, 1951, p. 342; M.D. Zawadzka, *Dzieje Wielenia nad Notecią (do pierwszego rozbioru)*, „Rocznik Nadnotecki”, vol. 7, 1976, no. 1, pp. 40–43; K. Górską-Gołąska, *Notecka Puszcza*, [in:] SHGPoz, part III, p. 302; M. Hlebionek, M. Targowski, *Osadnictwo ołędowskie*, p. 24; T. Jurek, *Wieleń – dobra i starostwo*, [in:] SHGPoz, part V, pp. 559–562.

¹⁵⁶ K. Górską-Gołąska, *Czarnków – dobra*, [in:] SHGPoz, part I, p. 289; eadem, *Czuczarcz*, [in:] SHGPoz, part I, p. 319. A village called Czuczarcz is attested as of 1546 (whether a deserted village was meant, is not known).

¹⁵⁷ K. Górską-Gołąska, *Czarnków – dobra*, p. 289; K. Górską-Gołąska, *Szonowo*, [in:] SHGPoz, part IV, p. 852.

¹⁵⁸ K. Górską-Gołąska, *Czarnków – dobra*, p. 289; T. Jurek, *Trzebinia*, [in:] SHGPoz, part V, pp. 353–354.

¹⁵⁹ K. Górską-Gołąska, *Czarnków – dobra*, p. 289; K. Górską-Gołąska, *Przelewice*, [in:] SHGPoz, part III, p. 834.

¹⁶⁰ K. Górską-Gołąska, *Gołęża*, [in:] SHGPoz, part I, p. 537.

¹⁶¹ The village's attested origins date to the fourteenth century; described as deserted in as late as 1559. HistPowWał, p. 352; K. Górską-Gołąska, *Holgrund*, [in:] SHGPoz, part I, p. 732.

¹⁶² The village's attested origins date to the fourteenth century. As of 1532, it was subject to a property transaction; in 1559 and 1560, mentioned as deserted. A privilege for the village is dated 1578, so it might be presumed that Bercholt had been resettled by then; Teki Dworzaczka, Regesty, 8924 (no. 1396) 1560; K. Górską-Gołąska, *Bercholt*, [in:] SHGPoz, part I, p. 25; HistPowWał, p. 318.

¹⁶³ Mentioned in 1560 as deserted, the village was (once again) transacted in 1574, possibly after its resettlement; Teki Dworzaczka, Regesty, 8924 (no. 1396) 1560; K. Górską-Gołąska, *Człopa [dobra]*, [in:] SHGPoz, part I, p. 317.

Piotrowo	1595 ¹⁷⁷
Janowo	1600 ¹⁷⁸

Legend: * Re-founded/re-chartered.

¹⁶⁴ The only mention of Gogolce before the second half of the sixteenth century is from the preceding century. In the 1550s, the village is several times mentioned in the property partitions of the Czarnkowski family; described as deserted as of 1560; Teki Dworzaczka, *Regesty*, 8924 (no. 1396) 1560.

¹⁶⁵ T. Jurek, *Trzciana Łąka*, [in:] SHGPoz, part V, p. 320. Trzciana Łąka was an object of property transactions to which the Czarnkowski family was a party, in 1561, 1565, and 1570; Teki Dworzaczka, *Regesty*, 63 (no. 1) 1565; 10740 (no. 1398) 1570. The year 1567 is given by Schulz, *Merktafeln*, pp. 13, 37. G. Wróblewska argued that the village emerged before 1586; eadem, *Rozwój przestrzenny miasta Trzcianki*, „Rocznik Nadnotecki”, vol. 1, 1966, p. 38. Some authors say that Trzciana Łąka was erected in the land of a former village named Rozdruzga (Schulz, *Merktafeln*, p. 37; cf. K. Górską-Gołąska, *Rozdruzga*, [in:] SHGPoz, part IV, p. 179; T. Jurek, *Trzciana Łąka*, pp. 320–321).

¹⁶⁶ In 1564, Wojciech Sędziwój Czarnkowski pledged his debt against, *inter alia*, Wołowe Lasy, named in the record ‘Wołowelaski’; Teki Dworzaczka, *Regesty*, 56 (no. 1) 1564; also, see Schulz, *Merktafeln*, p. 13 (not pointing to the source of the 1564 fact).

¹⁶⁷ Teki Dworzaczka, *Regesty*, 8340 (no. 1396) 1557; K. Górską-Gołąska, *Radosiewie*, [in:] SHGPoz, part IV, p. 17.

¹⁶⁸ The date is given after: Schulz, *Merktafeln*, p. 13; Schulz, *Quellen*, pp. 9–10, no. 5; in the sixteenth century, the village is also mentioned as of 1595; Teki Dworzaczka, *Regesty*, 14320 (no. 1401) 1595; K. Górską-Gołąska, *Radosiewie*, p. 17.

¹⁶⁹ The foundation most probably took place at the site of the earlier-mentioned settlement of Maństwo; Schulz, *Merktafeln*, p. 13; Schulz, *Netzegau*, p. 232; K. Górską-Gołąska, *Maństwo*, [in:] SHGPoz, part III, p. 87; I. Skierska, *Siedliska*, [in:] SHGPoz, part IV, p. 367.

¹⁷⁰ At the moment the visitation was written down, in 1564, the name referred to a newly dug-up demesne farm; LWWK 1564, p. 197.

¹⁷¹ E. Raczyński, *Wspomnienia Wielkopolski*, p. XLVI; Schulz, *Netzegau*, p. 3 (giving the date 1593); K. Górską-Gołąska, *Kwiejce*, [in:] SHGPoz, part II, p. 564.

¹⁷² Schulz, *Quellen*, p. 10–12, no. 6; Schulz, *Merktafeln*, pp. 13–14; K. Górską-Gołąska, *Dzierżążna*, [in:] SHGPoz, part I, p. 435; M.D. Zawadzka, *Dzieje Wielenia*, p. 42; M. Hlebionek, M. Targowski, *Osadnictwo ołęderskie*, p. 24.

¹⁷³ E. Raczyński, *Wspomnienia Wielkopolski*, p. XLVI; K. Górską-Gołąska, *Smrodyński*, [in:] SHGPoz, part IV, p. 566.

¹⁷⁵ The 1564 visitation record mentions Piła on the River Biała, which belonged to Pęckowo village; LWWK 1564, p. 191; K. Górską-Gołąska, *Piła*, [in:] SHGPoz, part III, p. 665. In 1593 and 1603, Piła is noted as a separate village (Teki Dworzaczka, *Regesty*, 4031 (no. 959) 1593 and 16569 (no. 1404) 1603, as is recorded as such in the 1631 *podymne* tax register (Podymne 1631, f. 26r).

¹⁷⁶ K. Górską-Gołąska, *Bukówka*, [in:] SHGPoz, part I, p. 152. The information that a Mniszek mill existed in 1570 r. has not been successfully confirmed (as in M. Hlebionek, M. Targowski, *Osadnictwo ołęderskie*, p. 24).

¹⁷⁷ K. Górską-Gołąska, *Piotrowo*, [in:] SHGPoz, part III, p. 681; M.D. Zawadzka, *Dzieje Wielenia*, p. 42 (giving the date 1592); M. Hlebionek, M. Targowski, *Osadnictwo ołęderskie*, p. 24.

¹⁷⁸ Schulz, *Quellen*, pp. 16–17, no. 9; Schulz, *Merktafeln*, p. 14; M.D. Zawadzka, *Dzieje Wielenia*, p. 42; M. Hlebionek, M. Targowski, *Osadnictwo ołęderskie*, p. 24.

The tables above take account of re-founded (re-chartered) localities; such cases prevailed in the noble-owned estates around Człopa (nine re-foundations out of eleven attested), though localities in were resettled as well.¹⁷⁹ In the vicinity of Człopa, quite a number of deserted settlements have been identified, among them those from the fourteenth and fifteenth centuries. It is possible that some difficulties were subsequently caused by the environment, or the owners' mismanagement prevailed. In any case, the Człopa estate appear in the tax registers only in the 1580s, which might be yet another premise attesting to problems with settlement in this part of Poznań Voivodeship.¹⁸⁰

In all probability, at least one failed foundation occurred. In 1586, the 1579 privilege for a *solectwo* in the village of Jastrzębiec, Wałcz *Starosta's* district, was entered in the files at the Nakło court register.¹⁸¹ No other mention of a so-named village is known, which possibly means that the foundation design eventually failed or the settlement functioned under a different name (see below).

The dates of the first mentions of the settlements concerned, when juxtaposed, lead to the conclusion that in the period under discussion the earliest foundations or incorporations, datable to the 1550s/1560s, took place in the *Starosta's* district of Drahim and in the area of Człopa, though single settlements did appear in the other parts behind the Noteć as well. Only later on, since the late 1570s, intense colonisation appeared in the areas of *Starosta's* districts of Ujście and Wałcz, though mill settlements and ironworks tended to appear a few or a dozen years earlier in the former. The latest instances of settlement appeared in the Noteć River area in the vicinity of Wieleń, with an intensified colonisation attested for the last decade of the sixteenth century.

The image of an intense colonisations in the royal demesnes does not merely reflect the condition of the surviving records. The attempts at colonising those areas made by the *starostas* of Drahim, Wałcz, and Ujście were incentivised economically as well as politically. The process of populating the primeval forests in *Starosta's* districts of Wałcz and Ujście was related to the clashes occurring in the Polish-Pomeranian border area. Apart from its apparent political aspects, colonisation in *Starosta's* districts of Drahim had to do with the excessive, unrestrained distribution of estates by *starostas* to the local noblemen (especially the Golec family), and with the problem of deserting villages in the area in the late fifteenth and early sixteenth centuries, and during the first half of the latter.¹⁸² The setting up of new settlements was probably designed to increase the gains from those low-fertile areas. In the first years of the latter half of the sixteenth century, the *Starosta's* districts of Wałcz¹⁸³

¹⁷⁹ Kaczory in *Starosta's* district of Ujście, mentioned in 1513, when it came to demarcating Śmiłowo and Kaczorów from noble-owned villages, was granted another foundation charter in 1577; MK 26, f. 268v [=MRPS IV/2, no.10461]; Żmizdiński, p. 60. In 1590, the village of Gostomia was founded, in *Starosta's* district of Wałcz, Gostomia village was founded upon the land of the older village of Arnsfeld, the latter last mentioned probably as of 1552: "villae nostrae desertae Granswelle, in territorio Walcensi"; MK 82, ff. 70v–71v [=MRPS V, no. 5581]. Some scholars believe that also Wiesiołka, in Wałcz *Starosta's* district as well, was re-founded (see note 116).

¹⁸⁰ Cf. W. Schulz, *Die zweite deutsche Ostsiedlung im westlichen Netzegau*, Leipzig 1938, pp. 10–14.

¹⁸¹ Teki Dworzaczka, Regesty, 889 (no. 56 Rel.) 1586; K. Górską-Gołąska, *Ruschendorf*, [in:] SHGPoz, part IV, p. 221.

¹⁸² Until the mid-sixteenth century, the castle of Drahim, the town of Czaplinek, and the villages of Heinrichsdorf and (Nowe) Worowo were named as the settlements forming permanent part of the *Starosta's* district of Drahim. Moreover, mentioned as affiliated to the district were the surrounding villages which by the mid-sixteenth century were lost to Brandenburg, or were kept by the Golec family. As of 1505, Bolegorzyn, Klausshagen, Vfstete (unidentified), Clensko, Nowy Dwór, Turbergk, and the Lakes Krosino and Wilczkowo are specified; MK 21, f. 245r [=MRPS III, no. 2322]; K. Górską-Gołąska, *Drahim*, [in:] SHGPoz, part I, p. 393. As of 1553, the following settlements are enumerated: Czaplinek, Heinrichsdorf, Plumwerder, Worowo, and the deserted ones of Claushagen, Falkenhagen, Schuldendorf, and Karbon; MK 83, f. 342v [=MRPS V/1, no. 1670]; K. Górską-Gołąska, *Drahim*, p. 393. The deserted villages called Falkenhagen and Schuldendorf have not been localised, though the name of the former appears in the Schrötter map of Pomerania; Schrötter, ark. 013; also, see K. Górską-Gołąska, *Falkenhagen*, [in:] SHGPoz, part I, pp. 440–441; eadem, *Schuldendorf*, [in:] SHGPoz, part IV, p. 326. Freienhagen, another desolated village, might have been part of the same district; eadem, *Freienhagen*, [in:] SHGPoz, part I, p. 442. On Freienhagen, see moreover the remark in eadem, *Bolegorzyn*, [in:] SHGPoz, part I, p. 87: in 1493, the Popielewski family transferred to Andrzej Górski, *starosta* of Drahim, the localities of Falkenhagen, Freienhagen, and Bolegorzyn. Given their small number and their becoming deserted, residents of the nearby Golec-owned villages were hired to do works at the castle; LWWK 1564, pp. 186–188; K. Górską-Gołąska, *Drahim*, p. 393.

¹⁸³ The settlements attested as belonging to the *Starosta's* district of Wałcz before the second half of the sixteenth century included: Wałcz (1303), Arnsfeld, Chwiram, Witkowo (all mentioned in 1337), Skrzatusz (founded 1438), Rozwałd (re-founded 1449; in 1448, the same Jan Wedel granted his wife Anna with dowry and bridewealth, incl. Rozwałd village); Schmitt, pp. 218, 221–222, 224; K. Górską-Gołąska, T. Jurek, *Wałcz – starostwo*, p. 500. Altogether, one town and five villages are so attested.

and Ujście¹⁸⁴ ranked among royal demesnes with a small number of settlements, whereas by the century's end, their holdings in this respect proved among the Greater Poland's largest.¹⁸⁵

Economic aspects propelled the foundation and chartering trend in the noble estates, which appeared the most intense in the area of Wieleń estates. In the 1560s, the royal inspectors named nine settlements situated around the town,¹⁸⁶ whilst the tax collection registers noted payments from eleven villages;¹⁸⁷ by 1600, another eight such units emerged. Settlement in the area of Wieleń and Czarnków continued to develop well into the first half of the seventeenth century.¹⁸⁸

It is however difficult to conclude, in some cases, whether the first mention of a locality indeed refers to a newly founded settlement or such that had eluded documentary evidence, for whatever reason. This is particularly well visible for noble-owned villages in the district of Wałcz, though the noblemen may be believed to have established new settlements in that area as well. The district's tax registers (1563, 1577, 1579, 1582) mention a total of forty localities owned by the local noblemen or noble families, of which thirty-one cropped up in 1563, five in 1577, and four in 1579. By the end of 1600, another eight villages, one mill settlement and one ironworks settlement owned by the local nobility have been identified.

In Wałcz district, noble-owned localities were also situated in the latter half of the sixteenth century which were covered by a tax register. As it seems, the main reason was that certain new settlements were established by the local noblemen, though it cannot be stated with certainty. Such a possibility can basically be adopted, for six of the villages specified in Table 3 were situated in the district's central part, which separated noble estates dating at least to the fourteenth or fifteenth century from the *Starosta's* district of Wałcz territory.

The afforested areas near the border of the Kingdom of Poland, situated on the lands belonging to the Pomeranian royal holdings (*ekonomia*) of Szczecinek and to the local Pomeranian families (Glase-napp, von Wolde, Zastrow, Münchow), as well as the area of the Lower Noteć, west of Wieleń, were at that time colonised by the rulers and nobility from the Duchy of Pomerania and Brandenburg. The northern areas of Poznań district and the districts of Wałcz and Nakło formed therefore an essential part of a greater settlement action carried out in the second half of the sixteenth century in and near the Polish-Brandenburg-Pomeranian borderland.¹⁸⁹ Also in the areas under the rule of Pomeranian dukes and Brandenburg margraves, neighbouring on the part of both voivodeships beyond the Noteć, the latter half of the sixteenth century was a period of intense colonisation.

Similarly to Voivodeship of Poznań, Kalisz Voivodeship saw an intense trend of founding new villages in the nobility's estates – most evidently in the north-western part of Nakło district (the estates owned by Kościelecki and the families Grudziński and Potulicki).¹⁹⁰ Lists of newly founded localities are given also by Nakło district's tax registers, from 1578 onwards.¹⁹¹ The breakdown is complemented with the data contained in *Teki Dworzaczka* and provided by Przemysław Szafran.¹⁹²

¹⁸⁴ Two towns and thirteen villages until 1560; LWWK 1564, pp. 143–155; T. Jurek, *Ujście – starostwo*, [in:] SHGPoz, part V, p. 440.

¹⁸⁵ In total, one town and eighteen villages, and two towns and twenty-six settlements, in *Starosta's* districts of Wałcz and Ujście, respectively.

¹⁸⁶ LWWK 1564, pp. 189–206.

¹⁸⁷ Including: Biała Górna, Drawsko, Hamer Bliższy, Hamer Dalszy, Hamer Kamiennik, Kissy, Miały, Pęczkowo, Rosko, Wrzeszczyna, Żelichowo; RPWP, pzn, 1583, no. 774–784.

¹⁸⁸ M. Hlebionek, M. Targowski, *Osadnictwo ołęderskie*, pp. 24–26; M.D. Zawadzka, *Dzieje Wielenia*, pp. 42–43.

¹⁸⁹ Colonisation of Pomeranian primeval forests proved intense virtually throughout the second half of the sixteenth century; the establishment of new settlements in the Brandenburg-Pomeranian border area gained strength by the very end of the century; see E. Gohrbandt, *Das Bauernlegen bis zur Aufhebung der Erbuntertätigkeit und die Kolonisation des 16. Jahrhunderts in Ostpommern*, „Baltische Studien. Neue Folge”, vol. 38, 1936, pp. 192–227; Z. Table 7. New locations in noble estates in Nakło district, second half of the sixteenth century

Name of locality	First attested
Jełowa	1555 ¹⁹³
Downica (Lędyczek)	1556 ¹⁹⁴
Górzna*	1557 ¹⁹⁵
Radawnica (Radownica)	1564 ¹⁹⁶
Buka (Nowa Wieś)	1578 ¹⁹⁷
Czyżkowo (Szyszkowo)	1578 ¹⁹⁸
Grudna	1578 ¹⁹⁹
Krukowo	1578 ²⁰⁰
Potulice	1578 ²⁰¹
Skarpa*	1578 ²⁰²
Stare Dzierżążno (Dzierżążna)*	1578 ²⁰³
Śmiardowo Złotowskie (Śmiardowo)	1578 ²⁰⁴
Wersk	1578 ²⁰⁵
Żeleznica (Hamer Żelazny)	1578 ²⁰⁶
Batorowo	1579 ²⁰⁷
Osówka	1579 ²⁰⁸
Buczek Mały	1580 ²⁰⁹
Kujan	1582 ²¹⁰
Trudna	1582 ²¹¹
Skórka	1588 ²¹²

¹⁹³ Teki Dworzaczka, Regesty, 2151 (no. 213) 1555; RPWK, nkl, 1565.

¹⁹⁴ Teki Dworzaczka, Regesty, 7112 (no. 897) 1556.

¹⁹⁵ Ibidem, 2170 (no. 213) 1557; LWWK 1564, p. 141: the village is mentioned as set up seven or eight years earlier on the Ujście-Piła *Starosta's* district lands.

¹⁹⁶ Teki Dworzaczka, Regesty, 2262 (no. 215) 1564; LWWK 1564, p. 141: the village is mentioned as set up seven or eight years earlier on the Ujście-Piła *Starosta's* district lands. Szafran (p. 184) speaks of 1432 (after K.J. Hładyłowicz, *Zmiany krajobrazu i rozwój osadnictwa w Wielkopolsce od XIV do XIX wieku, z dodatkiem 2 map*, Lwów 1932), but this date seems little probable.

¹⁹⁷ RPWK, nkl, 1578, no. 262; the year 1553, given by Szafran, refers to a locality in Dźwierszno Wielkie parish, so a different village is meant.

¹⁹⁸ RPWK, nkl, 1578, no. 259.

¹⁹⁹ Ibidem, no. 238.

²⁰⁰ Szafran, p. 163.

²⁰¹ RPWK, nkl 1578, no. 258.

²⁰² Ibidem, no. 263.

²⁰³ Ibidem, no. 257.

²⁰⁴ Ibidem, no. 263. Szafran (p. 198) has 1560, but the note he refers to is not records-based and may refer to Śmiardowo Krajeńskie, an earlier-existing locality.

²⁰⁵ RPWK, nkl, 1578, no. 260.

²⁰⁶ Ibidem, no. 261. Szafran (217) has 1534, but the tax register he refers to only mentions a '*minera ferri*' (ASK I 11, f. 418r.), which is insufficient to definitely refer this mention to a specific site/facility.

²⁰⁷ Szafran, p. 126.

²⁰⁸ Ibidem, p. 179.

²⁰⁹ Evidenced as a separate village ever since 1580; before then, probably, the łans in Buczek Wielki. Teki Dworzaczka, Regesty, 2619 (no. 215) 1580; Szafran, p. 120.

²¹⁰ Teki Dworzaczka, Regesty, 2665 (no. 215) 1582.

²¹¹ Ibidem, 2678 (no. 215) 1582.

²¹² Szafran, p. 192.

Name of locality	First attested
Sokolna*	1596 ²¹³
Osowo (Ostrogóra)	1597 ²¹⁴
Paruszka	1598 ²¹⁵

Legend: * (Probably) re-founded/re-chartered.

Not all of those were villages founded *in cruda radice*. The references about them, as per *Teki Dworzaczka*, date to before the middle of the sixteenth century. 1544, Dzierżążno was mentioned as a void area;²¹⁶ Skarpa was reported as such in 1541 (an arable and cultivated noble-owned partition was still there by the end of the first half of the sixteenth century),²¹⁷ and Sokolna in 1545.²¹⁸ Jełowa was still settled in 1470.²¹⁹ As for Górzno, noted as of 1564 as newly founded, its deserting lasted at least twenty-five years, though it was still colonised in 1508²²⁰, between 1532²²¹ and 1557 it was referred to as a deserted place.²²² Radawnica is noted as a village in a 1440 document.²²³ This proves that, in some cases, we have to do with discontinued settlement and re-management of the area.

The new localities were primarily set up on the banks of rivers or lakes; such locations certainly ensured the basis of existence and communication between settlements. One of the characteristic traits of the new colonisation in the areas of both voivodeships behind the Noteć River, especially in the wilderness or forest areas of the *Starosta* districts of Wałcz and Ujście and in the vicinity of Wieleń, was the emergence of settlement aggregations around industrial facilities such as, mainly, watermills, ore mills or sawmills. With the increasing numbers of residents at such places, separate villages were formed around them. This process continued after 1600. The industrial facilities and structures mentioned in the records were oftentimes located at a significant distance from the villages to which they had initially belonged. Both these observed features taken into account, some of the said facilities have been marked as separate settlements.

Tough natural conditions and the rivalry in the frontier areas made the setting up of villages in that territory not an easy task. It should be presumed that the above-enumerated dates of first mention of a village, or source-based information on the privileges granted to their lodgers or administrators (*sołtysy*) point to the essential difficulties encountered in the course of the colonisation. This is the reason why we have often been unable to precisely reconstruct it, particularly in the northernmost areas of Poznań Voivodeship's part located behind the Noteć.

Another characteristic trait, which was particularly evident for the villages emerging in the *Starosta's* district of Wałcz, was giving the village a name that, although stated in the founding charter, would not survive in common use among the locals, with the later records produced by the state administration, most frequently reflecting such alteration.²²⁴ This probably ensued from populating the villages

²¹³ Teki Dworzaczka, Regesty, 2611 (no. 162) 1596.

²¹⁴ Szafran, p. 178.

²¹⁵ Teki Dworzaczka, Regesty, 2786 (no. 163) 1598; also, see p. 86.

²¹⁶ Ibidem, 2563 (no. 1395) 1544.

²¹⁷ Ibidem, 602 (no. 144) 1468, 4999 (no. 335a) 1541; Szafran, p. 191.

²¹⁸ Teki Dworzaczka, Regesty, 1995 (no. 213) 1545; Szafran, p. 194.

²¹⁹ Teki Dworzaczka, Regesty, 57 (no. 1382) 1470.

²²⁰ Ibidem, 459 (no. 146) 1508.

²²¹ Ibidem, 1736 (no. 213) 1532.

²²² The 1564 visitation record points to Piotr Czarnkowski as the founder of Górzno, but the data in Teki Dworzaczka, Regesty basically deny this statement. Until mid-sixteenth century, the locality was owned by the Kościelecki family, later also by the Grudziński family. The said information on Piotr Czarnkowski is probably related with the fact that he was married to Regina Kościelecka, who received Górzno (among other items) and then assigned thereupon an amount of money for her husband; Teki Dworzaczka, Regesty, 872 (no. 1394) 1540, 1920 (no. 213) 1541.

²²³ KDW X, 1531. Szafran (p. 184) also has 1432 (after Hładyłowicz, *Zmiany krajobrazu*).

²²⁴ Such dependence has been noticed for Sypniewo (Nałęcz), Brzeźnica (Łódzia), and Dudylan (Róża). It also seems that the name Szwecja [the Polish for 'Sweden'] given to the village was used by its dwellers not as frequently as the German name Freudenfier. Jastrowie also had its German name (Weinkrug, Witunk); K. Górską-Gołąska, *Jastrowie*, p. 56. The earlier-mentioned Jastrzębiec village (1579/1586) might have also been named otherwise; as a result, we have been unable to assign it to any specific locality.

with German-speaking people, or from the villages being founded on areas that had been inhabited earlier.²²⁵ Characteristic of the new colonisation was its Protestant character: the colonisers organised their own religious life by building their community churches (*zbórs*), their villages functioned outside the Catholic Church structures.²²⁶

In the latter half of the sixteenth century, at least 107 new settlement units, of which 51 emerged in the royal estates (14 in *Starosta's* districts of Drahim, 14 – Wałcz, and 23 – Ujście) and 56 in nobility estates (at least 10 in Wałcz district, 23 – in Nakło district, and 23 – in the part of Poznań district beyond the Noteć).

South of the Noteć, the setting up of new settlements occurred rarely:²²⁷ it was an area of the older and much denser settlement. In Poznań Voivodeship, nine newly set-up localities have been identified, almost all of which were situated in its southern part, in the borderland of Kościan district and Wschowa land (with the Duchy of Głogów). However, the earliest locations south of the Noteć occurred not far from Połajewo, near which Krośninko was set up before 1555;²²⁸ before 1561, the village of Ciężym was established between Połajewo and Czarnków (both locations within Poznań district).²²⁹ In Kościan district, the villages of Szreniawa (1570, within the estate of the Cistercian abbey of Przemęt),²³⁰ Szlemsdorf (before 1580),²³¹ Ostoje (1585),²³² and Zaorle (1593) came into existence.²³³ Within the limits of Wschowa land, three new villages: Buchwald (between 1527 and 1563), Potrzebowo, and Śmieszkowo were set up.²³⁴ In the Przemęt monastery estate, the villages of Ciosaniec and Łupice (Kościan district) were re-founded.²³⁵ The same is true also for Gaj near Śrem²³⁶ and Kokoszki (before 1563; both in Kościan district).²³⁷ The analogous cases in Kalisz Voivodeship were: Wałownica, at the border of the districts of Kcynia and Inowrocław (as of 1539, the name was used for the thicket on the Noteć; a mention of the namesake village is from 1558²³⁸); Toporowo, Kalisz district (first mentioned 1576);²³⁹ Macieje, Pyzdry district (1586);²⁴⁰ Biadki (Biejatki), Pyzdry district (1550s).²⁴¹ In Konin district, the town named Krystynowo, north of Kazimierz Biskupi, was established at the end of the sixteenth century (see, hereinafter, J. Suproniuk, *Character and size of settlements. Cities and towns in Greater Poland in the second half of the sixteenth century*, III.3.2b.4).

²²⁵ A. Wielopolski, *Polsko-pomorskie spory*, p. 81, observes that the settlements of Nadorycz, Sypniewo, and Brzeźnica were mentioned on the occasion of the mid-sixteenth-century border recesses between Poland and Pomerania. Bąk, Wałcz, p. 68, is of opinion that those settlements might have actually been inns by the fords along Margrabska Droga. Z. Boras remarks, in turn, that Nadorycz and Dudylany were mentioned in records of Pomeranian origin from the 1570s (see notes 110 and 112). Even at the end of the sixteenth century, Pomeranians complained that the subjects from Jastrowe, Sypniewo, and Nadorycz failed to pay their fees to the office of the *starosta* of Szczecinek; Z. Boras, *Stosunki polsko-pomorskie*, p. 206.

²²⁶ Mietz, pp. 63–67.

²²⁷ Our check of the lists of localities comprised in Hładyłowicz, *Zmiany krajobrazu*, pp. 109–250, has demonstrated, for several districts, that most of the localities he refers to, apparently founded between 1523 and 1600, can actually be attested for an earlier period.

²²⁸ K. Górka-Gołaska, *Krośnino*, [in:] SHGPoz, part II, p. 468.

²²⁹ First attested 1561, in the course of a property transaction (Teki Dworzaczka, *Regesty*, 9148 (no. 1397) 1561); described as ‘*noviter locata*’ in the Poznań district 1563 tax register (RPWP, pzn, 1563, no. 12).

²³⁰ T. Jurek, *Szreniawa*, [in:] SHGPoz, part IV, p. 853.

²³¹ Idem, *Szlemsdorf*, [in:] ibidem, p. 846.

²³² I. Skierska, *Ostoje*, [in:] SHGPoz, part III, p. 486.

²³³ Eadem, *Połuszyny*, [in:] ibidem, 731. The villages of Szlemsdorf, Ostoje, and Zaorle emerged right by the border with the Duchy of Głogów. The latter two were located in the area where several other localities appeared at the beginning of the seventeenth century – namely, Cegielnia (1611), Izbice (1620), Sworowo (1620), Ugoda (1620), and Łąka (1631).

²³⁴ T. Jurek, *Śmieszkowo*, [in:] SHGPoz, part V, pp. 7–8; A. Borek, *Ziemia wschowska w drugiej połowie XVI w.*, [in:] RPWP, § 5.1.

²³⁵ Both villages are named in the earliest bestowal for the cloister in Wieleń (which later on moved to Przemęt). In the first half of the sixteenth century, Ciosaniec was described as a deserted village (S. Chmielewski, *Ciosaniec*, [in:] SHGPoz, part I, p. 262); Łupice was last mentioned in mid-fifteenth century (I. Skierska, *Łupice*, [in:] SHGPoz, part III, p. 67). The Kościan district 1563 tax register, the phrase ‘*novo adscripta*’ is added to the names of both villages (RPWP, ksc, 1563, no. 463, 468).

²⁴¹ RPWK, kls, 1563, 19: “Bieiatki [has been] settled for a few years”.

According to Adolf Pawiński, Voivodeship of Poznań included in the last quarter of the sixteenth century a total of 62 towns (and cities) and 1,313 villages, while Kalisz Voivodeship had 88 towns and 1,869 villages,²⁴² altogether, 3,332 localities for both voivodeships. In the work on the present AHP volume, the use of other sources apart from tax registers, particularly *Teki Dworzaczka*, has enabled us to recognise, for the second half of the sixteenth century, a total of 3,784 settlement points, thereof: 160 towns/cities (67 and 93 in Poznań and Kalisz Voivodeship, respectively); 3,394 rural settlements (1353 and 2041, resp.); 71 demesne farmsteads (24, 48); 126 mill settlements (67, 59); 22 ironworks settlements (13, 9); two autonomous castles (Drahim, Koło); two autonomous abbeys (Łąd, Paradyż); three tar settlements (in Nakło district); two inn settlements (Górki, Belzant); and, one glassworks (Huta Pokrzywnicka). Compared to Pawiński's findings, the figure is higher by 13%. The definitely biggest difference appears for Wałcz district (an 81.3% increase), which is due to new foundations of the late sixteenth century having been taken into account. The high increase in the number of localities was the case also for the districts of Kcynia (24.9%), Nakło (21.9%), and Gniezno (20.8%). The differences are lower for the other districts – namely, those of Konin (14.3%), Poznań (12%), Kalisz (13%), and, in particular, Pызdry (5.1%), Kościan (5%), and Wschowa land (2.3%).

The number of settlements for the period concerned has also been calculated by Konstanty Hładyłowicz. Of the two voivodeships, he however ignored Konin and Wałcz districts. His calculations for the end of the sixteenth century were based on tax registers (following Pawiński) and court registers (following Stanisław Kozierowski, the credibility of whose information is limited), and probably took into account the desolated settlements.²⁴³ It is, therefore, not fully justifiable to have these data compared. In general, however, for the eight districts of the Voivodeships of Kalisz and Poznań, Hładyłowicz obtained 3,332 settlements; for the same territory, as part of our work on the settlement in both voivodeships, we have found 3,358 of them – this making a slight, 0.7% difference between the figure proposed herein and the one given by Hładyłowicz. Moreover, the outcomes vary by district: Gniezno – 0.4% less settlements; Kcynia – 7.9% more; Kalisz – 8% more; Kościan – 5.7% less; Nakło – 2.8% more; Pызdry – 3.1% less; Poznań – 3% more; and, Wschowa land – 4.3% less.

Table 8. Density of settlement in Greater Poland, second half of the sixteenth century

District	Area, km ²	Total number of localities	Number of localities per 100 km ²
Nakło	3,229	223	6,9
Kcynia	2,384	286	12,0
Gniezno	3,058	516	16,9
Pызdry	2,880	433	15,0
Konin	2,312	336	14,5
Kalisz	3,264	461	14,1
Kalisz Voivodeship	17,127	2,255	13,2
Wałcz	1,945	87	4,5
Poznań	8,979	770	8,6
Kościan	5,175	628	12,1
Wschowa land	554	44	7,9
Poznań Voivodeship	16,653	1,529	9,2
Total for Kalisz and Poznań Voivodeships	33,780	3,784	11,2

Table 8 specifies the density of settlement in the territory of Greater Poland, the division into districts and voivodeships being observed. Let us remark that these data are approximate. The calculation approached big cities on equal terms with mill settlements. The average density of settlement was higher in Voivodeship of Kalisz than in that of Poznań, due to low-populated western extents spread in the latter. The average number of localities in both voivodeships proves to be the lowest among the territories hitherto covered in this series. The figure is depressed by Poznań Voivodeship, for Kalisz Voivodeship had itself a denser settlement network compared to Voivodeships of Sieradz (12.1 localities per 100 km²), Sandomierz (11.9), or Cracow (12.9).²⁴⁴

III.3.1.5 SIERADZ AND ŁĘCZYCA VOIVODESHIPS

Krzysztof Chłapowski

When working on detailed maps of Poland in the sixteenth century we have assumed a base rule of presenting the complete settlement network from the second half of this century. The methods used have been fully presented in published volumes of the series, in the commentary chapters devoted to site location. The following text repeats them for the sake of convenience of the readers.¹

Tax registers – the main source basis for the settlement state of our interest – do not include a complete list of sites existing at the time when they were written. Most importantly, the settlements freed from taxation, i.e. demesnes, town villages (they paid taxes together with the town), newly founded hamlets or hamlets being rebuild after natural catastrophes (fire, flood) and for that reason temporarily relieved from taxation, were not noted in the registers.² Also, the registers did not avoid inaccuracies, occasional omissions or abuses. The latter were more often related to undervaluation of the tax base than to exclusion of entire settlements. A small, concealed hamlet could have escaped the collector's attention, and several farmsteads in reality constituting a separate village could have been treated formally as a part of a bigger settlement belonging to the same owner.

In order to fill in the missing data from the tax registers from the second half of the sixteenth century, we have reached for other sources, even earlier or later ones.³ It was necessary, especially given that the relative abundance of the registers from Łęczyca Voivodeship was accompanied by gaps in the registers for Sieradz Voivodeship and Wieluń land. Moreover, in contrast to the works on the previous maps from this series, we lacked Church visitations from the end of the sixteenth century. Our earliest visitations came from the first half of the seventeenth century and they applied only to a fragment of the area of our interest. With help of earlier and later sources we completed the list with those settlements that were mentioned in the first half of the sixteenth century and in the seventeenth century, and so they must have existed in the period presented on our map.⁴

Two categories of settlement mentioned in the sources from the first half of the sixteenth century have been omitted: firstly – settlements that do not appear later, secondly – those mentioned for the next time in the nineteenth century. However, we have included those settlements from the second category, that were free from taxation due to their character (demesnes, town villages) and also mills that were included in the registers as belonging to a village and not having a name of their own, and yet the sources from the end of the eighteenth century and from the nineteenth century allowed us to consider them separated mill villages.⁵ Settlements appearing only at the beginning of the sixteenth century were often described (especially in Łaski's *Liber beneficiorum*) as 'haereditas deserta', and

¹ H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7; K. Pacuski, *Location of settlements*, [in:] AHP Sandomierz, in this edition III.3.1.2.

² List and characteristics of registers see K. Chłapowski, *Źródła pisane*, [in:] AHP Sieradz.

³ See *ibidem*.

⁴ The highest number of such settlements occurred in Ostrzeszów and Sieradz districts, because the registers from these districts were not numerous, and – above all – contained many omissions and gaps.

⁵ For instance, Dzieściarty demesne in Rozprza parish, town villages Zapusty near Sieradz, Dobra mill in Dobryszyce parish belonging to the provost, that was listed in the 1779 visitation with a remark: 'now called Karkoszki' (J. Warężak's materials in IH PAN in Warsaw).

that allows us assume that they either never repopulated,⁶ or, if their existence is documented in the sources no sooner than in the eighteenth century or later, the repopulation occurred after a long interval, so in the second half of the sixteenth century these settlements did not exist.⁷ Settlements known from visitations from the first half of the seventeenth century and not earlier were not marked on the map, even if we suspected that some of them could have been created before 1600.⁸

The map presents only independent settlements having their own name, which constitute one or more clusters of dwelling and farm buildings, whose dwellers worked on a specified area, more or less separated from the areas surrounding the neighbouring villages.⁹ New settlements were rarely created in densely populated, especially less wooded areas of old settlement with stable ownership relations. Whereas in bigger forest territories the settlement was more intense. In Sieradz and Łęczyca Voivodeships there existed two large forest areas in the sixteenth century: one covering the borderland between the districts of Sieradz, Wieluń and Ostrzeszów, mostly royal property, and the other one in the borderland between the districts of Brzeziny, Szadek and Piotrków, property of the Cracow chapter and Włocławek bishopric. Many new settlements were created in both these territories in the course of the sixteenth century.¹⁰ In the remaining regions of the voivodeships of our interest, location of new villages was exceptional.

The range of independence of particular settlements was fluid at times, especially in the case of demesnes and mills. Usually they carried the name of the village near which they were situated, even though they could be a few kilometres from the buildings. Some of those small settlement points, farther or more economically separated (e.g. demesnes constituting a part of a larger estate, cultivated by peasants from several villages), were given their own name and treated as a separate village. The sources do not always specify whether such a place should be treated as a demesne or as a village. It must also be noted that mills or inns in a village, that were not independent settlement points, could have individual names, often derived from a name (a nickname) of the miller, or referring to services offered in the inn, or the consequences of these services.

In the area of the two voivodeships described in this volume there existed settlements of farm gentry, consisting of several small hamlets functioning under one name, but each was given a second part of the name, in order to distinguish them. This was sometimes a cause of difficulties, whether such hamlets were separate villages or just parts of one village. We have rather assumed the first possibility, for fear of omitting an existing settlement. Together, we have found 28 clusters of at least three villages sharing a common first part of the name in Łęczyca Voivodeship in the sixteenth century (21 in Łęczyca district and seven in Orłów district), and nine such clusters in Sieradz Voivodeship. The largest clusters sharing a common name are: Idzikowice and Bielice in Łęczyca district, Gumino in Orłów district and Pęgowo and Szadków district (each with seven hamlets). When the sources showed that in the sixteenth century there were two or three hamlets lying close to each other and having the same name but without the second part of the name – distinguished only in the seventeenth century, or not at all – we marked them as one point on the map, and in the index we used the symbol consisting of the multiplication sign and the number of the hamlets, e.g. Topola × 3 or Nieradza × 3.¹¹

⁶ The majority of such villages appear in Łęczyca district, as it was an area with a large number of farm gentry settlements, that was unable to rebuild a destroyed village, and rather moved to another place.

⁷ For example Dudy mentioned by Łaski (Łaski LB, II, p. 361) as 'haereditas deserta' and later appearing only in the nineteenth century as Dudły.

⁸ E.g. in the visitation of the rent of Klonów from 1616 there are two villages: Lipica and Leliwa, without any trace suggesting a new location (LWWK 1616, part 1, p. 140), but not attested in any earlier source known to us. Perhaps they were located before 1600.

⁹ More: H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7.

¹⁰ In the second mentioned territory the Cracow chapter located 11 new hamlets in the sixteenth century (Karpino, that is Zarzeczce in Brzeziny district, Małówka, Wola Latałska that is Latalice, Wola Sulątorska, Wola Zamojska that is Zamoście in Szadek district, Brojce, Kochanie, Giezmów that is Stróża, Huta, Leszczyny, Łaziska in Piotrków district), and Włocławek bishop – five (Chrosty, Mierzączka that is Wólka, Rozrażew in Brzeziny district, Podstoła, Radociny in Piotrków district).

¹¹ One Topola in three parts appears in tax registers, but we concluded, that the real state of affairs was described in a remark in the 1564/65 visitation: 'there are three villages called Topola, one royal leased by the burghers from Łęczyca, and two belonging to the gentry' (LWWK 1564, part 2, p. 137). In the end, the formation of three villages, each having a second part of the name, occurred in the nineteenth century; in Łaski's Liber and in the 1636 inspection there is an epithet: 'Nieradza triplex' (Łaski LB, I, pp. 410–411; ADWł, AAG 5, f. 214), and the hearth tax register from 1662 lists: Nieradza Wysoka, Nieradza Niska, Nieradza Piaski (ASK I 74, ff. 277v–278).

Żakowice in Łęczyca district will serve us as an example of how we resolved difficulties arising from names of various settlements noted in the sources, that could relate either to separate villages or only to parts of those villages. In the tax registers from the sixteenth and seventeenth century Żakowice appears in several different configurations: Żakowice Wielkie, Żakowice Małe, Puśniki, Jeże, Gose. This could mean two or three villages belonging to farm and partial gentry. Three villages appear in Łaski's Liber beneficiorum and in Czaykowski's Regestr, however, only two villages were presented on detailed maps from the first half of the nineteenth century: Żakowice and Puśniki that exist to this day. Careful analysis of the source data has led us to the following conclusions: Żakowice Wielkie is the present day Żakowice. Żakowice Małe – i.e. Puśniki (clearly stated in 1543 register) – was created when two villages listed by Łaski were merged; in the 1564 and 1576 registers these are Żakowice–Puśniki–Jeże. The 1563 register probably connects the name Gose with the Żakowice, which bears the name Puśniki in other registers, but we cannot reject the possible connection of this name with Żakowice Wielkie, that was not specifically mentioned here.¹² Undoubtedly, however, Gose should be treated as a part of one of these two villages, not as a third separate village, as suggested in Czaykowski's Register and Perthées' map (it places Gossy west of Żakowice–Puśniki road, which is unacceptable because of the border of arable lands of these villages running along the river on the side of Wojciechowice Małe).

Another example is the possibility of identifying Nieradów, that appears only in Łaski's Liber Beneficiorum, with Bujnice Małe village, also mentioned in this source.¹³ The basis for the identification was found in the passages concerning the tithe.

In cases in which we had no certainty, whether a village belonging to two different representatives of great landowners (or when only one of those owners belonged to this category) constituted one settlement or two with the same name, we obeyed the following rule: if there is no direct evidence, proving that in the second half of the sixteenth century we are dealing with two villages, differentiated by the second element of the name (often an adjective indicating the ownership), then we treat a village belonging to two owners as one settlement.¹⁴

In Sandomierz Voivodeship suburban villages with their own name and a clear territorial separation were relatively common, but in Łęczyca and Sieradz Voivodeships we found only three villages of this sort: Zamońnice – Inowłódz suburbs, lying on the opposite bank of the River Pilica, Żychelska Wieś – Żychlin suburbs and Plebańska Wieś – Szadek suburbs.¹⁵

As in the previous studies in this series, mills and ironworks situated outside villages were treated as separate settlement units, if they had their own name and an established settlement distinction that would allow for precise localization of these settlements.¹⁶

One inn with a specific name was marked as a separate settlement unit on the map. It was Żeglin inn in Sieradz parish, that in the nineteenth century was still considered a separate village, and was marked as such on the Topographical Map of the Kingdom of Poland and on Chrzanowski's map.¹⁷

¹² See the data from the 1576 register, where Jan Żakowski Gosz appears among the owners of plots in both Żakowice (P. Wielkopolska, vol. II, pp. 85, 139).

¹³ Łaski LB, II, 216 (Nieradów), I, 555 (Bujnice Małe).

¹⁴ Swędowo (now Swędów and Swędów Szlachecki) in Brzeziny district and Unków (now Uników and Uników Kapitulny) in Sieradz district, Lutosławice (now Lutosławice Rządowe and Lutosławice Szlacheckie), Wodzin Wielki (now Wodzin Majoracki and Wodzin Prywatny) in Piotrków district, Kruplin (now Kruplin Poduchowny and Kruplin Radomszczański) in Radomsko district, Biała (now Biała and Biała Rządowa) in Wieluń district – all these could be listed here. It also happens, that today two villages with names that differ in the adjective proving, that these villages constituted one village in the past, in which the part belonging to the parson in time developed into a separate hamlet; in the sixteenth century this part was too small to qualify a given village among the villages belonging to churchmen and to the nobility, or to churchmen and to the king, e.g. Dylów (now Dylów Szlachecki and Dylów Rządowy), Męka (now Męka and Męka Księża), Unienie (now Umień and Umień Poduchowny).

¹⁵ Zamońnice are mentioned in Łaski's Liber (II, p. 315) and in the 1609 visitation (SGKP, vol. 3, p. 292); Żychelska Wieś and Plebańska Wieś appear in tax registers.

¹⁶ We have localized over 50 mills with their own name and eight ironworks, see K. Chłapowski, *Character and size of settlements*, [in:] AHP Sieradz, in this edition III.3.2.5.

¹⁷ As an inn by the royal village Bogumiłowo it is mentioned in Łaski's Liber and in the visitations from 1564/5, 1569, 1616, 1628–32, and 1661 (Łaski LB, I, p. 431; LWWK 1564, vol. II, p. 27; ASK XLVI, 103 d, f. 125; LWWK 1616, p. 95; LWWK 1628, vol. II, p. 155; LWWK 1659, vol. II, p. 88); Table 1827 mentions a hamlet Żeglnia, with one house and five inhabitants.

The tax registers of Piotrków district from 1535, 1553 and 1577 mention the name of Przeora in Milejów parish (1535 and 1577 after Milejów, 1553 at the end of the parish), and by it respectively ½, 1 and 1½ of lan.¹⁸ In the 1553 register, which contains ownership specification, Przeora is listed without an owner ('Przicora' mill appears in 1511 and 1518 registers).¹⁹ As this name is absent from any other source, earlier or later (also from nineteenth and twentieth century maps) we have assumed that – despite appearances – it was not a separate settlement unit, but a part of Milejów village, a property of the abbot of Sulejów, separated for the benefit of the prior of the monastery.

The diversity of sources allowed us to grasp 12 demesne villages having their own name, unrelated to a village.²⁰ It seems unlikely that this number could be increased by using other sources, as in centuries after the sixteenth, separate demesne settlements were rare. Perhaps some settlements, presented on our map as villages, were or became demesne villages without serfs or peasants in the second half of the sixteenth century. In the sources the term 'praedium' was sometimes used to denote gentry villages, inhabited not only by the owner's family and servants, but also by a few peasants. According to the general rule, our map does not include demesnes known only from the sources created later than sixteenth century.

Demesnes lying outside villages, corn mills, ironworks and one inn together constitute 77 small hamlets, collectively called mill and demesne settlements (see Table 5 in the chapter III.3.3.5).

The term 'settlement localization' defines two actions. Firstly it means identification of a sixteenth century settlement with a settlement known from later, more detailed cartographical records, or from lists of settlements from the end of the eighteenth century, 1827 Table or the Geographical Dictionary of the Kingdom of Poland. Secondly, it denotes the localization of a given settlement on the prepared map. At times we had to take into consideration studies whose authors used sources that no longer exist or are difficult to obtain, scattered or not catalogued.²¹ Sometimes a hamlet not listed in eighteenth and nineteenth century sources, but known to us, could be localized thanks to lists of *Urzędowe nazwy miejscowości i obiektów fizjograficznych* ('Official names of settlements and physiographical objects') – the series published in the 1970s which was meant to cover the entire country. It comprises a rich, though unequal in value, list of site names gathered in the field mostly in the 1970s. The abundance of names for some areas does not match information from eighteenth and nineteenth centuries, usually, however, it is greater. Unfortunately, the volumes on some of areas of our interest have not been published – the following former districts are lacking: Kutno district, Łask district, Łódź district, Pajęczno district and Rawa district, from the Voivodeships of Łódź and Ostrzeszów, and from Turek district in Poznań Voivodeship.

The settlements were located on the basis of a 1:100,000 map from the twentieth century, but in accordance with their location shown on oldest detailed maps from the end of the seventeenth century and the first third of the nineteenth century. In most cases the location differs from the present one, due to numerous shifts caused by division and consolidation of arable land (usually related to land appropriation), the rebuilding of roads, river regulation, urbanization-related changes; an example of the latter could be the emergence of industrial settlements in the nineteenth century in Łódź district, including newly-located towns (Aleksandrów Łódzki, Konstantynów Łódzki, Tomaszów Mazowiecki) and rapid transformation of old, small hamlets into industrial cities (Łódź, Ozorków, Zduńska Wola). Lately, the open-pit coal mine in Bełchatów has caused significant changes in the area. The WIG maps ('Wojskowy Instytut Geograficzny', i. e. 'Military Institute of Geography') from the interwar period, preceding the after-war shifts in the settlement, and – treated as a base material – detailed maps from

¹⁸ ASK I, 24, f. 481; P. Wielkopolska, vol. II, p. 252; ASK I, 25, f. 255.

¹⁹ P. Wielkopolska, vol. II, p. 196.

²⁰ Demesnes are listed in: K. Chłapowski, *Character and size of settlements*, [in:] AHP Sieradz, in this edition III.3.2.5.

²¹ These were, for example, studies on the area of Łódź, which helped us identify and localize the following mills: Chrapek, Kulan, Lamus (A. Zand, *Łódź rolnicza 1332–1793*, „Rocznik Łódzki”, vol. 2, 1930, pp. 53 f.; H.S. Dinter, *Dzieje wielkiej kariery 1332–1860*, Łódź 1965, pp. 30 f.). *Łódź. Dzieje miasta*, ed. R. Rosin, vol. 1, Warsaw 1980, and Rosin, *Słownik* were important for us, whereas the materials for the dictionary of Łęczyca and Sieradz land prepared by the Zajęczkowsky turned out not so useful, due to the chronological scope of these materials. Similar was the case of the maps of the settlement in these voivodeships in the sixteenth century prepared by these authors, which were added to S. M. Zajęczkowski, *Studia nad osadnictwem dawnych ziem łęczyckiej i sieradzkiej w XII–XVI w. Uwagi i spostrzeżenia*, „Studia z dziejów osadnictwa”, vol. 4, 1966.

the end of the eighteenth and the beginning of the nineteenth century created before the changes related to the industrialization of Łódź area made the reconstruction of the state of old settlement easier.

The localization of the vast majority of settlements on our map is certain, which could be defined as certain identification with a settlement registered on the oldest maps from the turn of the eighteenth and nineteenth centuries. The localization of settlements on these maps is usually close to the state from the second half of the sixteenth century, and in case the monuments (church, manor, castle) or the old urban structure survived we have certainty that it corresponds to the state from the sixteenth century or even earlier.

Gilly-Cron and Topographical Map of the Kingdom of Poland formed the base for certain localizations. The number of marked settlement points is remarkably high for both these maps, as is the precision with which the settlements were named.²² W. Chrzanowski's map was also helpful. It was created on a lower scale, but was based on various precise maps. Perthées's map could not be taken as a basis for certain localization due to serious deformations of the position of settlement points. However, the information about site names obtained from these two maps, and the materials related to their creation have provided us with the possibility of solving some difficult identification cases.

The location of Dobiesławice in Orłów district, a village that disappeared in the nineteenth century, was considered certain. It was marked on Perthées and Chrzanowski's map. Gilly-Cron's map and the Topographical Map show a crossroads and a small, not described, settlement point. It is an example of a relatively certain localization, with a rate of probability higher than estimated localization (Dobiesławice is listed as a lost place in the index). Bielawki village in Leźnica Wielka parish, in Łęczyca district were roughly localized on the basis of source information from the fifteenth century concerning its neighbouring villages. On the same grounds the estimated localization of Przykuty village in Żychlin parish in Orłowo district was related to the village of Rakowiec. Records from the fifteenth century, in which village names Głowaczewice and Stypuły (Marzenin parish, Szadek district) were used interchangeably to denote one village. This information allowed us to link the location of Głowaczewice with Stypuły, a village mentioned that is parallel to it in the sixteenth century and exists to this day.²³

It is known, that between the end of the sixteenth century and the end of the eighteenth century there were instances of a shift in location of some settlements, caused by floods that led to changes in the course of rivers, fires, local shifts of roads and town location on old village sites. Such changes have not been closely recognized and could not be taken into account in the localization of settlements. It could be assumed, however, that these changes were small, and of no importance to our map.

Only a few settlements are of estimated localization. Here we have used two methods of conduct. A hamlet lying close to a settlement of certain localization was marked with a circle connected with the mark of the other settlement; in the legend such villages were described as 'villages of linked localization', and the name of the estimated localization settlement was not put on the map, it appears only in the index.²⁴ Other sites of estimated localization were marked with separate circles, drawn with a discontinuous line, and given separate names. A settlement marked in such a way lay, according to what we have found, probably in the area occupied today by a settlement that was created later, or in its vicinity, but we are unable to define its exact location.

Thus, as estimated localization we understand two different kinds of uncertain location: estimated localization *sensu stricto* and uncertain localization. The first was used when we were able to localize a village only in approximation, i.e. with a margin of error higher than 1 km (4 mm on the map). These were the instances when we failed to find any trace of a village on detailed and precise maps,

²² Thanks to these maps we were able to localize in certain manner around 45 settlements that no longer exist, and that did not merge with settlements existing to this day. The highest number of such settlements occurred in the following districts: Sieradz 10, Łęczyca 9, Orłów 8, Szadek 7. Among them there is a village Śleszyno-Sołek, which deserves a separate mention, as it was a parish seat. According to Łaski's description the parochial church was situated outside Śleszyno Wielkie and Śleszyno Małe 'in loco, qui dicitur Sołek' (Łaski LB, II, pp. 497 f.). In 1885 when the church fell into ruin, a new one was built in Śleszyno Wielkie and the original name of the parish was changed (SGKP, vol. 11, p. 57).

²³ Source information from the fifteenth century concerning Bielawka, Przykuty and Głowaczewice were provided by our adviser, prof. Jan Szymczak, as data established with dr. Tadeusz Nowak and dr. Alicja Szymczakowa.

²⁴ Roughly half of around 35 linked localizations appears in Łęczyca district, as the settlement in this district in sixteenth century was characterized by a significant number of small hamlets that disappear later on. Using property information we were able to link them with settlements of certain localization.

so we based its localization on less precise information. In most cases these were suggestions about a common owner (records of poll tax register from the seventeenth century, such as: ‘attinencja’, ‘solvit cum’ or similar records from the eighteenth century), as well as names of fields in still existing villages or names of parts of such villages memorized in *Urzędowe nazwy miejscowości i obiektów fizjograficznych*. Hypothetical identification of a sixteenth century hamlet with a later settlement applies mostly to situations, when the similarity of names or the order in which they appear in sources would suggest that this could be one settlement, but there was no information that would allow a certain identification.

We refrained from estimated localization when information about the location of a settlement we had was too general, e.g. concerning only parochial affiliation. We considered such hamlets unlocalized. That is why the name of such a settlement appears only in the index of settlements and in Table 1. Detailed research on the settlement in smaller regions, using source records unknown to us could secure some estimated localization in the future, or decrease the number of unlocalized settlements.

We were unable to localize, even in an estimated manner, 17 sixteenth century settlements (Table 1). As there are 2,468 settlements in Łęczyca and Sieradz Voivodeship, the unlocalized constitute 0.7%, significantly more than in Sandomierz Voivodeship (0.3%) and fewer than in Mazovia (1.3%).²⁵ The obstacle that would prevent even an estimated localization most often lay – in the case of Sieradz Voivodeship – in the sparsity of detailed information in tax registers. Unlocalized settlements in Łęczyca Voivodeship were mostly small hamlets, whose inhabitants, as it was mentioned before, moved elsewhere after a catastrophe or crop failure. It must be emphasized that the name of Golebki in Chorzęcin parish appears without a payment in the 1576 tax register of Piotrków Voivodeship. This is the only appearance of this name known to us, and we considered it a mistake of the person writing the register and therefore we have not included Golebki in the index table of unlocalized settlements.

In the list of the number of towns and villages in voivodeships and districts of the Greater Poland province, presented in the introduction to his publication, Adolf Pawiński claimed that, according to the data from the registers, there were 67 towns and 1,985 villages, i.e. 2,052 settlements, in Sieradz and Łęczyca Voivodeships in the second half of the sixteenth century.²⁶ The number of villages in Sieradz district presented in Pawiński’s table – 197 raised reservations, we have calculated it once more and found a compository mistake in the above-mentioned table: 197 instead of 297, so the collective number of settlements should be 2,152.

Even though we did not have visitations from the end of the sixteenth century, and the surviving registers of Sieradz Voivodeship are few, our research allowed us to verify the number given by Pawiński (Table 2). It was possible thanks to other sources, described above²⁷, and partly resulted from treating mills with a separate name, that could be localized, as separate settlements. It was not, however, strongly influenced by colonial efforts from the end of the sixteenth century. In general the increase in the number of settlements in relation to Pawiński’s data equalled 15.7%. Therefore, it was higher than the result for Mazovia (9.8%) and Sandomierz Voivodeship (13.8%).²⁸ In Łęczyca Voivodeship the increase equalled 6.9%, in Sieradz land 21.4% and 15.9% in Wieluń land. This was partly due to the fact, that the registers from Łęczyca Voivodeship and Wieluń district published by Pawiński as were more complete and richer in information than the registers from Sieradz land and Ostrzeszów district. The lowest increase was observed in districts: Brzeziny (3%), Wieluń (5.3%) and Łęczyca (7.3%), the highest in Ostrzeszów (55.5%), Piotrków (31.8%) and Szadek (27%) district. The cause of the significant increase of the number of villages in Ostrzeszów district is the result of an exceptional sparsity of the register published by Pawiński and our use of Rosin’s dictionary, based on an extremely broad source basis, which included court books.

The number of settlements of the described territory consists of settlements of various sizes, from mills and small hamlets to larger towns, so the data from table no. 2, presenting information about the density of the settlement, are of approximate value.²⁹ They show that the density of occupation in the

²⁹ Planimetric calculations of parish area, that allowed to estimate the area of districts, were done by K. Chłapowski and M. Wilska.

area of our interest was greater than in Sandomierz Voivodeship (11.9), and lower than in Mazovia (19.9).³⁰ Łęczyca Voivodeship was more densely populated than Sieradz and Wieluń land. This was the result of the specific character of gentry settlement, similar to the Mazovian one, i.e. a large number of small hamlets of serfless gentry, and relatively low forestation. Serfless gentry hamlets could also be found in northern areas of Szadek and Sieradz districts, and as a result, the density of occupation of these districts is a bit higher than in Piotrków and Radomsko districts. Forestation also had some effect – higher in the north and east of the territory described and lower in the north and west, as well as the fact that the areas occupied by large tracts of Church property were characterized by less numerous, yet bigger settlements, contrary to middle and petty nobility settlement areas.

Table 1. Unlocalized settlements

District	Parish	Settlement	Last mentioned
Łęczyca Voivodeship			
Brzeziny	Wolborz	Czerwie	1676
Łęczyca	Krośniewice	Lasocin	1583
Łęczyca	Krośniewice	Pękawki	1590

Sieradz	Błaszki	Kolędzice	1607 ^a
Sieradz	Jeziersko	Wola Bierułtowa	1576
Sieradz	Warta	Kawieczynko	1659–1665 ^b
Sieradz	Widawa	Stara Wola	1576 ^c
Szadek	Strońsko	Trojaki	1565
Szadek	Wygielzów	Starczyny	1564
Wieluń land			
Ostrzeszów	Wieruszów	Białąłka	1563 ^d

a – mentioned by Łaski (Łaski LB, II, p. 58) and in 1511 and 1518 registers (P. Wielkopolska, vol. II, p. 180) and later only in the 1607 visitation (ADWł., AAG 2, f. 299).

b – appeared in 1511 and 1518 registers (P. Wielkopolska, vol. II, p. 182) and in Łaski (Łaski LB, I, pp. 410–411), later related to Warta reeve's district and described 'deserta' (MRPS IV, no. 5231, 17953); in the second half of the sixteenth century and in the beginning of the seventeenth century without this description (MK 114, ff. 33v–34; 134, ff. 297–298; 151, ff. 41v–42v; 152, ff. 228–229v) in the 1636 visitation (ADWł., AAG 5, f. 214) and for the last time in 1659–1665 visitation (LWWK 1659, part 1, p. 100).

c – Wola Pilchowa appears in 1662 in Widawa parish, perhaps it is identical with Stara Wola, also unknown later,

d – unknown from tax registers, in 1563 mentioned as deserted, this name appears also in 1722–1731 (Rosin, Słownik, p. 58). Rosin (Ziemia wieluńska, appendix map) localized it in approximation, but we claim, that the data the quotes in the text (ibidem, p. 186) is not enough to enable even estimated localization.

Translated by Agata Staszewska

III.3.1.6 CUYAVIA AND DOBRZYŃ LAND

Urszula Zachara-Zwiqzek, Tomasz Zwiqzek

When establishing the location of settlements in Cuyavia and Dobrzyń land, we adhered to the same principles as those applied in previous volumes of the AHP series, in particular the rules governing the Greater Poland volume.¹ The main map of settlement in the second half of the sixteenth century shows both settlements which existed throughout the analysed timeframe and settlements abandoned or newly chartered at some point over that period.² The process of identifying settlement location (localising) consisted in comparing the lists of settlements which we drafted based on the written sources covering the period of interest, against available cartographic sources. Three fundamental identification factors guided our reconstruction of the settlement network in Cuyavia and Dobrzyń land: geographical location, name, and spatial distinction.³ Thus, the main map depicts settlement as at the second half of the sixteenth century.⁴

As in previous AHP volumes, locating or localising settlements (understood as the process of identifying and establishing the location of settlements in the strict sense) on the map yielded a precise (univocal), an approximate or a linked location. The List of Settlements hereto also lists settlements of unknown location (see: Table 3). When pinpointing settlements on the reference maps, we looked for the central points of the mapped settlements – churches and manors. If no such point was to be found, we identified the spatial centre of a given settlement and placed the settlement point there. Settlements known to have existed in a given area, *i.e.* which we identified to have neighboured on specific villages, yet which were unidentifiable in old maps were localised in approximation. A linked location means that we linked a settlement with its nearest neighbour, with whom it often shared spatial and economic relations.

The objective of this Commentary is to discuss the most controversial and interesting cases typical of Cuyavia.⁵ In this Commentary, we elaborate on villages, mill settlements and suburbs.

Some settlements came into existence when other localities split or merged. A split brought about the emergence of Przyłubie (Przyłubie Nowe, n) in Inowrocław Voivodeship, a settlement not located by Zenon Guldon.⁶ What we do know is that in 1594 Maciej Przyłubski designated part of Przyłubie (Przyłubie Stare, n) for Dutch-type settlement.⁷ As a result, the village split up into a new and an old part. The former Przyłubie Village was incorporated into Solec Kujawski (Solec, r) in the early twentieth

¹ A comprehensive summary of these rules was provided by A. Borek, M. Słomski, *Location of settlements*, [in:] AHP Greater Poland, in this edition III.3.1.4.

² However, the main map does not show settlements recorded as abandoned throughout the second half of the sixteenth century.

³ Cf. P. Garbacz, A. Ławrynowicz, B. Szady, *Identity Criteria for Localities*, [in:] *Formal Ontology in Information Systems. Proceedings of the 10th International Conference, FOIS 2018*, ed. S. Borgo, P. Hitzler, O. Kutz, Amsterdam 2018, pp. 47–54; G. Myrda, B. Szady, A. Ławrynowicz, *Modeling and Presenting Incomplete and Uncertain Data on Historical Settlement Units*, „Transactions in GIS”, 5 II 2020, <https://doi.org/10.1111/tgis.12609> (access 8.10.2020).

⁴ Still, it ought to be emphasised that the series selected 1600 as the cut-off date for any location-related doubts triggered by changes to settlement character, affiliation or ownership. The main map shows the cumulative number of settlements for the whole second half of the sixteenth century.

⁵ It ought to be underlined that Inowrocław Voivodeship has produced a substantial part of the examples presented below. The multitude of interesting cases stems from the ownership relations characteristic of this area, which enjoyed a relative abundance of royal and ecclesiastical property.

⁶ Guldon, Kujawy, p. 113.

⁷ Z. Guldon, R. Kabaciński, *Przywileje lokacyjne Przyłubia z lat 1359–1594*, [in:] *Dokumenty do dziejów Kujaw i ziemi dobrzyńskiej XIV–XIX w.*, pub. Z. Guldon, R. Kabaciński et al., Warsaw–Poznań 1974, pp. 23–27.

century. To give another example, in Inowrocław district, Piotrkowice (n) absorbed Stankowice between 1573 and 1576. Until 1573, tax registers distinguished between these villages.⁸ Starting from 1576,⁹ the records started using the designation *Piotrkowicze seu Stankowicze*.¹⁰ For that reason, we linked Stankowice with Piotrkowice on the main map. Another example is Beryno, a settlement swallowed by Stary Dwór. The last mention of the autonomous village of Beryno dates to 1527.¹¹ Over time, it was consumed by Stary Dwór demesne, as unequivocally confirmed by the cartularies of Koronowo Monastery.¹² Records from the 1560s mention Berziny meadows, which were used by Koronowo burghers.¹³ Beryno, classed as an abandoned village in the second half of the sixteenth century, is thus not found on the main map.

Tax registers often provided information on small parcels of land, which sometimes merged with neighbouring settlement units in the course of the settlement process.¹⁴ The case of Popowiczki (Smolsko, c) in Brześć Kujawski parish (Brzeście, r) illustrates such relationships. In the second half of the sixteenth century, this settlement absorbed Ardżiankowo (currently part of Popowiczki).¹⁵ In the second half of the sixteenth century, when it was determined that Ardżionkowo had one serf lan, the settlement was recognised as an autonomous village.¹⁶ Late-sixteenth-century registers, however, do not mention this settlement. This may indicate that Ardżionkowo had become part of the neighbouring Popowiczki by then. On the basis of available cartographic materials, we determined that Ardżionkowo was situated to the west of Popowiczki. It ought to be mentioned here that Popowiczki experienced a name change. From the 1630s, records referred to Popowiczki as *Smolsko alias Popowiczki*.¹⁷ Later hearth tax registers dated to 1662¹⁸ and 1673¹⁹ followed suit. Cartographic materials and the 1711 visitation alike confirm the eventual change to Popowiczki.²⁰

Kruszynek-Kolonia (Kroszyno Wielkie, n) proved to be a source of serious localisation difficulties.²¹ In 1598, Kruszynek-Kolonia was mentioned in the description of the boundaries of the bishop-held Brzeźno Village.²² However, Gilly's 1802 map shows that Kruszynek (Kroszyno Małe, n) was situated closer to Brzeźno than Kruszyn, which was located to the south-west of Kruszynek. The Quarter-master's Map shows only Kruszynek, while Perthées erroneously mapped spatial relations. While the location of Kruszynek does not give rise to any uncertainty, it is unclear whether Kruszynek-Kolonia was situated south of Kruszynek.

We determined that Pełczyce (probably part of Grodztwo today) was located in the former Jewish cemetery, which Kowal had before World War II. At present, this location corresponds to the terminal point of Jędrzejewskiego Street. We based this decision on the document certifying the purchase of Kowal lands by Jews for the purpose of creating a Jewish cemetery near Pełczyce Village in 1568.²³

We established that Korabniki near Włocławek was in turn located outside of the present boundaries outlining the contemporary part of Włocławek bearing that name today. Some argue that the medieval settlement of Korabniki sat in the same spot as present-day Korabniki (about 6 km to the north of

²³ Z. Guldon, *Żydzi w miastach kujawskich w XVI–XVIII wieku*, ZK, vol. 9, 1993, p. 101.

Włocławek centre).²⁴ Yet maps drafted at the turn of the nineteenth century indicate that this settlement was the work of Dutch colonists, who appeared at a later time. Indeed, the discussed settlement covered land which in the Middle Ages stretched from Włocławek's borders to Lubanie Village.²⁵ Nevertheless, the early seventeenth-century inventories indicate that the village lay in the close vicinity of Włocławek Castle,²⁶ and by the late eighteenth century this closest part of Korabniki was referred to as Zazamcze.²⁷ We marked the medieval centre of this settlement in this very town quarter of Włocławek.

In the case of some settlements, extant cartographic relics were of paramount importance. In this context, it is worth mentioning the demesne settlement of Zamyślin (Zamyślino).²⁸ By the seventeenth century, Zamyślin had already been abandoned.²⁹ On Perthées's map, Zamyślin, which should be identified with sixteenth-century Zamysłów, sits right next to the border with Brześć Voivodeship, to the south of Kruszyna and Kruszynka. Gilly's 1802 map shows *Zamyslin Hol.* to the south of the road between Kruszyn and Brudnowo (Blatt C1). The Quartermaster's Map also features the demesne farm of Zamyślin and places it between Kruszynek and Brudnowo, to the south of the road connecting these villages. Be that as it may, MTB and the later WIG map show Wiktoryn and Michalin in this region. By re-applying the spatial relations presented in the three above-listed maps (Perthées, Gilly 1802 and Quartermaster's), we determined that sixteenth-century Zamysłowo was in fact Zamyślin, a settlement situated to the north of the line connecting Kruszyn and Brudnowo. At present, Zamyślin is a colony of Kruszynek-Kolonia Village (PRNG).

Mątwy illustrates a similar process. The 1770 Kayser map placed Mątwy on the left, south bank of the Noteć (Blatt 8), just like the von Pfau (Blatt 4) and Schrötter (Section 21+25) maps did. UMTB marked buildings on both Noteć banks, but the label was placed on the left river side (Blatt 1722). MTB indicates a larger settlement unit on the right bank, an effect of a sugar refinery and soda factory being constructed there at the turn of the 1880s.³⁰ Today, the south part of Mątwy forms part of Tupadły, but should not be confused with Mątwy, a town quarter of Inowrocław. Cartographic analysis enabled localising Sławsko Dolne (Sławsko Małe, c) as well. UMTB (Blatt 1794) shows Sławsko Village and Sławsko Colony, but Schrötter placed only one settlement on his map – Sławsko Małe. The shape of the settlement depicted by Schrötter resembles that visible on the UMBT sheet. We placed the settlement near today's Sławsko Dolne, which the MTB named *Kaiserhöf*, and the WIG map – Sławsko Małe. As concerns Ptur settlement (currently part of Ptur), Schrötter marked Ptur and Ptur separately (Blatt Schubin and Blatt Inowrocław). UMTB also reflects this division, but its label arrangement suggests a location different than that of Schrötter. UMTB places Ptur closer to Barcin, with Ptur farther away (Blatt 1650), yet Schrötter locates Ptur closer to Barcin. Similarly, Gilly (Blatt B1) marked Ptur (*Klein Turke*) nearer Barcin than Ptur (*Gross Turke*). MTB shows only Ptur, like the WIG map. In line with Schrötter's and Gilly's interpretations, we placed Ptur in a part of today's Ptur, which is situated at a distance from Barcin. Still, we must admit that UMTB shows similar spatial relations between Barcin, Ptur and Ptur as the maps by von Pfau (Blatt 4) and Gilly.

The settlement history of Swarowo area (currently part of Bachórka) appears deeply interesting. This village had been known to exist since the Middle Ages, and survived until the second half of the seventeenth century.³¹ The sixteenth-century settlement could have had a population of about 100, but was abandoned after the Deluge: not one serf was recorded by the 1673 poll-tax register, and the watermill was not in operation.³² A year later, the register listed a mere eight serfs, while the mill was still shut down.³³

Bachórka, which emerged as a neighbouring village in the seventeenth century, pushed Swarowo to the margin.³⁴ We can assume that in the sixteenth century, it was part of a field or village which over time transformed into a proper settlement and absorbed Swarowo. The phrase used to refer to this settlement, *Bachorka seu Swarowo*,³⁵ gives confirmation. The main map describes the location of Swarowo Village as approximate.

Osiek Wielki (Osiek, r) is a potential vacant settlement. The 1489 land tax inspection and later records define this settlement as *deserta*.³⁶ At the same time, *Liber Retaxationum* mentions one layman near Osiek who made payments to Płonkovo parson.³⁷ The 1577 visitation, however, describes this settlement unit as *praedium dictum Osiek* in Płonkovo parish.³⁸ This means that part of Osiek had been abandoned in the sixteenth century, while another was converted into a demesne farm of the nobility. For this reason we marked Osiek as a demesne settlement on our map.³⁹

Tupadły are an example of linked location. Currently part of Siarzewo Village, this settlement does not appear on any extant old maps. On the basis of information provided by the 1604 inventory of the set of Raciążek property, we determined that Tupadły were situated on the banks of the Vistula River and bordered on Nieszawa, Niestuszewo, Raciążek, and Siarzewo (Psarzewo, c).⁴⁰ Indeed, later mentions suggest close spatial relations with Siarzewo.⁴¹ Relics of local microtoponymy confirm these findings by proving that Tupadły was described as a part of Siarzewo.⁴² Therefore, we decided on linking this settlement with Siarzewo.

Tax registers can also help identify close spatial relations, as they provide information on collective payments made by several settlement units. The spatial relation between Papros (c) and Droszewo (vacant settlement) in Przedecz district illustrates this well. In the entries on Papros, the 1580 register mentions two lans in Droszewo Village.⁴³ Each entry about Droszewo stated that the tax was paid collectively by Papros and Droszewo.⁴⁴ It was not possible to determine the spatial location of Droszewo; therefore we decided to determine its location on the basis of the close relations which linked these two settlement units. We coupled Droszewo with Papros, which we were capable of locating.

We used approximate locations for settlements whose borders were described in great detail in written sources, but whose spatial location could not be unequivocally determined. Unimierze (n) was one such village. It bordered on Dąbrówka and Niestuszewo.⁴⁵ Initially, this settlement was located between Dąbrówka, Sierzchowo/Sierzchów, Markuszewice, Niestuszewo and Raciąż. In 1661, the village was still recognised as inhabited.⁴⁶ However, in 1674 sources describe the settlement as *deserta*.⁴⁷ Later sources cease to mention its existence.⁴⁸ It is worth noting that eighteenth-century sources list Sierzchowo and Markuszewice together.⁴⁹ Von Pfau (Blatt 11) placed Unimierze between Niestuszewo and Chromowola, and the map shows that the settlements were separated by a river. Unimierze sits on the right bank. Despite a very detailed description of the borders, it proved impossible to identify the location of this settlement. Therefore, we agreed on an approximate location.

In Brześć Voivodeship, we linked Starczewa with Kąkowa Wola. Both sixteenth- and seventeenth-century sources confirm that the two settlements enjoyed tight spatial relations.⁵⁰

⁵⁰ MRPS IV, no. 3167 (1519); LWWK 1616, part 1, p. 272.

For some settlements, it was a single reference that formed the grounds for determining their existence. This group encompasses two demesne villages in Inowrocław Voivodeship: Podgaj,⁵¹ which is not located, and Kielczew,⁵² whose location is approximate. Kurzelewo is another village presumed to have existed. Its location is unknown, yet the village name appears in Stanisław Kozierowski's materials. The reference to Kurzelewo dates to 1591.⁵³ A 1596 entry, in turn, mentions the name *na Prądziech*, which is used when discussing the endowment of St. Giles's Chapel, situated outside the town walls of Bydgoszcz.⁵⁴ However, this is a reference to a meadow. Indeed, this area went on to become Prądy Village, and was forgotten until the second half of the seventeenth century.⁵⁵

It is worth noting that the AHP volume on Cuyavia does not take into account a small group of settlements which Zenon Guldon set forth in his settlement network of sixteenth-century Cuyavia. This was not possible, as we agreed on different interpretations of extant source material. One such settlement is Jabłowo.⁵⁶ Hypothetically, it was located in Wudzyn parish and listed as a locality belonging to Koronowo Monastery. In 1527, it was described as an abandoned village.⁵⁷ Nevertheless, in the early fifteenth century (1420), and in the sixteenth and seventeenth centuries as well, this name was used to refer to a meadow.⁵⁸ The alleged village does not appear in the 1489 list of villages. Even if we assume that Jabłowo had in fact been a village for a short period during the Early Modern times, the sources do not provide sufficient information for presuming it was an active settlement of this type in the second half of the sixteenth century. Thus, Jabłowo is absent from the map and the List of Settlements. We adopted a similar approach to Nowa Góra,⁵⁹ which is mentioned only once in 1527.⁶⁰

While working on the settlement network of Cuyavia, we noticed that Zenon Guldon identified Dębice (n) as Poddębice Wielkie (n). This assumption was based on the fact that most tax registers pair the names of these settlements and list either Poddębice Wielkie – Poddębice Małe, or Poddębice – Dębice. Only the 1579 tax register clearly illustrates Poddębice Małe as equivalent to Dębice,⁶¹ and this record provided the grounds for assigning both these names to a single settlement.

Of the settlements Guldon failed to locate, Kopanie presents an interesting case. At present, Kopanie is a colony of Górki Village. It is present in UMTB, MTB and WIG maps. Mochelek is another settlement whose location is based on UMTB. We established that it lay between Lisewo Kościelne and Jordanowo, near the south-western bank of the lake. At present, it forms part of Lisewo Kościelne. In contrast to Mochelek, based on the spatial criterion we identify Kopanina⁶² demesne settlement as tantamount to Chrusty (Chrosty) on Perthées's map based on SGKP information.⁶³

Some settlements were re-chartered in the sixteenth century. The extant source base enabled confirming two such cases across Cuyavia. Until the 1560s, Szczutki (Szczutrkowy, c) was described as an abandoned village.⁶⁴ In 1570, a soltys was settled on two lans in Szczutki.⁶⁵ It was revealed

⁶⁵ ASK I 50, f. 775v: 'Scultetus ibidem Thomas Chirurgus de mansis 2 sculteciae suae noviter extirpatis contributionem adhuc nunquam solvebat.'

that Kobelniki in Tuczno parish had shared a similar fate of resettlement – in 1562.⁶⁶ The existence of the village is confirmed by the 1557 document on the sale of Kobelniki to Wojciech Tupadlski by the Włocławek Chapter.⁶⁷

It is worth underlining that while analysing the districts of Cuyavia and Dobrzyń land, we did not note any intensified colonisation in the Early Modern Era.

Pursuant to AHP rules, watermills are classed as independent mill settlements under two criteria: 1) **spatial**, which look at the distance between a village or town, and 2) **toponomastic**, which are related to whether a mill had a separate name of its own. Determining their status and location was a major challenge for this volume. Cuyavian tax registers recurrently recorded mills bearing their own names as separate from villages or towns. This was the main reason for the difficulty of this task. Radziejów district gathered a particularly high number of such mill names, including Chrzan, Jęczmion, Kaczka and Kozubek, yet only the oldest registers from the second half of the sixteenth century (1553 and 1557)⁶⁸ confirm their existence. The mill in Noć lends itself as a good example. Despite being recorded separately in the tax collection formulary in 1577,⁶⁹ 1580,⁷⁰ 1581,⁷¹ 1582,⁷² 1583⁷³ and 1589,⁷⁴ it could not be identified on any available map. We therefore assigned all mill-related entries to entries on the town.

Ruda Otorowska (currently part of Otorowo) is an interesting example of location-related quandaries. Sources mention the ore processing settlement *prope oppidum Solecz* already in the first half of the sixteenth century. At the time, the name of the mill could have been different, derived from the name (or nickname) of a miner – Kośka.⁷⁵ The original limonite deposit must have become depleted, forcing the ironworks to find a new, more convenient location. Such relocation was common practice in the pre-industrial era.⁷⁶ Tax registers from the second half of the sixteenth century provide information on both the old (abandoned) and new ore mills.⁷⁷ Although the ore mill in Otorowo was linked with the nearby village, we class it as an independent settlement unit: *Ottorower Mühle*, present on Gilly's map, UMTB (Blatt no. 1508) and MTB (as *Friedrich Wilhelms Mühle*) maps, and WIG map (no name). We combined information on the mill with records about two utility structures – a mill and an ironworks – leased out to the Wilde family in the second half of the sixteenth century.⁷⁸

We identified and located Ruda, a former ironworks in Radziejów district, in a similar fashion. The 1557 register lists Ruda (without any additional information) and 'Ruda circa Ruskowo generosi Joannis Ruskowski'⁷⁹ under hereditary mills. Ruda Mill (without precise settlement details) does not appear in earlier or later materials, while the mill near Ruskowo is carried in later sources.⁸⁰ Although Ruda Mill is known only thanks to a 1557 mention and is not present in sources from subsequent years, the context of the entries made in that year clearly indicates that two separate units existed (at least in that one year). We determined the location of this site on the basis of the WIG map, which shows the settlement of Stara Ruda.

⁶⁶ Ibidem, f. 802r: 'Kobilniki non solvunt, quia a duobus annis locari noviter incepit, de quo relacio ministerialis habetur.'

Zenon Guldon did not mark the mill settlement in Jasnów (currently part of Toruń) on his maps. In this AHP volume, we established that its location was identical to that of Klucznik Mill, which was mentioned in the 1765 inspection of Dybów Gord Starosty.⁸¹ Klucznik has been marked on UMTB and MTB maps. Likewise, we established that Dolny near Lubraniec, a late modern mill, was tantamount to Szych Mill (currently Marysin).⁸² We linked Wilunt (currently part of Toruń) with Staw Village.⁸³ Written sources place Zieleniec Mill (currently part of Toruń) *circa villam Nieszewka*.⁸⁴ The mill's location was determined based on the UMTB map (Blatt 1583), where Zieleniec is clearly marked.

Although we do not mark suburbs on the 1:250,000 map, it is worth discussing those which proved impossible to locate. Let us start with Obory, which was recorded as part of Radziejów in the 1494 inventory of royal estates in Brześć Voivodeship.⁸⁵ The 1616–1620 inspection lists houses on Oborna Street,⁸⁶ which means that the street either ran towards Obory or was situated in the former suburb. However, it follows from a 1519 document issued by Sigismund I the Old that Obory was a suburb of Radziejów,⁸⁷ at least in the early sixteenth century. Based on a 1596 reference,⁸⁸ we also identified Babia Wieś as a suburb, as it was treated as a suburb of Bydgoszcz in the seventeenth century.⁸⁹

Translated by Katarzyna Bartkowiak

III.3.1.7 MAZOVIA

Henryk Rutkowski

Settlement is the most important of all the elements marked on our map, as it determined the scale of the map, the depiction of other elements, and finally – and significantly – the reconstruction of the state of settlement required most of our efforts and time. The main assumption of the map is to present all settlements, which existed in Mazovia in the second half of the sixteenth century. Also, we mean to include those villages, which either disappeared, or were founded in this period. Naturally, the degree, to which these assumptions were fulfilled, depends on the source basis. Two main problems caused by various insufficiencies of the sources and the complicated situation of contemporary Mazovian settlement concern the relationship between settlements and their individual parts, and the settlements absent from tax registers from the second half of the sixteenth century.

Beginning with the first of these problems, it should be noted that **the autonomy of settlements** was determined by three factors: a) spatial separation of buildings, that is cluster (or clusters) of houses and farm buildings, b) separation of grounds belonging to a given settlement from grounds of neighbouring settlements, c) proper name. The borders of settlements were usually marked (which does not mean there were not any disagreements), sometimes – rarely – they were replaced by undeveloped areas, especially forest. Topographic factors influenced the development of economic (e.g. corvée done in the local demesne) and administrative (e.g. village court) autonomy.

The degree of autonomy varied from village to village. So, there existed settlements spatially not separated (village buildings neighbouring the buildings of another village directly), or even without specified territory. The latter concerns villages of petty gentry, founded on the basis of one bestowal, which had a common general name and common external borders, but were not separated from each other and with their fields interspersed.¹ In such cases, some building clusters were considered separate villages by some, and considered by others as hamlets constituting parts of larger settlements.

Ownership relations had a significant influence on the separation of villages. The simplest pattern can be seen in a one-village property, where settlement borders overlapped the borders of the estate. In a larger property complex, particular villages were usually clearly spatially separated from each other, forming building clusters (one or more per village). Demesnes in the sixteenth century Mazovia shared names of villages with which they were linked. Demesnes given their own name, or situated far from their village – and which should therefore count as separate villages – are extremely rare.²

¹ The patchwork of the landscape was diversified further by various family divisions and sales. See W. Smoleński, *Szkice z dziejów szlachty mazowieckiej*, Cracow 1908, pp. 36–46; K. Tymieniecki, *Procesy twórcze formowania się społeczeństwa polskiego w wiekach średnich*, Warsaw 1921, pp. 226–235; S. Rosłonec, *Samorzutne scalanie gruntów wśród mazowieckiej i podlaskiej szlachty zagrodowej*, Warsaw 1928, pp. 81–101, 114–116; A. Żaboklicka, *Zmiany w strukturze drobnej własności szlacheckiej w XV–XVI w. na przykładzie ziemi liwskiej*, PH, vol. 49, 1958, pp. 250–260; S. Russocki, *Formy władania ziemią w prawie ziemskim Mazowsza (koniec XIV – połowa XVI wieku)*, Warsaw 1961, pp. 38–40, 89–96, 132–134; A. Borkiewicz-Celińska, *Osadnictwo ziemi ciechanowskiej w XV wieku (1370–1526)*, Wrocław 1970, pp. 128–132.

² There were only three autonomous demesne settlements (see below) in the royal estates in Mazovia – which, thanks to the published visitations, is the best known type of estates in this area. According to J. Wiśniewski, his thorough studies on the settlement of north-eastern Mazovia did not reveal demesnes, which would be called by a different name than their village, in any type of property.

The most complicated situation was the one of petty land ownership, i.e. of villages of farm and partial gentry. Parts of villages belonging to different owners were given individual names, usually in form of an epithet added to the proper name of the entire village, or to a general name of a group of villages belonging to one large family.³ Such divisions tended to be long-lasting, and as a result parts of villages were often treated as separate villages, even though topographically they still comprised one village.

Tax registers – the main source basis for the presentation of settlements on our map – should originally include names of all settlements, in order to appropriate to them the names of taxpayers, which formed the basis for the taxation and payments. Only two groups of settlements were to be excluded, as they were freed from taxation: newly-located settlements, still in their tax-free period, and demesne settlements, as demesnes were not taxed. In reality, however, tax registers, treated as lists of the sixteenth century settlements, show other deficiencies. This is particularly visible in the cases of the settlements of petty gentry.

On the one hand, these are the cases where a register treats parts of one village as separate settlements, for instance when the payment was recorded only from one part, and the name of the entire village was omitted. On the other hand, we have instances, when a given part was ascribed to different neighbouring villages in different years, and also when separate villages were treated as one in the register. For example, Kąty and Lubiewo, two villages in Gąbin district, were recorded together in the registers (sometimes as Kąty alias Lubiewo). Their later situation, visible particularly on the maps from the turn of the eighteenth and the nineteenth centuries, allowed us to determine these had to be two villages in the sixteenth century as well.

Finally, we must mention the most severe kind of deficiency found in tax registers: the omissions of entire villages. Disregarding the already-mentioned lack of newly-located villages and demesne settlements, such omissions were caused by temporary tax exemption, caused by burning down of an entire village for example, or as a result of abuse. Usually, however, omissions of entire villages in the registers could not have been numerous, as it would have been difficult to hide a village from the collector, well-oriented in a given area, or his assistant. Only smaller settlements, located deep in the forest could more easily escape registration. The situation was different in terms of the real number of włóki and subjects, which was taxed, and which often were not recorded in the registers. As we used all surviving tax registers from the second half of the sixteenth century, which complement one another, we may consider instances, when entire villages were omitted in the sources, insignificant.

However, in order to fill in the gaps in the registers and present the complete picture of settlement on our map, when possible, we resorted to **other sources**. These were mostly earlier tax registers and the registers of poll and hearth tax from the second half of the seventeenth century, then also Church visitations, visitations of royal property, entries collected in the files of *Słownik historyczno-geograficzny Mazowsza w średniowieczu* ('The Historical and Geographical Dictionary of Mazovia in the Middle Ages'). Other sources, such as the Crown Metrica, were used sporadically. We assumed that a settlement attested to in the first half of the sixteenth century, or even in the fifteenth century, and later in the seventeenth century, must have existed in the period depicted on our map.⁴

Using sources other than the tax register, we had to remember that not all names, which appear in these sources, prove that such a village existed. The visitations, inventories of property, documents of financial transactions, royal privileges and parochial foundation documents could have consisted, apart

³ Here we could add that sometimes the names of villages located in petty gentry area combined: e.g. in Nur district in the borderlands between numerous villages sharing a common name Sienica with villages called Godlewo, there was a village Sienica Godlewo, and between the villages Godlewo and the villages Łętowo – Łętowo Godlewo.

⁴ The case of the village Grodzisko, marked in Warsaw district near Bródno, is different, as here also the meaning of the name played a role. The name does not appear in the tax registers, but the 1569 visitation mentions a closed mill Grodzisko (LM 1569 f. 79); in 1602 it is a farm with buildings, and in 1619/20 – a village called Grodzisko, inhabited by four peasants (LM XVII, p. 237). Kałęczyn in Ciechanów or Sąchock district is another example of a village which did not appear in the registers; this village belonging to the nobles is mentioned in the visitation from 1565 (LM 1565, vol. II, pp. 21–22), and then in the visitation from 1609 (ADP, no. 11, f. 262v). However, we decided not to include Wola Paprocka in Warka district, which was mentioned by Długosz (Długosz LB, I, p. 348), and later only in the twentieth century (in *Skorowidz miejscowości Rzeczypospolitej Polskiej* – a settlement consisting of one house).

from names of villages and demesnes, also of names of fields, meadows, groves and forest ranges.⁵ Maps from the turn of the eighteenth and nineteenth centuries helped us resolve some of these doubts, even though the area occupied then by a given settlement could have been only a field of the same name two centuries before. Therefore, the results obtained this way should not be considered certain, but only likely.

In cases where we were dealing with various register entries of names, which could mean autonomous settlements or just their dependent parts, we usually accepted the first possibility, so as not to omit **an existing settlement** rather than consider one part of a village a separate settlement. This rule was also applied, when the registers listed only one settlement, but other sources, cartographic included, suggested a different solution. This was the case, for instance, of the present-day village Kaski in Sochaczew district, treated as one village by the sixteenth century tax registers and visitation, and yet the records from the turn of the fifteenth and sixteenth centuries and from the seventeenth century mention three villages (Kaski Gałolina, Kaski Młyńska Wieś and Kaski Wyczółki).⁶ Wałowice in Rawa district is an example of a settlement listed as one village consisting of three parts by some of the registers, and as three separate villages by the other. Using building clusters showed on Gilly's and the Quartermaster's maps, we decided to mark three villages Wałowice.⁷

However, this rule was abandoned in cases, when two names more likely denoted one settlement, rather than two different ones. Above all, this relates to names of partial and farm gentry villages recorded in the registers from different years, and consisting of the same main element and various additional epithets. Given the complicated and quite fluid nomenclature of petty gentry villages, should each name be treated as denoting a different village, it would lead us to an excessive increase in the number of settlements localized in approximation or even unlocalized. So, if the later situation depicted on the maps permitted us to localize only one village, and the information from both records (name of the owner, number of włóki, etc.) allowed for the possibility we were dealing with two names of one village, we opted for the following solution: both names were listed together in the List of Settlements, the first one as the main entry (i.e. the one placed on the map), and the other was provided in brackets with a question mark. For example, these were the village Tymianka Wachnie (Tymianka Przeczki?) in Nur district, Nieznachy (Piasek?, Długi Ostrów?), that is Kępa Antonińska now, in Gąbin district.

Different names appearing in one tax register were treated as belonging to one village only in exceptional cases. Here are examples: Zaborowie Plebańskie in Grójec district denoted a part of Zaborowie Małe, a village belonging to the parson of Lewiczyn, and the remaining part belonged to farm gentry.⁸ Names of two parochial centres, Rokitno Górne and Rokitno Dolne, mentioned in tax registers from Błonie district, were related to one village Rokitno, as nothing would suggest these were two separate settlements.⁹ Podole, Zalesie and Nowy Dwór in Rawa district were considered one village, according to the tax registers and visitations.¹⁰

Suburbs are parts of settlements which were not depicted on our map. However, we included villages situated near towns which were sometimes called suburbs (e.g. Kozina near Goszczyn,¹¹ Gniewań near Latowicz¹²), including these villages, which shared the name of the neighbouring town (e.g. Karczew). In this case the foundation of the town created a new settlement of a different nature

⁵ In the ecclesiastical visitation, this could be a field sharing the name of a village which had been located in this place before, listed because of the tithe. Names recorded in visitations by the description of the borders of royal estates should be treated equally carefully. For instance, Komorów, a village in Biała district was to border on Korabiewice (here it was meant Podskarbice) and with 'Pruskie' (Ossowice, or their part belonging to the family Pruski). LR XVI, p. 12.

⁶ Registers from 1496, 1508 and 1510, Tariffs 1789–1790, Perthées's, Gilly's and the Quartermaster's maps.

⁷ J. Łaski mentions Wałowice triplex (Łaski LB, II, pp. 293–294); in 1789 Wałowice Potrójne (Tariffs 1789–1790).

⁸ P. Mazowsze, p. 233, 1576; Zaborowie Plebana recorded also in the register from 1573.

⁹ This way also in the 1603 visitation (Wiz. arch. warsz. 1598–1603, f. 152) and in the Files of SHG Mazowsze. Compare with Now2, p. 517.

¹⁰ Tax registers from 1534–1582: Podole alias Zalesie, Podole Zalesie. In 1523: 'Podolye et Zalyeschye, villa in duas partes divisa et cognominibus praedictis cognominata' (Łaski LB, II, pp. 288–289). In the visitations from 1564 and 1570 the villages Nowy Dwór and Podole were ascribed to one hereditary property (LR XVI, pp. 17–19, 159); in the visitations from 1616, 1630, and 1661 – the same with an added name Zalesie (LR XVII, pp. 42, 64, 127). The visitation from 1789 stated that the village Nowy Dwór 'consisted of unseparated and undivided villages Nowy Dwór, Podole and Zalesie' (LR 1789, p. 46).

¹¹ LM 1565, vol. I, p. 51; LM XVII, p. 163.

¹² LM 1565, vol. I, pp. 119, 177, 188.

near the village, or rather on some of the village's grounds. On the other hand, in case of Chojnata, the long-lasting ownership division (of the strongest type, as one of the owners was a Church institution) resulted in the separation of two villages: Chojnata Mniska and Chojnata Pańska. The division was influenced by the fact that the border between the lands of Rawa and Sochaczew ran between the two villages, but this could not have been the primary cause, as seen in the example of Jeruzal, which remained a single village despite being cut by the same border.

According to our rule, which allowed us to mark only autonomous settlements on the map, only those mills which had their individual name (corn and ore mills, that is ironworks), situated outside villages and constituting separate mill settlements were depicted on our map of Mazovia. As the majority of the mills lay on grounds belonging to villages or towns, in cases in which we were unable to identify a sixteenth century mill with a mill or a hamlet shown on a later map, or when this identification was to be only hypothetical, we decided to leave such a mill out. In other words: only mills of certain localization were included in our map. Other mills were considered as parts of marked villages and towns. The only exception localized uncertainly is Przejma, a mill in Kamieniec district, because as many as two modern villages called Przyjmy (in Poręba Kocęby and Brańszczyk communes) could be its trace.

An attempt to present **demesne settlements** based on the same rule, which was applied for mill settlements, proved futile. Not only does this reflect the said rarity of demesnes with proper names in this region, but also a result of the deficiencies of our source basis. Only three royal demesnes were marked on the map – Buszyce in Sochaczew district, Szczawinek in Mszczonów district, and Ruda in Przasnysz district.¹³ Perhaps some settlements absent from tax registers, but taken from other sources, were actually demesne settlements. However, without any information concerning their nature, we marked them with a sign, which dominated on our map, i.e. as villages or hamlets. Three royal manors (earlier: ducal manors) appear on our map as separate settlements of particular nature, all located in the Zagajnica Forest: Krusko, Rososza, and Szkwa.¹⁴

Before we proceed to the matter of the **localization of settlements**, we must first emphasize, that the term 'localization' is used mostly in its broader meaning, which consists of two narrower. These are two subsequent methodical processes: the **identification** of a settlement appearing in the sixteenth century sources with a settlement marked on later cartographic records, and then the proper **localization** of the old settlement on our map, i.e. the localization sensu stricto. Apart from this typical method, the localization encompasses also the rare cases, when an old settlement could not be identified from the maps, but written information or field names allow us to mark it on our map.¹⁵

The settlements were localized on the basis of maps from the twentieth century, yet according to their location recorded on old maps from the eighteenth/nineteenth century. In most cases there was no difference from modern maps, but a significant number of settlements were not localized to their modern location, this being related to changes caused by agrarian reforms, the parcelling out and joining together of land. For example, according to old maps, the sixteenth century village Podskarbie Małe that is Szlacheckie in Biała district was localized not on its present location, but on the grounds, which today belong to a village Tadzinek (distance 1.5 km). Sulistryjewo, called Siwów from the seventeenth century, was localized at the location of the present day Częstoniew-kolonia, and the modern Siwów serves as the location of the sixteenth century Zamoście (villages in Grójec district).

Schematic signs for settlements were marked on the map according to the rules of cartographic generalization, e.g. at the location of a church, the central point of the buildings, etc.¹⁶

The localization of the majority of settlements on our map is certain, which should more precisely be called relatively certain. This is mostly a certain identification of a settlement known from the

¹³ MRPS IV, no. 14131; LR XVI, pp. 59–62, 175; LR XVII, pp. 21–22; LR 1789, pp. 135–136; LM 1565, vol. II, pp. 19–20; LM XVII, pp. 68–69.

¹⁴ LM 1565, vol. II, p. 92. Later, villages were founded on the site of Rososza and Szkwa, Krusko was called Rudera Pałacu ('Castle Ruin') on Perthées's map.

¹⁵ We used, among others, the field data gathered by mail, see WP, p. 24. Field names were also included in the publication *Urzędowe nazwy*. This publication is, however, incomplete, as proven by the case of Żdżarki: in issue 18 (*Białobrzegi district*) the name Żdżarki is omitted. According to field data (letters of the principal of the school in Sucha from 20 August and 20 November 1953) the name denoted a field and a forest belonging to the village Sucha.

¹⁶ Compare with WP, p. 25; J. Szaflarski, *Zarys kartografii*, Warsaw 1965, pp. 343–345, 428.

sixteenth century sources with a settlement appearing in later cartographic records. It should be noted here that detailed maps from the turn of the eighteenth and nineteenth centuries, as well as written sources from the second half of the eighteenth century,¹⁷ allowed us sometimes to avoid incorrect identification, which so to say forced itself upon us. For instance, Wierzchy in Rawa district was not identified with the present-day Wierzchy Stare, which – its name notwithstanding – is newer and still did not appear in the first half of the nineteenth century.

Settlements named **‘Wola’** require a separate explanation. As we know, already several hundred years before the period depicted on our map, this name denoted a newly-founded village, temporarily freed on this occasion from liabilities towards the owner or the State. With time, this temporary term became fixed in the name of villages (e.g. Wielka Wola near Warsaw). We also believe, the meaning of the term ‘wola’ broadened gradually, in some cases identifying with the term ‘wieś’ (‘village’). So, in the sixteenth century, mostly newly-founded villages were called Wola, or just new parts of older villages, which could later become separate settlements.¹⁸ Additionally, the name Wola could denote an older village, having the same meaning as ‘wieś’, as proven by the following examples: Stara Wola (now Starowola), Stara Wola that is Wola Brzeska (Brzuskowola), Wola Stara that is Sienica Stara (Stara Siennica), Wola Kołybielska that is Stara Kołybiel (Stara Wieś) – all in Garwolin district. It seems that in these cases (except for Wola Brzeska) the name Wola was influenced by nearby foundations of towns, and the older settlement was given the name Wola, meaning ‘village’.¹⁹

The localization was based on the maps by Textor, Gilly, Heldensfeld – Benedicti, and the Quartermaster’s Map. The latter was used only when older depictions made by the occupants failed to show a settlement of our interest, and when their location on older maps appeared less precise. For instance, Stryków in Biała district was localized at the site, where there is a demesne Stryków on the Quartermaster’s Map, the demesne is marked also on Perthées’s map, but does not appear on Gilly’s map, nor on the detailed depiction by Gilly and Cron. These last maps show Strikow Haus at a different location, where there is Hollender on the Quartermaster’s Map.

In exceptional cases we had to accept localization based on later data. For example, Suchy Łąg (now Suchołęg), a village in Warsaw district, which did not exist in the eighteenth and nineteenth centuries, and was reborn in the twentieth century, was localized on the basis of a map from 1937.²⁰ Also, in some situations a settlement was localized according to its location from before the end of the eighteenth century, which was different from the location recorded on cartographic sources. Ostrów in Warka district could be an example here. Old maps show it at the site of the present-day Ostrówek, but earlier the village was situated, where the village Pólko now lies.²¹

Of all cartographic sources utilized to localize settlements, only Perthées’s map could not have been accepted as a basis for certain localization, as there are too many distortions. In this case the conclusion is: certain localization on our map relates to the turn of the eighteenth and nineteenth centuries, and for the second half of the sixteenth century it is usually probable. However, in some instances we can be certain of the sixteenth century localization, e.g. a church standing invariably in one place for several centuries, or a market of an old town showing us the old location precisely. In the areas of petty property in the sixteenth–eighteenth centuries, the degree of certainty of localization is high, as the location of a settlement could change only within property borders. In fact, changes in a village’s location were generally rare between the end of the sixteenth century and the end of the eighteenth.²² That is why our depiction of settlement – in terms of the precision of localization – undoubtedly bears close resemblance to reality in the chosen chronological period.

¹⁷ Maps of Perthées, Gilly, Textor, Heldensfeld-Benedicti, and the Quartermaster’s map; Tariffs 1789–1790; Regestr Diecezyów.

¹⁸ See *Lustracja województwa lubelskiego 1565*, pub. A. Wyczański, Wrocław 1959, p. 64.

¹⁹ Various names of villages related to towns were listed by W. Kuhn, but he did not notice the names consisting the word ‘Wola’. *Die Stadtdörfer der mittelalterlichen Ostsiedlung*, „Zeitschrift für Ostforschung”, vol. 20, 1971, no. 1, pp. 37–59.

²⁰ SGKP, vol. 1, p. 722, mentions Suchołąg forest.

²¹ The terrain is elevated there, and becomes an island during the flooding of the rivers. Information obtained by A. Niewęglowski of IHKM PAN (now IAiE PAN – Institute of Archeology and Ethnology, Polish Academy of Sciences) on the basis of local Church sources and experience.

²² See J. Burszta, *Od osady słowiańskiej do wsi współczesnej*, Wrocław 1958, pp. 78–108.

Estimated, approximate localization was shown on the map in two ways: with a symbol (circle) made with a dashed line, when it denoted a settlement located separately, and with a link between two signs made with continuous line (described as two villages sharing a name in the key to the map), when a given settlement was localized together with another one. We followed this pattern also when more than two sixteenth century settlements were situated in an area now occupied by one settlement, and it was impossible to localize them in a more precise manner – the map shows a group of a proper number of signs. This could denote settlements, which certainly lay on the grounds of a given present-day settlement, but the impossibility of determining their mutual location forces us to accept a less precise solution. These could also be settlements (all or some from the group), whose relation with this area is assumed. The name of the group was given either after one of the settlements, or the common element appearing in the names of individual settlements (see below).

Approximate localization on our map means in fact two different kinds of uncertain localization: hypothetical identification, and approximate localization *sensu stricto*.

Hypothetical identification of a sixteenth century settlement can denote a settlement which exists today or one which appears only on old maps. For instance, Tworzyjany, a village in Biała district was hypothetically identified with Parchle; Tworzyjany disappeared already in the second half of the seventeenth century, when Parchle appeared in the same parish. They in turn disappeared in the nineteenth century. An identification was considered uncertain also in such cases, as the identification of the village Grochy, which does not appear in the sources after the sixteenth century, with later Wólka Grochowa. The latter could have been founded next to Grochy without immediate reflection in the sources.

Proceeding to **approximate localization** *sensu stricto*, it should be stated that this type of localization was used when a settlement could be localized only in estimation, i.e. with an error over 1 km (4 mm on the map). This occurred when the old settlement disappeared before our cartographic sources were created, and it was localized on the basis of other, less precise information. For example, let us mention Cywino Malinie, a village in Płońsk district, located according to the sixteenth century data about its situation,²³ or Osowo, a village in Czersk district, which was localized on the basis of field information. However, when information concerning a settlement's location was too general, e.g. mentioning only its parochial affiliation, we avoided even approximate localization. In such cases the settlement remained unlocalized. Given the above, hypothetical localization permits a greater possibility of error than approximate localization.

The List of Settlements supplements the map in terms of identification and localization. For each of the settlements the List provides: its name from the second half of the sixteenth century, i.e. the one marked on the map, the important variations of the name, the modern name (in Italics), when it differs from the main entry, the district and parochial affiliation and the letter and number coordinates of the location on the map. As such, the List shows with which present-day settlement the sixteenth century settlement was identified. When the modern name is not provided, it means it is identical with the old name.

As the localization was conducted on the basis of the eighteenth/nineteenth century maps, the fact that a given sixteenth century settlement was identified with a modern settlement in the List does not mean the old settlement was localized in the present-day centre of a settlement, or even within its boundaries. The List does not distinguish settlements located invariably on the same spot from those, which changed their location sometime between the beginning of the nineteenth century and modern times. This concerns shifts of settlements from a location now unoccupied by any other settlement to a place, which was uninhabited in the sixteenth century. However, when a sixteenth century settlement was moved in the nineteenth–twentieth century to another location, but a new settlement, with a new name, exists now on its previous site (i.e. the one shown on the eighteenth/nineteenth century maps), then the sixteenth century settlement was linked with its successor in the List. An example could be the aforementioned location of Podskarbice Małe on the grounds of the present-day Tadzinek. Here are some more examples: Faski Rykacze in Zambrów district was localized (based on the Quartermaster's Map) on the edge of the modern Laskowiec Nowy. And so, in the List we read: Faski Rykacze,

²³ Data from 1548 and 1593, mentioning that Cywino Malinie, Mystków Grzymki and Brześć neighboured on each other (Files of SHGM). Cywino Malinie does not appear in the tax registers, the last entry from the tithe register from the last quarter of the eighteenth century (Czaykowski) describes this village as deserted. See WP, p. 25.

Laskowiec Nowy. Since the beginning of the twentieth century, Grabie, a village in Grójec district, was situated where the village Dąbrówka now lies, that is some 2.5 km from the modern village Grabie. In the List, Grabie was identified with Dąbrówka.

When more than one sixteenth century settlement was localized at the location of one present-day settlement, the List adds the word 'part' to each of the entries. Known names of such parts (districts) were added. For instance: Biejkowo, Bikówek – part; Mokotowo, Warsaw – Mokotów.

Instances of an opposite situation were extremely rare. Here we provide one of them: Radwankowo in Czersk land, a royal village, with the vogt's office was owned by the nobility and a parochial church with parson's benefices, was divided into two parts. In the nineteenth century, these parts became separate villages, which still exist today as Radwanków Królewski and Radwanków Szlachecki. Both names were listed in the List as the equivalent of the sixteenth century village.

Names of old settlements localized **certainly** on our map (i.e. whose localization was based on the eighteenth/nineteenth century maps), but which **do not exist today**, were marked with a cross in the List. Following the rule described above, this concerns only those cases, where the old settlement was localized at the location now uninhabited. In total, we marked 141 such settlements.

Names of settlements localized **in approximation** were marked with an asterisk in the List. This is particularly important in the cases of groups of two or more signs on the map, as it offers an explanation, if and which settlements from the group have a certain localization. Or, more precisely – only one settlement in a group can have certain localization, all the remaining settlements – certain identification at the most. An asterisk in the List by names of villages, which appear individually, means either hypothetical identification (then the modern name is given, as it differs from the old name), or approximate localization.

Groups of symbols on the map were presented in the List in the following manner: the name marked on the map constitutes the main entry in the List, followed by an equation mark, and next by the names of the settlements in alphabetical order. For instance: Wądołki Borowe = Wądołki Borowe (Wądołki Wierzch Prądnika – part), Wądołki Kałęczyno*, Wądołki Kopki* (villages in Zambrów district). At the same time, this example shows that two settlements located at different, but neighbouring locations, can share a common name. In this case the name Wądołki Wierzch Prądnika encompasses the aforementioned Wądołki Borowe and Wądołki Buczki, which appear separately.

As it was already stated above, one of the individual names, or their common element, constitutes the name of the entire group. A common element of the names was accepted when all settlements marked in a group were localized approximately, or more than one settlement was localized certainly, and there were no other settlements (groups) in the vicinity, which would have an identical name. For example: Rudno = Rudno Bystre*, Rudno Czachy Stare*, Rudno Janowięta*, Rudno Jeziorowe (in Przasnysz district); Bieliny = Bieliny Małe, Bieliny Myślachowice (in Biała district). If there was a name with a broader meaning, which encompassed all settlements from the group, it was naturally used to denote the group, e.g. Mężenino Wierzch Olszanka = Mężenino Stare*, Mężenino Nowe* (in Zambrów district).

In other cases, the name of the group was taken after one of linked settlements. We chose a name of a settlement with certain localization, and when there was no such settlement, this sixteenth century name, which survived for the longest period, or the one which denoted the largest settlement. For example: Rokitnica Wielka – R. Bogufały*, R. Marcinki*, R. Mileska*, R. Wielka, R. Zarzecze*, Rokitnica (in Biała district). This rule applies also to instances, when there was no common element in the names of grouped settlements. For example: Bońkowa Wieś = Bońkowa Wieś, Pisarskie*, Rzyńska* (Rzyśkowa Wieś), Palczew – part (in Warka district). The name of a group situated on the site of a lost village, but known from older maps, was marked with a cross, e.g. Kurzątki† = K. Mierki*, K. Strachomiry* (in Kolno district).

The aim of the List is, among other things, to offer a more detailed explanation in cases, when settlements marked in one group belonged to various parishes or districts. The map gives only a general description, it is the List, which specifies the administrative affiliation of the settlements. For example: Przydanowo = Drewnowo P., Konarze P., Nur district, Nur parish; Łętowo Dmochy*, Łętowo Godlewo*, Łętowo Kalinowo*, Nur district, Czyżewo Kościelne parish, Drewnowo Konarze.

When two neighbouring villages, known only under one name (e.g. listed as Dzierżanowo dwoje – 'two', or Ciemne Zaręby, altera Ciemne Zaręby), could not be localized separately, the group marked

on the map was represented in the List as, for instance, Dzierżanowo x2. There are some exceptionally more numerous examples: Nieździno x3, Korytowo x4, Sarnowo x5 (all in Wyszogród district).

When a **sixteenth century settlement could be identified hypothetically with more than one present-day settlement**, and each of these identifications is equally probable, the map presents one of them as an approximate localization, and the List lists all possible solutions (the one, with which the old settlement was identified with on the map, listed first). For instance: Białe Pieczonki*, Białe Giezki, or Białe Chorasze, or Białe Figle, or Białe Papieże (Nur district).

We acted in a similar manner when the identification of several old settlements with an equal number of modern settlements was uncertain. In such cases, similar names, i.e. common elements of individual names, were marked on the map next to the signs of villages, and Roman numerals were added. The List lists then the sixteenth century names and modern names (the latter ordered by respective numerals). For instance, Kutylowo I, II, III = K. Bliższe*, K. Dalsze*, K. Średnie*, Złotki Stara Wieś, Złotki Przeczki, Złotki Pułapki (Nur district). Analogically, when several old settlements were identified uncertainly with a lower number of modern settlements, the only difference was visible in the number of signs, as their sum on the map should equal the number of the sixteenth century settlements. In such cases, the List lists: Otwocko I, II = O. Całowańskie, O. Duckie, O. Zbroszek, Otwock Wielki, Otwock Mały (Czersk district).

There were exceptional situations, when several old settlements were identified with a higher number of modern settlements. The old settlements were marked on the map at some of the present-day locations (as localized approximately) and assumed identical names differentiated with numbers; the List lists those modern names, which were used for the localization first. For instance: Zawisty Zuzalka I, II, III, Zawisty Dworaki, or Zawisty Piotrowce, or Zawisty Koziany, or Zawisty Kruki, or Zawisty Króle, or Zawisty Wity (Nur district).

Apart from all settlements marked on the map, the List contains also names of **unlocalized settlements**, marked with two asterisks, e.g. Chodziszewo** (Sąchocin district).

Table 1. Unlocalized settlements

* Date of last entry in utilized sources, including entries on abandoned villages, see I. Gieysztorowa, *Źródła pisane*, [in:] AHP Mazovia, and H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, III.3.1.7 in this edition.

These are usually small villages belonging to the nobility, yet with some exceptions, like Kosowo or Kąsów, a large village owned by the archbishop of Gniezno in the key of Skierniewice. In 1553, there were 19 serf lans in the village, but this is the last entry about the village, which must have disappeared soon afterwards without any trace to allow for localization (perhaps it was absorbed by a neighbouring village?).²⁴

In total, we were unable to localize 88 villages, even through estimation. The number of all known settlements in Mazovia in the second half of the sixteenth century is 6,679, so the unlocalized ones constitute 1.3%.²⁵ The majority of those settlements lay in the south-eastern part of Mazovia, i.e. in the lands of Czersk, Warsaw, Nur, and Liw (50 unlocalized settlements, i.e. 2.5% of all settlements in the area).

A. Pawiński, basing on single tax registers from each land, found 6,084 settlements in Mazovia. Our study increased this number by 595 settlements, that is 9.8%, of which 563 settlements lay in Mazovian Voivodeship (14% increase), and 32 in Rawa Voivodeship (3%). In Płock Voivodeship the number did not change, but this does not mean we counted only settlements known to Pawiński.²⁶ Changes in particular districts are partly a result of a different range of certain administrative units than the one accepted by Pawiński, hence the decrease in the numbers in several districts in relation to the number of settlements presented by Pawiński. The highest increase in the number of settlements occurred in the districts of Nur (37%) and Ostrów (34%).

²⁴ Rejestr pob. z. rawskiej 1553; J. Warężak, *Słownik historyczno-geograficzny księstwa łowickiego*, no. 1, Wrocław 1961, p. 157; idem, *Osadnictwo kasztelanii łowickiej*, part 1, Łódź 1952, p. 162. The order of names in the document from 1359 (KDW, vol. III, no. 1404) and an entry from 1553, which told us it was a settlement in the key of Skierniewice, would point to the vicinity of Samice, not Łyszkowice, where a meadow in Kossowo was noted in 1510.

²⁵ Research on Płock Voivodeship around 1578 left seven settlements unlocalized (WP, p. 25), of which we were now able to locate 3, but other earlier unused sources provided us with the localization of other seven settlements not localized before. In case of AHP Lublin, unlocalized settlement also constitute 1.3% (see S. Wojciechowski, *Location of settlements*, [in:] AHP Lublin, in this edition III.3.1.3).

²⁶ P. Mazowsze, introduction, pp. 15–19. The study on Płock Voivodeship (WP, p. 24) revealed 1075 settlements, which is less than in Pawiński. It was possible, because some settlements, calculated as separate settlements by Pawiński, were considered only parts of settlements (demesnes, farms in villages).

Naturally, it must be remembered that these **settlements varied in size**, from one-manor mill settlements or hamlets counting several farms to large cities. As such, the above calculation should not be treated as a comparison of comparable units.

Table 2. Settlements according to districts, lands and voivodeships

District, land, voivodeship	Area in km ²	Number of settlements	Number of settlements per 100 km ²
districts: Płock	548	161	29.4
Bielsk	429	183	42.7
Płońsk	281	114	46.6
Raciąż	491	130	26.5

Przasnysz	1,852	444	24.0
Ciechanów land	2,981	908	30.5
districts: Rożan	569	144	25.3
Maków	353	66	18.7

District, land, voivodeship	Area in km ²	Number of settlements	Number of settlements per 100 km ²
Rożan land	922	210	22.8
districts: Łomża	1,006	138	13.7
Ostrołęka	1,416	122	8.6
Kolno	1,135	117	10.3
Zambrów	652	191	29.2
Łomża land	4,209	568	13.5
districts: Wizna	385	96	24.9
Radziłów	361	98	27.1
Wąsosz	651	140	21.5
Wizna land	1,397	334	23.9
districts: Nur	844	274	32.5
Ostrów	550	78	14.2
Kamieniec	2,063	217	10.5
Nur land	3,457	569	16.5
Liw land	1,038	208	20.0
Mazovian Voivodeship	23,016	4,583	19.9
Mazovia	33,493	6,679	19.9

The highest density can be observed in the districts, where the uninhabited area constituted a minor part of the whole, and settlements were rather small (districts of Ciechanów, Płońsk, Bielsk, Nowe Miasto). **The lowest density** occurred in the districts with vast woodland areas, like the forest now called Kurpiowska (Ostrołęka and Kolno districts).

If we disregarded mostly and completely uninhabited territories, then the density of settlements could be considered approximately equal to the one for the fragmentation of settlement. Łomża and Nur lands offer a good example here, as they consist of densely populated districts (Nur and Zambrów), as well as sparsely populated ones (Ostrołęka, Kolno, Kamieniec, Łomża, Ostrów). The comparison of the density of population factors with percentages of large villages in individual lands²⁷ shows the following result: lands with the lowest density of settlements (Łomża, Sochaczew, Gostynin, Nur) have the highest percentage of large villages, and on the other hand – lands with the highest density of settlement (Ciechanów, Płock, Zakroczym, Wizna, Rożan, except only the small Wyszogród land) show percentages of large villages below the Mazovian average, including very low ones.

In general, all districts with more than 25.7 settlements per 100 km² (density in Błonie district), and there are 12 such districts, were situated in the northern part of Mazovia, in the land of fragmented gentry settlement. Whereas the indicators for southern Mazovia are average and low, both due to large woodland areas, and large villages in greater property estates.

(1973)

III.3.1.8 PODLASIE VOIVODESHIP

Jarosław Suproniuk

The main task of this volume – as with the whole AHP series – is to present the entire network of settlement for the Podlasie Voivodeship in the second half of the sixteenth century. Here we shall equally recall the principles employed in settlement localisation as used in previous volumes.¹ On the map, besides the presence of settlements existing and functioning for the entirety of the half century, we have also taken into consideration settlements that actually disappeared in this period, as well as those that were then created.² The degree of accuracy to which this task is in fact realised depends obviously on the source basis, and particularly the difficulties resulting from the absence of written sources.³ The use of the term ‘location’ means, as hitherto, a two-stage method for the reconstruction of the settlement network:

- a) the identification of settlements mentioned in the sources with those presented on the earliest cartographic maps,⁴
- b) the labelling of the identified settlement on the map drawn up.

⁴ See T. Panecki *Cartographic sources*, [in:] AHP Podlasie, in this edition II.2.8.

The main base upon which settlement localisation has been formulated, and here as with the entire AHP series, has been the WIG maps of the 1920s and 1930s and here in a scale of 1:100,000. In earlier volumes of the Atlas series (AHP Lublin, AHP Mazovia, AHP Sandomierz, AHP Sieradz and AHP Cracow) the marking of points on the map involved the imposing onto the base map of a two-dimensional sign, which in a real scale would have had an area with a diameter of several hundred metres. From the AHP Greater Poland volume onwards the marking of settlement points has been based on GIS.⁵ The application of GIS programs for the localisation of settlements allows for any exactness in their positioning to be corrected. In the case of towns the positioning of settlements constitutes the centre of a market square or some other point constituting the centre of the settlement. In parish villages this was the church in as far as it had not changed its position. While in remaining settlements these were clear built-up centres or their geometric centre, chiefly crossroads in the area of a given settlement or an object which to a great degree of probability had not changed its localisation. Settlements no longer in existence have been localised on the basis of the cartographic material described in the chapter *Cartographic sources*.

The settlements that appear on the main map can appear in a three-way form: a) certain known localisation, b) approximated localisation and c) tied localisations. Approximated and tied localisations concern only villages (hamlets); in cases where a farmstead or miller settlement could not be precisely located these were not included on the main map, but information about them may be found in the List of settlements as well as in the commentary.

The overwhelming majority of settlements on the main map (1515 of the 1675 settlements, which constitutes 90.4%) have a certain localisation, that in their positioning raises no serious doubts. Any eventual changes in the position of settlements between the sixteenth century and the turn of the nineteenth century being the result of natural disasters, war destruction, fires, changes in the road network or course of rivers are not discernible for us in the source material to any satisfactory degree and scale.⁶ We have adopted the view that the cartographic picture from the end of the eighteenth century and the beginning of the nineteenth century is most likely to refer to settlement from the second half of the sixteenth century. We may also ascertain that small spatial changes would not be visible when applying the scale of 1: 250,000, where 1 cm on the map equals 2.5 km on the ground (1 km = 4 mm).

Approximated localisation (46 settlements of which 24 in the Bielsk land, 20 in the Drohiczyn land and two in the Mielnik constituting 2.8% of all the settlements) has been employed by us in two instances. The first when a settlement does not appear on maps yet we have sufficient additional source information (descriptive) relating to the subject of its location or other pointers on localisation such as descriptions of the boundaries or the names of fields, meadows or forests still remaining to this day. Secondly, when the identification of settlements confirmed by sources in the sixteenth century with those identified on the earliest maps raise fundamental doubts.⁷

⁵ See A. Borek, M. Słomski, *Location of settlements*, [in:] AHP Greater Poland, in this edition III.3.1.4.

⁶ Known are examples of villages being razed along the Podlasie-Lithuanian border, for example: on the 5 November 1641 "There occurred a certain and irreversible decision, between their revered persons Father Nikodem Szybinski the Suprasl archimandrite with the reverend chapter house of the Supraśl monastery on the one hand, and Father Adam Moczarski the Niewodnica parson, also with Krzysztof Skiwski Esq., and the spouse Mrs Katarzyna Korycka Skiwska, and Mr Andrzej Wilczewski and his wife Mrs Zofia Korycka Wilczewska on the other hand, and in this way [...] razed the small village of Piszczewo in order to propagate the lands of the demesne farm of Baciuty, while the farmers he presumably transferred to Baciuty, to those seats from which the Boyars proudly derived; and the very same with certain villages that had belonged to the Topilec demesne farm, he acted for these two demesnes farms of Baciuty and Topilec had scant lands; with a sizeable number to work and they did not have anything to do", quoted from: Археографический сборник документов относящихся к истории Северо-Западной Руси, издаваемый при управлении Виленского учебного округа, vol. 9, Вильна 1870, pp. 168–169, 172. The impact of fires on the housing stock of Podlasie towns has recently been discussed by Józef Maroszek, see idem, *Pożary w miastach podlaskich do końca XVIII w.*, [in:] *Ars historiae historia artis. Prace ofiarowane Profesorowi Andrzejowi Wyrzbińskowi*, ed. E. Dubas-Urwanowicz, J. Maroszka, Białystok 2012, pp. 187–201; cf. also: J. Topolski, *Wpływ wojen połowy XVII wieku na sytuację ekonomiczną Podlasia*, [in:] *Studia Historica w 35-lecie pracy naukowej Henryka Łowmiańskiego*, Warsaw 1958, pp. 309–349 (as well as J. Ochmański's review [in:] „Rocznik Białostocki”, vol. 1, 1961, pp. 346–348); A. Laszuk, *Straty niektórych miast podlaskich po wojnach połowy XVII wieku*, „Białostoczczyzna”, 1992, no. 2 (26), pp. 1–4; A. Karpiński, *Pożary w miastach Rzeczypospolitej w XVI–XVIII wieku i ich następstwa ekonomiczne, społeczne i kulturowe*. Katalog, in cooperation with E. Kalinowski, E. Nowosielska, Warsaw 2020 (Podlasie Voivodeship pp. 283–290).

⁷ Cf. H. Rutkowski, *Metoda retrogresji w geografii historycznej Polski (wybrane zagadnienia)*, SG, vol. 7, 2019, pp. 150–151. "The approximate localisation on our map means in point of fact two types of uncertain localisation: a hypothetical identification and an approximated localisation sensu stricto."; idem, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7.

Tied localisation (66 settlements of which 42 in the Bielsk land, 21 in Drohiczyń and three in Mielnik constituting 3.9% of all the settlements) has been applied in those cases when an exact location was not known but when source information suggested that a given settlement was situated within the environs of another settlement. The greatest instances of tied localisation we find in nobility holdings and noble-held neighbourhoods where often they acted under their own names and where smaller settlements or villages belonging to impoverished nobility were incorporated within neighbouring settlements, were divided or became deserted before they were recorded in cartographic material.⁸ Sometimes the only reference with regard to localisation was the surname of the owner himself.

The remaining 48 settlements (2.9% of all the settlements) of which 21 were in the Bielsk land, 25 in Drohiczyń and two in the Mielnik land of an unknown localisation have been described in a latter part of the commentary.

In Podlasie – as was the case with settlement in Mazovia – two fundamental problems come to the fore – the independence of settlements and their particular parts, as well as settlements that do not feature in the tax registers of the second half of the sixteenth century but which appear noted in other sources (including the military rolls of 1565 and 1567, inventories, the Vokod Reform, the inspections of 1570 and 1576). The independence and herein unique separateness of a settlement was based on: a) the spatial separateness of the buildings constituting the settlement's centre, b) possessing its own name, c) the division in relation to usage on the part of the inhabitants of the territory from the environs adjacent to the settlement.⁹

The degree of separateness for individual settlements differed. A part of them formed, and here particularly in the Mazovia-Podlasie border areas, where nobility properties appeared in fragmented forms (particularly across the border region between the Narew and the Bug Rivers), the so-called 'nobility environs (holdings)', known in the subject literature as equally as environs, nobility nests, minor nobility settlements (more rarely: serfless gentry) or petty gentry holdings.¹⁰ These were settlements that came about in the course of property divisions of ducal or royal estates in favour of the nobility. As a rule these settlement retained the first joint element of the name derived from the name of the initial settlement, to which with time were added partial names derived on the whole from the first names or appellations of the owners of the particular lots.¹¹ Depending on factors such as the magnitude of the initial bequeath, the degree of issue of the owner's family and their fates, natural disasters and war destruction, the environs evolved constantly for the whole of the modern era. Some of these were small, three- or four-village strong, while others comprised a dozen or more settlements, like for instance Falki and Tybory (10 settlements each), Jabłoń, Roszki and Wojny

⁸ For example: I. Halicka, *Nazwy miejscowe środkowej i zachodniej Białostoczczyzny: dzierżawcze, patronimiczne i rodzinne*, Warsaw 1976, p. 15: Abramowięta "the present-day no longer existing part of the village of Truskolasy", p. 106: "the Łapy-Rechy part of the village of Łapy-Szołajdy"; Kondratiuk, p. 134: "the Niemyje-Wity part of the village of Niemyje-Siudy" (present-day Niemyje Nowe).

⁹ Cf. H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7.

¹⁰ A phenomenon present not merely on the terrain here mentioned, see J. Karczewska, *Rozmieszczenie wsi zagrodowych i drobnoszlacheckich w powiecie gnieźnieńskim na przełomie XV i XVI wieku*, „Klio – Czasopismo Poświęcone Dziejom Polski i Powszechnym”, vol. 29, 2014, no. 2, pp. 19–40.

¹¹ "When as a result of a partial reselling or division of a district amongst siblings, new settlements and hamlets, all of which had a single common surname, while the second component was usually taken from the name of the founder or from the new owner. Hence arose the double and triple and sometimes four-times names that today almost every village held by the patril nobility in Mazovia and Podlasie has. On greater districts as a rule several or even a dozen or so separate villages would be founded" Z. Gloger, *Dawna ziemia bielska i jej cząstkowa szlachta*, Warsaw 1873, p. 6. In a later part of the work mentioned will be the villages of nobility in possession of small holdings with division for the territory of the Łomża and Grodno governorate as well as the author's conclusion: "If we are to take up the premise that every village or district that takes its name from the surname of some nobility family therein resident, or that has taken its name from a great family residing in it and here for centuries, then we would have to correctly consider them as the family seats of separate nobility lines, and on this premise we would have in the Bielsk land two hundred and several dozen odd" (ibidem, p. 10). A. Jabłonowski drew up a list of 15 nobility manors within the Drohiczyń land in 1580 as well as 22 for the Bielsk land in 1528, see Podlasie III, p. 56. A. Laszuk for the second half of the seventeenth century has marked out for the Drohiczyń land 34 nobility village districts, while claiming only the existence of one for the Mielnik land, while in the Bielsk land she noted 37 districts inhabited by nest nobility (*szlachta gniazdowa*), see Laszuk, *Zaścianki*, pp. 91–92; cf. equally: eadem *Ludność województwa podlaskiego w drugiej połowie XVII wieku*, Warsaw 1999, pp. 60–61, 76. A list of nobility manor districts to be found in Podlasie in the second half of the sixteenth century is located at the end of this text in the Appendix.

(11 each), Długa Dąbrowa (14 settlements), or Łapy (20 settlements).¹² Petty gentry villages formed on the basis of a royal or ducal grant, possessing a joint common name and external boundaries were very often not divided off from each other and had mixed fields.¹³ The first donations (generally fifteenth-century) turned into increasingly smaller and smaller lots as a result of multi-generational divisions and inheritance. Purchase, sale or exchange transactions of land were operations that impacted on the creation of new villages.¹⁴ The names of settlements appearing in the sources could relate to both separate locations as equally their dependent parts (for example the names of petty gentry holdings, individual manors, or voloks). Often the sources provide the owners without giving the name of the village. In instances where the name of the village is identical with the family name this causes little doubt, however the sources mention many names of petty gentry villages together and it is not clear if the notation refers to a single village of several names or to several separate settlements of the same name.¹⁵

The main source for compiling the present map of the Podlasie Voivodeship, the tax registers, caused many difficulties in the reconstruction of the Podlasie environs. This was connected, among other things, with the incorporation of Podlasie to the Crown in 1569 and the consequent lack of experience with the tax registers and registration of field tax (lan taxation) according to the Crown model (scheme). Analysis of the taxation registers shows that in the collection of taxes and registers creation, earlier models were employed, for example registration for the needs of military rolls.¹⁶ This took place particularly in the case of the names of payees – extremely rarely is the surname given; most often it is the name of the father that is given, less often some other appellation. In such a way those noted down are those who would have registered for military rolls at the time when the Podlasie Voivodeship belonged to the Grand Duchy of Lithuania. One may also conjecture that practical considerations meant, given that anyone actually conducting such a register would have known that, for example, the heirs in Łapy are Łapińscy, in Kosów – Kosowcy, in Krasów – Krasowscy, that in Kulesze they were Kulesze or in Wojny they were Wojno, in Wróble – Wróblewscy, while in Wyczółki they were Wyczółkowscy, that only the ‘new’ owners of given settlements were noted down in the registers. This has made it difficult and in many cases completely impossible to identify individuals even though they were mentioned several times in various registers, inventories or military rolls of loyalty to the Crown drawn up in 1569. Equally given the significant degree by which collective money payments of a single payee was made in the name of several (or several dozen?) plot owners from a given village (in-payments with cup-holders (*cześnik*): co-owners or co-users), and that we do not know in fact how many of these lots there were – the reconstruction of ownership relations within the scope of a single settlement, and sometimes an entire district, is simply an impossibility given the source materials available. This settlement situation often being complicated by the fact that particular parts of a village were given their own names, even though topographically this was a single settlement constituting the property of a single large family. The length of time associated with the aforementioned divisions often

¹² Z. Gloger, *Dawna ziemia bielska*, pp. 9–10 quotes data from the Bielsk land hearth tax for the year 1775 and draws attention to, among others, Popławy numbering 74 cottages, owners 72 as well as at the smallest village at that time of Rzepniewo Małe with but a solitary house (hearth).

¹³ See J. Wiśniewski, *Rozwój osadnictwa na pograniczu polsko-rusko-litewskim od końca XIV do połowy XVII wieku*, „Acta Baltico-Slavica”, vol. 1, 1964, pp. 118–120; H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, footnote 1, in this edition III.3.1.7; idem, *Metoda retrogresji*, p. 150; cf. also: S. Russocki, *Elementy wspólnoty w okolicach drobnoszlacheckich Mazowsza (XV–XIX w.)*, „Zeszyty Naukowe Filii UW w Białymstoku”, no. 19, Humanistyka, vol. 4, Dział H – Prace historyczne, 1977, pp. 175–199 as well as idem: J. ¹⁵ See J. Wiśniewski, *Rozwój osadnictwa*, p. 119, where the example is of the characteristic reading from the tax register of 1580; cf. S. Rosłonec, *Samorzutne scalanie gruntów wśród mazowieckiej i podlaskiej szlachty zagrodowej*, Warsaw 1928, pp. 106–108 (Chapter XI: *Nazwy gruntów drobnoszlacheckich*).

¹⁶ We are not in possession of the silver tax registers and we do not know the extent to which the experience of raising this tax impacted on the act of collecting land taxation. The taxation registers from Podlasie prior to 1569 that were taken to the Lithuanian treasury in Wilno have also not survived.

resulted in parts of a village being considered even separate settlements. The difficulties resulting from the identification of particular settlements is also enhanced by the changes in names or their alternate use in sources. This occurred not only in the second half of the sixteenth century but was also noted in the seventeenth and eighteenth centuries.¹⁷

Being directed by the principles adopted in the AHP series, we have adopted as a rule the possibility 'in order not to be guilty of missing an actual existing settlement the risk has been run of recognising a part of a village to be separate settlement in itself.'¹⁸ In the majority of cases this has resulted in any doubts being decided to the advantage of the independence of a given settlement; with this being even more the case given that the majority of them retained their separateness to the end of the nineteenth century and often even to our day. Help came in the form of academic works based on archive research into Podlasie municipal and land registers.

We have recognised as being nobility holdings (noble-held neighbourhoods) a minimum of three settlements covered by a double-barrelled name – a common denomination as well as a distinguishing complement. Additionally we have also applied a spatial criterion – settlements forming a holding had to be situated on a fairly dense area. In applying these criteria we have determined for the second half of the sixteenth century 82 noble holdings. In the Bielsk land we have noted 39 of the said, in the Drohiczyn land 42 and one nobility holding in the Mielnik land.

In the Drohiczyn land we have recognised the existence of holdings in the case of Wierzbie: Wierzbie Górne (Wierzbie-Żerebczyce) located around 8.5 km to the south-east of the village of Wierzbie-Strupki and around 8 km from the village of Wierzbie-Guzy. While on the terrain between these (i.e., between Wierzbie Górne and Wierzbie-Strupki as well as Wierzbie-Guzy) there was to be found the lands of other villages including: Kamianka (Kamianka Ruska), Żółkwy, Kanabród (Kamionobród), Mołomotki-Folwark (at present a part of the village of Mołomotki-Dwór, in the sixteenth century Momotki). The application of the aforementioned spatial criterion has resulted in the allocation of two holdings of the name Moczydły as well as two others of the name Miodusy; these have been symbolically labelled as A and B, for they lay at a certain distance from each other, while the settlements forming the holding belonged to different parishes. We have not taken into consideration in the statistical data and the tabular lists the holdings of Poniaty mentioned in 1547 (Poniaty-Kosiorki, Poniaty-Krzepisie, Poniaty-Starawieś and Poniaty-Zagaje), although one may conjecture that the settlements comprising the recalled area had already been in existence in the 1550s (and maybe even 1560s?);¹⁹ but these have been collated in the Appendix.

From amongst the 895 settlements in the Bielsk lands 216 settlements (24.1%) constituted the aforementioned nobility holdings. In the Drohiczyn land out of 651 settlements, 188 (28.8% of all the settlements from the given lands) entered into such a composition. Only in the Mielnik land was the percentage of the settlements comprising a part of holdings small, a mere three settlements out of 129 (2.3%). On the scale of the Podlasie Voivodeship as a whole for the period under discussion

¹⁷ For example: HerKM, p. 243: *de Łapy Lynki seu Kosmytki* (1577 r.), *ibidem*, p. 101: *in Franki Chrościele seu Dąbrowa* (1600), or later mentions (1695), *ibidem*, p. 450: *sorte suam dictam Jasiewiczna seu omnia bona in Kapice Lipniki sita donant*; Kondratiuk (quoted from: „Archiwalne materiały własne Prof. dra J. Wiśniewskiego”), p. 87: *Kłopoty seu Bańki* (1551 r.); LWP 1602, p. 11: *Sioło Przymulki albo Sowniki*, *ibidem*, p. 61: *Supraśla alias Lence*, *ibidem*, p. 64: *Sioło Młodzianowo alias Stryki*, *ibidem*, p. 65: *Sioło Koszczino alias Szastały*. Sometimes information coming from the seventeenth century, and even the eighteenth century, has enabled settlement identification, for example the poll tax register for 1676, see BCzart., Zbiór Łoyki, MS 1099 IV, p. 767 (f. 378): *Dzierzki Marcinowięta seu Ząbki*, p. 773 (f. 381): *Truskolas Niwisko videatur Kruszewo Brodowo et Głąby*, p. 775 (f. 382): *Perki Mazowsze seu Xiki, Perki Stara Wieś seu Lachy*, *ibidem*, p. 778 (f. 383v): *villa Rymki seu Dupki*, *ibidem*, p. 782 (f. 385v): *Borowskie Nowa seu Wypychy*; Kondratiuk (quoted after: „Taryfa dymów i podatku podymnego z dóbr ziemskich w woj. podlaskim ziemi bielskiej leżących - - z nowej lustracji roku 1790 - - ”), p. 98: *Falki Nowosady czyli Kowale*, p. 103: *Wyszki Krupice czyli Tworki*; F. Łoyko, *Małopolska. Alfabetyczny zbiór wsiów: Alphabetica enumeratio omnium villarum Maioris Poloniae. Indicuntur districtus et parochia cuiusvis villae, necnon an in regia, ecclesiae aut nobilitatis consistit proprietate*, XVIII w., Bibl. Czart., Zbiór Łoyki, MS 1112, p. 454: *Czapple seu Skrzyszewo, Chrome seu Remiszew Wielki, Czarna alias Milewskie, Chroczewice alias Długie Hozanki*, p. 458: *Dasze vel Dajzewicze alias Kossna*, p. 462: *Grabowiec alias Obychodnik*, p. 470: *Kozanki alias Martynowice, Kozanki drugie alias Chroczewice*, p. 475: *Nurzec alias Czeremcha*, p. 479: *Padarewo seu Kopow*, p. 500: *Zarywiec alias Dubicze*.

¹⁸ H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7.

¹⁹ In 1547 noted were (ADS, sign. D 45, f. 453): “Poniaty Kosiorki, Krzepysie, Starawieś, Zagayne, mansos 40, pro 20 taxant.”

407 settlements (24.3% of all settlements) should be considered units comprising nobility holdings. A detailed representation is presented in Table 1. While a detailed list of nobility holdings may be found in the Appendix.

Table 1. The number of settlements in nobility environs in Podlasie in the second half of the sixteenth century

land	number of nobility holdings	number of settlements entering into the composition of nobility holdings	total number of settlements	as a percentage (%)
Bielsk	39	216	895	24.1
Drohiczyn	42	188	651	28.8
Mielnik	1	3	129	2.3
Podlasie	82	407	1,675	24.3

The localisation of demesne and mill settlements has not incurred notable localisation problems.²⁰ Sixteenth-century mills were normally denominated by means of the owner's surname, which at the beginning of the seventeenth century became the name of the mill or mill settlement;²¹ in such situations we have entered a point on the main map. Krupki Mill we have marked in the place of the contemporary name for the forest *Krupki*,²² on the right bank of the River Panasówka, around 1 km from it joining the River Bronka; the Niestrowicz mill has been marked by us on the basis of von Stein's map, at the place called *Nelchi od: Kunitzki*.²³

In the Mielnik land we have not managed to localise the Chmielów demesne settlement (the environs of Chotycze); in turn in the Bielsk land it has not been possible to locate three mill settlements: Markolewski (parish Dolistowo), Suskowski (the environs of Boćki) as well as Wyzonki-Cicholas (the environs of the village of Mień). Despite the information from 1602, and in accordance with the lack of mentions from an earlier period, and in accordance with the principles employed in the AHP series, we have not marked on the map the mills at Jeleń and Wodziłówka, although it is likely that they functioned prior to the year 1600.²⁴

In Podlasie, in the second half of the sixteenth century, we have confirmed the existence of two smithy settlements as separate settlement units – Ruda and Turowczyzna; both were situated in the Bielsk land. The localisation of Ruda was connected with the present-day name of the *Rudnik* forest, approximately 1.5 km to the south of the village of Czechowizna, and around 530 m from the Nereśl River.²⁵ The unlocated Turowczyzna was to be found in the environs of the village of Klejniki (Zygmuntowo)²⁶ – possibly between Klejniki and the River Łoknica. We have not found any source confirmation as to the existence of independent (with their own name) abbeys, inns, glass works or mines in Podlasie for the period of interest to us. In accordance with the premises within the AHP series itself we have also not marked on the main map empty villages (*pustka*, i.e., deserted settlements).

²⁰ See M. Gochna, *Character of settlements*, [in:] AHP Podlasie, in this edition III.3.2a.8.

²¹ See P. Złotkowski, *Nazwy młynów i osad młyńskich dawnego starostwa brańskiego*, „Studia Wschodniosłowiańskie”, vol. 16, 2016, pp. 345–364; cf. T. Gołębiowska, *Nazwy polskich młynów*, „Onomastica”, vol. 14, 1969, no. 1–2, pp. 81–120; J. Wiśniewski, *Nazwy młynów w Polsce*, KHKM, vol. 18, 1970, no. 3, pp. 449–455.

²³ See P. Złotkowski, *Nazwy młynów*, pp. 350, 358; Nelchy is visible on Perthées' map between the Nurzec River and the settlement of Pace.

²⁴ LWP 1602, p. 11: “The hamlet Czechowczyzna [...] The second mill is in the name Jeleń [...] The third mill is in the name Wodziłówka [...]”. These do not appear in the inspections for the Podlasie Voivodeship for the years 1570 and 1576, see LWP 1570, 1576, p. 74.

²⁵ PRNG no. 118091; the inventory for the Knyszyn starosty of 1561 noted that: “Ruda [...] now pays nothing, for it is deserted through want”, Chomętowski, *Materiały*, p. 265.

²⁶ LWP 1570, 1576, p. 61: “In the Zygmuntów starosty [...] At Thurowczyzna ore and a flour mill, and there was fulling mill [...] Now upon our ruling there is no ore and no land for you to extract ore from, and equally wood or charcoal and presumably the land would have been subtracted which previously had belonged to the ore and there is no more to be paid from this ore one for 4 Lithuanian *kopas*”. The blacksmiths and forge workers who functioned within these places have been mentioned in M. Gochna, *Character of settlements*, [in:] AHP Podlasie, in this edition III.3.2a.8.

Only in the Bielsk land is there source confirmation for the royal deserted settlement of Zaprudzie of an unknown location.²⁷ This has not been taken into consideration in either the statistical data or the tabular lists.

The specific feature of Podlasie was the founding of settlements on the bases of towns. Although spatially they constituted separate settlement entities, they were legally parts of these towns.²⁸ On the main map they have been presented on the whole as villages being town property to differentiate them from the remaining villages of the starosty (then royal property) that did not constitute a part of a town.²⁹ In turn the directly encircling suburbs, that is the areas directly adjacent to a town (with their own name or not) have been represented on the maps of selected towns (Bielsk, Drohiczyn, Mielnik, Węgrów) as well as described in the commentaries to them.³⁰

As with previous volumes of the AHP series we have adopted the approach that “a settlement confirmed in the first half of the sixteenth century or even in the fifteenth century as well as later in the seventeenth century existed in the period presented on our map.”³¹ In the present volume thus taken into consideration (in the List of settlements, the commentaries or the statistical compilations) are settlements such as: Długie-Wola Kamionka (1567, 1726),³² Głęboćzek (1491, 1579, 1673, 1726),³³ Juchnowiec Górny and Juchnowiec Dolny (1536, 1540, 1676),³⁴

²⁷ LWP 1570, 1576, p. 75: “To the starosty and hamlets of the Boguszewo demesne belong [...] Zaprudzie Siolo [hamlet], 1 volok and that deserted”; LWP 1602, p. 30: “Siolo Zaprudzie in this hamlet was once a single volok, but now they know not of this volok, nor do they use it.” The *pustka* (deserted settlement) of Nowikowski appears in the sources as terrain, see LWP 1570, 1576, p. 139: “There is also the Nowykowski terrain empty, whose nobility the king’s nobility Sorczów defend, changing their ownership of it” ASK XLVI 149, ff. 121–121v: “There is also the Nowykowski terrain, but it lies fallow and none can find profit from it” (1616).

²⁸ See K. Boroda, *Ownership affiliation of settlements*, [in:] AHP Podlasie, in this edition III.3.3.8.

²⁹ See M. Gochna, *Character of settlements*, [in:] AHP Podlasie, in this edition III.3.2a.8; there also a list of the castles that functioned in Podlasie in the second half of the sixteenth century.

³² Popis 1567, f. 1023: „Долгая Воля Каменка”; Synod 1726: „Kámienskie”.

³³ Podlasie II, p. 216: “In Granne – founded [a church – J.S.] 1491 by Misek the heir at Sielec and Krzemień and his son Jan Miskowicz the (Lithuanian Grand Master of the Hunt has five voloks at Głęboćzek, a spot (haunt) at Łazy, etc”; Głęboćzek appears in 1579 in the privileges of the Podlasie voivode Mikołaj Kiszka confirming the endowment of the church at Granne (entered into the Drohiczyn land ledger) – information supplied by Dr Tomasz Jaszczolt; 1673 see Laszuk, *Zaścianki*, p. 105; Synod 1726: „Głębock”.

³⁴ In October 1536 the Great Chancellor of Lithuania Olbracht Gasztołd (together with his son Stanisław, the Nowogród voivode) bequeathed his property to his wife Zofia, including: “*manor Juchnowski, manor Juchnowski Huy called*”, see *Lietuvos Metrika, Knyga nr 1 (1380–1584), Užrašymų knyga 1*, edition A. Baliulis, R. Firkovičius, Vilnius 1998, nos. 94, 95; 1540: “*Juchnowiec Stare Siolo*”, “*Juchnowski Dwór*”, see Kondratiuk (quoted after „Archiwalne materiały własne Prof. dra J. Wiśniewskiego”), p. 78; cf. J. Maroszek, *Pięć wieków Ziemi Juchnowieckiej*, Juchnowiec Kościelny 2013, pp. 239–248; 1676: *Juchnowiec Góra, Juchnowiec Stary*, see BCzart., *Zbór Łoyki*, MS 1099 IV, p. 788 (f. 388v).

Juchnowszczyzna (1567, 1744),³⁵ Łapy-Żaki (1528, 1726),³⁶ or Piszczaty-Tusiki (1528, 1634, 1635, 1726).³⁷

We have not marked on the main map those settlements denoted in sources only in the first half of the sixteenth century for which – given the current state of research – we do not have source references post 1550. Often solitary pieces of information have made it impossible to locate individual settlements and here even approximately.

In 1528 mentioned were (situated within the Bielsk land) Łapy-Kwity,³⁸ Niwino-Janowięta³⁹ and Szepietowo-Mikołajowięta,⁴⁰ about which we possess no later source records. A similar situation was to be found in the Drohiczyń land, where for the 1530s we have source notations for the settlements of Mikołajewo (presumably the Miedzna parish) from 1534,⁴¹ as well as of Nosale and Suchowierchy (both most likely in the parish of Rudka), and noted in the year 1538.⁴² The cadastre conducted in 1547 of military duties for the nobility of the Drohiczyń land⁴³ enumerates 25 settlements which – given the current state of research – are not testified for in other sources post this date,⁴⁴ and therefore given the criteria adopted for the AHP series they have not been included within the statistics and listings. Some

³⁵ Popis 1567, f. 463: „Мѣсяца октебра 17 дня. Пань Станиславъ Влошекъ [...] з ымѣней своихъ – зъ Юхновщины въ повѣте Белскомъ а зъ Ростонянь въ повѣте Виленскомъ ставиль почту татарь и хрестьянь коней чотырнадцать збройне”; J. Maroszek, *Pięć wieków Ziemi Juchnowieckiej*, p. 254 gives the information that: “For the first time Juchnowszczyzna as an independent entity of settlement is mentioned in the Juchnowiec (parish locality list) of 1744”, see *Synodus Dioecesisana Vilmensis Ab [...] D. Michaele Joanne Zienkovicz [...] Episcopo Vilmensi [...] Anno D[omi]ni MDCCXLIV [...]*, Vilnae, p. 148.

³⁶ Popis 1528, p. 125: „Село Лапы Жакове Земане Марько Рожко самъ. Марько Сасинъ самъ. Матей Закревський самъ.”, cf. Podlasie I, p. 199; Synod 1726: „Łapy Ziaki”. See also Laszuk, Łapy, p. 23, tab. 1: Wsie Łapy w XVI–XVIII w.; Lubicz-Łapiński, p. 27 as well as map 4: *Podział wsi Łapy około 1528 r.*, p. 51, on p. 143, footnote 15, informs that for the hamlet of Sioło Łapy Żakowe the landed nobility “mean Łapy Zięciuki”; one of the possible locations for the placing of Łapy-Żaki is between Łapy-Bursięta and Łapy-Kosmytki; I. Halicka, *Nazwy miejscowe*, p. 106.

³⁷ Popis 1528, p. 133: Село Пищаты Тосики Земане Матей Щепановичъ самъ. Михаль Щепановичъ самъ. Янь Томьковичъ самъ. Павелъ Томьковичъ самъ. Петръ Щепановичъ самъ. Щепановаа вдова самъ. С тихъ всехъ 2 кони.”, cf. Podlasie I, p. 207; APB, księga grodzka brańska 1640 r., f. 16 (taxation register for the Bielsk land for the year 1634): „Piszczaty Tuszyki”; ibidem, f. 35 (taxation register for the Bielsk land for the year 1635): „Piszczaty Tuszyki”; Synod 1726: „Piszczaty tuški”.

³⁸ Popis 1528, p. 124: „Село Лапы Квиты Земане Матых Якубовичъ самъ. Якубъ Яновичъ Воеводичъ самъ. Томько Яновичъ самъ. Станиславъ Яновичъ самъ. С тихъ Лапъ кон.”; cf. Podlasie I, p. 199; see I. Halicka, *Nazwy miejscowe*, p. 106. One of the interpretations for a possible approximated localisation reads “The Ruthenian notation Kwity may be translated as *K Wity*, that is in the environs of Wity or in the direction of Wity”, Lubicz-Łapiński, p. 39, footnote 27; cf. also map 4: *Podział wsi Łapy około 1528 r.*, where marked is “K Wity” between Wity and Rechy, ibidem, p. 27. Elsewhere the information that “the hamlet of Łapy Kwity” is “the latter-day Łapy Wity and Barwiki”, ibidem, p. 142 as well as footnote 7.

³⁹ Popis 1528, p. 113: „Село Нивино Яновята земляне Шчепанъ Яновичъ самъ. Аньдреевая Вдова самъ. Янь Томьковичъ самъ. Бернатъ Томьковичъ самъ. Щасный Томьковичъ самъ. Томьковая Вдова самъ. С тихъ 2 кони”; cf. Podlasie I, p. 188.

⁴⁰ Popis 1528, p. 142: „Село Шепетово Миколаевата Земане Серафинъ Петровичъ. Венцьлавъ Яновичъ сам. Шчепанъ Яновичъ сам. Павелъ Якубовичъ сам. Янь Жакъ сам. Марко Станиславовичъ сам. Петръ ЯкѠбовичъ сам. Аньдrei Станиславовичъ сам. С тихъ всехъ 3 кони. Село Шепетово Миколаевата Земане Миколаи Миколаевичъ самъ. Янь Миколаевичъ сам. Якубъ Миколаевичъ сам. С тихъ конь”; cf. Podlasie I, p. 216.

⁴¹ In 1534 Jan the son of Mikołaj Wodyński bequeathed to his wife Małgorzata, the daughter of Jan Radzanowski, a dowry in properties: “Stara Vola, Tchórzowa, Miedzna, Kozołupy, Ugoszcza, Rostky, **Mikołajewo** [bold J.S.], Pogorzal, Krześlino, Kownaciska, Borki, Suchożebry, Naykory, Rzeszotkowo, Brzozowo, Lyssowo et Vola Lysowska”, copy of Dr. T. Jaszczółt from the excerpts of Father Zygmunt Dunin-Kozicki, The Scientific Library of the PAAS and the PAS in Cracow (Biblioteka Naukowa PAU i PAN w Krakowie), MS 8822, issue 2, p. 117. In 1561 Mikołaj Wodyński (the son of Jan) bequeathed a dowry to his wife Katarzyna Kosińska and enumerated at the time were: “oppidum Międzylesie cum castro, Orzeszowka, Stara Wola, Wolka, Tchorzowa, Miedzna, Kozołupy, Ugoszcza, Rostki, Wrotnowo, Kielczewo”, AGAD, Drohicke ziemskie, no. 3, f. 326 (information derived from Dr. T. Jaszczółt).

⁴² In 1538 Zofia Hlebowiczowa gave the estate at Rudka to her son-in-law Maciej Kłoczka, including *Nossale* and *Suchowierchy* (LMAVB, f. 1-139); their absence in a latter division of the estate and here between Mikołaj Hlebowicz and Stanisław Połowski in 1553 (NGAB, Mińsk, f. 1715-1-84) as well as the gifting of the estate at Rudka by Maryna Mścislawska Kiskowa to the Mostów and Skidel starost Jan Wiktorzyn in 1562 (RGADA, f. 356-2-6, f. 304, information derived from Dr. T. Jaszczółt).

⁴³ See K. Boroda, *Written sources*, [in:] AHP Podlasie, in this edition II.1.8; ADS, sign. D 45, ff. 452–457v.: “Commensurationis bonorum villarum in Terra Drohiciensi sitarum et Tariffae ingrossatio Acta Commissorialia Dimensurationis Fundorum Terrestrium ex Commissione Sacrae Regiae Majestatis factas in se continentem.”

⁴⁴ These are: Biernaty, Boguszki, Dąbrowa Biernatowięta, Dąbrowa Serafinowięta, Dąbrowa Tymianka, Dębowe, Jabłona Świdry, Kamianki, Kęsza, Miłkowice Najewnik, Miodusy Szymanowięta, Piotrowice, Poniaty Krzepysie, Poniaty Starawieś, Rytele Adamowięta, Rytele Dominikowięta, Rytele Zapalkowięta, Rzewuski Smyczki, Sasiny, Świnopasy, Tarkowo Średnie, Trębice Wąchały, Winna Piętki, Wólka, Wólka Borychowska.

of these, for example Dąbrowa Biernatowięta, Dąbrowa Serafinowięta, Dąbrowa Tymianka, Miodusy Szymanowięta, Poniaty Krzepysie, Poniaty Starawieś, Rytele Adamowięta, Rytele Dominikowięta, Rytele Zapalkowięta, Rzewuski Smyczki, Winna Piętki – presumably entered into the composition of particular districts and which over a given time became a part of them.

We have not marked on the main map the contemporary village of Jasionowo Dębowskie and the nearby settlement of Kopytkowo. The first source references for these settlements are from the inspection of 1602,⁴⁵ and though it is possible that they were already in existence at the end of the sixteenth century the already mentioned premises guiding the compilation of the AHP series cover only places that have a proven source record up until the year 1600. Equally missing from the main map is the settlement of Bujakowszczyzna, which only appears in documents for the first time in 1604 as “an agricultural volok of the backwater one volok or zaścianek of *Buiakowszczyzna*.”⁴⁶

Having presented the main principles accompanying the localisation of settlements in the AHP series we move to a detailed description of selected examples. We commence with a description of certain localisations for lost settlements and those of a changed location, later for approximated locations, tied ones, finishing up with unlocated settlements.

The certain localisation of settlements at present non-existent is based first and foremost on cartographic sources from the nineteenth and twentieth century. We commence our description of these types of example from the Bielsk land.

Visible on Perthées’ map (*Bohmole*), on the road between the villages of Pietkowo and Osówka, the village of Bohomole was incorrectly marked on the left bank of the River Liza. On the main map its localisation has been marked on the basis of von Stein’s map, on which this time *Bohomete* is presented on the right bank of the River Liza, on the aforementioned road at the junction with the road running towards the Kalisz mill, located around 1.1 km to the north of the crossroads. This settlement now presented as *Pohornele*, is visible on Textor’s map as well as the map by Chrzanowski (the survey of the terrain presented on the Quartermaster’s Map finished on the left bank of the River Liza). This village does not appear in later cartographic material: on the one, two, and three-verst scale maps, KdWR as well as the maps produced by WIG, there appears a vacant field in place of Bohomole. We have marked the village at the road described, at the crossroads with the road heading in the direction of the forester’s lodge at Pietkowo and the Ostrów colony, about 1.3 km to the south-east of the village of Pietkowo Drugie and approximately 600 m to the north of the forest called *Piaszczany Bród*.⁴⁷

The village of Chmiele (to the west of Rajgród) was located on the basis of the Quartermaster’s map, where visible is *Fol. Chmiele*. We do not know whether this appeared on von Stein’s map, for the section on which Chmiele should have been placed has a small defect – for the top right-hand corner has been ripped off. In this very place is to be found terrain between the settlements of Karwowo – Skrodzkie – Przestrzele. The settlement of Chmiele does not appear on Textor’s map. On the two-verst scale map, to the north-east of Karwów, can be seen the abbreviation (without a name) ДВ. The village of Chmiele is visible on the *Szkice terenowe przemarszu wojsk szwedzkich* of 1655.⁴⁸

Duchny has been marked on the basis of von Stein’s map, in the place where at present there is to be found a piece of forest of the self same name.⁴⁹ It can also be seen on the Quartermaster’s map as well as that of Chrzanowski map; it is absent in later cartographic accounts.

⁴⁵ LWP 1602, p. 61: “There is to this *osocznicтво* (an area or village inhabited by animal hunters who take part in circling animals or guarding the forest) a rangers commune in Zabieli four voloks, at Jesionowka 2½ voloks, in Kopytków 8 voloks. They pay a money rent for each volok of 5 złoty, making for 72/15 złoty”.

⁴⁶ Kondratiuk, p. 37.

⁴⁷ PRNG no. 99845.

⁴⁸ See *Szkice terenowe przemarszu wojsk szwedzkich, 1655*, [in:] K. Łopatecki, W. Walczak, *Mapy i plany Rzeczypospolitej XVII w. znajdujące się w archiwach w Sztokholmie*, vol. 1, Warsaw 2011, pp. 268–269: *Szkic terenowy miejscowości Augustów – Rajgród, 13 (23) listopada 1655*. Chmiele was mentioned in the description of the Rajgród parish of 1784 r. (the descriptions constituting the basis of Perthées’s maps): “The Chmiele of Squire Purzycki, between the summer setting and the south a great mile,” *Rękopiśmienne opisy parafii litewskich z 1784 roku: dekanat knyszynski i dekanat augustowski*, ed. W. Wernerowa, Warsaw 1996, p. 201 (an earlier edition: W. Wernerowa, *Opisy parafii dekanatu augustowskiego z roku 1784*, SP, vol. 4, 1993, p. 213). “Chmiele was placed between Przestrzele and Karwów amongst the minor nobility’s manor villages,” J. Wiśniewski, *Dzieje osadnictwa w powiecie grajewskim do połowy XVI w.*, [in:] *Studia i materiały do dziejów powiatu grajewskiego*, vol. 1, ed. M. Gnatowski, H. Majecki, Warsaw 1975, p. 229.

⁴⁹ PRNG, no. 26812.

Gołacie-Wola was marked on the basis of subject literature findings. It appears in sources from the second half of the sixteenth century as: Wola, Wolica Klepacka.⁵⁰ It was located approximately 2 km to the east of the village of Gołasze-Puszcza, in the place where at present can be found *Wola*, a hamlet of the village Gołasze-Puszcza. Finally the findings of Emil Kalinowski identify Gołacie-Wola with Wola Klepacka.⁵¹

We have marked sixteenth-century Joški around 950 m to the south-east of the present-day centre of the village Joški (Joški Centralne) at the place called Joški Wschodnie.⁵² Such a location results from the nineteenth-century cartographic picture: on von Stein's map to the west of Hodyszew, on the eastern bank of the Liza (the name of the river according to Textor's map and that of the Quartermaster's) it is marked as *Hof Hodischewo*, the Quartermaster's shows *Jaski* situated at the aforementioned river. Here on the one-verst scale map can be seen buildings described as Буды-Лендово, on the two-verst scale map this is noted as Къ Юзькамъ, while on the KdWR *zu Józki*. A settlement point was placed at the crossroads at Joški Wschodne, about 470 m to the east of the contemporary small irrigation ditch linking the River Markówka to the Liza.

The village of Koćmiery has been marked according to von Stein's map, in the place where *Kuczemery* can be seen, on the right bank of the River Tłoczewka. In this place, that is between the villages of Jabłoń-Jankowce and Jabłoń-Piotrowce, it was marked on the map by Perthées (*Kocmiery*), Textor (*Kuczemery*) as well as on the Quartermaster's map (as *J[abłon] Koczemery*). The last time Koćmiery appeared marked on a map was by Chrzanowski map (*Koćmery*); it is absent from all later cartographic representations.

Kościany was marked on the basis of von Stein's map; it is visible equally on the Quartermaster's map as that of Chrzanowski map. In the place where Kościany should be situated the two-verst scale map presents merely a field. The contemporary name for a part of the *Kościany* forest is to be found approximately 980 metres to the south of the village as marked by us on the main map.⁵³ The settlement of Kościany is located on our map around 800 metres to the north-west of *Kościańska Góra*.⁵⁴

It follows to devote a few words to the village of Kośna. Instead of a single symbol for the said settlement of a mixed property character (town and noble) it has been marked on the main map with two separate points: Kośna szlachecka (*nobility*) (the property of the Sapieha family) as well as Kośna town charter founded on grounds belonging to the town of Kleszczele. Sapieha Kośna has been marked in the place of the contemporary colony of Kośna (St. Nicholas Orthodox church)⁵⁵ and which presumably covered the terrain of the present-day village of Żuki.⁵⁶ The settlement point for town Kośna was where the present-day village of Dasze is located.⁵⁷ The actual distance in terrain of both

⁵⁶ "The bequeathing of voloks to this hamlet stretching from the Orthodox church of St. Paul by Sapieha the Nowogród voivod", Minsk NGAB, f. 1705, 1, 69, ff. 300v. Buczyło, *Kształtowanie się sieci*, p. 122, footnote 636; *ibidem*, p. 122: "A second Orthodox church under the patronage of the Sapieha family was founded on the territory of the Bielsk district at Kośna. Mention of the said appears in the Voloł reform register for Kleszczele for the year 1560. According to the information therein noted its founder (and funder) was the Nowogród voivode Paweł Sapieha. The village of Kośna was divided into two parts: one remained in the hands of the king, while the other became a private holding, hence the patron of St. Nicholas Orthodox church being P. Sapieha. The Orthodox church appears in the inventory as it was built on the border of the two parts (in the thinking of the founder it was to have acted as a parish church for the whole village)"; cf. also *Rejestr pomiarów włócznej Kleszczel*, p. 233; M. Roszczenko, *Kleszczele*, p. 55: "In turn the Sapieha family had even built in Kośna belonging after all to the suburban villages of the Kleszczele starosty, an Orthodox church for their serfs from the neighbouring settlements of Pohreby and Żuki, which was also used by the inhabitants of Kośna."

⁵⁷ *Rejestr pomiarów włócznej Kleszczel z roku 1560*, pp. 233–234: "The town hamlet at Kośna is of 42 voloks of good land [...] This hamlet straddles two lots on an average field. The street reaches with its one end the boundary of squire Paweł Sapieha the Nowogród voivode, and with the other towards the land boundary of Mr. Baka.[...] This field which runs on its side from squire Sapieha's Orthodox church, the Kośna brook, crosswise is distributed so that the Orthodox priest of this hamlet is employed (the hamlet of an Orthodox priest is supposed to be the same (it is to have the same size) with the hamlet of the town of Kleszczele) at the town of Kleszczele"; F. Łoyko, *Małopolska. Alfabetyczny zbiór wsiów*, p. 458: *Dasze vel Dajzewicze alias Kosna; Rewizya przez komornika Pelchowskiego pomiaru miasta JKMC I Kleszczel* of 1784 mentions: *Granica wsi Daszow czyli Kosney*, see M. Roszczenko, *Kleszczele*, p. 418.

of the mentioned settlements (the distance from Koźna – Dasze is around 1.5 km as the crow flies) has allowed for two points to be placed on the main map of the same name but of different property ownership characteristics.

The village of Kruhła – on maps until the 1920s with the same name – has been marked where present-day Pawlinów is located. Cartographic material from the eighteenth-nineteenth century shows it always situated on the right bank of the River Nurzec (Nurzek, Nurczyk), marked as *Kruhle* (Perthées), *Kruhle* (von Stein), *Krole* (Textor), *Króle* (Chrzanowski). On the two-verst scale map it appears next to the name *Крылное* a designation for the eastern part of the settlement – *Г.дв. Павлиново*. This state of affairs is also visible on the WIG map of 1922 – at the western part of the built-up area is visible the name *Kruchle*, while in the eastern – *Pawlinowo*. On the subsequent edition of the WIG map of 1937 the name *Kruchle* has already disappeared, and appears simply as *Pawlinowo Fw*.

Commentary is equally needed with respect to the settlement of Krukowszczyzna on the Brzozówka River.⁵⁸ The identification and localisation of this settlement has been hampered by the existence to this day of a village of an identical name located on the right bank of this river, to the south of Korycin. This second Krukowszczyzna is visible on all maps up until the end of the eighteenth century, but one can search in vain for the Podlasie village of interest to us.

In the inspection of 1576 mentioned among the villages belonging to the Krzywa demesne are Krzywa, Olszanka and Krukowszczyzna.⁵⁹ Then all these settlements were under the leasehold tenancy of Jan Lisowski, the royal chef. The publishers of the inspection state in the footnote that the Krukowszczyzna of interest to us disappeared, and direct us to two other sources. The first of these is the delimitation of the Kryńsk royal forest of 1559. The boundary of this forest runs for the section of interest to us along the Rivers Brzozówka and Czarna, which confirms the permanence of the border demarcated in 1358.⁶⁰ Mentioned on the River Brzozówka is the Krukowszczyzna mill, belonging to the abovementioned Lisowski.⁶¹ In turn, a source from 1561 is a review of the manor houses of the Knyszyn forest, where the Kruk mill is mentioned.⁶² Additionally the authors of the inspection edition of 1576 have noted that on the terrain of both this map and the map compiled by von Stein there is indeed to be found *Kruczek*, but that this is not a mill but a tavern (*Krug*). While a mill of that name was marked on Perthées's map.

The next mention of Krukowszczyzna we can find in the *recognitiones (rekognicjarz poborowy)* of the Bielsk land of 1581. At the time it was the “noble Ambroży Czarnacki, an administrator of a certain Mr. Piotr Komorowski who gave over the tax from the estates of his master from Krzywa voloks half seven per gr 30, from Olszanka from six settled voloks per gr 30, from Krukowizna from settled voloks 3 per gr 30, from a mill of two rental wheels per gr. 12, and from the fulling wheel gr 15. And from the unspecified smallholders eight six grosze a man. For which the rekognicja he gave sub sigillo.”⁶³ The acreage in all three villages is the very same as given in the inspection. From the data it results that more than likely between 1576 and 1581 it was given over for leasing. The property of Krzywa is not covered by the inspection of 1602, but in the inspection of 1616 it still remained under the leasehold of the Komorowski family (under Zygmunt and from 1603 Florian).⁶⁴ Additionally the village of Krukowszczyzna appears in the the poll tax registers of 1674 and 1676 when it became the property of Stanisław Niemiera, the Lublin cup bearer, and numbered, respectively – 9 and 20 persons.⁶⁵

The descriptions of the parishes commissioned for the needs of compiling the special maps of Karol Perthées in the parish of Korycin mention the village of Krukowszczyzna within the economy of Grodno.⁶⁶ In the description of one of the roads noted in addition is “the 3tio (third) road to Jasienowka

⁵⁸ The below fragment on Krukowszczyzna was prepared by M. Gochna.

⁶⁶ W. Wernerowa, *Opisy parafii dekanatu knyszynskiego z roku 1784*, SP, vol. 1, 1990, p. 168.

with the same the public Warsaw right of way, where situated is the parish church between the south and the winter west/sunset, through an open field one needs to go past a mill on the River Brzozowa named Kruczek (Kruczek mill owned by the wife of the chamberlain of Nur), where the boundary of the Korycin parish ends.”⁶⁷ In turn in the parish of Jasionówka appears the double notation *Kruczek*. It is described the first time as: “Kruczek where once the village and mill (the property of Kuczyński) and here according to folk tales and certain signs was half a mile great from the church to the summer east/sunrise” while in the second: “Kruczek mill and demesne farm (manor) of this squire half a quarter of a mile to the winter east/sunset.”⁶⁸

We know that the boundary within this territory was demarcated by the River Brzozówka. In the description of the parish of Korycin we may read: “The parish of Korycin is on the very border of Podlasie and it is separated from the Crown by the River Brzozowa, with all its villages and settlements falling within the economy of Grodno of His Majesty, as was earlier mentioned.”⁶⁹ Noted for the parish of Jasionówka is: “The Parish of Jesionowska with all its villages and settlements is situated in the Podlasie Voivodeship, in the Bielsk land, in the district of Brańsk, which touches on through the so-called River Kruczek [Brzozowa – M.G.] with the Grodno district to the summer east/sunrise.”⁷⁰

Taking the above remarks into consideration, we have located Krukowszczyzna on the left bank of the Brzozowa, at the height of the Lithuanian settlement of the same name (and thus in the way that the publishers of the aforementioned inspection marked it on the map that constituted an appendix to it). Presumably both of these villages came into being on grounds belonging to the owner of a mill designated in the sixteenth century as Kruk or Krukowszczyzna, with one belonging within the borders of the Polish Crown and the other the Grand Duchy of Lithuania. The Podlasie village had disappeared by the end of the eighteenth century, but the Lithuanian one survived. We have adopted for Krukowszczyzna, Krzywa and Olszanka royal ownership, although these settlements moved over to nobility ownership at the end of the sixteenth century.

The placing of three settlements located on the map in the territory of the Bielsk land requires a joint summary: these being Krzywa Wola and two settlements by the name of Krzywiatycze.⁷¹ In the sixteenth-century taxation registers and inspections for royal properties the name Krzywiatycze appears in relation to two settlements: a village comprising a part of the Bielsk starosty⁷² as well as the ranger (organising forest guardianship and hunting) settlements that comprised the make-up of Bielsk forestry.⁷³ The first of these has been identified by the publishers of the inspection of 1576 for the Podlasie Voivodeship as being the village of Krzywa known to us contemporarily, and lying approximately 2 km to the east of the entry of the River Krzywa to the River Orlanka. This identification in the light of the notations contained in the inspection of 1664 raises no doubts whatsoever.⁷⁴ However, problematic is determining the spatial localisation of the second settlement by the name of Krzywiatycze – a ranger settlement for the Bielsk forests. The publishers of the inspection for 1576 with no expression of doubt or question have identified it with the present-day village of Krywiatycze.⁷⁵ However, the authors of works devoted to the history of the Orla properties bordering on the Bielsk forestry area have considered Krywiatycze to be identical to the settlement belonging to these properties and appearing in the second half of the sixteenth century and first half of the seventeenth century under the name of Krzywa Wola, Wola or Wólka.⁷⁶ Any inclination to identify one of these settlements as being the same as present-day Krywiatycze would constitute the necessity to recognise the validity of the other’s location. In the case of recognising Krzywa Wola (equally appearing under the name Wola or Wólka)

as being identical with the present-day settlement of Krywiatycze would result in the only location possibility for the Krzywiatycze of the Bielsk forestry area to be the assumption that the settlement formed a single settlement in conjunction with the Krzywiatycze of the Bielsk starosty and here one divided between these two institutions. However, on the assumption that present-day Krywiatycze is identical to the Krzywiatycze of Bielsk forestry then the problem would be to show a localisation for Krzywa Wola and to explain the source of its name. The situation is made here difficult by the lack of sources relating to Bielsk forestry other than the inspection of 1576 and the tax register of 1577. Luckily there have been preserved for the Orla estates sources from the sixteenth century and the first half of the seventeenth century which allow one to resolve this dilemma. Here a key role is played by the letter of Olbracht Gasztołd, Aleksander Iwanowicz Chodkiewicz and Andrzej Borysowicz Łozka to Bohusz Bohowitynowicz of 1529⁷⁷ as well as the inventory of the Orla estate for the years 1635 and 1655.⁷⁸ The recalled letter came into being as a result of a demarcation conducted by the letter's authors of the Orla estates of Bohusz Bohowitynowicz with the grand-ducal estates. The course of the boundary is described in the same twice over. The first description, placed at the beginning of the letter and which is fairly brief, is adopted from the grand-ducal privilege presented by Bohusz Bohowitynowicz. The second – longer and more detailed – was a description of a letter compiled by the authors in 1529 of the detours in the boundaries and their renewal. In both descriptions the place name Krzywiatycze appears as the orientation point for the course of the boundary. According to the latter, the more detailed description, there was to have run on the eastern bank of the River Orla the border between the nobility estates (besides the Orla properties there was to be located also the village of Szczyty, being at the beginning of the sixteenth century the property of Jan Jakubowicz Szczytowski) and the royal forest: "Along the Krzywa River straightening the border up to the oak where first laid the border Mr Loska and according to which he built a mound and corrected the border. And from the oak through the forest past his meadows Krzywiathyczkie [...] up to the top of the Kimbarew pool to the River Orla."⁷⁹ From this description it results that the place name *Krzywiatycze* for certain did not refer to terrain that belonged in the second half of the sixteenth century to the Krzywiatycze village (subsequently Krzywa) of the Bielsk starosty. In addition it is clear that evidently this village at this time did not exist, for in the letter's content named as victims of the unlawful utilisation by Bohusz Bohowitynowicz's serfs of forays (entrances to the Grand Ducal Forest) into the grand-ducal forest – amongst other royal serfs – are the inhabitants of Łoknica, which is present-day Porzecze. Given that contemporarily between the River Krzywa and the settlement of Łoknica (Porzecze) lie the land of the village of Krzywa (sixteenth-century Krzywiatycze of the Bielsk starosty), then any violation of the economic rights of the inhabitants of Łoknica (Porzecze) on the part of Bohusz's serfs could have taken place only when the settlement of Krzywiatycze (Krzywa) was still unfounded. At the same time the place deemed in 1529 as *Krzywiatycze* was not the property of Bohusz Bohowitynowicz. In this letter, similarly to the original act of Sigismund I the Old proclaimed in 1516, he is the possessor of "the Krzywiatycze meadows" and also the "Krzywiatycze *sianożęci* (those who scythe) hay fields". Hence the matter concerned the situation around the environs of Krzywiatycze, on terrain where fodder could be obtained, while with the very name itself *Krzywiatycze* it follows to relate it to a rangers' settlement recalling the present-day village of Krywiatycze. That the identification of Krzywa Wola/Wola/Wólka belonging to the Orla estates with Krywiatycze is flawed results from sources preserved for the Orla estates. In a letter of 1529 there is no mention whatsoever of the settlement of Krzywa Wola/Wola/Wólka. The first piece of information about it appears in the taxation register of 1577 where it is noted as Krzywa Wola, whose taxed acreage is given as 8 voloks. In the deed of gift of the Orla estates of Katarzyna Radziwiłłowa née Tęczyński in favour of her husband Krzysztof Radziwiłł of 1585 it appears, without any information about acreage, as Wola.⁸⁰ In turn, in the inventory of the Orla estate for 1635 it figures as Wólka with a farmed acreage of 8 voloks.⁸¹

⁷⁷ BJ, MS 6 III, pp. 198–201.

⁷⁸ Inventory of the manor and town of Orla as well as of the Orla estate of 1635, [in:] G. Sosna, D. Fionik, *Orla na Podlasiu*, pp. 148–174; AR XXV 2905, 2906.

⁷⁹ BJ, MS 6 III, pp. 198–201.

⁸⁰ M. Sierba, *Radziwiłłowskie dobra Orla*, p. 53.

⁸¹ Inventory of the manor and town of Orla as well as the Orla estate of 1635, [in:] G. Sosna, D. Fionik, *Orla na Podlasiu*, pp. 173–174.

The name of Krzywiatycze or Krywiatycze does not appear in any of these sources. The first references to the existence of a settlement of the name Krywiatycze within the Orla properties are registered in the inventories of 1654 and 1655, where its cultivated acreage is given as being 9 voloks. However, at the same time there appears in inventories the settlement of Wólka, which – despite a similar acreage (8 voloks) – is beyond any doubt to be identified with the Wólka mentioned in the inventory of 1635. Given that amongst the farmers mentioned in Wólka in 1635, five individuals are noted once again for the settlement of Wólka in the inventory of 1655, then we are dealing with one and the same settlement. This thereby confirms the accuracy in the settlement identification contained in the inspection of 1576 for the ranger settlement by the name of Krzywiatycze with present-day Krywiatycze. While the inclusion of Krywiatycze into the composition of the Orla estates should be dated for the period from 1635 to 1654, research into this matter lies beyond the scope of the present commentary.⁸² While along with Krywiatycze it follows to identify Krzywa Wola appearing in the tax register of 1577 (called in 1585 Wola, while for the years 1635, 1654 and 1655 Wólka) with the present-day settlement of Wólka that lies between Orla and Parczew. This is shown in the aforementioned letter of 1529 a description of the boundary course between the lands of the town of Bielsk and the Orla estates. Admittedly there is no mention in it of the existence of a settlement of the name of Wola but it does give information as to the existence of the River Krzywa that has its source in the terrain of the Orla estates and that flows in the direction of Bielsk: “And to the top of the Wiotheskowska River from the head of which leaked out another stream called the Krzywa and which flowed to the town.” And it is on the former Krzywa Riverlet that the present-day settlement of Wólka lies, while the name of the river – Krzywa – makes for the name Krzywa Wola and its sixteenth-century usage clear.⁸³

To establish the location of the village of Kulesze-Maćkowięta we have employed the findings of the subject literature. In the sources from the second half of the sixteenth century it appears but twice as Kulesze Maćkowięta and Kulesze Litwa Maćkowięta.⁸⁴ We have adopted on the basis of Emil Kalinowski that: “in the second half of the sixteenth century there occurred the division of Kulesze-Litwa into two parts – Maćkowięta and Bogdanowięta. The descendants of Maciej, possibly he died before 1528, gave the beginnings to present-day Stara Litwa.”⁸⁵ Kulesze-Maćkowięta has been marked by us on our map in the place of present-day Stara Litwa.

Łapy Nowosiółki we have marked according to von Stein’s map; it is also visible on Textor’s map as *Lapy-Nowosiolky*. On the Quartermaster’s map as well as later cartographic representations of this area (up to the 1920s) Łapy Leśniki can be seen in this place. “In as far as the genesis of Łapy Leśnik was a plot of one of the heirs of Łapy Rechy, then the neighbouring hamlet of Łapy Nowosiółki came into existence at the end of the sixteenth century as the colony Łapy Wity and Bociany. [...] Both hamlets adjoined each other and with time fused into being a single settlement. Already in the second half of the seventeenth century Leśniki and Nowosiółki were referred to most often as a single settlement. The name Łapy Nowosiółki was to finally disappear in the nineteenth century.”⁸⁶

The village of Oczkowizna has been marked in the place of the present-day village of Piętki-Żebry (PRNG, no. 101014; Krajowy Rejestr Urzędowy Podziału Terytorialnego Kraju [TERYT], no. 0398729). At the beginning of the sixteenth century the Żebrowski family of Żebry bought from Andrzej Oczko of Piętki and his sons their land, which was known as Oczkowizna; and created on these lands was

⁸² It is possible that this was preceded by a transfer of the hitherto ranger communities – or a part of them – to another settlement. A part of the forest service of the Bielsk forest area was transferred to newly created settlements at the beginning of the seventeenth century; see J. Smykowski, *Ochrona Puszczy Bielskiej*, p. 7. In an incident known for the year 1670 the rangers from Dmitrowice and Sawczyce, under the jurisdiction of the Białowieża forest area, and here as a result of a limited need for their services, experienced the imposition of serfdom and its regulatory practices as for the normal peasant populace and here for a half of the acreage cultivated by them; see A. Kołodziejczyk, *Z dziejów kolonizacji puszczy*, pp. 87–88.

⁸³ In the subject literature there does admittedly appear speculation as to the existence of this village even at the turn of the fifteenth century (G. Sosna, D. Fionik, *Szczyty: dzieje wsi i parafii*, Bielsk Podlaski–Ryboły–Białystok 2005, pp. 36–37), though this now appears to be an unjustified claim.

⁸⁴ ASK I 47, f. 591 (Bielsk tax register of 1580): „Villa Kuliessie Maczkowiętha”; ASK IV 41, f. 39 *recognitiones* (rekognicjarz poborowy of 1581): „s Kuliesz Lithwa Maczkowyałh”.

⁸⁵ Quoted from: E. Kalinowski, *Historia obszaru gminy Kulesze Kościelne*, Kulesze Kościelne 2018, p. 42.

⁸⁶ Quoted from: Lubicz-Łapiński, p. 48; cf. also Laszuk, Łapy, pp. 21, 23–25.

the village of Piętki-Żebry.⁸⁷ For the years 1576–1580 the owners of the village of Oczkowizna were the Żebrowski family.⁸⁸

In the locating of the village of Piszczaty-Tusiki we employed von Stein's map (where it appears as *Piessaty Tusscki*). It was also marked on Perthées's map as *Piszczaty Tuzyki y Konezary*. In accordance with von Stein we have marked Piszczaty-Tusiki on the right bank of the River Rokitnica, in a built-up area situated in the northern part of the present-day village of Piszczaty-Kończany. Textor's map presents us with only the name *Piszczaty*, while it is absent on the Quartermaster's map, being merely conveyed in the form Kończany.

The village of Sobótka (Sobociec) was marked as being approximately 2.2 km to the north-west of the current settlement of Sobótka, lying on the right bank of the River Orlanka (Orla). Such a localisation results from the change in the location of the mentioned settlement. On Perthées's map *Sobotka* is visible to the east of *Hryniewiczze m[ale]*; on von Stein's map *Sobotka* was marked about 700 m from the bank of the River Orlanka and around 400 m to the north of the later demesne Sobótka, visible on the WIG maps of the 1920 and 1930s (at present *Hendzel*,⁸⁹ a colony of the village Zubowo). In this same place (to the north of the village Orlanka) *Sobotki* is marked on the map by Chrzanowski. The change in the location of the village is discernible on both the one-verst scale and two-verst scale maps, where *Сѳотка* is shown in its present place, that is around 300 metres to the north-east of the settlement of Orlanka. Sobótka has been marked on the main map according to the cartographic input from the eighteenth century and the first half of the nineteenth century.

Sixteenth century Strubicze has been marked by us in the place of the present-day village of Giełczyn. In 1580 Brzeziny was the property of the royal secretary Maciej Strubicz;⁹⁰ in the seventeenth century present-day Giełczyn was designated as "Giełczyn alias Brzeziny Strubiczów", "villa Brzeziny Giełczyno".⁹¹ From the turn of the eighteenth century it already appeared as Giełczyn (Giełczyno). The settlement point was placed at the crossroads with the road running north in the direction of the part of the village called *Poświętne* and further to the north-west to a subsequent part of the village under the name of *Kołodzieje*.

The settlement of Szyposze is visible on the map of the Bielsk district of 1839 on the road between the villages of Moskiewce (on the map *Moskierow*) and Krasna Wieś (on the map as *Krasnawies*), to the north of the settlement of Czechy Zabłotne (on the map *Czochoy*), and appears even in the SGKP of 1892.⁹² On von Stein map visible in this place is the village of *Troiany*, which also was marked on Chrzanowski map (*Trojany*), though it is absent on the two- and three-verst maps. We have marked the village of Szyposze on our map where PRNG defines things as a meadow of the designation *Błoto Szyposzy*.⁹³

The village of Werweczki was marked on Perthées's map as *Warweczki*, on the maps of von Stein and Textor as *Werweczki*, on Chrzanowski's map as *Werwiczki*; it is also visible on the three-verst scale map as *Bebepaku*. On the two-verst scale map in the location of Werweczek visible are single buildings with the label *Omδ. δб*. On the WIG map of 1922 there is an absence of any settlement whatsoever in this location; on the WIG map of 1937 there appears in this place the village of Antonowo. The settlement of Werweczki has been marked on the main map in the place of the aforementioned Antonowa (a colony of the village Mikłasze), on the right bank of the River Orlanka, around 1 km to the east of Mikłasze village.⁹⁴

⁸⁷ This information is from Dr. T. Jaszczołt.

⁸⁸ ASK I 47, f. 56v (1576 r.): "Żebry Oczkowina Szlachetny Jurgi Żebrowski son of Mathis, Wojciech son of Jan with their partners (co-owners) paid taxes", ASK I 27, f. 928v (1578): "The nobility owners of the Oczkowiczina lands Jerzy and Mateusz Żebrowski with their partners paid"; ASK I 47, f. 541v (1580): "The Oczkowiczina nobleman Jerzy Żebrowski with his partners paid."

⁸⁹ PRNG no. 198608.

⁹⁰ ASK I 47, f. 618 (Bielsk tax register of 1580): "The nobleman Jakub Ailiorowski in the name of his noble lord Maciej Strubicz secretary to the King from his own property – further from the property of Brzezina in the parish of Tykocin."

⁹² "Geographical map of the Białystok district Bielsk county", sketched by P.D. Szaranko, Białystok 1839, University Library in Warsaw, The Cartographic Collections Room, M 4242 cim (scan on-line <https://crispa.uw.edu.pl/object/files/612030/display/Default>, access 7.06.2021), I would like to thank Dr. M. Sierba for drawing my attention to this map for the location of the village of Szyposze; SKGP, vol. 12, p. 125: „Szyposze, a village in the Bielsk land”.

⁹³ PRNG, no. 136629.

⁹⁴ See M. Sierba, *Dobra Orla przed przejęciem ich przez Radziwillów birżańskich*, „Acta Universitatis Lodziensis”, Folia Historica 90, 2013, pp. 11–13, 15, 17, 19; idem, *Radziwillowskie dobra Orla (1585–1695)*, Białystok 2017, p. 266 (Table 14).

“The demesne near to the town [Goniądz – J.S.] called Wielki Dworzec”⁹⁵ has been marked on the basis of source records and cartographic accounts from the sixteenth century. We know on the basis of information contained in the inventory for the Goniądz starosty and here for 1571 that the demesne was situated half a mile to the east of Goniądz, in the vicinity of the the River Boberek (in the sixteenth century Klewianka), at the village of Klewianka.⁹⁶ On Perthées’s map the *Dwor* (manor) was marked to the north-east of the village of Smogorówek, but to the west of the settlement at Jodeszka, but according to the source information this cannot constitute the basis for the localisation of Wielki Dwór. Dated to around the year 1561 “the map of the Knyszyn and Rajgród-Goniądz estates of the third quarter of the sixteenth century,” on a scale of approximately 1:100,000 (with numerous deviations from this value on individual parts of the map),⁹⁷ shows *Dworzec Goniczky* to the east of Goniądz, on the left bank (southern) bank of the Biebrza, more or less midway between Goniądz and the inflow of the present-day Jegrznia River to the Biebrza. We have marked Wielki Dworzec to the east of Goniądz, half an *average Polish mile* (that is approximately 3,515 m)⁹⁸ from the aforementioned town, close in proximity to the present-day village of Dawidowizna; through the application in localisation of the *Polish great mile* the difference in placement is around 390 metres, which when employing the scale of the main map (1 km = 4 mm) results in the demesne being moved on the map not a whole 1.6 mm in an easterly direction.

Settlements currently non-existent yet possessing a definite location on our map as well as those whose sixteenth-century localisation differs from their current position (according to PRNG) have been noted by us equally in the Drohiczyn land.

The settlement of Glina does not appear in cartographic material until the middle of the nineteenth century. It only appears on the three-verst scale map (as *Омд. д. Глина*) as well as on KdWR (*Glina*); in both cases it was marked on the Stara Maliszewa – Rostki road. It is visible on the WIG map as a loosely built-up area to the west of the aforementioned road. The modern village of Glina is situated about 1 km to the west of the said Rostki – Stara Maliszewa road. Sixteenth-century Glina has been marked according to the position on the three-verst scale map and the KdWR, around 1 km to the east of the present-day settlement.

Koce-Chybowo was marked on the basis of the localisation provided on von Stein’s map (*Koce Chibowo*); it is equally marked on Textor’s map. The picture of the terrain as presented on the Quartermaster’s map finished in this region at the River Nurzec. There is no Koce-Chybowo settlement on Chrzanowski’s map; it also does not appear on the two- and three-verst scale maps or on later maps. More than likely the village became abandoned in the mid-nineteenth century.

The villages of Łempice-Klesie and Radziszewo-Przyrodki have been marked on the basis of the map by von Stein – on the left bank of the Siennica are visible *Klessie* and *Przyrotki*. Equally on the earlier map by Perthées can be seen, and here also on the left bank of the River, *Lempice Klosie* as well as *Radziszewo Przygrodkie*. *Przyrotki* is also visible on the Quartermaster’s map, even though they are situated on the left bank of the River Nurzec besides a detailed photograph of the terrain. In the cartographic material the last time that *Przyrodki* is to be seen is on that of Chrzanowski. Łempice-Klesie has been marked along the Kobusy – Radziszewo-Sieńczuch road at the place where on the

⁹⁵ LWP 1570, 1576, p. 78.

⁹⁶ Goniądz 1571, p. 164: “The village of Smogorowka near to Wielki Dworzec”; ibidem, p. 165: “the village of Klewianka right at Wielki Dworzec”; ibidem, p. 187: “the Folwark Wielki Dworzec half a mile from [the] town”; ibidem, p. 189: “behind that manor house is a pond and small mill on the River Klewianka and a second higher up from that which is now in disrepair. Not having reached Wielki Dworzec, two small ponds are situated between the town and this Wielki Dworzec in a field, but in the time of the voivode’s wife fish are there caught.” ibidem, p. 184: “The mill behind Wielki Dworzec and with a pond on the River Klewianka, but it has fallen into disrepair and so no use from it can be had. Above this little mill is another small mill with a sizeable pond on the same River Klewianka, but extremely run down with the sluice all gone. It needs repair. At these mills are four miller areas and there are meadows, which yield around 60 wagons of hay and an alder grove of sorts.”

⁹⁷ Map description [in:] S. Alexandrowicz, *Mapy majątkowe północnego Podlasia z XVI wieku*, KHKM, vol. 4, 1966, no. 2, pp. 296–300; idem, *Kartografia Wielkiego Księstwa Litewskiego od XV do połowy XVIII wieku*, Warsaw 2012, pp. 136–137. I would like to thank Dr. M. Sierba for allowing access to a colour photograph of the aforementioned map kept at present at BUWil (F23-135).

⁹⁸ Small mile = 6,350 m, average mile = 7,030 m and a great mile = 7,810 m; see *Słownik polszczyzny XVI wieku*, vol. 14, Wrocław 1982, p. 155; J. Szymański, *Nauki pomocnicze historii*, Warsaw 2004, p. 164.

WIG map is found “a cross or religious figure” on the territory of a field of the name *Klesie*,⁹⁹ around 700 m to the south of Łempice. The localisation of the village Radziszewo-Przyrodki is found on the Radziszewo-Sieńczuch – Czaje road, around 800 m to the south-east of the settlement of Radziszewo-Sieńczuch and about 500 m to the north-west of the village Czaje-Wólka.

Von Stein’s map was employed in locating the village of Porzeziny-Jelitki, where it is marked as *Porezini Gelitki*. This was situated around 750–800 metres to the north-east of the village Krynki Borowe and around 1 km to the north-west of the settlement of Porzeziny-Mendle, on the right bank of the River Kukawki (Winna). Such a location is also shown on Textor’s map, where it is written up as *Porzini-Gelitki*. Porzeziny-Jelitki is also visible on the two-verst scale map as *П.-Елумку* as well as the WIG map of 1934 as *Porz. Jelitki*. It is absent on the WIG map of 1937.

The settlement of Reczki has been marked on the basis of the location given on the WIG map, on the area of the demesne of the same name. It was shown on, among others, the map by Perthées (*Hreczki*), Heldensfeld (*Reck H*), the Quartermaster’s (*Fol. Reczki*), on Chrzanowski’s map (*Rętki*), and the three-verst scale map (*Ф. Речку*). Present in this place, according to PRNG, is a “charming former settlement” by the name of *Reczki*.¹⁰⁰ In as far as the localisation of the village Reczki is certain, its existence in the sixteenth century arouses doubts, something that results from the fact that only a few source references could refer to the village of Dmochy-Rętki situated around 1.4 km to the north-east of the settlement of Reczki.¹⁰¹ The tax registers mention *Reczki* only in 1580, while *Ręthki Dmochy* only in 1588.¹⁰² Information as to the simultaneous existence of both settlements (*Reczki* and *Rętki*) comes to us from 1547 and the cataster of military dues for the nobility of the Drohiczyn land, in which there is mentioned “*Jaruzele, Reczki, Dmochy Mingosy, Rętki, viginti, pro decem*”.¹⁰³

Sarnowo can be seen on Perthées’s map as *Sarnow* on the right bank of the River Kołodziejka (Kamianka), to the south of Knychówek. An exact localisation is presented on Heldensfeld’s map (*Żarnów*) as well as the Quartermaster’s (*Sarnów*). Also Chrzanowski’s map shows Sarnów. On the two-verst scale map where there should be the village of Sarnowo one can see empty fields at a crossroads. The settlement of Sarnowo was marked in a place where on the WIG map is to be found the symbol of “cross or religious figure,” at the crossroads, around 990 m from Knychówek and around 980 m from Józefin. The contemporary forrest settlement of *Sarnowiec*¹⁰⁴ is separated about 1.7 km to the south-east of the spot marked by us for Sarnowo on the main map (about 540 m to the east of the village of Kamianki-Czabaje).

Warchoły was marked about 1.3 km to the east of its present location. Up until the 1930s Warchoły was situated here on the left bank of the River Miedzanka (Miedzna), about 600 m to the east of the Węgrów – Tchórzowa road. Such a state of affairs is visible on the WIG map of 1933. The changes that occurred in localisation up until the mid 1930s are visible on the subsequent edition of the WIG map of 1937. Warchoły is situated about 700 m to the west of the Węgrów – Tchórzowa road on wooded terrain and this state of affairs is true to this day. We have marked the village of Warchoły to the east of the aforementioned road, on the river (about 160 m from the river).

The village of Winna-Krzyczki has been marked according to von Stein’s map, on which may be seen *Hof Krziczki*, on the right bank of the River Kukawka (Winna), between *Winna Wilki* and *Winna Poswientna*. Perthées’s map also depicts *Dwor Krzycki* between *Winna Wilki* and *Winna Poswientna*. Yet

⁹⁹ PRNG no. 53740.

¹⁰⁰ PRNG no. 183217.

¹⁰¹ Popis 1567, f. 998 (entry under the heading „Параоѣя Розбицка”): „Дмохи Редки. Янь Клепачъ кляча, мечъ. Янь Пузо кляча, кае., рогати.. Шиманъ Кесикъ кляча, кае., рогати.. Щасный Войтеховичъ пешо, рогати.. Войтехъ Счасникъ пешо, мечъ. Щасный Клепацкий пешо съ кор.. Станиславъ Пузо выслать сына Яна, кляча, кор.. Валенты Лавъринцовичъ пешъ, мечъ.”; *ibidem* ff. 1003-1004 (entry under the heading „Параоѣя Монкобоцка и Будеска”): „Дмохи Редки. Андрей Станиславовичъ кляча, кае., мечъ. Янь Миколаевичъ кляча, кае., мечъ. Янь Миколаевичъ Долгого кляча, кае., мечъ. Станиславъ Бартошевичъ кляча, кае., мечъ.”

¹⁰² ASK I 47, f. 515 (the year 1580): “Mingosi Ieruselie Reczki the noble Stanisław Jarkowicz paid from these villages with his partners on 10 voloks of land at 15 grosz for every volok which gives for 5 złoty”, an earlier entry concerned the village *Dmochi rogalie rozummi*; *ibidem*, f. 741 (the year 1588): “Ręthki Dmochy Stanisław with partners paid on 10 land voloks 5 florens.”

¹⁰³ ADS, sign. D 45, ff. 455v; according to T. Jaszczolt this is a notation from the beginning of the eighteenth century from a now lost Drohiczyn land register of 1547; cf. also T. Jaszczolt, *Osadnictwo lewobrzeżnej części*, pp. 101–102.

¹⁰⁴ PRNG no. 120919.

the settlement of Winna-Krzyczki is not registered in later cartographic materials; the Quartermaster's map ends on the right bank of the Nurzec, it is also absent on the map by Chrzanowski. On the three-verst scale map visible are only *Винно Посвешное* and *Винно Старе (бол)*.

Wólka was marked in the place of the present-day hamlet of Wólka Zamkowa and named Janówek (about 1.8 km to the south-east of Wólka). On the maps of von Stein, Textor, the Quartermasters, the two-verst and the three-verst maps the village of Wólka can be seen. On the aforementioned two-verst, as well as on the KdWR (both 1915) as well as on the WIG of 1934 next to Wólka is also presented Wólka Zamkowa; the name Janówek (in the place of Wólka) appears on the WIG maps of 1937.¹⁰⁵

A few words of explanation need to be devoted to the localisation of the villages of Wyrozęby-Konaty and Wyrozęby-Podawce. They have been marked on the basis of Perthées's map as well as PRNG, where Wyrozęby-Konaty is located on the left bank of the River Grobelka while Wyrozęby-Podawce (the seat of the parish) on its right bank. Perthées's map shows the parish village of Wyrozęby as well as to the west of it *Wyrozęby Kunaty*. Confirmation of this state of affairs we find also in "Perthées's sketches" where it is noted: "Wyrozęby Kunaty 200 [steps to] the Wes[t]" of the parish village of Wyrozęby.¹⁰⁶ On Heldensfeld's map the village is described simply as *Wyrozemby* (a possible reading of the name *Wyrczemby*) without any differentiation as to Konaty and Podawce. The change in the localisation of the described villages in relation to the situation presented on Perthées's map appears on the Quartermaster's map – on this Wyrozęby Podawce is marked on the left bank of the River Grobelka while Wyrozęby Konaty (together with the symbol of a church) on the right bank.¹⁰⁷ This state of affairs is visible on maps to the end of the 1940s, including the two-verst (sheet from 1915) as well as the three-verst (sheet from 1912) depict "Вырозембы-Конаты" on the east and "Вырозембы-Подавцы" on the west (relative to the course of the River Grobelka), KdWR (sheet from 1915) presents this self same state of affairs: Wyrozęby-Konaty on the east and Wyrozęby-Podawce on the west; Chrzanowski's map shows only Wyrozęby. Even the WIG maps of the 1930s reflect such a state: on maps of a scale 1:25,000 (from 1935) as well as 1:100,000 (published in 1934 and 1937) the terrains adjacent the church are called *Wyrozęby-Konaty* while the built-up area to the west of the church *Wyrozęby-Poniaty*. Of interest is that the Austro-Hungarian map *Generalkarte von Mitteleuropa* of a scale 1:200,000 (sheets 40-52 of 1913) presents the view from Perthées's map: Wyrozęby-Podawce is located at the church on the right bank of the river while Wyrozęby-Konaty to the west of the church.¹⁰⁸

We have employed an approximation in the localisation of settlements as has been similar in the above group in any case whereby a settlement has disappeared and the available source materials do not allow one to localise it with precision (often all that remains of it is the currently existing topographic designation). Often there are cases where the localisation of a settlement has been established only on the basis of Perthées' map. While here as a result of its lack of cartographic features and precision, it simply cannot be the basis for any certain location. We shall commence our description here as earlier from the Bielsk land.

Boguchwały, as mentioned in the Goniądz starostvo inventory of 1571, is described as bordering with Kramkowskie: "the Kramowka River divides Boguchwały from Kramkowskie and constitutes the boundary between them."¹⁰⁹ On Perthées's map between Kramkówka Wielka and Kulesze can be seen *Boguszewka Zaścianek*.¹¹⁰ A similar name *Boguszówek* appears on the WIG map of 1930 on the Kosodka River between the settlements of Kulesze and Mejły. Utilising the recalled information, we

¹⁰⁵ Janówek as well as Wólka Zamkowa appear in *Skorowidz miejscowości Rzeczypospolitej Polskiej z oznaczeniem terytorjalnie im właściwych władz i urzędów oraz urządzeń komunikacyjnych*, edited by the Editorial Committee under the direction of T. Bystrzycki, Przemysł-Warsaw [ca] 1933, pp. 594, 1905.

¹⁰⁶ Perthées's sketches, vol. 12, f. 133.

¹⁰⁷ See B. Niemirka, *Szpital Fundacyjny św. Tadeusza w Wyrozębach (Fundacja Tadeusza i Stanisława Doria-Derwałowiczów)*, „Prace Archiwalno-Konserwatorskie na Terenie Województwa Siedleckiego”, 1999, no. 11, pp. 40–41 as well as footnote 35: "the former and frequent mistakes in the siting of the hospital resulted from an oversight on the part of topographical map creators of the nineteenth century, including the Quartermaster's Map of the Kingdom of Poland, where Wyrozęby Podawce is noted as being Wyrozęby Kunaty (and vice versa)." I would like to thank B. Niemirka for consultations on this matter.

¹⁰⁸ See <http://lazarus.elte.hu/hun/digkonyv/topo/200e/40-52.jpg> (access 17.06.2021).

¹⁰⁹ Goniądz 1571, p. 162.

¹¹⁰ *Rękopiśmienne opisy parafii litewskich*, p. 173 (description of the Goniądz parish): "the Boguszewka backwater of squire Kramkowski, beyond Kramkowa Wielka, five quarters of a mile to the winter west/sunset." (as well as W. Wernerowa, *Opisy parafii dekanatu augustowskiego*, p. 193).

have located Boguchwały to an approximated degree on the left back of the Kosodka, about 1.2 km to the south-east of the village of Kulesze.

In a similar way we have marked the village of Chudziabino. In describing the voloks of the town of Suraż in 1558 it has been defined that: “At the end of these urban town voloks near to Chudziasyn s kątha [at the end, in the corner of the field], which is curiously known as Kowale by the inhabitants”;¹¹¹ from 1562 comes the information that: “In the second place, the hamlet with one end of the hamlet reaching the border of Iliasz Borowski and the other ending at the 16 Zarzeckie volok, while with one side it reaches and touches the voloks of the village of Kowale, and the other side the fields of the doctor’s wife, whose hamlet is called Chudziabina”¹¹² According to PRNG about 960 m to the south-west of the village Dołki there is to be found a field called *Chudziabino*.¹¹³ The approximate location of the village Chudziabino we have marked on the area of the aforementioned field, about 4.5 km to the south-east of Suraż.

We have marked the localisation of the village Ciekuny according to the PRNG names: between Juchnowiec Dolny and Hołówki Małe, on the right bank of the River Turośnianka (Turosna), where there exist fields called *Ciekuny*.¹¹⁴ We have marked the settlement around 620 m to the south of *Góra Ciekuńska* and about 420 m from the banks of the Turośnianka.¹¹⁵

Falki Nowosady has been located by us to an approximate degree between the settlements of Filipy and Kowale. As an indication of this as the location is the note of 1790 “Falki Nowosady or Kowale.”¹¹⁶ It is highly likely that this was a settlement founded on the grounds of the village of Filipy (Falki-Filipy) close to Kowale (Falki-Kowale). It is possible that the remains of Falki Nowosady is today visible in the few buildings on the road between Filipy and Kowale, around 800 metres to the north of the village of Kowale.¹¹⁷

The village of Grabówka is not visible on maps until the mid twentieth century. One trace of its localisation is the two-verst scale map file of 1913 on which one can see *Ур. Грабовка*, marked to the west of the village of Kamionka; it does not appear on the WIG map of 1930. The sixteenth-century settlement we have marked in the place of the present-day hamlet of the village of Słomianka, called *Grabówka*.¹¹⁸

The town hamlet of Hruskie was founded “in the year 1562 on the 10th of November administered by Michał Łapa” and comprised three fields.¹¹⁹ This newly founded village was only then to be developed and built: “The hamlet, in two fields of average sizes, are to be planted facing the houses to the west threshing floors (barnyards) over the street, which is 3 rods across”.¹²⁰ This location presumably turned out to be inaccurate; there is an absence of source data concerning the functioning of the village towards the end of sixteenth century as well as in the seventeenth century.¹²¹ Despite the lack

¹¹¹ AWAK 14, p. 50; see J. Maroszek, *Układ przestrzenny miasta Suraża*, „Białostoczczyzna”, 1995, no. 3(39), pp. 48–49, 51. There is no mention of this village in Demidowicz’s work, pp. 21–47.

¹¹² Suraż 1562, p. 186; the poll tax register of 1676 mentions *Chudziabin et Kowale*, see BCzart, the Łoyko collection, MS 1099 IV, p. 783 (f. 386); F. Łoyko, *Małopolska. Alfabetyczny zbiór wsiów*, p. 455 mentions *Chudziabin*.

¹¹³ PRNG no. 16867; F. Łoyko, *Małopolska. Alfabetyczny zbiór wsiów*, p. 455 mentions *Cekuny*.

¹¹⁴ PRNG no. 17350; J. Maroszek, *Pięć wieków Ziemi Juchnowieckiej*, p. 145: “Ciekuny, a former village, now non-existent, at present the fields and grazing are in the village of Juchnowiec Dolny”; the same E. Borysiak, *Ciekuny*, [in:] NMPol, vol. 2, p. 128 as well as Kondratiuk, p. 42.

¹¹⁵ PRNG no. 17351; J. Maroszek, *Pięć wieków Ziemi Juchnowieckiej*, p. 252: “Ciekuny was a village belonging to the Góra Juchnowiecka estate. In 1673 the village belonged to the holdings of Góra Juchnowiecka. Here resided 17 of Gabriel Kurzeniecki’s serfs, the Parnawa province land ensign.”

¹¹⁶ Kondratiuk, p. 98; the same NMPol, vol. 5, p. 215.

¹¹⁷ On the WIG of 1922 the surrounding settlements still had the common component “Falki” in the name: Falki Filipy, Falki Godziemby, Falki Kowale, Falki Stare.

¹¹⁸ PRNG no. 37675.

¹¹⁹ Suraż 1562, p. 186, cf. also: *Siolo Hruskie Mieszkcie*, [in:] PKGE, pp. 451–452; see J. Maroszek, *Układ przestrzenny miasta Suraża*, pp. 49–50 as well as the map *Miasto Suraż w 1562 r. – odtworzenie struktur rolnych*, and insert at the end of this edition of “Białostoczczyzna”. The layout of the fields for the village of Hruskie is presented by map 7: “Suraż east bank, Kowale and Hruskie, 1563”, [in:] Demidowicz, p. 34.

¹²⁰ Suraż 1562, p. 187; the same [in:] PKGE II, p. 451.

¹²¹ An absence of information about the village Hruskie e.g., in the poll tax register of 1676 see BCzart, Łoyko collection, MS 1099 IV, where the Suraż parish is described from p. 778 (f. 383v) to p. 785 (f. 387); F. Łoyko, *Małopolska. Alfabetyczny zbiór wsiów*, p. 463 mentions a *Hruska* in the Brańsk district.

of certainty as to whether the location actually reached fruition and over what period the settlement could have functioned we have marked it in the present-day field called *Hruska*,¹²² about 1.4 km to the north of built-up area of the town of Suraż.

We have marked the settlement of Koziółek (Koziełki) at the inflow of the River Kurówka to the Narew. Perthées's map presents (in the Narew forks) *Dawny Okop Koziółek zwany*, while on the Quartermaster's map visible on the left bank of the Narew is *Koziółek Red[uta]*. The aforementioned settlement has been marked on our map as a village with an approximated location in the forks of the Kurówka and Narew, in place of the then visible remains of the so-called 'Swedish sconce.'¹²³ The village finds a mention in 1673 in the parish of Waniewo; *Koziółek* is equally the name of a forest situated on the remains of the fortification still visible to this day, about 370 m to the north of the *Zerwany Most* nature reserve (*uroczysko*) [Uroczysko – a part of a forest (less often of fields or meadows) of indicative significance, without strictly defined borders and one often forming a small area for a nature reserve].¹²⁴

The settlement of Krasowo-Rybałty has received an approximated location on our map in the place of the present-day village of Wierzbowizna, on the right bank of the River Tłoczewka. In the military rolls (*popis*) of 1528 Jan Rybałt is mentioned at the village of Tłoczewo.¹²⁵ In the second half of the sixteenth century the owners of the settlement were the Wierzbowski family – in 1565 mentioned is Baltazar Wierzbowski, while for the years 1578–1580 Jan Wierzbowski. On Perthées's map visible is *Kraszewo Wierzbowizna*, von Stein's map presents *Kraszewo Wierzbowizna*, on Textor's map there appears *Kraszewo*, the Quartermaster's map shows *Kraszowo Wierzbowizna*, while on the map by Chrzanowski visible is *Krassowo*.

Łapy-Rechy has been located on the basis of the findings of Łukasz Lubicz-Łapiński: "Łapy Rechy constitutes today the northern part of the settlement of Łapy Szołajdy, into which it was absorbed during the course of the seventeenth century."¹²⁶ Łapy-Stryjce has been marked down as an approximated location between the settlements of Łapy-Kołpaki and Łapy-Pluśniaki. The point is placed to the north of *Sokołowski Gościniec*, on the terrain belonging to the settlement of Łapy-Kołpaki, in the place of the field called *Strycze*.¹²⁷

Łopienie-Grochy has obtained an approximated location. This results from the fact that we cannot be certain as to which of the contemporary parts of Łopienie constituted the initial endowment.

¹²² PRNG no. 180783.

¹²³ See S. Herbst, *Potrzeba historii czyli o polskim stylu życia. Wybór pism*, vol. 2, Warsaw 1978, pp. 125–127, where equally is the author's measurement notation. J. Maroszek has contended that: "from the description of 1560 it in no way results that Koziółek belonged to the Tykocin fortress, it could have been protected by not the Gosztołd castle but by the Radziwiłł castle at Waniewo, for it was situated at the mouth of the River Kurówka and connected by land on the side of the Waniewo manor in Kurów," idem, *Pogranicze Litwy i Korony*, p. 343, footnote 84, ibidem (tabl. XXIV after p. 384) fort Koziółek according to J. Adamski's measurements of 1991; approx. 850 m to the north-west of Waniewo and around 820 m to the north of the River Waniewka's outlet into the Narew is to be found the hill fort Zamczysko (PRNG, no. 180081); cf. also A. Oleksicki, *Waniewo. Dzieje regresu dawnego miasta, „Białostoczczyzna”*, 1988, no. 3(11), pp. 10–11; idem, *Waniewo, z przeszłości dawnego miasta, „Biuletyn Konserwatorski Województwa Podlaskiego”*, vol. 7, 2001, pp. 162, 164, 166; for more on the castle in Waniewo see M. Gochna, *Character of settlements*, [in:] AHP Podlasie, in this edition III.3.2a.8.

¹²⁴ Laszuk, Zaścianki, p. 111; PRNG no. 60676.

¹²⁵ Popis 1528, p. 145: „Село Тлоче земляне Идко Щепановичъ сам. Лавринецъ Презьдецкии сам. Станиславъ Лавринцевич сам. Янь Рыбалтъ сам. Аньдреевад Прошевскаад сам. С тых 2 кони”.

¹²⁶ Lubicz-Łapiński, p. 28, cf. ibidem pp. 28–29: *Łapy Szołajdy i Rechy* oraz Map 5: *Wsie Łapy Szołajdy i Rechy*; see also Laszuk, Łapy, p. 23, Table 1: *Wsie Łapy w XVI–XVIII w.*; I. Halicka, *Nazwy miejscowe*, p. 106: „Rechy the part of village Szołajdy”.

¹²⁷ PRNG no. 132189. Lubicz-Łapiński, p. 35: “Here at Łapy Pluśniaki was there hamlet – Łapy Stryjce (or Strycze) where the Łapy (Łapowie) family with the nickname of Baran resided. With time a part of the village that belonged to this branch of the family was named Łapy-Barany or Barany. The name of this hamlet was to disappearance from documents towards the end of the eighteenth century along with the disappearance of the dynastic line Łapy-Barany.” and map 9: *Wsie Łapy Pluśniaki i Stryjce*, where Stryjce is marked to the south-west of Łapy Pluśniaki; elsewhere the author writes (p. 71): “Baran (the line died out). The Łapiński line with this appellation possessed a plot between Łapy Korczaki and Pluśniaki. Towards the end of the sixteenth century this hamlet was known as Łapy Stryjce (or Strycze), with the name Łapy Barany also sometimes appearing. [...] The remains of this family is the customary name of the field *Strycze* as well as *Góra Baranicha* [*Baranicha Hill*] in Łapy Pluśniaki”. The aforementioned hill (at present *Góra Baranicka*, PRNG no. 2651) is to be found to the north of *Sokołowski Gościniec* between Łapy-Pluśniaki and Łapy-Kołpaki as well as between *Sikanowa Górka* (PRNG no. 122563) and the field called *Strycze* (PRNG no. 132189). See also Laszuk, Łapy, p. 23, Table 1: *Wsie Łapy w XVI–XVIII w.*, p. 24, Table 2: *Liczba majątków szlacheckich w Łapach na przełomie XVII i XVIII wieku* as well as the table (without designation) on p. 25.

Łopienie-Grochy has been marked by us on the terrain of the present-day village of Łopienie-Jeże, at the crossroads with the road heading in the direction of the village of Skłody-Przyrusy, employing the localisation presented on the Quartermaster's map. Von Stein (and following him Textor also) as well as the map by Chrzanowski show the differences in the placing of the settlements of Łopienie-Jeże and Łopienie-Szelągi when compared with that of the Quartermaster's map, and subsequently with the later two- and three-verst scale maps.¹²⁸

The approximated localisation of Niewodnica Brzosczyńska is based on hitherto research and the subject literature: "Stanisław Brzoska was a close neighbour of the Chołonecki family, his manor house called Niewodnica Brzosczyńska was situated on the left bank of the brook, Niewodnica Nargilewska, and Niewodnica Lewickich. Today in its place is a deserted, ploughed under buildingless manor site with traces of a water mill."¹²⁹ The point signalling Niewodnica Brzosczyńska has been placed between the present-day scant buildings and the River Niewodnica, in the place where on the photographs of the Numerical Terrain Model (NMT) are visible the remains of pools.

The settlement of Olszanka is visible only on Perthées's map between the village of Krzywa and the demesne Grodzisk (Grodzisko), to the north-east of the settlement of Romejki (Romiejki).¹³⁰ It does not appear in the cartographic material of the nineteenth and twentieth century; presumably towards the end of the eighteenth century it ceased to exist and function. Olszanka has been marked to an approximated degree in the place of a forest of the same name, about 600 metres to the north of Kolonia Kamionka.¹³¹

Parszyce, mentioned in the years 1581 and 1593–1594,¹³² we have marked on the basis of the subject literature. Jerzy Wiśniewski conjectured that: "The village of Parszyce was on the right bank of the River Biała, its place taken by the demesne Wysoki Stoczek and Ogrodniczki (the remains of the Parszyno field)."¹³³ Józef Maroszek has spoken of the location of Parszyce to be in the place of

¹²⁸ Present-day Łopienie-Szelągi, Łopienie-Zyski, Łopienie-Ruś, Łopienie-Pamięciaki as well as Łopienie-Jeże are situated – in order from the north to the south – on the left bank of the River Dzieża. On von Stein's map the layout of the aforementioned settlements is the reverse: *Jeze Lopienie* was marked in the north, with the subsequent settlements in a southerly direction being: *Tyszki Lopienie*, *Rus: Lopienie*, *Szelongi Lopienie*; the same being the case on Textor's map, where visible in the north is *Lopienie Jeze*, and in the south *Lopienie Szelongie*. Chrzanowski's map also reflects the arrangement as given by von Stein (and Textor).

¹²⁹ *Kościół katolicki na Podlasiu. Zbiór dokumentów erekcyjnych i funduszowych*, vol. 1: *Niewodnica*, ed. J. Maroszek, W.F. Wilczewski, Białystok 1997, pp. 3–4; same J. Maroszek, W.F. Wilczewski, *Dzieje obszaru gminy Turośń Kościelna*, Turośń Kościelna 1997, p. 4; eidem, *Niewodnica: dzieje kościoła i parafii 1596–1996*, Białystok 1996, pp. 7–8; „[...] already in the interwar period the manor house was significantly destroyed. With this process continuing to this day. The manor house was ruined, other manor buildings were taken apart and dismantled while many new ones were raised. The ponds became overgrown with rushes and the environs of the river with alders. The entrance drive was removed. Almost all the ornamental trees were removed from the gardens.” J. Maroszek, *Pięć wieków Ziemi Juchnowieckiej*, p. 270, see also: *Niewodnica Brzosczyńska*, ibidem pp. 266–269 as well as idem, *Lewickie*, „Rubieże. Pismo poświęcone historii, tradycji i kulturze polskiej”, 1993, no. 2–3, pp. 107–111.

¹³⁰ Chomętowski, *Materiały*, p. 280: "The hamlet of Olszanka. For this hamlet and from Jasiński the King's cook was taken in exchange and for which was given 10 voloks, the starosty that Mr. Jasiński held in the (royal villages, that is in the hamlet Bobrówka 5 voloks while in Brzozowa five voloks, which he had for the starosty;" *Rękopiśmienne opisy parafii litewskich*, p. 188 (description of the Jasionówka parish): "Olszanka an average mile to the north" (as well as W. Wernerowa, *Opisy parafii dekanatu augustowskiego*, p. 204); see J. Maroszek, *Pogranicze Litwy i Korony*, pp. 404, 458, 477.

¹³¹ PRNG no. 92542.

¹³² *Kościół katolicki na Podlasiu. Zbiór dokumentów erekcyjnych i funduszowych*, vol. 3: *Białystok*, ed. and intro. J. Maroszek, Białystok 1999; see also J. Maroszek, *Najstarszy dokument uposażeniowy Kościoła Farnego w Białymstoku z 4 grudnia 1581 roku*, „Białostoczczyzna”, 1996, no. 2(42), pp. 3–8; T. Krahel, *Zarys dziejów parafii Wniebowzięcia Najświętszej Maryi Panny w Białymstoku*, [in:] *Bazylika katedralna w Białymstoku: Księga jubileuszowa z okazji 100-lecia poświęcenia kościoła Wniebowzięcia Najświętszej Maryi Panny w Białymstoku (1905 – 17 IX – 2005)*, ed. T. Krahel, Białystok 2005, p. 14; J. Maroszek, *Dzieje Białegostoku w latach 1547–1692*, [in:] *Historia Białegostoku*, ed. A.C. Dobroński, Białystok 2012, pp. 64–66; ZZG, sign. no. 2, pp. 109–112.

¹³³ J. Wiśniewski, *Początki Białegostoku i okolicznego osadnictwa*, [in:] *Studia i materiały do dziejów miasta Białegostoku*, vol. 4, ed. H. Majecki, Białystok 1985, p. 26; on the map *Osadnictwo okolic Białegostoku* (ibidem, p. 19) Parszyce is marked with the symbol “+” on the bend of the River Białystok, close to the inlet of the Studena Woda stream (at present the inflow of the Bażantarka to the River Biała). Of interest is that T. Wasilewski, *Białystok w XVI–XVII wieku*, [in:] *Studia i materiały do dziejów miasta Białegostoku*, vol. 1, ed. J. Antoniewicz, J. Joka, Białystok 1968, p. 112 as well as the map on p. 113, do not mention Parszyce at all: "In 1581 these settlements are listed in the privilege for the Catholic church in Białystok under the names Zawady and Miłasze", see ibidem, footnote 23: "the documents names only Zawady nad Supraślą [sic!]"

the former village of Ogrodniczki Wysokostockie¹³⁴ (separated by about 700–750 m to the north of the village of Wysoki Stoczek); similar opinions to those expressed by Maroszek have been voiced by, among others, Tomasz Popławski¹³⁵ and Tadeusz Krahel.¹³⁶ We have placed Parszyce in an approximated location between the villages of Wysoki Stoczek and Ogrodniczki Wysokostockie on the territory of the present-day housing estate Osiedle Wysoki Stoczek.

The settlement of Puszkarze is only visible on Perthées's map of Podlasie, and here between Piwowary and Ołdaki. The inventory of Goniądz starosty of 1571 describes that "Puszkarzowie [...] Boundaries are held with Hołdaki."¹³⁷ The village of Puszkarze has been marked in the place of the present-day field which PRNG defines as *Puczkarzy*,¹³⁸ around 900 m to the north-west of the settlement of Kosioriki.

Roszki-Trojanki is marked only on the map by Perthées; it has been localised, according to the aforementioned on the left bank of the River Awissa, between the settlements of Roszki-Ziemaki and Roszki-Bieńki (today a part of the village of Roszki-Wodźki).

The village Solistowo (Szelistowo) also only appears on the map by Perthées. Enhanced by information that the settlement was 'divided between Solistówka and Żrobki'¹³⁹ we have placed Solistowo with an approximated localisation on the left bank of the River Słuczka, about 800 m to the north of Solistówka.

Trubianka was mentioned and described in *Rejestr pomiaru włócznej Kleszczel w roku 1560*, however the description therein contained does not allow for one to precisely locate a point on the map.¹⁴⁰ The point has been placed where PRNG has determined it to be a part of the forest called *Trubianka*, around 3 km to the north-east of Kleszczele.¹⁴¹ The inspection of 1616 mentions the wild Trubianka nature reserve (*uroczyisko*).¹⁴²

Wólka has been marked in an approximated location between the settlements of Mazury and Brok. In 1576 the hamlet of Wolka, belonging to the demesne Mazury, had "10 voloks of average

¹³⁴ J. Maroszek, *Najstarszy dokument*, p. 6: "Presbytery tithes were to be given by the inhabitants of the village of [...] Parszyce (presumably Ogrodniczki Wysokostockie)"; the same idem, *Dzieje Białegostoku*, p. 66; the aforementioned researcher in producing *Zbiór dokumentów erekcyjnych i funduszowych* (vol. 3: *Białystok*), as conjectured on another possibility re. the location of Parszyce: "an unidentified name. I. Grochowska claimed that from amongst the names of the grounds cultivated by peasants from the villages of Białystoczek were to be found grounds called *Parszyna*, which was to have been a reminiscence of the lost Parszyce. We personally are of the view that Parszyce is the name of a boyar village of boyars in existence until the eighteenth century around the present-day Warszawska Street (formerly Bojarska Street) known from 1676 but without a name designation", *Kościół katolicki na Podlasiu. Zbiór dokumentów erekcyjnych i funduszowych*, vol. 3: *Białystok*, p. 32, footnote 23.

¹³⁵ T. Popławski, *Przestrzeń współczesnego miasta Białegostoku na tle historycznych podziałów*, „Białostoczczyzna”, 1996, no. 2(42), p. 16: "the date of the village's foundation is unknown even though much points to, Ogrodniki being together with the manor establishment of Wysoki Stoczek referenced in historical records, the Church village of Parszyce existing already in 1581. And although it may sound rather unconvincing the fundamental reason for which I claim that Parszyce be located in this place is the lack of anywhere else in the Białystok estate where it could have been founded."

¹³⁶ T. Krahel, *Zarys dziejów parafii Wniebowzięcia Najświętszej Maryi Panny*, p. 14: "Parszyce was in the place of the subsequent demesne of Wysoki Stoczek and Ogrodniczki".

¹³⁷ Goniądz 1571, p. 162.

¹³⁸ PRNG no. 112914.

¹³⁹ P. Swoboda, *Solistowo* [in:] NMPol, vol. 15 p. 63; see J. Wiśniewski, *Dzieje osadnictwa w powiecie augustowskim od XV do końca XVIII wieku*, [in:] *Studia i materiały do dziejów Pojezierza Augustowskiego*, ed. J. Antoniewicz, Białystok 1967, pp. 81, 85, 90–92.

¹⁴⁰ *Rejestr pomiaru włócznej Kleszczel z roku 1560*, pp. 237–238: "The town demesnes at Trubianka are 25 voloks of poor quality land. In distribution they spread from Czochów [...] The fields lying with one ends to the wall of the town voloks, have their other end on the volok of the hamlet of Czochów and the royal forest, with one side to the town voloks at Dobra Woda, and the other side to the voloks at the hamlet of Jelonka. The boundaries around staked out and measured in rods. One wall borders with the town voloks. The second wall borders with the voloks of the hamlet of Jelonka. The third side with the voloks of the hamlet of Czechów and the royal forest of Kamieniecka."

¹⁴¹ PRNG no. 140564; Kondratiuk, p. 204: "Trubianka, today a field in the village of Kleszczele"; on the WIG map of 1931 visible are fields (right up to Jelonka) to the right of the Kleszczele-Hajnowka road; cf. *Schematyczny plan gruntów Kleszczel z podziałem na pola miejskie [...] i przedmieścia według pomiaru włócznej z 1560 r.* placed within: M. Roszczenko, *Kleszczele*, p. 42.

¹⁴² ASK XLVI 149, f. 141: "The Trubianka (*uroczyisko*) reserve is 25 voloks. A rent of 22 Lithuanian grosz is paid on each, facit zł 22/27/9". *Rewizja przez komornika Pelchowskiego pomiaru miasta JKMCi Kleszczel* of 1784 mentions: *Granica obrembu Trubianki*, see M. Roszczenko, *Kleszczele*, p. 419.

ground.”¹⁴³ The inspection of 1616 contains information that the hamlet of Wólka “was deserted and its land held by serfs from the villages of Mazury and Brok. There were 10 voloks.”¹⁴⁴ What remained of this village is presumably the name of the forest *Mazury*¹⁴⁵ situated between the indicated settlements. We have marked Wólka on the terrain of the aforementioned forest, about 6.3 km to the north-east of Wysokie Mazowieckie.

Similar problems have occurred in the location of settlements in the Drohiczyn land.

Budkowszczyzna received an approximated location around 2 km to the west of Drohiczyn. Such a location is implied in the document of 1522 concerning land distribution – then it was Jan Radziwiłł the Drohiczyn starost who gave ground to the Drohiczyn usher Bartłomiej Budka. This document contains a description of the boundaries of the bequeathed lands; on the one side enumerated is the boundary with the municipal lands of Drohiczyn, while on the other with those of the village of Runice.¹⁴⁶ It is possible that the remains of the aforementioned village of Budkowszczyzna (in 1551 under the name Sadowiec) is the eastern, contemporary part of the lands of the village of Wólka Zamkowa, which fairly ‘untypically’ separated the village of Runice from Drohiczyn (according to the data of the State Boundary Register, *PRNG*).

The settlements of Blochy and Cholewy, lying on the right bank of the River Buczynka, we have marked as approximated taking as suggestions those resulting from its location on the map by Perthées. We have decided to locate the settlement of Blochy on the main map between the settlements of Sterdyń and Stelągi and the village of Cholewy between Stelągi and Kuczaby. Both these settlements do not appear in later cartographic materials.

The village of Choszczówka has received an approximated location on the map; it has been marked on the right bank of the River Myśla, on the Liszki – Skrzeszew road, about 500 m from the last buildings of the village of Liszki.¹⁴⁷

Koce-Masły, the colony as well as the name of a field in the village of Koce-Basie and Koce-Schaby,¹⁴⁸ has been marked in an approximated location within the territory of the village of Koce-Basie. Thanks to the information obtained in the village administration (sołectwo) at Koce-Schaby it has been possible to locate the settlement with more accuracy: Koce-Masły we have marked around 630 m to the south of the crossroads of the roads Koce-Basie – Kobusy and Koce-Schaby – Trzaski as well as about 620 m to the north of the *Dąbrówka* forest.¹⁴⁹

Krakówki-Świdry has been marked between the settlements of Krakówki-Dąbki and Borzymy. Amidst the aforementioned settlements is a field which the local inhabitants call Świdry.¹⁵⁰ This information has allowed us to make an approximated location for the settlement of Krakówki-Świdry and here around 500 m to the west of Krakówki-Dąbki and around 600 m to the east of the village of Borzymy.

The village of Leszczka-Mikulicze, appearing in sources from the 1560s as Mikulicze, Leszczka Mikulicze,¹⁵¹ does not appear in any available cartographic material until the 1930s. For the first time Leszczka is visible on the WIG map of 1937. It is interesting that on the map by von Stein marked is a glade in a forest on the road heading from Czartajew to Wiercień Duży, of dimensions of approxi-

¹⁴³ LWP 1570, 1576, p. 106: “The hamlet Wolka. In this hamlet there are 10 voloks of average land, this comprising: cultivated voloks 7, of which they pay a Polish złoty and 4/5, which from all the cultivated voloks makes for a Polish złoty 29/5. Unbroken [translator: designed for pulling, working with animals or a large volok] other voloks 2, they pay for each Polish złoty 1/25, and from both these unbroken these voloks makes for Polish złoty 3/20. An empty, uncultivated volok – 1.”

¹⁴⁴ ASK XLVI 149, f. 115v.

¹⁴⁵ PRNG no. 78678.

¹⁴⁶ Information from Dr. T. Jaszczółt.

¹⁴⁷ The exact location of Choszczówka was possible thanks to information from Bogusław Niemirka, for which we are most grateful.

¹⁴⁸ Kondratiuk, p. 90; they do not appear in PRNG.

¹⁴⁹ PRNG no. 22411.

¹⁵⁰ Information from Dr Tomasz Jaszczółt.

¹⁵¹ In 1565 Mikołaj Kiszka the Drohiczyn starost changed lands with the Leszczyński family of the Perlejewo parish: in exchange for certain lots in Leszczka in the parish of Perlejewo he gave them ground called Mikulicze, situated at his Czartajew properties; NGAB, Mińsk, f. 1759-2-9, ff. 525v–526 (information from Dr Tomasz Jaszczółt); Popis 1567, f. 981: „Село Микуличе Ваврынецъ Станиславовичъ [...] Юри Миколаевичъ [...] Янь Павловичъ [...] Станиславъ Андрѣевичъ”; AUPL, p. 293: „Leszczka Mikulicze: nobleman Jan son Pawłow, nobleman Jerzy son Mikołajow, nobleman Stanisław son Andrzejow, nobleman Wawrzyniec son Andrzejow, the heirs of Leszczka Mikulicze”.

mately 650 m length and around 170 m in width, in the place where at present is to be found Leszczka. Whether this empty forest terrain constitutes the remains of the deserted, neglected or destroyed settlement of Leszczka-Mikulicze is difficult to state unequivocally. Given such a conjecture, this would be an example of the survival of a settlement's name within the consciousness of the region's inhabitants for 300–400 years. We have placed the sixteenth-century settlement in the aforementioned location as an approximation.

An extended commentary is required in the case of the village and town of Miedzna vel Międzyzylesie.¹⁵² The village of Miedzna has fifteenth-century registers. In that century the church of St. Stanisław was founded, the first mention being 1470. The church funder could have been the then owner of the village, Stanisław Karski. The said in 1469 bequeathed the Miedzna estate to his daughter and her husband Stanisław Wodyński. Following Wodyński's death in 1503 the owner of Miedzna became his son Mikołaj, who died in 1528, and after him the next in line from the Wodyński family was Jan, who bestowed Magdeburg rights on Miedzna in 1531. At the time beside the bestowing of a town charter and rights, the settlement changed its name to Międzyzylesie.¹⁵³ This name was to function simultaneously in the mid sixteenth century and for the duration of the seventeenth century with the old name of Miedzna.¹⁵⁴

The location of a town did not completely eliminate, as it seems, the village of Miedzna. Both settlements, the town of Międzyzylesie vel Miedzna and the village of Miedzna, functioned in the second half of the sixteenth century, something borne out by the tax registers. The register of 1578 although it does not contain the tax payments from towns, does mention the village of Miedzna, which paid was 7 peasant voloks and five smallholders with land. The most information is provided by the register of 1580. Mentioned is the small town of Miedzna (58 municipal voloks, 16 market square houses, 84 street houses, an impoverished glass worker, a baker and four peddlers) as well as the village of Miedzna (6 peasant voloks). Both registers also note payments from the *poświętne* of Międzyzylesie – in 1578 from five smallholders with land, while in 1580 only from five unspecified smallholders. The liquor excise tax of 1580 notes under the heading “Miedzna” a payment of this tax brought by “the mayor with council, a Międzyzylesie burgher.”¹⁵⁵ The last register of 1588 mentions merely the town of Międzyzylesie (58 municipal voloks, 16 market-square town houses, 20 street houses, 64 poor dwellings) as well as a collective payment (five annual rental mills, 39.5 peasant voloks, 19 smallholders with land) from the Międzyzylesie parish from Katarzyna Kryska of Lisowo, 1^{mo} voto Wodyńska, the wife of Stanisław Kryski, the Mazovian governor.¹⁵⁶ The tax registers consistently define the parish as Międzyzylesie.¹⁵⁷ The appearance of the village of Miedzna next to the town of Międzyzylesie was equally noted in 1599 by Aleksander Jabłonowski.¹⁵⁸

The exact location of the village of Miedzna following the founding of the town of Międzyzylesie remains unknown. Its identification is made all the more difficult by the fact that in the seventeenth century the village of Międzyzylesie appears (in existence to this day),¹⁵⁹ situated about 9 km to the north-west of the former small town of Międzyzylesie (at present the parish and district village of Miedzna). The appearance of this settlement in later sources make the employment of a retrogressive method

¹⁵² The below fragment concerning Miedzna vel Międzyzylesie was prepared by M. Gochna.

¹⁵³ Jaszczolt, *Osadnictwo*, pp. 126–129. According to E. Borowski Miedzna gained its charter already in 1522 while in 1531 Jan Wodyński merely proclaimed the said rights. E. Borowski, *Sanktuarium Matki Bożej w Miedznej*, Drohiczyn 1996, p. 10.

¹⁵⁴ ASK I 70, ff. 31v, poll tax register of 1663: in the headings “Parochia Miedzilescen[sis]” and “Miedzna cum villis et Miedzilesz”, in the Miedzna notes. Ibidem, f. 229, poll tax register of 1674: in the heading “Paraphia Miedznienska”, in the notes the demesne and Miedzna townlet. BCzart., Łoyko Collection, MS 1099 IV, f. 607, poll tax register of 1676: “Miedzna townlet”. The sejm constitution for the year 1631 establishing the land court terms in the same place denominates the townlet as Międzyzyleś. In the constitution of 1678 reestablishing the land court sessions anew following the failure of the previous act to be realised used the name “Międzyzyleś alias Miedzna” as well as Miedzna. In turn, the privilege of Jan Butler of 1690, the nota bene heir “at Miedzna and Krześlno”, defines it as the townlet of Miedzna alias Międzyzyleś. VL, vol. 3, p. 331 (692), vol. 5, p. 284 (582); M. Baliński, T. Lipiński, *Starożytna Polska pod względem historycznym, jeograficznym i statystycznym*, Warsaw 1886, vol. 3a, p. 417.

difficult. In accordance with the principles of the Atlas we have nevertheless decided to locate the settlement to a degree approximated to the sixteenth-century village of Miedzna in the place of the seventeenth-century village of Międzyzylesie (a hypothetical identification).¹⁶⁰ Evidence pointing to just such an identification is the document of 1534 in which the owner of both settlements Jan Wodyński bestowed a dowry and dower on to his wife Małgorzata Radzanowska. In this act of bequest, mentioned are the settlements from the Drohiczyn land belonging to Wodyński in three estate demesnes – Miedzna, Krześlin and Łysów. The settlements mentioned in the document from the particular demesnes are enumerated in an order geographically determined, while from where a given settlement appears on the list one can conjecture as to its location. In the demesne of interest to us, that of Miedzna, the village of Miedzna is mentioned after Stara Wola, Tchorzowa, but before Kozolupy, Rostki, Ugoszcz, the lost village of Mikołajewo and Pogorzela.¹⁶¹ It is therefore a localisation identical with the seventeenth-century localisation of the village of Międzyzylesie. And we have adopted the name from the location founding document – Międzyzylesie¹⁶² to enable a differentiation in the present volume of the town of the Wodyński family from that of their village of Miedzna. Given such an assumption the village of Miedzna, initially lying in the place of present-day Miedzna, following the founding of the town of Międzyzylesie was moved together with the name to a new place, while leaving the church in the old location. Subsequently, more than likely in the first half of the seventeenth century, a swap in the place names occurred, so during the course of the seventeenth century the use of both names in reference to the same town were employed.

Perthées's map has been used to locate the approximated settlement of Miodusy-Michałowięta. It has been placed between Miodusy Wielkie (Miodusy-Stara Wieś) and Miodusy-Perki (at present a part of the village of Miodusy Wielkie), on the right bank of the River Brok Mały. In 1546, the sons of the late Michał owned the village of *Miodusy Antiqua*.¹⁶³

The settlement of Płatowo has been marked between the settlements of Mierzynówka and Czarna Wielka, in the place of the field referred to by PRNG as *Platowo*.¹⁶⁴ It is to be found around 2.3 km to the south-east of Mierzynówka and around 2.5 km to the north-west of Czarna Wielka, to the north of the road between the mentioned villages.

Porzeziny-Surały as well as Porzeziny-Sipki have been localised to the north-west and north of Porzeziny-Giętki (to the west and south-west of Kozłowo). Around 350–450 metres to the north-west of Porzeziny-Giętki is to be found a field called by the local inhabitants *Suwały*; and it is there that we have also marked Porzeziny-Surały.¹⁶⁵ Appearing in court ledgers Porzeziny-Sipki has been described as a settlement bordering on the lands of the settlement of Koryciny, which would point to Porzeziny-Sipki being the most northern most village in this area.¹⁶⁶ It was marked about 800 m to the north of Porzeziny-Giętki on the Kozłowo – Sypnie road.

The village of Winna-Cibory has been marked in an approximation degree thanks to the map by Perthées. *Cibory* was placed on it between the settlements of Winna-Wilki and *Bojenka*, on the right bank of the River Kukawka (Winna). On von Stein's map one can see in this place a building referred to as *Heu Scheune*. Taking into consideration the positioning on Perthées's map we have marked an approximated location for the settlement of Winna-Cibory on the Winna-Wilki – Bujenka road, about 600 m from the village of Winna-Wilki.

¹⁶⁰ H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7; see footnote 7 above.

¹⁶¹ The PAAS and PAS Library in Cracow (Biblioteka Naukowa PAU i PAN w Krakowie), MS 8822, no. 2, p. 117; AGAD, Sumariusz księgi ziemskiej drohiczyńskiej z l. 1529–1534, p. 138. Both sources are copies from the lost Drohiczyn ledger for the years 1529–1534. The second excerpt lists also Orzeszówka up to Rostki and before Mikołajewo, but the author of the extracts has put a question mark next to this note. The first extract does not recall this settlement even though it is known it existed in the sixteenth century and was the property of the Wodyński family. Even if in fact Orzeszówka was mentioned in the original, this would not upset the logical arrangement of the list of settlements in this document.

¹⁶² Kopicjana 3, pp. 314–321. Under such a name this settlement appears also in the itinerary of Stefan Batory. The king stopped off there on his return trip from Tykocin to Warsaw on the 1 August 1576. A. Pawiński, *Księgi podkarpackie z czasów Stefana Batorego 1576–1586*, Warsaw 1881 (*Źródła Dziejowe*, vol. 9), part 1, p. 58; M. Wrede, *Itinerarium króla Stefana Batorego 1576–1586*, Warsaw 2010, p. 81.

¹⁶⁴ PRNG no. 102308.

¹⁶⁵ Information from Dr T. Jaszczolt.

¹⁶⁶ Information from Dr T. Jaszczolt.

We have also marked settlements within the Mielnik land by means of an approximated degree of location.

Cieciorki (at present: Jeziorki) has been marked according to information that has been found in the Mielnik ledgers including one of 1551 with the division of lots between the heirs of Malinowo and Korzeniówka.¹⁶⁷ The approximated localisation of the settlement of Cieciorki has been marked about 750 m to the south-west of the village of Korzeniówka, to the east of the road between Malinowo/Lipiny and Korzeniówka; in this region also the local inhabitants referred to the field, grazing land and forest as *Jeziorki*.

Of interest is the example of the settlement of Młynarze on the River Moszczona.¹⁶⁸ The demise of the village(?) of Młynarze and its division into separate settlements may be seen to this day in the names of the settlements derived from the surnames of the owners themselves.¹⁶⁹ Besides the source information it was impossible to establish a precise point for the actual location of the village of Młynarze. The approximated location point has been placed between the present-day settlements that grew out of the positions of mills on the left bank of the River Moszczona, between the contemporary villages of Homoty and Kudelicze, at the level of the settlement of Szerszenie.

Having discussed localisation in its approximated degree we shall now describe several examples of tied location in Podlasie in the second half of the sixteenth century.

The village of Dupki has been marked as a settlement tied to that of Rymki. The grounds of the settlement at Dupki were attached to the village of Rymki at the turn of the 1550s and 1560s; in 1563 there appeared in the entry for the hamlet of Rymki the surnames of those who had figured in Dupki in 1558.¹⁷⁰ The name of the settlement at *Dupki* presumably functioned for a long time given that the poll tax register for 1676 mentions: “villa Rymki seu Dupki.”¹⁷¹

The Karpowszczyzna demesne, appearing in sources for the year 1581,¹⁷² has received a localisation connected to the village of Werweczki. Prior to 1581 this demesne was held by a certain Karp, after him Piotr Osmolski, and from 3 November 1609 Erazm Sankiewicz;¹⁷³ in 1617 it numbered 7 voloks 29 morgens and 14½ rods.¹⁷⁴ The name of the demesne had ceased to appear in inventories by the 1650s. According to the findings of Michał Sierba: “The grounds of this demesne were incorporated into the composition of the voloks of the village of Werweczki, although it still belonged to Sankiewicz’s widow it was free of all obligations in relation to the Radziwiłł family, while its acreage was again six voloks. Right after the Swedish Deluge none of Sankiewicz’s descendants took up their right to the land.”¹⁷⁵

The localisation of the village Miłosze also requires a few words of explanation. Jan Glinka was of the view that Miłosze was situated on the River Supraśl,¹⁷⁶ Tadeusz Wasilewski saw its existence to the

¹⁶⁷ Information from Dr T. Jaszczolt.

¹⁶⁸ See in this volume M. Gochna, *Character of settlements*, [in:] AHP Podlasie, in this edition III.3.2a.8, where can be found an extensive description of the problem area and research doubts connected with the Młynarze on the River Moszczona.

¹⁶⁹ *Maskowic* = Maćkowicze, *Kudzielicz* = Kudelicze, *Wawryzn Homoty* = Homoty, *Matys Pawłowicz* = Pawłowicze, *Oxincic* = Oksiutycze; Moszczona Młynarze has been placed by Dorota Michaluk on the right bank of the River Moszczona at its initial course without giving any convincing arguments for such a localisation, Michaluk, *Ziemia mielnicka*, map no. 4: *Osadnictwo w ziemi mielnickiej w 1674 r.* as well as pp. 68, 130.

¹⁷⁰ *Regestr pożytków zamku y dwora Saraskiego w roku 58* enumerates: “Dupki village. In which are 5 voloks. Rent is paid on these of 60 grosze a head, making for 5 threescore,” AWAK 14, p. 46. Dupki again appears in the account of the Zawyki starosty for 1558: “Dupki village. Dorosz Hriniewicz [voloks] 1 Andrzej Chwieckowicz 1 Jacko y Ustian 1 Mikita with Iwanicha 1 Dorosz 1 In this village voloks 5”, *ibidem*, p. 52; the account of the hamlet of *Rimki* of 23 November 1563 mentions among others: “Rosdanie wlok thego siola [...] a poczina sie rosdawanie od gruntow ziemian Szredzinskih. Rezy. [...] Dorosz [wloki] 1 Ustian Jaczko 1 Andrzej Jasiewicz, Iwanowa, Mikita, Klimko, Pasko 1 Andrzej Chwieczko; thim czterem wiszei pisanim wlok 1”, PKGE, p. 462. The village Dupki has been marked to the north of the village Rymki on the map “The Suraz estate, 1558”, [in:] Demidowicz, p. 25. ASK I 47, f. 118 (1577 r.): “Rimki hamlet 10 voloks making for 6/20 zloty”.

¹⁷⁵ *Ibidem*, p. 58.

¹⁷⁶ J. Glinka, *Zamek obronny w Białymstoku na przełomie XVI i XVII wieku*, „Rocznik Białostocki”, vol. 2, 1961, p. 55,

north of Białystok and on the left bank of the aforementioned river,¹⁷⁷ Jerzy Wiśniewski combined Miłosze with Bojary, and subsequently with the name Sielachowskie,¹⁷⁸ Józef Maroszek identified Miłosze with the present-day village of Osowicze,¹⁷⁹ Tadeusz Krahel (after Wiśniewski) accepted that Miłosze is Bojary,¹⁸⁰ Elżbieta Kowalczyk-Heyman (similarly to Wiśniewski) treats Miłosze, Sielachowskie and Bojary as one and the same place,¹⁸¹ while Henryk Rutkowski see the possibility to identify the settlement of Miłosze with the present-day Białystok district of *Pietrasze*.¹⁸² The lack of concrete bases for an exact localisation of where the mentioned Miłosze would have stood in the second half of the sixteenth century has meant that they are marked in a location connected with the village of Osowicze (in the sixteenth century Supraśl).

Oziabły was marked as a settlement tied to that of Baranki. It appeared in 1558 as *Oziabły* as well as *Usziebli* and is identified with the village of Baranki.¹⁸³ We do not know whether the grounds of the village of Oziabły were increased and the name of the settlement changed to Baranki (Oziabły is 14 voloks, while Baranki 31), or whether it was incorporated into the newly founded settlement. As with the village of Dupki some of those mentioned in 1558 in the village *Usziebli* appear in 1563 in the distribution of voloks for the hamlet of Baranki.¹⁸⁴

The village of Zapole (mentioned only 1558) is recalled in the source together with the village of Tryczówka.¹⁸⁵ The lack of any information whatsoever with regard to the localisation of Zapole was to decide on giving the said settlement a location tied with the aforementioned Tryczówka.

footnote 16: „Wsie bojarskie we włości białostockiej, podzielone według przynależności do dwóch kluczów: w kluczu wysokostockim wieś Bojary n. rz. Białą (ob. w m. Białymstoku, ul. Warszawska od rogu ul. 1 Maja do rogu ul. Marchlewskiego) i Bojary Miłosze n. Supraślą w miejscu późniejszego poligonu”.

¹⁷⁷ T. Wasilewski, *Białystok w XVI–XVII wieku*, p. 112: “To the north the Białystok estates reached to the River Supraśl. On its southern bank were situated the settlements of Zawady and Miłosze, belonging to the Białystok estates and inhabited by free peasants”; *ibidem*, footnote 23: “The village Usowicze was presumably initially a part of the lost village of Miłosze”; on the map p. 113 Miłosze has been marked between Białystok and Jurowce.

¹⁷⁸ J. Wiśniewski, *Początki Białegostoku i okolicznego osadnictwa*, p. 26: “Miłosze (Miłosze), known also later as Bojary, appearing already in 1784 under the name Sielachowskie (taken from the boyar line of Sielachowski), was to be found to the north of Białystok”; on the map (*ibidem*, p. 19) Miłosze is marked with an “+” to the south of Sielachowskie between the villages of Zawady and Pietrasze.

¹⁷⁹ J. Maroszek, *Najstarszy dokument*, p. 6: “Miłoszów (presumably Usowicz on the River Supraśl)”, the same [in:] *Kościół katolicki na Podlasiu. Zbiór dokumentów erekcyjnych i funduszowych*, vol. 3: *Białystok*, p. 14; the aforementioned researcher conjectures the possibility of a location with the village of Sielachowskie: “Miłoszów (of the Sielachowski family?)”; *idem*, *Dzieje Białegostoku*, p. 66.

¹⁸⁰ T. Krahel, *Zarys dziejów parafii Wniebowzięcia Najświętszej Maryi Panny*, p. 14: “Miłosze – Bojary”.

¹⁸¹ E. Kowalczyk-Heyman, *O mazowiecko-litewskiej ugodzie granicznej z 1358 r. (głos w dyskusji)*, SG, vol. 7, 2019, p. 220: “Firstly the name *Sielachowskie* is very late, mentioned only in 1784. Earlier the village bore the name *Miłosze* (known from 1581), and subsequently *Bojary*. To which it initially lay to the north of Białystok (I am not able to determine however on which side of the River Biała it lay, this being the left bank inflow of the River Supraśl). In the nineteenth century it was relocated to Supraśl while today it constitutes a district of Białystok.”

¹⁸² H. Rutkowski, *Odpowiedź na krytykę artykułu o granicy z 1358 r.*, SG, vol. 7, 2019, p. 229: “Miłosze, later known also as Bojary, in 1784 it was to bear the name *Pietrasze* as of present.”

¹⁸³ AWAK 14, p. 46: “The village of Oziabły. In it 13 voloks. Payment on the 13 voloks 60 grosze each, paid from the three fields (*obrub*) [land cultivated outside rural fields, sometimes a place where a new village was built] of Dziekciarowski, Bohdankowski and Zimnochowski, in which there are 14 voloks at 60 grosze making for 27 three kopas. One volok for the voyt is free of rent”; has been identified with the settlement of *Usziebli* appearing in the sources, (AWAK 14, pp. 52–53: “The village of *Usziebli* [...] In this village there are 14 voloks”), see Kondratiuk, p. 150: “Oziabły a village lost or unidentified in the Łapy district: the village *Oziabły*, *Usziebli* 1558 wójt. zawoykowskie, star. Suraż”; is considered equally to be equal to the earlier name for the village of Baranki: “Thus *Usziebli* (Oziabły) in 1558 is known as Baranki in 1563”, Demidowicz, p. 32; ASK I 47, f. 118 (1577): “the hamlet of Baranki has 31 voloks making for 20/20 złoty. In this village one tavern makes for 12 grosze.”

¹⁸⁴ AWAK 14, pp. 52–53: “the village *Uszebli* [...] Prokop Sierhieiewicz [...] Apun [...] Narko [...] Grzesz [...] Marchołka Oliexa [...] Sienko Lewonowicz [...] Nestor [...] Chyc Stepanowicz [...] Iliasz Stepanowicz [...] Wieremiej Wiesz [...] Konon Szczepanowicz [...] Choma Skoczkwicz [...] Klimko Antonowicz [...] Onacz Sarko [...] Kacz Woyth [...]”; PKGE, pp. 463–464: “Siolo Baranki [...] distribution of voloks [...] according to squire Dziewialtowski the names of the serfs are written thus [...] Procop Sergieiwicz [...] Hapun [...] Narko [...] Grzes [...] Oliexa Marchowka [...] Zienko Liewonowiczi [...] Niestor [...] Liewon Stepanowicz, Micz [...] Wieremei Wieszc, Iliasz Stepanowicz [...] Choma Skoczkwiczi [...] Klimko Antonowicz [...] Onacz Sarko [...] Kacz woith [...]”.

¹⁸⁵ AWAK 14, p. 46: “The village Tryczowka Zapolie. In it 24 voloks. Rent paid on the 24 voloks at 60 grosze a throw. Paid from 6 gardens at 6 grosze; paid from 2 fields (*obrub*) [land cultivated outside rural fields, sometimes a place where a new village was built], in which there are 9 voloks at 60 grosze each; one backwater hamlet paid at 1 gr. 24, all together making 34 kopas. 1 volok is free of rent for the voyt. 1 volok for the miller whose patch is at the mill”; *idem*, p. 54: “The village of Tryczowka at Zapole [...] there are 26 voloks in the village”; both pieces of information from 1558.

Situated in the Drohiczyn land Długa Dąbrowa-Dworaki received a localisation tied to the settlement of Dąbrowa Wielka (in the sixteenth century Długa Dąbrowa). In sources from the sixteenth century it was sometimes referred to in connection with Dąbrowa Wielka (Długa Dąbrowa) or with Dąbrowa-Cherubiny.¹⁸⁶ Dworaki has not appeared in the cartographic material, something that has made its location more difficult. It is possible that Długa Dąbrowa-Dworaki was situated in the region between Dąbrowa Wielka and Dąbrowa-Cherubiny.¹⁸⁷

Kajków may be treated as an example of a settlement with tied localisation in the Mielnik land. It is mentioned only in 1580 together with the village of Cicibór (at present Cicibór Mały).¹⁸⁸ It does not appear on the cartographic material thereby making its location impossible. The scant later references do inform one, however, that Kajków at the beginning of the 1880s belonged to the parish at Bordziłówka, but in 1880 as a awuls demesne (farm without peasants) it was a part of the Roskosz and Hrud estate.¹⁸⁹ The close proximity of the boundary of the Podlasie Voivodeship in the second half of the sixteenth century which ran in this region along the course of the River Klukówka (in the sixteenth century Białka), reduces somewhat the area upon which Kajków could be found. We may suppose that it was located somewhere between Cicibór Mały and Hrud, to the west of the road connecting Biała Podlaska with Janów Podlaski. The Kolonia Kajków mentioned in PRNG (no. 48292), being a part of the village Roskosz, is located about 2 km to the south-east of the village of Cicibór Duży and is set on the right bank of the River Klukówka, which in the second half of the sixteenth century was located within the Brześć Litewski Voivodeship.¹⁹⁰ Given the absence of information on the location of Kajków it has received on our map a tied location to the village of Cicibór Mały.¹⁹¹

Unknown localisation. Across the territory of the Podlasie Voivodeship for the second half of the sixteenth century we have not been able to locate 48 places and settlements (21 in the Bielsk land, 25 in Drohiczyn and 2 in the Mielnik land), which constitutes 2.9% of all settlements. Some of them appear only sporadically in the source material, sometimes being just a single mention or solitary entry. Often the scant brevity of the information makes it simply impossible to locate a settlement either in an approximated way or even with regard to determining its parish affiliation.¹⁹² It also follows to remember that many village names that appear in the military rolls (*popis*) for the years 1565 and 1567

¹⁸⁶ For example: *Popis 1565*, p. 337: “Bernat Dombrowski Бернать з Дл҃кгеи Домьбровки, з Двораковъ, з часты Сарафановьскои, ставиль кон в пань[серу], в пр[ыльбицы], з ощепомъ”; *Popis 1567*, f. 934: “Двораки Долгая Дуброва”; ASK I 47, ff. 556v (1580): “Cherubiny Dworaki on one rental water wheel”; idem, f. 542 (1580): “Długa Dąbrowa Dworaki the nobleman Jan wdzielczy[e?]nski with his partners paid taxation on the Dworaki properties of 10 voloks at 15 grosz a pop giving for 5 złoty all in.”

¹⁸⁷ On the map *Województwo podlaskie w II połowie XVII w. Osadnictwo i struktura własności ziemskiej* and included within A. Laszuk’s work Dąbrowa, Dworaki, Serafiny have been marked to the north of Dąbrowa Długa and to the east of Dąbrowa Cherubiny, however no arguments are given to substantiate such a localisation; see Laszuk, *Zaścianki*. An absence of information on the localisation of Dąbrowa-Dworaki in, among others, the work by J. Maroszek on the history of the parish of Szepietowo; see idem, *Dzieje obszaru gminy Szepietowo w XV–XX wieku*, Szepietowo 2006, p. 72.

¹⁸⁸ ASK I 47, f. 554: “Cziczibor Kaikow the nobleman Stanisław Oleński in the name of his wife from Czicziborz paid on 3 voloks at 30 grosz for each [...] paid on two landless gardeners at 4 grosz a head giving for 8 grosz and on a rental water wheel grosz 12. Miss Jadwiga Zarczyńska paid on five landless gardeners 4 grosz a head making for 20 grosz.” cf. *Podlasie I*, p. 68.

¹⁸⁹ SGKP, vol. 3, p. 671; ibidem, vol. 9, p. 757.

¹⁹⁰ On the division of the estate of Jerzy Ilinicz and the history of the area in the mid sixteenth century see, among others, A. Buczyło, *Dokument fundacyjny Jerzego Ilinicza z 1520 roku dla kościoła w Białej Podlaskiej*, “Rocznik Lituanistyczny”, vol. 5, 2019, pp. 233–249; Michaluk, *Ziemia mielnicka*, pp. 25–52; T. Kempa, *Mikołaj Krzysztof Radziwiłł Sierotka (1549–1616) – wojewoda wileński*, Warsaw 2000, pp. 220–222; A. Wawrzyńczyk, *Rozwój wielkiej własności na Podlasiu w XV i XVI wieku*, Wrocław 1951, pp. 19–21, 24–26, 121; *Podlasie II*, pp. 24–25. Cicibór (Duży) numbered 17 voloks in 1537; see P.A. Аляхновіч, С.А. Рыбчонак, А.І. Шаланда, *Род Іллінічаў у Вялікім Княстве Літоўскім у XV–XVI стагоддзях*, Мiр 2015, p. 259, no. 139 (many thanks to Dr. A. Buczyło for pointing things out on this matter).

¹⁹¹ In the work of D. Michaluk (Michaluk, *Ziemia mielnicka*) on the attached maps (map 3: *Osadnictwo w ziemi mielnickiej w 1580 roku*, map 5: *Sieć parafialna kościoła katolickiego w ziemi mielnickiej w 1580 roku*, map 6: *Sieć parafialna kościoła katolickiego w ziemi mielnickiej w 1674 roku*, map 10: *Własność ziemska w ziemi mielnickiej w 1580 roku*) Kajki has been marked on the left bank of the River Klukówka, to the south-east of a Cicibor without providing any argumentation for such a localisation; Kajki does not appear on map II: *Powiat brzeski w drugiej połowie XVI w.* attached to A. Wawrzyńczyk’s work, *Rozwój wielkiej własności na Podlasiu*.

¹⁹² See in this volume B. Szady’s *Catholic Church administration borders*, [in:] AHP Podlasie, in this edition III.2.2a.8.

are in fact distorted, referring to plots or parts of a village, or reference the surnames of the owners, which all in complicates any correct identification.¹⁹³

Known are examples of villages which were incorporated into demesne. An inventory from the Goniądz starosty of 1571 mentions, among others, Szpakowo Stare, Szpakowo Wielkie and Koleśniki.¹⁹⁴ “Through the air that there was in the year 1572 and also because of poverty”¹⁹⁵ noticeably increased the number of deserted fees and reduced the number of inhabitants. One of the results of the aforementioned plague was an increase in the acreage of many demesnes. The inventory of the Knyszyn starostvo compiled in 1573 mentions only a single Szpakowo with 14 voloks for “the hamlet of Szpakowo is great and was turned into a demesne.”¹⁹⁶ A similar fate was to meet the village of Koleśniki: “this is the land of a fallen volok 1¾. They left it and it was turned over to the Potoczizni demesne.”¹⁹⁷ However Koleśniki, as opposed to Szpakowo Wielkie, did not become a part of a demesne. We do not know when the lands were taken out of the demesne and once again farmed and here possibly by returning inhabitants.¹⁹⁸ The inspections for the years 1602 and 1616 lists Koleśniki as 1.5 voloks (an acreage less than that of 30 years previously).¹⁹⁹ On the main map we have presented the state of affairs after the year 1573 – the solitary settlement of Szpakowo, demesne of the same name as well as the village of Koleśniki.

We shall present below a list of places the location of which has been impossible to establish on the main map. For each place whose location is unknown we give the type of ownership if this was not nobility (n): (r) – royal, (c) – Church, as well as the date that it appeared in the sources. An asterisk * denotes cases when this was the sole source of information. Mill settlements, smiths, demesnes and abandoned settlements have been described in the text above.

Table 2. Unlocated settlements in the Podlasie Voivodeship in the second half of the sixteenth century

land	settlement	parish	ownership	source references
Bielsk	Czowczyzna ²⁰⁰	Narew	(c)	1577*
Bielsk	Czuczerepki ²⁰¹	Brańsk	(r)	1527 1558*

¹⁹³ For example: Popis 1565, p. 297: Froncek Bernatowicz “з ЫкВльковъ, з Нековъ”, p. 299: Jan Machowicz “с Митковской всы”, p. 340: Jakub Mikołajewicz “с Прыжежыцкой стороны и с Помпъковской”; Popis 1567, f. 1141: “Матеушь Ленартовичъ Чайко съ Преровы”.

¹⁹⁴ Goniądz 1571, pp. 168–170: “The village of Szpakowo Stare has in it 10 voloks of average land [...] The village of Szpakowo Wielkie in which are 13 voloks of average land”, p. 181: “The hamlet of Koleśniki a mile from the town. And there 1¾ voloks of poor quality ground.”

¹⁹⁵ ASK LVI K11, f. 37.

¹⁹⁶ Ibidem, f. 55: “Szpakowo village, in this village are 14 voloks - - [voloks] empty in the year [15]72 as a result of death and abandoned 8.5 voloks - - Rye out of poverty is not given. There were 6 gardeners at this village. All of these in the year [15]72 left (abandoned/deserted) their garden (allotments) and not one off these paid (on them), nor took advantage of them. The village of Szpakowo Wielkie was changed into a demesne manor (*folwark*).”

¹⁹⁷ Ibidem, f. 58; cf. J. Maroszek, *Dobra goniądzkie w XVI–XVIII w.*, “Białostoczczyzna”, 1993, no. 4(32), p. 8.

¹⁹⁸ In the village of Krypno a part of the farmland that was deserted and abandoned in 1572 had come back into cultivation two years later, see ASK LVI K11, f. 38v: “as a result of death/the plague in the year [15]72 there were 20¼ voloks to which in the year [15]74 6 voloks were added and in the year [15]74 taxes were to be paid.”

¹⁹⁹ LWP 1602, p. 55: “Koleśniki village. In this village there are 1½ voloks of ploughed land [that is under constant serfdom namely cultivated with their own horses and ploughs], and they pay from each volok 60 grosz making for 3 złoty in total” ASK XLVI 149, f. 91: Kolesniki village. In this village are 1½ volok of ploughed land. With each year 2 złoty being paid for each giving a total of 3 złoty from this village” I would like to thank Dr. M. Sierba for these excerpts from the inspection of 1616.

²⁰⁰ ASK I 47, ff. 261v: „Plebania Narewska Slachatni Marczin Jablonsky Vrzednik Plebaniey Nareusky dal poboru od Poddanych [...] Plebaniey z wlok ossiadlych wsy 2 z zigmunthowa y czowczizny z wlok 20 po gr 20 czyni fl. 13 gr 10”; this does not appear in the work by D. Michaluk, *Z dziejów Narwi i okolic. W 480 rocznicę nadania prawa chełmińskiego 1514–1994*, Białystok-Narew 1996.

²⁰¹ AWAK 14, p. 26: “The village of Czuczerepki. In which with field (*obrub*) Daskowo are 10 voloks. 1 volok for the starost. In this year on 9 voloks at 60 grosze only have been paid, making for 10 three score”; ibidem, p. 39: “The village of Czuczerepki. Decz Titowicz ½ Joach Reska ½ Marcin Żegadlow son-in-law ¾ Jarosz Lit ¼ Sanek starost 1 Wasilicha Barwichowicz ½ Wasko Przystupka ½ Maciey Duda with Paweł ½ Michno son-in-law Mikołajow ¼ Wasko Smaga ¼ Maczko Łabun ½ Mikołaj Olszewski ½ Nogalia ¾ Maciey Klimkowicz ½ Sienko Krupka ½ Jan Koboska ¼. Voloks in total 9”. Kondratiuk, p. 47: “The village of Czuczerepki is unidentified or disappeared from the Bielsk district.” Według rozgraniczenia

²⁰⁶ Popis 1565, p. 317: “Матыс Серафиновичъ с Комарова – кѣон в кафѣтане з ошепом”; Popis 1567, ff. 1179–1180: “Парафия Тыкотинска [...] Коморово [...]”; ASK I 47, f. 269v: (1577 r.) “The village Bagińskie the noble Andrzej son of Aleks from their estate and from others of their co-participants of Komorzowo and Dopkowo”, ibidem, f. 799: “Paraphia Thykoczka - - Siekierki. Niecziczka. Hermany. Komorowo. Włok slacheczkich 20. Włok osiadłych 3.” “The Tykocin parish - -Siekierki. Niecziczka. Hermany. Komorowo. 20 land voloks and three voloks settled” (1591); APB, księga grodzka brańska 1640, f. 20v (taxation register of the Bielsk land of 1634): “Komorowo”, ibidem, f. 37v (taxation register of the Bielsk land of 1635): “Komorowo”; cf. I. Halicka, *Nazwy miejscowe*, p. 85 where there is confirmation for the years 1598, 1604 and 1668 coming from the collections of Ignacy Kapicy Milewski; the information is contained in *Herbarz Ignacego Kapicy Milewskiego* (HerKM p. 138: “The house of Hermanowski. The estate of former Komorowo, now Hermany called lying in the Bielsk land) suggests that the estate of was incorporated (joined) to the settlement of Hermany or they changed the name to Hermany; however the above cited source mentions show that the name Komorowo still functioned in the second half of the sixteenth century as well as in the seventeenth century. The pieces of information contained in the excerpt from the Volo Reform of the Tykocin starosty of 1559 allow one to suppose that Komorowo was most likely situated between Łopuchów and Hermany, on the right bank of the River Ślina, cf. “Teki Glinki”, file 278, p. 150, (microfilm APB, no. 278): “[...] Near the hamlet of Łopuchów near (at the village Komarowa on the Ślina Rver over one place of average soil are four voloks poorly cultivated.”

²⁰⁷ ASK I 47, f. 745v: “Kocz Schaby Kostrj Masłowizna.”

²⁰⁸ LWP 1570, 1576, p. 127: “The village of Koszewicze and Rakowicze – in these villages 16 *leziw* [a hollow in a tree where there is honey and bee], of which 5 *leziw* are fallow, and 11 *leziw* are cultivated; for each they pay 20 Lithuanian grosze, making for 9/5 Polish złoty.”

²⁰⁹ ASK I 47, f. 445v: “Noble Adam of Kruszewo the son of Wojciech of Mateuszowięta with his co-participants from the 2 land voloks at 15 grosz each gives a florin [1 złoty].”

²¹⁰ Ibidem, f. 801: “Goniądz parish - - Piotrowizna. 3 settled voloks.”

²¹¹ ASK LVI K11, f. 13v: “The village of Iowniki in which lie 9 voloks of good land of which 1 volok of the millers goes to the carpenter”; LWP 1570, 1576, p. 74: „Pierwsze wójtostwo hrabolewskie, w którym jest siół 5: [...] Sióło Przytułki albo Jowinki lit. kop 9/28”; ASK I 47, k. 392: „Wolosc [village] Knyszynska - - Wiesz przitulka w niey wlok 9”; LWP 1602, p. 11: “The village of Przytułki or Sowniki. In this village there are 9 voloks of which one is the carpenter’s who works for the manor - - there is also a mill which gives daily 25 barrels of miller measure” as well as footnote 28: “An unidentified village, most probably one that disappeared. It was situated on the River Nereśla to the south of the village of Kropiwnica. In the inspection of 1664 – Przytuły alias Sowniki. MK, dz. XVIII, sign. 64, p. 593.”; cf. I. Halicka, *Nazwy miejscowe*, p. 142.

²¹² ASK I 47, f. 606v: “the recalled Augustyn paid on Roszki Czirzunki” on 1 land voloks and on 7 morgen”.

²¹³ “This was presumably an ancillary village, inhabited by Rajgród salt workers, although one cannot exclude a link in its designation with Solistów and the River Solistówka. Its close localisation suggests certain difficulties. It is known that a part of the land within the village comprised a half of the village of Żrobki, Łabętnik, Pomiany and Solistówka. [...] Today the name of the Solniki field and forest is known only to the north of Pomiany, and to the east of Łabętnik, as well as Solnikowa Biel to the north-east of Solistówki (materials by T. Zdancewicz). On the other hand in 1577 there is mention of the villa Solniki and voloks on burgher land at Solniki”, J. Wiśniewski, *Dzieje osadnictwa w powiecie augustowskim*, p. 82; an absence of the recalled names in PRNG; cf. I. Halicka, *Nazwy miejscowe*, p. 160.

²¹⁴ AWAK 14, p. 27: “Wieska Wolycza. There are 15 garden plots. Paid on each of these 6 grosze, making for kop 1 grosze 30”, ibidem, p. 44: „Ogrodnikow. Wioska Wolica [...] Summa ogrodnikow 15”.

²¹⁵ Ibidem, p. 46: “The village of Wyprothka Mienka. Here 21 voloks. Ground rent paid on the 21 voloks is 60 grosze. Paid from fields (*obrubów*) 2 amounts of rent from Woczniov and Stepankow, where there are 5 voloks, at 60 grosze a volok making for 26 kop”, p. 54: “The village Wyprothka Mienka [...] in this village 21 voloks.”

²¹⁶ One may also surmise that the *Zyranowie* mentioned in 1591 (ASK I 47, f. 799: “Zyranowie Tatory Dobki Babino Baginskie land voloks 25 settled voloks 2.5) refers to a concrete owner or tax payer, cf. *Słownik staropolskich nazw osobowych*, ed. W. Taszycki, vol. 5, no. 1, Wrocław–Warsaw–Cracow–Gdańsk 1977, pp. 77–78.

²¹⁷ ASK I 47, f. 60v: “Długodabrowa gogolia Dziecziel Buczewizna the noble Grzegorz, son of Stanisław, paid tax on his part, on three gardeners at 4 grosz a head; noble Sebastian Kamiński, the son of Paweł, paid tax along with his partners on 5 noble voloks, each at 12 grosz.”

²¹⁸ Ibidem, f. 60v: “Długodabrowa Dziecziel Zablotna the noble Serafin, son of Bartosz, paid the taxation on marczinow- wthi for three gardeners, each at 4 grosz a head”.

²¹⁹ Ibidem, f. 743v: “Krinki Kaliski Dzieweczka Andrzej Kaliski [paid] on 3 land voloks and 10 morgen 1/20 florins”; one may also conjecture that *Dzieweczka* refers to a concrete owner or tax payer, cf. *Słownik staropolskich nazw osobowych*, ed. W. Taszycki, vol. 1, no. 3, Wrocław–Warsaw–Cracow 1967, p. 563.

²²⁰ NGAB Minsk, f. 1759-2-27, f. 260: in 1554 Rafał and Waclaw the sons of the deceased Abraham of Lubowicz bequeath parts or divisions from Płonki to the Moczydłowska boundary at the estates of Grabowo Lubowicz, and Szepietowo, to Wojciech the son of Jan Piotrasz of Wojny-Piętki, - this information comes from Dr. T. Jaszczolt; ASK I 47, f. 56: “Noble Jerzy Woyno, the son of Jan, paid tax on 1.5 land voloks, each at 12 grosz that is from Grabowo, 0.5 voloks and on voloks at Szadowo i Lubowicz”, ibidem, f. 541: “Noble Szymon Piętka with his brothers - - paid tax on 0.5 voloks at Grabowo”; ibidem, f. 749: “Lubowicz Grabowo Jan and Szczęsny paid taxation on 1 settled volok, on 4 gardeners with smallholdings, on two land less gardeners; Lenart, Wojciech, Jerzy and Stanisław Krupa paid out on 4.5 land voloks.” Wiktoryn Kuczyński, the Podlasie catellan, in his diary for the year 1717 noted: “I also purchased an a plot called Zabłocie for fl. 900 from squire

²³² “The village of Pożegi has not survived to our day. We do not even know its exact location, one may only conjecture that it was situated somewhere between Osipy and Bryki on ground belonging to the town of Wysokie. [...] The visitation of 1605 makes no mention of Pożegi at all”, E. Kalinowski, *Historia obszaru gminy Wysokie Mazowieckie*, p. 47; ASK I 27, f. 931v: „Noble Marczin Młodzianowski paid on behalf on his tenant of Wysocko - - from ossipow and Pożekow on 5 and 1/4 settled voloks and 8.5 empty voloks”. Cf. also Kapićjana 9, p. 67 (1552); ZZG, sign. 1, p. 105: „Stanislaw Wnethrek de Pożegi” (1558 r.); MK 120, f. 486v (1579); MK 127, f. 76 (1582); source materials for the village of Pożegi were assembled by E. Kalinowski; idem, *Historia obszaru gminy Wysokie Mazowieckie*, p. 47.

²³³ ASK I 47, f. 56: „Sadowo Liubowicz - - Noble Jerzy Voino the son of Jan, paid taxation on 1,5 land voloks, each at 12 grosz, that is 0.5 volok from Grabowa and 1 volok together from Zadowa and Liubowicza”; ASK I 27, k. 928: „Sadowo Noble Jerzy paid on 1.5 land voloks from Lubowicza Sadowa Grabowa, and noble Jakub Woino with his brother paid on 1 land volok and 1 smallholder without land”; ASK I 47, f. 541: „Sadowo Noble Stanislaw pank paid on 2 settled voloks”; ASK I 47, f. 749v: „Sadowo Kuczino Stanislaw Pak paid on 3 land voloks”; Synod 1726: „Sadowo”.

²³⁴ In 1538 Zofia Hlebowiczowa gave the land at Rudka to her son-in-law Maciej Kłoczka, including *Sennycza* (BLAN Wilno, F. 1-139); *Siennica* appears in the land division between Mikołaj Hlebowicz and Stanislaw Połoński in 1553 (NGAB Mińsk, 1715-1-84) as well as in the donation of the estate of Rudka (*Syenicza*) of Maryna Mściławska Kiszkowa to the Mostów and Skidel starost Jan Wiktorzyn in 1562 (RGADA, f. 356-2-6, f. 304); information from Dr T. Jaszczolt. It is possible it lay close to the River Siennica.

²³⁵ AUPL, p. 271: „noble Stanislaw Czecziborski from Stelokowo with his old father.”

²³⁶ ASK I 27, f. 932v: „Winna Krziszczki Wilky Czibory Sulky Noble Szczesny, the son of Mikołaj, on behalf of parson of Winna paid from Sulk, Kryszcz on 0,5 land volok and 2 inquilini each at 2 grosz, and 1 smallholder without land. Noble Maciej, the son of Jan, paid with his partners from Cziborow Winney Sulk Wilkow on 6.5 land voloks”; ASK I 47, f. 532v: „Winni Kriszczki Witki Czibory Sutki Noble Stanislaw, the son of Jan Sulkow, with his partners paid from his villages on 6.5 voloks - - Noble Jan, the son of Maciej and Wojciech (sic!) with his partners paid on 3.5 settled voloks each at 15 grosz”; ASK I 47, f. 745v: „Villa Kriski Wilki Sulki Czibory Maciej Winski with his partners paid on 6.5 land voloks”.

²³⁷ ASK I 27, f. 930v: „Trzianka Żuława Thybory Noble Salomon Jablonski Barthosz Kulchan s Thyborow Trzianki on 5 land voloks - - Noble Daniel with his partners on 4 land voloks”; ASK I 47, k. 543: „Trzianka Żuława Thib[o]ri Noble Salomon Jablonski with his partners from Thiborow and Trzianki paid on 5 settled voloks, each at 15 grosz - - Noble Dawid with his partners from Thiborow Trzianki paid on 5 settled voloks, each at 15 grosz”; ASK I 47, f. 753v: „Tibory Kamionka Żuława Jezierna Barthosz szesny with his partners on 10 land voloks [...] Jarosz Jalbrzikowski paid on 1.5 and 1/4 settled voloks and 3 smallholder with land”. „[...] there also appears [...] a part of Tybory called Żuława, more than likely located somewhere between Trzianka and Kamińska. Consequently one can say little about this village or hamlet, it does not appear in the poll tax registers for the subsequent century”, E. Kalinowski, *Historia obszaru gminy Wysokie Mazowieckie*, p. 102. According to the sources found in transcript in the Drohiczyn court ledgers for the year 1568 the village of Tybory-Żuława was most probably located between the villages of Tybory-Trzianka, Tybory-Kamińska, Tybory-Jezierna and Jabłonka Świerczewo (NGAB, Mińsk, f. 1759-2-31, f. 25, 368v; information supplied by Dr. T. Jaszczolt).

²³⁸ In 1538 Zofia Hlebowiczowa bequeathed the estate of Rudka to her son-in-law Maciej Kłoczka, inter alia: *Vlesky* (LMAVB, f. 1-139); there is a absence of them in the later division of the estate between Mikołaj Hlebowicz and Stanislaw Połoński in 1553 (NGAB Mińsk, f. 1715-1-84) as well as the donation of the Rudka estate on the part of Maryna Mściławska Kiszkowa to the Mostów and Skidel starost Jan Wiktorzyn in 1562 (RGADA, f. 356-2-6, f. 304), *Vlezki* appear in Mikołaj Kiszka's intromission to a part of the Rudka estate in 1558 (NGAB Mińsk, f. 1759-2-28, ff. 103v, 116v); information from Dr T. Jaszczolt.

²³⁹ ASK I 47, f. 55v: “Noble Jan, the son of Klimunt, with his partners paid a tax from his part of village Kuczyn, from Wichowo Trojanowa on 1,5 settled voloks each at 10 grosz, and 2 smallholders each at 4 groszy - - Noble Wojciech Kuczynski,

land	settlement	parish	ownership	source references
Drohiczyn	Wola Niemojska ²⁴⁰	Mordy		1567*
Drohiczyn	Ziemaki ²⁴¹	Dąbrowa Wielka		1569*
Mielnik	Wólka ²⁴²	Sarnaki		1567, 1580*

Aleksander Jabłonowski has estimated the number of villages in Podlasie (data only for the years 1571–1591) to be 1,304 settlements, where the Drohiczyn district had 534 settlements, Mielnik – 109, Brańsk – 235, Suraż – 208 as well as 218 in the Tykocin district.²⁴³ The ZAH findings are presented in Table 3.

Table 3. Settlement density in Podlasie in the second half of the sixteenth century

land	surface area km ² according to ZAH	surface area km ² according to Jablonowski ²⁴⁴	number of settlements in total	number of settlements for 100 km ²
Bielsk	5,811	5,410.85	895	15
Drohiczyn	3,550	2,779.26	651	18
Mielnik	1,169	1,375.68	129	11
in total	10,530	9,565.79	1,675	15.9

As can be seen from the presented material the average density of settlement in Podlasie in the second half of the sixteenth century was 16.1 settlements per 100 km². It follows to remember, however, that these are merely approximate data and are consequently only approximations in character. These data take into consideration, on the one hand, large towns, while on the other one-manor-house mill settlements and demesnes such as a hamlet comprised of a few homesteads. Within the territory of the Podlasie Voivodeship, besides areas with a high settlement density, there are also poorly populated areas as well as ones completely unpopulated such as forest and wooded areas, bogs, marshes and

the son of Mikołaj from Grodka Kuczina, paid tax with his brother Marcin from all the parts of Kuczina Grodka Wichowa Trojanowa Zabincza on 1 volok, and 1 smollholer at 4 groszy”; *ibidem*, f. 541: „Noble Wojciech Luniewski paid from Wichowo on 1 settled volok which makes for 1 zloty”; Synod 1726: „Wichowo”.

²⁴⁰ Popis 1567, ff. 953–954: „Параѡна Мордска Воля Немойска и Яйкимовска Мартинь Ревуски конь, каѡ. пр., рогати. Миколай Ляковски Андреевич конь, каѡ., рогати. Мартинь Здебьский пешь съ кор. Аньна вдова Трёмьбицка выслала зятя Счасного съ Обичовь, кляча. Сераоинь Сошенский кляча, мечь. Езоѡъ Сошенский кляча, мечь. Томько Декгетка выслалъ сына, конь, кор. Валенты Сошенский выслалъ сына Яна конь, каѡ. Станиславъ Здебьски выслалъ сына Яна, кляча, мечь. Криштоѡъ Сошенский Вахноиць кляча, каѡ.”

²⁴¹ AUPL, p. 282: “[...] heirs from Długa Dąbrow Kask and Ziemaki”; see T. Jaszczółt, *Napływ rycerstwa i szlachty*, pp. 209–210.

²⁴² In 1567 Stanisław Niemira the heir of Ostromęczyn, Niwice and Gnojno left „villa dicta Volka Kyssełowa” (in the transaction text there are also the designations: „Kyssełowa Volka”, „Volka Kyssełowska”) to Stanisław Poniatowski of Borzyłowa Wola; NGAB, Mińsk, f. 1726-1-1, Księga grodzka mielnicka, f. 363 (information from Dr. T. Jaszczółt); ASK I 47, f. 553: “Ostromieczin Noble Piotr Skarbek paid a tax through his servant Ogunowski on 3 settled voloks”; Dorota Michaluk has marked Wola (without providing arguments for such a localisation) to the north west of Ostromęczyna, see D. Michaluk, *Ziemia Mielnicka*, map 3: *Osadnictwo w ziemi mielnickiej*, map 4: *Osadnictwo w ziemi mielnickiej w 1674 r.*, map 5: *Sieć parafialna Kościoła katolickiego w ziemi mielnickiej w 1580 roku*. Piotr Skarbek (mentioned in 1580) was the son-in-law of Stanisław Niemira, who in his wife’s dowry took Wólka; presumably located close to Kisielew, and possibly from the side of Ostromęczyn.

²⁴³ Podlasie II, p. 48; there is an incorrect summing up in the table: for it should be 660 hamlets and as a consequence 1,303 settlements with a given figure of 207, in the Suraż district there should be **208**, as is the case in subsequent lists, see the tables on pp. 52, 78 where for the Suraż district visible is the figure 208.

²⁴⁴ *Ibidem*, p. 27; the surface area of the land in square miles is: the Bielsk land – 98.27, Drohiczyn - 50.47, Mielnik – 24.98, which gives a total for the entirety of Podlasie of 173.72 square miles. In 1795 the area of the Podlasie Voivodeship was estimated at 174.15 square miles; for a detailed calculation for the individual districts (together with the number of inhabitants) see A.C.A. Friederich, *Historisch-geographische Darstellung Alt- und Neu-Polens mit 2 Karten*, Berlin 1839, pp. 151–152: where *Das Land Bielsk* is 77.14 square miles, *Das Land Mielnik* – 23.92 and *Das Land Drohiczyn* – 73.09 square miles, for a brief description of Podlasie (*Die Woivodschaft Podlachien oder Bielsk*) see pp. 149–152.

wetlands, as well as river valleys.²⁴⁵ We may observe the greatest settlement density in the Drohiczyn land – 18.4 settlements per 100 km², with the least occurring in the Mielnik land – 11 settlements per 100 km². The average number of settlements for the Bielsk land (15.4 settlements per 100 km²) is close to the average for the whole Podlasie Voivodeship.

Settlement density in the individual Crown voivodeships in the second half of the sixteenth century is presented in Table 4.

²⁴⁵ On Perthées's map the terrain between Goniądz and Rajgród is described as "Significant mud and bog through which in summer is impassable unless it is winter"; see also *Rękopiśmienne opisy parafii litewskich of 1784*, e.g., p. 23–24: "The forest in the Białystok parish to the summer sunrise stretches length and breadth for four miles, and which is called Puszcza Sobolewska. To the south the Solnicki forest, birch and aspen, between noon and the winter sunset the Marczycki Bór extends for around 20 acres. For the Bór Zawadzki [forest] the length and breadth is around a half mile to the summer sunset. To the north overgrown [...]" (earlier edition: W. Wernerowa, *Opisy parafii dekanatu knyszyńskiego z roku 1784*, p. 114); p. 81: "The mud and bogs are huge and expansive, commencing from the hamlet called Krypno and the small village of Długołęka, lying between the south and the winter sunset up to two miles in width, and these come up to the navigable river called the Narew. Brushwood is greater in the Knyszyn parish, than is open field. There is the Knyszyn forest [...] which stretches in length and breadth up to three miles [...] while in many places the brushwood and undergrowth are significant in their width and height, the names of which are unknown and therefore are not expressed." (as well as W. Wernerowa, *Opisy parafii dekanatu knyszyńskiego z roku 1784*, p. 162); p. 90: "The forest in the parish of Korycin variedly for fuel and building is used, His Majesty's forestry belongs to the Grodno economy, extending for 10 miles and more." (as well as W. Wernerowa, *Opisy parafii dekanatu knyszyńskiego z roku 1784*, p. 171); p. 120: "There is more forest in the parish of Zabłudów than open field [...] to the left hand side of a distance of five miles, across two miles. [...] Some of the hamlets have their own groves." (as well as W. Wernerowa, *Opisy parafii dekanatu knyszyńskiego z roku 1784*, p. 198); p. 139: "The bog the most significant at Zgniłka is not as broad as it is long, for at most a quarter of the mile (A larger Zgniłka swamp of varying widths and lengths of no more than a quarter of a mile) [...] The Pogorzałka bog of a width and length of a quarter of a mile, through which there is an awkward (uncomfortable) bridge [...] There is more forest in the Augustów parish than field itself [...] it extends right up to the River Neta right to the south, with its breadth and length being several miles. [...] Along this very river can be found the greatest areas of wetlands, which stretch to the south, on the other side of the river brushwood and shrub begin from the south and extend right up to the neighbouring parish of Janów [...]" (as well as W. Wernerowa, *Opisy parafii dekanatu augustowskiego z roku 1784*, p. 168); pp. 148–149: "The most significant areas of bog occur, to the fore from Augustów along the port river called the Neta they expand to the south for a mile or two and are even greater in length, with a width of several dozen lengths, though not even everywhere. The second along the River Bobra so-called and stretching toward Goniądz and further to the south for several miles of both breadth and length. The more significant marshlands of so-called Trokiele half a mile in length, while the width is close on to a quarter of a mile [...]. The so-called Zgniłka bog, being a half mile in length and width, lies between the south and the winter sunset one-and-a-half miles. The so-called Bagno Paluchowo [...] whose length and breadth cannot be measured for it lies amidst inaccessible forest and shrub [...] Forest in the Bargłów parish is in abundance. [...] in many places amidst the forests shrub and inaccessible wetlands, in scope running into several acres in length and width." (as well as W. Wernerowa, *Opisy parafii dekanatu augustowskiego*, p. 175); pp. 178–179: "The Łosiabieli wetlands extend beginning from Downary right up to the River Biebrza of a length of three quarters of a mile, width a quarter. Shrouded by various undergrowth [...] the marsh between Downary and Kramkówki covers a width of twenty rods, with a length of a quarter of a mile. It has no name. [...] The Goniądz forest belonging to the town of Goniądz [...] is of a half mile's width and a mile long right to the River Biebrza [...] The Kramkówka forest belongs to great and lesser Kramkówka. [...] stretching to the summer sunrise along two miles, of breadth [...] a half mile. The Krzczków Forest belongs to Krzczów and the presbytery [...] It is a quarter of a mile long, and several acres in width. [...] The Kułakoszczyzna Forest of the Knyszyn starosty [...] is filled with bogs and only useless undergrowth, long to the tune of one and a half a quarter mile, as wide as a half. [...] Squire Kramkowski's Puszczarze Forest [...] long to a quarter of a mile, wide to a dozen or so rods. [...] The Rybacki Forest belongs to Rybaki and Zblutowo [...] wide to six acres, and as long as a half quarter mile. [...] It is in the main covered by patches of scrub on farms and on fields deserted as the soil is useless and of no purpose." (as well as W. Wernerowa, *Opisy parafii dekanatu augustowskiego*, pp. 196–198); pp. 205–206: "sizeable wetlands on the River Łek starts [...] at the nobility village Szymany and stretches towards the winter sunrise close on half of a third of a mile along its length, while in width a large mile. The mud on these wetlands is notable, and no one can cross them in summer, possibly in the winter [...] Forest is more abundant in the Rajgród parish than is open field, particularly beginning from the winter sunrise right to the west, length at a mile a half of a third, width one-and-a-half miles. Wood [...] is in abundance." (as well as W. Wernerowa, *Opisy parafii dekanatu augustowskiego*, p. 216); p. 219: "Forests with wetland meadows reaching to the River Biebrza in the parish of Trzcianne are few, which is not on a par with the open field to be found, beginning from the River Nereśl [...] on the opposite bank where in places a small mile, in places a large mile, and with wetland meadows lying on the River Biebrza, to two average miles, where it demarcates the Podlasie Voivodeship from that of Mazovia, and the Trzcianne parish from that at Burzyn. [...]" (as well as W. Wernerowa, *Opisy parafii dekanatu augustowskiego*, p. 225); cf. also *Miasta Narwi prętowanie (Excerpt wyjęty z lustracyi Dziewiałtowskiego miasta Narwi zapadley w roku 1560 (Sub folio 479)*, [in:] AWAK 14 pp. 72–76, where are the descriptions: *Zascianki y błota przy miescie Narwi* as well as *Błota puste, nikczemne przy miescie Narewskim*.

Table 4. Settlement density in the Crown in the second half of the sixteenth century²⁴⁶

Voivodeship	Number of settlements per 100 km ²	Number of settlements	Area km ²
Płock	26.3	1,131	4,304
Łęczyca	21.9	948	4,326
Brześć	20.6	679	3,293
Mazovia	19.9	4,583	23,016
Podlasie	15.9	1,675	10,530
Rawa	15.6	965	6,173
Malbork	13.8	290	2,096
Chełmno	13.7	636	4,634
Kalisz	13.2	2,255	17,127
Cracow	12.9	2,577	20,043
Dobrzyń land	12.7	388	3,063
Inowrocław	12.4	343 ²⁴⁷	2,775
Sieradz	12.1	1,520	12,525
Sandomierz	11.9	3,059	25,790
the Siewierz Duchy	11.5	78	679
Poznań	9.2	1,529	16,653
Lublin	8.6	915	10,684
Pomerania	8.4	1,079	12,907
The Crown (without Warmia)	13.6	24,650	180,638

As can be seen from the above data the average settlement density in Podlasie in the second half of the sixteenth century is bettered only by four Crown voivodeships (Płock, Brześć, Łęczyca, Mazovia). In terms of the number of settlements the Podlasie Voivodeship is fifth in position after the Voivodeships of Mazovia, Sandomierz, Cracow and Kalisz. Looking through the prism of surface area of the individual Crown voivodeships for the period under consideration, Podlasie finds itself in ninth position bettered only by the following voivodeships: Sandomierz, Mazovia, Cracow, Kalisz, Poznań, Pomerania, Sieradz and Lublin.

²⁴⁶ MRP, p. 35; S. Wojciechowski, *Location of settlements*, [in:] AHP Lublin, in this edition III.3.1.3; H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7; K. Pacuski, *Location of settlements*, [in:] AHP Sandomierz, in this edition III.3.1.2; K. Chłapowski, *Location of settlements*, [in:] AHP Sieradz, in this edition III.3.1.5; idem, *Location of settlements*, [in:] AHP Cracow, in this edition III.3.1.1; A. Borek, M. Słomski, *Location of settlements*, [in:] AHP Greater Poland, in this edition III.3.1.4; U. Zachara-Związek, T. Związek, *Location of settlements*, [in:] AHP Cuyavia, in this edition III.3.1.6.

²⁴⁷ U. Zachara-Związek, T. Związek, *Location of settlements*, [in:] AHP Cuyavia, in this edition III.3.1.6, 87 they give for the Inowrocław Voivodeship a figure of 343.5 settlements; while here we have rounded the figure down to 343.

APPENDIX

Noble environs in Podlasie as confirmed by sources 1550–1600²⁴⁸

(in brackets given is the contemporary modern name)

• **Bielsk land:**

1. Borowo (Borowskie)²⁴⁹ = -Cibory, -Gziki, -Michały, -Skórki, -Stare, -Szepiotki, Wypychy, -Żaczki;
2. Brzeziny = -Chrościanka, -Janowięta, -Wytrykusy;
3. Brzozowo = -Antonie, -Chrzczony, -Korabie, -Maćkowięta, -Panki, -Solniki, -Stare;
4. Chojane = -Bąki, -Boruty, -Gorczyany, -Pawłowięta, -Piecki, -Sierocięta, -Stankowięta, -Stara Wieś;
5. Dzierżki = -Janowięta, -Stankowięta, -Starawieś, -Tomkowięta, -Ząbki;
6. Falki = -Bartki, -Filipy, -Godzieby, -Janowięta, -Klimowięta, -Kowale, -Nowosady, -Paskowięta, -Stare, -Włosty;
7. Franki = -Chrościele, -Dąbrowscy, -Piaski;
8. Gąsówka = -Oleksino, -Stara Wieś, -Wojtkowięta;
9. Gołacie²⁵⁰ = -Dąb, -Górki, -Mościska, -Puszcza, -Wola;
10. Grodzkie = -Nowa Wieś, -Stare, -Szczepanowięta;
11. Jabłonia (Jabłoń) = -Biskupki, -Dąbrowa, -Dobki, -Jankowce, -Kościelna, -Markowięta, -Piotrowce, -Rykacze, -Wspały, -Zarzecze, -Zębrowizna;
12. Jamiołki = -Kłosy, -Kowale, -Piotrowięta, -Świetliki;
13. Kalinowo²⁵¹ = -Czosnowo, -Sulki, -Trojanki, -Trojanki-Nowa Wieś;
14. Kamińskie (Kamińskie) = -Jaski, -Ocioski, -Wiktory;
15. Kobyliń (Kobylin)²⁵² = -Gnatki, -Kuleszki, -Pieniążki, -Poświętne;
16. Kostrzy²⁵³ = -Masłowizna, -Podsędkowięta, -Pułazie, -Stare;
17. Krasowo = -Częstki, -Rybały, -Wielkie;
18. Kropiwnica (Kropiewnica) = -Gajki, -Kiernoski, -Racibory;
19. Kruszewo = -Brodowo, -Głąby, -Mateuszowięta;
20. Kulesze = -Litwa, -Maćkowięta, -Miziołki, -Podawce, -Podlipne, -Rokitnica, -Wykno Nowe, -Wykno Stare;
21. Łapy = -Barwiki, -Bociany, -Bursięta, -Dębrowizna, -Dzięciele, -Korczaki, Kosmytki, -*Kwity*,²⁵⁴ -Leśniki, -Łynki, -Nowosiółki, -Pluśniaki, -Rechy, -Stryjce, -Szołajdy, -Wągle, -Wity, -Wojtasze, -Zięciuki, -Żaki;
22. Niewodnica²⁵⁵ = -Bronczany, -Brzosczyńska, -Koryckich, -Lewicka, -Nargilewska, -Siestrzytowskich, -Wysockich;

²⁴⁸ The absence of source research within those Podlasie municipal and rural register ledgers that have been preserved in no way makes this list exhaustive.

²⁴⁹ Borowo-Prokuratowszczyzna is situated at a distance of approx. 5.5–6.5 km to the south of the environs of Borowo and does not constitute a part of it.

²⁵⁰ On the environs of Gołacie see E. Kalinowski, *Historia obszaru gminy Wysokie Mazowieckie*, pp. 107–109.

²⁵¹ On the environs of Kalinowo see *ibidem*, pp. 110–111.

²⁵² Kobylin-Cieszmy appears in the sources from the second half of the sixteenth century as Cieszmy.

²⁵³ We have not included within these environs the village of Kostrzy-Litwa and Kostrzy-Noski (Kostrzy-Borówka) located at a distance from Kostrzy-Śmiejski (Kostrzy-Pułazie) of approx. 11 km and approx. 9 km to the north; Kostrzy-Masłowizna is not marked on the map (unknown localisation).

²⁵⁴ Mentioned in 1528; *Popis 1528*, p. 124: „Село Лапы Квиты Земане Матых Якубовичъ самъ. Якубъ Яновичъ Воеводичъ самъ. Томько Яновичъ самъ. Станиславъ Яновичъ самъ. С тых Лапъ конъ”; cf. Podlasie I, p. 199. The subject literature does not specify precisely where the aforementioned Łapy-Kwity was to be found though one of the interpretations reads: “The Ruthenian notation Kwity may be explained as *K Wity*, that is *at Wity* or *on the way to Wity*”, Lubicz-Łapiński, p. 39, footnote 27; cf. map 4: *Podział wsi Łapy około 1528 r.*, where marked is “K Wity” between Wity and Rechy; *ibidem*, p. 27; in another place the information that: “the village Łapy Kwity [...]” is “the later Łapy Wity and Barwiki”, *ibidem*, p. 142 as well as footnote 7.

²⁵⁵ The distance from Niewodnica Nargilewska to Niewodnica Kościelna (measuring the route through Niewodnica: Brzosczyńska – Lewickich – Siestrzytowskich – Wysockich – Koryckich) is approx. 14 km, which means that with regard to surface area these environs were one of the largest in Podlasie in the second half of the sixteenth century.

23. Niwino (Niewino) = -Borowe, -*Janowięta*,²⁵⁶ -Leśne, -Mruczki, -Popławy, -Spasy, -Stare;
24. Perki = -Bujenki, -Mazowsze, -Stara Wieś, -Wypychy;
25. Piszczaty = -Kończany, -Piotrowięta, -Tusiki;
26. Płonka = -Kościelna, -Kozły, -Matyski, -Strumieńskie;
27. Porośla (Porośl) = -Głuchy, -Grzywy, -Kije, -Wojślawy;
28. Roszki = -Bachy, -Bieńki, -Chrzczony, -Czirzunki, -Dusięta, -Piszczaty, -Sączki, -Trojanki, -Włodki, -Woćki, -Ziemaki;
29. Sasiny = -Stare, -Tworki, -Wity;
30. Sikory = -Bartkowięta, -Bartyczki, -Janowięta, -Pawłowięta, -Piotrowięta, -Tomkowięta, -Wojciechowięta;
31. Stypułki = -Giemzino, -Koziełki, -Szymany, -Świąchowięta;
32. Szembory (Szymbory) = -Andrzejewięta, -Jakubowięta, -Włodki;
33. Szepietowo = -Janówka, -*Mikołajowięta*,²⁵⁷ -Podleśne, -Wawrzyńce, -Żaki;
34. Średnica = -Jakubowięta, -Maćkowięta, -Pawłowięta;
35. Truskolas (Truskolasy) = -Lachy, -Niwisko, -Olszyna, -Stara Wieś, -Wola;
36. Warele = -Filipy, -Nowe, -Stare, -Wyszonki;
37. Wnory = -Kużele, -Stara Wieś, -Wandy, -Wypychy;
38. Wojny = -Bakałarze, -Dąbrówka, -Izdebnik, -Janowięta, -Króle, -Piecзки, -Piotrasze, -Pogorzal, -Pułazie, -Stara Wieś, -Szuby;
39. Wyszonki = osada młyńska -Cicholas, -Klukowo, -Kościelne, -Nagórki, -Posele, -Ruś, -Włosty, -Wojciechy, -Wypychy;

• **Drohiczyn land:**

1. Bielony (Bielany) = -Borysy, -Jarosławy, -Wąsy, -Żyłaki;
2. Bogusze = -Litwa, -Stara Wieś, -Żale;
3. Czaple = Czaple, -Andrzejewice, -Jarki, -Obrapałki;
4. Czarkówka = -Bydytki, -Chudaki, -Dobki, -Rolimy, -Zawady;
5. Długa Dąbrowa²⁵⁸ = Długa Dąbrowa, -*Biernatowięta*,²⁵⁹ -Buczewizna, -Bydytki, -Cherubiny, -Dworaki, -Dzięciel, -Gogole, -Kaski, -Łazy, -Marcinówka, -*Moczydły*,²⁶⁰ -*Serafinowięta*²⁶¹ -*Tymianka*,²⁶² Tworki, -Wilki, -Zablotne;
6. Długie = -Grodzisko, -Łuki, -Wola Kamionka, -Wszebory;
7. Dmochy = -Mingosy, -Rętki, -Rogale, -Rozumy;
8. Kaczyno (Kaczyn) = -Harbasy, -Małe, -Stare;
9. Kamianka (Kamianki) = -Czabaje, -Lacka, -Mytki, -Wańki;
10. Kłopoty = -Bańki, -Patry, -Piotry, -Stanisławowięta, -Waśki;
11. Kobyłany = -Koziełta, -Reczki, -Skorupki, -Stara Wieś;

²⁵⁶ Mentioned only in 1528, Popis 1528, p. 113: „Село Нивино Яновята земляне Шчепань Яновичъ самъ. Андреевая Вдова самъ. Янь Томьковичъ самъ. Бернать Томьковичъ самъ. Щасный Томьковичъ самъ. Томьковая Вдова самъ. С тыхъ 2 кони”; cf. Podlasie I, p. 188.

²⁵⁷ Mentioned only in 1528, Popis 1528, p. 142: „Село Шепетово Николаевата Земане Серафинъ Петровичъ. Венцлавъ Яновичъ сам. Щепанъ Яновичъ сам. Павелъ Якубовичъ сам. Янь Жакъ сам. Марко Станиславович сам. Петръ ЯкѠбовичъ сам. Андрей Станиславович сам. С тыхъ всихъ 3 кони. Село Шепетово Николаевата Земане Миколаи Миколаевичъ самъ. Янь Миколаевичъ сам. Якубъ Миколаевичъ сам. С тыхъ конь”; cf. Podlasie I, p. 216.

²⁵⁸ In 1547 mentioned were (ADS, sign. D 45, ff. 452v–453): „Dąbrowa Dworaki, Cherubiny quinque mansos № 5, Dąbrowa Serafinowięta, Biernatowięta duodecem № 12, mansos, pro quinque, № quinque taxant, Dąbrowa Łazy, Dzięciela mansos quadraginta № 40 arenosi fundi, Dąbrowa Kamień, Dzięciela mansos triginta № 30, pro viginti № 20, Dąbrowa Kaski mansos duodecem № 12, Dąbrowa Wilki, Bydytki, Tymianka, Tworki mansos triginta № 30, Dąbrowa Moczydły viginti quinque № 25, pro viginti no viginti taxant, Dąbrowa Zablotna viginti tres № 23, pro viginti № 20 taxati, Dąbrowa Gogole, Dzięciela mansos viginti duos № 22, pro viginti № 20”.

²⁵⁹ Mentioned in 1547.

²⁶⁰ Długa Dąbrowa-Moczydły 1578 and 1579 appears in the tax register for the Bielsk land (see ASK I 47, f. 466v; ibidem, f. 367v).

²⁶¹ Mentioned in 1547.

²⁶² Mentioned in 1547.

12. Koce = -Basie, -Borowe, -Chybowo, -Kobusy,²⁶³ -Masły, -Piskuły, -Schaby, -Stara Wieś;
13. Kosianka = -Boruty, -Leśna, -Stara Wieś, -Trojany;
14. Koski = -Falki, -Starawieś, -Wypychy;
15. Krasnodęby = -Kasmy, -Rafały, -Sypytki;
16. Krasowice (Krasewice) = -Czerepy, -Jagielki, -Stare;
17. Krynki = -Białokunki, -Borowe, -Jarki, -Pławy;
18. Księżopole = -Budki, -Jałmużny, -Komory, -Smolaki;
19. Łempice = -Andrale, -Klesie, -Nowe, -Stare;
20. Łuniewo = -Szczybły, -Wielkie, -Wyszki;
21. Miłkowicze (Miłkowie) = -Jankowicze, -*Najewnik*,²⁶⁴ -Pazkowicze, -Ruskie, -Stawki;
22. Miodusy (A)²⁶⁵ = -Litwa, -Michałowięta, -Perki, -Piotrowięta, -Stara Wieś, -Stasiowięta, -Stok, -Szczepanowięta, -*Szymanowięta*;²⁶⁶
23. Miodusy (B)²⁶⁷ = -Bogusławy, -Junochoy, -Koprzywne;
24. Moczydły (A)²⁶⁸ = -Kukielki, -Pidaje, -Pszczółki, -Stare;
25. Moczydły (B)²⁶⁹ = -Lachowskie, -Stare, -Zalesie;
26. Niemyje = -Jarmuły, -Siudy, -Skłody, -Stare, -Wity, -Zębki;
27. Piętki = -Basie, -Gręzki, -Szeligi;
*Poniaty*²⁷⁰ = -*Kosiorki*, -*Krzepisie*, -*Starawieś*, -*Zagajne*;
28. Porzeziny = -Gętki, -Jelitki, -Mędle, -Sipki, -Surały;
29. Radziszewo = -Króle, -Przyrodki, -Sieńczuch, -Sobiechowie, -Stare;
30. Ratyniec = -Mursy, -Nowy, -Stary;
31. Rytele²⁷¹ = -*Adamowięta*,²⁷² -Borki, -*Dominikowięta*,²⁷³ -Olechny, -Średnie, -Święckie, -Wólka, -*Zapalkowięta*;²⁷⁴
32. Rzewuski²⁷⁵ = -*Smyczki*,²⁷⁶ -Starawieś, -Suchodół, -Śmieszki, -Zawady, -Żale;
33. Skolimowo = -Cierpigórze, -Ptaszki, -Rogoziec, -Stara Wieś, -Wojnowo;
34. Sosna = -Korabie, -Kuzołki, -Trojanki;
35. Tchórznica²⁷⁷ = Tchórznica, -Mnich, -Wyszki;
36. Toczyska (Toczyski) = -Chrome, -Czortki, -Średnie;
37. Trzcieniec (Trzciniec) = -Dupy, -Szłapy, -Średni;
38. Twarogi = -Lackie, -Mazury, -Ruskie, -Trubnica, -Wypychy;
39. Tybory²⁷⁸ = -Jezierna, -Gołasie, -Kamianka, -Mistale, -Olszewo, -Trzcianka, -Usza, -Wola, -Żochy, -Żuławy;

²⁶³ Koce-Kobusy in 1567 appears only as Kobusy (Popis 1567, f. 920: „Кобусы Венцлавъ Якубовичъ кляча, рогати. Харубинъ Якубовичъ пешь, рогати. Войтехъ Михайловичъ кляча, мечъ”).

²⁶⁴ Mentioned in 1547: “Miłkowie Najewnik, octo, pro quinque” (ADS, sign. D 45, f. 454).

²⁶⁵ The environs were situated approx. 10 km to the west of Wysokie Mazowieckie, in the north-west part of the Drohiczyn lands. In 1547 mentioned were (ibidem, f. 453): “Miodusy Starawieś, Michałowięta, Szymanowięta, Stankowięta, Piotrowięta mansos 40”. On the environs of Miodusy see E. Kalinowski, *Historia obszaru gminy Wysokie Mazowieckie*, pp. 84–89.

²⁶⁶ Mentioned in 1547.

²⁶⁷ The environs were situated approx. 17 km to the south-east of Ciechanowiec.

²⁶⁸ The environs were situated approx. 10 km to the south-east of Ciechanowiec.

²⁶⁹ The environs were situated approx. 10 km to the south-west of Siemiatycze.

²⁷⁰ In 1547 mentioned were (ADS, sign. D 45, f. 453): “Poniaty Kosiorki, Krzepysie, Starawieś, Zagayne, mansos 40, pro 20 taxant”.

²⁷¹ In 1547 mentioned were (ibidem, f. 457): ‘Rytele Olechny viginti quinque, Rytele Dominikowięta, Zapalkowięta, Adamowięta, Wszołki, Borki, Święckie, Starawieś, centum, pro quinquaginta’.

²⁷² Mentioned in 1547.

²⁷³ Mentioned in 1547.

²⁷⁴ Mentioned in 1547.

²⁷⁵ In 1547 mentioned were (ADS, sign. D 45, f. 455): “Rzewuski Żale octodecem, pro quindecem, Rzewuski Smyczki, Zawady quinquaginta, pro quadraginta, Rzewuski Suchodół quadraginta, pro triginta, Rzewuski Beydy quadraginta, pro triginta”.

²⁷⁶ Mentioned in 1547.

²⁷⁷ We recognise Tchórznica, the name of which constitutes a component in the nomenclature for the environs while in the sources from the second half of the sixteenth century it is designated simply as Tchórznica.

²⁷⁸ Mentioned in 1547.

40. Winna²⁷⁹ = -Cibory, -Krzyszczki, -Nowa Wieś, -Piętki,²⁸⁰ -Stara, -Wilki, -Wypychy;
41. Wojtkowicze (Wojtkowice) = -Dady, -Glinna, -Stare;
42. Żery = -Bystry, -Czubiki, -Pilaki;

- **Mielnik land:**

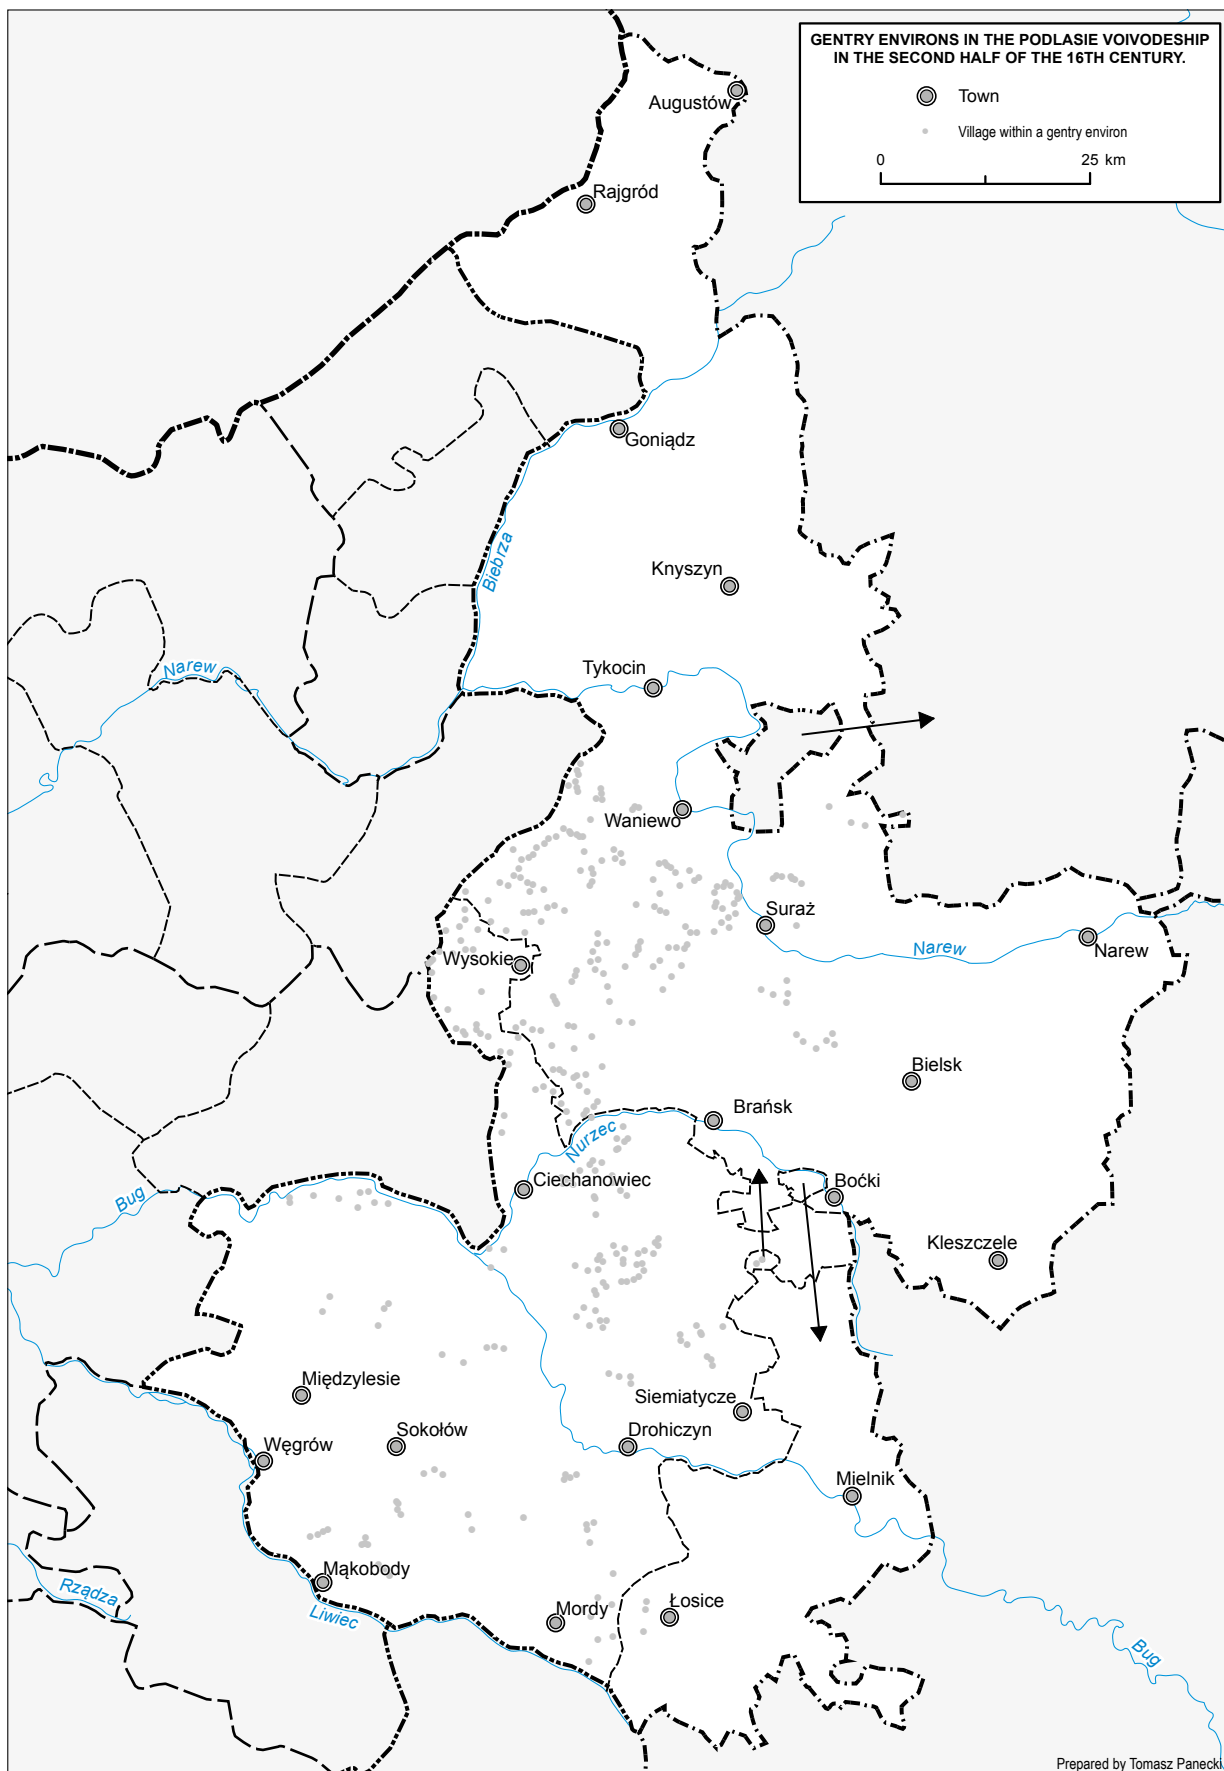

1. Biernaty = -Rudniki, -Stare, -Świrzbły.

(2021)

Translated by Guy Russell Torr

²⁷⁹ In 1547 mentioned were (ADS, sign. D 45, f. 453): “Winna Starawieś, Wypychy, Kryńki, Piętki, Wilki, Cybory 37 mansos, pro 20 taxant”.

²⁸⁰ Mentioned in 1547.

Map 1. Noble environs in the Podlasie Voivodeship in the second half of the 16th century

III.3.1.9a ROYAL PRUSSIA

Marian Biskup

In Royal Prussia, settlement network density varied significantly from area to area. The tables below list the number of settlements per km² in each of the voivodeships and districts (or equivalent administrative units).

The data show that the highest density of settlements can be observed in Chełmno and Malbork Voivodeships, where the number of settlements per area size is more or less equal (1 per 7.3 km² and one per 7.2 km² respectively). In Chełmno Voivodeship, the highest settlement density was in Chełmno district and the lowest in the territory of Toruń (1 per 10.5 km²). Conversely, Pomeranian Voivodeship showed much internal variation in settlement density, from one per 6.6 km² up to one per 19.5 km², with the average being one per 12.1 km². The highest density could be observed in the north-eastern part of the voivodeship, in districts of Gdańsk, Puck, Tczew, and in the territory of the Town of Gdańsk (from one per 6.6 km² to one per 10.5 km²). The lowest settlement density was seen in the southern and western Człuchów, Mirachowo, Nowe, and Tuchola districts (1 per 14 km² up to one per 19.5 km²). The explanation for this phenomenon lies in the sizeable woodland cover of Royal Prussia, which was especially extensive in the areas of low settlement density – several districts in Pomeranian Voivodeship and the territory of Toruń in Chełmno Voivodeship. Likewise, weak soils were a factor that negatively impacted the development of these regions.

The urban settlement density in Royal Prussia was almost identical in Chełmno and Malbork Voivodeships – one per 332.4 km² and one per 349.3 km². In Pomeranian Voivodeship, the urban network was much sparser, with one urban settlement per 806.7 km².

Correspondingly, the ratio of urban to rural settlements in Chełmno and Malbork Voivodeships was similar – 1:44 and 1:47 respectively, which was almost 50% higher than the 1:66 ratio in Pomeranian Voivodeship. In the entire region of Royal Prussia, there were 54 villages per town. This ratio varied internally, especially in Pomeranian Voivodeship, where the highest urban settlement density could be found in the southwestern regions and districts adherent to the Vistula (Człuchów, Nowe, and Tczew), as well as the territory of the Town of Gdańsk, where the urban-to-rural settlement ratio remained between 1:24 to 1:57. This contrasted with the situation in the central, northern, and southern parts of the Pomeranian Voivodeship (Mirachowo, Puck, Świecie, Tuchola districts), where the ratio could be 1:111 – 1:127, or even a stark 1:0. Of course, the urban population of individual towns, as well as their economical roles, remained an important factor, especially in the cases of Gdańsk, Elbląg, and Toruń.

As a consequence of these urban-to-rural ratio variations, the distances between the major urban centres vary. In Chełmno Voivodeship, distances – as the crow flies – could measure from 3 km to 94 km, with an average distance of around 43 km; in Malbork Voivodeship the distances ranged from 11 km to 55 km, 30 km on average. Finally, the distances between towns in Pomeranian Voivodeship ranged from 13 to 157 km, 79 km on average. For the entire region of Royal Prussia, the distances ranged from 3 km to 157 km, averaging at around 42 km.

Table 1. Number of urban and rural settlements in Chełmno Voivodeship

district/equivalent administrative unit	area in km ²	number of settlements		km ² per one settlement	km ² per one urban settlement	km ² per one rural settlement	urban to rural settlement ratio
		urban	rural				
Chełmno	2,065	5	323	6.3	413.0	6.4	64
Michałowó	1,314	3	145	8.8	438.0	9.1	48
Bishopric of Chełmno	916	5	121	7.3	183.2	7.6	24
Territory of Toruń	359	1	33	10.5	359.0	10.9	33
total	4,654	14	622	7.3	332.4	7.5	44

Table 2. Number of urban and rural settlements in Malbork Voivodeship

administrative unit	area in km ²	number of settlements		km ² per one settlement	km ² per one urban settlement	km ² per one rural settlement	urban to rural settlement ratio
		urban	rural				
Malbork Voivodeship (without the territory of Elbląg)	1,584	5	221	7.0	316.8	7.2	44

*(1961)**Translated by Paulina Waclawik*

Settlements: Olszynka (Territory of Gdańsk) and Turza (Tczew district) were listed, true to the sixteenth century sources, as were Olszynka Mała and Olszynka Wielka, and Turza Mała and Turza Wielka. On the basis of further sources, another five settlements were identified:

- Zakoniczyn, Gdańsk parish, Gdańsk district – Church property, St. Elisabeth’s Hospital in Gdańsk – estate – H. Schuch, *Nachrichten über Lappin und andere Hospitalgüter von Danzig*, Gdańsk 1894 (Abhandlungen zur Landeskunde der Provinz Westpreussen, vol. 7), p. 9;
- Ruda Suchowska, Drzycim parish, Świecie district – royal property, Ściecie starostwo – ironworks – ASK XLVI 28, p. 593;
- Broda – Młyn (Mill), Wiele parish, Tuchola district – noble property – mill – Fontes Towarzystwa Naukowego w Toruniu, vol. 1–3, p. 242;
- Męcikał, Brusy parish, Tuchola district – royal property in Tuchola starostwo – inn – ASK LVI vol. 1, p. 97;
- Prądzonka, Leśno parish, Tuchola district – royal property in Tuchola starostwo – ca. 10 lan of peasant-owned land – ibidem, p. 96, 108.

III.3.2 CHARACTER AND SIZE OF SETTLEMENTS

III.3.2.1 CRACOW VOIVODESHIP

Jarosław Suproniuk

In this edition of the Historical Atlas of Poland we observed the rules applied in previous volumes. The following elements were presented on our maps:

- Centres of State administration, i.e. of voivodeships and districts;
- Centres of Church administration, i.e. of archdeaconries, deaneries, and parishes;
- Towns and villages, marked according to their size;
- Mills, ironworks, glassworks, and demesnes having their own names, localized in a certain manner as separate settlements;
- Castles.

We did not mark mines having their own names situated in Cracow Voivodeship in the second half of the sixteenth century, even though we know the names of mines and shafts from the middle of the sixteenth century (it was not always possible to locate them precisely in the field).¹ In spite of that, the sign of mine, symbolizing clusters of shafts and mines (without distinguishing between lead and salt mines) was marked on the main map by four settlements: Bochnia, Olkusz, Ujków, and Wieliczka. Ore mining (coal and silver) is represented by Olkusz and Ujków, salt mining by Bochnia and Wieliczka.

We were able to find three mills (separate mill settlements) with their own name and certain localization in Cracow Voivodeship and the duchy of Siewierz in the second half of the sixteenth century:

- Dąbie in the district of Szczyrzyc,
- Czaniec Mały in Silesian district,
- Smardzów in the duchy of Siewierz.

Mills situated in towns and villages were omitted, because they were not included in the program and assumptions of the Atlas.²

We marked 35 ironworks, either having an individual name, or named after the nearest village, but located outside, whose localization was known to us.³ We omitted ironworks, whose existence in the

¹ See LK 1564, vol. 2, pp. 57 f.: *Ratio orborae SMR Ilkusiensis anni 1550 summaria*; ibidem, p. 62: *Ratio orborae Ilkusiensis SMR 1558 summaria*; *Acta actorum officii zupariatus Ilkusiensis sub regimine Generosi Iosti Lodouici Decii [...]* 1567–1570, Bibl. Jag., MS 1 [microfilm in BN no. 12470]. Also see K. Pieradzka, *Przedsiębiorstwa kopalniane mieszczan krakowskich w Olkuszu od XV do początków XVII wieku*, „Zeszyty Naukowe Uniwersytetu Jagiellońskiego” no. 16, Seria Nauk Społecznych, Historia, no. 3, 1958, pp. 57–60, for names of shafts and mines in 1552 r. The list of mine names appearing in the sources since 1430 in D. Molenda, *Górnictwo kruszcowe na terenie złóż śląsko-krakowskich do połowy XVI w.*, Wrocław 1963 (Studia z Dziejów Górnictwa i Hutnictwa, vol. 8), pp. 375 f. Names of shafts and mines in Bochnia in the beginning of the sixteenth century see J. Piotrowicz, *Żupy krakowskie w pierwszych wiekach rozwoju od połowy XII do początków XVI wieku*, [in:] *Dzieje żup krakowskich*, ed. A. Jodłowski, Wieliczka 1988, p. 149; in the second part of the sixteenth century in A. Keckowa, *Żupy krakowskie w XVI–XVII wieku*, [in:] ibidem, p. 165. About the names of shafts in Wieliczka see J. Piotrowicz, *Żupy krakowskie*, p. 150; for the 1560s and 1570s see A. Keckowa, *Żupy krakowskie*, p. 163.

Rączka, *Młyny królewskie w krajobrazie Krakowa*, „Teki Komisji Urbanistyki i Architektury”, vol. 12, 1978, pp. 19–28, vol. 13, 1979, pp. 7–15; see AHMP Cracow, Map 4.10 – „Kraków i okolice na przełomie XV i XVI wieku”, comp. J. Laberschek (scale 1:10,000). Data from 1629 y. and 1660s see in: E. Trzyna, *Położenie ludności wiejskiej w królewskich województwach krakowskiego w XVII wieku*, Wrocław 1963, pp. 213, 215, 217.

³ J. Laberschek, *Kuźnice żelazne w ziemi krakowskiej w średniowieczu*, „Teki Krakowskie”, vol. 3, 1996, pp. 97–115; S. Miczulski, *Hutnictwo żelaza w księstwie siewierskim od średniowiecza do XVIII wieku (kuźnice dymarskie)*, [in:] *Siewierz*,

sixteenth century was uncertain, or those, which operated for a short period of time, or were difficult to localize. We marked:

- In Proszowice district:⁴ Kuźnica Błędowska, Kuźnica Okradzionowska, Laski;
 - In Lelów district:⁵ Czyżówka, Dąbrowica, Gnaszyn (Połęcz),⁶ Kawka, Kostrzyn, Krzemienda, Kuźnica (Kromołów parish), Kuźnica Chybakowska, Kuźnica Dzbowska, Kuźnica Łaziec,⁷ Kuźnica Marcisza,⁸ Kuźnica Niczowa,⁹ Kuźnica Pradelna, Kuźnica Przestańska, Kuźnica Stanowska, Ławy, Myszaków, Panek (Kuźnica Herbułtowska), Piła, Poczesna, Poręba, Trcianka, Wąsosze,¹⁰ Wiesiołka, Własna, Zawadzka;¹¹
 - In the duchy of Siewierz:¹² Czekanka, Kamienica, Kuźnica Stara,¹³ Kuźnica Sulikowska,¹⁴ Mijaczów (Kuźnica Będuska), Piwonia (Kuźnica Siekaczowska).
- We were able to localize 24 demesnes with their own name:¹⁵
- In Proszowice district: Biedaczów, Bolowiec, Damianice, Laski, Marszowice, Podchełmie, Wola;

Czeladź, Koziegłowy. Studia z dziejów Siewierza i księstwa siewierskiego, ed. F. Kiryk, Katowice 1994, pp. 467–498, particularly pp. 469–475; B. Zientara, *Dzieje małopolskiego hutnictwa żelaznego XIV–XVII wiek*, Warsaw 1954, pp. 269–272; R. Rybarski, *Handel i polityka handlowa Polski w XVI stuleciu*, vol. 2: *Tablice i materiały statystyczne*, Poznań 1929, pp. 324–326. About ironworks founded in the Middle Ages and in the first half of the sixteenth century see: SHGK, part III, no. 2, pp. 381–398. J. Laberschek, *Kuźnice żelazne*, p. 111 claims that there were 27 operating ironworks in 1550 in the land of Cracow and the Duchy of Siewierz; R. Rybarski, *Handel i polityka handlowa*, p. 326 – that there were 28 ironworks with 81 wheels and 233 workers in 1570s and 1580s in Cracow Voivodeship.

⁴ Bolesławska ironworks in Proszowice district was excluded (B. Zientara, *Dzieje małopolskiego hutnictwa*, p. 271: ‘Sławków, Parish of the Chełmski family, listed in 1578 as ‘newly-located’, demolished in 1589’).

⁵ Sierakowska ironworks in Lelów district was excluded (ibidem, p. 271: ‘Przyrów parish, mentioned in the Crown Metrica in 1580, does not appear in tax records or in inspections’), just like Zawada ironworks (ibidem, p. 270: ‘mentioned in the inspection from 1569 as ‘newly-built’ – does not appear in the sources otherwise’).

⁶ Liquidated before 1573, see ibidem, p. 269; SHGK, part III, no. 2, p. 385.

⁷ B. Zientara, *Dzieje małopolskiego hutnictwa*, p. 270: ‘Częstochowa parish, founded in 1553 (privilege), in tax records appears only in 1595, belonged to the Konopka family (ironworkers), in 1620 bought by Wolski, the great furnace abandoned in 1631’.

⁸ SHGK, part III, no. 2, p. 383: earlier called Bilanowska; liquidated in 1588 by Wojciech Padniewski. Since the 1530s it belonged to the family Marcisz vel Marciszko.

⁹ 1552 minera Nycz, 1563 kuźnica Niczowa, liquidated in 1588 (Wojciech Padniewski liquidated Kuźnica Nowa and converted it into a demesne), reactivated in the beginning of the seventeenth century, in Zawiercie Mniejsze at the close of the eighteenth century, see: SHGK, part III, no. 2, pp. 397 f.: Kuźnica Zawiercka.

¹⁰ B. Zientara, *Dzieje małopolskiego hutnictwa*, p. 271: ‘In Częstochowa parish, described in 1589 as ‘new’, in the hands of the Konopko family, bought by Wolski in 1620, abandoned 1631’.

¹¹ SHGK, part III, no. 2, p. 391: ‘Called Zawadzka in the second part of the sixteenth century; [...] 1565 Kuźnica Zawadzka was listed as new in the hands of the family Marcisz (ironworkers); in 1588 Wojciech Padniewski banished Zawadzki, and ironworker from Kuźnica Nowa, and turned the ironworks into a demesne, which was called Zawadka’.

¹² The following ironworks were not included in the Duchy of Siewierz, founded in the seventeenth century: Kuźnica Remiszowska (S. Miczulski, *Hutnictwo żelaza*, p. 474: ‘built on request of bishop M. Szyszkowski in 1617–1618, [...] closed down probably before 1645, Kuźnica Tapkowska (first entry – 1621, see B. Zientara, *Dzieje małopolskiego hutnictwa*, p. 271), or those, which might have been founded at the close of the sixteenth century, but it is unlikely: Kuźnica Przeczycka (S. Miczulski, *Hutnictwo żelaza*, pp. 474 f.: ‘perhaps it was founded in the beginning of the seventeenth century, because it was not listed in Targoszyce parish in the visitation conducted in 1598. One reliable entry comes from the 1645 inventory. [...] In 1668 there was a paper-mill on the spot, so it is possible that the ironworks was destroyed by the Swedes after 1655’), or Kuźnice Jawiszów (ibidem, p. 475: ‘founded probably after 1598, because the visitation does not mention them in Wojkowice parish. In 1611 the ironworks appear in the visitation under Wojkowice and Wareżyn as «kuźnice Jachiszów». [...] These ironworks do not appear in the inventories from 1645 and 1668’).

¹³ S. Miczulski, *Hutnictwo żelaza*, p. 473: ‘Concerning the name of Stara Kuźnica [...]. In the end of the sixteenth century it was called Stara Kuźnica, or Kuźnica Frankowska, in 1661 – Kuźnica Szwankowska. In the first half of the seventeenth century it usually appears as «Marciszewska kuźnica», or – sporadically – as «Frankowska», the final name Stara Kuźnica established later’; see also Noga, *Słownik*, pp. 79–81.

¹⁴ SHGK, part III, no. 2, p. 398: ‘two ironworks in Sulików [by the River Mitręga] – one near Bobrowy Staw, built in cruda radice prior to 1553, the other by Kuźniczy Staw was much older. Sometime before 1575 they two ironworks were joined and functioned as one until 1763.’

¹⁵ See K. Mikulski, J. Wroniszewski, *Folwark i zmiany koniunktury gospodarczej w Polsce XIV–XVII wieku*, „Klio”, vol. 4, 2003, pp. 25–39; W. Urban, *Przeptyw ziemi między chłopami a folwarkiem w Małopolsce u schyłku XVI wieku*, [in:] *Studia nad gospodarką, społeczeństwem i rodziną w Europie późnofeudalnej*, ed. J. Topolski, coop. C. Kuklo, Lublin 1987, pp. 119–129; A. Wyczański, *Studia nad folwarkiem szlacheckim w Polsce w latach 1500–1580*, Warsaw 1960.

- In Lelów district: Borowy, Brzostek, Ciecierzyn, Duliszyce, Kuków;
- In Szczyrzyc district: Kopań, Wieża;
- In Sącz district:¹⁶ Bieniowa,¹⁷ Niecew,¹⁸ Ratnowy;
- In Biecz district: Dąbrowa, Gądky, Załawie, Zimna Wódka;
- In Silesian district: Czerмна, Miejsce, Wilczkowice.

Four glassworks were marked, either having their own name, or named after the nearest settlement, but of known location:¹⁹

- In Lelów district: Huta;
- In Szczyrzyc district:²⁰ Huta Trzebuńska,²¹ Huta Zasańska;²²
- In Silesian district: Huta Strzeszawa.

The list of those inns, which formed separate villages (i.e. without inns situated in villages and towns) was included by Małgorzata Wilska in her commentary on the roads (see below, p. 621–622). These objects were shown on Map 5 (Major roads of Cracow Voivodeship in the sixteenth century), but not on the main map, and – consequently – not in the index of settlements.

The number of inhabitants was needed to assess the size of towns and villages. Obviously, the results obtained were hypothetical. For that purpose, we used tax registers from the sixteenth century, inspections of royal estates, inventories of Church estates, and results of studies.²³ The number of houses served as a basis for our calculations. As in previous volumes (Sieradz and Łęczyca Voivodeships and Sandomierz Voivodeship), we assumed that one house was inhabited by nine people on average. In case there was no data on the number of houses, we used as a base the number of artisans living in a given town, and recorded in tax registers.²⁴

¹⁶ We did not mark Lubomirka demesne, localized in an uncertain manner ('in the forest by the River Czarna') in Słonica parish, Sącz district. It was mentioned in two source entries from 1569 and 1620; see S. Płaza, *Sołectwa w powiecie sądecko-czchowskim w XIII–XVIII w.*, „Rocznik Sądecki”, vol. 9, 1968, p. 27, footnote 55.

¹⁷ H. Stamiński, *Powodzie przyczyną zagłady Ciecierzyn, Gocza, Hampłowej i Zastonia w dawnej Sądecczyźnie*, „Rocznik Sądecki”, vol. 5, 1962, p. 146: 'Bieniowa [...] was never included in tax registers, because it was only a demesne belonging to the Sisters of Sv. Clare'.

¹⁸ Year 1563: 'here you have only a demesne, nothing to mention in the register', quoted in: H. Stamiński, *Poprawki i uzupełnienia prac historycznych o Sądecczyźnie*, „Rocznik Sądecki”, vol. 9, 1968, p. 402.

¹⁹ J. Laberschek, *Huty szkła w ziemi krakowskiej od XIV do końca XVI w.*, „Teki Krakowskie”, vol. 12, 2000, pp. 115–128; SHGK, part II, no. 1, pp. 149–153; A. Wyrobisz, *Liczba i rozmieszczenie hut szklanych w Małopolsce w XIV–XVII w.*, PH, vol. 57, 1966, no. 3, pp. 366–387; idem, *Szkło w Polsce od XIV do XVII wieku*, Wrocław 1968, pp. 19–38. According to Wyrobisz (A. Wyrobisz, *Liczba i rozmieszczenie*, p. 386), there were 38 glassworks open in the entire Lesser Poland in the second half of the sixteenth century.

²⁰ We did not mark Osiecka glassworks (Drogina parish), because the last source record mentioning it comes from 1524, see SHGK, part II, no. 1, p. 150.

²¹ LK 1564, vol. 1, p. 212: 'Villa Trzebunia [...] there is one glassworks, where they pay...'; see SHGK, part II, no. 1, pp. 150 f.

²² AV Cap. 7, f. 36.

²³ See K. Chłapowski, *Źródła pisane*, [in:] AHP Cracow.

²⁴ K. Chłapowski, *Character and size of settlements*, [in:] AHP Sieradz, in this edition III.3.2.5; A. Dunin-Wąsowiczowa, *Character and size of settlements*, [in:] AHP Sandomierz, in this edition III.3.2.2; see P. Małopolska, vol. 3, pp. 45–48; I. Gieysztorowa, *Wstęp do demografii staropolskiej*, Warsaw 1976, pp. 146–161. See also K. Górka, *Przyczynek do krytyki rejestrów poborowych z XVI w.*, SŻ, vol. 1, 1957, pp. 185–189; Z. Guldon, *Uwagi w sprawie przydatności badawczej rejestrów poborowych z XVI w.*, ZH, vol. 31, 1966, no. 1, pp. 73–79; P. Szafran, *Inwentarze czy rejestry poborowe?*, ZH, vol. 31, 1966, no. 1, pp. 53–71. The amount paid by the towns of the so-called town tax was practically useless: W. Czerkawski, *Metoda badania zaludnienia Polski w XVI wieku*, „Sprawozdania z Czynności i Posiedzeń Akademii Umiejętności w Krakowie”, vol. 2, 1897, no. 2, p. 11: 'The amount of money paid by the towns did not change for decades, almost centuries even, while the number of inhabitants naturally rose or fell'; W. Kula, *Stan i potrzeby badań nad demografią historyczną w dawnej Polsce*, RDSG, vol. 13, 1951, pp. 63 f.: Szos 'depended on wealth, or income of the taxpayers, because it was levied rather roughly, and often in the lump, it was easy to make it [...] a tool of correcting the existing division of income [...]'. Compare: 'The nature of this tax, as well as the flat rate maintained since the turn of the fifteenth/sixteenth century, and acknowledged disproportions between these lump sums and the range of town development deprived the sums paid by towns and recorded in tax registers of any informative value concerning the number of inhabitants' (I. Gieysztorowa, *Wstęp do demografii*, p. 166); A. Pawiński (P. Małopolska, vol. 3, p. 46) assumed that 1 złoty of the town 'roughly equals four or five houses, so around 24 heads'. E. Wielosé claimed that 'the number of people per 1 złoty of the town tax varies significantly from 17 to 180 people', see idem, *Ludność Polski od X do XVIII wieku*, KHKM, vol. 5, 1957, no. 1, p. 37, see also I. Gieysztorowa, T. Ładogórski, *W sprawie nowych badań nad zaludnieniem dawnej Polski*, KHKM, vol. 6, 1958, no. 1–2, pp. 45–60; I. Gieysztorowa, *Źródła i szacunki w badaniach osadnictwa i demografii Polski XVI i XVII w.*, KHKM, vol. 10, 1962, no. 3–4, pp. 575–591; eadem, *Badania*

We found 73 cities and towns, i.e. settlements granted town rights and paying town tax ('szos'), in Cracow Voivodeship in the second half of the sixteenth century.²⁵ We did not include unsuccessful locations, like the one from 10 February 1550 of the town Lipowiec, and towns, which lost their town character quickly, like Czyżówka.²⁶ Also, there were three towns in the duchy of Siewierz.

The list of towns in particular districts, with ownership type (r – royal, c – Church, n – of the nobility) runs as follows:

- Proszowice district: Będzin (r), Brzesko Nowe (c), Chrzanów (n), Działoszyce (n), Kleparz (r), Koszyczki (r), Kraków (r), Nowa Góra (n), Olkusz (r), Proszowice (r), Skała (c), Skarbmierz, (c), Sławków (c), Słomniki (r).
- Książ district: Andrzejów (c), Książ Wielki (n), Miechów (c), Wodzisław (n), Wolbram (r), Żarnowiec (r).
- Lelów district: Częstochowa (r), Kłobucko (r), Kossów (n), Kromołów (n), Krzepice (r), Lelów (r), Mrzygłód (n), Mstów (c), Ogrodzieniec (n), Olsztyn (r),²⁷ Pilcza (n), Przerów (r), Szczekociny (n), Włodowice (n), Żarki (n).
- In Szczyrzyc district: Bochnia (r), Brzeżek (n), Dobczyce (r), Jordanów (n), Kazimierz (r), Lanckorona (r), Myślimice (r), Skawina (c), Tymbark (r), Uście (r), Wieliczka (r).
- In Sącz district: Czchów (r), Ilmanowa (n), Krościenko (r), Lipnica (r), Muszyna (c), Nowy Targ (r), Piwniczna (r), Sądecz Nowy (r), Sądecz Stary (c), Wojnicz (r), Zakliczyn (n).
- In Biecz district: Biecz (r), Bobowa (n), Cieszkowice (r), Dębowiec (r), Dukla (n), Gorlice (n), Grębów (r), Jasło (r), Jaśliska (c), Osiek (r), Żmigród (n).
- In Silesian district: Kęty (r), Oświęcim (r), Wadowice (r), Zator (r), Żywiec (n).
- In the duchy of Siewierz: Czeladź (c), Koziegłowy (c), Siewierz (c).

The highest number of towns and cities was observed in the districts of Lelów (15) and Proszowice (14), and the lowest – in Książ (six), and Silesia (five), excluding the duchy of Siewierz. There were significantly more royal towns in the districts of Szczyrzyc (eight royal towns of 11), Sądecz Nowy (seven royal towns of 11), and Silesia (four royal towns of five); the majority of towns in Lelów district belonged to the nobility (eight of 15). All towns in the duchy of Siewierz belonged to the Church. In Książ district the proportions were equal: two towns of each type.

Only one town in our area could be included in the category of large cities (above 5,000 inhabitants) – Cracow.²⁸ The settlements, which were granted town rights and most likely had more inhabitants than 1,000, were marked on the map as cities.

nad historią zaludnienia Polski, KHKM, vol. 11, 1963, no. 3–4, pp. 523–558; M. Bogucka, H. Samsonowicz, *Dzieje miast i mieszczaństwa w Polsce przedrobiorowej*, Wrocław 1986, compare pp. 353–392, chapter: *Typologia miast na podstawie kryteriów demograficznych*.

²⁵ See J. Wyrozumski, *Rozwój sieci miejskiej w Małopolsce w średniowieczu i u progu czasów nowożytnych*, KHKM, vol. 28, 1980, no. 3, pp. 363–371. Compare Z. Kulejewska-Topolska, *Oznaczenia i klasyfikacje miast w dawnej Polsce (XVI–XVIII w.)*, CPH, vol. 8, 1956, no. 2, pp. 253–268; Szczygieł, annex I: *Nowe inicjatywy lokacyjne*, particularly pp. 231 f.; H. Samsonowicz, *Liczba i wielkość miast późnego średniowiecza Polski*, KH, vol. 86, 1979, no. 4, pp. 917–931.

²⁶ F. Kiryk, *Lokacje miejskie nieudane, translacje miast i miasta zanikłe w Małopolsce do połowy XVII stulecia*, KHKM, vol. 28, 1980, no. 3, pp. 374, 381; Szczygieł, pp. 231 f.

²⁷ F. Kiryk, *Lokacje*, p. 381: '[...] the foundation [in 1478] did not revive the town, as in 1534 there were still only 10 burgher houses there, and the owners were freed from taxation'. Olsztyn (Olsztynek), however, still appears in the lists of cities and towns in the sixteenth and seventeenth tax registers. Tax reg. 1595, p. 636 lists 11/2 city lan, two artisans, two landless peasants, and paid town tax (fl. 3, gr. 6).

²⁸ In this study, K. Follprecht, Z. Noga, *Kraków w 1598 r.*, [in:] AHP Cracow, in this edition III.6.15b.1, determine the number of inhabitants of Cracow to be 14 700 or even 15 900. LK 1569, f. 81v: 'there is [...] houses of tenement houses [...] numero 538', 'there are 129 free houses'. LK 1659–1664, vol. 2, p. 317: 'Tenement houses, manors and houses 'in possessione personarum spiritualium are ad praesens in the town no.o 228, of the nobility no.o 120, burgher, and almost all rented, no.o 324'. In 1578 Cracow paid 13,017 fl. 16 gr liquor excise tax, see *Księgi podskarbińskie z czasów Stefana Batorego 1576–1586 w dwóch częściach*, pub. A. Pawiński, Warsaw 1881 (*Źródła Dziejowe*, vol. 9), p. 268.

Map 1. Cities in Cracow Voivodeship

These were:

- In Proszowice district: Będzin,²⁹ Olkusz,³⁰ Proszowice,³¹ Sławków,³² Słomniki,³³
- In Książ district: Jędrzejów,³⁴ Miechów,³⁵ Żarnowiec;³⁶
- In Lelów district: Częstochowa,³⁷ Przerów;³⁸
- In Szczyrzyc district: Bochnia,³⁹ Kazimierz,⁴⁰ Wieliczka;⁴¹

²⁹ Tax reg. 1595, p. 618 lists: 24 city lans, 72 artisans and 32 landless peasants. In 1578 Będzin paid 595 fl. 11 gr liquor excise tax (*Księgi podskarbińskie*, p. 269).

³⁰ Tax reg. 1595, pp. 620 f. lists 64 artisans. D. Molenda, *Dzieje Olkusza do 1795 r. (Rozwój górnictwa i hutnictwa w okresie sztolniowym)*, [in:] *Dzieje Olkusza i regionu olkuskiego*, vol. 1, ed. F. Kiryk, R. Kołodziejczyk, Warsaw-Cracow 1978, p. 250: 'Mines and ironworks, which developed quickly at the time, offered work places to a higher number of people than before, some 1500'; pp. 309 f.: 'This tax was paid by 181 people in the town, and 249 in the suburb. The 1032 miners were listed separately. So, there were 1469 taxpayers altogether. With children clergymen, and 161 Jews, who paid a different tax, over a dozen ore miners and mining clerks living in Olkusz, the population in 1662 can be assessed at some 2600 to 2700 people'. In 1578 Olkusz paid 709 fl. 8 gr liquor excise tax (*Księgi podskarbińskie*, p. 269).

³¹ LK 1564, vol. 1, p. 43: 'there are 110 houses'. In 1578 Proszowice paid 1226 fl. 11 gr liquor excise tax (*Księgi podskarbińskie*, p. 270).

³² Tax reg. 1595, p. 620 lists 14 city lans, 48 artisans and 15 landless peasants. See also Z. Noga, *W okresie nowożytnym*, [in:] *Dzieje Sławkowa*, ed. F. Kiryk, Cracow 2001, p. 147: 'The sixteenth century was generally favourable for Sławków, however, it ended in with a great fire in 1600 [...]. Despite that, the city was back on its feet quite fast, and soon had 555 inhabitants'. For the list of houses and squares in Sławków in the second part of the seventeenth century, ibidem, pp. 163–168, Table 1. F. Kiryk, *Pozostałe miasta regionu olkuskiego*, [in:] *Dzieje Olkusza i regionu*, pp. 382 f.: The number of inhabitants – 602 – calculated on the basis of the register from 1581 is imprecise and definitely lowered. In 1668, after the Swedish Deluge, 121 inhabited houses, 22 empty, 91 undeveloped plots, and finally nine houses belonging to the vogt's office were found, we can assume that in the sixteenth and seventeenth century there were 243 residential houses in the town, as well as six farmstead in Podzamcze and Podedworze hamlets, and several houses in the manor'. In 1578 Sławków paid 128 fl. 17 gr liquor excise tax (*Księgi podskarbińskie*, p. 269).

³³ LK 1564, vol. 1, p. 111: 'there are 104 inhabited houses in the town'; LK 1569, f. 377v: 'Oppidum Człomniki [...] there are 116 houses, together with undeveloped plots'. In 1578 Słomniki paid 547 fl. 12 gr liquor excise tax (*Księgi podskarbińskie*, p. 270).

³⁴ Tax reg. 1595, pp. 627 f. lists 21 city lans, 102 artisans and 30 landless peasants. In 1578 Jędrzejów paid 322 fl. 14 gr liquor excise tax (*Księgi podskarbińskie*, p. 270).

³⁵ Tax reg. 1595, p. 630: 'Miechów burned down'. The tax register from 1593 f. 311v lists 29 lans, 72 artisans and 17 landless peasants. See Z. Peckowski, *Ziemia miechowska. Zarys dziejów osadnictwa do końca XVIII wieku*, Cracow 1992, p. 118: 'In 1581 Miechów could have had some 1400 inhabitants, in 1629 – 1206'. In 1578 Miechów paid 455 fl. 14 gr liquor excise tax (*Księgi podskarbińskie*, p. 270).

³⁶ LK 1617–1620, f. 63: 'Oppidum Żarnowiec – some 228 houses can be found', 'there are 12 undeveloped plots'; The visitation of Cracow Voivodeship conducted in 1627, LK 1627, f. 94v: 'Żarnowiec: 215 houses in total according to town registers', '30 undeveloped plots'. In 1578 Żarnowiec paid 494 fl. 29 gr liquor excise tax (*Księgi podskarbińskie*, p. 270).

³⁷ LK 1564, vol. 2, p. 33: 'domus in oppido numero 218'; LK 1569, f. 538: 'there are 249 houses'; LK 1617–1620, f. 42v: 'house tax – there are 351 in the entire town'. J. Rajman, *Rozwój miasta do połowy XVII w.*, [in:] *Częstochowa. Dzieje miasta i klasztoru jasnogórskiego*, vol. 1: *Okres staropolski*, ed. F. Kiryk, Częstochowa 2002, p. 169, calculated the population of Częstochowa at: 1569 – around 2060, 1620 – around 2830, around 1630 – some 3210 people living in the city. In 1578 Częstochowa paid 132 fl. 4 gr liquor excise tax (*Księgi podskarbińskie*, p. 270).

³⁸ LK 1564, vol. 2, p. 37: 'there are 84 elder burghers who pay the rent according to the privilege'; LK 1617–1620, f. 50v: 'there are 136 houses'. In 1578 Przerów paid 36 fl. 18 gr liquor excise tax (*Księgi podskarbińskie*, p. 270).

³⁹ F. Kiryk, *Bochnia do połowy XVII w.*, [in:] *Bochnia. Dzieje miasta i regionu*, ed. F. Kiryk, Z. Ruta, Cracow 1980, p. 118: 'No source information survived from the fifteenth and sixteenth century, which would allow us even to partially determine the town's population. Tax reg. 1595, pp. 596 f. lists 20 city lans, 95 artisans and 46 landless peasants. We must also remember the works of Bochnia mine (around 500 people), see J. Piotrowicz, *Żupy krakowskie*, p. 153. In 1578 Bochnia paid 2245 fl. 20 gr liquor excise tax (*Księgi podskarbińskie*, p. 269).

⁴⁰ Tax reg. 1595, pp. 590 f. lists 188 artisans and 26 landless peasants in Kazimierz. In 1578 Kazimierz paid 6573 fl. 1 gr liquor excise tax (*Księgi podskarbińskie*, p. 269).

⁴¹ LK 1569, f. 333: 'the burghers pay the rent from 82 houses', f. 333v: 'there are 15 counsellor houses, for which they do not pay', 'there are 34 empty plots for which they do not pay'. We must also remember about the administration workers in Wieliczka, see J. Piotrowicz, *Żupy krakowskie*, p. 153: 'The staff of Wieliczka mine comprised of: the clerks and workers of the shaft – 50 people, mine workers – at least 290 people, saltworks workers – around 100 people. This would equal around 440 workers in Wieliczka mine, but this number can easily be increased to 500 workers'; compare: J. Piotrowicz, *Dole i niedole Wieliczki za panowania ostatnich Jagiellonów i królów elekcyjnych (do „potopu” szwedzkiego)*, [in:] *Wieliczka: dzieje miasta (do roku 1980)*, Cracow 1990, p. 158: 'ill-fated events and cataclysms, which often affected the town, fully explain the abnormal situation, when cyclically the number of workers of the mine was higher than the population of the town and the suburbs'. Exemplary data: in 1518 – population of Wieliczka = around 2000, mine workers = around 440; 1569 – population = around 1000, workers = 850; 1580 – population = around 635, mineworkers = around 600 (?), J. Piotrowicz, *Dole i niedole*, p. 158.

- In Sącz district: Lipnica,⁴² Sądecz Nowy,⁴³ Zakliczyn;⁴⁴
- In Biecz district: Biecz,⁴⁵ Gorlice;⁴⁶
- In Silesian district: Kęty;⁴⁷
- In the duchy of Siewierz: Koziegłowy,⁴⁸ Siewierz.⁴⁹

Only four of these towns belong to the category between 2,000 and 5,000 inhabitants: Biecz, Częstochowa, Sądecz Nowy, and Żarnowiec. The largest percentage of towns can be found in the districts of Lelów (13 towns of 15), Biecz (nine towns of 11), Szczyrzyc and Sądecz Nowy (both eight towns in 11). The most favourable was the balance in Książ district: three larger cities and three towns. Detailed data can be found in the tables at the end of the chapter.

The Jews inhabiting towns and cities of Cracow Voivodeship should also be mentioned here. According to Prof. Jacek Wijaczka, in the second half of the sixteenth century the Jews clustered around 14 towns in the voivodeship: Będzin, Bobowa, Bochnia, Dobczyce, Jasło, Kazimierz, Lanckorona, Lelów, Sądecz Nowy, Olkusz, Oświęcim, Pilica, Sławków, Uście Solne.⁵⁰

In the case of villages – their size was calculated on the basis of the number of lans and taxed persons (e.g. smallholders, landless peasants, miller, innkeeper).⁵¹ Proper conversion factors and multipliers were difficult to determine due to the fragmented nature of source records (the number of serfs and the size of cultivated area), and the vast majority of the surviving inventories describes royal villages. However, there are some discrepancies as well in these records. In Książ district, the lowest serf/lan (mansus) rate was observed in the village Dłużec (1.1), the highest – in Jeżówka (2.37). If we assume five adults per 1 serf farm, we will have, respectively: 5.6 and 11.6 people per lan. In royal estates in Proszowice district (1564) the lowest serf/lan rate occurred in the village Wielga Wieś (Biały Kościół parish) – 0.9 (which means 4.5 people per lan), and the highest in Łobzów (St. Stephen parish): 17.1 (85.5 people per lan); in a Church village Czulów Więszy (Rybna parish) the rate equalled 2.7 (13.5

Kubik, *Poeksploatacyjne zapadliska wielickie*, „Studia i Materiały do Dziejów Żup Solnych w Polsce”, vol. 12, 1983, pp. 7–62, particularly pp. 27–34.

⁴² F. Kiryk, *Najdawniejsze dzieje Lipnicy Murowanej (XIII–XVI wieku)*, [in:] *Lipnica Murowana. Gród króla Władysława Łokietka*, Cracow 2007, p. 24: ‘We have no information concerning the city’s population from the period until the middle of the seventeenth century. [...] We can only assume that in 1580 it was inhabited by roughly over 1000 people’. Similarly idem, *Inne miasta regionu bocheńskiego do połowy XVII w.*, [in:] *Bochnia. Dzieje miasta i regionu*, p. 145. Tax reg. 1595, p. 610 lists 43½ City lan, 24 artisans, two landless peasants and 23 smallholders. In 1578 Lipnica paid 136 fl. 26 gr liquor excise tax (*Księgi podskarbińskie*, p. 269).

⁴³ *Dzieje miasta Nowego Sącza*, vol. 1, ed. F. Kiryk, Warsaw–Cracow 1992, p. 403: ‘When assessing the number of houses in Nowy Sącz, in the second half of the sixteenth century at 240 [...] the town alone was inhabited by 1440–1920 people. We can calculate the population of the urban district of Nowy Sącz at between 3.5 and 4 thousand people’. In 1578 Sądecz Nowy paid 2,163 fl. 37 gr liquor excise tax (*Księgi podskarbińskie*, p. 269).

⁴⁴ Szczygieł, p. 232: ‘In 1567 there were 157 residential houses’. Tax reg. 1595, p. 611 lists three city lans, 65 artisans and 24 landless peasants. In 1578 r. Zakliczyn paid 118 fl. liquor excise tax (*Księgi podskarbińskie*, p. 269).

⁴⁵ In 1626 there were 150 houses inside city walls, see *Materiały do historii miasta Biecza (1361–1632)*, comp. F. Bujak, Cracow 1914, no. 495; *Regestum stationum exactarum sub Proconsulatu Famati D. Stanislai Mądrowicz data [...] ad oppidum [...] in April Anno Domini 1626*, AP Cracow, Dep. 32, pp. 1–7 and *Regestr stacyei wydatku na żołnierze Jego Msci Pana Przyleckiego ktorzy przyiechaly [...] za Burmistrza pana Stanisława Mądrowicza A.D. 1626*, Dep. 32, pp. 15–24. See T. Ślowski, *Studia nad ludnością Biecza w wiekach XIV–XVII*, „Małopolskie Studia Historyczne”, vol. 1, 1958, no. 3–4, p. 29: ‘Even though, we are unable to calculate the population of Biecz in the sixteenth century’; p. 30: ‘In 1629 3,712 people lived in Biecz and in the suburbs’; p. 36: ‘we can say that in the first quarter of the seventeenth century the population of Biecz alone was at least 1771 people’. See F. Kącki, *Ludność powiatu bieckiego od I połowy XIV wieku do II połowy XVI wieku*, „Historia. Organ Młodych Historyków”, vol. 4, 1937, pp. 20–27. In 1578 Biecz paid 568 fl. 29 gr liquor excise tax (*Księgi podskarbińskie*, p. 269).

⁴⁶ Tax reg. 1595, p. 603 lists 29 artisans and 15 landless peasants. J. Barut, *Gorlice. Studium historyczno-urbanistyczne miasta*, Brzozów 1991, p. 78, calculates the number of all residential houses in 1608 at 192, and the population at around 1500. In 1578 Gorlice paid 70 fl. 18 gr liquor excise tax (*Księgi podskarbińskie*, p. 269).

⁴⁷ Tax reg. 1595, p. 615 lists nine city lans, 156 artisans and 55 landless peasants.

⁴⁸ F. Kiryk, J. Rajman, *Miasta ziemi siewierskiej*, [in:] *Siewierz, Czeladź, Koziegłowy*, p. 333: ‘In 1645 there were as many as 196 houses in Koziegłowy, and 20 years later (1668) 204 houses in the town, and 58 empty plots, remaining after demolished houses. We can therefore assume that before the Swedish Deluge there were 262 houses in Koziegłowy.

⁴⁹ Ibidem, p. 333: ‘188 houses were found in Siewierz in 1669, as well as 10 empty and 69 plots for development’.

⁵⁰ The study concerning the Jewish settlements in the Crown in the second half of the sixteenth century was submitted for publication.

⁵¹ The surviving 1590 poll tax registers for Łobzów and Nowa Wieś in Proszowice district are an exception here, see J. Senkowski, *Zachowane rejestry podłównego 1590 r.*, KHKM, vol. 18, 1970, no. 3, pp. 415–418.

people per lan), and in the village Dziewięciele (Nasiechowice parish), belonging to the nobility, this was, respectively two and 10 people per 1 serf lan. In Szczyrzyc district (1564) the situation presented itself as follows: the lowest rate among royal estates occurred in the village Zamieście (Tymbark parish) – 0.6 (three people per lan), the highest in Osielec (Maków parish) – 13.5 (67.5 people per lan); among the estates belonging to the Church the lowest rate was that of Sidzina, a village in Skawina parish – 0.97 (4.85 people per lan), and the highest in Trzciana village – 2 (10 people per lan); in Kamyk, a village belonging to the nobility, we have the following situation: 2 (10 people per lan). In Sącz district, the situation in royal estates (1564) looked as follows: the lowest rate occurred in the village Wolica (Podegrodzie parish) – 1.1 (5.5 people per lan), the highest in Iwkowa – 6.7 (33.5 people per lan) in three villages belonging to the Church: Moszczenica Niżna, Moszczenica Wyżna (Sądecz Stary parish), and Nieszkowa (Podegrodzie parish) the result was identical – the rate equalled 2 (10 people per lan); in the villages of the nobility the lowest rate appeared (1576) in the village Połomia (Wojakowa parish) – 2 (10 people per lan), and the highest in Milejówka (Wojnicz parish) – 4 (20 people per lan). We possess relatively much data on the villages in Silesian district. In royal estates (1564) we found the following: the lowest rate was noted in Ponikiew, a village in Wadowice parish – one (five people per lan), the highest in Bujaków village (Kęty parish) – eight (40 people per lan); in the villages belonging to the Church (1532–1533) the evaluated rate varied from four (20 people per lan) in Zegodowice village (Woźniki parish), and 4.8 (24 people per lan) in Ryczów (Woźniki parish); in the villages of the nobility (1532–1533) the lowest rate was found in Stanisław (Zebrzydowice parish) – 0.8 (four people per lan), and the highest (1598) in the village Cisiec (Cięcina parish) – 13 (65 people per lan). The arithmetic mean derived from this fragmentary information (together with other data falling between the described limits) equals: in royal estates – 15.75 people per lan, in Church estates – 12.86 people per lan, in the villages of the nobility – 12.96.

Fully aware of the controversies surrounding the presented conversion factors, we decided to assume the following indicators for our calculations: 14 people per lan, six people per mill, or inn, five per a smallholders household, four people per a landless peasant household, and five people in the case of an artisan (e.g. baker, or shoemaker).⁵² Our calculations were based on the data from the tax register of Cracow Voivodeship from 1595, or – in the case of the lack of data – from the tax register of this voivodeship from 1593.⁵³ The Duchy of Siewierz is an exception here: the lack of complete sources forced us to use information from 1443 and 1667.⁵⁴ The surviving sixteenth century data was found in the extremely helpful *Słownik miejscowości księstwa siewierskiego* compiled by Zdzisław Noga.⁵⁵ In several cases, it was impossible to determine the size of settlement, because the data from the registers treated the shared land of several villages together, e.g. in the district of Proszowice: Balice, Burów, and Szczeglice, or Trzebinia, Trzebinka, and Górka; in Szczyrzyc district: Chodzinice, Ryczywół, and Podedworze; in Sącz district: Brzozowa and Polikta; in Silesian district: Bobrowniki, Gromiec, and Gorzów.

⁵⁵ Noga, *Słownik*, especially the commentary on the used sources: pp. 5–10.

Map 2. Castles in Cracow Voivodeship

Our calculations, using the aforementioned multipliers and indicators, allowed us to mark these villages on the map, which had 200 and more inhabitants. They were marked with the same sign as towns, distinguished by different letters in names. In the following list of larger villages, type of ownership was put in brackets (r – royal, c – Church, n – nobility), rc – royal-Church, rn – royal-nobility, cn – Church-nobility, t – town).

- In Proszowice district: Bąbel (r), Bibice (c), Bieńczyce (c), Bierków (n), Bolesław (n), Borunice (r), Bronowice (c), Bukowno (c), Chechło (n), Chrystoporzyce (n), Czubrowice (r), Czuszków (n), Długoszyn (rc), Dziewięczyce (n), Garlica (cn), Gołaczów (c), Gorynice (n), Gruszków (cn), Gunów (c), Igołomia (cn), Irzmanowice (r), Jangrot (c), Jaworzno (c), Jeleń (c), Karniów (n), Karwin (c), Kaszów (c), Kazimierza Wielka (n), Klimuntów (c), Kobylany (c), Kosmałów (r), Kosmerzów (n), Krowodrza (c), Krzesławice (c), Krzeszowice (n), Krzyszowice (n), Kwaczała (c), Lubocza (cn), Luborzycza (c), Łęka (r), Łętkowice (r), Łosień (c), Łuczyce (n), Michałowice (c), Mogiła (c), Moniaczkowice (n), Morawica (n), Niedźwiedź (n), Nowa Wieś (r), Olszenica (c), Ostrów (c), Paczółtowice (n), Pleszów (n), Płaza (n), Prądnik Wielki (c), Prędocin (c), Przegonia (n), Przymków (rc), Raclawice (r), Rudawa (c), Rybna (c), Sarbie (c), Sieciechowice (n), Stanisławice (n), Stradomia (r), Strzelce Wielkie (n), Strzemieszyce Małe (c), Strzemieszyce Wielkie (c), Sułoszowa (n), Tanie (c), Topola (cn), Tropiszów (c), Wawrzyńczyce (c),⁵⁶ Węgrce (c), Wiąckowice (n), Wielga Wieś (r), Wielmoża (n), Wyciąże (c), Zagórze (n), Zalas (n), Zaszczytów (c), Zelków (r), Zielonki (rc), Zimnodół (r), Zwierzyniec (c); 13 of the villages listed exceeded the number of 400 inhabitants (Bibice, Bolesław, Igołomia, Irzmanowice, Krowodrza, Michałowice, Niedźwiedź, Prędocin, Sieciechowice, Stradom, Sułoszowa, Wawrzyńczyce i Zielonki).
- In Książ district: Boryszowice (n), Chlina (r), Czaple Małe (c), Dziaduszyce (n), Jeżówka (r), Kalina (n), Kozłów (n), Krzcęcice (n), Łysaków (c), Nawarzyce (c), Niegosławice (c), Piotrkowice (n), Poręba Dzieżyca (n), Przybysławice (r), Sędowice (c), Sędziszów (n), Słupów (n), Tczyca (n), Tur (c), Węchadłów (n), Wierzbica (r), Wola (r), Wrocirysz (c), Zarzyszn (n); only three villages here exceeded the number of 400 inhabitants (Chlina, Sędowice i Tur).
- In Lelów district: Bleszno (n), Częstochówka (c), Irzędze (n), Kocznia (r), Łany Wielkie (r), Łany Małe (r), Łobodna (r), Miedzwno (r), Mirów (r), Nagłowice (n), Nakło (n), Ostrowy (r), Otoła (r), Pierszne (rn), Podlesie (n), Raszków (n), Rokitno (c), Sprawa (n), Strzegowa (n), Truskolasy (r), Walenczów (r), Wręczyce (r), Zarębice (r); only two villages exceeded the number of 400 inhabitants (Łany Wielkie and Miedzwno).
- In Szczyrzyc district: Biezanów (c), Bodzanów (c), Borzęta (r), Brody (n), Brzezcie (n), Bysina (r), Bystra (n), Dziewin (r), Gdów (n), Głogoczów (n), Jasień (n), Jodłówka (r), Kłaj (r), Królewska (r), Krzyszkowice (c), Kunice (c), Lubień (r), Łapczyca (c), Łazy (c), Łętownia (n), Miłoszów (r), Mogilany (n), Mszana Niżna (r), Mszana Wyższa (r), Naprawa (n), Niepołomice (r), Okocin (n), Olszówka (r), Pcin (r), Poręba (Spytkowska) (n), Prokocin (n), Przypkowice (n), Raba (n), Rabka (n), Rabrot (r), Radziszowska Wola (c), Radziszów (c), Rudnik (r), Rzezawa (r), Skawa (n), Skotniki (r), Spytkowa (n), Stróża (r), Sulikowice (r), Targowisko (c), Tarnawa (n), Toporzysko (n), Uszew (c), Wilkowiska (c), Wiśniowa (r); of the villages listed, five had more than 400 inhabitants (Jodłówka, Królewska, Pcin, Rzezawa and Wiśniowa).
- In Sącz district: Bieganice (c), Bruśnik (n), Chełmiec (c), Dębno (n), Filipowice (n), Gnojnik (n), Godprzydowa (n), Gostwica (r), Gwoździec (n), Iwkowa (r), Jadowniki (r), Jastrzębia (n), Kamienica (c), Kamionka (c), Lipnica Niemiecka (n), Niedźwiedza (n), Pisarzowa (r), Podegrodzie (c), Przedanica Niżna (n), Sufczyn (n), Trzetrzewnia (r), Tymowa (n), Złota (n); only two villages exceeded the number of 400 inhabitants (Jadowniki i Złota).
- In Biecz district: Barwinek (n), Bieniarowa (rc), Błaszowska (n), Cherowa (n), Czeluśnica (c), Czerwna (n), Dębowa (n), Grabie (n), Hartłowa (r), Jodłowa Niemiecka (c), Jodłowa Polska (c), Kryg (rc), Libusza (rc), Łużna (n), Miscowa (n), Moszczenica Niemiecka (r), Moszczenica Polska (r), Mszana (n), Mszanka (r), Olszyny (n), Ołpiny Wyższe (n), Ossownica (r), Przedmieście (t), Raclawice (r), Rozembark (r), Ryglice Wyższe (n), Rzepiennik (c), Rzepiennik Marciszów (r), Rzepiennik Strzeżów (r), Siemichów (r), Staszkówka (r), Strzeszyn (r), Szerzyny

⁵⁶ Called a city once: AV Cap. 10, f. 189: ‘Villa Wawrzynczice seu oppidum’.

- (n), Święcany (n), Świętkowa (r), Trzciana (n), Turza (r), Tylowa (n), Wójtowa (r), Zydranowa (n); eight villages had more than 400 inhabitants (Bieniarowa, Błaszkowa, Jodłowa Niemiecka, Moszczenica Niemiecka, Ossownica, Przedmieście, Siemichów and Szerzyny).
- In Silesian district: Bachowice (n), Barwałd Średni (r), Bestwina (n), Bielany (r), Chocznia (r), Czaniec (n), Frydrychowice (n), Głabowice (n), Grodziec (n), Hałcnów (n), Inwałd (n), Jawiszowice (n), Kletcza (n), Kobiernice (r), Kozy (n), Krzeszów (n), Krzęcin (c), Lipnik (r), Łękawica (n), Łęki (r), Osiek (n), Piotrowice (r), Pisarzowice (n), Polanka (n), Poręba Markowa (n), Poręba Wielka (n), Przeciszów (n), Przyborów (n), Spytkowice (n), Stanisławie (rn), Stara Wieś (n), Stryszów (n), Strzeszawa (n), Wieprz (n), Wilamowice (n), Witanowice (n), Witkowice (n), Zembrzyce (n); of which eight exceeded the number of 400 inhabitants (Kozy, Lipnik, Osiek, Pisarzowice, Polanka, Przeciszów, Stryszów and Wieprz).
 - In the Duchy of Siewierz: Gniazdów (c), Grodziec (c), Lgota (c), Siedlec (c); none of them exceeded the number of 400 inhabitants.

These rates allow us to indicate the ‘record holders’ in terms of the number of inhabitants: in Proszowice district it was Sułoszowa, with some 1,360 inhabitants, and Prędocin with some 910, and Osiek in Silesian district (around 810 inhabitants).

The highest percentage of villages above 200 inhabitants was observed in Silesian district (20.2 %), and the lowest in the district of Sącz (5.2%). Almost identical percentages appear in the districts of Proszowice (14.3%), Książ (14.5%), and Biecz (14.8%). Detailed data was presented in the table at the end of the chapter.

As in the previous volumes of this series, a castle was considered a place of undoubtedly defensive character, described as *castrum*, *arx*, or ‘zamek’ (‘castle’) in the sources. Exceptions were made for Jeżowa and Książ. Jeżowa was called *fortalicium* in 1527, brick manor, or residential-defensive building in literature, and in the *Słownik historyczno-geograficzny województwa krakowskiego* is consistently called a castle.⁵⁷ In Książ there was a late-Renaissance palace, called the Castle in Mirów, built between 1585 and 1595, which was called both: palace and castle by Szymon Starowolski.⁵⁸ Szymbark and Tarnowiec in Biecz district were treated as a defensive manor (‘kasztel’), as in the literature. The name of a castle was given according to the sixteenth century name, or – in case the castle did not have a name – the name the nearby settlement was given, following the main map. Castles having their own name, as well as those constituting separate settlement points (e.g. Ogrodzieniec), were listed in the index along with the term ‘castle’, the index lists 11 such castles. Altogether, we localized 46 castles in the territory encompassed in this volume of the Atlas:⁵⁹

- in Sącz district:⁷⁸ Czchów (r), Czorsztyn (r),⁷⁹ Gródek (n), Melsztyn (s), Muszyna (c), Rożnów (n), Rytter (r),⁸⁰ Sądecz Nowy (r),⁸¹ Tropsztyn (n);
- in Biecz district: Jeżowa (n);

⁶⁰ LK 1564, vol. 1, p. 254: ‘The border castle Będzin. People say that everybody who drives past it regret this place is in ruin’. Materials MWK, p. 5: ‘Castle surrounded by a wall, built on a rock by the River Przemsza, ruined’.

⁶¹ Materials MWK, p. 101: ‘There is a stone castle on the nearby hill, it is old-fashioned and empty, according to the 1748 inspection, there was a chapel at the castle’.

⁶² LK 1617–1620, f. 89: ‘Ojców castle, abandoned...’. Materials MWK, p. 207: ‘An old-fashioned castle, resembling a small fortress built on bare and high rock, called Ociec in ancient texts, in good condition, having large storeys, shingled’.

⁶³ LK 1789, part 1, p. 139: ‘The description of the castle – the one build on a rock, abandoned, only half of the walls remains, only ruins, the roof is falling apart on the other part, so the rooms are rotten’. Materials MWK, p. 253: ‘The castle is abandoned, and half of the walls is in ruin’.

⁶⁴ J. Pierzak, *Zamek biskupów krakowskich w Sławkowie*, Bytom 2002 (Rocznik Muzeum Górnośląskiego w Bytomiu, Archeologia, no. 15), pp. 250 f.: ‘The sixteenth century print shows the castle in all of its glory, as such we should verify our opinion and claim that the buildings were repaired after the foray in 1455. Basing on written sources it is difficult to say, when the rebuilding began. It seems, however, that it was shortly after the foray [...] The Würzburg panorama confirms the defensive character of the castle. The residential and defensive tower seen from the southwest is in good condition, just like the staircase built in a small tower reaching the last level of the tower’. Materials MWK, p. 282: ‘Castle Sławków, brick, right outside the town, surrounded by a deep moat, in 1791 in a state of ruin’.

⁶⁵ Materials MWK, p. 307: ‘There is a mountain in this village, with a ruined castle on it, quite tall, resembling a fortress with three towers, and four hill around the castle, like fortress ditches (1783)’.

⁶⁶ In the end of the sixteenth century, Mikołaj Frej, the owner of the village, converted the castle into church of the Holy Cross, see Guerquin, *Zamki*, p. 104; S. Kołodziejcki, *Średniowieczne rezydencje*, p. 122; *Leksykon zamków*, p. 119; SHGK, part I, no. 2, p. 303.

⁶⁷ LK 1564, vol. 2, p. 101: ‘Castro Zarnowiec singulis quartalibus m. 4’; LK 1789, part 1, p. 285: ‘A castle made of stone and brick, which suffered in a fire in 1775, walls scratched, requires general repair. Houses brick, shingled, in which there are eight rooms, two dressing rooms, a granary and a kitchen [...]’.

⁶⁸ In Lelów district we excluded the castle in Bąkowiec, due to the lack of sources about it from the sixteenth century, see: SHGK, part I, no. 1, pp. 31 f. the last entry come from the 1440s; S. Kołodziejcki, *Średniowieczne rezydencje*, p. 112: ‘No archaeological or architectural research’; *Leksykon zamków*, p. 558: ‘It is difficult to say, when it ceased to be a defensive residence’.

⁶⁹ Materials MWK, p. 12: ‘The castle in the northern part of the village recently abandoned and ruined’.

⁷⁰ LK 1564, vol. 2, p. 3: ‘The ruined castle in Krzepice, two sides falling apart, walls, ceilings and buildings, one towards the river, the other towards the castle, where there is a gate. His Majesty sent inspectors there and ordered the starosta to improve the ruin certis conditionibus ex relatione of the inspectorp. Like the third side was improved’. For the description of the castle in Krzepice, see LK 1636, ff. 64–65v. Materials MWK, p. 149: ‘There is a castle outside the city, near the bridge over the Liswarta, by the road from Krzepice to Kuźniczka. It is made of brick, surrounded by walls and abandoned’.

⁷¹ For the description of Lelów castle see: LK 1627, ff. 89–91v.

⁷² Materials MWK, p. 185: ‘Old and abandoned castle’.

⁷³ *Ibidem*, p. 233: ‘Castle Ogrodzieniec lies to the east, in 1748 it was partially inhabited, in 1783 – empty’.

⁷⁴ The document of the division of private estates of Piotr Myszkowski, the bishop of Cracow, between his three nephews from 1 April 1591 mentions: ‘oppidum Żarki cum arce’, MK 136, f. 146v.

⁷⁵ For the description of the castle in Dobczyce see LK 1617–1620, ff. 106v–110v.

⁷⁶ *Leksykon zamków*, p. 314: ‘A new castle was built in the city in middle of the sixteenth century by the hereditary vogt in Myślenice, Spytek Wawrzyniec Jordan, future castellan of Cracow’.

⁷⁷ See *Leksykon zamków*, pp. 458 f.; J. Mitkowski, *Najstarszy widok Skawiny*, „Małopolskie Studia Historyczne”, vol. 6, 1963, no. 1–2, pp. 31–37; Widawski, *Mury*, pp. 425, 429.

⁷⁸ In Sącz district we decided to exclude the castle in Homola (Jaworki, part of the town Szczawnica), for instance, called ‘castrum desertum’ in 1529 (S. Kołodziejcki, *Średniowieczne rezydencje*, p. 138).

⁷⁹ For the description of Czorsztyn castle see: LK 1616, ff. 129v–130v; LK 1627, ff. 286v–289.

⁸⁰ LK 1616, f. 95: ‘There was a small brick castle there, ruined because of negligence of its former leaseholders, some walls on a high hill remain’; the same in LK 1627, f. 211.

⁸¹ For the description of Sącz castle see: LK 1627, ff. 184–185v.

- in Silesian district:⁸² Bobrek (n),⁸³ Oświęcim (r),⁸⁴ Spytkowice (n), Zator (r), Żywiec (n);
- and in the Duchy of Siewierz:⁸⁵ Siewierz (c).⁸⁶

Table 1. Number of towns in the second half of the sixteenth century

District	Towns			In total
	Royal	Of the Church	Of the nobility

Translated by Agata Staszewska

III.3.2.2 SANDOMIERZ VOIVODESHIP

Anna Dunin-Wąsowiczowa

According to the rules accepted for detailed maps of the sixteenth century,¹ centres of state and Church administration (of voivodeships and districts,² as well as archdeaconries, deaneries and parishes³) were marked on the map. The distinction between towns and villages was introduced, and their approximate size was added. Other settlement units, which had their own name in the sixteenth century, usually one manor and were linked with utility buildings (mills, ironworks, glassworks, mines and demesnes⁴), defensive structures (castles)⁵ of places of worship (monasteries).⁶ All these found their respective signs in the key to the map.

¹ See I. Gieysztorowa, *Charakter i wielkość osad*, [in:] AHP Mazovia, in this edition III.3.2.7.

² See W. Pałucki, *Granice i podziały polityczno-administracyjne*, [in:] AHP Sandomierz, in this edition III.2.1.2.

³ See A. Dunin-Wąsowiczowa, *Granice administracji kościelnej*, [in:] AHP Sandomierz, in this edition III.2.2.2 (stolice diecezji leżały poza woj. sandomierskim).

⁴ Assuming that the map shows only these settlements, which had their own name in the sixteenth century, and which we were able to localize precisely (see I. Gieysztorowa, *Charakter i wielkość osad*, [in:] AHP Mazovia, in this edition III.3.2.7), we present their list (district affiliation in brackets).

Mills: Baranek (Chęciny), Baryczka (Radom), Białogon (Chęciny), Bocheniec (Chęciny), Cedzyna (Chęciny), Charęza (Chęciny), Drynia (Opoczno), Gorczyca (Sandomierz), Górny (Radom), Jaroski (Radom), Krupa (Radom), Krupa (Stężyca), Księżek (Radom), Łaczeń (Chęciny), Ojrzenia (Opoczno), Pacyna (Radom), Pianka (Radom), Piechota (Sandomierz), Pipała (Sandomierz), Polny (Opoczno), Siczek (Radom), Słopiec (Chęciny), Stary Młyn (Radom), Śmietanka (Radom), Taraska (Opoczno), Tracz (Radom), Zachwiejów (Sandomierz), Zagożdżon (Radom), 28 mills altogether.

Ironworks (Usually they have 'Ruda' – ore, in their name, which we omit in this list, except for when it is the whole name alone): Adam (Chęciny), Andryszowa (Sandomierz), Babin (Radom), Babiradek (Radom), Bałutowska (Radom), Baranów (Sandomierz), Bełno (Chęciny), Berezów (Sandomierz), Białaszek (Chęciny), Błaszaków (Opoczno), Błotnica (Opoczno), Borków (Wiślica), Bród (Radom), Bzin (Sandomierz), Czarna (Opoczno), Duraczowa (Radom), Gozek (Opoczno), Grodzisko (Chęciny), Grzybów (Opoczno), Jakubek (Opoczno), Janikowska (Radom), Jaskowska (Sandomierz), Kosior (Radom), Kowalikowska (Radom), Krzysztoperek (Sandomierz), Kuczów (Sandomierz), Kunowska (Sandomierz), Kurosz (Radom), Lepieńska (Radom), Machor (Opoczno), Majek (Sandomierz), Marcinkowska (Sandomierz), Mędrów (Wiślica), Michałkowa (Sandomierz), Michałowska (Chęciny), Milcza (Radom), Mroskowska (Radom), Mrozkowa (Opoczno), Niedźwiedz (Chęciny), Niewola (Opoczno), Nieznach (Radom), Odachowska (Radom), Pękowiec (Chęciny), Pianowska (Chęciny), Pilczyca (Chęciny), Płacków (Opoczno), Ruda (Pilzno), Ruda (Radom), Ruda (Sandomierz, Bieliny parish), Ruda (Sandomierz, Charzowice parish), Ruda (Sandomierz, Zbylutka parish), Ryj (Radom), Seliga (Wiślica), Siekliny (Sandomierz), Stara Krzynecka (Sandomierz), Starzechowska (Sandomierz), Stąpor (Opoczno), Stefan (Radom), Stefanek (Radom), Stolin (Radom), Styczów (Sandomierz), Suchyniowska (Sandomierz), Szałas (Chęciny), Śmiłowska (Radom), Wierzbnik (Sandomierz), Wojtan (Opoczno), Wól (Opoczno), Zaborowska (Chęciny), Zbroja (Opoczno), Żupawa (Sandomierz). Altogether, 70 ironworks with individual names were localized, almost all situated in the so-called Zagłębie Staropolskie; 21 ironworks lay in Sandomierz district, 20 in Radom district, 14 in Opoczno district, 11 in Chęciny district, three in Wiślica district and one in Pilzno district. See B. Zientara, *Dzieje małopolskiego hutnictwa żelaznego XIV–XVII w.*, Warsaw 1954.

Glassworks (six localized): Huta (today: Kucębów in Opoczno district), Huta Chlewicka (Radom), Huta Jakubek (Radom), Huta Małacentów (Sandomierz), Huta Niemiec (today: Węgrzyn, Chęciny district), Widelki (Wiślica).

Mines (four localized, all in the district of Chęciny): Miedziane Góry, Miedzianka, Szczukowskie Góry and Zelejowa.

Demesnes – according to our assumption, actually only demesnes unrelated to any village or town were localized, namely: Borów (Sandomierz), Brusów (Stężyca), Brzezna (Pilzno), Brzozówka (Radom), Garbek (Pilzno), Golez (Pilzno), Grochowiska (Wiślica), Irzmanowice (Sandomierz), Kołków (Wiślica), Modrzewie (Chęciny), Ostrów (Radom), Rudniki (Chęciny), Soselów (Wiślica); as an exception, the royal demesne in Zawichost was marked (see K. Pacuski, *Location of settlements*, [in:] AHP Sandomierz, in this edition III.3.1.2).

⁵ Defensive structures – castles, were connected with towns, or villages, only Golez was connected just with a demesne.

⁶ Monasteries were marked on the map only when they constituted autonomous settlement units, these were: Benedictine abbeys – Święty Krzyż and in Sieciechów, Cistercian abbey in Sulejów and Pokrzywnica (Koprzywnica) and Bernardine monastery of St. Catherine.

There were 3,059 settlements in Sandomierz Voivodeship in the end of the sixteenth century. Of these 108 were towns, constituting 3% of all settlements.

Among settlements of rural nature, the majority of villages was inhabited – apart from the owners – by serfs and various categories of hortulani and landless peasants, some of whom did various jobs not related to agriculture (rural crafts and trades). Settlements of different vocational and social structure were usually specifically located. Villages inhabited by serfless gentry, or farm gentry formed few, although usually dense clusters. Their number did not exceed several dozens, situated mainly in Sandomierz and Wiślica districts.⁷ Villages inhabited by huntsmen (venatores) appeared mainly in Sandomierz Forest on the right bank of the Vistula.⁸ Industrial settlements were usually connected with the area where a given supply was obtained, e.g. ironworks in the so-called later Zagłębie Staropolskie, or mines in Chęciny district. In the scale of the entire voivodeship they did not exceed several per cent of all settlements,⁹ but their significance as a source of income for the state and large property was incomparably great. Villages inhabited by a large number of artisans or peddlers formed another group. They served as local centres of exchange and were usually related to a key of property of one owner, who did not have a city within the borders of his estates; the localization of such villages depended upon the placement of landed property in a given area.¹⁰ The supply base of the town was often inhabited by a greater number of artisans and traders than other villages in the region. ‘Farther’ suburbs with their own name were marked as villages.¹¹

Similarly to our proceedings during the preparation of other detailed maps in the sixteenth century,¹² we assumed the legal and political criterion in distinguishing towns (town privilege realized before or during the sixteenth century; records of municipal tax payments were decisive here, or even – if the sixteenth century sources could not lead us to a conclusive decision about town character of a settlement – a proof of town status from a later period).

At the beginning of the sixteenth century there were 80 towns and cities altogether in Sandomierz Voivodeship;¹³ in the course of this century this number increased to 108.¹⁴ In the sixteenth century

⁷ For instance, in the left-bank of the district of Sandomierz, in the villages situated in the parishes Olbierzowice, Kielczyna, Strzeżowice, Mamina, etc., especially in the villages in Waśniów parish (see P. Małopolska, pp. 171, 173–176, 181, 184–188, 190, 192–196, 199); several settlements of this type could be found in Wiślica district, in the parishes Kije, Chotel or Gnojno (ibidem, pp. 209–211, 219, 222, 224–225, 227), and in the remaining districts they appeared only sporadically; in Opoczno district, in 1577 we find parts belonging to farm gentry in four villages (ibidem, pp. 290, 292–293); in Pilzno district (y. 1581), in Chęciny district (y. 1573), and in Steżycza district (y. 1569) there appear isolated parcels (ibidem., pp. 263, 271, 333), and in Radom district in 1569 the tax registers recorded no serfless parcels of the gentry ‘propriae culturae’. In the sixteenth century the districts of Radom and Opoczno were the regions of petty gentry property, where serfless gentry property, i.g. farm gentry, appears only in the seventeenth century.

⁸ P. Małopolska, pp. 196–203.

⁹ See footnote 90.

¹⁰ E.g. Gogołów (Pilzno), the property of Andrzej of Górka (P. Małopolska, p. 245), where apart from six craftsmen there lived an innkeeper, or Padew situated on the right bank of the Vistula, on a newly-colonized area, isolated from towns. 30 craftsmen and four butchers lived in the part of the village which belonged to the parson (ibidem, p. 203).

¹¹ Closer suburbs, as well as those without individual name were not shown on the map. The map shows: Chwałki (Sandomierz), Chechły (Pilzno), Dziurów (Sandomierz), Gierlachów (Sandomierz), Gołębice (Sandomierz), Góra (Pilzno), Gryfów (Pilzno), Kobierniki (Sandomierz), Kuchary (Wiślica), Kunice (Pilzno), Nabrzezie (Sandomierz), Nawsie (Chęciny), Osieczko (Sandomierz), Pietrzejowa (Pilzno), Przedmieście Wielkie (Pilzno), Przedmieście Żarnowskie (Opoczno), Radoszyce (Chęciny), Rzeczyca Sucha (Sandomierz), Strochocice (Sandomierz), Suchorzów (Sandomierz).

¹² I. Gieysztorowa, *Charakter i wielkość osad*, [in:] AHP Mazovia, in this edition III.3.2.7.

¹³ In the district of Radom 17 towns: Radom, Szydłowiec, Skrzynno, Solec, Siemno, Skarzeszów, Przytyk, Nieznamirów, Wierzbica, Klwów, Jedlińsk, Sieciechów, Zwolen, Ryczywół, Kozienice, Iłża and Jastrząb (P. Małopolska, pp. 325–329); in the district of Steżycza six towns: Steżycza, Łaskarzew, Żelechów, Okrzeja, Łysobyki and Bobrowniki (ibidem, pp. 340–342); in the district of Opoczno nine towns: Opoczno, Białaczów, Odrzywół, Drzewica, Gielniów, Goworców, Łęgonice, Fałków, Żarnów (ibidem, pp. 288, 295–296); in the district of Chęciny seven towns: Chęciny, Radoszyce, Małogoszcz, Przedbórz, Secemin, Kurzelów, Kielce (ibidem, pp. 279–280); in the district of Pilzno 14 towns: Pilzno, Strzyżów, Żochów, Tuchów, Brzostek, Ropczyce, Frysztak, Kołaczyce, Dębica, Wielopole, Czudec, Przeclaw, Tarnów and Sędziszów (ibidem, pp. 265–269, 500–549); in Sandomierz district 15 towns: Sandomierz, Opatów, Pokrzywnica, Połaniec, Osiek, Staszów, Łągów, Słup Nowa, Bodzęcin, Wąchock, Kunów, Iwaniska, Zawichost, Mielec, Waśniów (ibidem, pp. 204–208); in Wiślica district 12 towns: Wiślica, Nowe Miasto Korczyn, Szydłów, Pierchnica, Pińczów, Busko, Opatowiec, Pacanów, Żabno, Stobnica, Kurozweki and Oleśnica (ibidem, pp. 235–239).

¹⁴ We do not include Odrowąż in Opoczno district here. Its owners received the permission for the location of the city in 1570; A. Wolff, *Zniszczone dokumenty Biblioteki Ordynacji Krasińskich*, [in:] *Straty archiwów i bibliotek warszawskich*

Daleszyce belonging to Cracow bishops and situated in Chęciny district was granted town privileges,¹⁵ as well as royal Kozienice in Radom district.¹⁶ Other town locations were related to magnate property and larger estates of the nobility, e.g. the Firlej family founded Janowiec (Serokomla) in Radom district,¹⁷ as well as Radomyśl in Pilzno district.¹⁸ The family Sieniński: Dębno in Wiślica district, and Raków in Sandomierz district,¹⁹ the family Rusiecki – Jadamów (Adamów) in Stężycza district.²⁰

The majority of locations of private towns occurred in Sandomierz district, where – apart from the aforementioned Raków – we should note Rudnik founded by the family Gnojeński,²¹ Ścimiłów (Ćmielów) founded by the family Szydłowiecki,²² Ożarów founded by the family Ożarowski,²³ Michów by the family Michowscy (this town was later moved to Denków, also situated in the estates of this family),²⁴ Lasocin founded by Lasota family,²⁵ Gliniany by the family Bidziński;²⁶ the family Tarło founded the town of Tarłów,²⁷ also Janików was granted town privilege at this time.²⁸ Except for Rudnik, which lay by the San, all newly-located towns in Sandomierz district were created on the left bank of the Vistula.

On the other hand, we do not observe many instances of town location in Opoczno district.²⁹ In the district of Chęciny three private cities were located; these were: Włoszczowa founded by the family Szafraniec,³⁰ Oksza founded by Mikołaj Rej,³¹ and Sobków founded by Stanisław Sobek from Sulejów.³² In Wiślica district, apart from Dębno belonging to the family Sieniński, Chmielnik was founded by Oleśnicki family.³³ In Pilzno district Niebylec was granted town privileges (owned respec-

w zakresie materiałów rękopiśmiennych, vol. 3, Warsaw 1957, p. 230, no. 315; later sources, hearth and poll tax records from the seventeenth century, list this settlement amidst villages; we also omit Michów (location privilege in 1564, MRPS V, no. 9318), because ultimately the town was located in Denków in 1584 (Miasta polskie, vol. I, p. 526), both settlements lay in Sandomierz district.

¹⁵ Daleszyce – location privilege from 1569; MRPS V, no. 10195.

¹⁶ Kozienice – the permission for the location of the town ‘in cruda radice ex parte villae regiae eiusdem nominis, quae curiae regiae est proprior’ on Magdeburg law for the starosta of Radom and the Voivode of Ruthenia Piotr Firlej of Dąbrowica and Kocko, in 1549 (MRPS V, no. 4692) was probably a regulation of an earlier privilege, because already in 1537 there is a record mentioning a church ‘oppidi nostri Kozienice [...] annis superioribus locatum’ [s], J. Wiśniewski, *Dekanat kozienicki*, Radom 1913, part II, p. 47.

¹⁷ Janowiec – location privilege in 1537 for Piotr Firlej of Dąbrowica and Kocko, the Voivode of Ruthenia, (J. Wiśniewski, *Dekanat kozienicki*, part II, p. 18); see the granting of Magdeburg law in 1580 (ibidem, pp. 21–32).

¹⁸ Radomyśl – the king’s permission in 1581 for the location of town ‘in fundo villae Ruda et Dolcza’ (MK, 123, ff. 505 f.); according to the town tax register, in 1589 this town paid 5 florens, with an adnotation: ‘oppidum in nova radice locatum Nicolai Firley’ (ASK I, 7, f. 889). See also B. Idzik, *Rys historyczny Radomyśla Wielkiego*, „Rocznik Ziemi Mieleckiej”, 1971, p. 106.

¹⁹ Dębno – location privilege unknown; in a document from 1589 there is a mention about the third measure ‘in oppido novo erecto’ (MK, 135, f. 604); town tax register 1591 lists a small number of houses which paid the tax ‘ob paupertatem oppidanorum’ (ASK I, 7, f. 712); Raków – location in 1567, J. Wiśniewski, *Dekanat iłżecki. Monumenta dioecesis Sandomiriensis*, Radom 1911, pp. 116–118; Miasta polskie, vol. I, p. 535; *Raków ognisko arianizmu*, ed. S. Cynarski, Cracow 1968, p. 13. J. Wiśniewski dated this location to 1569, J. Wiśniewski, *Dekanat opatowski*, Radom 1907, pp. 374 ff.

²⁰ See footnote 134.

²¹ Rudnik – permission from 1552 for Krzysztof Gnojeński, allowing to found a town ‘in cruda radice’ in hereditary estates of his wife Katarzyna from the family Tarnowski, in Kopki village near the stream Rudnik (MRPS V/1, no. 1305; MK, 80, f. 283).

²² King Alexander’s permission from 19 V 1505 for the foundation of Ścimiłów by Jakub Szydłowiecki, the Royal Treasurer and starosta of Łęczycza, MRPS III, no. 2138; confirmed 9 October 1512 on request of Krzysztof Szydłowiecki’s, Vice-Chancellor and castellan of Sandomierz, the heir of Ścimiłów, MRPS IV/1, no. 1745.

²³ Ożarów – location privilege in 1569; SGKP, vol. 8, p. 793; Miasta polskie, vol. I, p. 526.

²⁴ See footnote 100.

²⁵ Lasocin – Sigismundus Augustus’s permission in 1549 for the foundation of the town on Magdeburg law in the forest near Dębno, granted to Andrzej Lasota of Łopiennik (MRPS V, no. 479); see Miasta polskie, vol. I, p. 516.

²⁶ Gliniany – location privilege in 1595; J. Wiśniewski, *Dekanat opatowski*, pp. 172 f.; Miasta polskie, vol. I, p. 506.

²⁷ Tarłów – town founded in 1550 by Andrzej Tarło on grounds of the village Szczekarzewice (MRPS V, no. 940; Miasta polskie, vol. I, p. 559).

²⁸ Janików – town founded before 1578 (that year Janików paid the town tax, ‘szos’); in the visitation in 1592 a mention: ‘parochia noviter extracta’; see Miasta polskie, vol. I, p. 508.

²⁹ Odrowąż omitted, see footnote 101.

³⁰ Włoszczowa – location privilege in 1539, Miasta polskie, vol. I, p. 553.

³¹ Oksza – town located by Mikołaj Rej in 1554 on grounds of the village Tworów; MRPS V, no. 6854; see Miasta polskie, vol. I, p. 520.

³² Sobków – permission in 1563 for Stanisław Sobek, the castellan of Biecz, for the location of a town in a part of the village Nida; MRPS V, no. 9172; MK, 96, ff. 106–107v.

³³ Chmielnik – permission for the location of a town granted to Jan Oleśnicki in 1551; MRPS V, no. 5190.

tively by Machowski family, Roman family and Pieniążek family),³⁴ the already-mentioned Radomyśl of the Firlej family, and Głowów (Głogów) founded by Krzysztof Głowa.³⁵

In Radom district, apart from the already-mentioned Janowiec of the Firlej family, the Kazanowski family founded Ciepiałów;³⁶ they also located Kazanów.³⁷ The family Ciołek – Odechów,³⁸ and the family Oleśnicki – Lipsko.³⁹

In Stężyca district, in the area of relatively late settlement network of the so-called Podlasie,⁴⁰ five private towns emerged in the sixteenth century, namely: (apart from the aforementioned Jadamów) the family Maciejewski located Maciejowice,⁴¹ Męciński family – Nowodwór, or Wyprzedów,⁴² Dzik family – Wojcieszów (or: Nowe Miasto),⁴³ the family Kłoczowski – Drażgów.⁴⁴ Survey analysis of the property of the owners of the newly-located cities in Stężyca district showed, that these were usually wealthy nobles, having estates at least holding several villages, and the newly-located town was meant to serve as a centre for local exchange.⁴⁵

After all, many private towns located in the sixteenth century in Sandomierz district kept their agricultural, semi-rural nature. Unsuccessful locations in this area should also be mentioned, i.e. the settlements, which – despite being granted town privilege in the sixteenth century – remained villages, like Michów in Sandomierz district and Róża, which was to be located on the grounds of Strupicze village in 1556;⁴⁶ Mirów in Wiślica district could be another example, after location it merged with the town complex of Pińczów;⁴⁷ the mysterious case of Jadaromin (Radom district) could also be mentioned here. However, given the similitude of the data, we identify this town with Jadamów in Stężyca district.⁴⁸

³⁴ It seems that we should question the information provided by *Miasta polskie*, vol. II, p. 372 concerning the foundation of the town in the fifteenth century. Royal consent for the location of the town that was later called Niebylec on grounds of the village Jawornik, granted to Mikołaj Machowski, comes from 1509–1510; MRPS IV, no. 866 and 1000; see tax register from 1527–1530: ‘Niebيلية villa, nunc malum [?] oppidum noviter locatum’, P. Małopolska, p. 520.

³⁵ Głowów – location privileges from 1570–1578; see F. Kotula, *Głowów, renesansowe miasteczko*, BHS, 16, 1954, pp. 3–10; S. Herbst, *Uwagi nad renesansowym rozplanowaniem Głowowa*, BHS, 16, 1954, pp. 11–14.

³⁶ Ciepiałów – permission for town location of Grzymałów on grounds of Ciepiałów village, granted to Marcin Kazanowski in 1548, MRPS IV/3, no. 23072.

³⁷ Privilege to found Kazanów on grounds of Miechów village for Marcin Kazanowski, granted by Sigismundus Augustus in 1566 (SGKP, vol. 3, p. 920; Boniecki, vol. 9, p. 356); Marcin Strzałkowski was incorrectly described as the recipient of this privilege (*Miasta polskie*, vol. I, p. 510).

³⁸ Odechów – permission to found the town Nowy Targ in Odechów village belonging to Andrzej Ciołek, MRPS IV/3, no. 18448.

³⁹ Lipsko – mentioned in the visitation of Solec deanery in 1595 as ‘oppidum noviter locatum’; AV Cap. 3, f. 504, belonged to Oleśnicki, according to *Miasta polskie*, vol. I, p. 517, the foundation was to occur in 1613.

⁴⁰ LR, p. 407: ‘sub decanatu radomiensi in Transilvania’; pp. 412, 414, 419, 422, 423; ‘sub decanatu Radom in Podlasze’.

⁴¹ Maciejowice – the privilege from 1524 freed Ostrów town from taxes, as it was newly-located by Kacper Maciejowski (MRPS IV, no. 13808); according to: *Miasta polskie*, vol. II, p. 480, Maciejowice were granted Sigismundus the Old’s permission for location in 1507.

⁴² Nowodwór located in Wyprzedów village in the first half of the sixteenth century; *Miasta polskie*, vol. II, p. 490.

⁴³ Wojcieszów – privilege in 1540 for Mikołaj Pierściński Dzik to locate the town on German law ‘in bonis Voczie-skow’; MRPS IV, no. 6714.

⁴⁴ Drażgów – permission for Marcin Kłoczowski to locate the city and granting Magdeburg law in 1544; MRPS IV, no. 21493.

⁴⁵ The owners of Drażgów – the family Kłoczowski, in 1569 paid lan tax for six villages, which together had 62.5 lan and 6.5 empty lan (Mikołaj Kłoczowski paid for Tyrzyn, Strych, Kobylnica, Zawitała, Lipiny and Ułęż; Piotr Kłoczowski for Kawęczyn, Przesmyk, Podarz, Przeklewo and Czernice; P. Małopolska, pp. 331 f.). The family Męciński, the owners of Nowydwór, that is Wyprzedów, had three villages in the vicinity of this town: Białki, Trojanka and Wola Chojdak, together over 30 lans (ibidem, p. 332); about the estates of Rusiecki, the owner of Jadamów, see footnote 1429.

⁴⁶ ‘Locatio oppidi ex villa Strupicze Roza nuncupati in fundo Svieskovicensi [...] libertas 12 annorum [...] Alberti Meczinski conceditur’, MRPS V/2, no. 7353 from 1556; see also F. Kiryk, *Lokacje miejskie nieudane, translacje miast i miasta zanikle w Malopolsce do połowy XVII stulecia*, KHKM, vol. 28, 1980, pp. 373–384, where the author lists also, among others, Rembowo, Skotniki, Dębno and Spotów as unsuccessful locations.

⁴⁷ The foundation of ‘new town Mirów’ in 1592; see T. Zarębska, *Przemiany przestrzenne miast w dobie renesansu i baroku*, [in:] *Miasta doby feudalnej w Europie środkowo-wschodniej*, Warsaw–Poznań–Toruń 1976 (Prace XI Powszechnego Zjazdu Historyków Polskich), p. 241; J. Małecki, *Zarys dziejów Pińczowa do końca XVIII w.*, [in:] *Pińczów i jego szkoły w dziejach*, ed. J. Wyrozumski, Cracow 1979, „Zeszyty Naukowe UJ”, Prace Historyczne, no. 62, p. 23.

⁴⁸ In 1539 ‘Adae et Hieronimo Rusieczkim, fratribus germanis, oppidum in cruda radice Jadaromin in districtu Radomiensi [...] erigere iure theutonico consensus datur’ by Sigismundus I the Old (MRPS IV/3, no. 19711). Full text in the *Metrica* (MK,

The assesment of the size of towns (the number of inhabitants) in Sandomierz Voivodeship in the second half of the sixteenth century stumbled across significant difficulties resulting not only from generally acknowledged methodical shortcomings in determining the figures for the population of individual settlements in pre-statistical period. Another difficulty were the losses in town documents of the majority of towns in the region,⁴⁹ which could help us verify our calculations, made on the basis of the data contained in fiscal documents.⁵⁰ We tried, when it was possible, to verify our results with the results of monograph research on the economic potential, political importance or localization of individual towns in the layout of the nationwide and transitional communication network, their participation in trade, as centres of local and regional exchange, their administrative functions (centres of keys of property; place where sejmiks (dietines) gathered, where one would expect e.g. a reserve of lodgings), finally: their residential role (taking into account the position of the owner). This additional information allowed us to asses the size of towns in an approximate manner.

Table 1. Cities in Sandomierz Voivodeship

District	Area in km ²	Cities			
		in total	royal (r)	Church (e)	nobility (n)
Sandomierz	6,082	24	3	8	13
Radom	5,241	22	5	5	12
Pilzno	3,988	17	2	3	12
Chęciny	3,176	11	4	3	4
Wiślica	3,074	14	5	2	7
Opoczno	2,457	9	1	2	6
Stężyca	1,772	11	1	1	9
In total	25,790	108	21	24	63

Fiscal sources from the second half of the seventeenth century, namely: hearth and poll tax registers allowed us to verify this data; these sources alone are not especially valuable, yet sometimes they helped us find marginal values (towns of the highest relative number of hearths or heads), as well as control our assumed indicators of the number of inhabitants of a house in cities and towns or this region, within districts.⁵¹

58, ff. 166–170) does not contain additional elements, which would allow for identification. However, in the first half of the sixteenth century, the settlements located in Stężyca district were often included into Radom district, undoubtedly because the land and town court in Stężyca operated in Radom, where it was moved after Stężyca was destroyed during the Tatar invasion in 1500–1502, to remain to its initial place in 1563/1564 (W. Pałucki, *Granice i podziały polityczno-administracyjne*, [in:] AHP Sandomierz, in this edition III.2.1.2). That is why we identify this unknown Jadaromin with Jadamów, well-attested in later sources, which belonged to the family Rusiecki. In 1595 the inspector of churches in Łuków deanery recorded: ‘Jadamów, op. g. d. Russieczki’ (AV Cap. 3, f. 239v). In 1560 Rusiecki also owned the surrounding villages: Gułów, Wola Ruszcza, Turzystwo, Wola Gułowska, Konorzatka and Dębowica, that is all villages in Jadamów parish (P. Małopolska, p. 338). Let us add that the church in Jadamów, existing since 1545, was endowed by Hieronim Rusiecki (see chapter Church administration borders, p. 267, footnote 300).

⁴⁹ A. Wolff, *akta partykularne przedrozbiorowe Archiwum Głównego* [in:] *Straty archiwów i bibliotek warszawskich w zakresie rękopiśmiennych źródeł historycznych*, vol. 1, Warsaw 1957, pp. 183, 209.

⁵⁰ See the criticism on town fiscal sources, especially the town tax, as a basis for calculating the size of population, I. Gieysztorowa, *Wstęp do demografii staropolskiej*, Warsaw 1976, pp. 183 f.

⁵¹ An attempt was made to compare (for Radom district) data from poll tax in 1662 from all towns of this area (P. Małopolska, introduction, p. 53, see ASK I 67, ff. 58 f.) and data from hearth tax in 1667 (ASK I 65, ff. 58 f.). On this basis the lowest indicator obtained was five people per one house (Nieznamierowice), and the hightes – 16 people per one house Skaryszew), with the average of around nine people per one house (in 17 towns that were compared: Radom, Skaryszew, Ciepiałów, Hża, Szydłowiec, Zwoleń, Przytyk, Wierzbnik, Jedlińsk, Odechów, Jastrząb, Nieznamierowice, Klwów, Skrzywno, Sieciechów, Solec and Kozienice, for which the registers mention both – number of hearths and heads, we obtained 5202 inhabitants and 599 hearths).

Table 2. Density of town network in the end of the sixteenth century

District	Area in km ²	Number of towns	Area in km ² per 1 town
Sandomierz	6,082	24	253
Radom	5,241	22	238
Pilzno	3,988	17	235
Chęciny	3,176	11	289
Wiślica	3,074	14	219
Opoczno	2,457	9	273
Stężyca	1,772	11	161
voivodeship	25,790	108	239

The obtained results are as follows: for 108 towns in Sandomierz Voivodeship, 21–30 of them exceeded the number of 1,000 inhabitants. Apart from Sandomierz, the capital of the voivodeship (estimated 3,500 inhabitants),⁵² these settlements should be considered towns: Zwoleń in Radom district,⁵³ Połaniec in Sandomierz district,⁵⁴ Chęciny in Chęciny district⁵⁵ and Tarnów in Pilzno district (each around 2,500 inhabitants),⁵⁶ and then: Radom⁵⁷ and Kozienice⁵⁸ in the district of Radom, Szydłów,⁵⁹ Nowe Miasto Korczyn⁶⁰ and Pińczów⁶¹ in Wiślica district (each around 1,500 inhabitants). All towns, where the population, according to our calculations, reached at least 1,000 inhabitants, were listed in Table 4. The table covers, among others, these towns in Sandomierz Voivodeship, which were marked class II cities in the 1520 classification for tax purposes ('civitates et oppida secundi ordinis'); of the towns listed these were: Sandomierz, Tarnów, Radom and Szydłów, also: Pilzno, Opoczno, Wiślica, Opatów, Iłża and Bodzentyn.⁶²

Table 3. Larger cities

District	City name and ownership character		Number of cities
	undoubtedly above 1,000 inhabitants	probably above 1,000 inhabitants	
Radom	Radom (r) Zwoleń (r) Kozienice (r)	Iłża (c) Szydłowiec (n)	3 + 2 = 5

⁵² H. Rutkowski, *Z dziejów Sandomierza w okresie Odrodzenia*, [in:] *Studia sandomierskie*, p. 295.

⁵³ Zwoleń was inspected in 1565 as a royal town. There were 221 inhabited houses and 40 burned houses then in the town – LS 1564/1565, p. 204. The seventeenth century materials show that quite a high multiplier of inhabitants per one house could be used for this town.

⁵⁴ Połaniec, according to LS 1564/1565, p. 92 had 287 houses and paid for 500 plains, meadows, gardens and demesnes.

⁵⁵ Many craftsmen lived in Chęciny according to LS 1564/1565, p. 281, and there were 283 houses there.

⁵⁶ According to assessment register of Pilzno district from 1527–30, there were 200 houses in Tarnów and 83 serfs in the suburbs (P. Małopolska, p. 549. Datation of register see p. 14).

⁵⁷ In the second half of the sixteenth century there was around 120 houses within Radom city walls, and some 180 together with the suburbs. LS 1564/1565, p. 162; SGKP, vol. 9, p. 401; *Urbanistyka i architektura Radomia*, ed. W. Kalinowski, Lublin 1979, pp. 58, 67–69.

⁵⁸ Kozienice according to LS 1564/1565, p. 217 had 177 houses, 55 town lans, 194 gardens and 107 meadows.

⁵⁹ According to LS 1564/1565, pp. 142 ff., there were 124 houses in Szydłów and 56 in the suburbs, and a significant number of craftsmen.

⁶⁰ Nowe Miasto Korczyn, according to LS 1564/1565, pp. 21 ff., paid for 148 houses in the town and in the suburbs, and many craftsmen lived in the town.

⁶¹ In Pińczów, in the second half of the seventeenth century there was the highest number of taxable houses of all towns of Wiślica district, namely 1967, that is twice as many as in Nowe Miasto Korczyn, and three times the number in Szydłów (P. Małopolska, introduction, p. 51, according to poll tax from 1662).

⁶² Analogous classification from 1590 does not list first and second class towns by name, but only specifies that the second class consists of towns which paid over 500 złoty of alcohol tax. Z. Kulejewska-Topolska, *Oznaczenia i klasyfikacje miast w dawnej Polsce (XVI–XVIII w.)*, CPH, vol. 8, 1956, no. 2, pp. 262 f.; A. Wyczański, *Uwarstwienie społeczne w Polsce XVI wieku*, Wrocław 1977, pp. 218 f.

District	City name and ownership character		Number of cities
	undoubtedly above 1,000 inhabitants	probably above 1,000 inhabitants	
Stężyca	Stężyca (r)	–	1
Wiślica	N. Miasto Korczyn (r) Wiślica (r) Szydłów (r) Pińczów (n)	Opatowiec (c) Busko (c) Pacanów (n)	4 + 3 = 7
Opoczno	Opoczno (r)	–	1
Pilzno	Pilzno (r) Tarnów (n)	Ropczyce (r)	2 + 1 = 3
Chęciny	Chęciny (r) Kielce (c) Przedbórz (r) Daleszyce (c) Secemin (n)	Małogoszcz (r)	5 + 1 = 6
Sandomierz	Sandomierz (r) Bodzentyn (c) Koprzywnica (c) Opatów (n) Połaniec (r)	Staszów (n) Zawichost (c)	5 + 2 = 7
In total	21 + 9 = 30		

(r) – royal property, (c) – Church property, (n) – property of the nobility

Table 4. Larger cities according to type of property

Type of property	Number of cities		
	undoubtedly above 1,000 inhabitants	probably above 1,000 inhabitants	In total
Royal (r)	13	2	15
Church (c)	4	4	8
Nobility (n)	4	3	7
In total	21	9	30

Royal property dominated among larger cities (13–15), the second place was occupied by cities belonging to churchmen (4–8), the cities of the nobility were the fewest (4–7).

The size of rural settlements was determined on the basis of similar methodical assumptions as in the case of Mazovia in the sixteenth century, but with different conversion rates specifying the number of serfs per 1 lan. Tax registers from the second half of the sixteenth century allow us to individualize these rates for different types of property, including the property of the nobility, on the example of three out of seven then existing districts, namely: Sandomierz, Pilzno and Wiślica. The registers from these districts usually show the number of serfs along the number of lans, which was the basis of taxation. This allowed us to calculate the average number of serfs in districts.⁶³ However, our calculations did not take into account the records from this part of Sandomierz district, which lay south of the Vistula, as for this area the result of the calculations of average number of serfs, especially in royal estates, was significantly different than averages from other territories. We are unable to explain this result; we can only suspect that this was the effect of the lack of settlement and economic stabilization in the newly created villages in Sandomierz Forest, from which some inhabitants could escape after the end

⁶³ P. Małopolska, Sandomierz district y. 1578, pp. 165–208; Wiślica district y. 1579, pp. 209–240; Pilzno district y. 1581, pp. 241–269.

of the tax free period, as well as the fact that the number of all settlers was accompanied only by the number of lans subject to taxation, without those still freed from payment.

Supplementary materials were taken from recognitions. However, they rarely refer to other districts of our voivodeship.⁶⁴ Whereas, we have not taken into account inspections and inventories of royal estates, as well as inventories of royal property. Controlling calculations made of these sources on the basis of royal property in Wiślica district and the estates of the bishop of Cuyavia in Sandomierz district have, in fact, provided slightly different conversion rates, but the differences were insignificant when the results were rounded up.

The results of our calculations look as follows: for 1 serf farm there was an average of 0.37 to 0.44 of lan in particular districts (i.e. from 2.2 to 2.7 of serf farm per 1 lan). Keeping the rate five people per one serf family,⁶⁵ we obtain – as in Mazovia – the multiplier 11 to 13.5 people per 1 serf lan;⁶⁶ however, this multiplier contains the element of territorial diversity. The smallest average size of a serf farm occurred in Pilzno district (0.37 lans), and the biggest – in Wiślica district (0.44 lan). As we did not have access to mass data on the diversity of respective values for the four remaining districts, we have decided to assume uniform rates in the scale of the entire voivodeship for these districts, based on the average calculated for the above-mentioned three districts, individualized only for each of type of property.

Larger farms could be found in royal and Church estates (average 0.5 lan per 1 serf farm, i.e. two farms per 1 lan), smaller in the estates of the nobility (average 0.38 lan per 1 serf farm, i.e. 2.5 farm per 1 lan). According to the above, the following rates were assumed: in royal and Church estates 10 people per 1 serf lan, and in the estates of the nobility 12.5 people per 1 serf lan. We assumed here a similar rate of people per one farm, because there is no basis, which would allow us to diversify it according to the size of a farm and type of ownership.

Additionally, rates of people per family used were similar to those assumed during the preparation of the map of Mazovia: for hortulani and landless families – four people, for noble and artisan families – five people.⁶⁷ The rate of five people was also used in controlling the size of families of the so-called venatorum (huntsmen) living in villages in Sandomierz Forest.⁶⁸

The multiplier in the villages of farm gentry per 1 lan was the same as in Mazovia (11 people per 1 lan), because this phenomenon was very rare in Sandomierz Voivodeship, and thereby we were unable to verify the rate given the modest basis. The property of farm gentry, as mentioned earlier, appeared in more dense complexes only in several parishes, it was scattered and related to single sections in the villages of partial gentry, as well as in small villages, where even the highest rates would not decide on qualifying the settlement to villages above 200 inhabitants.

On the basis of the above calculations, we have decided to mark on the map large villages, where the number of inhabitants probably exceeded 200.⁶⁹

⁶⁴ Recognitions from 1563, mixed from the entire territory of the Crown, included in ASK I, 59 were surveyed. The recognitions come mostly from the district of Wiślica, and only sporadically from other districts of Sandomierz Voivodeship, like e.g. from Bolmin village in Chęciny district, where the tax was paid 'de cmetonibus 9 in quartis residentibus'.

⁶⁵ See WP, p. 27; I. Gieysztorowa, *Charakter i wielkość osad*, [in:] AHP Mazovia, in this edition III.3.2.7.

⁶⁶ I. Gieysztorowa, *Charakter i wielkość osad*, [in:] AHP Mazovia, in this edition III.3.2.7.

⁶⁷ WP, p. 59; I. Gieysztorowa, *Charakter i wielkość osad*, [in:] AHP Mazovia, in this edition III.3.2.7 (slightly different indicators were used for the map of Royal Prussia – MRP).

⁶⁸ P. Małopolska, pp. 196–203.

⁶⁹ The number of large villages in Sandomierz Voivodeship in the end of the sixteenth century was estimated on 212, that is around 7% of all villages in this voivodeship. 70 were marked in the district of Pilzno, 57 in the district of Sandomierz, 27 in the district of Wiślica, 23 in the district of Stężyca, 22 in the district of Radom, nine in Chęciny, and four villages in Opoczno district, all with an estimated number of 200 inhabitants. These are the following villages (ownership type in brackets):

Pilzno district: Biadoliny (c), Bielcza (c), Borek (r), Bodzęcin (c), Borowa (n), Brzeziny (n), Bystrzyca (r), Chechły (r), Dąbrowa Wielka (n), Glinnik (n), Glinnik Dolny (n), Gnojnica (r), Godowa (n), Gogołów (n), Góra (n), Grabówka (n), Gumniska in Gumniska parish (n), Gumniska in Tarnów parish (n), Januszkowice (cn), Jastrząbka (n), Kielków (n), Klikowa (n), Kolbuszowa (n), Kunice (n), Lubcza Górna (r), Lubla (c), Ludcza (n), Łękawica (n), Łęki (n), Łęki Dolne (n), Łęki Górne (n), Łęki Wielkie (n), Łopuchowa (r), Mała (r), Meszna (cn), Niechobrz (n), Niedźwiada (r), Nockowa (n), Nowa Wieś Pstrągowa (n), Oporyszów (n), Pietrzejowa (r), Połomia (n), Pstrągowa Niżna (n), Róża (n), Skodna (r), Skrzyszów (n), Słotowa (r), Szczurowa (c), Szufnarowa (n), Szywnałd (n), Wadowice (n), Warzyce (c), Węglówka Ruska (n), Wierciany (r), Wiewiórka (n), Wiśniowa (n), Witkowice (r), Wola Dąbrowska (n), Wola Szarwark (n), Wyrzynia (n), Zabłocie (n), Zagórzycze (r), Zalasowa (n), Zgłobień (n), Zgłobień Nowy (n), Zwiernik (n), Żędzin (n), Żyznów Wyższy (n).

The above calculations are based on lans, used by fiscal register to collect taxes; in the present state of research the relation of ‘fiscal’ lans to standard lans (Chełmno lan, Flemish lan of Frank lan) is not fully explained.⁷⁰ However, we believe that it was possible to base our research on this material, because they referred to mass phenomena, and the end results – being the average of the sum of many detailed values – were influenced by the law of large numbers (as such any possible mistake was reduced).

Table 5. Villages above 200 inhabitants

District	Villages in total	Villages above 200 inhabitants							
		in total	%	Type of ownership					
				r	c	n	rn	cn	t
Radom	591	22	3.7%	3	1	16	–	–	2
Stężyca	199	23	11.5%	10	–	13	–	–	–
Wiślica	488	27	5.5%	4	4	18	–	1	–
Opoczno	257	4	1.5%	2	–	2	–	–	–
Pilzno	423	70	16.5%	14	6	47	–	3	–
Sandomierz	718	57	7.8%	24	5	25	3	–	–
Chęciny	275	9	3.3%	–	6	3	–	–	–
In total	2,951	212	7.1%	57	22	124	3	4	2
%	–	100	–	26.9	10.4	58.5	1.4	1.9	0.9

The aforementioned settlements with only one manor, accompanying industrial and other kind of settlements, were included in the group of smallest settlements, i.e. villages below 200 inhabitants.

Finally, our introduction of the sign for castle requires some explanation. This sign accompanies some of the cities and town settlements.⁷¹ The criteria for marking were as follows: the map shows sites, whose defensive character could not be doubted and which were described as ‘castrum’, ‘arx’ or ‘zamek’ in the sources.⁷² Eleven royal castles were marked on the map, three castles belonging to

Sandomierz district: Borowa (n), Boruja (n), Charzewice (n), Chmielów (r), Chorzelów (n), Cmolas (n), Czajków (r), Czermin (n), Dąbrowica (n), Dzikowiec (r), Dzików (n), Gołego Wola (n), Gorzyce (r), Grębów (rn), Jaskowice (r), Jaśłany (rn), Jeżowa Wola (r), Leśna (c), Łączna (c), Malinie (n), Michocin (n), Nawodzice (n), Nieskurzów (c), Nisko (r), Padew (r), Pław (r), Pysznica (r), Raclawice (n), Siedliszczany (n), Skopanie (n), Sławogóra (r), Słupcza (n), Sobótka (r), Sokolniki (rn), Stodoły (r), Strzegom (r), Sucha (r), Szczekarzewice (n), Śmierdzina (r), Świniary (n), Trzciana (n), Trzeźnia (n), Turbia (c), Tursko Wielkie (n), Tuszów (r), Wiązownica (r), Wiśniowa (n), Włostów (n), Wola Kamień (r), Wola Lipnica (r), Wola Pliska (r), Wola Ramieżowska (r), Wzdół (c), Zaduszniki (n), Zarzeczce (c), Zdziec (r), Zgórsko (n).

Wiślica district: Bejsce (n), Biechów (n), Biskupice (c), Bogucice (r), Chroberz (n), Czarnocin (n), Dzierżazna (c), Góry (n), Gręboszów (n), Grotniki (r), Jurków (n), Kije (n), Krzyżanowice (c), Mędrzechów (r), Michałów (n), Otwinów (n), Pełczyńska (n), Piasek Wielki (n), Piestrzec (cn), Sędziejowice (n), Słupiec Wielki (n), Stawiany (c), Szczucin (n), Świniary (n), Welcz (r), Wójcza (n), Złota Wielka (n).

Stężyca district: Bazanów (r), Dęba (r), Górzno Wyższe (n), Jarczów (n), Kłoczów (n), Korytnica (n), Kozice (r), Lipiny (n), Ownia (r), Pawłowice (n), Przetoczno (n), Rososz (r), Ryki (n), Sobieszyn (n), Stryj (r), Swaty (r), Trojanów (n), Wargocin (r), Wilczyńska (n), Wola Długa (n), Wola Łączna (n), Wola Zadybska (n), Życzyn (r).

Radom district: Bałutów (n), Bieliny (n), Brzoza (r), Chechły (n), Dzierzków (t), Gutów (n), Gzowice (r), Gościszowice (n), Jedlna (r), Krępa (n), Krzyżanowice (n), Pakosław (n), Ruda Wlk. (n), Rzeczniów Większy (n), Skrzyń Stara (n), Sławno (c), Wir (n), Wola Gołębiowska (t), Wola Kadłubska (n), Wola Kaszowska (n), Wola Sienieńska (n).

Chęciny district: Konieczno (c), Korytnica (n), Kostomłoty (c), Krajno (c), Masłów (c), Niewachłów (c), Oleszno (n), Sułków (n), Zagnańsko (c).

Opoczno district: Błogie (cn), Brudzowice (r), Końskie (n), Radzice (r).

Pojęcie i termin na tle innych średniowiecznych jednostek pomiaru ziemi*, Warsaw 1968 (IG PAN, Prace Geograficzne, no. 67).

⁷¹ The fragment of the text concerning castles was prepared by Krzysztof Chłapowski.

⁷² In territorial layout this looks as follows: in the district of Sandomierz – royal castles: Sandomierz, Zawichost and Przyszów, bishop’s Bodzentyn, and private: Baranów, Czyżów, Ćmielów (Śćmielów), Konary, Mielec, Międzygórz, Podgrodzie, Rytwiany and Tudorów; in the district of Wiślica – royal: Nowe Miasto Korczyn, Szydłów and Stopnica, private: Chroberz, Kurozwęki, Pińczów and Rembów; in the district of Radom – royal: Radom and Solec, bishop’s castle in Iłża, and private:

churchmen and 21 private castles;⁷³ it must be noted here, that some small castles of the nobles could have been omitted, if they had not appeared in our sources. A selection of places in case of an unclear source record caused much difficulty at times.⁷⁴

(1993)

Translated by Agata Staszewska

Janowiec and Szydłowiec; in the district of Chęciny – royal: Chęciny and Przedbórz, private: Mokrsko Górne and Sobków; in the district of Pilzno – abbot's castle Golesz and private: Tarnów (Tarnowiec) situated on Św. Marcin mountain near Podgrodzie village and Rzemień; in the district of Opoczno – royal in Opoczno, and private: Drzewica and Damujowice (now: Zameczek). The castle Golesz was still inhabited in 1614 – W. Sarna, *Opis powiatu jasielskiego*, Jasło 1909, p. 372; in 1689 it was described as long deserted – the inventory of the estates of the Benedictine monastery in Tyniec from 1689, Library of PAN in Cracow, MS 2885, f. 39v.

⁷³ For royal castles the inspections – both: published and manuscripts – are the basic sources. Mainly, this concerns the visitation conducted in 1629 (AGAD, Dz. XVIII, 33), the inventories, records in the Crown Metrica and source records in J. Wiśniewski's works on particular deaneries. For bishops' castles, apart from Długosz's Liber beneficiorum, for confirmation – the inspection of the estates of the bishop of Cracow from 1789 (ASK XLVI, 67, 69). Finally, for private castles the records from the Crown Metrica, records in the works of J. Wiśniewski, mentions in Długosz's and Łaski's LB and in LR 1529, in the inspections from the end of the sixteenth century, and in published documents, like Archiwum Sanguszków. The documentation of the surviving buildings or their traces can be found in relevant issues of *Katalog zabytków*. B. Guerquin's work, Guerquin, Zamki, was the most important work from the literature on the subject used.

⁷⁴ Surviving descriptions allow us to conclude that the buildings in Stężycza and Ryczywół, which sometimes were called castles, in reality were old starosta's manors, surrounded by moat and wooden palisade. (AGAD, Dz. XVIII, 33, ff. 394–396; ASK LVI, S 3 II, f. 78v; LS 1564/1565, p. 219; Ryczywół – AGAD, Dz. XVIII 33, ff. 454–457; SPPP, vol. 6, no. 18; MRPS IV/2, no. 9378). The case of the castle in Wiślica is more complicated. According to a record in the 1765 inspection (AGAD, Dz. XVIII 35, f. 62) and sparse indirect data gathered by J. Widawski (Widawski, Mury, p. 502), the castle was to be situated outside city walls, on an island. Because it is impossible to determine with complete certainty, whether there was a castle in this place, or just ramparts (relics of a gord rebuilt in the fifteenth century?), we resigned from marking the castle in Wiślica. Accidental, and often imprecise mentions, given the lack of detailed descriptions, do not allow us to determine the character of the castles in Gnojno, Kazanów, Maciejowice (Podzamcze), Zborów and Zgórska, or whether they really existed in the second half of the century. In Gnojno, according to *Katalog zabytków*, vol. 3, no. 1, p. 19, a castellum was built, and expanded in the seventeenth century. In 1783 'old castle, brick' was mentioned in Kazanów (Kartoteka SHG). The remnants of this castle are described in *Katalog zabytków* (vol. 3, no. 3, p. 14). Given the lack of earlier records, we cannot say, whether the castle existed already in the sixteenth century, what would be actually possible, given the owners – the family Kazanowski. In 1557 a 'fortalicium' in Maciejowice is recorded (MRPS V/1, no. 1918); we do not know the character of this structure before it was expanded into a palace in the eighteenth century. A. Gruszecki assumed that there was a castle in Zgórska on the basis of surviving traces, A. Gruszecki, *Zamki bastionowe w Małopolsce*, Warsaw 1962, p. 255; this was a residence of the family Ossoliński (*Pamiętnik Zbigniewa Ossolińskiego, wojewody sandomierskiego, 1623*, pub. W. Kętrzyński, Lwów 1878, p. 29), and earlier of the family Mielecki, but its defensive character is not attested. In Zborów Marcin Zborowski (died in 1565) 'built a manor at great costs' (*Herby rycerstwa polskiego przez Bartosza Paprockiego*, pub. K.J. Turowski, Cracow 1858, p. 146); S. Starowolski (*Polska albo opisanie położenia Królestwa Polskiego*, pub. A. Piskadło, Cracow 1976, p. 83) describes a castle in Zborów, but the elements suggesting that it is about the castle in Jastrzębiec dominate in the description, so this information is unreliable. We do not know, whether the castle in Zborów was built in the sixteenth century in the shape it existed before 1803 (*Katalog zabytków*, vol. I, no. 1, pp. 86–87).

Our research shows that there was only a standalone, one-storey brick manor in Przecław in the second half of the sixteenth century – J. Teodorowicz-Czerepińska, T. Augustyniak, *Wyniki badań architektonicznych w renesansowym dworze w Przecławiu w pow. Mielec*, [in:] *Architektura rezydencjonalna i obronna woj. Rzeszowskiego*, Łańcut 1972, pp. 193–203.

Jastrzębiec castle was not marked on the map. It was at least partially pulled down by Piotr Zborowski, who died in 1581 (*Herby rycerstwa polskiego*, pp. 139, 142); Guerquin, Zamki, p. 140, repeats the mistake of S. Gawęda (*Możliwość malopolskie w XIV i pierwszej połowie XV w.*, Cracow 1966, p. 92) and claims it happened in the seventeenth century.

III.3.2.3 LUBLIN VOIVODESHIP

Stefan Wojciechowski

Settlements in sixteenth century Lublin Voivodeship were divided in legal and systematic terms into towns and other settlements, and in terms of their economic nature – into mill and furnace settlements, i.e. ores (ironworks).

The number of towns, 36 around 1564, grew slightly before the end of the sixteenth century. On the site of the village Sanny – mentioned still in 1563 – or next to it, the town of Zaklików was founded,¹ and the town Radomyśl² was founded prior to 1592. Both these towns lay in Urzędów district.

The settlements were divided into four size groups, in agreement with the general assumptions of the AHP series, which go beyond Lublin Voivodeship. The groups were described in the key to the map. Naturally, it is difficult to determine the size of a settlement based on the number of inhabitants. The number can only be calculated in estimation based on fiscal sources, which had different tax base for different types of settlements. Moreover, the sources are incomplete to various degrees, and in order to turn the number of inhabitants into size we need conversion factors, more reliable on a mass scale but often deceptive in relation to individual settlements.

Group I was reserved for large cities, i.e. those which had over 5,000 inhabitants in the second half of the sixteenth century, group II – towns – consists of settlements which had town rights and probably between 1,000 and 5,000 inhabitants. All the remaining towns and villages over 200 inhabitants belong to group III (towns and large villages), and group IV encompasses all other settlements.

Evidently, this division is inconsistent – purposefully, in order to avoid unnecessary multiplication of divisions between groups. So a village over 200 inhabitants will belong to a lower group than a small town with even lower population. Still, given the small number of size groups, the possibility of erroneous classification is relatively low, naturally when compared with other methods of determining and defining the size of settlements in the sixteenth century or similar periods.

Our calculations were based on data found in tax registers from 1560s. When a settlement did not appear in the registers, but the files told us it existed earlier and later, we utilized information from the register or inspection chronologically closest to 1563–1564, out of necessity. Data from these years helped us in our calculations concerning 76.3% of settlements in Lublin district, 71% in Urzędów district, and 52% in Łuków district. The size of only 16% of settlements in Lublin Voivodeship was calculated on the basis of the detailed data from 1580.

The registers recorded the number of serf lans, inns, mills, sawmills, hortulani, landless peasants, artisans, fishermen, beekeepers, pipers, and rascals. In analogy with the standards accepted earlier³ for the calculations of the data found in tax registers, we proceeded as follows: 1 serf lan equalled 13 people, one artisan – five people, one mill, one presbytery, one sawmill, one inn – six people each, one fisherman, one beekeeper, one piper – five people each, one farm – four people, one landless peasant – three people. Additionally, every other family – that is an owner of a large and average estate (nobleman), or one farm gentry family, one family of a town servant, estate governor, vogt or sołtys,

¹ In the tax register from 1580 Zaklików was called ‘oppidum’ (ASK I 33, f. 764); in 1592: ‘oppidum in cruda radice locatum, ecclesia ante 12 annos per oppidanos aedificata’ (ibidem, f. 549).

² See above, *Podziały administracyjne*, footnote 4.

³ WP, pp. 26–32; *E. Kartogramy 3–10. Zagadnienia demograficzne*, [in:] MRP.

serf, town artisan or of a Jew living in a town – equalled five people. Also, in villages in which there were peasants settled in farmland half of the land cultivated by peasants was added as a demesne, with as many demesne servants as there were lans in it.

It was much more problematic to determine the number of the inhabitants of towns. Usually the data concerning towns found in the registers is scant, limited to the number of artisans (rarely dividing them into professions). Sometimes it includes the number of apprentices (journeymen), taverns, mills, landless peasants and the amount of szos (the town tax), and the size of the town's fields (in lans). The exceptional information about the number of houses in a given town was particularly valuable (inspections mentioning Ostrów and Wąwolnica).

Very little is known about two small towns in Lewartów parish. Firlejów (now called Firlej) was founded by Mikołaj Firlej in 1557.⁴ Serocko (now called Serock) was founded as a village prior to 1330,⁵ in 1563 it is mentioned under Lewartów parish, in 1569 it paid the town tax, so it must have been a town,⁶ but in 1626 it was a village again.⁷ As a town it could not have been much bigger than a village, so we accepted the data from 1531. There were more such small towns, just to mention Rawa in Rudno parish, or Budzyń in Kozirynek parish.

Table 1. Towns

District	Under 400 inhabitants	400–1,000 inhabitants	1,000–2,000 inhabitants

Urzędów		Kraśnik	Urzędów
Łuków	Budzyń Serokomla Tuchowicz	Kocko Radzyń Siedlce	Łuków

Lublin was the only large city in the voivodeship, with more than 5,000 inhabitants it was much larger than other towns.⁸ The traders and artisans were numerous, there were five mills there, a paper-mill, a chandler's shop, bleachery, a parochial church and an Eastern Orthodox church, monasteries of: the Bernardines, the Dominicans, and the Brigittine Order, a hospital, a school, and an entire Jewish

⁴ M. Baliński, T. Lipiński, *Starożytna Polska*, vol. II, part 2, Warsaw 1885, p. 1114. In 1580 – ASK I, 33, f. 783 – paid liquor excise tax. In 1626 – *Rejestr poborowy województwa lubelskiego (Powiat lubelski i urzędowski z r. 1626, Ziemia lukowska z r. 1620)*, comp. J. Kolasa, K. Schuster, ed. S. Inglot, Wrocław 1957, p. 142 – it was already a parish and still a town.

⁵ KDMłp, vol. II, no. 602. Also recorded by Długosz in LB, I, 631, 632 as a royal village in 1496, the Archive of the Princes Sanguszko, p. 22.

⁸ R. Szewczyk, *Ludność Lublina w latach 1583–1650*, Lublin 1947. The author argues in this work with Pazyra (S. Pazyra, *Studia z dziejów miast na Mazowszu od XVI do pocz. XX w.*, Lwów 1939), who calculated 15 people per one town lan and a family with six members per one house. The author also argues with results obtained by Z. Daszyńska-Golińska as to Uście Solne, and with F. Bujak as to Limanowa. He himself based on the metrical books of Lublin, baptism and marriage register, and obtained the number of 5175 inhabitants in 1583. See W. Kula, *Stan i potrzeby badań nad demografią historyczną dawnej Polski*, RDSG, vol. 13, 1951, pp. 84–86. Our calculations, in which we also included the Jews, showed a result slightly bigger than the one of Szewczyk (5714).

district next to the starosta's castle. Already in the sixteenth century numerous jurydyki (juridical enclaves) began to appear around the city.⁹

The Table 1 lists other towns in the remaining three size groups, a bit smaller than the ones used on the map.

These small, short-lived towns deserve to be mentioned here. Some of them were absorbed by neighbouring, larger towns, other returned to their former state, i.e. became villages again. Only the ambition of noblemen could explain why, in the period presented on our map, there were two towns and one village in an area less than 1 km²: Budzyń, which belonged to the Kazanowski family, situated next to a royal town Radzyń, and a royal village Kozirynek.¹⁰ In time, the three settlements became one town – Radzyń, where the once-autonomous Budzyń and Kozirynek became districts.

The tiny town of Serock was founded thanks to the same ambition, just like the nearby Rawa.¹¹ These two did not remain towns long and soon returned to their previous, village existence. All other towns, small but serving as centres of crafts and trade, usually maintained their town rights until the end of the Republic. In the nineteenth century most of them became, something between a small town and a village ('osady').

Let us also add here that the Jews appear in towns already in the sixteenth century. They were most numerous in Lublin, then in Łuków, Parczów, and Kazimierz. There were no Jews south of the line Opole – Lublin – Piasek, and they did not inhabit villages.¹²

The following castles existed around 1564: three royal castles in Lublin district: in Lublin, Wąwolnica and Kazimierz, and nine castles belonging to the noblemen, situated in Dąbrownica, Bełżyce, Wojciechów, Bochothnica, Końska Wola, Lewartów, Bychawa – in Lublin district, Kraśnik in Urzędów district, and Kock in Łuków land.

(1966)

¹⁰ Compare with S. Litak, *Sieć parafialna archidiakonatu radomskiego w okresie przedrozbiorowym*, „Sprawozdania Towarzystwa Naukowego KUL”, vol. 9, 1958, pp. 33–34, 51–52.

¹¹ Rawa appears for the first time in 1563 (ASK I, 33, ff. 39, 415) on a previously empty area as a town, and it remained a town almost to the end of the seventeenth century.

¹² The concentration of Jews in Lublin had some 350 members. They had a prayer house here, a rabbi school, a printing house, their own peddlers, artisans, doctors, and those schooled in the scripture (S. Wojciechowski, *Gmina żydowska w Lublinie w XVI wieku*, „Biuletyn ŻIH”, 1952, no. 2(4), pp. 204–230). There were around 240 Jews in Łuków, 120 in Parczów, 60 in Kazimierz. These royal towns probably offered better conditions to developing Jewish communes. In Kamionka there were 36 Jews, around 20 in Opole, 10–15 in Końska Wola and Piasek, and only one family in Bychawa and Ostrów.

III.3.2.4 GREATER POLAND

III.3.2a.4 CHARACTER AND SIZE OF SETTLEMENTS: RURAL SETTLEMENTS

Michał Gochna

In this volume of the AHP we observed the rules applied in previous volumes. The following elements were presented on our maps:

- rural settlements
- mill settlements
- demesnes
- ironsmith settlements
- glasswork settlements

In both voivodeships, we recorded two inn settlements – Górkki and Piaskinia (known as Belzant in the sixteenth century).¹

On the main map, we distinguished mill settlements, which lay outside of bigger settlements and had their own names. In the following lists, the name in brackets is the one from the sixteenth century; furthermore, we have used abbreviations to note ownership status: r – royal, c – Church, n – of the nobility, t – of the town, rn – royal and of nobility, ct – belonging to the Church and to the town, cn – belonging to the Church and to the nobility, ctn – belonging to the Church, town and nobility. These are:

- In the Poznań Voivodeship:
 - In the Wałcz district: Iłowiec (Fulbek; n), Pilów (Pilawka; n), Żerdno (Piła; r);
 - In the Poznań district: Bobrówka (n), Borowy Młyn (n), Cietrzewka (n), Cyk (Klapsztyn; r), Czaplino (Głochotka; r), Czapury (c), Czerwonak (c), Czerwony Młyn (c), Dąbie (n), Drawski Młyn (n), Grabowiec (Grabowy Młyn; n), Jaracz (n), Krapka (r), Kuźnik (Kopermil; r), Łysy Młyn (n), Mitręga (n), Mniszek (n), Niwka (n), Niziołek (n), Nowy Młyn (n), Oberski Młyn (n), Osuch (n), Ptusza (r), Sapolny Młyn (n), Skoki (Stary Borowy Młyn; r), Smolnica (Smolenica; n), Topolnik (c), Węgielny Młyn (n), Witobel (Witowle Małe; n), Zawada (n), Zielonka (n);
 - In the Kościan district: Błotkowo (Błutkowo; n), Chachle (n), Goworek (c), Kuźnica Zbąska (Borujka; n), Markowo (n), Mokrzec (Mokrski; n), Nowy Młyn (n), Ruchocki Młyn (c), Stary Młyn (n), Ziomek (Ziemek; n);
- In the Kalisz Voivodeship:
 - In the Nakło district: Bielawy (Bielawski; r), Chwałka (n), Dolnik (n), Janowo (Nowy; n), Jaracz (r), Klawek (n), Kujan (n), Leśnicki Młyn (Leśnik; n), Rudki (r), Rudki (n), Sadkowski Młyn (Sakowski; r), Samostrzel (Słojek; n), Stara Lubcza (Lubcza; n), Tarnowski Młyn (Tarnowski; r), Toboła (n);
 - In the Kcynia district: Dziekszyn (Dziekczyño; n), Chomiąza Szlachecka (Grzmiąca; n), Gromadzki (n), Kłos (n), Nadolnik (n), Ostrowski (c), Prostkowo (Proszków; n), Skoczka Młyn (Skoczek; n), Straszewski (c), Tur (n), Zrazim (n);
 - In the Gniezno district: Bełki (c), Biskupi Młyn (c), Bystrzycki Młyn (c), Kątno (Kątny Młyn; c), Korzecznik (n), Kruchowski Młyn (n), Ławiczno (Ławiczyn; c), Nadrożno (Nadrożny; r), Nagórny (c), Orchoł (Warchoł; c), Ruda Kozłanka (Ruda; r);
 - In the Konin district: Dzierzny (n), Radzimia (Radzymia; n);

¹ See in this volume: T. Związek, *Roads*, in this edition III.5.4, and A. Borek, M. Słomski, *Settlement. Location of settlements*, in this edition III.3.1.4.

- In the Pyzdry district: Szyba (n), Trzykolne Młyny (Młyny; n);
- In the Kalisz district: Rudzki Młyn (n).

We did not mark mill settlements on the map when we were unable to localize them (in brackets we added the information about their possible location; after the semicolon we added the information about ownership): Bliższy Młyn (near Czarnkowo; n), Borowy Młyn (near Poznań; c), Gędek (r), Górny Młyn (near Czarnków; n), Kaszuba (the parish of Stobnica; n); Kosiczek (near Piła; r); Mędzikowski Młyn (near Mędzisko; n), Nadolny Młyn (near Czarnków; n), Niestachów (near Poznań; n), Nowy Młyn (near Poznań; c), Olszowy Młyn (near Poznań; c), Piotrów (in the parish of Sieraków; n), Stary Folusz (near Poznań; r); Trejelny Młyn (n), Ungrow (near Poznań; t), Wierzbak (near Poznań; t); Wójtowski Młyn (near Oborniki; n) in the Poznań district; Węgliny (in the parish of Gryżyna; n), Zalas (the parish of Czerwony Kościół; n) in the Kościan district; Biała (the parish of Góra; c), Chojenka (the parish of Chojna; n), Krotoszyński (near Kopaszyn; n) in the Kcynia district; Borowy (c), Płociczny (the parish of Strzyżewo), Przedmiejski (near Trzemeszno; c), Radzicki (near Pyszczycyn; c), Rudki (Rudny Młyn; c), Wełnicki (the parish of Gniezno św. Michał) in the Gniezno district; Powierski Młyn (near Powiercie; n) in the Konin district; Mroczyki and Zwola (both in the parish of Nietrzechanów; n) in the Pyzdry district; Młyny Odalanowskie (near Odolanów; r), Psarski Młyn (near Psary; n), Rokitno (near Kakawa; n), Świądrew (in the parish of Tłokinia; r) in the Kalisz district.

On the main map, we also marked forges that were separate, named settlements in the second half of the sixteenth century. These are:

- In the Poznań Voivodeship:
 - In the Wałcz district: (Hamer; n), Kuźnica Drawska (Ruda; r);
 - In the Poznań: Kuźniczka (Hamer Bliższy; n), Kuźnica Czarnkowska (Hamer Czarnkowski; n), Kuźnica Żelichowska (Hamer Dalszy; n), Kamiennik (Hamer Kamiennik; n), Kuźnica Pilska (Hamer Pilski; r), Hamerski Młyn (n), Hamrzycko (Hamrzysko; n), Ruda (r), Smolary (Smolany; r);
 - In the Kościan district: Kuźnica Zbąska (Hamer; n);
- In the Kalisz Voivodeship:
 - In the Nakło district: Sokole Kuźnica (Hamer; c), Żeleznica (Hamer Żelazny; n), Młoty (n);
 - In the Kcynia district: Hamer Jaktorowski (n), Trojanki (Hamer Oleski; n), Kozarzyn (Hamer Szamociński; n);
 - In the Pyzdry district: Ruda (Ruda Bestwińska; n).

We were unable to localize the forges of Kuźnica Przegocka and Kuźnica Odolanowska in the Kalisz district (near Przygodzice and Odolanów) and Hamer Trzecielski (close to Hamrzysko near Trzciel) in the Poznań district.

On the main map, we marked the mere demesnes with proper names:

- In the Poznań Voivodeship:
 - In the Poznań district: Chrustowo (Chrostowo; r), Cieśle (r), Gąsawy (n), Kobylarnia (n), Młynkowo (c), Piaskowo (n), Rojewo (c), Stare (n), Strumiany (Stromiany; n);
 - In the Kościan district: Gaj (r), Grodztwo (r), Grzymysław (Grzymisław; r), Maliny (Malinie; n), Nowy Dwór (c), Pianowo (c), Roszkowo (n), Zaborówiec (Zaborowo; n), Zaborowo (c);
- In the Kalisz Voivodeship:
 - In the Nakło district: Byszki (Byszkowy; n), Krukówko (Krukowo; n), Lutówko (c);
 - In the Kcynia district: Budki (n), Ciszewo (Czeszewo; n), Trzaskowice (Huta; n), Obórznia (Oborznia; n), Ujazd (c);
 - In the Gniezno district: Kustodia (n), Ludkowo (Lutkowo; n), Świerczewiec (c); Wójtostwo (r);
 - In the Konin district: Wola Rozostowa (Wola; n);
 - In the Pyzdry district: Dzieźmierowo (Dziećmiarowo; n), Grójec (Grodziec; n), Kromolice (n), Lipowiec (n), Orla (n), Parniczewo (n), Runowo (n), Zdiesz (n);
 - In the Kalisz district: Błotnino (n), Gręblów (Gręblewo; n), Kamień (n), Kowalew (Kowalewo; n), Macew (Macewo; n), Osuchów (Osuchowo; n), Roszkówko (Prusy Roszkowo; n), Rypino (c), Sulisław (n), Zdzienice (n).

We were unable to place the following demesnes: Kamienna Górka (near Lubasz; n), Wilda (near Wierzbica; t) in the Poznań district; Ciąszczewo (the parish of Lubiń; n), Krowi Lasek (the parish of Osieczna; n), Najdaka (near the demesne Pianowo, the parish of Kościan; n), Troska (near Osiek, the

parish of Gryżyna; n) in the Kościan district; Kościenkowo (the parish of Chomętowo; n) in the Kcynia district; Błozino (the parish of Morzysław; n), Drzązgi (near Szetlew; n), Piątnice (near Police; n), Tarnówka (near Łagiewniki; n) in the Konin district; Bielawy (the parish of Kamion; n), Chrostowo (the parish of Chlewo; n), Deszna (the parish of Chlewo; n), Gorski (the parish of Opatówek; c); Gotardy (the parish of Rajsko; n), Kraszewo (the parish of Rajsko; n), Międzyborze (the parish of Czermino; n), Oswałodowo (the parish of Ociąż; n), Poświatne (near Złotniki Wielkie; n), Sowina Pusta (the parish of Sowina Kościelna; n), Waliszewice Stare (near Waliszewice Nowe; n), Zarzecze (the parish of Szymanowice; n) in the Kalisz district.

We marked one glasswork on the main map – Pokrzywno (in the sixteenth century – Huta Pokrzywnicka).²

Moreover, we marked three tar-making settlements: Jastrzębiec, Osiek, Popielewo.³ They were all located in the Nakło district. At the end of the sixteenth century (1597), Ługi Ujskie (in the sixteenth century named Olendrowo) – a Dutch type settlement – was established.⁴ These settlements have been marked on the main map as villages and hamlets.

On the map, we have marked rural settlements with a division into large villages (probably more than 200 inhabitants) and small ones. We estimated the size of the settlements on the basis of the data contained in the tax registers. As in the previous volumes of AHP, we adopted multipliers to convert data from registers to an estimated population. In the case of data about the number of representatives of individual professional groups, we adopted multipliers allowing us to estimate the size of a family per person entered in the register. And so, for craftsmen, seasonal workers (Pol. *rataje*, Lat. *coloni*), cotters (Pol. *komornicy*, Lat. *inquilini*) with property and shepherds, we adopted a multiplier of 4, for *hortulani* with and without land – 5, for unspecified cotters – 3, for cotters with and without cattle and for apprentices (journeymen) – 2, for unaffiliated people (Pol. *hultaje*, Lat. *vagi*) and female cotters – 1. For mills and taverns, we have adopted a multiplier of 6. However, the size of the settlement was most often confirmed by the number of recorded *lans*. We carried out these estimates in two stages; first we estimated the number of peasant farms per *lan*, and then size of the peasant farm. Ultimately, we adopted a multiplier of 11 people per *lan* (belonging to the peasants, to the vogt or *soltys*, or cultivated by the serfless gentry). In the case of empty *lans*, the multiplier is 1.

We must highlight here that the abovementioned multipliers do not offer precise results, but rather allow for a general estimate of the population numbers. These are the average values for both voivodships; we did not differentiate between the different types of ownership, where – as we know – the average the size of peasant farms differed slightly. Similarly, the size of peasant farms varies by region. For both voivodships discussed in this volume, we prepared the multipliers primarily on the basis of various sources. And so, in 1552, the tax was collected not based on the *lans*, but from the peasants, which is why in two tax registers from this year – from the Kalisz and Pызdry districts – there was information about the number of peasants in each settlement.⁵ Thanks to this, it was possible to compare the data on the number of peasants with the data on the number of *lans* from later registers for these areas. A similar comparison could be made for the end of the sixteenth century, thanks to the preserved hearth register for the Poznań Voivodeship from 1631 and the Kcynia district from 1635.⁶ Moreover, we used data taken from the inspections of the royal estates, the visitations of Church domains and excerpts from the poll tax from 1590.⁷ Additionally, we consulted secondary scholarship.⁸

Bearing this in mind, villages with more than 200 inhabitants have been marked on the main map. These are:

- In the Poznań Voivodeship:
 - In the Wałcz district: Broczyno (Brocz; n), Chwarstnica (n; tied to Mielęcín); Dobino (Braksztyn; t), Dzikowo (Dykowo; n), Giżyno (n), Hanki (Henkendorf; n), Jeziorki (Schulzendorf; n), Jeziorna (Flokesia; r), Kłębowiec (Klausdorf; n), Kłosowo (Hansfeld; n), Lubiesz (Lubsdorf; n), Lubno (n), Lubowo (r), Machliny (n), Marcinkowice (Marcinkowo; n), Martew (Marta; n), Mielęcín (n), Nakielno (n), Nowe Worowo (Worowo; r), Orle (Orla; n), Popielewo (n), Prusinowo Wałeckie (Prusendorf; n), Różewo (Rozwałd; r), Rutwica (Hermansdorf; n), Rzeczyca (Knakendorf; n), Siemczyno (Heinrichsdorf; rn), Skrzatusz (r), Strzalin (Stralemburg; n), Witankowo (Witkowo; r), Zdbowo (Stibowo; n);
 - In the Poznań district: Biała (n), Bolewice (Bolelice; n), Brody (n), Bukowiec Międzyrzecki (Bukowiec; n), Bzowo (n), Chelmsko (c), Chociszewo (c), Dobrzyca (r), Dopiewo (Dupiewo; n), Duszniki (c), Gaj Mały (Gaj; n), Gościejewo (r), Górczyno (ct), Jastrowie (n), Jastrowie (r), Jeżyce (t), Kaława (c), Kalsko (c), Kęszycza (Kęsica; r), Komorniki (c), Koninek (Konino; n), Konino (n), Lubikowo (n), Lubosz (n), Lutol Suchy (r), Łagowiec (n), Muszyńska Góra (t), Nowa Wieś (n), Ordzin (Ordzino; n), Osiecko (c), Pamiątkowo (n), Pieski (n), Plewiska (c), Podrzewie (c), Podstolice (r), Połajewo (n), Prusim (n), Przytoczna (Przetoczno; n), Rogoziniec (r), Rokitno (c), Rosko (n), Rożnowo (n), Samołęż (Samoląsz; n), Siercz (n), Śliwno (n), Stara Łubianka (Łubianka; r), Stary Dwór (c), Szczuczyn (Szczuczyno; n), Szewce (n), Tarnowo (Tarnowiec; r), Templewo (c), Trzemeszno Lubuskie (Czarmyśl; n), Wąsowo (n), Wielonek (Wielim; n), Wielowieś (Langfuld; c), Winiary (t), Wróblewo (n), Wymykowo (t), Wysoka (c), Zemsko (Zębsko; c), Zemsko (Zębsko; c), Żarzyn (c), Zębowo (n);
 - In the Kościan district: Bukowiec Górny (Bukowiec Wielki; n), Błociszewo (n), Bodzewko Drugie (Bodzewko; n), Bodzewo (n), Bonikowo (r), Borowo (n), Brenno (n), Brodnica (n), Bukowiec (Bukowiec Mały; n), Chociszewice (n), Chwalim (n), Chwałkowo (n), Czacz (n), Czerwona Wieś (Czerwony Kościół; n), Dąbcze (Dąbiec; n), Dalewo (c), Dąbrówka Wielkopolska (Dąbrówka; n), Dłużyna (n), Dokowo Mokre (n), Dokowo Suche (n), Doktorowo (n), Domachowo (c), Golina Wielka (Golina; n), Gołaszyn (Gołaszyno; n), Gorzyce (n), Gościejewice (n), Górka Duchowna (Górka Mnisza; c), Gradowice (c), Granowo (n), Granówko (n), Grąbkowo (n), Grodzisko (n), Grunowo (n), Jarogniewice (n), Jerka (c), Kąkolewo (n), Kawcze (n), Kąkolewo (Kokalewo; n), Kiełpiny (c), Kłoda (n), Kluczewo (n), Kiełczewo (Kielczewo; c), Kołaczkowice (n), Konojad (c), Kościelna Wieś (c), Kosieczyn (Kosiczyno; n), Koszanowo (Koszonowo; n), Kręcisko (Kręsko; n), Krzekotowice (n), Krzemieniewo (n), Krzyżanowo (n), Lubiń (c), Lubonia (n), Łaszczyn (Łaszczyno; n), Łęka Wielka (n), Łęki Małe (n), Łomnica (n), Łubnica (n), Łuniewo (n), Łuszkowo (c), Mchy (n), Modrze (r), Mórkowo (n), Mościszki (c), Naclaw (t), Niemarzyn (Niemarzyno; n), Niepart (n), Nochowo (r), Nowa Wieś Zbąska (Nowa Wieś; n), Nowe Kramsko (Krapsko Wielkie; c), Obra (c), Oporowo (n), Osiek (n), Pakosław (n), Pawłowice (n), Perzyny (Pyrzyny; n), Piechanin (Piechinino; n), Podmokłe Małe (r), Podmokłe Wielkie (r), Posadowo (c), Przedmieście Dupińskie (n), Przyprostynia (Przeprostynia; n), Przyborowo (n), Rakoniewice (n), Rąbiń (Rąbino; n), Rębowo (c), Roszkowo (Roskowo; n), Siemowo (c), Sierakowo (t), Skoraszewice (Skoroszewice; n), Słupia Kapitulna (Słupia; n), Sobiałkowo (n), Stara Dąbrowa (Dąbrowa; n), Stara Krobica (c), Stara Przysieka Druga (Przysieka Niemiecka; c), Stare Bojanowo (Bojanowo; n), Stary Gołębin (Gołębino; n), Strzelce Wielkie (n), Sułkowice (c), Szkaradowo (Skaradowo; n), Szymanowo (Szymunowo; n), Śląskowo (n), Świerczyna (n), Targowisko (c), Tłoki (n), Turew (n), Tworzanice (Tworzyjanice; n), Wijewo (n), Wilkowo Polskie (n), Włoszakowice (n), Wonieść (Woniesiecz; c), Wyrzeka (c), Zakrzewo (n), Zalesie (n), Zbęchy (Zbechy; c), Żychlewo (c), Żytowiecko (n);
 - In the Wschowa district: Boguszyn (Boguszyno; n), Dębowa Łęka (n), Długie Stare (n), Dryżyna (Dreżyna; n), Górczyna (n), Jezierzyce Kościelne (Jezierzyce; n), Jędrzychowice (n), Kandlewo (c), Konradowo (Kunersdorf; c), Kowalewo (n), Lasocice (n), Lgiń (n), Łysiny (Łysina; n), Niechłód (n), Osowa Sień (n), Przybyszewo (n), Przyczyna Dolna (t), Przyczyna

- Górna (t), Siedlnica (Sidnica; n), Stare Drzewce (Drzewce; n), Tylewice (n), Wilkowice (Wilkowo; n), Wygnańczyce (n), Zamysłów (Szymolewo; c), Zbarzewo (n).
- In the Kalisz Voivodeship:

III.3.2b.4 CHARACTER AND SIZE OF SETTLEMENTS: CITIES AND TOWNS IN GREATER POLAND IN THE SECOND HALF OF THE SIXTEENTH CENTURY

Jarosław Suproniuk

As in the previous volumes of the AHP, we have marked on our maps the urban network in Greater Poland in the second half of the sixteenth century. We have included settlements, which had town privileges, paid the town tax (*szos*) and were referred to as *civitas*, *oppidum*, *oppidulum* or *miasto*, *miasteczko* in sources. In accordance with the tenets adopted by the AHP, urban centers have been designated based on ownership (royal, church or nobility), as well as size: small towns (less than 1,000 inhabitants), towns (1,000–5,000 inhabitants) and large towns (more than 5,000 inhabitants).¹

The typology of towns previously suggested by Henryk Samsonowicz² and Jacek Wiesiołowski³ has more recently been reviewed and improved by Marek Słoń, who updated the list of towns compiled by Samsonowicz and proposed the development of the calculations made by Wiesiołowski.⁴ By analyzing select numerical data from the fifteenth and sixteenth centuries (i.e., the number of infantrymen deployed by towns in 1458, the amount of liquor excise tax paid in 1463–1464, the coronation tax amount from 1507, the town tax amount and the number of taxed craftsmen noted in the tax registers from the second half of the sixteenth century), Słoń was able to recategorize the towns of Greater Poland from the fifteenth-sixteenth centuries.⁵

Scholars believe that at the turn of the fifteenth and sixteenth centuries, there were around 152 to 170 cities and towns in Greater Poland.⁶ In the sixteenth century, several centers in Greater Poland

¹ Compare with J. Suproniuk, *Settlement. Character and size of settlements*, [in:] AHP Cracow, in this edition III.3.2.1. Even in the “experimental” issue titled *Województwo płockie ok. 1578 r.*, seven size categories for settlements in the voivodeship were applied: category I – less than 30 inhabitants, category II – 30–100, category III – 100–200, category IV – 200–400, category V – 400–1,000, category VI – 1,000–2,000 and category VII – over 2,000 inhabitants, see WP, pp. 32–33.

² H. Samsonowicz, *Liczba i wielkość miast późnego średniowiecza Polski*, KH, vol. 86, 1979, no. 4, pp. 917–931; M. Bogucka, H. Samsonowicz, *Dzieje miast i mieszczaństwa w Polsce przedrozbiorowej*, Wrocław 1986, ch. 3: *Typologia miast na podstawie kryteriów demograficznych*, pp. 353–392.

³ J. Wiesiołowski, *Sieć miejska w Wielkopolsce w XIII–XVI wieku. Przestrzeń i społeczeństwo*, KHKM, vol. 28, 1980, no. 3, pp. 385–395.

⁴ M. Słoń, *Miasta prywatne w sieci miejskiej Wielkopolski XV–XVI wieku*, RDSG, vol. 77, 2016, pp. 93–123.

⁵ *Ibidem*, Annex 1, pp. 116–121.

⁶ O. Lange estimated the number of towns in Greater Poland at the end of the fifteenth century to be 152; see *idem*, *Lokacja miast Wielkopolski właściwej na prawie niemieckim w wiekach średnich*, Lwów 1925, p. 45; Z. Kulejewska-Topolska, citing O. Lange, believed there to be 153 towns and small towns in Greater Poland at the end of the fifteenth century; see *eadem*, *Ze studiów nad zagadnieniem lokacji miejskich w Wielkopolsce w XVI–XVIII w.*, PZ, vol. 9/3, 1953, no. 9–12, p. 181; *eadem*, *Nowe lokacje miejskie w Wielkopolsce od XVI do końca XVIII w. Studium historyczno-prawne*, Poznań 1964, p. 7. H. Samsonowicz suggested that there were 83 cities and towns in the Kalisz Voivodeship and 87 in the Poznań Voivodeship; see *idem*, *Liczba i wielkość miast*, pp. 917–931 (in the „tabular territorial division of towns in Poland around the year 1500”, the number 84 was erroneously attributed to the Kalisz Voivodeship); see also comments by L. Polaszewski about H. Samsonowicz’s text: L. Polaszewski, *Uwagi do artykułu prof. dr Henryka Samsonowicza, Liczba i wielkość miast późnego średniowiecza Polski*, KH, vol. 88, 1981, no. 3, pp. 912–914; H. Samsonowicz, *Odpowiedź na list dr Leona Polaszewskiego w sprawie liczby i wielkości miast późnego średniowiecza Polski*, KH, vol. 88, 1981, no. 3, pp. 914–915. B. Rogalski estimated that by the end of the fifteenth century, there would have been about 165 cities and towns in Greater Poland, see *idem*, *Kształtowanie się form przestrzennych sieci osadniczej Wielkopolski średniowiecznej*, Poznań 1988, p. 103. J. Wiesiołowski attributed 164 towns to the „urban network for Poznań and Kalisz” in the first half of the sixteenth century, see *idem*, *Sieć miejska*, p. 386, tab. 1.

stopped functioning as towns.⁷ Most of these were reduced to the status of a village, while some, as in the case of Półpie for example, disappeared completely in the mid-sixteenth century.⁸ Nevertheless, the sixteenth century saw new locations of towns as well.⁹

During the sixteenth century, eleven new urban centers were founded in the Kalisz Voivodeship. We still have the location privileges for five of them (Ciężęń, Jaraczewo, Łopienno, Rusocice and Tabor), while the remaining six (Korab, Mielżyn, Nosków, Strzałków, Tarnówka and Wysoka) are attested through other source materials.¹⁰ Among the listed settlements, Ciężęń, Nosków, Rusocice, Strzałków, Tabor and Tarnówka did not manage to maintain their town character in the sixteenth century and turned out to be unsuccessful locations. Only two new towns were located in the Poznań Voivodeship: Leszno and Bojanowo, though the location of the latter (from 8 March 1583) turned out to be an unrealized venture.¹¹

In Greater Poland, some town locations appeared near existing towns. These functioned as so-called new towns.¹² Among the town locations from the second half of the sixteenth century, we marked these centers, which functioned as separate administrative units and had separate authorities. With these criteria in mind, Krystynowo¹³ and Stanisławowo¹⁴ were added to the map.

Zduny in the Konin district (sometimes called the suburb of Koło) was marked on our maps – in accordance with the terminology of the tax registers from the years 1579, 1581 and 1583 (*villa*)¹⁵ – as

⁷ R. Szczygieł lists Benice, Czeszewo, Dzwonowo, Gołańcz, Lutynia, Łubowo, Półpie, Rogowo, Rozdrażew, Smogulec, Srebrna Górka, Stepuchowo and Strzelce for the Kalisz Voivodeship (all settlements belonged to the nobility), as well as Modrze (royal property) and Drożyn, Głębocek, Lewice, Mchy (property of the nobility) for the Poznań Voivodeship; see Szczygieł, p. 98.

⁸ Compare with Szczygieł, p. 187; Z. Kulejewska-Topolska, *Nowe lokacje*, p. 10, footnote 23.

⁹ See, among others: Szczygieł, pp. 33–38, 211–214; Z. Kulejewska-Topolska, *Ze studiów*, p. 182, eadem, *Nowe lokacje*, pp. 9–11.

¹⁰ Szczygieł, pp. 35–36, 211–214.

¹¹ Ibidem, pp. 33–34, 211.

¹² In 1562, Stanisławowo was located, in 1574, Nowe Miasto in Łobżenica is mentioned, in 1584 – Piotrowo (on the lands of a village of the same name), in 1593, Grodzisk Nowy was located, and in 1597 – Krystynowo, see Szczygieł, pp. 328, 331. The founding of Nowe Miasto in Łobżenica is most often dated by scholars to the sixteenth century; see, among others, Z. Kulejewska-Topolska, *Nowe lokacje*, p. 9 and p. 12, footnote 41. However, little to no attention was paid to “the notes of the gord court of Nakło from 1450, which point to the existence of the old and new town in 1450 [...] It is possible that the first buildings and properties appeared at the beginning of the fifteenth century. It is most likely them that Piotr Wałdowski mentions in the privilege from 26 January 1404”, *W Rzeczypospolitej szlacheckiej (XVI–XVIII w.)*, [in:] A. Mietz, J. Pakulski, Łobżenica. *Portret miasta i okolicy*, Toruń 2014, p. 94. In the case of Grodzisk Nowy, there was a formula in the location document issued by Jan Ostroróg on 2 November 1593, which stated that the later voivode of Poznań “did not strive to create a new, legally separate town district. He only wanted to fund a new colony, linked to Stary Grodzisk, which would help provide for the already existing settlement”, G. Wróblewska, *Rozplanowanie nowożytnych miast w Wielkopolsce od XVI do końca XVII wieku*, Warsaw–Poznań 1977, p. 82; Szczygieł, p. 35: “The decision about the joint right of the inhabitants of both communities to choose municipal authorities revealed that he did not intend to create a separate urban district there. Therefore, Nowy Grodzisk should be treated as part of the spatial development of the old town”. Piotrowo “did not develop and despite having been awarded a foundation act by the Poznań charter in 1602, it played the role of a jurydyka during the seventeenth century”, *ibidem*, pp. 34–35. Koźmin Nowy is mentioned from 1447 onwards; see M. Słoń, *Miasta podwójne i wielokrotne w średniowiecznej Europie*, Wrocław 2010, p. 413. Compare with S. Łukomski, *Koźmin Wielki i Nowy. Monografia historyczna*, Poznań 1914, pp. 255–259, where the mayors of Koźmin Wielki and Koźmin Nowy are listed. Z. Kulejewska-Topolska (eadem, *Nowe lokacje*, p. 9; eadem, *Ze studiów*, p. 182) gives the date of the location of Koźmin Nowy as 1518; the lack of information about Koźmin Nowy in the work of R. Szczygieł, while *Miasta polskie w tysiącleciu*, vol. 2, Wrocław 1967, p. 247, informs us that “at the beginning of the sixteenth century, the city grew thanks to the foundation of the so-called Nowe Miasto”. About the Gniezno settlement complex (i.e. Cierpięgi, Grzybowo, Jędrzejewo, Targowisko, Wójtostwo) in the sixteenth century, see A.P. Orłowska, *The settlement complex of Gniezno in the sixteenth century*, [in:] AHP Greater Poland, in this edition III.6.11.4.

¹³ Szczygieł, pp. 37–38, 328; see the preserved “The files of the councilors and vogts of the small town Krystynowo, otherwise known as Nowe Miasto [of Kazimierz]” (“Akta radzieckie i wójtowskie miasteczka Krystynowa inaczej Nowego Miasta [Kazimierza]”) from the years 1597–1682, AGAD, group 1/124/0, town books of Kazimierz, Kazimierz 3 (manuscript on-line: szukajwarchiwach.pl/1/124/0/-/3#tabSkany, access 17.03.2017); Compare with Z. Chodyła, *Czasy nowożytne (1504–1793)*, [in:] *Dzieje Kazimierza Biskupiego*, part 1: *Monografia*, ed. Z. Chodyła, Kazimierz Biskupi–Konin 2001, pp. 80–81, 100–101.

¹⁴ The city was located in 1562; in 1599, the Łacina suburb was included within the borders of Poznań; see T. Jurek, *Stanisławowo*, [in:] SHGPoz, part IV, p. 634 (www.slownik.ihpan.edu.pl/search.php?q=stanis%C5%82awowo&d=7&t=1, access 16.03.2017).

¹⁵ See RPWK, knn, 1579, Zduny, ASK I 13, f. 220; RPWK, knn, 1581, Zduny, ASK I 3, f. 216; RPWK, knn, 1583, ASK I 11, p. 1366.

a village, even though Sigismund I the Old apparently had “granted to the inhabitants of the suburb the privilege to choose their own mayor (proconsul), whose activity is evidenced by the council book, which begins in 1585 and which was stored with other evidence in the guild chest”,¹⁶ Michał Rawita-Witanowski adds that “a separate mayor with a council stood at the head of the suburbs’ administration, independent of the mayor of Koło, and the first one we came across was Wojciech Garncarz, one of the guild brothers”.¹⁷

On the main map, we have not marked suburbs that belonged to a different settlement¹⁸ with a separate symbol (these were only marked on individual town plans). Suburbs near towns (and occasionally referred to as villages) have been marked as villages or – as in the case of Święty Marcin (a suburb of Poznań), Pysząca (suburb of Śrem) or Świętopietrze (suburb of Przemęt) – as large villages. The character of each settlement has been specified in the index.

Among the centers named by Ryszard Szczygieł as having lost their town status, we find among others Gołańcz and Smogulec. However, following Marta Piber-Zbieranowska’s arguments, that both centers did in fact keep their urban character at the turn of the sixteenth and seventeenth centuries, we did mark Gołańcz and Smogulec as small towns.¹⁹

In our lists and statistics we have included the bishop’s town Ślesin, although from 1579, sources refer to it as a village.²⁰ We have not included individual mentions about the municipal character of settlements, which raise reasonable doubts as to their status. This concerns Witkowo, for example, which is believed to have received town privileges in the years 1676–1684, and which has been named in the *rekognicjarz* from 1591 as *the town of Withkowo*.²¹ In 1567, Słupia (its own parish, in the Poznań Voivodeship) was called an *oppidum* in the tax register,²² while Wyrzysk was named a town in the court books of Greater Poland in 1525, 1533 and 1565 (it is mentioned along with the village Wyrzysk), similarly as Stopachowo in 1517 and 1521 and Dźwierzno in 1549, 1558, 1561, 1572 and 1583.²³ We did not mark Królikowo (Królików) on our maps, as it was only referred to as a town in LBG.²⁴ There is no information about the status of Królikowo in the second half of the sixteenth century and in the seventeenth century.

¹⁶ Cited from: SGKP, vol. 14, p. 548; followed by: “in the year 1655, the armies of Charles Gustav burned down the suburb [...] The mayoral office disappeared then, only to be, unlawfully, replaced by the potters’ guildmaster. This lasted until the year 1780”.

¹⁷ Cited from M. Rawita-Witanowski, *Wielkopolskie miasto Koło, jego przeszłość i pamiątki*, Piotrków 1912, p. 128; the author also informs that “this suburb, called *Miasteczko Zduny* since most of its inhabitants were potters, was founded around 1559 based on the privilege issued by Sigismund Augustus and through the efforts of Stanisław *grabie* from Górk, the local starosta – at least the *Księga Spraw* begins with this date. According to the words of the starosta himself, which were beautifully inscribed on the title page – “I gave the books to this town, to their mayor, in which the burghers will record exnunc (from now) all the legal cases, that will be brought to the mayor and the council, including the gifting of land, houses given as security, bonds, deposits, all other entries belonging to this office and to these books” *ibidem* p. 128.

¹⁸ See: A. Borek, M. Słomski, *Settlement. Location of settlements*, [in:] AHP Greater Poland, in this edition III.3.1.4; compare also with: H. Rutkowski, *Settlement. Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7; K. Pacuski, *Settlement. Location of settlements*, [in:] AHP Sandomierz, in this edition III.3.1.2.

¹⁹ M. Piber-Zbieranowska, *Powiat kcyński w drugiej połowie XVI w.*, SG, vol. 3, 2015, p. 98 and the footnote 48. What is of particular interest is that Gołańcz appears on maps in the sixteenth century, among others on the map by Bernard Wapowski from 1526, on the map of Europe by Gerard Mercator from 1554 (second publication in 1572), on maps of Poland: map by Waclaw Grodecki from around 1562, map by Andrzej Pograbka from 1570 and map by G. Mercator from 1585 (on the maps of Poland, the settlement is marked as *Golan*); see H. Rutkowski, *Kartografia wschodniej Wielkopolski do początku XIX w.*, Materiały z konferencji “Województwo kaliskie w XVI w.”, Kalisz, 29-30 IX 2011 r. (www.wbc.poznan.pl/Content/203950/index.pdf, access 11.05.2017).

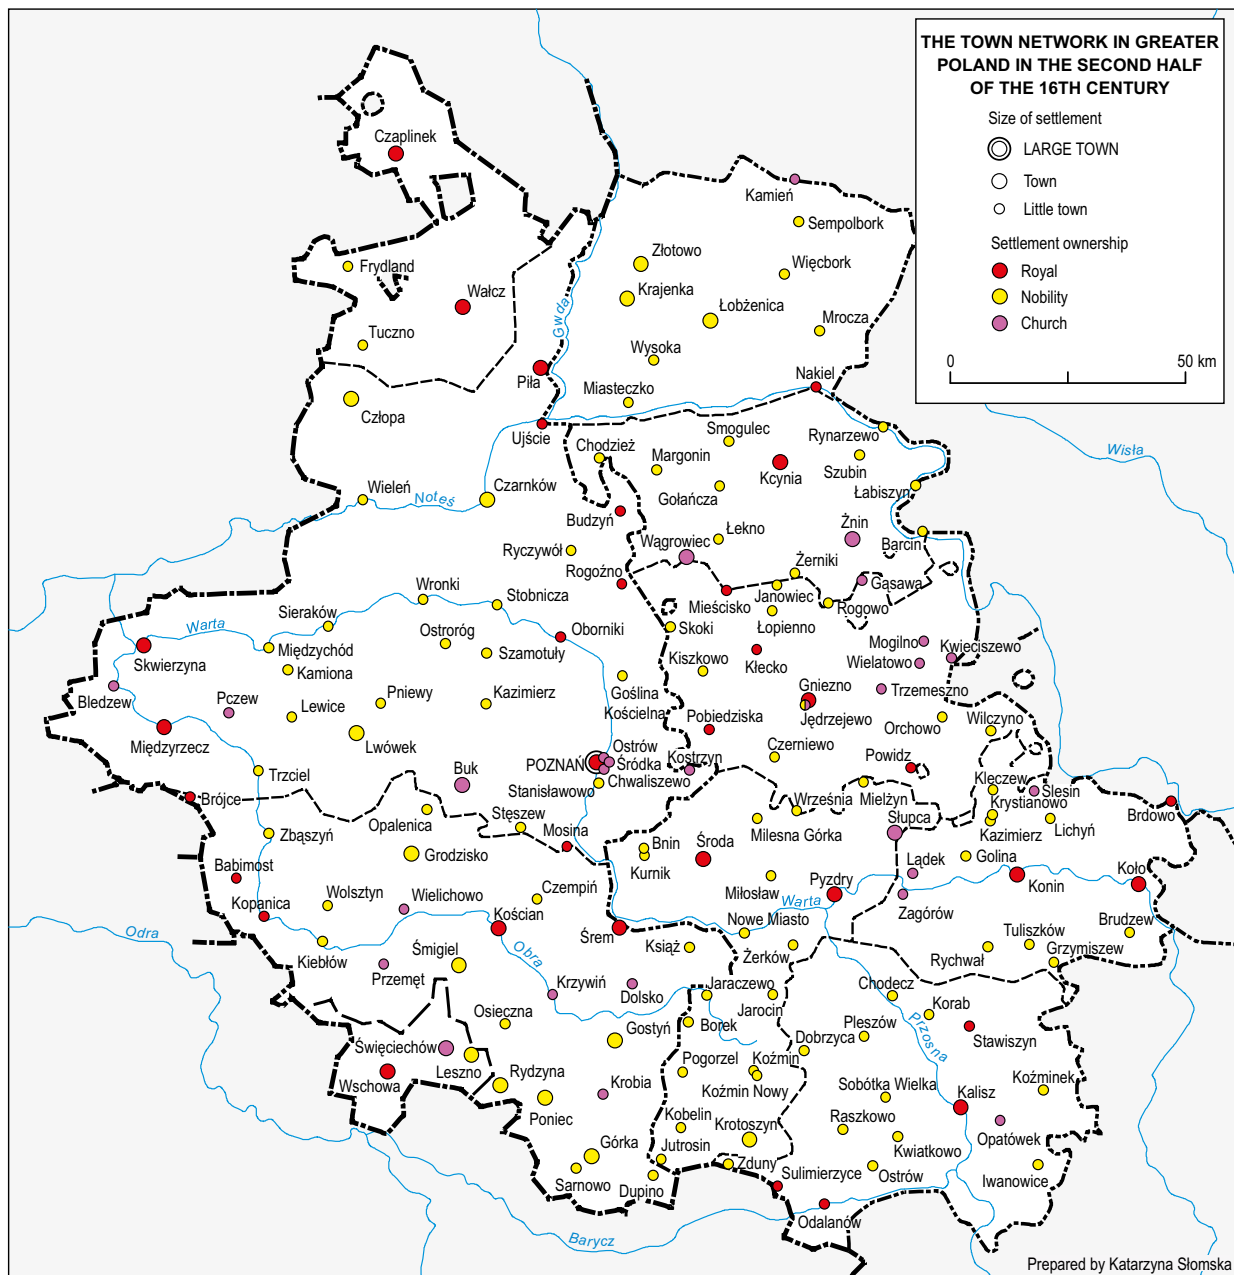

²⁰ Tax registers from the years 1578, 1579, 1581 and 1583 name four taxed craftsmen, six smallholders without land and two fishermen in Ślesin; see RPWK; compare with *Miasta polskie w tysiącleciu*, vol. 2, p. 306.

²¹ ASK I 11, f. 1750, “The register and the entries in the *rekognicjarz* of the *lan* tax from the town, the smaller towns and the villages, both belonging to the Church and to the nobility, during the Sejm in Warsaw for the year [15]91 were passed”. The location of Witkowo is dated to 1684 according to Z. Kulejewska-Topolska, *Nowe lokacje*, p. 13; eadem, *Ze studiów*, p. 183, claims that Witkowo was located in 1680; according to *Miasta polskie w tysiącleciu*, vol. 2, p. 319, Witkowo obtained its town privileges in the years 1676–1684.

²² RPWP, pzn, 1567, Słupia, ASK I 5, f. 320v: *Słoppia oppidum*.

²³ See Teki Dworzaczka.

²⁴ LBG I, p. 279: *Crolykowo oppidum*.

Map 1. The town network in Greater Poland in the second half of the 16th century

Estimates place the number of cities and towns in Greater Poland to around 150–158 at the end of the sixteenth century.²⁵ According to the AHP calculations, there were 160 cities and towns in Greater Poland around the year 1600: 93 in the Kalisz Voivodeship and 67 in the Poznań one (in the square brackets we have added the settlement's sixteenth-century name or its legal status, in regular brackets we have included its ownership status: r – royal, c – Church, n – nobility, cn – joint ownership between the Church and the nobility).

Table 1. The number of towns in the Kalisz Voivodeship in the second half of the sixteenth century²⁶

District	Towns			Total
	Royal (r)	Church (c)	Nobility (n)	
Gniezno	5	5.5*	9.5*	20
Kalisz	4	1	11	16

Pyzdry	2	1	16	19
Total	16	13.5	63.5	93

– in the Gniezno district: Czerniejewo (n), Gąsawa (c), Gniezno (r), Janowiec (n), Jędrzejewo [part of Gniezno] (cn), Kiszkowo (n), Kłęcko (r), Kwieciszewo (c), Łopienno (n), Mieścisko (r), Mogilno (c), Orchowo (n), Pobiedziska (r), Powidz (r), Rogowo (n), Skoki (n), Trzemeszno (c), Wylatowo [Wielatowo] (c), Wilczyn [Wilczyno] (n), Września (n);

– in the Kalisz district: Chocz [Chodecz] (n), Dobrzyca (n), Iwanowice (n), Kalisz (r), Korab (n), Koźminek (n), Kwiatków [Kwiatkowo] (n), Odolanów [Odalanów] (r), Opatówek (c), Ostrów Wielkopolski [Ostrów] (n), Pleszew [Pleszów] (n), Raszków [Raszkowo] (n), Sobótka [Sobótka Wielka] (n), Stawiszyn (r), Sulmierzyce [Sulimierzyce] (r), Zduny (n);

– in the Kcynia district: Barcin (n), Chodzież (n), Gołańcz [Gołańcza] (n), Kcynia (r), Łabiszyn (n), Łekno (n), Margonin (n), Rynarzewo (n), Smogulec (n), Szubin (n), Wągrowiec (c), Żniki (n), Żnin (c);

– in the Konin district: Brdów [Brdowo] (r), Brudzew (n), Golina (n), Grzymiszew (n), Kazimierz Biskupi [Kazimierz] (n), Kleczew (n), Koło (r), Konin (r), Krystianowo [Krystynowo, part of Kazimierz Biskupi] (n), Łądek (c), Licheń Stary [Lichyń] (n), Rychwał (n), Ślesin (c), Tuliszków (n), Zagórów (c);

– in the Nakło district: Kamień Krajeński [Kamień] (c), Krajenka (n), Łobżenica (n), Miasteczko Krajeńskie [Miasteczko] (n), Mrocza (n), Nakło nad Notecią [Nakiel] (r), Sępólno Krajeńskie [Sempolbork] (n), Więcbork (n), Wysoka (n), Złotów [Złotowo] (n);

– in the Pyzdry district: Bnin (n), Borek Wielkopolski [Borek] (n), Jaraczewo (n), Jarocin (n), Jutrosin (n), Kobylin [Kobelin] (n), Koźmin (n), Koźmin Nowy [part of Koźmin] (n), Krotoszyn (n), Kórnik [Kurnik] (n), Mielżyn (n), Milesna Górka [part of Targowa Górka] (n), Miłosław (n), Nowe Miasto upon Warta [Nowe Miasto] (n), Pogorzela [Pogorzel] (n), Pyzdry (r), Słupca (c), Środa Wielkopolska [Środa] (r), Żerków (n).

²⁵ A. Pawiński has estimated the number of towns in the Kalisz Voivodeship to be 88 (19 in the Gniezno district, 18 in the Pyzdry one, 16 in the Kalisz one, 14 in the Konin one, 11 in the Kcynia one and 10 in the Nakło one) and 62 in the Poznań Voivodeship (32 in the Poznań district, 24 in the Kościan one and three each in the Wałcz and Wschowa ones); see P. Wielkopolska, vol. 1, p. 63. J. Wiesiołowski assumed that around the year 1580, there were 152 towns in the “urban network of the Poznań and Kalisz Voivodeships”; see idem, *Sieć miejska*, p. 392, tab. 5. M. Bogucka and H. Samsonowicz believed that both voivodeships had a total of 152 towns at the end of the sixteenth century; see eidem, *Dzieje miast i mieszczaństwa*, p. 371. R. Szczygieł calculated 90 towns for the Kalisz Voivodeship and 68 for the Poznań one at the end of the sixteenth century (altogether, there would have been 158 urban centers), see Szczygieł, p. 99.

²⁶ Jędrzejewo in the Gniezno district was marked with a *. It belonged partially to the Gniezno chapter and partially to the Grodziecki and Żydowski families.

Table 2. The percentage of the various ownership categories in the Kalisz Voivodeship in the second half of the sixteenth century

District	Royal towns	% of total	Towns belonging to the Church	% of total	Towns belonging to the nobility	% of total	Town total
Gniezno	5	25	5.5	27.5	9.5	47.5	20
Kalisz	4	25	1	6	11	69	16
Kcynia	1	8	2	15	10	77	13
Konin	3	20	3	20	9	60	15
Nakło	1	10	1	10	8	80	10
Pyzdry	2	10	1	5	16	85	19
Total	16	17	13.5	15	63.5	68	93

In the Kalisz Voivodeship, most of the towns belonged to the nobility; they account for 68% of the towns. This same percentage can be seen in the Kalisz district, a larger one can be seen in the Pyzdry district (85%), Nakło district (80%) and Kcynia district (77%). The smallest percentage is found in the Gniezno district (48%).

On the other hand, the percentage of Church-owned towns is very small in the Kalisz district (6%), Nakło district (10%) and Pyzdry district (5%) – each only had one town. The largest percentage can be found in the Gniezno district (28%). Church-owned property constituted 15% of the towns in the Kalisz Voivodeship.

The towns classified as royal property made up 17% of the urban property in the Kalisz Voivodeship – one town in the Kcynia district (8%), Nakło district (10%) and Pyzdry district (10%) each. The greatest number can be found in the Gniezno and Kalisz districts (25% each) and in the Konin district (20%).

Table 3. The number of towns in the Poznań Voivodeship in the second half of the sixteenth century

District	Towns			Total
	Royal (r)	Church (c)	Nobility (n)	
Kościan	5	5	15	25
Poznań	9	7	19	35
Wałcz	2	-	2	4
Wschowa land	1	1	1	3
Total	17	13	37	67

– in the Kościan district: Babimost (r), Brójce (r), Czempiń (n), Dolsk [Dolsko] (c), Dubin [Dupino] (n), Miejska Górka [Górka] (n), Gostyń (n), Grodzisk Wielkopolski [Grodzisko] (n), Kęblowo [Kieblów] (n), Kopanica (r), Kościan (r), Krobia (c), Krzywiń (c), Książ Wielkopolski [Książ] (n), Opalenica (n), Osieczna (n), Poniec (n), Przemęt (c), Rydzyna (n), Sarnowa [Sarnowo] (n), Śmigiel (n), Śrem (r), Wielichowo (c), Wolsztyn (n), Zbąszyń (n);

– in the Poznań district: Bledzew (c), Budzyń (r), Buk (c), Chwaliszewo [part of Poznań] (c), Czarnków (n), Człopa (n), Murowana Goślina [Goślina Kościelna] (n), Kamionna [Kamiona] (n), Kaźmierz [Kazimierz] (n), Kostrzyn (c), Lewice (n), Lwówek (n), Międzychód (n), Międzyrzecz (r), Mosina (r), Oborniki (r), Ostroróg (n), Ostrów [part of Poznań] (c), Pszczew [Pczew] (c), Piła (r), Pniewy (n), Poznań (r), Rogoźno (r), Ryczywół (n), Sieraków (n), Skwierzyna (r), Stanisławowo [part of Poznań] (n), Stęszew (n), Stobnica (n), Szamotuły (n), Śródka [part of Poznań] (c), Trzciel (n), Ujście (r), Wieleń (n), Wronki (n);

– in the Wałcz district: Czaplinek (r), Mirosławiec [Frydland] (n), Tuczno (n), Wałcz (r);

– in the Wschowa land: Leszno (n), Świąciechowa [Świąciechów] (c), Wschowa (r).

Table 4. The percentage of the various ownership categories in the Poznań Voivodeship in the second half of the sixteenth century

District	Royal towns	% of total	Towns belonging to the Church	% of total	Towns belonging to the nobility	% of total	Town total
Kościan	5	20	5	20	15	60	25
Poznań	9	23	7	20	19	57	35
Wałcz	2	50	–	–	2	50	4
Wschowa land	1	33.3	1	33.3	1	33.3	3
Total	17	24	13	19	37	57	67

In the Poznań Voivodeship, the towns belonging to the nobility constituted 57%, similarly as in the Poznań district; there appears to have been more private towns in the Kościan district – 60%. Royal property made up 24% of the towns in the Poznań Voivodeship, with the highest percentage found in the Wałcz district (50% – two towns) and in the Wschowa land (33% – one town). Church-owned towns in the Poznań Voivodeship account for 19% of the total; there are none in the Wałcz district. In the Kościan and Poznań districts, the percentage of church-owned towns is 20%.

Table 5. The number of towns in Greater Poland in the second half of the sixteenth century

Voivodeship	Towns			Total
	Royal (r)	Church (c)	Nobility (n)	
Kalisz	16	13.5	63.5	93
Poznań	17	13	37	67
Greater Poland	33	26.5	100.5	160

One of the most difficult and controversial tasks was the estimation of the size of individual urban centers.

Remembering that all population estimates for the sixteenth to eighteenth centuries “are based on indirect fiscal sources, due to the lack of direct sources, and are tentative, determining only the general size”,²⁷ we made an attempt to estimate the size of towns in Greater Poland in the second half of the sixteenth century in accordance with the rules adopted in the AHP.²⁸ As the basis for our calculations of the population in towns, we used the number of houses and, in its absence, the number of taxed craftsmen²⁹ and buildings, the amount of tax paid on each item produced and from the sale of alcohol (liquor excise tax). Additionally, we supplemented our findings with the appropriate scholarship on this matter.

Aware that the conversion factor applied in AHP is considered somewhat controversial by other scholars and that the more recent studies in the field of historical demography have called for a lowering of the conversion factor to five to six people per house,³⁰ we nonetheless have decided to remain with our

²⁷ Cited from I. Gieysztorowa, *Wstęp do demografii staropolskiej*, Warsaw 1976, p. 146.

²⁸ See J. Suproniuk, *Settlement. Character and size of settlements*, [in:] AHP Cracow, in this edition III.3.2.1; compare with J. Kleczyński, *Spisy ludności w Rzeczypospolitej polskiej*, ”Rozprawy Akademii Umiejętności. Wydział Historyczno-Filozoficzny”, II, vol. 5 (30), 1894, pp. 33–61; idem, *Poglówne generalne w Polsce i oparte na niem popisy ludności*, ibidem, pp. 240–262; see also: T. Lalik, *Funkcje miast i miasteczek w Polsce późniejszego średniowiecza*, [in:] idem, *Studia średniowieczne*, Warsaw 2006, pp. 366–380; H. Samsonowicz, *Wiejskość osad miejskich w późnym średniowieczu*, [in:] *Civitas & villa. Miasto i wieś w średniowiecznej Europie Środkowej*, Wrocław–Prague 2002, pp. 13–16.

²⁹ The list of Greater Polish towns from the second half of the sixteenth century according to the number of taxed craftsmen, in: M. Słoń, *Miasta prywatne*, Annex 1, pp. 116–121.

³⁰ “We believe that in the case of smaller centers, characterized mainly by wooden buildings, the most appropriate conversion factor used to estimate the number of their inhabitants will be six people per house.”; P. Guzowski, R. Poniak, *Przeliczniki demograficzne w szacunkach zaludnienia miast w Królestwie Polskim w drugiej połowie XVI wieku*, PDP, vol. 37, 2015, no. 2, p. 90 (see also pp. 78–79: “Próby wykorzystania szosu” and pp. 79–91: „Domy a liczba ludności”). „The optimal solution will therefore be to adopt a conversion factor of five people per one taxpayer from burgher craft and trade groups and 3 people per one registered cotter”, ibidem, p. 92; see also: K. Boroda, *Geografia gospodarcza Królestwa Polskiego w XVI wieku*, Białystok

previously established number of nine people per house in order to maintain balance and consistency with our remaining calculations of town sizes in the Crown. For the first time, in this volume we have created a separate category (in the tables) of towns whose possible population was around 500 inhabitants or less.³¹

Table 6. Population of cities and towns in the Kalisz Voivodeship in the second half of the sixteenth century

District	Number of inhabitants						Total
	Up to 500	Up to 1,000	Up to 1,000 (with 500)	Up to 2,000	Up to 5,000	Over 5,000	
Gniezno	16	3	19	–	1	–	20
Kalisz	13	2	15	–	1	–	16
Kcynia	9	1	10	2	1	–	13
Konin	13	–	13	2	–	–	15
Nakło	6	–	6	4	–	–	10
Pyzdry	11	4	15	2	2	–	19
Total	68	10	78	10	5	–	93

We marked the following as towns in the Kalisz Voivodeship:

- in the Gniezno district: Gniezno;³²
- in the Kalisz district: Kalisz;³³

2016, ch. 1: *Rejestry podatkowe i problem ich wiarygodności badawczej*, pp. 63–81; P. Guzowski, *Stan i perspektywy badań nad liczbą ludności Polski w późnym średniowieczu i w początkach epoki nowożytnej*, PDP, vol. 37, 2015, no. 2, pp. 7–25; K. Boroda, *Przeszłość przeliczników demograficznych dla szesnastowiecznych źródeł podatkowych*, PDP, vol. 37, 2015, no. 2, pp. 27–52; C. Kukło, *Badania nad demografią rodzin w mieście doby preindustrialnej*, [in:] *Struktury demograficzne rodziny na ziemiach polskich do połowy XX wieku. Przegląd badań i problemów*, ed. P. Guzowski, C. Kukło, Białystok 2014, pp. 51–78. J. Łojko assumes that „these markers range from four to six inhabitants per hearth or household and are dependent on the century and conditioned by elementary disasters (epidemics, fires)”; J. Łojko, P. Łojko-Wojtyniak, *Zaludnienie*, [in:] *Civitas Konin. Dzieje miasta i starostwa do schyłku XVIII w.*, vol. 1, ed. J. Łojko, Konin 2011, p. 105. T. Lalik believed that the multiplier of five people per one house is too low; see idem, *Geneza sieci miasteczek w Polsce średniowiecznej*, [in:] idem, *Studia średniowieczne*, p. 350, footnote 1. I. Gięsztorowa was of the opinion that „the multiplier of six to seven inhabitants per house, currently used in Polish scholarship, should be increased a bit, depending on the rank of the urban center, assessed on the basis of all the preserved documentation”; eadem, *Wstęp do demografii staropolskiej*, p. 184 and footnote 287, where previous literature on the topic was referenced. Compare with: H. Samsonowicz, *Późne średniowiecze miast nadbałtyckich. Studia nad dziejami Hanzy nad Bałtykiem w XIV–XV w.*, Warsaw 1968, ch. 3: *Zaludnienie miast nadbałtyckich*, pp. 73–108; W. Czerkawski, *Metoda badania zaludnienia Polski w XVI w.*, „Sprawozdania z Czynności i Posiedzeń Akademii Umiejętności w Krakowie”, vol. 2, 1897, no. 2, pp. 8–12.

³¹ In this category we find, for example, the small town of Budzyń (“the small town of Budzin. 35 people live there, who have a bit of land to work; they do not pay rent or tributes, but they work on foot and get food from the manor” and „The small town of Budzin. In this town, there are 20 properties, of which 10 are on the fields. [...] eight wheelers [...] they do not pay market tax due to poverty”, LWWK 1628, part 1, p. 84), Stawiszyn („the small town Stawiszyn [...] There are 18 inhabited houses, 33 empty ones, 2 belonging to the nobility, vogt’s district empty square, 5 breweries, 10 sheds”, LWWK 1628, part 1, p. 182) or Wieleń („In this town, there are 51 burghers who have houses, and each of these has 4 meadows, 2 gardens. For each house with gardens and meadows they pay gr 2, [facit] fl. 3 gr 12 of rent”, LWWK 1564, part 1, p. 189).

³² In 1564, 195 craftsmen were taxed in Gniezno; see RPWK, gzn, 1564, Gniezno, ASK I 12, f. 551. „As a result of our calculations, we obtained an estimate of 3,200 people inhabiting Gniezno around the mid-sixteenth century. This number should be treated as a lower estimate, as it is impossible to capture the population of the smaller ones Jurisdiction”; J. Topolski, *Gniezno miejscem wielkich jarmarków*, [in:] *Dzieje Gniezna*, ed. J. Topolski, Warsaw 1965, p. 272. „To the number of around 3,250 people obtained so far, the population of *jurydyki* should be added. [...] We estimated the population of the royal town (excluding the clergy and nobility) at about 2,650 people, which is about 60% of the entire town population. In this case, the population of Cierpięgi, Grzybów and Wójtostwo, constituting [...] about 40% of the town’s population, would amount to about 1,760 people. We will now add this number to the estimated population of the royal town, the Jewish population, the clergy and nobility, i.e., about 3,250 people, and we will get about 5,000. people. [...] However, it must be noted that these 5,000 people were the population of several formally separate towns: the royal town and the *jurydyki*”; ibidem, p. 274; the calculations of J. Topolski are quoted by M. Zwierzykowski; compare with idem, *Mieszkańcy*, [in:] *Dzieje Gniezna – pierwszej stolicy Polski*, ed. J. Dobosz, Gniezno 2016, p. 244. In 1578, Gniezno paid 1544 fl. of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

³³ In 1591, 240 craftsmen were taxed in Kalisz; see RPWK, kls, 1591, Kalisz, ASK I 11, pp. 1630–1633. „In total, the entire population of Kalisz in 1579 amounted to about 2,700 people”; A. Nowak, *Ludność Kalisza i jej struktura. A. Okres do połowy XVII w.*, [in:] *Dzieje Kalisza*, ed. W. Rusiński, Poznań 1977, p. 155. In 1578, Kalisz paid 1070 fl.25 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

- in the Kcynia district: Kcynia,³⁴ Wągrowiec,³⁵ Żnin;³⁶
- in the Konin district: Koło,³⁷ Konin;³⁸
- in the Nakło district: Nakło,³⁹ Krajenka,⁴⁰ Łobżenica,⁴¹ Złotów;⁴²
- in the Pyzdry district: Krotoszyn,⁴³ Pyzdry,⁴⁴ Słupca,⁴⁵ Środa Wielkopolska.⁴⁶

³⁴ Tax register from 1577: „Kczinia town” (ASK I 13, f. 201v). In 1579, 92 craftsmen were taxed in Kcynia; see RPWK, kcn, 1579, Kcynia, ASK I 4, f. 378. „[...] the number of inhabitants of the capital of the district can be estimated to 1,000”; M. Piber-Zbieranowska, *Powiat kcyński*, p. 99. The hearth tax register 1635 noted that Kcynia had a total 166 houses and 20 Jewish houses; see Hearth tax 1635, f. 79. In 1578, Kcynia paid 404 fl. 16 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 274.

³⁵ In 1577, 125 craftsmen were taxed in Wągrowiec; see RPWK, kcn, 1577, Wągrowiec, ASK I 13, f. 212. In 1591, 30 houses by the square, 44 houses by the street, 14 houses (3 gr. each) and 95 shabby houses paid the town tax in Wągrowiec; see A. Borek, *Rejestr poborowy powiatu kcyńskiego 1591 r.*, [in:] RPWK, kcn, 1591, introduction. The hearth tax from 1635 informs about 305 houses in Wągrowiec; see Hearth tax 1635, ff. 79–79v. In 1578, Wągrowiec paid 507 fl. 22 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 274.

³⁶ The tax register from 1591 notes that Żnin has 37 houses by the square, 261 houses on streets and seven shabby houses; see A. Borek, *Rejestr poborowy powiatu kcyńskiego 1591 r.*; the tax register of the Kalisz Voivodeship from 1618–1620 mentions that Żnin had 201 houses; see Parczewski, p. 265. „It can be assumed that in the first quarter of the seventeenth century, about 2,000 people lived in Żnin”; C. Sikorski, *Zarys dziejów Żnina*, Żnin 1990, p. 42. The hearth tax register from 1635 notes that Żnin had 257 houses; see Hearth tax 1635, f. 80. In 1578, Żnin paid 904 fl. 17 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 274.

³⁷ „Item from the houses, which were residential, of which there were 209, but now there are only 138, 7 of the nobility, 20 of Jews, each should give gr 1 den. 3. Facit fl. 5/11”, LWWK 1628, part 1, p. 100. In 1578, Koło paid 727 fl. 26 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

³⁸ In 1565, there were 128 craftsmen taxed in Konin; see RPWK, knn, 1565, Konin, ASK I 13, f. 27. J. Łojko, referencing the work of A. Wędzki, states that „Konin in the year 1559 may have counted 1200 inhabitants including clergymen, noble officials (affiliated with the land and gird chancellor in the town) and the castle servants”; J. Łojko, P. Łojko-Wojtyński, *Zaludnienie*, p. 105. In 1578, Konin paid 306 fl. 27 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

³⁹ LWWK 1616, part 1, p. 356: „There were 186 houses in the town and the suburbs”; LWWK 1628, part 1, p. 191: „There was a total of 186 houses in the town and the suburbs before the inspection. Only 80 are inhabited, 76 are empty, 16 are Jewish and the synagogue was the seventeenth. The rest is empty”. In the tax registers from the second half of the sixteenth century, there are 39–44 taxed craftsmen. In 1458, only two towns were able to afford armed men: Łobżenica – 1 and Nakło – 4; in the sixteenth century, Łobżenica gains an economic advantage over Nakło, Złotów and Krajenka; see M. Słoń, *Miasta prywatne*, Annex 1; Compare with S. Łaniecki, *Kamień okresu staropolskiego (XVI–XVIII w.)*, [in:] *Dzieje Kamienia Krajeńskiego i okolic od pradziejów do współczesności*, ed. J. Dorawa, T. Fiałkowski, Sepólno Krajeńskie 2009, p. 97. T. Bobowski wrote that „the town was very extensive and developed on both sides of the Noteć River, it had over 3,000 inhabitants before the Swedish wars”; T. Bobowski, *Co się działo w Nakle i okolicy od czasu pierwszego rozbioru Polski do dni ostatnich*, [in:] *Krajna i Nakło. Studia i rozprawy wydane z okazji pięćdziesięciolecia gimnazjum im. Bolesława Krzywoustego w Nakle*, Nakło [1926], p. 194. In 1578, Nakło paid 191 fl. 4 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 274.

⁴⁰ S. Łaniecki estimated the population of Krajenka to be around 1900 people in 1580; see idem, *Kamień okresu staropolskiego*, p. 97. In 1576, 60 houses paid the town tax; see RPWK, nkl, 1576, Krajenka, ASK I 12, f. 670. In 1578, Krajenka paid 85 fl. 28 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 274.

⁴¹ „In 1580, Łobżenica had 2,250 inhabitants”; *W Rzeczypospolitej szlacheckiej (XVI–XVIII w.)*, p. 95. In 1565, 108 craftsmen and 56 apprentices in Łobżenica were taxed; see RPWK, nkl, 1565, Łobżenica, ASK I 5, f. 275v. In 1578, 142 craftsmen were noted in the register; see RPWK, nkl, 1578, Łobżenica, ASK I 5, f. 829. In 1578 r. Łobżenica paid 515 fl. 12 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 274.

⁴² S. Łaniecki estimated the population of Złotów in 1580 to be about 1940 people; see idem, *Kamień okresu staropolskiego*, p. 97. In 1578, Złotów paid 74 fl. 16 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 274.

⁴³ „In the town itself, at the beginning of the sixteenth century there were 60 houses, inhabited by about 400 people”; R. Marciniak, *W Rzeczypospolitej szlacheckiej (1415–1793)*, [in:] *Krotoszyn*, vol. 2: *Historia*, ed. R. Marciniak, Krotoszyn–Poznań 1996, p. 82. „In the year 1629, it already had 311 houses [...] It may have had up to 2,000 inhabitants”; ibidem, p. 98. In 1578, Krotoszyn paid 228 fl. of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁴⁴ “In this town, there are 196 buildings in the market square, in the streets, in the suburbs and in the demesnes, 35 empty houses, 11 buildings belonging to the parish clergy and to the Church of the Holy Spirit, 17 monastic houses, 13 noble houses”; LWWK 1628, part 1, p. 157. In 1578, Pyzdry paid 1108 fl. 16 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁴⁵ “[...] at the beginning of the seventeenth century, there were about 300 houses within the walls of Słupca, and an additional 200 outside”; *Miasta polskie w tysiącleciu*, vol. 2, p. 297; J. Dobosz, *Słupca od lokacji miasta do końca XVI wieku*, [in:] *Dzieje Słupcy*, ed. B. Szczepański, Poznań 1996, p. 54: „according to H. Samsonowicz’s calculations, it can be assumed that Słupca had around 2,000 inhabitants at the end of the fifteenth century”. In 1578, Słupca paid 864 fl. 10 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁴⁶ In 1578, 101 craftsmen were taxed in Środa; see RPWK, pzd, 1578, Środa, ASK I 11, pp. 627–269. In 1578, Środa paid 903 fl. 20 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

Table 7. Population of cities and towns in the Kalisz Voivodeship in the second half of the sixteenth century (percentage of each category)

District	Number of inhabitants												Total
	Up to 500	% of total	Up to 1,000	% of total	Up to 1,000 (with 500)	% of total	Up to 2,000	% of total	Up to 5,000	% of total	Over 5,000	% of total	
Gniezno	16	80	3	15	19	95	–	–	1	5	–	–	20
Kalisz	13	81	2	13	15	94	–	–	1	6	–	–	16

Total	68	73	10	11	78	84	10	11	5	5	–	–	93

There is a clear prevalence of small towns (up to around 1,000 inhabitants) in the Kalisz Voivodeship, which make up 85% of all the towns. There were only ten towns containing between 1,000 and 2,000 inhabitants: two in the Kcynia district, Konin district and Pyzdry district each; the most (four towns) were in the Nakło district. Five towns had over 2,000 inhabitants (5% of total): one in Gniezno, Kalisz and Kcynia districts each and two in the Pyzdry district. There were no large towns (over 5,000 inhabitants) in the Kalisz Voivodeship.

Table 8. Density of the urban network of the Kalisz Voivodeship in the second half of the sixteenth century

District	Area in km ² according to the AHP	Town over 1,000 inhabitants	Small town	Total	The number of km ² per 1 town

In the Poznań Voivodeship, we have marked one large town – Poznań.⁴⁷

We have marked the following as towns in the Poznań Voivodeship:

- in the Kościan district: Miejska Górka,⁴⁸ Gostyń,⁴⁹ Grodzisk Wielkopolski,⁵⁰ Kościan,⁵¹ Poniec,⁵² Rydzyna,⁵³ Śmigiel,⁵⁴ Śrem;⁵⁵
- in the Poznań district: Buk,⁵⁶ Czarnków,⁵⁷ Człopa,⁵⁸ Lwówek,⁵⁹ Międzyrzecz,⁶⁰ Piła,⁶¹ Skwierzyna;⁶²
- in the Wałcz district: Czaplinek,⁶³ Wałcz;⁶⁴
- in the Wschowa land: Leszno,⁶⁵ Świąciechowa,⁶⁶ Wschowa.⁶⁷

⁴⁷ In 1563, 542 craftsmen were taxed in Poznań; see RPWP, pzn, 1563, Poznań, ASK I 5, ff. 243–243v. S. Waszak estimates the population of Poznań to be around 19,000–20,000 inhabitants; see idem, *Ludność i zabudowa mieszkaniowa miasta Poznania w XVI i XVII w.*, PZ, vol. 9/3, 1953, no. 9–12, p. 122: “The left and right banks of Poznań could have counted about 19,000–20,000 inhabitants at the end of the sixteenth century”. In 1578, Poznań paid 11,050 fl. 9 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 272.

⁴⁸ Hearth tax register from 1631 mentions that Miejska Górka had 221 houses; see Hearth tax 1631, f. 28v. In 1578, Miejska Górka paid 153 fl. 25 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁴⁹ “In 1528, there were 149 residential houses in Gostyń”; *Miasta polskie w tysiącleciu*, vol. 2, p. 224. Hearth tax register from 1631 mentions that Gostyń had 190 houses; see Hearth tax 1631, f. 28v. In 1578, Gostyń paid 25 fl. 24 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁵⁰ Hearth tax register from 1631 mentions that Grodzisk had 204 houses (including 26 Jewish houses) and 142 houses in Nowe Miasto; see Hearth tax 1631, f. 28v. In 1578, Grodzisk paid 1,141 fl. 6 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁵¹ Hearth tax register from 1631 mentions that Kościan had a total of 318 houses; see Hearth 1631, f. 29. In 1578, Kościan paid 1730 fl. of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁵² Hearth tax register from 1631 mentions that Poniec had a total of 218 houses and 31 houses in the suburbs; see Hearth tax 1631, f. 31v. In 1578, Poniec paid 359 fl. 10 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁵³ Hearth tax register from 1631 mentions that Rydzyna had a total of 220; see Hearth tax 1631, ff. 31v–32. In 1578, Rydzyna paid 85 fl. 6 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁵⁴ Hearth tax register from 1631 mentions that Śmigiel had a total of 283 houses; see Hearth tax 1631, f. 32v. In 1578, Śmigiel paid 414 fl. 12 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁵⁵ Hearth tax register from 1631 mentions that Śrem had 281 houses (including 29 Jewish houses); see Hearth tax 1631, f. 32v. In 1578, Śrem paid 568 fl. 16 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁵⁶ Hearth tax register from 1631 mentions that Buk had a total of 229 houses; see Hearth tax 1631, f. 28. In 1578, Buk paid 1788 fl. 24 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 272.

⁵⁷ Hearth tax register from 1631 mentions that Czarnków had a total of 218 houses; see Hearth tax 1631, f. 28. The liquor excise tax register is lacking a number for Czarnków; see Ducillorum contributionum 1578, p. 272.

⁵⁸ Hearth tax register from 1631 mentions that Człopa had a total of 180 houses; see Hearth tax 1631, f. 28.

⁵⁹ Hearth tax register from 1631 mentions that Lwówek had a total of 346 houses; see *ibidem*, f. 29. In 1578, Lwówek paid 544 fl. 24 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 272.

⁶⁰ Hearth tax register from 1631 mentions that Międzyrzecz has 241 houses and 101 houses in the suburbs, see Hearth tax 1631, f. 29v. “It seems that the population of Międzyrzecz [...] can be estimated to around 600–1,000 inhabitants, although more exact calculations are very difficult. It must, however, be noted that according to the town chronicle, about 1,100 people died in 1601. These data seem to increase the city’s population at the turn of the sixteenth and seventeenth centuries, compared to previous estimates.”; M. Tureczek, *Międzyrzecz od momentu lokacji miejskiej do przelomu czasów średniowiecznych i nowożytnych*, [in:] *Międzyrzecz – dzieje miasta*, ed. W. Strzyżewski, M. Tureczek, Międzyrzecz 2009, p. 159. In 1578 r. Międzyrzecz paid 479 fl. 1 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 272.

⁶¹ “There are 153 houses, from each they pay gr 6 den. 12, [facit] fl. 34 [...]. There are 114 burghers, who held marshlands, which included meadows [...], 10 fishermen [...], 13 cobblers [...], 2 butchers [...], 6 wheelers [...], 15 beekeepers [...], potters [...] of whom there are now 18 [...], 3 Jewish houses”; LWWK 1564, part 1, p. 139. Hearth tax register from 1631 mentions that Piła has 273 houses; see Hearth tax 1631, f. 31v. In 1578, Piła paid 288 fl. 10 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 272.

⁶² Hearth tax register from 1631 mentions that Skwierzyna had 290 houses altogether (including 34 Jewish houses), see Hearth tax 1631, f. 32. In 1578, Skwierzyna paid 173 fl. 28 gr of liquor excise tax, see Ducillorum contributionum 1578, p. 273.

⁶³ Hearth tax register from 1631 mentions that Czaplinek had 249 houses; see Hearth tax 1631, f. 28.

⁶⁴ Hearth tax register from 1631 mentions that Wałcz had 226 houses and 64 houses in the suburbs, see *ibidem*, ff. 33–33v.

⁶⁵ Hearth tax register from 1631 mentions that Leszno had 289 houses (including 27 Jewish ones) and 46 new as well as 75 houses in the suburbs, see *ibidem*, ff. 29–29v. Leszno paid 188 fl. of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁶⁶ Hearth tax register from 1631 mentions that Świąciechowa had 280 houses, see Hearth tax 1631, f. 32v. In 1578, Świąciechowa paid 269 fl. 15 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

⁶⁷ Hearth tax register from 1631 mentions that Wschowa had 163 houses and 512 houses in the suburbs; see Hearth tax 1631, f. 33v. Compare with: A. Borek, *Wschowa*, [in:] AHP Greater Poland, in this edition III.6.34.4. In 1578 r. Wschowa paid 1849 fl. 18 gr of liquor excise tax; see Ducillorum contributionum 1578, p. 273.

Table 10. Population of cities and towns in the Poznań Voivodeship in the second half of the sixteenth century (percentage of each category)

District	Number of inhabitants												Total
	Up to 500	% of total	Up to 1,000	% of total	Up to 1,000 (with 500)	% of total	Up to 2,000	% of total	Up to 5,000	% of total	Over 5,000	% of total	
Kościan	8	32	9	36	17	68	7	28	1	4	–	–	25
Poznań	18	51	9	26	27	77	7	20	–	–	1	3	35
Walcz	–	–	2	50	2	50	2	50	–	–	–	–	4
Wschowa land	–	–	–	–	–	–	2	66.7	1	33.3	–	–	3
Total	26	39	20	30	46	69	18	27	2	3	1	1	67

In the Poznań Voivodeship, just as in the Kalisz one, small towns are the most frequent: 69% are towns with under 1,000 inhabitants. The numbers are similar in the Kościan district (68%), and larger in the Poznań district (77%). Eighteen towns in the Poznań Voivodeship had more than 2,000 people (27%), but only two had even more inhabitants, though under 5,000 (3% of the total number). Only Poznań had over 5,000 inhabitants; we marked it as a large town.

Table 11. Density of the urban network of the Poznań Voivodeship in the second half of the sixteenth century

District	Area in km ² according to the AHP	Town over 1,000 inhabitants	Small town	Total	The number of km ² per 1 town
Kościan	5,175	8	17	25	207
Poznań	8,979	8	27	35	256
Walcz	1,945	2	2	4	486
Wschowa land	554	3	–	3	185
Poznań Voivodeship	16,653	21	46	67	248

Table 12. Population of cities and towns in Greater Poland in the second half of the sixteenth century

District	Number of inhabitants						Total
	Up to 500	Up to 1,000	Up to 1,000 (with 500)	Up to 2,000	Up to 5,000	Over 5,000	
Kalisz	68	10	78	10	5	–	93
Poznań	26	20	46	18	2	1	67
Greater Poland	94	30	124	28	7	1	160

In Greater Poland (160 towns), small towns were the most common (under 1,000 inhabitants); they made up 124 settlements in the region (78%). Towns between 1,000 and 2,000 inhabitants constituted 17% of the Greater Poland towns. Out of the 160 urban centers, only seven counted over 2,000 inhabitants (4% of total). In Greater Poland, we have noted only one large town (over 5,000 inhabitants).

Table 13. Density of the urban network of the Poznań Voivodeship in the second half of the sixteenth century

District	Area in km ² according to the AHP	Town over 1,000 inhabitants	Small town	Total	The number of km ² per 1 town
Kalisz	17,127	15	78	93	184
Poznań	16,653	21	46	67	248
Greater Poland	33,780	36	124	160	211

The maps of seven towns of Greater Poland in the second half of the sixteenth century have been included in this volume: Dolsk, Gniezno, Kalisz, Kościan, Pleszew, Poznań and Wschowa. Below, we have presented the surface area of the town within the city walls or – as in the case of Dolsk and Pleszew – the area designated as containing urban buildings.

Table 14. Surface area of towns in Greater Poland in the second half of the sixteenth century

Town	Surface area (m ²)
Poznań	210,600
Kalisz	181,000
Dolsk	144,065
Kościan	116,312
Pleszew	106,412
Gniezno	62,406
Wschowa	56,200

Translated by Karolina Frank

III.3.2c.4 CHARACTER AND SIZE OF SETTLEMENTS: CASTLES AND ABBEYS

Michał Słomski

As in previous volumes of the AHP series, castles from the second half of the sixteenth century were marked on the main map in the Greater Poland tome. We treated as the castle building defined in the sources with the Latin terms *castrum*, *arx* and the Polish word *zamek*, which had defensive properties and functioned as the permanent or temporary residence of the owner or his official, as well as were usually located in the center of the property or estate complex and played a role in property administration, additionally performing representative and ideological functions. We are aware of the many problems caused by the selection of this type of criterion.

The first is the lack of precision and the arbitrariness of the terminology of the time. The same building could be referred to through a variety of different terms (not only *castrum* and *arx*, but also *fortalicium* or *curia*). The same term could be used to describe buildings with varying degrees of defensive properties and in different stages of construction. This issue is well-known and broadly discussed among scholars.¹ In all Polish territories in the sixteenth century, not only in Greater Poland, there were many manors that referenced castles in their construction scheme or layout. Like castles, they were surrounded by some defensive perimeter (a moat, palisade, earth embankment). These, however, had reduced architectural and functional features.² Sometimes, it is difficult to establish what types of buildings we are dealing with.³ These types of buildings were constructed in settlements belonging to the king, the clergy and the nobility, although they are most frequently found in estates belonging to nobles (which is tied to the proportions of the general structure of property ownership in the country). They were often named to in sources as *castrum*,⁴ though this term tended to refer to buildings larger than the average.

The second problem – which is connected to the first one – is the fact that presently, a castle can be understood as a “castle” in the modern (often intuitive) sense of the word, as well as an “ordinary” wooden manor house on a mound, which only included a sliver of the castle layout (mainly due to financial factors).⁵ Furthermore, the late Middle Ages and the sixteenth century were a time during

which the ideas about the functionality of castles changed. The defensive value of a castle began to be substituted by the need to conform to comforts of daily life and the representational function, even though the older architectural designs remained in use.⁶

When selecting castles, we relied primarily on existing scholarship, which allowed for the selection of the buildings qualified to be placed on the map.⁷ They are listed in the latter part of this chapter and are marked on the map. We included structures in Babimost, Chodzież, Iwanowice and Rogoźno in the category of castles.

The castle in Babimost (Kościan district) was frequently mentioned in the fourteenth and fifteenth century. In 1566, the castle mill was also referenced. The inspection from the seventeenth century provided information about two buildings, one called a castle. It seems that some sort of complex appeared to fulfill the criteria required to qualify it as a castle in Babimost, due to its location on the western border of the country.⁸ The castle in Chodzież (Kcynia district) was first mentioned in 1520, when it was described as a *castrum seu fortalitium*.⁹ It was most often referred to as a castle in the town books of Chodzież.¹⁰ It seems that this structure, studied by Tomasz Wujewski, could indeed be classified as a castle.¹¹ Mentions of a *castrum* and *fortalicium* in Iwanowice, which occurred in the late Middle Ages and the beginning of the sixteenth century, began in 1472.¹² Information about the upstairs room in Iwanowice where valuables were stored,¹³ suggest that the structure had at least two stories, though it remains uncertain whether this was a defense tower or whether the owners simply used the attic for storage purposes.¹⁴ Mentions about the castle in Iwanowice are present throughout the entire

⁶ L. Kajzer, *Zamki i społeczeństwo*, pp. 169–170.

⁷ The essential works we consulted are: Guerquin, *Zamki and Leksykon*. We also included: T. Jakimowicz, *Architektura świecka w Wielkopolsce*, [in:] *Studia nad renesansem w Wielkopolsce*, ed. T. Rudkowski, Poznań 1970, pp. 9–38; K. Olejnik, *Grody i zamki w Wielkopolsce*, Poznań 1993; Tomala Kal.; Tomala Wlkp.; L. Kajzer, *Małe czy duże, czyli o tzw. zamkach ryckich na Niżu Polskim*, [in:] *Zamki i przestrzeń społeczna*, p. 115; J. Pietrzak, *Zamki i dwory obronne*; M. Strzałko, *Wielkopolskie zamki*, Poznań 2006.

⁸ LWWK 1628, pp. 71–72; K. Górka-Gołąska, *Babimost*, [in:] SHGPoz, part I, pp. 7–9; J. Pietrzak, *Zamki i dwory obronne*, pp. 37–38; Tomala Wlkp., pp. 143–144.

⁹ MK 35, 115: „Significamus etc, quia nos ammonentes supplicationibus generosi Nicolai Pothuliczki de Chodziesza volentes, quo prospicere securitati castrum seu fortalicii ipsius hereditarii dicti Chodziesza” [=MRPS IV/2, no. 12754, the register is not precise]. R. Kabat, *Historia zabudowy Chodziesza*, Chodzież 2008, pp. 110–111, states that the building was erected in 1482, even though this most likely was the date of the construction of the hospital in Chodzież; Tomala Wlkp., pp. 161–162. See also KZS, vol. 5: *Województwo poznańskie*, no. 1: *Powiat chodzieski*, ed. U. Czartoryska, M. Kutzner, Warsaw 1965, p. 4; S. Chmielewski, B. Dzieduszycka, *Początki Chodziesza na tle najstarszego osadnictwa*, [in:] *Dzieje Chodziesza*, ed. S. Chmielewski, Chodzież 1998, p. 31; T. Wujewski, *Zamek w Chodziesza*, Chodzież 2005.

¹⁰ KZS, vol. 5, no. 1, p. 4; S. Chmielewski, *Od lokacji miasta do połowy XVII wieku (1434–1654)*, [in:] *Dzieje Chodziesza*, pp. 68, 70; Tomala Wlkp., pp. 161–162. The building was also called a castle in 1600, in the note about the dowry of Zofia Rostworowska among others in the castle in Chodzież by Jan Potulicki (Teki Dworzaczka, Regesty, 15784 (no. 1403) 1600), though based on the Polish register, it is not certain what form was used in the source.

¹¹ The remains of the factory of porcelain, which functioned until 1991, stand in the presumed location of the castle; S. Chmielewski, B. Dzieduszycka, *Początki Chodziesza*, p. 31. Currently, there is a supermarket on the terrain of the old factory, yet the building that was supposedly built on the remains of the castle was not torn down; R. Kabat, *Historia zabudowy Chodziesza*, p. 115

¹² MK 12, k. 69v: “In et super castro, opido et villa Iwanowicze” [=MRPS I, no. 794] – the note about the dowry of Jadwiga of Żelazna, wife of Bartłomiej Gruszczyński, among others in the castle (*castrum*) in Iwanowice. See also Tomala Kal., p. 98. Other mentions, e.g., AP Poznań, Księgi ziemskie, 19, ff. 496v–497r (“castrum et fortalitium Iwanowicze”; 1514), where the castle burgrave is also referenced.

¹³ “– pro violenta repercussione castrum in Iwanowicze et caminate superioris ibidem in castro, ubi prefatus venerabilis dominus Joannes depositum habuit”; AP Poznań, Księgi ziemskie, 19, f. 446r. See A. Wyczański, *Uwagi na temat dworu szlacheckiego w Wielkopolsce w XVI stuleciu*, „Kwartalnik Architektury i Urbanistyki”, vol. 24, 1979, no. 4, pp. 353–354.

¹⁴ L. Kajzer, *Wstęp do badań nad siedzibami obronnymi Kaliskiego (uwagi na marginesie zakończenia edycji Inwentarza dóbr szlacheckich powiatu kaliskiego)*, KHKM, vol. 32, 1984, no. 3, pp. 400, 403, where the author treats the building in Iwanowice as an ordinary sixteenth-century manor made of masonry, belonging to the aspiring class of nobility holding clerical offices. Unfortunately, this building is not mentioned in A. Szymczakowa, *Szlachta sieradzka w XV wieku*, Łódź 1998, p. 397, in which the author wrote about the initiatives of the Gruszczyński family (primarily of the archbishop of Gniezno, Jan Gruszczyński) in Iwanowice, mentioning the masonry church, near which the office of the provost and the college of mansionaries, as well as the hospital of the Holy Spirit, were built. No clues were also given by Z. Górczak, *Kariery majątkowe rodzin aspirujących do kręgu elity możnowładztwa wielkopolskiego w drugiej połowie XV i początkach XVI w.*, Poznań 2013, pp. 83–135 (chapter about the Gruszczyński family), who mostly focused on the activities of the Gruszczyński family in regard to revenues of the land estate. The most extensive discussion of the activity of the archbishop Gruszczyński in the region was presented by

sixteenth century.¹⁵ Based on the information provided, we decided to place the castle in Iwanowice on the main map, though we are aware that it was probably a small structure, which may have resembled in size some of the other residential and defensive buildings that we decided to not include.¹⁶ The inspection of royal properties from the 1560s named the residence of the starosta in Rogoźno (Poznań district) as a manor,¹⁷ even though sources from the fifteenth century as well as the inspection from the seventeenth century call it a castle.¹⁸ While in the fifteenth century, this building was referred to as a *castrum* and *fortalitium*, the inspection of the starosta's district from 1631 clearly indicates that the castle – as it was defined in the source – was “newly built” by Michał Sokołowski of Warzymowo, the starosta in the years 1583–1619.¹⁹ Some scholars link these changes (or reconstruction) made to the building with the raid conducted by the Potulicki, Grudziński and Kaczkowski families in 1581.²⁰

A brief explanation must be offered about two castles marked on the map: Zbąszyń (Kościan district) and Gniezno (Gniezno district).

In the second half of the sixteenth century, Abraham Zbąski, the owner of Zbąszyń, began reconstructing the old defensive building (frequently referred to as a *fortalicium*). Before he died in 1577, he presumably was able to build a four-sided brick tower that later became part of the fortress in the *palazzo in fortezza* style, constructed by Abraham Ciświcki in 1627.²¹ Although the final shape of the building was only attained in the first half of the seventeenth century, it appears that in the second half of the sixteenth century, the building already fulfilled the criteria required to be included in the main map.²²

The construction of the sixteenth-century castle in Gniezno, located by Lake Jelonek, was originally started by Jan Łaski in 1518. During his lifetime (the archbishop died in 1531), a masonry residential house and other unspecified buildings were erected. The older royal complex, located on the Lech Hill

I. Skierska, *Ad fratres et nepotes secundum carnem totus intensus. Późnośredniowieczny biskup polski wśród krewnych*, [in:] *Fundamenty średniowiecznej Europy*, ed. Ż. Szyłc et al., Pelplin 2013, pp. 261–265.

¹⁵ In 1532, Piotr Koźmiński mortgaged a fourth of the town of Iwanowice with the castle, suburb and village for 700 Polish złote. Two years later (1534), Jan Koźmiński exchanged with Piotr Koźmiński, among others, the castle in Iwanowice. In 1567, Jan Koźmiński from Iwanowice, the master of the hunt of Kalisz, sold “his castle in Iwanowice with a pond surrounding it” together with the part of the town that belonged to him and a suburb to Dobrogost Potworowski, general deputy (Pol. *podśudek*) of Kalisz. In 1588, Paweł Potworowski bequeathed a debt to his wife Katarzyna Nasięgniewska at the Iwanowice castle, the square, the gardens, the ditch and the pond; Teki Dworzaczka, *Regesty*, 2788 (no. 4 inser. and res.) 1532, 7158 (no. 1393) 1534, 4451 (no. 3) 1567 and 1299 (no. 6) 1588.

¹⁶ Perhaps – this is only a research hypothesis – the castle in Iwanowice can be associated with the foundations of defensive structure that appeared in the fifteenth and sixteenth centuries in the family estates of Polish Church hierarchs. In that case, the building in Iwanowice would be another example of the activity of fifteenth-century Polish bishops, which has been noticed in sources (in the case of Iwanowice, this would have been the archbishop of Gniezno, Jan Gruszczyński). These bishops are seen to erect castles thanks to their obtained benefice and an often-temporary increase in the importance of the family. Such castles include Gosławice (Konin district), Borysławice Zamkowe (Łęczycza district), Jastrzębiec (Wiślica district), Rytwiany (Sandomierz district) and Oporów (Orłów district). At the beginning of the sixteenth century, the bishop of Poznań, Jan Lubrański, together with his brother Mikołaj Lubrański, founded another such building in his hometown of Lubraniec, which was referred to both in sources and in scholarship as a *fortalicja* or a manor, and – finally – a little later, the castle of the archbishop of Gniezno, Maciej Drzewicki, was built in Drzewica (Opoczno district); L. Kajzer, *Szesnastowieczne „fortalicjum” wojewody poznańskiego Mikołaja Lubrańskiego w Lubrańcu na Kujawach*, SMDWP, vol. 18, 1991, no. 2, pp. 57–77; J. Pietrzak, *Prywatne zamki biskupów polskich w pierwszej połowie XV wieku*, [in:] *Oporów. Stan badań. Materiały sesji naukowej zorganizowanej z okazji 50. rocznicy Muzeum w Oporowie 22 listopada 1999 roku*, [ed. G. Kin-Rzymkowska, U. Kowalska, A. Majewska-Rau], Oporów 2000, p. 111; *Leksykon*, pp. 160–163.

¹⁷ LWWK 1564, pp. 47–48. Perhaps when writing about the “manor” (Pol. *dwór*) of Rogoźno, the definition of the word manor was the one that included the complex of both residential and farm building.

¹⁸ K. Górską-Gołańska, *Rogoźno – starostwo*, [in:] SHGPoz, part IV, pp. 123–124; LWWK 1628, p. 79; see also J. Łojko, *Od początku XVI wieku do końca Rzeczypospolitej szlacheckiej*, [in:] *Dzieje Rogoźna*, ed. Z. Boras, Poznań 1993, pp. 69–70. J. Tomala (Tomala Wlkp., p. 313) names the building a castle.

¹⁹ LWWK 1628, p. 79; K. Chłapowski, *Starostowie w Wielkopolsce, na Kujawach i Mazowszu 1565–1696 (materiały źródłowe)*, Warsaw 2007, p. 40.

²⁰ Teki Dworzaczka, *Regesty*, 8970 (no. 936) 1581; J. Pietrzak, *Zamki i dwory obronne*, p. 129, footnote 1244. This author as well (pp. 128–129) calls the structure in Rogoźno a castle.

²¹ *Leksykon*, p. 561; J. Pietrzak, *Zamki i dwory obronne*, p. 38; Tomala Wlkp., pp. 376–377; Z. Chodyła, *Zbąszyń w czasach nowożytnych (1501–1793)*, [in:] *Dzieje Zbąszynia*, ed. K. Rzepa, Poznań 2014, pp. 105, 124–126.

²² It must be added that in 1571, Abraham Zbąski bequeathed 3,000 Polish złote to his wife Dorota from Opalenica. Polish zlotys, among others at the Zbąszyń castle; Teki Dworzaczka, *Regesty*, 11066 (no. 1398) 1571. It is difficult, however, to establish based on a Polish register prepared by W. Dworzaczek how the building was referred to in the source.

near the Church of St. George, was given by Casimir Jagiellon to the Church in Gniezno in 1457. Later, the cathedral vicars used its rooms for their own purposes.²³

Szamotuły presents an interesting scenario, where – due to the ownership divisions of the town in the second half of the sixteenth century – two castle structures existed, one belonging to the Świdwa family (south of the town) and the second to Górka family (north of the town).²⁴

We did not include certain buildings on the map, even though they were referred to as castles in scholarship. Some of them did already exist in the fifteenth century but lost their castle nature in the sixteenth century and were abandoned. Others were called castles at the time yet did not fulfill the present-day criteria required for a building to be classified as such. We did not mark the castle of the archbishops of Gniezno in Kamień in the Nakło district. The sixteenth-century inventories of the archbishopric estates repeatedly name the building as a *curia*.²⁵ The structure in Kamień was also called a *fortalicium* in the exemption from Jan Krowicki's war expedition in 1513.²⁶ It seems likely that the archbishops' castle from the late medieval period, which was destroyed numerous times during the wars with the Teutonic Order, was never reconstructed in its previous form once the fighting stopped in the latter half of the fifteenth century.²⁷ Similarly, in the Kcynia district, we did not include the castle in Wenecja. This castle built by Mikołaj of Chomiąza in the fourteenth century, purchased in 1420 by Mikołaj Trąba, the archbishop of Gniezno, was taken apart in the 1470s on the order of the archbishop Jakub of Sienno. The material from which the castle in Wenecja was built was used to repair the archbishops' manor in Żnin.²⁸ In the Kcynia district, we also did not mark two other buildings, one in Danabórz and the other in Smogulec. The castle in Danabórz, which was the seat of the influential Danaborski family in the fifteenth century, was abandoned at the end of the century when the family moved their residence to Krajenka.²⁹ On the other hand, during the fourteenth and fifteenth centuries, the stronghold located in Smogulec was the residence of the Smogulecki family; however, it probably functioned only until the end of the fifteenth century.³⁰ The manor located in the cluster of royal estates in Pobiedziska in the Gniezno district is also sometimes called a castle in scholarship. Nonetheless, it is certain that in the sixteenth century, this building did not have the features of a castle, even if it may have had them in the late medieval period.³¹ Some scholarly works mention a castle in Krotoszyn in the Pyzdry district. It was most likely a wooden manor, which in 1585 was renovated by Jan Rozdrażewski to incorporate masonry elements.³² Town sources connected to Pleszew in the Kalisz district suggest that the building, which was the residence of the owners of the town, was

called a castle.³³ In turn, the construction in a different part of the Kalisz district, specifically Chodecz (Chocz), appeared to be a masonry defensive manor rather than a castle. It had been assumed that the construction of the castle in Chodecz was initiated by Casimir III the Great but was not completed during his lifetime. Currently, the complex is treated as a masonry defensive manor,³⁴ which probably remained in this form until the decision of the owners of the town at the time, the Lipski family, to turn it into a baroque palace in the eighteenth century.³⁵ The manor in Chodecz was also mentioned in the contracts establishing the lease and mortgage of the town in 1592 and 1619.³⁶ A masonry manor (sometimes called a “stone house”, Pol. *kamienica*) built in Dobrzyca in the sixteenth century in the Kalisz district, which resembled the castles in Gołuchów and Koźmin in terms of architecture, was not included as a castle.³⁷

Similar mentions of seats and residences of the nobility from the Poznań Voivodeship, which are difficult to unambiguously interpret, are probably numerous in the court books from that area. Many such examples can be found in the SHGPoz. On their basis, it can be asserted that there were numerous structures called *castrum* in the fifteenth century within the administrative borders of the Poznań Voivodeship, which we have not included on the map. Instead, we classified them as a defensive manor, sometimes very expansive ones.³⁸

The structure in Ujście requires an additional explanation. It seems that at the beginning of the sixteenth century, it already did not present any functional value. The building mentioned several times in the fifteenth century (as a *castrum* and a *fortalicium*)³⁹ was supposedly built by Hieronim Mosiński, which was stipulated by the king in 1512, confirming his ownership of the Ujście starosta's district.⁴⁰ The inspection from the 1560s mentions a tower located on a hill behind the starosta's manor, which the aforementioned Mosiński did in fact begin to erect. It appears, however, that the endeavour was continued by the following starostas.⁴¹

Some of the castles from the end of the sixteenth century most likely were in such a state of disrepair that they were abandoned. These include, among others, the buildings in Wałcz and Koło. In the case of the Wałcz castle, it burned down several times in the fifteenth and early sixteenth century, at some point the town simply decided to no longer reconstruct it and moved the residence of the starostas to a new place.⁴² On the other hand, the castle in Koło was supposed to be unoccupied in the second half of the sixteenth century, but evidence suggests that it may have in fact been in use until the second half of the sixteenth century and the beginning of the seventeenth century.⁴³

³⁵ Tomala Wlkp., pp. 160–161.

³⁶ *Inwentarze dóbr szlacheckich powiatu kaliskiego*, vol. 1: *Od XVI do połowy XVIII w.*, ed. W. Rusiński, Wrocław 1955, p. 54 (“a manor with a malt house and with all manor amenities”), 79 (“a mill near the manor house”); see Tomala Kal., p. 66, for information about the note from 1629 concerning the *castrum* in Chocz.

³⁷ R. Kašinowska, *Dobrzyca. Fortalicja – pałac – muzeum*, Dobrzyca [no date], pp. 21, 23; see also: L. Kajzer, *Wstęp do badań*, p. 403; Tomala Kal., pp. 72–75.

³⁸ We are specifically referring to the buildings in the following settlements in the Poznań Voivodeship: Gostyń, Górka Miejska, Kopanica, Książ, Oborniki, Obrzycko, Pczew, Poniec, Popielewo, Sarnowa, Stęszew, Trzciel. Additionally, Niepart and Włoszakowice should be included; L. Kajzer, *Małe czy duże*, pp. 115, 127.

³⁹ T. Jurek, *Ujście – starostwo*, [in:] SHGPoz, part I, pp. 440–441.

⁴⁰ MK 25, k. 154r: „Ita tum, quod castrum ipsum Usczye construat et edifi ciet et construere sit obligatus” [=MRPS IV/1, no. 1505]. J. Tomala (Tomala Wlkp., p. 350) believes that the pledge was about a fortified manor house rather than some kind of castle structure.

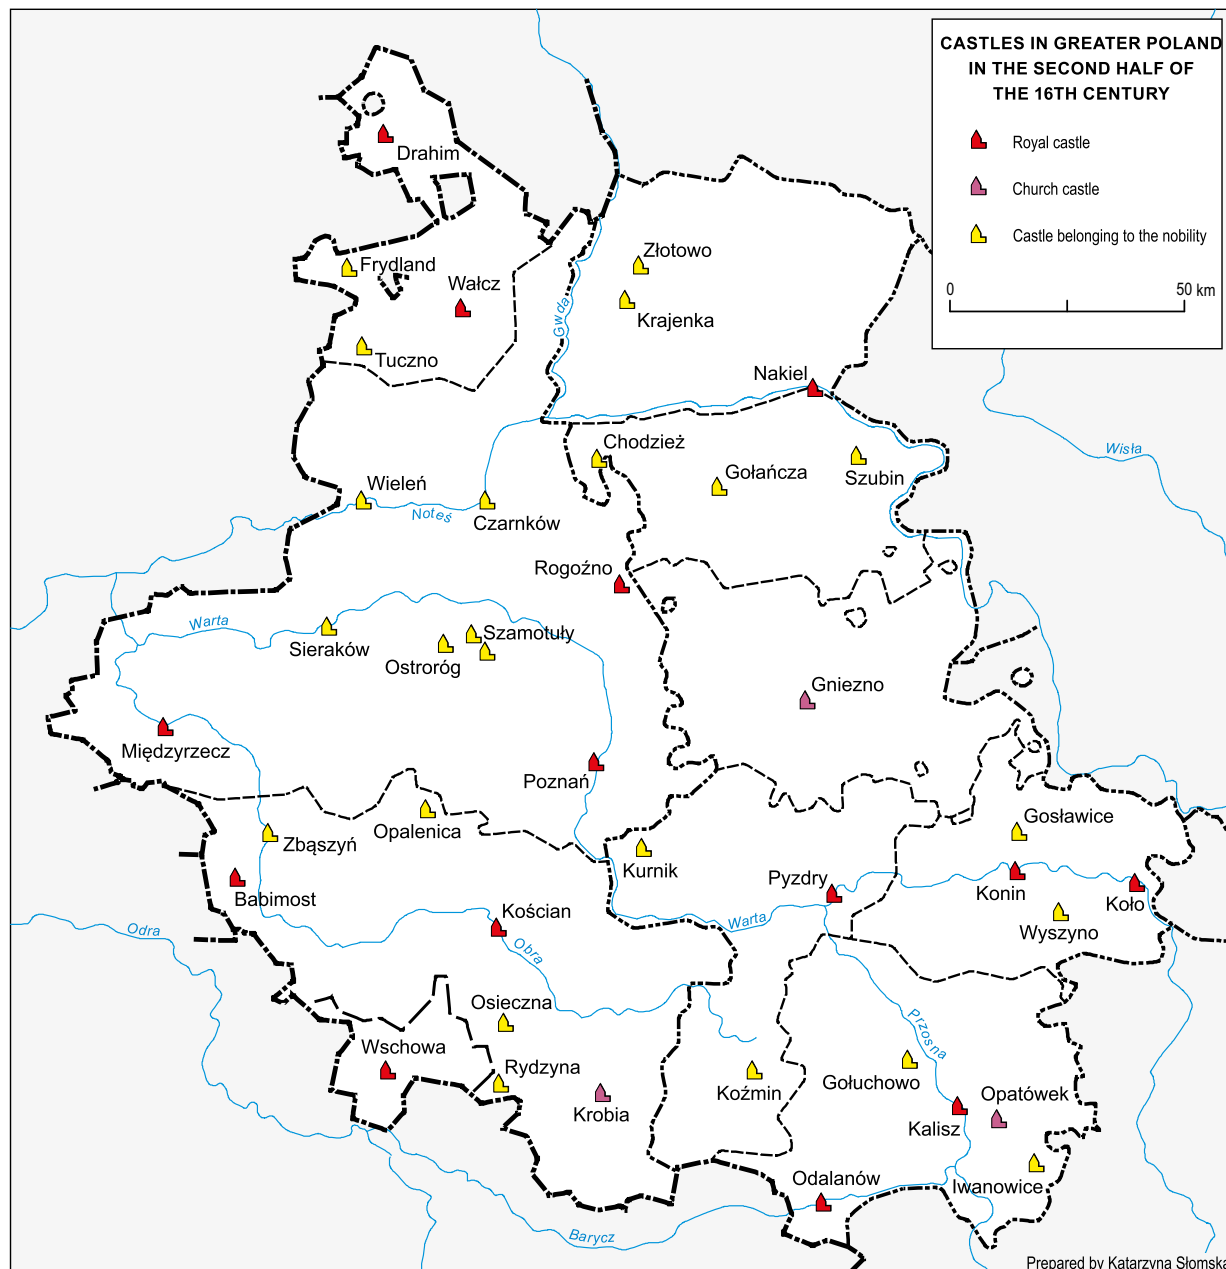

⁴¹ LWWK 1564, p. 24; J. Pietrzak, *Zamki i dwory obronne*, p. 47. Idem in his earlier work (*Zamki państwowe*, p. 153) stated, that the castle in Ujście was taken apart at the beginning of the seventeenth century.

⁴² K. Górka-Gońska, T. Jurek, *Wałcz – starostwo*, [in:] SHGPoz, part V, no. 3, p. 497. The fires in Wałcz were noted in the years 1520, 1563, 1577 and 1584; eidem, *Wałcz*, [in:] SHGPoz, part V, p. 494. In the inventory of the Wałcz starosta's district from 1619, created at the time of passing on the district as a lease to Mikołaj Nieborowski by Jan Gostomski, the starosta of Wałcz, the building is described as a manor by the author of the inventory.

⁴³ *Leksykon*, p. 226; see: J. Pietrzak, *Zamki i dwory obronne*, p. 49; T. Olszacki, *Zamek w Kole w świetle wyników badań archeologicznych (1977–1983) i nowych interpretacji*, [in:] *Królewskie miasto Koło. Studia w 650. rocznicę lokacji miasta*, ed. I. Skierska, Koło 2012, pp. 106–111, who treat the description from the inspection of 1616–1620 as evidence of the use of the castle in Koło.

In Greater Poland, the castle in Drahim (Stary Drawsk) was a separate settlement unit and the residence of the starosta of the Drahim district.⁴⁴ The castle in Koło was also located further from the town, which is why we also treated it as a separate settlement unit.⁴⁵

In total, we identified 40 castles in the territory we studied.

Map 1. Castles in Greater Poland in the 16th century

⁴⁴ Only the bawn, where the Drahim farm was located, was associated with the castle in Drahim; LWWK 1564, pp. 20–21.

⁴⁵ We understand the castle in Koło to be a distinct settlement unit due to its distance from the town (about 1.5 km). We are aware that the residences were often built at a distance from other settlements (Z. Morawski, *Miejskie układy przestrzenne*, [in:] *Architektura gotycka w Polsce*, p. 36; R. Grygiel, *Curia cum fortalicio (dwór i wieża obronna) podstawą układu rezydencjonalnego późnośredniowiecznej siedziby rycerskiej w Wielkopolsce*, [in:] *Rezydencje w średniowieczu i czasach nowożytnych*, ed. E. Opaliński, T. Wiślicz, Warsaw 2001, p. 206), but usually this distance was not as big.

In the Poznań Voivodeship, these were (in order to highlight the ownership, we used the following abbreviations: n – nobility, r – royal, c – Church):

- In the Wałcz district:
Drahim (Stare Drawsko) (r),⁴⁶ Frydland (Mirosławiec) (n),⁴⁷ Tuczno (n),⁴⁸ Wałcz (r);⁴⁹
- In the Poznań district:
Czarnków (n),⁵⁰ Międzyrzecz (r),⁵¹ Ostroróg (n),⁵² Poznań (r),⁵³ Rogoźno (r),⁵⁴ Sieraków (n),⁵⁵ Szamotuły (n – Świdwa family), Szamotuły (n – Górka family),⁵⁶ Wieleń (n);⁵⁷
- In the Kościan district:
Babimost (r),⁵⁸ Kościan (r),⁵⁹ Krobia (c),⁶⁰ Opalenica (n),⁶¹ Osieczna (n),⁶² Rydzyna (n),⁶³ Zbąszyń (n);⁶⁴
- In the Wschowa district:
Wschowa (r).⁶⁵

In the Kalisz Voivodeship these were:

- In the Nakło district:
Krajenka (n),⁶⁶ Nakło (r),⁶⁷ Złotów (n);⁶⁸
- In the Kcynia district:
Chodzież (n),⁶⁹ Gołańcz (n),⁷⁰ Szubin (n);⁷¹

- In the Kalisz district:
Gołuchowo (n),⁸⁰ Iwanowice (n),⁸¹ Kalisz (r),⁸² Odolanów (r),⁸³ Opatówek (c).⁸⁴

In the Poznań Voivodeship, we localized 21 castles, in the Kalisz Voivodeship – 19. Over Remove the comma half (23, which is 58%) belonged to the nobility, 14 were found in the estates of the king (35%) and three (8%) were owned by the bishops of Greater Poland (archbishops of Gniezno in Gniezno and Opatówek, the bishop of Poznań in Kroba). Most of the castle structures (35, so 87.5%) functioned near towns. Only the castles in Gołuchowo, Gosławice and Wyszyno (all in the south-eastern part of the Kalisz Voivodeship) were located near rural settlements. We already discussed the two castles located away from town and treated as separate settlement units.

At the end of the sixteenth century, 11 abbeys existed in the area we studied; they were marked on the main map, also in instances when they were not separate settlement units.⁸⁵ In the Poznań Voivodeship, in the Poznań diocese, abbeys were located in Lubiń (Benedictines), Bledzew, Obra, Owińska (female), Paradyż, Przemęt (all five Cistercians) – together there were six.⁸⁶ In the Kalisz Voivodeship, in the Gniezno diocese, there were five abbeys: Benedictines in Mogilno, Cistercians in Łąd, Ołobok (female) and Wągrowiec, canons regular in Trzemeszno.⁸⁷ All the abbey monasteries were located further away from settlements, to which they were connected: the exceptions were the abbeys and monasteries of the Cistercians in Łąd (Konin district) and Paradyż (Gościkowo; Poznań district).

III.3.2.5 SIERADZ AND ŁĘCZYCA VOIVODESHIPS

Krzysztof Chłapowski

While working on the character and size of the settlements we followed the same rules that accompanied our work on the previous maps from this series.¹ We have therefore distinguished:

- Centres of state administration, i.e. of voivodeships, lands and districts (See State administration borders),²
- Centres of Church administration, i.e. archdeaconries, deaneries and parishes (see Church administration borders),³
- Towns and villages with their size,
- Mills, ironworks and demesnes that were given their own name, localized for certain as separate settlements,
- Castles in towns and villages.

All these signs have been described in the key to the map. We have established, that in the second half of the sixteenth century there were no glass works or mines that would have their own name.⁴

The list of mills marked on the map goes as follows:

In Łęczyca Voivodeship:

- In Łęczyca district: Borowiec, Rudny;
- In Brzeziny district: Chachuła, Chrapek, Konewka, Krępa, Kulan, Lamus, Laskowski, Pluskwa, Ruchna, Spała;

In Sieradz Voivodeship:

- In Sieradz district: Ciągnisz, Czartek, Czekaj, Grzybek, Jaryszek, Karśnia, Kiełbaska, Kolasa, Koszatka, Lipka, Lisek, Szłop;
- In Szadek district: Księży Młyn, Łetowski, Malczewski;
- In Piotrków district: Borowiec, Bugaj, Depczyk, Dziewuliny, Franek, Kocielek, Mąka, Wierzchny, Zbyszek;
- In Radomsko district: Barycz, Borowy, Dąbrowa, Dobra, Olszyński, Osty, Ruda, Soczewka, Stępka, Wójcik, Wójtowski
- In Wieluń district: Bezula, Drab;
- In Ostrzeszów district: Czyżowski, Drożdżyny, Korpys, Krok, Kuźnica Bobrowska, Mysłaki, Niesób, Smolny.

² Cf. H. Rutkowski, *Granice państwowych jednostek terytorialnych*, [in:] AHP Sieradz, in this edition III.2.1.5.

³ Cf. idem, *Granice administracji kościelnej*, [in:] ibidem, in this edition III.2.2.5.

⁴ In the inventories of Church property of Cracow chapter in the first half of the sixteenth century we find the following mentions: in 1508 villa vitreatorium, 1516 vitreatorium alias Huta, in 1531 Huta fuit officina vitreatoria (SPPP, vol 12, pp. 448, 459, 477 f.). Later only a village Huta appears (Brzeziny district). In the inventories of the property of Cuyavia bishopric from 1534 and 1568 we find mentions about the existence of glass works near Łaznowo in Brzeziny district (Inv. 1534, p. 66 f.); in the tax register of Piotrków district from 1577 there is a 'huta szklana' ('glass works') mentioned by Dłutów (ASK I 25, f. 262). The glass works lying several kilometres from the village later developed into village called Huta Dłutowska.

We have localized only eight ironworks,⁵ all in Sieradz Voivodeship:

- In Sieradz district: Kuźnica Brąszowska and Kuźnica Klobar;
- In Szadek district: Ruda;
- In Piotrków district: Kuźnica, Kuźnica Lubiecka;
- In Radomsko district: Dąbek;
- In Wieluń district: Kuźnica Skakawska;
- In Ostrzeszów district: Kuźnica Kraszowicka.

We have marked the following demesnes that had their own name:

- In Łęczyca Voivodeship: Wójciki (in Łęczyca district);
- In Sieradz Voivodeship: Baszków, Cienia Mała, Garbów, Kociaty, Kołowa, Noski (in Sieradz district), Sepułki, Ubysław (in Szadek district), Dzieciarty (in Piotrków district), Cisów (in Wieluń district).

The only inn with its own name localized, Żeglina, lay in Sieradz district.

The villages were inhabited, apart from their owners, by serfs, hortulani and landless peasants. Only a small part of the population held a profession not related to agriculture (rural crafts and trade). It must be stated here, that the tax registers from Sieradz Voivodeship contain relatively little information, so the assessment of the diversity of the inhabitants can be formulated only on the basis of the materials related to Łęczyca Voivodeship and information from inspections of crown property and inventories of the property of the Church. Now, the number of villages in Łęczyca Voivodeship inhabited by a higher number of craftsmen did not exceed twenty.⁶ When it comes to villages of specific vocational structure, eight villages in Sieradz and Szadek districts must be listed: these villages (gentry and archbishopric) were inhabited only by fishermen. This explains the fact, that some of them are absent from tax registers.⁷

As in previous volumes of this series, as towns were treated settlements that paid the municipal tax ('szos'), both: those for which we know the town charter, and those whose charter we do not know. We have included towns that existed in the second half of the sixteenth century, i.e. those settlements that certainly or probably were towns at that time, while we have disregarded those settlements, whose town character was evidently unstable, temporary (failed locations) and those, that were not located despite being granted the charter (unrealized locations).

Here follows the list of towns in Łęczyca and Sieradz Voivodeships in the second half of the sixteenth century, along with the category of ownership (r – royal, c – Church, n – nobility) and – in specific cases – present name:

Łęczyca Voivodeship:

- Łęczyca district: Budzynek (n), Dąbie (r), Grabowo (n), Grzegorzewo (c), Kazimierz (c), Kłodawa (r), Krośniewice (n), Łąkoszyn (n), Łęczyca (r), Parzynczów (Parzęczew –n), Piątek (c), Poddąbice (n), Zgierz (r);
- Brzeziny district: Będków (n), Bratoszewice (n), Brzeziny (n), Inowłódz (r), Łodzia (Łódź –c), Skoszewy (n), Stryków (n), Ujazd (n);
- Orłów district: Bielawy (n), Oporów (n), Orłów (n), Sobota (n), Żychlin (n).

Sieradz Voivodeship:

- Sieradz district: Burzenin (n), Dobra (n), Sieradz (r), Staw (n), Szczerców (r), Turek (c), Warta (r), Widawa (n), Zamysłów (Dobra – part, n);
- Szadek district: Buczek (n), Lutomirsko (Lutomiersk –n), Łasko (Łask –n), Pabianice (c), Szadek (r), Uniejów (c);

⁵ There was a number of ironworks in villages as well. B. Zientara, *Dzieje małopolskiego hutnictwa żelaznego w XIV–XVII wieku*, Warsaw 1954, p. 280, listed the ironworks in Wieluń district in the appendix, and we were able to identify and localize one of them. In Sieradz and Łęczyca Voivodeships there is much less iron ore, crucial for the existence of ironworks, than in Sandomierz Voivodeship.

⁶ For instance, in Sokołów in Zgierz parish there were 12 craftsmen (P. Wielkopolska, vol. II, p. 63), in Chełm in its own parish – 12 fishermen, in Lubocheń Wielki in its own parish – three sellers, seven craftsmen, two butchers, four brewers, in Sadykierz in Rzeczyca parish – six sellers and four craftsmen.

⁷ Wielgiłak, Brzozówka, Kozubów, Sarbice, Kawieczyno, Welszczyce, Boczek, Zaspy (Łaski LB, I, p. 345; Ulanowski, *Visitationes*, p. 239; J. Topolski, *Rozwój latyfundiów arcybiskupstwa gnieźnieńskiego od XVI do XVIII w.*, Poznań 1955, p. 80; P. Wielkopolska, vol. II, pp. 184, 405).

- Piotrków district: Grocholice (c), Piotrków (r), Rozprza (n), Rzgów (c), Sulejów (c), Tuszyn (r), Wolbórz (c);
- Radomsko district: Brzeźnica (Nowa Brzeźnica –r), Kamieńsko (n), Nowopole (Konicopol –n), Pajęczno (r), Pławno (n), Radomskie (Radomsko –r), Żytne (Żytno –n);
- Wieluń district: Bolesławiec (r), Działoszyn (r), Kamion (Kamień –r), Lututów (Lututów –n), Osjaków (n), Praszka (n), Toporów (cn), Wieluń (r), Wieruszów (n), Wodziezna (n);
- Ostrzeszów district: Baranów (n), Borek (r), Grabów (r), Kobyla Góra (n), Mikstat (r), Ostrzeszów (r).

In the wake of the sixteenth century there were – according to Roman Szczygieł – 68 cities in the territory of our study.⁸ At the end of this century – according to our research – 72. It must be noted that we have not included Goraj and Kałów (listed by R. Szczygieł) in the end of the sixteenth century list, because the last time they were mentioned along with the term ‘oppidum’ is in Łaski’s *Liber beneficiorum*.⁹ We have not counted towns Brus, Gieczno (unsuccessful locations),¹⁰ Nowy Dobrzelin and Nakielnica (unrealized locations)¹¹ and also Chełm (unsuccessful or only planned location).¹² All these settlements lay in Łęczyca Voivodeship. In Sieradz Voivodeship, however, there was Małyń, whose location was also unsuccessful. In 1549 Marek Łubnicki was granted a privilege to transform this village into town, and in 1551 people in surrounding towns were encouraged to inhabit this village.¹³ The efforts, however, must have brought no results, as in registers from 1552–1576 Małyń appears as a village, as well as in inspections from 1635–36 and 1683.¹⁴ That is why the information that in parish registers from the local parishes around 1654 Małyń was described as town¹⁵ should be treated as an inaccuracy of the source, if it is not a mistake of the first informer.

In the course of the sixteenth century the number of towns in the area described in this volume was increased by 6.¹⁶ As convincingly proven by R. Szczygieł, the realization of the town charter of Rzgów from 1467 did not begin until 1505.¹⁷ In 1544 Stanisław Przerębski, the Sieradz Pantler, was allowed to transform his village Pławno in Radomsko district into a town.¹⁸ In 1546 Jan Russocki, (the Kalisz Sword-bearer) was granted the privilege to transform his village Długa into a town named Niezamyśl.¹⁹ Długa was situated by the town Dobra to the west, whereas Russocki located his city on the south-eastern side of Dobra, and changed its name to Zamysłów. In 1550 the archbishop issued an act of erection of the church in Zamysłów, and in 1563 there were eight craftsmen in ‘Niemysłów’ and it paid the town tax. Soon afterwards the place lost the character of a separate town and became a part of Dobra.²⁰

⁸ Szczygieł, p. 22, lists 31 towns in Łęczyca Voivodeship and 39 in Sieradz Voivodeship (70 in total), but Głowno and Łęgonice must be removed from the number of towns in Łęczyca Voivodeship, as the first one was situated in Rawa Voivodeship and the second one in Sandomierz Voivodeship.

⁹ *Ibidem*; Łaski LB, II, pp. 371, 435; also R. Rosin, *Studia z dziejów dawnych miast województw łęczyckiego i sieradzkiego (XII–XVI w.)*, „Sprawozdania z Czynności i Posiedzeń Łódzkiego Towarzystwa Naukowego”, vol. 14, 1959, pp. 1–12 and *Miasta regionu łódzkiego. Próba periodyzacji dziejów*, „Region Łódzki. Studia i Materiały”, 1971, p. 128 failed to find any source information.

¹⁰ Szczygieł, pp. 39, 214 f., see also A. Tomczak, *Zarys dziejów parafii Gieczno do roku 1939*, Toruń 1997, pp. 82 f.

¹¹ Szczygieł, pp. 38, 215.

¹² Łaski LB, II, p. 442 call Chełmno a town only once, in the introduction to the description of this parish, apart from that, there are no other references to the town character of this settlement, contrary to e.g. Kałów or Goraj (*ibidem*, p. 373, 435); see Szczygieł, pp. 38 f., 214 f.

¹³ Szczygieł, pp. 40, 216.

¹⁴ AGAD, I, 25, f. 665; 26, f. 825; P. Wielkopolska, vol. II, p. 236; Librowski, *Repertorium*, part 1, no. 1, pp. 136, 147.

¹⁵ This information, obtained from Roman Kaczmarek was given by R. Rosin, *Pabianice w XV i XVI wieku*, [in:] *Dzieje Pabianic*, ed. G. Missalowa, Łódź 1968, p. 32.

¹⁶ Against Szczygieł’s suggestions on p. 41 f., 117 f., 330, we did not include Nowe Miasto near Pabianice, because the 1553 document only added new building plots and a new market square to the existing city, but did not create another town commune near Pabianice, that would have its own authorities, see M. Baruch, *Pabianice, Rzgów i wsie okoliczne. Monografia historyczna dawnych dóbr Kapituły Krakowskiej w sieradzkim i łęczyckim*, Warsaw 1903, pp. 161–164, 341, 347; J. Goldberg, *Dzieje Pabianic w XVII i XVIII wieku*, Warsaw 1990, pp. 7 f.

¹⁷ Szczygieł, pp. 40 f., 167, 217.

¹⁸ MRPS IV, no. 21508; see Szczygieł, pp. 39, 166, 217.

¹⁹ MRPS IV, no. 7568; Szczygieł, pp. 39 f., 167, 216 f.

²⁰ The poll register from 1662 mentions ‘Dobra et Zamysłów’ (ASK I 74, f. 281v). the location of Zamysłów is shown on Perthées’s map and on Gilly’s map. The church (chapel) of St. John outside the town Dobra appears in inspection from 1635–1779. Rybus, p. 177 (two mentions); P. Wielkopolska, vol. II, p. 209; Librowski, *Repertorium*, part 1, no. 1, pp. 140, 179; Librowski, *Repertorium*, part 4, p. 88.

The acts of location of Buczek in Szadek district come from 1549 (Buczkwowscy).²¹ Wodziejna in Wieluń district (property of the nobility) was mentioned in 1570 as a town, and in 1670 and later it appears as village.²² We assume that at the end of the sixteenth century it was (temporarily) a town. In the second half of the sixteenth century Zborowscy placed the town Borek right by Ostrzeszów, probably in an earlier uninhabited area. In 1591 Borków became Crown property ('frymark').²³

In order to determine the size of towns (number of burghers) we used tax registers from the sixteenth century, Crown property inspections from three periods (1564/5, 1616–20, 1628–32), Church property inventories, poll tax registers from the seventeenth century (comparatively)²⁴ and studies. We based our evaluation on the number of houses, and if the number of houses was not known – the number of craftsmen.²⁵ We used the same division into size categories as in the commentaries to the maps of Mazovia and Sandomierz Voivodeship, and the same conversion rate as in Sandomierz Voivodeship (average nine persons per one house).²⁶

The results of our calculations of town size brought the following results: 18 out of 72 towns in the territory had more than 1,000 burghers (these were marked as cities on the map). These were: Kłodawa,²⁷ Łęczyca²⁸ and Piątek²⁹ (Łęczyca district), Brzeziny³⁰ (Brzeziny district), Sieradz,³¹ Warta³² (Sieradz district), Łask,³³ Pabianice,³⁴ Szadek,³⁵ Uniejów³⁶ (Szadek district), Piotrków (see III.2.2.2),³⁷ Rzgów,³⁸ Tuszyn³⁹ and Wolbórz⁴⁰ (see III.2.2.2) (Piotrków district), Brzeźnica⁴¹ and Radomsko⁴² (Radomsko district), Wieluń⁴³ (Wieluń district), Grabów⁴⁴ (Ostrzeszów district). Perhaps

²¹ Szczygieł, pp. 39, 216.

²² Rosin, Słownik, pp. 177 f., Szczygieł passes over Wodziejna in silence.

²³ This town does not appear in tax registers. The act of the location is missing and earliest mentions come from the documents issued in relations to the ownership change (MK 136, ff. 37–38, 86–87); see Szczygieł, pp. 40, 215 f.

²⁴ About this sources see K. Chłapowski, *Źródła pisane*, [in:] AHP Sieradz.

²⁵ J. Wiesiołowski, *Sieć miejska w Wielkopolsce w XIII–XVI wieku. Przestrzeń i społeczeństwo*, KHKM, vol. 28, 1980, no. 3, p. 391 assumed the number of craftsmen as a basis for the classification of towns according to size around 150. As cities (large towns), counting 90–100 craftsmen, or more, in the area of our interest (map no. 5), he classified: Łęczyca, Piątek, Brzeziny, Kłodawa, Sieradz, Piotrków and Wieluń. For sake of comparison, it could be added that H. Samsonowicz (M. Bogucka, H. Samsonowicz, *Dzieje miast i mieszczaństwa w Polsce przedrozbiorowej*, Wrocław 1986, p. 155) divided the cities that existed around 1500 into four categories, according to size. He did not include any of the cities in Sieradz and Łęczyca Voivodeships in the first category, in second category he placed: Piotrków, Radomsko, Sieradz, Szadek, Uniejów, Warta, Wieluń and Wolbórz from Sieradz Voivodeship, and from Łęczyca Voivodeship: Brzeziny, Inowłódz, Łęczyca and Piątek.

²⁶ A. Dunin-Wąsowiczowa, *Character and size of settlements*, [in:] AHP Sandomierz, footnote 51, in this edition III.3.2.2.

²⁷ In 1616 there were 206 houses in Kłodawa, LWWK 1616, part 1, p. 227.

²⁸ In 1564/1565 there were 183 plots in the city and 134 in the suburbs LWWK 1564, part 2, p. 131.

²⁹ In the end of the sixteenth century there were 180 houses in Piątek, in the middle of the seventeenth century – 320 (Miasta polskie, vol. II, p. 64); S.M. Zajączkowski, *Zarys dziejów klucza piątkowskiego i tenuty zdunskiej arcybiskupa gnieźnieńskiego (do lat siedemdziesiątych XVI wieku)*, Acta Universitatis Lodzianis, Folia Historica, 29, 1987, p. 61 claims that in the sixteenth century Piątek had 900 inhabitants, without people related to the archbishop's manor.

³⁰ Around 1580 over 300 craftsmen worked in Brzeziny, mostly drapers (A. Mączak, *Sukiennictwo wielkopolskie w XIV–XVII wieku*, Warsaw 1955, pp. 245–253); T. Nowak informs, that in the middle of the sixteenth century there were 441 craftsmen in the city (T. Nowak, *Brzeziny. Dzieje miasta do 1995 roku*, ed. K. Badziak, Łódź–Brzeziny 1997, p. 63), and H. Żerek-Kleszcz, basing on the analysis of metrical registration claimed, that in the beginning of the seventeenth century the number of inhabitants could reach even 3800 (ibidem, p. 106).

³¹ 336 houses in 1628, LWWK 1628, part 2, p. 78.

³² 260 houses in 1616, LWWK 1616 part 1, p. 107; see K. Wiliński, K. Bryński, *Dzieje miasta Warty*, Warsaw 1984, p. 35.

³³ 147 houses burned in 1620; Miasta Polskie, vol. II, p. 52.

³⁴ 163 houses in 1606; M. Baruch, *Pabianice, Rzgów i wsie okoliczne*, pp. 162 f.

³⁵ 266 houses in 1616; LWWK 1616, part 1, p. 111.

³⁶ Around 1512 there were even 290 houses in Uniejów (Ulanowski, *Visitationes*, p. 227) but soon the role of archbishop's main residence was taken over by Łowicz (archdeaconry seat since 1522, there – beside Piotrków – the synods gathered), and so the golden era of Uniejów ended (J. Szymczak, *Uniejów do schyłku XVI wieku*, [in:] *Uniejów. Dzieje miasta*, ed. J. Szymczak, Łódź–Uniejów 1995, pp. 77, 95, 97 f.).

³⁷ See footnote 49.

³⁸ 247 houses in 1606; J. Goldberg, *Dzieje Pabianic*, p. 7.

³⁹ 153 houses in 1546/65; LWWK 1564, part 2, p. 41.

⁴⁰ See footnote 51.

⁴¹ 160 houses in 1628; LWWK 1628, part 2, p. 104.

⁴² 353 houses in the city and suburbs in 1616; LWWK 1616, part 1, p. 96.

⁴³ 133 craftsmen in 1563, P. Wielkopolska, vol. II, p. 309.

⁴⁴ 167 houses in 1628, LWWK 1628, part 2, p. 199.

Inowłódz⁴⁵ (Brzeziny district), Turek⁴⁶ (Sieradz district), Lutomiersk⁴⁷ in Szadek district exceeded the number of 1,000 burghers.

Brzeziny (see III.2.2.2),⁴⁸ Piotrków,⁴⁹ Sieradz⁵⁰ and Wolbórz⁵¹ should be distinguished. They were the biggest cities, with the number of burghers certainly exceeding 2,000.

Cities which were deemed not to exceed the number of 1,000 burghers were marked on the map as towns.

The following bigger cities belonged to the Church: Pabianice, Piątek, Rzgów, Turek, Uniejów and Wolbórz, and the following to the nobility: Brzeziny, Lutomiersk and Łask. The remaining were royal cities.

The size of rural settlements was established with the use of methodology similar to that used while working on this subject for the volumes on Mazovia and Sandomierz Voivodeship. Tax registers for Sieradz Voivodeship from the second half of the sixteenth century do not contain data necessary to calculate the rate specifying the number of serfs per lan. Thus, we have assumed the rates used for Mazovia and Sandomierz Voivodeship, i.e. 10 to 13 persons per serf lan, dependent on the number and size of sections. A higher rate was used for higher ownership fragmentation.⁵² We have also taken into consideration the fact that in Crown and Church property farms were bigger than in estates of the nobility and for these two types of property we have used (as in previous volumes) 10 persons for 1 serf lan rate. When it comes to the rate defining the number of people in a family, we assumed the one used for the map of Mazovia, i.e. four people in case of hortulani and landless peasants, five people for gentry and craftsmen families.⁵³ In the cases of villages belonging to farm gentry we have also used the same multiplier as in the case of Mazovia (11 people per lan). As farm gentry were quite numerous in the area described in this research, perhaps the source basis would allow to specify the multiplier in a more precise manner, but – it could be supposed – it would not be a significant verification and would not influence the list of settlements with more than 200 inhabitants.

Using the sources and the above-mentioned rates and multipliers we were able – after calculations – to indicate and mark on the map the following villages, that probably numbered more than 200 inhabitants:

- Łęczyca district: Błonie (n), Gaj (n), Grabowo – village (n), Kopy (n), Kościół (c), Krzepocino Wielkie (c), Ladorucz Wielki (c), Leszno Wielkie (n), Łęka (c), Mazowo (c), Mąkolice (c), Podgórzyce (c), Rdułtów (c), Sarnowo Wielkie (n), Słupeczka (cn), Sobota (r), Sokołowo (n), Topola (rn), Wiczkowice (rn);
- Brzeziny district: Będzelin (c), Brynica (r), Gałków (c), Glinnik (r), Królowa Wola (r), Kurowice (c), Lubocheń Wielki (r), Łaznowo (c), Popielawy (c), Rokiciny (c), Rzeczyca (r), Sadykierz (r), Siernia (n), Wiskitno (c);
- Orłów district: Bąkowo (c), Boguria (c), Borowo Wielkie (n), Dobrzelino (n), Łażniki (c), Łęki (n), Plecka Dąbrowa (n), Skrzyszewo Wielkie (n), Sobocka Wieś (n), Strugienice (n), Urzeczce (c), Wiskitnia (c), Zduny (c);
- Sieradz district: Brzeźno (n), Dąbrowa Wielka (n), Goszczonów (c), Grąbków (c), Jakubice (r), Klonowa (r), Luboła (r), Męka (r), Woźniki (r), Ziemięcino (n);
- Szadek district: Behcice (n), Borzewicko (n), Chocianowice (c), Rypułtówice (c) Wielenino (c);
- Piotrków district: Czarnocin (c), Gościmowice (c), Milejów (c), Podolin (c), Wielga Wieś (r), Wola Rakowska (c);
- Radomsko district: Makowiska (c), Uszczanowice (r);
- Wieluń district: Dietrzychowice (c), Krzywa Rzeka (r), Łubnice (c), Sokolniki (r).

⁴⁵ 122 houses in 1564/1565; LWWK 1564, part 2, p. 199.

⁴⁶ Around 1563 there were 142 houses in Turek (Ulanowska, *Visitationes*, p. 242), but in 1563 only 45 craftsmen (P. Wielkopolska, vol. II, p. 309)

⁴⁷ 97 craftsmen in 1563; P. Wielkopolska, vol. II, p. 309.

⁴⁸ See footnote 30.

⁴⁹ H. Rutkowski (*Piotrków Trybunalski w XVI i pierwszej połowie XVII wieku jako miejsce zjazdów szlacheckich*, [in:] 750 lat Piotrkowa Trybunalskiego, Piotrków 1967, p. 48 calculated, that around 1800–2000 inhabited only the city proper in the 1560s.

⁵⁰ See footnote 28.

⁵¹ Rosin, Wolbórz, p. 53 assesses that in the second half of the sixteenth century 2800 people lived in Wolbórz.

⁵² I. Gieysztorowa, *Charakter i wielkość osad*, [in:] AHP Mazovia, in this edition III.3.2.7; A. Dunin-Wąsowiczowa, *Character and size of settlements*, [in:] AHP Sandomierz, in this edition III.3.2.2.

⁵³ H. Rutkowski, *Location of settlements*, [in:] AHP Mazovia, in this edition III.3.1.7.

A castle was signed by some towns and rural settlements. As in previous volumes of this series, the decisive criterion was the unquestionable defensive character of the building, defined in the sources as castrum, arx or castle.⁵⁴ As in the case of other substantial matters, the problem lay in the sparsity of the sources in comparison to, e.g. Sandomierz Voivodeship. At the same time, works of L. Kajzer and J. Augustyniak that covered the entire area of our interest proved extremely helpful.⁵⁵ These authors have thoroughly used not only sources, but also – above all – professional literature, including unprinted materials. Thanks to the publications of the above-mentioned authors and B. Guerquin’s work⁵⁶ we can be certain that we have not made any critical mistake.

The following castles were marked on the map: royal castle Łęczycza and nobility castles Biesiekiery and Borysławice (Zamkowe) in Łęczycza district, royal Inowódz and nobility Brzeziny and Ujazd in Brzeziny district, nobility castle Oporów in Orłów district, royal castle Sieradz in Sieradz district, archbishop’s castle Uniejów in Szadek district, royal castle Piotrków, bishop’s castle Wolbórz and nobility castles Byki and Majowice in Piotrków district, royal castle Brzeźnica in Radomsko district, royal castles Bolesławiec and Wieluń and nobility castles Danków and Wieruszów in Wieluń district, and royal castles Grabów and Ostrzeszów in Ostrzeszów district.

Together we have included 20 castles (nine royal castles, two castles of churchmen and nine castles of the nobility). Following L. Kajzer’s findings we did not treat objects in Bąkowa Góra, Kępno, Sobota and Stryków as castles.⁵⁷

Table 1. Major towns in the second half of the sixteenth century

District, land, voivodeship	Cities			Together
	Crown	Church	Nobility	
district: Łęczycza	5	3	6	14
Brzeziny	1	1	6	8
Orłów	–	–	5	5
Łęczycza Voivodeship	6	4	17	27
district: Sieradz	3	1	5	9
Szadek	1	2	3	6
Piotrków	2	4	1	7
Radomsko	3	–	4	7
Sieradz land	9	7	13	29
district: Wieluń	3	0.5	6.5	10
Ostrzeszów	4	–	2	6
Wieluń land	7	0.5	8.5	16
Sieradz Voivodeship	16	7.5	21.5	45
Together	22	11.5	38.5	72

⁵⁴ The information was provided by inspections and inventories of royal property (royal castles), Łaski’s Liber, Church property inventories (castles of churchmen), MRPS and entries in MK (castles of all categories).

⁵⁵ L. Kajzer, *Studia nad świeckim budownictwem obronnym województwa łęczyckiego w XIII–XVII wieku*, Łódź 1980 (Acta Universitatis Lodzianensis, Folia Archeologica 1); L. Kajzer, J. Augustyniak, *Wstęp do studiów nad świeckim budownictwem obronnym Sieradzkiego XIII–XVII/XVIII wieku*, Łódź 1986; L. Kajzer, *Dwory obronne wieluńskiego w XIII–XVII wieku*, Łódź 1984 (Acta Universitatis Lodzianensis, Folia Archeologica 6). T. Nowak, J. Szymczak, *Obiekty obronne w Sieradzkim i Wieluńskim w świetle źródeł pisanych (do końca XVI w.)*, [in:] *Między Północą a Południem*, pp. 81–93, also concerns settlements, in which earthen or wooden fortifications were situated, called fortalitium, and that is why these authors list more settlements than we do.

⁵⁶ Guerquin, Zamki.

⁵⁷ Kępno was omitted on purpose, as in the sixteenth century (and probably later) it was a fortificalium (Rosin, Słownik, pp. 91 f.); Bąkowa Góra due to some doubts of L. Kajzer concerning the character of the object (L. Kajzer, J. Augustyniak, *Wstęp*, pp. 57–59); Sobota – because according to Kajzer (L. Kajzer, *Studia*, pp. 281–287) in the first half of the sixteenth century it was a brick manor with a moat, and the only source entry mentioning ‘in arce’ comes from 1632; Stryków, that – according to Kajzer (L. Kajzer, *Studia*, pp. 287 f.) – in 1505 was called fortificalium, and a castle or a manor in 1632.

Translated by Agata Staszewska

III.3.2.6 CUYAVIA AND DOBRZYŃ LAND

III.3.2a.6 CHARACTER AND SIZE OF SETTLEMENTS: RURAL SETTLEMENTS

Wiesława Duży

In keeping with the guiding principles of the AHP series, we have marked the following on the main map:

- villages,
- mill settlements,
- smithy settlements (ironworks),
- demesne settlements,
- pitch production settlements,
- inn settlements.

As in previous volumes of the AHP series, the lists below provide the sixteenth-century name in brackets for those settlements whose name underwent alteration or distortion.

The mill settlements placed on the main map had names of their own and were situated outside of settlements. These are:

- in Cuyavia:
 - in Brześć Voivodeship:
 - in Brześć district: Chaliński Młyn (Mill) (n), Dulewski Młyn (Mill) (n), Janiszewski Młyn (Mill) (n), Kawka (c), Kłobski Młyn (Mill) (r), Lisek (c), Luba (c), Lubrański Młyn (Mill) (n), Olszak (n), Olszak (Olszowy, n), Ośla (c), Piaski (r), Poraza (c), Prusak (c), Ruda (c), Słodowo (c), Starobrzeczki Młyn (Mill) (Staromiejski; c), Sych (n), Wulsk (c), Zawada (c), Zochel (n);
 - in Kowal district: Bobrek (n), Diabełek (r), Maślanka (Motorąg; n), Słapa (Człapa; r);
 - in Kruszwica district: Koszewski Młyn (Mill) (n);
 - in Przedecz district: Kołatki (n), Pasięka (n);
 - in Radziejów district: Dziadoch (n), Łysek (n), Nykiel (n), Ruda (n), Żelasko (c);
 - in Inowrocław Voivodeship:
 - in Bydgoszcz district: Chelczonka (Chelczący; c), Miedzyn (Miedzna; r), Rudy (Rudny; r), Smukała (c), Wojdal (c);
 - in Inowrocław district: Chrzęst (Chrząst; r), Czerniak (n), Dulinów (r), Filipia (Kukielka; r), Jarki (r), Jasień (r), Jasnowski Młyn (Mill) (Jasnow; r), Kąkol (r), Kuczek (c), Kuta (Kot; c), Osikowy (n), Zieleniec (r);
- in Dobrzyń land:
 - in Dobrzyń district: Kuzki (c), Soszki (n), Uniechowo (n);
 - in Lipno district: Bierzgło (c), Dulnik (Nadolny; c), Mień (n), Miszek (r), Ruda (Rudny; n), Sęk (c);
 - in Rypin district: Gniazdek (r), Kwaśno (n), Mały Zakroczy (r), Rudny (Rudne; r).

The main map does not show mill settlements whose location is unknown, approximate, or linked. These are:

- in Cuyavia:
 - in Brześć Voivodeship:

- in Brześć district: Czepliński (n), Gaska (n), Przeborowski Młyn (Mill) (n), Ruda (n), Stępa (n), Tornuczka (n) – location unknown; Swarowski Młyn (Mill) (n), Świech (c), Wilcze Gardło (r), Zawada (n) – approximate location; Wierzbowy (n) – location linked with Dębice Village (n);
- in Kowal district: Grodzień (n) and Zygmunt (n) – location unknown; Piątczyna (r) – location linked with Kowal Town (r);
- in Kruszwica district: Kłopot (n) and Ołdrzenica (n) – location unknown, and Trzcionka (Trzcionek; n) – approximate location;
- in Przedecz district: Bardy (c), Kruszewski (n), Nadolny (n) – location unknown for all;
- in Radziejów district: Chrzan (n), Jęczmion (Jęczmień; n), Kaczka (n), Kozubek (n) – location unknown for all – and Pogorzały (n) and Ruda (n) – approximate location for both;
- in Inowrocław Voivodeship:
 - in Bydgoszcz district: Koska (r) and Nowy (n) – the latter of unknown location;
 - in Inowrocław district: Wilczak (c) – approximate location; Olender (c) – location linked with Ołtoczyn (c); Podgórski Młyn (Mill) (r) – location linked with Podgórz Town (currently part of Toruń Town); Rwaça (r) – location linked with Dybowo/Cierpice mill settlement (Chrząst/Chrząst; r); Wilunt (r) – location linked with Stawki Village (Staw; r), which nowadays forms part of Toruń.
- in Dobrzyń land:
 - in Dobrzyń district: Zazdrość (n) – location linked with Szpetal Dolny Village (cn);
 - in Lipno district: Czajka (Czayka; c) – location unknown (probably near to Ciechocin Village; c); Rudawa (n) – location unknown (probably in the vicinity of the later-established Wąkolek, but not confirmed by cartographic sources).

The ironworks marked on the map meet the same criteria as the two settlement types mentioned above: they had names of their own and constituted separate spatial units. These are the Cuyavian settlements of Ruda Otorowska (r) in Bydgoszcz district, and Ruda (r) and Ruda (n) in Kowal district. In Dobrzyń land, Ruda (c) was such a settlement in Rypin district. The size of one settlements is worth underlining: Ruda (r), which belonged to Przedecz Gord Starosty in Kowal district, and probably had a population of even up to 100 residents. We used the same signature for mill and smithy settlements (ironworks) on the map. This decision follows from the fact that flour mills and smithies (iron smelting works) were powered by water, thus their location depended on the terrain and resulted in the formation of the same settlement type.¹

Demesne settlements are another settlement type marked on the main map. What is typical of these localities is that they had names of their own and were located beyond settlement borders. These are:

- in Cuyavia:
 - in Brześć Voivodeship:
 - in Brześć district: Chromowola (n), Falborek (r), Głuszynek (n), Gołębin (r), Janiszewko (n), Kalinowiec (r), Kopanina (n), Krukowo (r), Kucierz (c), Łopatki (c), Stawiec (n), Turowo (n), Wola Zagajkowa (n), Zduny (n), Zgłowiączka (c);
 - in Kowal district: Dąbrowka (n), Dziardonice (c), Grodztwo (Grodzkie; r), Kaliska (n), Rzegocin (n), Stępka (n);
 - in Kruszwica district: Janikowo (n), Probostwo (c);
 - in Przedecz district: Arkuszewo (r), Nowa Wieś Wielka (r), Ślázewo (r), Święta Katarzyna (r), Uklejnica (n), Wolka Komorowska (n), Żórawice (n);
 - in Radziejów district: Brylewo (n), Pruchnowo (r), Świątniki (n), Świesz (n), Zakrzewek (n);
 - in Inowrocław Voivodeship:
 - in Bydgoszcz district: Borówno (n), Byszewo (c), Krężoły (n), Kusowo (n), Miedzyn (Miedzna; n), Nowy Dwór (ct), Osowiec (Osowice; n), Stary Dwór (c), Trzebień (n), Trzęsacz (c), Wudzynek (Wodzinek; c), Żółwin (n), Żurczyn (n);

¹ Cf. Z. Guldon, *Dzieje hutnictwa żelaznego na Kujawach i w ziemi dobrzyńskiej do XVI wieku*, ZK, vol. 4, 1974, pp. 31–45, who lists also other ironworks and takes note of the fact that these settlements often become mill villages from the sixteenth century onwards. On the main map, we marked these as mill settlements. A. Andrzejewska discusses the difficulties in identifying ironworks in Dobrzyń land on the example of Zakroczek (Mały Zakroczy; r) in: A. Andrzejewska, *Przyczynek do dziejów hutnictwa żelaznego na ziemi dobrzyńskiej*, „Acta Universitatis Lodziensis. Folia Archaeologica”, vol. 24, 2004, pp. 157–165; T. Związek, *Człowiek i środowisko we wzajemnych relacjach. Powiat kaliski od schyłku XV w. do około 1600 r.*, Warsaw 2020, TS of doctoral dissertation prepared at IH PAN under the supervision of M. Słoń.

- in Inowrocław district: Balin (Balino; n), Ciechocinek (Ciechocino; n), Dalkowo (c), Gnojno (n), Kopanie (n), Niemojewe (n), Osiek Wielki (Osiek; r), Ossówka (n), Podgaj (n), Popowiczki (Popowice; c), Raciążek Wola (Wola; t), Sławęcín (Sławęcino; n), Sławęcinek (Sławęcinko; r), Truszczyzna (c), Zamysłowo (Zamyślino; n);
- in Dobrzyń land:
 - in Dobrzyń district: Strachoninek (r);
 - in Lipno district: Ostrowitko (n).

Two demesne settlements in Bydgoszcz district merit special attention, as they stand out in terms of size: Osowiec (Osowice) and Trzebień could have been inhabited by as many as 100 residents. We provided demesne settlements with a separate signature on the main map.

For demesne settlements, we adopted similar rules as for mills. If the name of a given demesne settlement was unknown, approximate or linked, the settlement was not placed on the map. These are:

- in Cuyavia:
 - in Brześć Voivodeship:
 - in Brześć district: Ciemięga (c), Popowiczki (c), Zagurówko (Zagarówko; n), Załuskowo (n) – approximate location for all; Dąbrowa (n) – location linked with Toporzyszczewo Village (n), Kaniewko (c) – location linked with Kaniewo Village (n), Starczewo (Starczewa; r) – location linked with Kąkowa Wola village (r), Zaduśniki (n) – location linked with Borzymie Village (n);
 - in Kruszwica district: Gościejewo (r) – unknown location; Poświętne (n) – approximate location;
 - in Radziejów district: Maszonki (c) – location linked with Rusinowo Village (n), Posikowo (n) – location linked with Pścínno village (n);
 - in Inowrocław Voivodeship:
 - in Inowrocław district: Podgaj (n), Ściborze Małe (n), Wilkowo (c) – unknown location for all; Kielczew (n) – approximate location; Balinek (Balinko; n) – location linked with Balin Village (n);
- in Dobrzyń land:
 - in Rypin district: Mantyki (n) – location linked with Dzierzno Village (n).

At this point, it is worth reiterating that Ciemięga (c), marked on the map as a demesne settlement, was a mill settlement for the major part of the second half of the sixteenth century. One could identify Ciemięga as Kokoszka, a mill mentioned in 1550s tax registers, and referred to also as Lasek Mill. The mill burned down before 1594, and until 1607 sources describe Ciemięga as an unused demesne.²

In the last years of the sixteenth century, Dutch settlers colonised northern Cuyavian lands on the banks of the Vistula. The first Dutch colonists settled in the Lower Vistula Valley already in the first half of the century. The colonisers came from the Netherlands and entered into contracts with local landowners on long-term lease (emphyteusis) of the settled land with the right to collect profits. The so-called Dutch Law, which regulated the foundation of Dutch settlements, safeguarded favourable personal and property rights.³ It follows from extant source information that Przyłubie (Przyłubie Nowe, n) was the oldest Dutch village on the Cuyavian bank of the Vistula. Maciej Przyłubski, Przyłubie's noble owner, settled Dutch colonists under a contract signed with a group of settlers in January 1594.⁴ Two years later, Bydgoszcz Starosta Jan Kościelecki was granted permission to lease Łęgnowo (Łęg, c), a village situated between Bydgoszcz and Solec Kujawski, to Dutch settlers.⁵ Wielka Nieszawka (r), a settlement in Dybów Gord Starosty, was the third oldest Dutch village in the analysed area. It was colonised by Dutch settlers from Przyłubie, who in early 1600 took up contractual lease of Wielka Nieszawka's land from Starosta Wojciech Padniewski.⁶ In all discussed cases, Dutch colonists were settled in already

⁶ MK 145, ff. 264–270; for more on similar settlements and more details on Mała Nieszawka (r), which also attracted Dutch settlers, see: M. Słomski, *Ownership affiliation of settlements*, [in:] AHP Cuyavia, in this edition III.3.3.6.

existing villages whose foundation dated back to the Middle Ages, which was probably connected with changes to spatial layout and relocations of previous inhabitants.⁷ In subsequent years, Cuyavia witnessed intensive Dutch colonisation, which continued until the end of the eighteenth century.

We used the village symbol to mark such settlements on the main map. The same signature denotes Dębowa Góra (c), the only pitch production settlement in Bydgoszcz district we identified as a settlement of this sort. The source material collected helped identify the only inn settlement situated in Cuyavia. Distinctive was not only the type, but also the size of Dunaj (n), a newly isolated settlement in Brześć district. Estimates made in the second half of the sixteenth century put the resident count as high as 100. In keeping with the principles of the AHP series, we did not place inn settlements on the main map. We marked Dunaj on the map of roads and inns.

In line with the previous AHP volumes, the main map shows large (probably more than 200 residents) and small villages. Like in previous volumes, estimates of village size relied on data harvested from tax registers dating to the second half of the sixteenth century. In keeping with the principles applied to date, we converted register data into population size by means of appropriate multipliers. These were used mainly to determine the number of specific population groups. This included all categories of *hortulani* (smallholders): smallholder without land, smallholder with land, smallholder with house, and unspecified smallholder, where the multiplier equals five, as well as craftsmen, coloni (*rataje*), fishermen, shepherds, *inquilini* with property; an *inquilinus* was a landless peasant who performed labour in exchange for the right to live in a dwelling – where the multiplier used amounted to four, unspecified *inquilini* (multiplier of three), *inquilini* without property and servants (two), peasants without a master and short-term hired labourers (*ludzie luźni*) and female *inquilini* (one). For mills, inns and windmills, we used a multiplier amounting to six. With these multipliers, we were able to estimate how many people resided in each household of all the groups listed in the register. These estimates also take into account the multiplier for the number of lans in a given settlement. As agreed in the previous AHP volumes, we applied the multiplier of eleven persons per lan. We used the same multiplier value for lans held by peasants, village headmen (*sołtys*) and farmed by serfless gentry.⁸ For empty lans, we used a multiplier of 1 per lan. The literature of the field provides a detailed analysis of how such multipliers can be put to use.⁹

It ought to be underlined that the information provided are estimates and constitute a model averaged at the scale of individual voivodeships and lands. Owing to the varied source base, any comparisons between the Cuyavian voivodeships and Dobrzyń land districts should be very prudent. This source base is constituted mainly by tax registers from the second half of the sixteenth century covering Brześć and Inowrocław Voivodeships and tax registers on Dobrzyń land dating to the 1560s.¹⁰ Registers on Cuyavian districts are more numerous and follow a similar formula, meaning that they recorded the number of taxable lans, which provides more ample material for analysis. Concerning Dobrzyń land, we have at our disposal only three tax registers dated to the second half of the sixteenth century, which creates even greater imbalance. The most recent tax register, which dates to 1573, fails to present information on many settlements identified in earlier registers and newer sources. To make matters even more complicated, the 1573 register follows a different format for registering selected tax categories. Unlike the other two registers, the 1573 register did not take into account the ownership of parcels in individual villages. The structure of the earliest, 1564 register has a structure different from that of the two other Dobrzyń and Cuyavian registers in the part on lan tax. The 1564 register lists serfs and specifies the total tax paid by a given village (or part of a village), along with the tax rate per lan. However, it fails to indicate the number of lans in a given village (or part of village). What is more, the 1564 tax rate applied to serf lans does not correspond to the provisions of the tax collection universal, which set the rate at 20 grosze per lan.¹¹ The tax rate following from the 1564 register is 16 grosze 2 solidi per serf lan. As a result, this register gives us a list of settled serfs (with names of

¹¹ VC, vol. 1, p. 147.

the subjects), but not the number of lans in a given village. Without the number of lans, using the lan conversion factor adopted for the whole analysed area poses certain difficulty. Our analyses show that the number of listed serfs may be tantamount to the lan count in a given village (or part of village). We recalculated total village tax based on the tax rate and the number of serfs and compared the 1564 lan count with data for the following year (1565 register). Initial results indicate that differences between 1564 and 1565 acreage arise mainly where lans had been vacated or burnt down, and were thus rendered non-taxable. Available data may suggest that single- and half-lan households were common in Dobrzyń land. Yet these preliminary observations require further study, mainly comparative analyses carried out on a larger sample of registers following a similar tax registration format (based on serf number, not lan number). Therefore, we based our estimates of the size of Dobrzyń land settlements mainly on the 1565 tax register, and supplemented its data with information from the 1564 register. Only in exceptional cases did we resort to the 1573 register.

Given the above reservations and circumstances, on the main map we marked the following villages with populations over 200 inhabitants:

- in Cuyavia:
 - in Brześć Voivodeship:
 - in Brześć district: Bądkowo (c), Brzezcie (n), Choceń (n), Czamanin (n), Gęsin (n), Grabie (n), Jaranowo (n), Kłobia (r), Koneck (n), Kościelna Wieś (n), Kruszyn (r), Łowiczek (n), Opoki (c), Paniewo (n), Przybranowo (n), Przypust (m), Redecz Wielki (n), Śmiłowice (r), Smogorzewo (c), Sokołowo (rc), Święte (n), Ujma Wielka (c), Wieniec (c);
 - in Kowal district: Białotarsk (Białotarczek; c), Duninów (r), Grabkowo (c), Kłótno (c), Kurowo (c), Pierowa Wola (n);
 - in Kruszwica district: Młyny (c), Stodoły (c);
 - in Przedecz district: Dziwie (r), Kubłowo (r), Rybno (r), Wierzbie (n), Zakrzewo (c);
 - in Radziejów district: Bronisław (c), Chełmce (c), Dobrze (n), Latkowo (n), Sadlno (n), Stary Radziejów (r), Szóstka (c), Wąsewo (n), Wola Wapowska (c);
 - in Inowrocław Voivodeship:
 - in Bydgoszcz district: Będzítőwo (n), Dobrcz (Dóbrzez; c), Gądecz (n), Gogolin (Gogolina Wielka; n), Gościeradz (c), Nieciszewo (n), Osielsko (c), Sienno (n), Ślesin (Ślesino; n), Strzelce (n), Trzeciewiec (Cietrzewiec; c), Więżowno (c), Wtelno (c), Żołędowo (n);
 - in Inowrocław district: Broniewo (r), Dulsko (Dolsko; r), Łojewo (c), Markowice (n), Markowo (n), Murzynno (Murzyno; r), Niszczewice (Miszczewice; r), Orłowo (r), Ośno Dolne (Ośno; n), Ostrowąs (c), Parchanie (Parkanie; c), Przybysław (c), Rojewo (n), Rządkwino (Rzotkwino; c), Sędzin (Sędzino; c), Sławsko Wielkie (c), Szadłowice (Szawłowice; c), Tuczno (r), Wielowieś (Wielawieś; n), Wierzbiczany (n);
 - in Dobrzyń land:
 - in Dobrzyń district: Bogucin (n), Chalin (n), Chełmca Mała (n), Chełmice (n), Glewo (n), Głowina (n), Grochowalsk (n), Jasień (n), Lanie Wielkie (r), Michałkowo (n), Mokówko (c), Mysliborzyce (n), Nasięgniewo (n), Nowa Wieś (n), Oleszno (n), Szpetel Górny (n), Tłuchowo (n), Uniejewo (n), Więclawice (n), Wielgie (n), Witkowo (n), Zaduszniaki (n);
 - in Lipno district: Biskupin (c), Ciechocin (c), Czarne (n), Czerniakowo (c), Czerniakówko (r), Głodowo (n), Jankowo (r), Karnków (n), Kijaszkowo (n), Kłokock (n), Liciszewy (n), Lubin (n), Łachocin (n), Łążyn (n), Maliszewy (c), Małszyce (c), Młyniec (n), Moszczonno (n), Oborowo (n), Osiek (n), Osówka (n), Radomice (r), Rudaw (c), Silno (r), Sitno (c), Steklin (n), Steklinek (n), Sudraży (n), Sumin (n), Świętosław (n), Węgiersk (c), Wielgie (n), Wola (n), Zębowiec (n), Zębowo (n), Złotopole (n);
 - in Rypin district: Długie (n), Dobrze (n), Dylewo (n), Giżynek (n), Godziszewy (n), Gulbiny (n), Janowo (c), Kłóśno (n), Kotowy (n), Krecki Wielkie (n), Księża (n), Linne (n), Łukomie (n), Miesiączkowo (c), Nadróż (n), Nowa Wieś (n), Piórkowo (n), Półwiesk (n), Pręczki (n), Radomin (n), Radziki Małe (n), Rętfiny (Rentyfin; n), Rokitnica (n), Sadłowo (n), Sokołowo (n), Starorypin (rn), Świedziebnia (n), Trażyn (c), Ugoszcz (n), Wąpieliska (n), Wojnowo (n), Zasady (n), Zduniec (Sznancz; n), Żałe (n).

What attracts attention in this list is the large number of sizable villages in Dobrzyń land, notably exceeding the average for the entire analysed area (cf. Table 1), which might arise from the peculiar

source base, as described above. To establish the full picture, let us point to the considerable fragmentation in nobility-owned villages in this area, which is elaborated on in the *Ownership Affiliation of Settlements* chapter in this volume.

The main map shows the following largest Cuyavian and Dobrzyń land villages (with populations probably between 500 and 1,000) of the second half of the sixteenth century:

- in Cuyavia:
 - in Brześć Voivodeship:
 - in Brześć district: Guźlin (t), Lubanie (c);
 - in Kowal district: Rakutowo (r);
 - in Inowrocław Voivodeship:
 - in Inowrocław district: Jaksice (r);
- in Dobrzyń land:
 - in Lipno district: Dobrzejewice (c), Działyń (n), Grodzień (n), Kikół (rn), Mazowsze (n);
 - in Rypin district: Dulsk (n), Osiek (n), Płonno (n).

Table 1. Share of large villages in the total number of villages in Cuyavia and Dobrzyń land in the second half of the sixteenth century

District	All settlements (total)	Number of rural settlements	Number of large villages (more than 200 residents)	Share of large villages in total number of villages (in %)
Brześć	268	265	25	9.4
Kowal*	79.5	77.5	7	8.9
Kruszwica*	59.5	55.5	2	3.6
Przedecz	122	119	5	4.2
Radziejów	150	147	9	6.1
Brześć Voivodeship	679	664	48	7.2
Bydgoszcz	115	111	14	12.6
Inowrocław*	228.5	222.5	21	9.5
Inowrocław Voivodeship	343.5	332.5	35	10.5
Cuyavia	1,022.5	997.5	83	8.3
Dobrzyń	109	108	22	20.4
Lipno	146	142	41	29.1
Rypin	133	131	37	28.7
Dobrzyń land	388	381	100	26.5
Total	1,410.5	1,378.5	183	13.3

* We identified two settlements to be the subject of dual administrative affiliation. These are the villages: Łąkie (c) – situated partly in Inowrocław Voivodeship (Inowrocław district) and partly in Brześć Voivodeship (Kruszwica district), and Górki (n) in Białotarsk Parish (Białotarzec), located partly in Rawa Voivodeship (Gostynin district) and partly in Brześć Voivodeship (Kowal district). So as not to overstate the absolute number of settlements, in the list above we placed one half of each divided settlement in each of the two respective administrative units.

III.3.2b.6 CHARACTER AND SIZE OF SETTLEMENTS: CITIES AND TOWNS IN CUYAVIA AND DOBRZYŃ LAND IN THE SECOND HALF OF THE SIXTEENTH CENTURY

Patrycja Szwedo-Kielczewska

In accordance with the principles adopted in the AHP series, this volume contains detailed maps depicting a network of towns in Cuyavia and Dobrzyń land in the second half of the sixteenth century. Traditionally, the basic criterion used by scholars to distinguish towns from other types of settlements was their legal and political status, confirmed by the location privilege (if known) and the terms used to describe said settlements in source documents (*civitas*, *oppidum*, *miasto*, *miasteczko*, etc.). Another important source of information was the data concerning town inhabitant's payment of *szos* – the town tax. On this basis, we identified localities that were classified as towns, taking into account their role in the State and Catholic Church administration. Individual towns were analysed and described in terms of their properties and size. However, the localities which did not obtain the status of a town or lost it over time, despite the fact that sources confirm that they had been charted under German law, were not counted as towns.

As far as the existing literature of the subject is concerned, the works of Zenon Guldon are the primary source for basic information on the towns located in the territory of Cuyavia and Dobrzyń land, including data concerning the chronology of their foundation process, their ownership affiliation and estimated sizes.¹ The subject was also partially covered by Henryk Samsonowicz,² Maria Bogucka,³ Ryszard Kabaciński,⁴ Ryszard Szczygieł,⁵ Dariusz Karczewski,⁶ Joanna Karczewska,⁷ Daniela Szymańska⁸ and – in the latest work on the issue – Adam Kosecki.⁹ The reference materials concerning the subject included also numerous monographic studies devoted to individual towns whose authors also discussed the above-mentioned issues. However, no comprehensive studies focusing on the network of Cuyavian towns and their classification have been published so far.

According to the findings of the hitherto conducted research, in the period from the thirteenth to the end of the sixteenth century, there were 41 instances of town foundation initiatives in Cuyavia and Dobrzyń land.¹⁰ This process was most intense in the fourteenth and fifteenth centuries (70% of the undertaken foundations), but some of these attempts were unsuccessful. There is no consensus in

the literature of the subject as to the number of towns which functioned in this area at the end of the fifteenth century and in the sixteenth century. The conclusions presented in the studies of Samsonowicz,¹¹ Kosecki,¹² Guldon¹³ and Szczygieł¹⁴ differ in this respect. The researchers' positions on this issue are summarised in the table below.

Table 1. Number of towns in Cuyavia and Dobrzyń land – current state of research

Voivodeship	fifteenth century		sixteenth century	
	Samsonowicz	Kosecki	Guldon	Szczygieł
Brześć Voivodeship	10	15	14	15
Inowrocław Voivodeship	12	11	9	11
Dobrzyń land	6	–	7	7
Total	28	26	30	33

By the second half of the sixteenth century, Kościelec lost its town status. Founded in 1443, in 1489 the settlement was referred to as an *oppidum*,¹⁵ and, in 1512, the owners obtained confirmation of the foundation privilege from Sigismund the Old.¹⁶ It can be assumed that the latter venture was an attempt to stimulate the economic development of the settlement which did not develop as expected or even deteriorated over time.¹⁷ In the tax registers from 1536 and 1541, Kościelec is listed among the towns of Inowrocław district, but it paid neither the extraordinary land tax (*pobór*) nor the liquor excise tax (*czopowe*); it paid tax from two lans.¹⁸ Pre-1550s, the settlement was occasionally referred to as a town; such information is also provided in the register from 1552, but the mention refers to an empty entry, and the town does not appear in the liquor excise tax list.¹⁹ In the following years, there are consistently no premises that could indicate that the settlement was a town. There is no information on *szos* payments, and most mentions concern payables from serf lans.²⁰ The visitations from 1577,²¹ 1578,²² and 1596²³ refer to Kościelec as a town, although the last of these sources uses the phrase *villa vel oppidum*, which indicates that there were some doubts as to the status of this locality. In the poll tax registers from 1673²⁴ and 1674,²⁵ Kościelec was listed among villages, as was the case in the hearth

¹¹ H. Samsonowicz, *Liczba i wielkość miast*, pp. 925–926: Dobrzyń land: Bobrowniki, Dobrzyń, Górno [sic!], Lipno, Rypin, Skępe; Brześć Voivodeship: Brześć, Chodecz, Izbica, Kowal, Łubień [sic!], Nieszawa, Przedecz, Radziejów, Smulsko [sic!], Włocławek; Inowrocław Voivodeship: Bydgoszcz, Fordon, Gniewków, Inowrocław, Koronowo, Kruszwica, Łabiszyn, Pakość, Raciążek, Solec, Służewo, Strzelno. The list includes Łabiszyn, located at the border between Inowrocław and Kalisz Voivodeships, which in the second half of the sixteenth century was under the administration of the Greater Poland Voivodeship. On the other hand, the list does not include Gębice, Sompolno, Kościelec and Noć; cf. Guldon, *Lokacje*, pp. 26–30; Kosecki, *Miasta*, pp. 153–157.

¹² Kosecki, *Miasta*, p. 152. Kosecki describes the number of towns at the end of the fifteenth century. The publication does not cover town foundations implemented in Dobrzyń land.

¹³ Guldon, *Lokacje*, p. 33. He mentions Przypust as one of the settlements which temporarily had the status of a town in the fifteenth century. Podgórz is not included in the list due to the Magdeburg Law privilege obtained in 1611.

tax register from 1662.²⁶ Taking the above-mentioned facts into account, Kościelec was ultimately not marked as a town on the main map.

The status of Noć, which was founded before 1489, was rather unclear. In the 1557 tax register, the locality was described as an *oppidum*.²⁷ The same designation, along with the term *oppidulum*, appeared in the *Liber Retaxationum of 1527* and the visitations of 1527,²⁸ 1584²⁹ and 1598.³⁰ In the inspection from 1564–1565, Noć was described as a small town in Radziejów district, one half constituted royal property and the other was owned by Krzysztof Sokołowski, the Starosta of Rogoźno.³¹ This description appears also in later inspections. The locality, which was then on lease, was first visited by royal officials only in the eighteenth century.³² The register of 1564³³ contains a brief reference to the payment of liquor excise tax, placing Noć on the list of towns. In the summary of tax records of 1564, it is again listed among towns with the payment of liquor excise tax in the amount of 30 florins and 12 grosze.³⁴ Similarly, in 1565, Noć paid 28 florins and 24 grosze.³⁵ Noć does not appear in the summary from 1569, but, at the same time, it was also not mentioned among the villages of Brześć Voivodeship.³⁶ In the register of overdue taxes (*rejestr retent*) of 1571, the settlement was listed among the towns that had paid the liquor excise tax.³⁷ It is no longer referred to as a town in the tax registers from the 1570s and 1580s, which, additionally, contain no information on any payments of *szos* or liquor excise tax. There is also no record of Noć being granted a period of exemption from tax payments. Irena Gieysztorowa, however, drew attention to the fact that in Mazovia the small towns that did not pay *szos* because of their poverty were usually listed in parochial arrangement.³⁸ The settlement is not included among the towns listed in the 1634 hearth tax register.³⁹ In the 1662 hearth tax register,⁴⁰ as well as the poll tax registers of 1673⁴¹ and 1674,⁴² it is consistently listed among villages. According to Z. Guldon, in spite of source references which point to the town status of Noć, by the second half of the sixteenth century, it had become once again a rural settlement.⁴³ However, the number of craftsmen given in the tax registers suggest that the locality could have performed economic functions for the neighbouring villages and functioned as a settlement of urban character, in some scope.⁴⁴ References to the status of the settlement remain ambiguous in the second half of the seventeenth century. This is evidenced by a document entered in the Crown Metrica, dated 7 July 1667, concerning the mortgage on the royal half of the small town, in which the locality was described as ‘oppidi Notes dicti ad fluvium Notes siti’.⁴⁵ Despite the lack of documented data on *szos* payments, but taking into account the above premises as well as evidence from other sources, we assume that in the second half of the sixteenth century Noć had the status of a small town. Still, it constituted a very underdeveloped settlement.

Map 1. The town network in Cuyavia and Dobrzyń land in the second half of the 16th century

Similar doubts about the character of the settlement can also be raised in relation to Lubień, a small nobility town. In 1581, 1582, 1583, and 1589, the tax called from this settlement was recorded among the villages.⁴⁶ According to earlier registers, the locality, admittedly referred to as an *oppidum*, did not pay *szos*.⁴⁷ However, a mention of the town burning down was recorded in 1579,⁴⁸ and similar notes referencing burnt lans were also made in 1581.⁴⁹ The visitation from 1594⁵⁰ used two terms for describing the status of Lubień; others from 1584⁵¹ and 1598⁵² refer to the locality only as a town. According to the document entered in the Crown Metrica with the date of 24 December 1613, Sigismund III Vasa renewed the deed on re-chartering the town with Magdeburg Law, and established two fairs and a weekly market in the town,⁵³ at the request of the then owner of Lubień. In 1634, the settlement was mentioned among the towns paying hearth taxes,⁵⁴ and the 1665 inventory describes it also as a small town inhabited by 32 people.⁵⁵ On the maps, we marked Lubień as a town, interpreting any facts contradicting this status as evidence of the substantial destruction of the town as a result of a fire.

It is also worth noting that, in individual registers, the taxes collected in Chodecz,⁵⁶ Przedecz,⁵⁷ Izbica Kujawska,⁵⁸ Lubraniec,⁵⁹ and Radziejów⁶⁰ (tax reg. from 1557), Podgórz (tax reg. from 1552⁶¹ and 1553⁶²), Skulsk (tax reg. from 1579,⁶³ 1580,⁶⁴ and 1583⁶⁵), Służew (tax reg. from 553,⁶⁶ 1564,⁶⁷ and 1565⁶⁸), Strzelno (tax reg. from 1553⁶⁹) and Sompolno (tax reg. from 1581⁷⁰) were also recorded among villages. However, these entries usually concern the amounts paid for facilities and categories for which fees were also paid from villages, or they testify to the damage incurred by these places as a result of fires.

In the sixteenth century, there was only one successful town foundation in the area of Cuyavia and Dobrzyń land. On 14 April 1509, at the request of Poznań Bishop Jan Lubrański, Sigismund the Old issued a privilege allowing for the foundation of Lubraniec under Magdeburg Law.⁷¹ However, it is possible that the first foundation was not successful, because for unknown reasons, the King renewed this charter on 5 March 1512.⁷² Nevertheless, in the second half of the sixteenth century, the locality

⁷¹ MK 24, f. 94; MRPS IV/2, no. 8972.

⁷² MK 25, f. 140; MRPS 1, no. 1440. S. Muznerowski believed that the first privilege had not entered into force, which is why the second foundation was needed, see: idem, *Lubraniec (monografia)*, Włocławek 1910, pp. 156–157. Z. Guldon assumed that the foundation took place in 1509, also noting the repeated permission for the foundation from 1512, see: Guldon, *Lokacje*, p. 30, footnote 'u'. W. Kubiak stated, however, that the failure to implement the first charter could have resulted

operated on the basis of municipal rights, as evidenced by, for example, the *szos* it paid, and sparse information on the existence of a town council.⁷³ However, the attempts of founding two nobility-held towns in Dobrzyń land proved unsuccessful: Strzygi in 1552 and Płonne in the following year.⁷⁴ According to Ryszard Szczygieł, in 1589, there was also an unsuccessful attempt to transform the parish village of Piotrków Kujawski, which belonged to Jan Rusinowski, into a town.⁷⁵ Source references from the second half of the sixteenth century provide evidence that there was also an urban settlement in Podgórz (Dybów). It was most likely rebuilt already at the turn of the sixteenth century, after the destruction of Nieszawa and its transfer to the present location in 1460–1462, and functioned as a trade settlement participating in the Vistula River trade.⁷⁶ Podgórz-Dybów was probably formally granted a charter under Magdeburg Law only on the basis of the document issued by Sigismund III Vasa on 7 November 1611.⁷⁷ Because of this, it was not included in the list of Cuyavian towns published by Z. Guldon.⁷⁸ However, there is no doubt that the settlement performed the functions of a town long before obtaining said municipal rights. In 1555, on the basis of the document of Sigismund Augustus, Podgórz, also referred to as Stara Nieszawa, a harmful competitor for Toruń, was moved to a hill located far away from the banks of the Vistula.⁷⁹ In 1576, it obtained significant trade privileges from Stephen Báthory.⁸⁰ The settlement was described as the town of ‘Dibow alias Podgorze’ in the first royal inspection 1564–1565.⁸¹ The tax registers from 1563 also clearly confirm its municipal status.⁸²

Therefore, in this volume of AHP, we assume that ca. 1600, there were 32 cities and towns in Cuyavia and Dobrzyń land: 15 in Brześć Voivodeship, 10 in Inowrocław Voivodeship, and seven in Dobrzyń land. The list below presents the number of towns with their ownership affiliations, divided into voivodeships:

- Brześć district: Brześć Kujawski (Brzeście, r), Lubraniec (n), Włocławek (Włocław, c),
- Kowal district: Kowal (Kowale, r), Lubień Kujawski (Lubień, n),
- Kruszwica district: Gębice (r), Kruszwica (r), Skulsk (Skulsko, r), Strzelno (c),
- Radziejów district: Noć (Noteś, m), Radziejów (r), Sompolno (Sapolno, c),
- Przedecz district: Chodecz (n), Izbica Kujawska (Izbica, n), Przedecz (r),
- Bydgoszcz district: Bydgoszcz (r), Fordon (Fordan, r), Koronowo (c), Solec Kujawski (Solec, r),
- Inowrocław district: Gniewkowo (Gniewków, r), Inowrocław (r), Pakość (n), Podgórz (Podgorze, r), Raciążek (Raciąż, c), Służewo (n),
- Dobrzyń district: Dobrzyń-upon-Vistula (Dobrzyń, r),
- Rypin district: Górzno (c), Rypin (r),
- Lipno district: Bobrowniki (r), Lipno (r), Nieszawa (Nowa Nieszawa, r), Skępe (Skąpe, n).

from the protest of the neighbouring towns of Izbica Kujawska, Radziejów and, above all, Brześć Kujawski, see: idem, *Dzieje Lubrańca*, Toruń 2006, p. 40.

⁷³ W. Kubiak, *Dzieje Lubrańca*, p. 41. In the 1513 document of Sigismund the Old concerning the incorporation of Bytom Parish into Lubraniec Parish, the settlement was referred to as an *oppidum* (AGAD, Nabytki Niedokumentowane Oddziału I (‘Non-documented acquisitions of Division I’), sign. 20, f. 51). There are no descriptions specifying the status of this settlement in the documents of the Monastery of the Canons Regular of the Lateran in Lubraniec from 1511–1513, concerning the incorporation of Zgłowiączka Parish into Lubraniec Monastery, which were entered into the same cartulary. I would like to thank Professor Zbigniew Zyglewski, PhD (dr. hab.), of the Kazimierz Wielki University, for his comments.

Table 2. Number of towns in Cuyavia and Dobrzyń land in the second half of the sixteenth century

Voivodeship	Towns			Total
	royal towns	Church towns	nobility towns	
Brześć Voivodeship	7.5	3	4.5	15
Inowrocław Voivodeship	6	2	2	10
Dobrzyń land	5	1	1	7
Total	18.5	6	7.5	32

In Cuyavia and Dobrzyń land, there is a predominance of settlements belonging to the royal domain, which constitute approximately 58% of the total number of all towns located in this area. However, taking into account the distribution of ownership of landed property in the analysed area, the royal estates were the least prominent. However, the estates of nobility dominated in the region, which is discussed in detail in a separate chapter of this volume.⁸³ The shares of ecclesiastical (Church) and private (nobility) towns in the area was, respectively, 18.75% and 23.4%. Royal settlements dominated both in the Brześć (50%) and Inowrocław (60%) Voivodeships, as well as in Dobrzyń land (71.4%), although in none of the analysed districts was the number of settlements higher than four. No ecclesiastical towns were situated in Kowal, Przedecz, Dobrzyń, and Lipno districts. There were no nobility's towns in Kruszwica, Bydgoszcz, Dobrzyń, and Rypin districts.

In this respect, the proportions of ownership affiliations concerning the towns in Cuyavia and Dobrzyń land differ slightly from the general trends of the urban networks of the Polish Kingdom in the sixteenth-century which were dominated by small nobility's settlements. This phenomenon can be observed in the neighbouring voivodeships. In Płock Voivodeship (16 towns), royal property constituted only 25% (4 towns) of the total number of towns, with 68% (11 towns) representing nobility's property.⁸⁴ This trend was even clearer in Greater Poland, where the percentage of private towns is estimated at 68% in Kalisz Voivodeship (63.5 towns) and 57% (38 towns) in Poznań Voivodeship, with a relatively low share of royal towns, amounting to 17% (16 towns) and 24% (16 towns), respectively.⁸⁵ Also in the small Łęczyca Voivodeship, out of 27 towns, 63% (17) were owned by nobility, and 39% constituted royal property (6 towns).⁸⁶ Similarly, in Sieradz Voivodeship, the percentages were, respectively, 47.8% (21.5 towns) and 35.5% (16 towns).⁸⁷ There's also a relative dominance of royal towns in Rawa Voivodeship – out of 23 towns, 43% (10 towns) belonged to the Crown, and 34% (eight towns) were privately owned. On the other hand, there were no nobility's towns in Chełmno Voivodeship, where the percentage of royal towns was 64.28% (nine towns), while the remaining 35.71% were ecclesiastical towns (five towns).⁸⁸ The king also owned all the settlements located in Pomeranian Voivodeship (16).⁸⁹ The percentage share of royal towns located in Cuyavia and Dobrzyń land also corresponds to the estimates made for Cracow Voivodeship (54.8%), however, these areas differed diametrically, both in terms of their size and degree of urbanization.⁹⁰

The most difficult part of analysing the source material was estimating the size of towns at that time. Both the basis of the calculations and the indicators adopted by the researchers are up to debate.⁹¹ Most of the source materials we used in this study were tax registers from the second half

Kleczyński, *Spisy ludności w Rzeczypospolitej polskiej*, „Rozprawy Akademii Umiejętności. Wydział Historyczno-Filozoficzny”, II, vol. 5 (30), 1894, pp. 33–61; W. Czerkawski, *Metoda badania zaludnienia Polski w XVI*

of the sixteenth century, as well as inspections and inventories of royal and ecclesiastical property. A single inventory of nobility's property was also used.⁹² As the basis for the calculations, we mainly used the recorded information on the number of houses, and in the absence of such information, the data on craftsmen taxed in individual towns. The references to the amount of *szos*⁹³ and the amount of tax paid on the production and sale of alcoholic beverages, *i.e.* the liquor excise tax (*czopowe*), were taken into account for comparison purposes.

We also decided to use the previously adopted system of estimating the size of individual settlements, assuming the conversion factor of nine people per house (household), as was the case in the previous volumes. Taking into account the development of research in the field of historical demography and its recent findings, the validity of these choices may also be debatable. In the Greater Poland volume, this problem was already discussed by Jarosław Suproniuk.⁹⁴ Therefore, we rely on the solution he chose, the purpose of which is primarily to maintain the consistency of the series.

The amount of information contained in the sources was also an issue. It turned out to be highly unsatisfactory, especially in the case of Dobrzyń land, where the lack of data on the number of houses, as well as only very sparse information on the number of craftsmen, forced us to take into account information from later sources or base our analyses on the findings reported in the literature of the subject. In the case of Dobrzyń land towns, the decisive factor was, first of all, the information on the amount of liquor excise tax, which allowed us to estimate the economic potential of individual settlements. Taking into account the discussion and assumptions underlying the series, it should be emphasised that the presented findings are to a large extent probable, but should be treated only as representation of the order of magnitude of the population of the towns located in Cuyavia and Dobrzyń land in the second half of the sixteenth century.

In line with the principle adopted in the previous volumes, towns have been divided into three categories: small towns (with populations up to 1,000 inhabitants), towns (with larger populations of up to 5,000 inhabitants), and large towns (over 5,000 inhabitants). There are no settlements that could be classified as large towns in Cuyavia and Dobrzyń land. The breakdown into categories is as follows:

wieku, „Sprawozdania z Czynności i Posiedzeń Akademii Umiejętności” 1897, no. 2, pp. 8–12; W. Kula, *Stan i potrzeby badań nad demografią historyczną dawnej Polski (do początków XIX wieku)*, RDSG, vol. 13, 1951, pp. 23–106; K. Górka, *Przyczynek do krytyki rejestrów poborowych z XVI wieku*, *SŻ*, vol. 1, 1957, pp. 184–189; E. Vielrose, *Ludność Polski od X do XVIII wieku*, KHKM, vol. 5, 1957, no. 1, pp. 37–42; I. Gieysztorowa, T. Ładogórski, *W sprawie nowych badań nad zaludnieniem dawnej Polski*, KHKM, vol. 6, 1958, no. 1–2, pp. 45–60, 134–135; I. Gieysztorowa, *Źródła i szacunki w badaniach osadnictwa i demografii Polski XVI i XVII w.*, KHKM, vol. 10, 1962, no. 3–4, pp. 575–593; Z. Guldon, *Uwagi w sprawie przydatności badawczej rejestrów poborowych z XVI w.*, *ZH*, vol. 31, 1966, no. 1, pp. 73–80; Guldon, *Zaludnienie*, p. 55. When calculating the population of Cuyavian towns, Guldon assumed the rate of 6 people per house (family). I. Gieysztorowa, *Charakter i wielkość osad*, [in:] AHP Mazovia, in this edition III.3.2.7, pp. 77–87. Gieysztorowa adopted the conversion factor of 6–7 people per house. Later, she called for an increase of this number; see also: eadem, *Wstęp do demografii staropolskiej*, Warsaw 1976, p. 182. Therefore, the conversion factor of nine people per house (family) was adopted for subsequent volumes: A. Dunin-Wąsowiczowa, *Character and size of settlements*, [in:] AHP Sandomierz, in this edition III.3.2.2; K. Chłapowski, *Character and size of settlements*, [in:] AHP Sieradz, in this edition III.3.2.5; J. Suproniuk, *Character and size of settlements*, [in:] AHP Cracow, in this edition III.3.2.1; idem, *Character and size of settlements: cities and towns in Greater Poland in the second half of the sixteenth century*, [in:] AHP Greater Poland, in this edition III.3.2b.4; cf. ⁹³ Due to the flat-rate nature of this tax, the information on the amounts given in the footnotes are provided for supplementary purposes only.

⁹⁴ J. Suproniuk, *Character and size of settlements: cities and towns in Greater Poland in the second half of the sixteenth century*, [in:] AHP Greater Poland, in this edition III.3.2b.4.

Towns in Brześć Voivodeship:

- Brześć district: Brześć Kujawski,⁹⁵ Włocławek,⁹⁶
- Kowal district: Kowal,⁹⁷
- Przedecz district: Przedecz,⁹⁸
- Radziejów district: Radziejów.⁹⁹

⁹⁵ The rate of *szos* in Brześć Kujawski was 96 florins. In 1578, the town paid 95 florins of liquor excise tax; Ducillorum contributionum 1578, p. 274. The basic data for the calculations are taken from the inspections which state that there were 192 houses inside the town walls. There is no information concerning suburbians, as they were exempt from tax. The inspections mention 115 craftsmen, and 108 female bakers and peddlers; see LWWK 1564, part 2, pp. 207–208. The inspection of 1569 gives the same number of houses. It also lists 109 craftsmen and 28 female bakers with female sellers; LWWK 1569, f. 325. The number of houses remained unchanged in the 1616–1620 inspection, but the number of craftsmen fell to 89, while the number of female bakers with peddlers was recorded as 69. The tax registers listed 48 apprentices in 1577 (ASK I 29, f. 447), 106 craftsmen in 1579 (ibidem, f. 453), 109 craftsmen, 3 fishermen and 17 *inquilini* in 1581 (ASK I 30, f. 610), 95 craftsmen, 13 fishermen and one *inquilinus* in 1582 (ibidem, f. 662), 96 craftsmen, 2 fishermen and one *inquilinus* in 1583 (ibidem, f. 733), 119 craftsmen and 29 *inquilini* in 1589 (ibidem, f. 774). At the end of the fifteenth century, there were 48 suburban families in Brześć, together with about 220 families living within the town walls; see: Brzeskie 1494, pp. 363–369; cf. Guldon, Zaludnienie, pp. 56–57.

⁹⁶ *Szos* was paid in the amount of 48 florins. In 1578, the town paid 503 florins and 29 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. The number of houses in Włocławek was quite well-documented. The inventory from 1534 enumerates 117 families living within the town walls and in the suburbs. However, one sheet is missing from the part where the list of taxed town's inhabitants and their real properties begins; see: Inw. 1534, pp. 5–6. The 1582 inventory mentions about 170 town inhabitants paying rent from town parcels, 65 of which were defined as *combustae*, 17 as suburbians and 15 as fishermen; see: Inw. 1582, pp. 2–6; Inw. 1598, p. 1: “Domus in civitate 194 exceptis domibus civitati donatis et advocatialis. Domus in nova civitate et in duobus suburbiis 61”; Inw. XVII, p. 85: ‘The number of settled parcels was 110’. The tax registers from 1570 mention an unspecified number of craftsmen, nine fishermen, a confectioner and nine innkeepers (ASK I 50, f. 9); in 1577, the register recorded tax from four craftsmen, four apprentices, 16 fishermen and 31 *inquilini* (ASK I 29, f. 448); in 1581, from 63 craftsmen and 15 fishermen (ASK I 30, f. 681); in 1582, from 62 craftsmen, 20 *inquilini* and 15 fishermen (ibidem, f. 673); in 1583, from 66 craftsmen, 16 fishermen, 24 *inquilini* (ibidem, f. 737); in 1589, from 76 craftsmen, 14 fishermen and 20 *inquilini*; cf. S. Ingot, *Stosunki społeczno-gospodarcze ludności w dobrach biskupstwa włocławskiego w pierwszej połowie XVI wieku*, Lwów 1927, p. 80; M. Morawski, *Monografia Włocławka (Włocławia)*, Włocławek 1933, p. 40. Z. Guldon reports that the sources confirm the existence of 43 houses of vicars, who were exempt from paying the rent, estimating that their total number could amount even to 100; cf. Guldon, Zaludnienie, p. 64.

⁹⁷ The rate of *szos* in Kowal amounted to 76 florins. In 1578, the town paid 167 florins and 16 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. The 1616–1620 inspection provides information on 240 burghers' houses, including Jewish ones, and two butchers; LWWK 1616, part 1, p. 257. Brzeskie 1494, pp. 379–383, provides information on 66 craftsmen and 207 houses in the hearth tax list. According to the visitation from 1598, the organist in Kowal was paid by the town's residents who were charged 1.5 *grosze* from each house. The amount obtained was 10 florins, which means that the payment was collected from 200 houses; cf. T. Nowak, *Zarys dziejów powiatu kowalskiego do końca XVIII wieku*, [in:] *Siedziby obronno-rezydencjonalne w powiecie kowalskim na Kujawach XIII–XVIII wieku*, Łódź 1991, p. 73. The tax registers report that there were 6 fishermen, 13 *inquilini*, and 14 apprentices in 1577 (ASK I 29, f. 447), 92 craftsmen, four fishermen and 18 *inquilini* in 1579 (ibidem, f. 473v), 67 craftsmen, 16 *inquilini*, and five fishermen in 1582 (ASK I 30, f. 671), 59 craftsmen, 14 *inquilini*, and five fishermen in 1583 (ibidem, f. 735), 47 craftsmen and 7 *inquilini* in 1589 (ibidem, f. 776). Z. Guldon reports that there were 950 inhabitants in the town before 1583; Guldon, Zaludnienie, p. 59.

⁹⁸ The rate of *szos* was 32 florins. In 1578, the town paid 166 florins and 8 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. According to the 1500 inventory, there were 45 houses in Przedecz, and the later inventory from 1538 reports 78 houses. In the inventory from 1556, the number of houses was estimated at 88; see: Guldon, Zaludnienie, p. 61. The same figure appears in the later 1616–1620 inspection; LWWK 1616, part 1, p. 217. The inspection from 1564–1565 lists 124 taxed parcels, also mentions 28 brewers, two blacksmiths, one furrier, 7 shoemakers, one cooper, four tailors, and 6 fishermen; LWWK 1564, part 2, p. 167. Another inspection, from 1569, provides information on 125 houses, 32 brewers, two blacksmiths, 7 shoemakers, one cooper, one carpenter, and five tailors; LWWK 1569, ff. 304v–305. The tax registers listed 8 *inquilini* in 1577 (ASK I 29, f. 447v), 13 craftsmen, five fishermen and 8 *inquilini* in 1579 (ibidem, f. 480), 26 craftsmen in 1581 (ASK I 30, f. 612v), 31 craftsmen and 6 *inquilini* in 1582 (ibidem, f. 651v), 25 craftsmen and 6 fishermen in 1583 (ibidem, f. 736), 13 craftsmen in 1589 (ibidem, f. 776v); cf. Guldon, Zaludnienie, p. 61.

⁹⁹ The rate of *szos* was 80 florins. In 1578, Radziejów paid 334 florins of liquor excise tax; Ducillorum contributionum 1578, p. 274. The inspection from 1616–1620 lists 24 houses located on the market square, 113 “street houses”, 29 houses at Oborna Street, 40 at Krakowska Street, eight nobility's houses, and eight Evangelical houses. This gives 198 houses in total. The source also mentions 47 burnt parcels which were not rebuilt after the fire. It also states that there were 23 shoemakers and eight butchers in the town; LWWK 1616, part 1, p. 348. Brzeskie 1494, pp. 383–390, records 155 houses. The tax registers list 11 craftsmen, 12 *inquilini*, 3 *homines vagi*, and 47 apprentices in 1577 (ASK I 29, f. 447), 169 craftsmen and 14 *inquilini* in 1579 (ibidem, f. 491), 140 craftsmen and 13 *inquilini* in 1581 (ASK I 30, f. 611v); 158 craftsmen and 17 *inquilini* in 1582 (ibidem, ff. 657, 670), 149 craftsmen and 24 *inquilini* in 1583 (ibidem, f. 734), 110 craftsmen, 10 fishermen, and 15 *inquilini* in 1589 (ibidem, f. 775); cf. Guldon, Zaludnienie, p. 62. He estimates that there were about 980 inhabitants.

Small towns in Brześć Voivodeship:

- Brześć district: Lubraniec,¹⁰⁰
- Kowal district: Lubień Kujawski,¹⁰¹
- Kruszwica district: Gębice,¹⁰² Kruszwica,¹⁰³ Skulsk,¹⁰⁴ Strzelno,¹⁰⁵
- Przedecz district: Chodecz,¹⁰⁶ Izbica Kujawska,¹⁰⁷
- Radziejów district: Noć,¹⁰⁸ Sompolno.¹⁰⁹

¹⁰⁰ *Szos* was paid in the amount of 4 florins. In 1578, Lubraniec paid 15 florins and 15 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. The tax registers listed four apprentices in 1577 (ASK I 29, f. 448v), 13 craftsmen in 1579 (ibidem, f. 469), 14 craftsmen and 3 *inquilini* in 1581 (ASK I 30, f. 614), nine craftsmen in 1582 (ibidem, f. 675), nine craftsmen in 1583 (ibidem, f. 740), seven craftsmen and 2 *inquilini* (ibidem, f. 777v). The oath (*jurament*) from 1634, entered into the gord court books of Brześć, mentions 47 houses; see Guldon, *Zaludnienie*, p. 61.

¹⁰¹ Lubień was exempted from paying *szos*, most probably because the town was seriously damaged in a fire. In 1578, 5 florins were paid for liquor excise tax; Ducillorum contributionum 1578, p. 274. The tax registers listed 13 craftsmen and two *inquilini* in 1567 (ASK I 29, f. 392), and seven craftsmen in 1579 (ibidem, f. 477); cf. Guldon, *Zaludnienie*, p. 60: more detailed data is available only for the post-Deluge period, but Guldon estimates that the population was about 129 people.

¹⁰² The rate of *szos* was 48 florins. In 1578, the town of Gębice paid 108 florins and 26 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. Tax registers list the following: 6 craftsmen and 10 *inquilini* in 1577 (ASK I 29, f. 449), 41 craftsmen and 8 *inquilini* in 1579 (ibidem, f. 507), 78 craftsmen and 18 *inquilini* in 1581 (ASK I 30, f. 605), 65 craftsmen and 13 *inquilini* in 1582 (ibidem, ff. 665, 672v), 76 craftsmen and 21 *inquilini* in 1583 (ibidem, ff. 737, 776v), 47 craftsmen in 1589 (ibidem, f. 776v); Guldon, *Zaludnienie*, p. 58.

¹⁰³ The rate of *szos* was 4 florins. In 1578, the town paid 40 florins and 4 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. The registers include information on two fishermen and one *inquilinus* in 1577 (ASK I 29, f. 448), 6 craftsmen and 2 fishermen in 1579 (ibidem, f. 503), 9 craftsmen and 3 *inquilini* in 1581 (ASK I 30, f. 612v), eight craftsmen in 1582 (ibidem, f. 672), 15 craftsmen and two *inquilini* in 1583 (ibidem, f. 736v), 10 craftsmen and five *inquilini* in 1589 (ibidem, f. 777); cf. Guldon, *Zaludnienie*, p. 60; K. Górski, *Dzieje Kruszwicy do końca XVII wieku*, [in:] *Kruszwica. Zarys monograficzny*, ed. J. Grześkowiak, Toruń 1965, p. 210.

¹⁰⁴ The rate of *szos* was 10 florins 6 *grosze*. In 1578, the town of Skulsk did not pay liquor excise tax; Ducillorum contributionum 1578, p. 274. According to the tax registers, in Skulsk, there were five craftsmen and two *inquilini* in 1579 (ASK I 29, f. 445), five craftsmen, nine fishermen and 2 *inquilini* in 1581 (ASK I 30, f. 504), five craftsmen, nine fishermen and two *inquilini* in 1582 (ibidem, f. 665), seven craftsmen and six *inquilini* in 1589 (ibidem, f. 777). On the other hand, the register from 1583 noted 21 houses in the town. The 1616–1620 inspection provides information about 220½ settled parcels an two butchers; LWWK 1616, part 1, p. 349; cf. Guldon, *Zaludnienie*, p. 63.

¹⁰⁵ The rate of *szos* in Strzelno was 32 florins. In 1578, the town paid 113 florins of liquor excise tax; Ducillorum contributionum 1578, p. 274. The tax registers mention 31 craftsmen in 1570 (ASK I 50, f. 782), 3 craftsmen, 15 *inquilini*, and five apprentices in 1577 (ASK I 29, f. 448), 45 craftsmen and 8 *inquilini* in 1579 (ibidem, f. 506v), 62 craftsmen and 15 *inquilini* in 1581 (ASK I 30, f. 613), 46 craftsmen and nine fishermen in 1582 (ibidem, f. 673v), 63 craftsmen in 1583 (ibidem, f. 738); in 1589, the town was exempted from the tax because of a fire (ibidem, f. 777v); cf. Guldon, *Zaludnienie*, p. 64.

¹⁰⁶ The rate of *szos* in Chodecz was 16 florins. In 1578, the town paid 49 florins and 4 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. The tax registers listed 12 craftsmen and five *inquilini* in 1579 (ASK I 29, f. 486), 23 craftsmen and 3 *inquilini* in 1581 (ASK I 30, f. 613v), 16 craftsmen and 3 *inquilini* in 1582 (ibidem, f. 674v), 25 craftsmen and 2 *inquilini* in 1583 (ibidem, f. 739), eight craftsmen and 3 *inquilini* in 1589 (ibidem, f. 777v); cf. Guldon, *Zaludnienie*, p. 58.

¹⁰⁷ The rate of *szos* in Izbica Kujawska was 12 florins. In 1578, the town paid 24 florins of liquor excise tax; Ducillorum contributionum 1578, p. 274. The tax registers listed four *inquilini* in 1577 (ASK I 29, f. 449), two craftsmen and four *inquilini* in 1582 (ASK I 30, f. 675), two craftsmen and four *inquilini* in 1583 (ibidem, f. 739v), five craftsmen and 3 *inquilini* in 1589 (ibidem, f. 777). The town was burnt down in 1579, which is why the rate of *szos* was lowered in 1582–1583 (ASK I 29, f. 483v; ASK I 30, ff. 675, 739v); cf. Guldon, *Zaludnienie*, p. 59.

¹⁰⁸ ASK I 29, f. 499: in 1579, four craftsmen and two butchers; ASK I 30, f. 599v: in 1581, four unspecified craftsmen, two butchers, one seller, one female baker; ibidem, f. 661: in 1582, four craftsmen, one female baker, two peddlers, two butchers; ibidem, f. 723: in 1583, 4 craftsmen, one female baker, one peddler, two butchers; ibidem, f. 767: in 1589, four unspecified craftsmen, and one butcher.

¹⁰⁹ The rate of *szos* in Sompolno was 2 florins 6 *grosze*. In 1578, the town paid 7 florins and 23 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. The inspection of the town and village of Sompolno in 1590, quoted by A. Gajda, contains information that there were 56 taxed houses in the town; see: idem, *Monografia Sompolna: z dodatkiem o Lubustwie i okolicy (z zastosowaniem nowej pisowni)*, Koło 1936, p. 33. The tax registers report 6 craftsmen, 15 *inquilini*, and five apprentices in 1577 (ASK I 29, f. 449), seven craftsmen and 3 *inquilini* in 1579 (ibidem, f. 501), 11 craftsmen and two *inquilini* (ASK I 30, f. 674), 10 craftsmen and two *inquilini* in 1583 (ibidem, f. 738v), 6 craftsmen in 1589 (ibidem, f. 777v); cf. Guldon, *Zaludnienie*, p. 63.

Towns in Inowrocław Voivodeship:

- Bydgoszcz district: Bydgoszcz,¹¹⁰ Koronowo,¹¹¹
- Inowrocław district: Inowrocław,¹¹² Pakość.¹¹³

Small towns in Inowrocław Voivodeship:

- Bydgoszcz district: Fordon,¹¹⁴ Solec Kujawski,¹¹⁵

¹¹⁰ The rate of *szos* collected from Bydgoszcz was 240 florins. In 1578, paid 1352 florins and 27 *grosze*; Ducillorum contributionum 1578, p. 274. The visitation from 1596 mentions 300 houses within the town walls of Bydgoszcz; see: *Documenta ecclesias civitatis Bidgostiensis (Bromberg) concernentia*, pub. E. Becker, Berlin 1918, p. 25. The same number is mentioned in a court judgement of 1600 issued in a dispute between the town and the vogt's office, entered into *Liber Privilegiorum Civitatis Bidgostiensis* (State Archives in Bydgoszcz); see Z. Guldon, *Zaludnienie Bydgoszczy*, pp. 109–110. He estimates that there were about 240 suburbians in the second half of the seventeenth century; cf. *Dzieje Bydgoszczy* ("History of Bydgoszcz"), vol. 1: *Do roku 1920* ("Up to 1920"), ed. M. Biskup, Warsaw–Poznań 1991, pp. 156–157. Earlier studies incorrectly placed Bydgoszcz among the largest Polish towns of that time; cf. K. Kantak, *Przedmowa*, [in:] *Kronika Bernardynów bydgoskich*, pub. K. Kantak, Poznań 1907, pp. 19–20. The tax registers from the second half of the sixteenth century list the following: 98 taxed craftsmen, 3 merchants, two Scots, and 42 *inquilini* in 1563 (ASK I 92, f. 17), 12 craftsmen in 1565 (ASK I 50, f. 798), 17 craftsmen and 20 female innkeepers in 1573 (ibidem, f. 763), in 1576, the register mentioned two fishermen and eight innkeepers (ibidem, f. 734), in 1577, the register mentioned only two fishermen (ibidem, ff. 711v–712), in 1581, it referred to 94 craftsmen and two fishermen (ASK I 30, f. 689), in 1582, 102 craftsmen and two fishermen (ASK I 50, f. 652v), in 1583, 105 craftsmen and two fishermen (ibidem, f. 616), and in 1589, 89 craftsmen and 15 *inquilini* (ASK I 30, f. 797 v).

¹¹¹ The rate of *szos* in Koronowo was 12 florins. In 1578, the town paid 249 florins and 12 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. Inventory of the estates of Koronowo Monastery from 1564–1565 (AGAD, Division I, Varia IV, ff. 4–7v, 38–41v) lists: 153 burghers paying taxes from lans, five female sellers, three butchers, eight female bakers, 20 shoemakers in 1564. In the following year, it mentions 149 burghers, four female sellers, 10 female bakers, 6 butchers, and 22 shoemakers. The tax registers contain information on 53 craftsmen, two fishermen, and one Jew in 1563 (ASK I 92, f. 17v), 52 craftsmen and 17 *inquilini* in 1564 (ASK I 50, ff. 818–181v), 22 craftsmen, 14 *inquilini* and 15 apprentices in 1565 (ibidem, f. 798), 35 craftsmen, 26 *inquilini*, and nine apprentices in 1573 (ibidem, ff. 764v–767), 39 craftsmen and eight *inquilini* in 1576 (ibidem, f. 737), 30 craftsmen in 1577 (ibidem, ff. 713v–714), 38 craftsmen and 6 *inquilini* in 1581 (ibidem, f. 690), 52 craftsmen and 6 *inquilini* in 1582 (ibidem, f. 653v), 55 craftsmen and 6 *inquilini* in 1583 (ibidem, f. 617), 60 craftsmen and 34 *inquilini* in 1589 (ASK I 30, f. 798); cf. Guldon, *Zaludnienie*, p. 66: reports that there were 975 burghers.

¹¹² The rate of *szos* was 120 florins. In 1578, Inowrocław paid 489 florins and 11 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. The 1564–1565 inspection provides information about 220½ settled parcels and 6 butchers (LWWK 1564, part 2, p. 244) and 27 Jewish houses (ibidem, p. 274); the same number of town parcels is also given by the inspection from 1569, and it also mentions 13 shoemakers and five butchers (LWWK 1569, f. 340v). At the beginning of the seventeenth century, the number of houses rose to 310; see LWWK 1616, part 1, p. 276. The tax registers from 1553 mention 15 taxed Jews (ASK I 50, f. 848), 156 Jews in 1563 (ASK I 92, f. 10), 168 Jews in 1564 (ASK I 50, ff. 810–810v), 50 craftsmen, eight female peddlers, seven *inquilini* and *homines vagi*, 16 apprentices and 136 Jews (ibidem, f. 792), four *inquilini*, seven *homines vagi*, 12 apprentices and 1 female innkeeper in 1573 (ibidem, f. 672v), two female innkeepers in 1576 (ibidem, f. 766v), 3 *inquilini*, 11 apprentices, and two *homines vagi* in 1577 (ibidem, f. 711v), 57 craftsmen, 3 fishermen, and 10 *inquilini* in 1581 (ibidem, f. 686), 83 craftsmen and 16 *inquilini* in 1583 (ibidem, f. 613), 98 craftsmen and 32 *inquilini* in 1589 (ASK I 30, p. 795); cf. Guldon, *Zaludnienie*, p. 66: 1,860 inhabitants; *Dzieje Inowroclawia*, vol. 1: *Do 1919 r.*, ed. M. Biskup, Warsaw–Poznań–Toruń 1978, pp. 250–251.

¹¹³ The *szos* rate in Pakość was 30 florins, and in 1582 and 1583, it increased to 84 florins. In 1578, the town paid 864 florins and 14 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. In the registers from 1534 (ASK I 12, f. 396v) and 1535 (ibidem, f. 497), tax collections from Pakość were recorded in Gniezno district. The registers from the second half of the sixteenth century list the following: 74 craftsmen, 172 Jews, 36 *homines vagi* and *inquilini*, and 10 female peddlers in 1563 (ASK I 92, f. 10), 173 Jews (craftsmen paid taxes collectively) in 1564 (ASK I 50, ff. 548, 810), nine craftsmen, 140 Jews, and 40 apprentices in 1565 (ibidem, f. 792v), 15 craftsmen in 1573 (ibidem, f. 764), 1 craftsman, 23 *inquilini*, and 24 apprentices in 1576 (ibidem, ff. 735v–736), two bakers, 1 apprentice in 1577 (ibidem, ff. 712v–713), seven fishermen, 70 craftsmen and 46 *inquilini* in 1581 (ibidem, f. 687), 121 craftsmen, seven fishermen, and 45 *inquilini* in 1582 (ibidem, f. 650v), 119 craftsmen, 7 fishermen, and 21 *inquilini* in 1583 (ibidem, f. 614), 104 craftsmen, seven fishermen, and 35 *inquilini* in 1589 (ibidem, f. 796); cf. Guldon, *Zaludnienie*, p. 67: using one register from 1583 as his source, Guldon reports that there were 850 inhabitants in the period in question.

¹¹⁴ The rate of *szos* was 4 florins. In 1578, the town of Fordon paid 13 florins and 5 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. Tax registers list the following: 6 craftsmen in 1564 (ASK I 50, f. 818), 3 craftsmen in 1573 (ibidem, f. 767), four craftsmen in 1576 (ibidem, f. 740), four craftsmen and four fishermen in 1581 (ibidem, f. 691), 3 craftsmen and two fishermen in 1582 (ibidem, f. 654), while the register from 1583 mentions 24 burghers, four craftsmen, and 3 fishermen, and its 1589 counterpart includes 25 *inquilini* and 3 fishermen (ASK I 30, f. 798); cf. Guldon, *Zaludnienie*, p. 65.

¹¹⁵ The rate of *szos* in Solec Kujawski was 9 florins 18 *grosze*. In 1578, the town paid 120 florins and 19 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. The tax registers mention four craftsmen in 1563 (ASK I 92, f. 18), 5 craftsmen and 6 *inquilini* in 1564 (ASK I 50, f. 818), 24 craftsmen and 14 *inquilini* in 1581 (ibidem, f. 690v), 22 craftsmen and 14 *inquilini* in 1582 and 1583 (ibidem, ff. 617v, 654), 6 craftsmen and 12 *inquilini* in 1589 (ibidem, f. 798v); cf. Guldon, *Zaludnienie*, p. 68.

- Inowrocław district: Gniewkowo,¹¹⁶ Raciążek,¹¹⁷ Podgórz,¹¹⁸ Służewo.¹¹⁹
- Towns in Dobrzyń land:
- Lipno district: Nieszawa,¹²⁰
- Rypin district: Rypin.¹²¹

¹¹⁶ The rate of *szos* was 24 florins. In 1578, the town paid 293 florins and 13 *grosze* of liquor tax; Ducillorum contributionum 1578, p. 274. According to the inspection from 1569, there were 37½ plots (?) and two breweries in Gniewkowo, the source also mentions seven *hortulani*; LWWK 1569 f. 350. The same number is given two years earlier in the inventory of the Gniewkowo lease; see: Z. Guldon, K. Wajda, *Zarys dziejów Gniewkowa*, Bydgoszcz 1970, p. 87. The tax registers mention 10 craftsmen and 10 *inquilini* in 1563 (ASK I 92, f. 11), 8 craftsmen in 1564 (ASK I 50, f. 810v), two craftsmen and eight *inquilini* in 1565 (ibidem, f. 793), 24 *inquilini* in 1576 (ibidem, ff. 737v–738), 11 craftsmen, 20 *inquilini* in 1581 (ibidem, f. 678v), 3 craftsmen and 6 *inquilini* in 1583 (ibidem, f. 651), nine craftsmen and four *hortulani* 1589 (ASK I 30, f. 797); cf. Guldon, *Zaludnienie*, p. 66: the number of inhabitants is not given because the sources provide only general information on the subject.

¹¹⁷ *Szos* rate in Raciążek was 3 florins 6 *grosze*. In 1578, the town paid 90 florins and 22 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. The inventory of the estates of Włocławek Bishopric from 1582 lists 76 burgher families paying various kinds of fees; see: Inw. 1582, pp. 184–188. On the other hand, a later inventory from 1598 states as follows: “Sunt in eodem oppido domus cum suis partibus familias nro 94; areae desertae nro 21”; cf. Inw. 1598, p. 64; cf. S. Inglot, *Stosunki społeczno-gospodarcze*, p. 79. The tax registers mention 35 craftsmen in 1563 (ASK I 92, f. 11), 26 craftsmen in 1564 (ASK I 50, f. 810), 21 craftsmen and five *inquilini* in 1570 (ibidem, f. 777v), 16 craftsmen and five *inquilini* in 1573 (ibidem, f. 765v), 17 craftsmen in 1576 (ibidem, f. 738), seven craftsmen and 8 *inquilini* in 1581 (ibidem, f. 688), seven craftsmen and four *inquilini* in 1589 (ASK I 30, f. 796), while in 1582 and 1583, the town was exempted from the tax because of a fire (ASK I 50, ff. 652, 615v); cf. Guldon, *Zaludnienie*, p. 68.

¹¹⁸ The rate of *szos* in Podgórz was 14 florins. In 1578, the town did not pay the liquor excise tax; Ducillorum contributionum 1578, p. 274. The 1616–1620 inspection states that there were 103 houses in the town; LWWK 1616, part 1, f. 295. On the other hand, the tax registers listed 12 craftsmen and 12 *inquilini* in 1564 (ASK I 50, f. 810v), 12 craftsmen, seven fishermen, 10 *inquilini*, six *homines vagi*, and one apprentice in 1565 (ibidem, f. 793), nine craftsmen, five apprentices, and six fishermen in 1573 (ibidem, ff. 766–766v), seven craftsmen, five fishermen, and 25 *hortulani* in 1576 (ibidem, ff. 739–739v), 6 fishermen in 1577 (ibidem, f. 715v), 14 craftsmen and eight *inquilini* in 1581 (ibidem, f. 688v), 23 craftsmen, 10 *inquilini*, and five fishermen in 1582 (ibidem, f. 652), 20 craftsmen, 10 *inquilini*, and five fishermen in 1583 (ibidem, p. 615v), 20 craftsmen and 15 *inquilini* in 1589 (ibidem, f. 796v); cf. Guldon, *Zaludnienie*, p. 67.

¹¹⁹ The rate of *szos* was 24 florins. In 1578, the town paid 122 florins and 24 *grosze* of liquor excise tax; Ducillorum contributionum 1578, p. 274. According to the tax registers from 1576, the town had 22 craftsmen, 3 *hortulani* and two apprentices (ASK I 50, f. 738v), two craftsmen, 3 *hortulani*, and 3 apprentices in 1577 (ibidem, f. 715), 26 craftsmen in 1581 (ibidem, f. 688), 40 craftsmen and five *hortulani* in 1582 (ibidem, f. 651v), 42 craftsmen and five *hortulani* in 1583 (ibidem, f. 615). The town was exempt from taxes in 1563, 1573, 1577 because of fires (ASK I 92, f. 4; ASK I 50, ff. 766, 715); cf. Guldon, *Zaludnienie*, p. 68.

¹²⁰ The rate of *szos* in Nowa Nieszawa was 76 florins 24 *grosze*. In 1578, the town paid 308 florins and 12 *grosze* of liquor tax; Ducillorum contributionum 1578, p. 274. In 1564 and 1565, the town consistently paid a fairly high amount of the liquor excise tax, *i.e.* 363 florins 10 *grosze* (ASK II 24, f. 156v) and 207 florins and 20 *grosze* (ibidem, f. 282v). In 1569, because of a plague, the amount decreased to 174 florins (ASK I 112, f. 79v). Tax registers do not provide a specific number of craftsmen, the tax was most often paid collectively (ASK I 30, ff. 446 and 349). The first information on the number of houses comes from the inspection from the second half of the seventeenth century; see: LWWK 1659, p. 290: “There are 61 settled houses and tenement houses, seven nobility’s houses, and 31 *włoki* in the town.” Earlier, in a tax declaration from 1659, submitted by representatives of the town’s authorities to the gord office of Bobrowniki, 117 houses were indicated in Nieszawa in 1654. In turn, according to these books, the number of inhabitants of Nieszawa in 1658 was 666; see: Z. Guldon, *Osadnictwo ziemi dobrzyńskiej*, p. 249. On the basis of the high amount of the liquor excise tax paid by the town, comparable to other larger settlements, it should be assumed that Nieszawa was at that point a town with more than 1,000 inhabitants. At that time, the town benefited from the intense sale and river transport of grain, as evidenced by the large number of granaries there; see: J. Dumanowski, *Czasy nowożytnie*, [in:] *Dzieje Nieszawy*, vol. 1, p. 56 f. There was also a Franciscan monastery in the town.

¹²¹ The rate of *szos* was 60 florins. In 1578, the town of Rypin paid 180 florins of liquor tax; Ducillorum contributionum 1578, p. 274. In 1564 and 1565, the amount was, respectively, 129 florins 7 *grosze* (ASK II 24, f. 155v) and 115 florins and 24 *grosze* (ibidem, f. 283r), while in 1569, Rypin paid 136 florins and 5 *grosze* (ASK I 112, f. 80v). The tax registers from 1565 mention six unspecified craftsmen and 15 apprentices (ASK I 30, ff. 354–355). Other registers contain no information on the subject. The inspection from 1628–1632 states that the small town got severely damaged by the Swedes, and, at that time, there were only nine houses there, inhabited by 13 burghers, while before the attack, the population was 150; see: LWWK 1628, part 3, p. 62. Based on the above, Z. Guldon reports that there were about 150 families in the town at the turn of the seventeenth century; see: idem, *Dzieje powiatu rypińskiego*, [in:] *Szkice rypińskie. Materiały z sesji popularno-naukowej [sic!] zorganizowanej z okazji 900-lecia Rypina w dniu 27 listopada 1965 r.*, Bydgoszcz 1967, p. 87; cf. P. Bokota, P. Gałkowski, *Rypin w czasach nowożytnych (XVI–XVIII wiek)*, [in:] *Rypin – dzieje miasta*, vol. 1: *Do 1918 roku*, ed. K. Mikulski, Rypin 2010, pp. 201–206. In comparison, Z. Guldon reports 72 hearths in the eighteenth century; see: idem, *Zaludnienie ziemi dobrzyńskiej w końcu XVIII wieku*, ZH, vol. 39, 1974, no. 1, p. 101. The town was surrounded by town walls as early as in the fourteenth century. It included three churches and a hospital; see: C. Biały, *Parafie rypińskie oraz kościoły i kaplice na ich terenie*, Rypin 1983. Taking into account the above premises, as well as similar amounts of liquor excise tax collected from other settlements with populations of more than 1,000 inhabitants, we assumed that, in the analysed period, Rypin belonged to the category of towns with more than 1,000 inhabitants.

Small towns in Dobrzyń land:

- Dobrzyń district: Dobrzyń-upon-Vistula,¹²²
- Lipno district: Bobrowniki,¹²³ Lipno,¹²⁴ Skepe,¹²⁵
- Rypin district: Górzno.¹²⁶

The presented lists of the number of towns located in Cuyavia and Dobrzyń land, taking into account their ownership status and differentiation in terms of size, prove the relatively low level of urbanization of this region. However, it should be noted that the density of the urban network in individual areas was uneven. Most towns, including settlements with more than 1,000 inhabitants, were located in Brześć Voivodeship (1 town per 220 km²), where the ratio of towns to other settlement types was approximately 1:44. The ratio varied across districts. There was one town for about 14 settlements in Kruszwica district, but these urban settlements were small and poorly developed. In Brześć district, there

¹²² The rate of *szos* was 80 florins. In 1578, the town paid 80 florins of liquor excise tax; Ducillorum contributionum 1578, p. 274. In 1564 and 1565, the amount of the liquor excise tax was, respectively, 121 florins 27 *grosze* (ASK II 24, f. 157v) and 74 florins and 14 *grosze* (ibidem, f. 281v), and 78 florins in 1569 (ASK I 112, f. 78v). The registers from 1564, 1565 and 1573 do not give the number of taxed craftsmen. They contain only information on the total sum of the collected tax, which sometimes applies also to other groups of people. The 1565 inspection provided information on nine Jewish houses and three houses which were rented by Jews from Christians; see LWWK 1564, part 2, p. 274. A later inspection from the second half of the seventeenth century lists 30 residences. On the other hand, Z. Guldon states that the poll tax at that time (1658) was paid by 363 people. However, the town suffered greatly during the Swedish invasion in 1626–1629. Elsewhere, for the eighteenth century, Guldon states that there were 162 hearths in Dobrzyń; see: idem, *Zaludnienie ziemi dobrzyńskiej*, p. 101. The collected amount of *szos* and liquor excise tax suggest that, in the second half of the sixteenth century, the town's population was over 1,000 people.

¹²³ Bobrowniki paid 12 florins of *szos*. In 1578, the town paid 80 florins of liquor excise tax; Ducillorum contributionum 1578, p. 274. In 1564 and 1565, the amount was, respectively, 55 florins (ASK II 24, f. 156v) and 52 florins and 8 *grosze* (ibidem, f. 282v) for the liquor excise tax, and 54 florins 12 *grosze* in 1569 (ASK I 112, f. 79v). It is difficult to determine the supposed order of magnitude of this settlement on the basis of data from tax registers: ASK I 30, p. 507: six unspecified craftsmen and one miller; ASK I 30, f. 352: six *homines vagi*; ibidem, f. 452v: six *homines vagi*; five florins of tax were paid for an unspecified number of *hortulani*. The first information on the number of houses comes from the inspection from the second half of the seventeenth century; LWWK 1659, p. 292: "There used to be 80 residences. Now, there's only 20 settled houses." K. Mikulski, in the table concerning population of town of Cuyavia and Dobrzyń land in the second half of the sixteenth century, indicates that it had 200 inhabitants; see: idem, *Dzieje nowożytne, [in:] Dzieje regionu kujawsko-pomorskiego*, ed. A. Radziwiński, Toruń 2017, p. 258. Z. Guldon states that, in 1775, there were 61 hearths; cf. idem, *Zaludnienie ziemi dobrzyńskiej*, p. 101.

¹²⁴ The rate of *szos* in Lipno was 64 florins. In 1578, paid 89 florins and 18 *grosze*; Ducillorum contributionum 1578, p. 274. While in 1564 and 1565, it paid: 67 florins 20 *grosze* (ASK II 24, f. 156v) and 46 florins and 12 *grosze* (ibidem, f. 282v), while in 1569, the payment was 90 florins (ASK I 112, f. 79v). The tax registers list: 31 *hortulani* (ASK I 30, ff. 333 and 413) and 54 unspecified craftsmen (ibidem, f. 507). In accordance with the inspection from the first half of the seventeenth century, there were 46 settled houses in the town, while 160 parcels were abandoned. LWWK 1628, part 3, p. 68 informs as follows: "There are 46 residences in this town. The rest consists of empty parcels, of which there are 160, both in the town and in the suburb." In turn, Z. Guldon provides information on the number of people living in the suburbs, but they refer to the second half of the seventeenth century. He lists 11 suburbians settled in Zastawie and five in Św. Barbara suburb. He also reports that, in accordance with the inspection of 1661, there were 13 houses in the town at that point, with the proviso that "there used to be, *quondam*, 300 settlements"; see: Guldon 1981, p. 249.

¹²⁵ The rate of *szos* was 4 florins. In 1578, the town did not pay the liquor excise tax; Ducillorum contributionum 1578, p. 274. In 1564 and 1565, it paid, respectively, 9 florins 3 *grosze* (ASK II 24, f. 156v) and 11 florins and 12 *grosze* (ibidem, f. 282v), and in 1569, 14 florins (ASK I 112, f. 79v). According to the tax register from 1564, the town had nine craftsmen, three innkeepers, and one *hortulanus* (ASK I 30, f. 352). The register from 1573 mentions taxation of three unspecified craftsmen (ibidem, f. 507). According to the inventory of the local estates from 1571, there were 230 houses in the town: "The town's inhabitants of Skepe pay 1 grosz from a morgen; the number of morgens is the number of *grosze* paid. They also pay 1 grosz from a house each. The total number of houses is two hundred and thirty. From the gardens they have in the field, they pay 1 ½ each. There were three settled wheelwrights there"; see: *Materiały do dziejów rolnictwa w Polsce*, p. 105; cf. Z. Guldon, *Osadnictwo ziemi dobrzyńskiej*, p. 250. The information raises some doubts, however, as it is a number comparable to the population of Brześć Kujawski.

¹²⁶ In 1578, the town did not pay the liquor excise tax; Ducillorum contributionum 1578, p. 274. In 1564 and 1565, the following amounts were recorded: 18 florins 3 *grosze* and 6 denarii (ASK II 24, f. 155v) and 17 florins and 3 *grosze* and 6 denarii (ibidem, f. 282r), while in 1569, the amount was 14 florins and 6 *grosze*. The registers mention eight fishermen in 1564 (ASK I 30, p. 325v), and in 1565, the tax in the amount of 6 florins and 6 *grosze* was collected from an unspecified number of craftsmen, while the registers of 1573 refer to one coppersmith and five *homines vagi*, and *szos* was counted together with the tax from the number of craftsmen. The inventory of Płock Diocese from 1595 provides slightly more information about the population of the town, listing 43 town inhabitants that work in farming, eight tailors, 11 shoemakers, two furriers, three blacksmiths, one cooper, and one stove-fitter; see: Z. Guldon, *Osadnictwo ziemi dobrzyńskiej*, p. 250.

Table 3. Urban network density in Cuyavia and Dobrzyń land in the second half of the sixteenth century

District	Area in km ² acc. to AHP	Towns with population exceeding 1,000 inhabitants	Small towns	Total	Number of km ² per town
Brześć district	1,157.2	2	1	3	386
Kowal district	611.5	1	1	2	306
Kruszwica district	302.9	0	4	4	76
Przedecz district	494.5	1	2	3	165
Radziejów district	727.2	1	2	3	242
Brześć Voivodeship	3,293.3	5	10	15	220
Bydgoszcz district	1,386	2	2	4	347
Inowrocław district	1,389.1	2	4	6	232
Inowrocław Voivodeship	2,775.1	4	6	10	278
Dobrzyń district	508.5	0	1	1	508
Lipno district	1,323.2	1	3	4	331
Rypin district	1,231.6	1	1	2	616
Dobrzyń land	3,063.3	2	5	7	438
Total	9,131.7	11	21	32	285

Table 4. Settlement-to-town rate in Cuyavia and Dobrzyń land in the second half of the sixteenth century

District	Towns	Villages	All village settlements (without towns and deserted settlements)	Number of village settlements per town	Number of all settlements per town
Brześć district	3	209	265	70	88
Kowal district	2	62.5	77.5	31	39
Kruszwica district	4	47.5	55.5	12	14
Przedecz district	3	108	120	36	40
Radziejów district	3	128	147	43	49
Brześć Voivodeship	15	555	665	37	44
Bydgoszcz district	4	88	111	22	28
Inowrocław district	6	179.5	222.5	30	37
Inowrocław Voivodeship	10	267.5	333.5	27	33
Dobrzyń district	1	103	108	103	108
Lipno district	4	133	142	33	35.5
Rypin district	2	124	131	62	65.5
Dobrzyń land	7	360	381	51	55
Total	32	1,182.5	1,378.5	37	43

were 88 settlements per one town, including approx. 70 villages. The density of settlements was slightly lower in Inowrocław Voivodeship (one town per 278 km²). The ratio of towns to remaining settlement types was 1:33 there, with a greater concentration of urban settlements in Bydgoszcz district (one town per approx. 28 settlements). However, the extremely poorly developed urban network in Dobrzyń land (1 town per 438 km²) stands out in particular. In Dobrzyń district, there was one town for 508 km², and in Rypin district, this area was as large as 616 km². In Dobrzyń land, there was one town for about 55 settlements, while in Dobrzyń district, there was only one town for 108 other types of settlements. The largest number of towns in relation to other types of settlements (1 for 35.5) was in Lipno district, however, just as in the case of Kruszwica district, these were all poorly developed, small, local settlements.

The density of urban development was lower in Cuyavia and Dobrzyń land than in the neighbouring Greater Poland (1 town per 220 km²),¹²⁷ Łęczyca Voivodeship (1 town per 160 km²)¹²⁸ and Sieradz Voivodeship (one town per 234 km²).¹²⁹ It seems that it can be compared with the then state of urbanisation of Mazovia (one town per 313 km²).¹³⁰ In terms of the density of urban settlements, the territory of Cuyavia and Dobrzyń land did better than the area of Royal Prussia, where in Chełmno and Malbork Voivodeships there was 1 town per, respectively, 332 km² and 349 km², and, in Pomeranian Voivodeship, even 806 km².¹³¹ However, the low density of urban settlements in this area resulted from the presence of strong settlements, the best-developed ones in the country, and the lack of small towns belonging to nobility. The phenomenon characteristic of other areas of the Crown in the fifteenth and sixteenth centuries – an intense process of private town foundation – did not occur on a larger scale in Cuyavia and Dobrzyń land. The only successfully established settlement, Lubraniec, did not develop sufficiently and remained a small town. The few foundation attempts which were undertaken later ended in failure. Perhaps it was due to the influence of geographic conditions, combined with a slightly peripheral location in relation to the leading land trade routes and the monopolization of the Vistula trade by larger settlements located outside the discussed territory.

In Cuyavia and Dobrzyń land, as in other areas of the Crown, the most numerous town settlements were small towns (with populations of 1,000 inhabitants or less). They constituted 68.75% of the total number of urban settlements in this area. In Brześć Voivodeship, the percentage ratio of the number of small towns to the total number of towns is 53.3%. Only small towns were located in Kruszwica district. The advantage of this type of settlements is also visible in Inowrocław Voivodeship (60%), especially in Inowrocław district, where it amounted to 66.7% of the total number of towns. This group included almost all ecclesiastical and noble-held towns and villages, except Koronowo, Pakość and Włocławek. It also included 11 royal small towns, or a total of 61.1% of the towns belonging to the domain. In Dobrzyń land, small towns constitute 71.42% of all settlements.

Most towns with over 1,000 inhabitants were located in Brześć Voivodeship. This group included almost all towns that were capitals of districts, except for Kruszwica, which were owned by the king. The largest settlement was Włocławek – the capital of the bishopric with a large number of clergy living in the town of over 3,000 inhabitants. On the other hand, the remaining settlements including Brześć Kujawski, Kowal, Przedecz, and Radziejów had slightly smaller populations of up to 2,000 inhabitants. Of the towns in Inowrocław Voivodeship, the most populated was the capital of the Bydgoszcz district – Bydgoszcz (over 3,000 inhabitants), with Inowrocław being slightly smaller, even though it performed important administrative functions as the capital of the district and voivodeship (up to 3,000 inhabitants). As it turns out, larger settlements included also Pakość and Koronowo (up to 2,000 inhabitants), and in Dobrzyń land, the grain-trading Nieszawa, a former competitor of Toruń, as well as Rypin – the district capital. In the analysed region, there was no settlement that could be classified as a large town with over 5,000 residents.

III.3.2c.6 CHARACTER AND SIZE OF SETTLEMENTS: CASTLES AND ABBEYS

Michał Słomski

Introductory remarks

As in the previous volumes of the AHP series, the main map in the Cuyavia-Dobrzyń volume depicts castles which existed in the second half of the sixteenth century in Brześć and Inowrocław Voivodeships and in Dobrzyń land. It is based on the entries included in the *Leksykon Zamków w Polsce* (*Lexicon of Polish Castles*; hereinafter: *Lexicon*). There were altogether 17 castles across Cuyavia and Dobrzyń land mentioned in the *Lexicon*,¹ and most of them were included on the main map. The catalogue of castles created by Bohdan Guerquin² was another source used for the map, albeit to a smaller extent. We also analysed numerous works on the castles of Cuyavia and Dobrzyń land, published in relatively extensive literature of the subject related mainly to the Brześć part of Cuyavia and Dobrzyń land, treating them as important sources of information.³ The castles of Włocławek bishops were also frequently referenced in the written works that we took into account in our work.⁴

In this volume, castles are understood to refer to buildings which were defined in the Latin sources with the Latin terms *castrum* and *arx*, and the Polish word *zamek*, which were fortified seats constituting a permanent or temporary residence of the owner or an official appointed by said owner. They were usually located in the centre of an estate or a cluster of estates, and played a role in the administration of the estate(s), performed representative functions and conveyed certain symbolic meanings.⁵ We are aware that such a choice of classifying criterion is somewhat troublesome.

¹ *Lexicon*. In alphabetical order: Bobrowniki, Brześć Kujawski (Brzeście), Bydgoszcz, Dobrzyń-upon-Vistula (Dobrzyń), Dybów, Inowrocław, Kowal (Kowale), Kruszwica, Mała Nieszawka (Nieszewka Mała), Pakość, Przedecz, Raciążek (Raciąż), Radziejów, Radziki Duże (Radziki), Sadłowo, Włocławek (Włocław), and Złotoria. The references to specific pages of the *Lexicon* can be found in the footnotes devoted to individual castles.

⁵ The broad context in which castles operated has recently been outlined in S. Gawlas, *Zamek średniowieczny: geneza i funkcje społeczno-ustrojowe*, [in:] *Początki murowanych zamków w Polsce do połowy XIV w. Materiały z I Ogólnopolskiej Konferencji Colloquia Castrensia zorganizowanej przez Zamek Królewski w Warszawie – Muzeum i Zakład Architektury Polskiej Wydziału Architektury Politechniki Warszawskiej: 15–16 października 2015 r.*, ed. A. Bocheńska, P. Mrozowski, Warsaw 2017 (*Colloquia Castrensia*, vol. 1), pp. 17–46.

Subject literature has already identified two underlying issues: that different terms were used to denote a single type of building, and that the prevailing concept made *castle* an umbrella term for buildings with differing defensive qualities and structural complexity.⁶ The semantics of the terms could vary depending on the perception of the person describing a given building or the information about the building they had received from a person interested in recording such information. The conceptual range could also evolve over time.⁷ Subject literature generally assumes that the term *castrum/zamek* (castle) was used for describing ‘fortified seats serving military, economic, and administrative functions, etc.’⁸ The numerous fortified manors (*dwory obronne*) which were built across all Polish lands in the fifteenth and sixteenth centuries, first by magnates and later on by other nobles (including on royal and ecclesiastical property), could also have shared the above-mentioned characteristics. Such manors could include stone and brick houses which constituted their owners’ residences and whose size and building materials gave them comparatively greater defensive properties than was the norm in other manors, but also wooden buildings erected on mounds or earth embankments and surrounded by moats, fences, or ramparts.⁹ These fortified manors used castle complexes as points of reference, incorporating elements of their construction or layout designs and achieving certain defensive properties, but remaining less broad in their architectural and functional scope. Consequently, it is sometimes difficult to say what kind of building is referenced when a text mentions, for example, a fortified manor (see below: example of Lubraniec in Brześć district).¹⁰

This difficulty follows from the discrepancies between the historical terminology and the terminology currently used by researchers, including historians, archaeologists, architects, and art historians. The basic criterion used in subject literature to distinguish gords from castles (referred to in Latin as *castrum* in both cases) is the building material used, and the use of wood and earth ramparts in fortification structure.¹¹ The main criterion for differentiating between a castle and a fortified manor (very often referred to in the sources as *castrum* or *fortalicium*) seems to be the size of the discussed complex,¹² but also its scale and scope of the spatial planning or the assessment of its defensive properties.¹³

Two castles marked on the main map fell prey to the above-discussed doubts arising from difficulties in unequivocally classifying defensive structures as either castles or manors. Leszek Kajzer noted that the complexes in Kowal (Kowal district) and Radziejów (Radziejów district) were referred to as castles, which was understood to mean the seats of a *starosta*’s administration – a place where court

¹⁰ Guerquin, *Zamki*, p. 59; S. Kołodziejcki, *Średniowieczne rezydencje obronne*, p. 12; L. Kajzer, *Czy Zbigniew Bąk mieszkał w prawdziwym zamku?*, KHKM, vol. 51, 2003, no. 3–4, pp. 337–354. Based on the inventories of gentry property recorded in Bobrowniki books, L. Kajzer and A. Horonziak (L. Kajzer, A. Horonziak, *Budownictwo obronne*, p. 100) provide examples of structures described as castles which should not be referred to as such from the architectural point of view.

¹¹ The material used for construction – where gords are made of wood and soil, while castles are constructed with bricks – was used as a differentiating factor in, e.g. B. Guerquin, *Problematyka zamków na pograniczu polsko-krzyżackim*, [in:] *Średniowieczne zamki Polski Północnej. Wybór materiałów z sesji*, [ed. A. Pawłowski], Malbork 1983, p. 9.

¹² L. Kajzer, *Warownie Kujaw*, p. 114: ‘For a historian of art and architecture, a small complex which combines defensive and residential qualities, is foremost a manor’; *idem*, *Małe czy duże, czyli o tzw. zamkach rycerskich na Niżu Polskim*, [in:] *Zamki i przestrzeń społeczna w Europie Środkowej i Wschodniej*, ed. M. Antoniewicz, Warsaw 2002, p. 112: castles are ‘defensive-residential complexes, and later also purely residential complexes, built on a considerable scale’.

¹³ J. Pietrzak, *Zamki i dwory*, p. 22, defined a fortified manor as ‘a complex with a clear defensive-residential or residential-defensive function which meets all the criteria of the term *castle* in the strict sense (from the point of view of the history of architecture, *i.e.* in spatial, defensive and construction terms)’; see also: A. Marciniak-Kajzer, *The Term Castle*, p. 183.

proceedings were held and *starosta*'s court books were kept.¹⁴ Kajzer treated them as fortified manors with brick tower houses surrounded by wooden buildings, in both cases, located near district towns. In his opinion, the use of the term *castle* in relation to these complexes was traditionally established both in medieval and early modern sources, as well as in the literature of the subject.¹⁵ It should be emphasised that in an inspection description from the seventeenth century, Radziejów castle is explicitly defined as a manor.¹⁶

A similar use of the term *castle* can be observed in the 1598 and 1616–1622 inventories of the Ciechocinek set of estates held by Włocławek bishops. The 1616–1622 descriptions of the Ciechocinek complex refer to it as a manor, but the demesne located in the village was described as 'belonging to the castle'. In addition, serfs from the bishop's village of Pomorzany (Lipno district) were to work in Ciechocin (Lipno district) 'in the castle, as guards and in the kitchen', although, in 1598, the subjects from Nowa Wieś and Malszyce (both in Lipno district) were indicated as having to guard *curiae Czechoczinensis*.¹⁷

It is worth emphasising the functional changes that castles underwent in the Early Modern Period, which was also true for the ones located in Cuyavia and in Dobrzyń land. The sixteenth century marked the end of an era of the defensive-and-residential complexes in the form known from the Middle Ages. At that time, the former castle complexes were often rebuilt to match the trends of the time. Greater emphasis was placed on their residential and representative function. Residential sections and the supply base were expanded and began to dominate complex structure. This, however, generally deprived castles of all defence properties.¹⁸ This evolution is clearly noticeable in both royal and private castles. The castle in Przedecz (Przedecz district)¹⁹ was rebuilt in the Renaissance style, and there was also a Renaissance stone house in Inowrocław (Inowrocław district).²⁰ Just like the castle-manor in Radziejów, the fortified structure in Przedecz was also referred to as a manor in the inspection from the late 1620s and early 1630s, although the same sources referred to it also as a castle.²¹ Such designations presumably resulted from the very fact that the complex underwent a Renaissance-style reconstruction. The pontificate of Włocławek Bishop Hieronim Rozdrażewski, who rebuilt the castles in Raciążek (Raciąż; Inowrocław district) and Włocławek (Włocław; Brześć district), was marked by the Bishop's great enthusiasm for investments.²²

When were castles created?

The oldest brick castles in Cuyavia and Dobrzyń land were built around the mid-fourteenth century. Their construction should be treated as an element of an intense spike in the defence properties of Cuyavia and Dobrzyń land strongholds after the end of 1327–1333 hostilities with the Teutonic Order.²³ The brick complexes of Brześć Kujawski (Brześć; Brześć district), Bydgoszcz (Bydgoszcz district), Inowrocław and Kruszwica (Kruszwica district), as well as Przedecz, which became a royal property in 1347,²⁴ emerged in the time of Casimir the Great. The bishops of Włocławek, Maciej of Gołańcza and Zbylut of Gołańcza, transformed the gords in Włocławek (Włocław) and Raciążek (Raciąż) into brick complexes more or less at the same time.²⁵ The noble-held castle in Pakość (Inowrocław district)²⁶ originates from the third quarter of the fourteenth century, and the nobility castles located in Sadłów and Radziki (both in Rypin district) appeared at the turn of the fourth quarter of the fourteenth century (1370s and 1380s).²⁷ There are doubts concerning the foundation date and name of the founder of the brick complex in Bobrowniki (Lipno district), although recently it has been assumed that it must come from the period before Dobrzyń land was pledged by Vladislaus II of Opole to the Teutonic Knights at the end of the fourteenth century.²⁸ Although the first and indirect mention of a castle in Radziejów comes from 1494, it is assumed that the defensive complex could have been built at the turn of the fifteenth century.²⁹ It seems that Kowal Castle also comes from that very period.³⁰ The castle in Dybów (Inowrocław district) is a fifteenth-century investment. Its construction was commissioned by order of King Ladislaus Jagiello after the Treaty of Melno of 1422. It is the earliest structure marked on the main map.

Castles not marked on the main map

There are a few objects that were not marked on the map as ‘castles’, despite being mentioned in the Lexicon, Guerquin’s publication, or other works of subject literature. This choice requires a brief explanation, along with a discussion of individual cases. The history of Cuyavian and Dobrzyń land castles was heavily influenced by somewhat uneasy relations with the Teutonic Knights. Some of these castles were destroyed during the 1409–1411 war with the Teutonic Order, and others during the Thirteen Years’ War. Once warring with the Order was over in the second half of the fifteenth century, several castles lost their previous importance as border defence points.³¹ The castle in Mała Nieszawka (Nieszewka Mała; Inowrocław district), whose construction by the Teutonic Knights had already began in the second half of the thirteenth century, was demolished in 1424 in accordance

³¹ Cf. L. Łbik, *Zamek w Przedczu*, p. 134.

with the agreement of the Treaty of Melno.³² In the second half of the sixteenth century, the castle in Złotoria (Lipno district) was recorded to be in ruins and was not in use, having fallen victim to the 1409–1411 Polish-Teutonic war.³³ The castle, or rather a wood-and-earth gord in Dobrzyń-upon-Vistula (Dobrzyń, Dobrzyń district), located on the Vistula scarp called Góra Zamkowa ('Castle Mountain'), was destroyed by the Teutonic Knights in 1409, never to be rebuilt.³⁴ The seat of Dobrzyń Gord Starosty was called a manor in its description in the 1616 inventory.³⁵ The building was identified as a brick complex with the properties of a castle or a fortified manor in Rypin (Rypin district), dating from the mid-fourteenth century³⁶ or the turn of the fifteenth century.³⁷ It also did not survive to the second half of the sixteenth century. It was most likely located in the eastern or north-eastern part of Rypin market square. The last mentions of this structure come from the fifteenth century, which gives rise to assumptions that the building was destroyed, dismantled or lost its function as the seat of the ruler in this very century.³⁸ Similarly, the castle in Starorypin (Rypin district), built in the first half of the fourteenth century, did not survive into the sixteenth century. The period in which it functioned as a (wooden) stronghold of the ruler was probably limited to the years 1320–1345.³⁹

It should by no means be inferred that the remaining castles, which survived until the second half of the sixteenth century, were preserved in good condition. After the wars with the Teutonic Order, the Bobrowniki castle ceased to be a border stronghold, and became the seat of the *starosta* and the place where *starosta*'s court books were stored. The castle's condition reflected its new role. Although construction work was undertaken in the second half of the sixteenth century and in the first decades of the seventeenth century, the castle had already suffered serious damage by that time.⁴⁰

³⁵ Z. Górski, *Inwentarz starostwa dobrzyńskiego z 1616 roku*, ZK-D, vol. 7: *Stosunki polityczne i społeczne w XX wieku*, 1990, pp. 231–233. However, in M. Kromer, *Polska czyli o położeniu, obyczajach, urządach i sprawach publicznych Królestwa Polskiego księgi dwie*, transl. S. Kazikowski, intro. and comp. R. Machwiński, Olsztyn 1977, p. 33, Dobrzyń is mentioned as one of the 'fortified' castles located on the Vistula River (next to Bobrowniki, Raciążek [Raciąż], Służew, Dybów and Nieszawa [Nowa Nieszawa]; *ibidem*, pp. 33–34).

³⁶ As stated in: L. Kajzer, A. Horonziak, *Budownictwo obronne*, p. 88.

³⁷ As, quoting J. Bieniak, stated in: J. Wroniszewski, *Rypin – gród i miasto w czasach średniowiecza*, [in:] *Rypin – dzieje miasta*, vol. 1: *Do 1918 roku*, ed. K. Mikulski, Rypin 2010, p. 117.

³⁸ *Ibidem*, pp. 116–118 and f.n. 144 on p. 118. In the Early Modern period, there was no starosta's manor in Rypin (P. Bokota, P. Gałkowski, *Rypin w czasach nowożytnych (XVI–XVIII wiek)*, [in:] *Rypin – dzieje miasta*, pp. 184–185) that could be seen as a functional continuation of the medieval starosta's seat.

³⁹ L. Kajzer, *Nowy zamek w Starym Rypinie*, [in:] *Archaeologia et historia. Księga jubileuszowa dedykowana Pani Profesor Romanie Barnycz-Gupieńcowej*, [ed. L. Kajzer et al.], Łódź 2000, pp. 165–173.

⁴⁰ LWWK 1616, part 1, pp. 304–305. The castle's description included in the inspection from 1628–1632 mentions that the castle contains 'an archive for storing books'. LWWK 1628, part 3, p. 58; T.J. Horbacz, *Z badań nad zamkiem bobrownickim w ziemi dobrzyńskiej*, ZK, vol. 7, 1985, pp. 84–85; T. Olszacki, *O trzech zamkach*, pp. 126, 135. Guerquin, *Zamki*, p. 107, wrote that the reconstruction of the castle, which was destroyed after the wars with the Teutonic Order, was approved in 1461, but it was not in fact rebuilt.

Other unmarked objects

We do not categorise the manor of Płock bishops in Górzno (Rypin district) as a castle.⁴¹ Służewo (Inowrocław district) was not marked on the map either, although subject literature does occasionally offer information that this seventeenth-century palace was built on the site previously occupied by an older castle and retained some of its elements – we assume that it was a fortified manor, constituting the residence of the town owners. Presumably, it was the same structure as the one which Jan of Czarnków mentions in his chronicle in 1375 ('*turris Jaroslai in Sluzewo*') as being supplied by Sędziwoj of Szubin with troops who were to defend it against the army of Ladislaus the White, Duke of Gniewków.⁴² Marcin Kromer also referred to the Służewo residence as a fortified castle,⁴³ but we treat it as a brick manor. The *castrum* in Gniewków (Inowrocław district), which is mentioned in the fourteenth-century sources and was included in the Guerquin catalogue,⁴⁴ was not rebuilt after its destruction during the fights between the armies of Sędziwoj of Szubin and Ladislaus the White in the 1470s.⁴⁵ In the second half of the sixteenth century, the seat of a small non-gord starosty in Gniewków was consistently referred to as a manor, which most probably was not built on the site of an earlier architectural complex.⁴⁶ The fourteenth-century *castrum* in Szarlej (Inowrocław district), which was also associated with Ladislaus the White, was referenced by Jan Długosz in his work *Chorografia* ("Chorography").⁴⁷ The architectural complex in Chodecz (Przedecz district) had most likely more features associated with typical brick fortified manors, although bricks probably became the building material only in the second half of the sixteenth century, rather than features linked to castles, as indicated by Leszek Kajzer.⁴⁸ Such a conclusion was reached only after the archaeological research carried out in the area of Zameczek, the north-western part of Chodecz, where the complex was located. In 1489, the building located on that site was referred to as a *fortalicium*, and later also a *castrum*.⁴⁹ The 1639 visitation of Chodecz Parish mentions the manor of the Chodecz Parish church's patron and two nearby mills, one of which

⁴¹ L. Kajzer, A. Horonziak, *Budownictwo obronne*, pp. 140–142. Writing about the history of the bishop's residence in Górzno, K. Grażawski uses the word 'castle' (see: K. Grażawski, *Z badań archeologicznych w Górznie. Od średniowiecznego grodu do biskupiego dworu i kościoła bożogrobców*, RMZDR, vol. 1, 2009, p. 64). We can assume that this is a literal translation of the term *castrum* which appears in the sources, because in later parts of this work, Głażewski describes the residence of the bishop as a manor (e.g. on p. 73). The bishop's castle in Górzno is described as the centre of the cluster of estates in the Early Modern period in A. Mietz, J. Pakulski, *Górzno – zarys dziejów*, Toruń 1989, p. 49.

⁴² *Joannis de Czarnkow Chronicon Polonorum*, comp. J. Kanty Szlachetowski, [in:] *Monumenta Poloniae historica*, vol. 2, pub. A. Bielowski, Lwów 1892, p. 658. Kajzer (*Kujawy brzeskie w XVII-wiecznym opisie Andreasa Cellariusi*, ZK-D, vol. 7: *Stosunki polityczne i społeczne w XX wieku*, 1990, p. 262) thought that it was probable that a castle existed in Służewo in the Early Modern period. The researcher based his work on the description of the Brześć area of Cuyavia created by Andrzej Cellarius from 1659, in which Służewo was mentioned among the towns of the Brześć Voivodeship (as were Raciąż (Raciążek) and Nieszawa (Nowa Nieszawa)). This description does not mention the castle in Służewo, but it does mention that Służewo was a town (ibidem, p. 258: *Sluzewia oppidulum*). The mention from the chronicle of Jan of Czarnków does not constitute enough of a justification for us to state that the afore-mentioned tower in Służewo was 'part of a larger medieval forticile' (ibidem, p. 658).

⁴³ M. Kromer, *Polska*, pp. 33–34; S. Paczkowski, *Służewo na Kujawach wschodnich. Zarys dziejów*, Włocławek 1999, p. 41; P. Bokota, P. Nowakowski, *Służewo – zespół pałacowy*, [in:] *Materiały do dziejów rezydencji w Polsce. Kujawy wschodnie*, vol. 1, part 3, ed. S. Kunikowski, Włocławek 2004, pp. 186–187.

⁴⁴ Guerquin, *Zamki*, p. 153; B. Guerquin, *Problematyka zamków*, p. 11; see also: J. Pietrzak, *Zamki i dwory*, pp. 74–75 (possibly as a wood and earth manor house). The castle in Gniewków is not listed in the Lexicon.

⁴⁵ *Joannis de Czarnkow Chronicon Polonorum*, pp. 654–655, 657.

⁴⁶ ASK I 50, ff. 570r–571r = Z. Guldon, K. Wajda, *Zarys dziejów Gniewkowa*, Bydgoszcz 1970, pp. 92–93; J. Pietrzak, *Zamki i dwory*, p. 74; W. Chorążyczewski, *Gniewkowo i starostwo gniewkowskie w XVI–XVIII wieku*, [in:] *Pamięć – tradycja – trwanie. Szkice z dziejów Gniewkowa i okolic*, ed. T. Łaszkiwicz, Gniewkowo 2014, pp. 61–62.

⁴⁷ *Joannis de Czarnkow Chronicon Polonorum*, p. 655; *Joannis Długossii Annales seu Cronicae incliti Regni Poloniae*, ks. 1–2, pub. I. Dąbrowski, Varsoviae 1964, p. 91; J. Pietrzak, *Zamki i dwory*, p. 75.

⁴⁸ L. Kajzer, *Czy poznamy zamek prywatny w Chodczu na Kujawach?*, ZK, vol. 12, 1997, p. 49.

⁴⁹ The reference to *fortalicium* comes from the land tax inspection of 1489: *Lustracja 1489*, p. 129. J. Pakulski advocated for defining the building as a castle on the basis of sources from the sixteenth century, such as the purchase of the castle in Chodecz by Grzegorz Kretkowski; A. Mietz, J. Pakulski, M. Pawlak, *Wpisani w dzieje Chodcza*, Chodecz–Włocławek 1989, pp. 13, 123–124. The Chodeczek residence is also referred to as a castle in P. Bokota, P. Nowakowski, *Chodeczek – dwór*, [in:] *Materiały do dziejów rezydencji w Polsce. Kujawy wschodnie*, vol. 1, part 2, ed. S. Kunikowski, Włocławek 2001, pp. 49, 52–53; T. Sławiński, *Materiały do dziejów własności ziemskiej Kretkowskich w latach około 1500–1613*, ZK-D, vol. 17: *Gospodarka (XX – początek XXI wieku)*, 2002, p. 263.

was also mentioned in the hearth tax register from 1634.⁵⁰ The bishop's residence in Ciechocin was called a manor in the inventory of the Ciechocin cluster of estates, created between 1616 and 1622.⁵¹ It was most probably a brick tower manor, constituting a functional continuation of a wooden motte-and-bailey-style manor (*dwór stożkowy*), and probably destroyed in the second half of the fourteenth century.⁵² It remains unclear whether there was a castle complex in Lipno (Lipno district). The only mention of a *castrum* in Lipno comes from 1330; it was probably a wood-and-earth gord which was in use in the first half of the fourteenth century.⁵³ Deciding on whether to mark the location of the defensive complex in Lubraniec (Brześć district) on the main map was a most difficult task. Built in the first quarter of the sixteenth century, the manor of Poznań Voivode Mikołaj Lubrański was called *arx* in 1598.⁵⁴ The term was also used in reference to this building several times in seventeenth century sources. It was probably an impressive, multi-storey stone house built on a mound at the bifurcation of Zgłowiączka River. It was surrounded by wooden buildings and a fence. The decision not to place Lubraniec castle on the main map results from Leszek Kajzer's doubts about its architectural form and defensive properties, as described in his research.⁵⁵ Most likely this complex resembled the tower in Ciechocin, which we also did not mark on the map.

List of castles

Ultimately, we have marked a total of 14 castles on the main map of the analysed territory.

Brześć Voivodeship

– in Brześć district:

Brześć Kujawski (Brzeście; r),⁵⁶ Włocławek (Włocław; c);⁵⁷

– in Kowal district:

Kowal (Kowale; r);⁵⁸

– in Kruszwica district:

Kruszwica (r);⁵⁹

– in Przedecz district:

Przedecz (r);⁶⁰

Map 1. Castles in Cuyavia and Dobrzyń land in the second half of the 16th century

- in Radziejów district:
Radziejów (r).⁶¹

Inowrocław Voivodeship

- in Bydgoszcz district:
Bydgoszcz (r);⁶²
- in Inowrocław district:
Dyłów (r),⁶³ Inowrocław (r),⁶⁴ Pakość (n),⁶⁵ Raciążek (Raciąż; c).⁶⁶

Dobrzyń land

- in Lipno district:
Bobrowniki (r);⁶⁷
- in Rypin district:
Radziki Duże (Radziki; n),⁶⁸ Sadłowo (n).⁶⁹

We have located six castles in Brześć Voivodeship (43% of all the castles existing in Cuyavia and Dobrzyń land at that time), five in Inowrocław Voivodeship (36%), and three in Dobrzyń land (21%). An analysis of castle distribution across districts indicates that most castles were located in Inowrocław district (four, *i.e.* 29%). In the second half of the sixteenth century, two castles existed within the boundaries of Brześć and Rypin districts. Most often, however, there was only one castle per district (in Bydgoszcz, Kruszwica, Radziejów, Przedecz, Kowal, and Lipno districts). There was no castle in Dobrzyń district. In the case of Cuyavian voivodeships, there is a clear connection between the location of royal castles and towns constituting administrative and judicial centres of districts – only Dyłów

Bartoszewski, Dobrzyń nad Wisłą 2007, pp. 7–16.

Castle was not located next to a district capital. The pattern was completely different in Dobrzyń land, as there were no castles functioning in the centres of its districts. The castle in Bobrowniki, which was the seat of the gord *starosta*, was the only structure of this type related to the state administration of Dobrzyń land, even though physically it was located within the administrative boundaries of Lipno district.⁷⁰ Most of the castles were royal complexes (nine or 64%). Three castles were owned by the nobility (21%), and two belonged to the bishops of Włocławek (14%). No castle owned by nobles was recorded in Brześć Voivodeship, while in Dobrzyń land, there was no castle complex that belonged to a church institution. In Dobrzyń land, only the nobility's castles from Sadłów and Radziki Duże (Radziki) were built near rural settlements, the other above-mentioned castles were located next to towns.

On the main map, there are castles which were located within a settlement or in its vicinity. Their signatures contain information indicating their presence within a given town. Therefore, we did not follow the example of Zbigniew Guldon, who – on his maps of Cuyavia and Dobrzyń land – marked castles as separate settlement units, and placed them near municipal district centres and two episcopal towns.⁷¹ The only structure we marked as a separate settlement unit is Dybów Castle. Its history is related to the relocation and establishment of new urban centres on the left bank of the Vistula near Toruń. It was constructed near the town of Nieszawa (Nowa Nieszewa), founded in 1425. After the town was moved up the Vistula to its present location after 1460, the castle's history became linked with the villages and mill settlements of Dybów Gord Starosty. In the second half of the sixteenth century, another town developed near the castle – Podgórz, sometimes referred to as *Podgorz alias Dybow*.⁷² Therefore, we can conclude that the location of the complex remained relatively stable in the context of the settlement processes taking place in this part of Inowrocław Voivodeship in the second half of the sixteenth century and in the first half of the seventeenth century.⁷³ The castle also had its own name, it was consistently referred to as Dybów Castle, and the royal cluster of estates of which it was the administrative centre was consistently referred to as Dybów Gord Starosty.⁷⁴ Although some of the castles were located quite far from the town, we did not consider it prudent to designate them as separate settlement units.⁷⁵ For example, Bobrowniki Castle was not only located about 350 m away from the town, but it was also additionally separated from it by a section of the Vistula flowing between the castle and the town.⁷⁶

Abbeys

There were more than a dozen monastic establishments in Cuyavia and Dobrzyń land.⁷⁷ They included, however, only one abbey – the Cistercian Abbey in Koronowo,⁷⁸ which we have marked on the map, although it did not constitute a separate settlement unit.⁷⁹ The Abbey was located at a relative

⁷⁰ For more, see: W. Duży, *Borders of state territorial units*, [in:] AHP Cuyavia, in this edition III.2.1.6.

⁷¹ Z. Guldon mentioned the castles in Brześć Kujawski (Brześć), Bydgoszcz, Dybów, Inowrocław, Kowal, Kruszwica, Przedecz, Raciążek (Raciąż), Włocławek (Włocław); Guldon, *Kujawy*, pp. 100, 102–103, 105, 108, 110–111, 113. Interestingly, the author did not mark the castles in Dobrzyń land as separate settlements.

⁷² See: P. Szewdo-Kielczewska, *Character and size of settlements: cities and towns in Cuyavia and Dobrzyń land in the second half of the sixteenth century*, [in:] AHP Cuyavia, in this edition III.3.2c.6.

⁷⁹ See the two volumes of the series in which abbeys were marked on the main map. On the map of Sandomierz Voivodeship, abbeys were marked only when they were independent settlement units; K. Pacuski, *Location of settlements*, [in:]

distance from the town, to the south of its borders. In 1563, the Koronowo Abbot incorporated a settlement called Waliszew (or Nowy Waliszew) into Koronowo. It was located on the right bank of Brda River, between the town and the monastery.⁸⁰ Despite this spatial separation of Koronowo Monastery from the town, we decided not to treat it as a separate settlement unit.⁸¹

Addendum to the castles of Greater Poland

In one of his articles, Leszek Kajzer mentions the castle in Łabiszyn (Kcynia district in Kalisz Voivodeship), including it among the castles of the region of Cuyavia and Dobrzyń land.⁸² Inadvertently, we omitted it from the list of Greater Poland's castles.⁸³ This castle was located on Łabiszyn island, and its Gothic cellars are the only remains which have survived to this day. They are now located next to the library in Łabiszyn.⁸⁴ The Łabiszyn island was surrounded on both sides by Noteć riverbeds, the course of which outlined the border between Inowrocław and Kalisz Voivodeships.⁸⁵ The state administration border ran along the right branch of the river, while Łabiszyn was never mentioned in the Inowrocław tax records as a town that paid taxes in Cuyavia. Nevertheless, we decided to mark Łabiszyn Castle on the main map, due to its location on the administrative border and the need to make up for the previous omission.

The castle in Łabiszyn is not included in the Cuyavian listings. However, we ought to update the statistics for Greater Poland, as the castle in question was located in the Kcynia district of Kalisz Voivodeship. It was one of the four castles located in this area; the other three were located near Chodzież, Gołańcza, and Szubin. When we add Łabiszyn Castle to Kalisz Voivodeship's tally, it turns out that there were in total 20 castles in this voivodeship in the second half of the sixteenth century (to compare: there were 21 in Poznań Voivodeship).

(2021)

III.3.2.7 MAZOVIA

Irena Gieysztorowa

The map of Mazovia in the second half of the sixteenth century shows centres of State and Church administration. The former are the capitals of the voivodeships, lands and districts, marked by font gradation. The latter consist of centres of dioceses, archdeaconries, deaneries and parishes, represented by appropriate symbols.

Towns and villages were differentiated on the basis of legal and political criterion, and marked with capital and small letters respectively. The criterion was the obtaining of town foundation privilege¹ and later confirmation that the privilege was realized, visible in a different kind of taxation (town tax 'szos'), or even in source entries, which proved that a given settlement was a town in the second half of the sixteenth century.² The resulting additions to the list of contemporary Mazovian towns, prepared by A. Pawiński,³ concern smaller, less documented settlements, causing certain doubts as to the range and continuity of town functions. Grodzisk,⁴ Kiernozia,⁵ and Pacyna⁶ were acknowledged as towns based on the unpublished town tax registers. On the basis of other contemporary sources, Biała,⁷

¹ Z. Kulejowska's proposal (Z. Kulejowska, *Ze studiów nad zagadnieniem lokacji miejskich w Wielkopolsce w XVI–XVIII w.*, „Przegląd Zachodni”, vol. 3, 1953, p. 181) to distinguish towns on the basis of their economic values – while the legal aspect, the foundation privilege, would be a secondary issue – seems only partially justified, and cannot be fulfilled at the present state of research on village markets in the sixteenth century Mazovia. The list of Mazovian town foundations to the 16th century inclusive was provided by Pazyra, pp. 111–124. During our works on the map of Mazovia, we eliminated the incorrect foundation of Zajezerze from the list (Gostynin land 1356), and added the foundation of Wodynia, of unknown date prior to 1573 (see footnote 15). We also considered the eighteenth century foundation of Kiernozia a repeated foundation, as Kiernozia was called town in 1523 (MRPS IV/2, no. 13450) and tax registers from 1563 and 1567 (see footnote 5). See also R. Szczygieł, *Miasta polskie za ostatnich Jagiellonów – przegląd badań*, „Rocznik Lubelski”, vol. 11, 1968, pp. 123–253.

² Contrary to the popular belief that the way payments were recorded in tax registers – which distinguished income from towns – decided on whether a given settlement was a town or a village, we think that towns which did not pay town tax because they were too poor, or for other reasons, were placed in the parochial structure, as proven by the documentation collected below.

³ P. Mazowsze, introduction, pp. 37–39.

⁴ In 1563 this town, belonging at the time to Piotr Okuń, the castellan of Czersk, did not pay the town tax, but the lan tax, and – *respectu aliorum oppidorum* – from eight artisans, four distilleries, two inns, peddlers and landless peasants (ASK I 48, f. 316). In the following years the payments from Grodzisk were registered in the parochial pattern. In 1579 the payments were collected from three blocks, including the estates of the family Okuń, who paid from 4½ lans, 17 artisans, 14 hortulani, and seven landless peasants, see P. Mazowsze, p. 146. This would support the thesis that the town maintained its functions, and perhaps constituted only a part of a village, which was granted town rights in 1522 thanks to the efforts of the family Okuń. Church sources call Grodzisk a village in 1630, a town in 1672; cf. Knapiński, Notaty, pp. 148a, 150 and ff.

⁵ Described as town in 1563 it does not pay the town tax, but pays only from the number of inhabitants, because after the village was burnt down, its dwellers were forced by the owners to work (ASK I 22, f. 258). A similar justification for not paying the town tax was repeated in 1567 (ASK I 48, f. 506). In the register from 1579 they only pay for Kiernozia, listed in the parochial structure, four blocks, each without any artisans, and only two report several hortulani. However, a village Kiernozia appears in the register next to Kiernozia, see P. Mazowsze, p. 200. The 1616 inspection calls Kiernozia a village, in 1672 it was recorded as a town belonging to the nobility, cf. Knapiński, Notaty, p. 242. In 1869 Kiernozia lost its town rights for good.

⁶ Divided between two owners, does not pay the town tax in 1563 because of a fire (ASK I 22, f. 258). In 1567 paid 2 florins of the town tax from each of the two blocks and 26 florins of the liquor excise tax (ASK I 48, f. 506). The taxes paid in 1579 confirm that the settlement was divided between four owners and nothing would prove that it maintained its town functions, see P. Mazowsze, p. 197. However, the inspection from 1616 calls Pacyna a town; cf. Knapiński, Notaty, p. 470.

⁷ A district town belonging to the bishops of Chełm; cf. T. Wierzbowski, *Uchańsciana*, vol. 5, Warsaw 1895, p. 147, 1557; Świącicki, p. 104; Wiz. arch. warsz. 1598–1603 and poll tax register from 1662. Tax registers mention Biała at the head

Budziszewice,⁸ Hów,⁹ Kapinos (Kampinos),¹⁰ Magnuszew,¹¹ Nowy Dwór,¹² Sandomierz,¹³ Wiskitki Kościelne,¹⁴ and Wodynie¹⁵ were also considered towns, despite the lack of any information on town tax payments from the sixteenth century. On the other hand, some villages were not marked as towns, even though they were granted town rights thanks to their owner's efforts to multiply wealth. Yet these villages did not manage to fulfil, or develop, proper permanent town functions, probably because of insufficient economic conditions. This would apply to seventeen unsuccessful town foundations from different periods. In the case of twelve of these foundations, their realization was not confirmed by the sixteenth century sources,¹⁶ and five, despite being confirmed in 1539 (perhaps as a result of an unknown verification of market rights), failed to develop town organization according to later documentation.¹⁷

In the end, the total number of settlements in Mazovia in the second half of the sixteenth century was: 107 towns and 6,572 villages.¹⁸ Our calculations were not without reservations, as in some cases the insufficient source basis made it difficult to determine whether a given settlement was a village or a town. The sources were limited to – particularly in case of the smallest towns belonging to the nobility – single or rare entries from the Crown Metrica, and mostly to fiscal registration, which – as seen in the quoted documentation – could not settle the matter. However, even more complete inspections of smaller royal towns require a thorough reading due to various discrepancies in the records.

Wiskitki Kościelne could be an example here. The settlement was confirmed as town as early as 1349, and several times later in for the beginning of the sixteenth century,¹⁹ but listed in tax registers from the second half of the sixteenth century at the top of the villages from its parish. In 1579, Wiskitki paid tax from 18 lans and a large – in Mazovian terms – gathering of 36 hortulani, and, surprisingly for a village in this region, over 20 artisans.²⁰ Wiskitki were inspected as a royal property twice: in 1564 and 1570. Both inspections frequently call this settlement a village, and its many inhabitants serfs or

of the parish, of which it was the seat, with 20 taxed artisans; cf. P. Mazowsze, p. 168; cf. also A. Świeżawski, *Biała Rawska w średniowieczu*, „Rocznik Łódzki”, vol. 14 (17), 1970, pp. 373–382.

⁸ Basing on LR XVII, p. 34, 1602 and poll tax registers from 1662 and 1674. Listed in the parochial structure in the sixteenth century tax registers, next to a village of the same name; no payments for craftsmanship or hortulani.

⁹ Located in 1506 by the Radzanowski family and confirmed in 1532 together with Radzanów town as a centre of cloth making (MRPS IV/1, no. 6152). The register from 1579 lists it in the parochial structure with 19 hortulani, five artisans and seven landless peasants; cf. P. Mazowsze, p. 201. The inspections from 1616 and 1672 describe Hów as a town belonging to the nobility, compare with Knapiński, Notaty, pp. 173, 175. In 1869 Hów lost its town rights for good.

¹⁰ Founded in 1414. In the sixteenth century appears interchangeably as a village (1508, 1546) and as a town (1517, 1521, 1530, 1557, 1559; MRPS IV/1, no. 357, 3966, 5498; MRPS IV/2, no. 11164; MRPS V/2, no. 8072, 8554). Leased to the Radziejowski family in the beginning of the sixteenth century, it was not inspected until 1661, and then it was certainly a village; cf. LR XVII, p. 159. We do not know when it lost its town rights, the register from 1579 lists Kampinos in the parochial structure, with 20 hortulani and one butcher; cf. P. Mazowsze, p. 144. The inspection from 1616 describes Kampinos as a royal village; see Knapiński, Notaty, pp. 210, 213.

¹¹ Mentioned several times in tax registers as a town (1540, 1541, 1564, 1573), but also as a village of this name situated nearby (1564, 1573).

¹² On the basis of MRPS IV/3, no. 21811, 1545; MK 190, f. 360, 1648.

¹³ Founded in 1549 near Mińsk, no source entries confirming its town functions in the second half of the sixteenth century. Only two separate market squares, still clearly visible in the spatial arrangement, offer a proof that the location privilege was indeed realized; cf. M. Benko, *Sandomierz miasto nieznane*, „Miasto”, vol. 2, 1951, nr. 12.

¹⁴ Based on LR XVI, p. 41, cf. below.

¹⁵ Called a town in the tax register from 1573, and in the seventeenth century listed interchangeably as a town as a village; cf. W. Trzebiński, *Działalność urbanistyczna magnatów i szlachty w Polsce w XVIII w.*, Warsaw 1962, p. 15.

¹⁶ These are: Borowe (Jastrzębie), Buraków, Grajewo, Kalabona (Zwola), Kleczkowo, Kozłów, Oleksin, Raszny (Rażny), Raszyn, Ślubów, Zambski and Zgierz (Zegrze); cf. *Miasta polskie*, vol. 1, p. 260, vol. 2, pp. 459, 473, 476, 492, 507, 517, 525.

¹⁷ Dmoszyn (MRPS IV/1, no. 6658; IV/3, no. 19938), Grabowo (MRPS, IV/1, no. 6601), Miastków (ibidem, no. 6429), Ostrołęka by the Pilica (ibidem, no. 6366) and the unidentified Prążnik in Łomża land (ibidem, no. 6362). About expenses which could not be borne by newly-founded settlements see G. Labuda, *Miasta na prawie polskim*, [in:] *Studia historica. W 35-lecie pracy naukowej Henryka Łowmiańskiego*, Warsaw 1958, p. 193.

¹⁸ According to Pawiński: 95 towns and 5990 villages; cf. P. Mazowsze, introduction, pp. 37–39 (Czerwińsk listed twice) and below.

¹⁹ KDMaz., no. 70 (year 1349): *Actum in Wyskythki oppido nostro*. This testimony does not lose its importance even in the light of the fact that Wiskitki was granted town rights only in 1417 (MRPS III/3, suppl. no. 84); cf. S. Russocki, *Etapy lokacji miejskich na Mazowszu w XIV–XV wieku*, PH, vol. 55, 1964, pp. 189–195. As a town Wiskitki appear in various documents from 1451, 1476 and 1506 (KDMaz., no. 196, 232; MRPS III, no. 2537); cf. Pazyra, pp. 106, 112. Between 1538 and 1546 they appear as a village (MRPS IV/3, no. 19101, 20972, 22411, 22450; MRPS IV/1, no. 7723).

²⁰ P. Mazowsze, p. 140.

subjects. As a result, we could certainly consider the sixteenth century Wiskitki a village, were it not for a piece of information, which said: 'all subjects from this village should pay no tribute to the castle, nor do corvée, as in other villages, because this village was founded as a town'. Wiskitniki therefore is an example of a town, where the town organization was undeveloped, but the settlement did fulfil some town functions and was freed from corvée by virtue of the original foundation privilege.²¹ Yet the 1602 inspection informs that prior to the new foundation of Wiskitki in 1595, its inhabitants 'worked in the demesne in Guzów' for some time.²²

The vicissitudes of fortune, shown by the example of Wiskitki's, appear to offer an explanation of numerous reconfirmations of the foundation privileges of small towns. Such efforts must have been costly, so the aspirants must have expected benefits, mostly from markets and propination rights. The price was the necessity of re-granting the inhabitants with the prerogatives of burghers, even if only to the lowest degree possible. As in Wiskitki, town rights were probably utilized incompletely or temporarily in some, if not the majority, of the aforementioned towns.

Numerous foundation initiatives could have been annulled by a change of the owner of a given settlement²³ and the division of their property. Relatively low income could discourage from measuring the town area, or from long-lasting and expensive market and constructional investments. In the fifteenth century and the first half of the sixteenth century, Mazovia witnessed an excessive city-forming action, caused by economic development and the ambitions of wealthy noblemen. As a result, the town network became too dense in some areas and sometimes linked towns were being formed,²⁴ surpassing the needs of their agricultural background and Mazovian trade. Some of these enterprises did not survive the general downslide of the economy, which began at the close of the sixteenth century. Years of bad crops, wars and famine devastated the country and forced the liquidation of the newly-founded towns, as well as a long-lasting stagnation of old town centres. The economic depression erased the autonomy of the majority of Mazovian agricultural towns, already quite faint, from their rural background. Only empty market squares, the only relicts of the old character of a town, remained after the frequent fires, often causing utter obliteration.

Many a Mazovian village in the sixteenth century, parish seats and larger keys of property did not differ from smaller Mazovian towns, or even surpassed them in development, probably operating as well in the local exchange of goods. Kamion, a village situated at the mouth of the River Bzura into the Vistula, opposite to Wyszogród, could be an example here. The village owned numerous fields and housed 40 hortulani and 30 bakers, indicating the consumer needs of this port. Also Kałuszyn in Liw land, granted town rights no sooner than the seventeenth century, had a significant, higher than average, group of artisans of various profession.²⁵

Petty farm ownership formed a characteristic kind of settlement, different from large estates of the Church, Crown or the nobility. It consisted of a group of hamlets, connected in terms of territory and nomenclature. Their number, depicted by the variety of records mentioning the names of these hamlets of petty gentry, seems less grounded than the number of royal and Church villages, or settlements belonging to wealthy nobility. This thesis is based on relatively frequent record shifts of individual parts – within the entire settlement group – which paid tax in different years. Moreover, some hamlet names appear in tax registers only once or twice. These findings would lead us to acknowledge a certain freedom of petty gentry payers in formulating their residential classification. Difficulties with locating many of the recorded hamlet names could mean that these settlements did not establish their

²¹ LR XVI, pp. 41, 172. Both inspections tell us that meat and grain markets were held there on Sundays, and the market payment was quite large: 10–12 złoty; the inn that sold piątkowskie beer brought over 19 złoty of income, and other inns paid the liquor excise tax; the vicinity of the forest attracted related artisans. Also the parish was quite large for a village, with 14 houses on the parochial grounds. Still, no town authorities, like a mayor or counsellors, are mentioned.

²² LR XVII, p. 18; *ibidem* in the title and in the text Wiskitki Kościelne are called a town, and its dwellers – burghers. Wiskitki kept their town rights until 1896.

²³ An example: Grabowo, which first belonged to the Mazovian dignitaries from Ława and then to the wealthy nobility; similarly, Raszyn of the family Wolski became property of Włocławek bishopric, see further; also Kozłów changes its owners, from the family Oborski to the family Parys, the heir of a nearby town. The new owners could have no possibility, or interest, to fulfil the town rights of these settlements.

²⁴ For instance, the royal towns Liw Stary and Liw Nowy, and the towns of the nobility Dobre Stare and Dobre Nowe, Mińsk and Sandomierz; two last complexes which resulted from ownership divisions.

²⁵ Cf. P. Mazowska, pp. 301–417.

autonomy, or had never had it at all, these names being only an expression of a self-determination of local payment group. Thus, it is possible that some settlements hypothetically linked with localized settlements on the map of Mazovia constitute parts of the latter, ascribed or linked differently during subsequent collections. As such, in the cases of the settlements of petty gentry, the List may perhaps display a tendency to increase their numbers. Also, sixty mill settlements were included on the map of Mazovia. This category consists of mills mentioned by name in tax registers, and especially in the inspection, which could be localized.²⁶ The three Mazovian demesnes with an individual name were taken from the inspections and the Crown Metrica.²⁷

Castles are another type of settlement presented on our map of Mazovia. These were stone or brick buildings with brick defensive structures, called *arx* or *castrum* in Latin terminology.²⁸ Only fortified castles of the Mazovian dukes, which raised no doubts, were marked on the map of Mazovia. These castles were built in place of old gords in the fourteenth and fifteenth century in Płock, Wyszogród, Warsaw, Czersk, Ciechanów, Liw, Gostynin, Rawa and Sochaczew. The map also presents brick defensive castles belonging to Church dignitaries: the primate's castle in Łowicz, the bishop's castle in Pułtusk, and the defensive castle in Sześćńsk, built in the first half of the sixteenth century by the Voivode of Płock, Feliks Sześćński.²⁹ In the sixteenth century, there was also a wooden defensive castle in the gord (*castrum*) in Wizna, with a storeyed gate, and five towers. It was surrounded by an embankment, partially strengthened by a wall and a moat.³⁰

The imprecise variety of accidental records, as well as the lack of detailed descriptions and proper archaeological reconnaissance, make it impossible for us to determine, whether the structures, sometimes indeed called castles, found in royal towns of Zakroczym and Rożan, Church towns of Czerwińsko and Sieluń,³¹ and the estates of the nobility in Radzanów, Leżenice or Kozłów,³² were really castles. Some of them perhaps resembled rather fortified manors or bigger fortified settlements, called *fortalitium* or *castellum* in Latin, and attested to by the sources e.g. in the royal Osieck,³³ or in

²⁶ A drawback of this assumption is the incomplete picture of the location of mill settlements in the sixteenth century Mazovia, concentrated on the map – because of the source basis – mostly in royal estates. See above.

²⁷ The demesne Szczawianek, earlier called Prawda (LR XVI, p. 175; LR XVII, p. 21 ff.), Buszyce (MRPS IV, no. 14131; LR XVI, pp. 59–62; LR 1789, pp. 135–136) and Ruda (LM 1565, vol. II, pp. 19–20; LM XVII, pp. 68–69).

²⁸ Materials on the Mazovian castles were prepared by K. Chłapowski. The terms mentioned earlier were also used to denote a gord as a centre of the administration, and should not cause and doubts about the architectural object to which they referred; see numerous entries in Mazovian inspections from the sixteenth century about compulsory services provided by the servants for the benefit of the castle.

²⁹ The documentation of the surviving buildings, or their remains, can be found in *Katalog zabytków sztuki*, the published issues and the materials kept in the Institute of Art PAN, and the collection of the Ośrodek Dokumentacji Zabytków (e.g. the so-called Łopaciński's Files). Of the written sources, M. Wargawski's description from 1549 was the most important source concerning castles (see I. Gieysztorowa, *Źródła pisane*, [in:] AHP Mazovia, footnote 49). Of Church castles, the castle in Łowicz – which did not survive – was described in: Ulanowski, *Visitationes*, p. 1; Święcicki, p. 102. The castle in Sześćńsk was listed in: Święcicki, p. 98; Gwagnin, p. 204. Święcicki uses only one term, *arx*, hence his testimony offers little help in distinguishing between a castle and a defensive manor.

³⁰ *Inventarium omnium privilegiorum in archivo Regni confectum 1682*, pub. E. Rykaczewski, Paryż 1862, p. 350, year 1505; see also H. Rutkowski, *Wizna. Studium historyczno-urbanistyczne do planu zagospodarowania przestrzennego*, Warsaw 1959, mps w Pracowni Konserwacji Zabytków; A. Kamiński, *Wizna na tle pogranicza polsko-rusko-jaćwieskiego*, „Rocznik Białostocki”, vol. 1, 1961, pp. 32–36.

³¹ In Zakroczym, LM 1565, vol. II, p. 141 there was a great manor mentioned, in other places: a manor or a castle; Gwagnin, p. 205 and M. Kromer, *Polonia*, pub. W. Czermak, Cracow 1901, p. 27. In Wargawski's description, f. 492, no fortifications are mentioned. The manor was not located on a gord. In Rożan LM 1617, p. 91, tells about a manor; Gwagnin, p. 206 about 'a castle on a hill'. In Czerwińsko, divided between the bishop of Płock and the Canons Regular, the fifteenth century sources mention only a bishop's manor, Kromer, *Polonia*, p. 27, among castles – a monastery. According to W. Łuszczkiewicz, *Kościół klasztorny w Czerwińsku*, „Sprawozdania Komisji do Badania Historii Sztuki w Polsce”, vol. 4, 1891, p. 40, in the eighteenth century there was a storeyed building next to the monastery. It had round towers, palisades and a drawn bridge. According to W. Smoleński, *Mazowiecka szlachta w poddaństwie proboszczów płockich*, [in:] *Pisma historyczne*, vol. 1, Cracow 1901, p. 144 – *fortalitium* in Sieluń was expanded into a castle in the first half of the sixteenth century.

³² In Radzanów *fortalitium*; Płockie grodz. wiecz. 9, f. 80, 1543; Gwagnin, p. 204 calls it 'a bricked castle on a hill in the marshes'. In Leżenice Święcicki, p. 83 writes – *arx* (perhaps situated inside Głowaczów, a town founded in 1445 on the grounds of this village). Idem, p. 85, mentions an *arx* in Kozłów, where now there remain traces of the moat and brick ruins; cf. *Katalog zabytków sztuki*, vol. 10, no. 2: *Pow. garwoliński*, Warsaw 1967, p. 14.

³³ KDMaz., 265, 1497 and MRPS IV/2, no. 14258, 1526 – *fortalitium*; Wargawski, f. 532 – *curia, blankowanie*; LM 1565, part I, p. 68 – manor.

Karniszyn, Sarnów, Zegrze, Radziejowice, Petryków, and Zwola,³⁴ all of which belonged to wealthy nobility. Some remnants of defensive character survived still in the middle of the sixteenth century in the wooden manor in Łomża, incorrectly called a castle by the literature.³⁵

Let us proceed to calculating the population on the basis of tax registers. The solution of this issue is controversial. The work on the map of Mazovia, since 1964 focusing on a detailed reconstruction of settlement,³⁶ limited the size distinction of villages to two groups, called 'villages' and 'large villages' in the key to the map. The latter group consists of villages over 200 inhabitants. The simplified classification allowed us to broaden the source basis significantly in comparison to the previous calculations published by A. Pawiński. The differences found in the basis for the taxation of particular villages in different collection years prove they were almost always incomplete. As such, our calculations of a village's population cannot be based on the payment from one year, but should utilize the entire surviving fiscal documentation to formulate our conclusions from the analysis.³⁷ It also appears that the multipliers calculated for broader territorial ranges, allowing for estimated assessment of the population in large areas, fail when applied to single villages. These multipliers were derived from the calculated average size of a serf farmstead, eliminating individual significant differences, not only between remote areas, or depending on ownership category, but also even in the case of two nearby villages of one key of property.³⁸ The conclusion should therefore be obvious, for calculating the population size direct demographic data providing the number of resident serfs, smallholders or landless peasants, as well as artisans, rare in Mazovian villages, is much more valuable than the size of taxed cultivated land. Hence the importance of the registers from the 1552 tax, collected exceptionally not per lan, but per number of serfs. The low tax base applied³⁹ promises relatively reliable results. The sixteenth century inspections are even more valuable, as they contain more detailed information on the population of royal villages in Mazovia. The lack of analogic data for Mazovian Church estates is a particularly severe loss.

Still, the conversion factor had to be applied for these villages, for which we know only the number of resident lans, without any data concerning their development. The research on the size of serf farms in royal and Church estates,⁴⁰ and the comparison of the number of serfs in 1552 with the

³⁴ In Karniszyn according to MK 34, f. 19, 1519 and MK 37, f. 13, 1520 – *castellum*, according to Święcicki, p. 99 – *arx*; in Sarnów there was a *fortalitatum* in the fifteenth century, with a *przygródek, quod iacet in aqua, praeterea pons et samborza*, MK 337, f. 28, 1467 and MK 9, f. 126, 1480, the remains of which survived until the nineteenth century; SGKP, vol. 10, p. 323; in Zegrze – *fortalitium*, AGAD, Zakroczymskie ziem. wieczyste, no. 17, 79, 1502. In Radziejowice, according to *Katalog zabytków sztuki*, vol. 10, no. 4: *Pow. grodzisko-mazowiecki*, Warsaw 1967, p. 29, there was a small castle in the sixteenth century, a *fortalicja*; in Petrykozy at the turn of the fifteenth and sixteenth century a *fortalitium sive opugnaculum* with a *hostium more castrorum vulgaliter dictum wzvod* was built, cf. KDMaz., p. 333; now no traces remain, *Katalog zabytków sztuki*, vol. 10, no. 4, p. 25. The consent to build an *arx seu fortalitium* in Zwola, cf. MRPS IV/3, no. 18173, the remnants of the defensive layout confirmed by *Katalog zabytków sztuki*, vol. 10, no. 2, p. 30.

³⁵ Cf. Wargawski, f. 21. In the document from 1532 opposed are *arcem Visnensem et curias Lomsensem et Novogrodensem*, AGAD, dok. perg. 673, cf. MRPS IV/2, no. 16646.

³⁶ Cf. S. Herbst, *Atlas na rozdrożu*, [in:] *Studia historyczne. Księga jubileuszowa z okazji 70 rocznicy urodzin prof. dra Stanisława Arnolda*, Warsaw 1965, pp. 143–149; I. Gieysztorowa, *O właściwą drogę Atlasu Historycznego Polski*, KHKM, vol. 14, 1966, no. 4, pp. 687–694; H. Rutkowski, *Mapy podstawowe i atlas historyczny*, KHKM, vol. 14, pp. 695–700; T. Ładogórski, *Uwagi o nowej koncepcji Atlasu Historycznego Polski*, KH, vol. 74, 1967, pp. 89–97; W. Pałucki, *Atlas historyczny ziem polskich drugiej połowy XVI wieku*, KH, vol. 74, 1967, pp. 99–110; idem, *Na atlasowym gościńcu*, KHKM, vol. 15, 1967, no. 2, pp. 385–393; M. Kielczewska-Zaleska, *W sprawie Atlasu Historycznego Polski*, KHKM, vol. 15, 1967, no. 2, pp. 395–400.

³⁷ All taxation documents available for the lands of Wyszogród, Zakroczym, Różan, Łomża, Wizna, Warsaw and Sochaczew were used. For Płock Voivodship the registers from 1531, 1552, 1553, 1567 and 1578; for the remaining Mazovian lands, we limited ourselves to supplements from the registers which proved the most useful for the calculation of the population in the 1560s (usually the largest amount of taxation data) and from 1552, preserved for Ciechanów and Nur land.

³⁸ The issue of the diversified size of peasant farmsteads in the royal estates of Mazovia was broadly discussed by A. Wawrzyńczyk, *Gospodarstwo chłopskie na Mazowszu w XVI w. i na początku XVII w.*, Warsaw 1962, p. 17 ff. An example: two villages in Płock starosta's district: Wykowo, where there were 24 serfs in seven Chełmno lans, and Chełpowo, with 16½ Chełmno lans and 11 serfs; cf. LP, pp. 9 and 12.

³⁹ 2 groschen per 1 serf (VL, vol. II, p. 9), whereas the land tax in the first half of the sixteenth century was 6 to 18 groschen, usually 12 groschen per resident lan.

⁴⁰ A. Wawrzyńczyk, *Gospodarstwo chłopskie*, p. 19. Average size of peasant farmsteads in royal estates were gathered from older literature by W. Kula, *Stan i potrzeby badań nad demografią historyczną dawnej Polski (do początków XIX wieku)*, RDSG, vol. 13, 1951, pp. 56 ff.; see also L. Żytkowicz, *Studia nad gospodarstwem wiejskim w dobrach kościelnych XVI w.*, Warsaw 1962, pp. 35 ff.

number of resided lans in villages with over a dozen lans belonging to one owner,⁴¹ show that peasant farmsteads in these estates were usually bigger than 0.5 lan, often 1 lan, and sometimes even more. This supports the opinion formulated already in the commentary to the map of Płock Voivodeship that the conversion factor should be lowered to 10 persons per 1 serf lan in large property.⁴² Other factors accepted with caution were: 11–13 persons per 1 serf lan in large villages of partial gentry⁴³ and 11 persons per 1 lan in the villages of farm gentry.⁴⁴ Family factors were kept, equalling five persons per noble or artisan family, four persons per hortulani or landless peasant families, often incomplete, or with children sent away to work. The less important element in our calculations – the number of servants in a settlement – was reduced to five persons at the most in a demesne, but we found it necessary to include servants also in larger peasant farmsteads.

The general tendency in our calculations of the population of large villages was to use the most complete source information in relation to the moderate rate of multipliers, as well as to disregard those villages, which might have had fewer than 200 inhabitants. Naturally, the degree of difficulty and the possibility of a statistical error, especially given the frail basis of our calculations, grows near the division line. During our works on the map of Płock Voivodeship, we dedicated much more attention to the settlements calculated between two size groups than to the others. In the case of Mazovia, lower size categories were excluded from our research. As a result, the division between size groups had to be set with particular certainty. It is possible, however, that some of the excluded villages did in fact exceed the number of 200 inhabitants, and yet were not marked on the map.

The calculations of the population of Mazovian towns in the sixteenth century are even more problematic, and their results even less certain than the results obtained for rural settlements. The reason lies in the unreliable source basis. The main element of town tax payments, the so-called royal szos, was a property tax, so it depended on wealth, not the number of inhabitants. In the second half of the sixteenth century, szos had long been paid in the lump, sometimes permanently lowered in relation to the sum paid at the beginning of the century because of natural disasters. The disproportions between these lump sums and the size of town buildings could only lead to subsequent reattempts at assessing the population of a given town on the basis of tax income astray and cause further misunderstandings.⁴⁵ However, the size of trade and artisan areas, calculated from tax income, constitutes an important element of the description of a town, providing indirect information about its size. Still, their part in the total number of inhabitants of a given town remains difficult to assess. The conclusions coming from the relation between the number of non-agricultural inhabitants and the number of town inhabitants employed in farming, derived from the number of taxed town lans,⁴⁶ is questionable, if only because of partial overlapping of these two groups.

As such, the number of houses remains our main basis for calculating town population. The numbers are known for royal and Church towns, and in some cases for the towns of the nobility, from the post-fire registers. Still, in the inspections the numbers were often recorded along with undeveloped habitations and gardens, and the houses freed from taxation were not always mentioned. Also, our knowledge about the number of dwellers in a town house is limited, it mostly relies on our certainty concerning various differences related to the rank of a town, the location of a plot, and building type.

⁴¹ Data from the 1533 register is usually lower, because they were probably based on the old tariff, and therefore the number of serfs from 1552 seems more appropriate, together with the respective number of lans from 1563. Also in Z. Guldon, K. Wajda, *Źródła statystyczne do dziejów Pomorza Wschodniego i Kujaw od XVI do początków XX w.*, Toruń 1970, pp. 18–20.

⁴² Cf. WP, p. 27.

⁴³ Depending on the number and size of blocks; a higher indicator was used for a higher fragmentation of ownership.

⁴⁴ The indicator derived from the size of lands owned by farm gentry in respective districts, where there were villages over 200 dwellers inhabited by farm gentry.

⁴⁵ Cf. WP, p. 30 ff.; I. Gieysztorowa, *Źródła i szacunki*, p. 589 ff.; Z. Guldon, *Zaludnienie miast kujawskich w XVI i pierwszej połowie XVII wieku*, „Prace Komisji Historii Bydgoskiego Towarzystwa Naukowego”, Prace Wydziału Nauk Humanistycznych, Series C, no. 2, 1963, pp. 51–74 raises the question of the difficulty of calculation of town population in the sixteenth–seventeenth century and the unreliability of the data from the town tax in this respect; also in Z. Guldon, K. Wajda, *Źródła statystyczne*, p. 21.

⁴⁶ The unexplained broad range of the size of the bestowals and the unknown – and probably diverse – conditions of the exploitation of town lans in various towns, limit the value of an uniform indicator, specified as 15 people per lan, see WP, p. 30 ff.

Given the lack of detailed information, the factor, accepted out of necessity, was 6–7 dwellers per house,⁴⁷ depending on the supposed size of a town, calculated in approximation on the basis of the surviving fiscal documentation. In case the number of houses was unknown, we had to limit ourselves to this assessment.

The map of Mazovia groups towns into three categories: cities, towns, and small towns. The first group, where the lower limit was set modestly at 5,000 inhabitants, consisted only of Old Warsaw.⁴⁸ The second (1,000–5,000 inhabitants) – of the following towns, listed below and ordered by the number of inhabitants: Płock, Łomża, Przasnysz and Ciechanów probably exceeded 4,000 inhabitants, and Łowicz, Pułtusk, Rawa, Sochaczew, Brok and Ostrów – 3,000. We believe that over 2,000 people inhabited the next 10 towns: Warka, Wyszogród, Mława, Stanisławów, Zakroczym, Gąbin, Ostrołęka, Goszczyn, Rożan and the New Warsaw. The population of the remaining 26 towns in this group was calculated at some 1,000–2,000 inhabitants.⁴⁹ The population of the majority of Mazovian towns (60 towns) was assessed to below 1,000 inhabitants, and these settlements were called small towns.⁵⁰ Even though the scarcity of information about the smallest town settlements of Mazovia sometimes leaves us uncertain, whether they had more than 200 inhabitants, all small towns were marked with the same sign as large villages.

Table 1. Number and population of Mazovian towns in the second half of the sixteenth century

Voivodeship	Plock				Rawa			
	royal	Church	nobility	in total	royal	Church	nobility	in total
Over 5,000 inhabitants	–	–	–	–	–	–	–	–
1,000–5,000 inhabitants	3	1	1	5	5	2	–	7
below 1,000 inhabitants	1	–	10	11	5	3	8	16
In total	4	1	11	16	10	5	8	23

Voivodeship	Mazovian				Mazovia			
	royal	Church	nobility	in total	royal	Church	nobility	in total
Over 5,000 inhabitants	1	–	–	1	1	–	–	1
1,000–5,000 inhabitants	30	3	1	34	38	6	2	46
below 1,000 inhabitants	5	7	21	33	11	10	39	60
In total	36	10	22	68	50	16	41	107

The table above offers a collective summary of the number of Mazovian towns in the second half of the sixteenth century, and groups the towns according to their ownership affiliation and size. It shows that almost 50% of towns, and at the same time 85% of those above 1,000 inhabitants, belonged to the king. Almost 40% of all towns belonged to the nobility, but – apart from two of them – these were small towns with several hundred inhabitants. Only 15% of Mazovian towns belonged to the Church, and these were usually small.

⁴⁷ Despite the negative evaluation of this method in the Western European research, cf. I. Gieysztorowa, *Badania nad historią załudnienia Polski*, KHKM, vol. 11, 1963, no. 3–4, p. 527, footnote 22.

⁴⁸ Taking into account the latest findings of W. Szaniawska, *Mieszkańcy Warszawy w latach 1525–1655*, „Rocznik Warszawski”, vol. 7, 1966, p. 131, which decrease the estimated number of the population of both towns around 1580 to below 6500 inhabitants. This estimation is particularly surprising in its evaluation of the buildings of Krakowskie Przedmieście (5.5 people per house). As such, we decided to decrease the evaluation slightly, believing that Old Warsaw with suburbs had more than 5000 inhabitants.

⁴⁹ In alphabetical order these were: Andrzejewo, Bolimów, Gostynin, Czersk, Garwolin, Grójec, Janowo, Kamieniec, Kolno, Latowicz, Stary Liw, Maków, Mińsk, Nowe Miasto (Zakroczym land), Nowogród, Nur, Płońsk, Piaseczno, Raciąż, Radziłów, Serock, Sierpc, Wąsosz, Wizna, Zakroczym, Zambrów.

⁵⁰ Following the suggestion made by J. Ochmański, *W kwestii agrarnego charakteru miast W. Ks. Litewskiego w XVI w.*, [in:] *Studia historica. W 35-lecie*, p. 294, who assumed 6–6.5 people per one hearth. The fluidity of the terminology used in the sources was addressed by Z. Kulejewska-Topolska, *Oznaczenia i klasyfikacje miast w dawnej Polsce (XVI–XVIII w.)*, CPH, vol. 8, 1956, no. 2, pp. 253–268. LM 1565 calls Radziłów, among others, a small town. It had ‘309 houses with empty habitations’ (p. 55). Ostrołęka, considered a small town as well, had 334 houses (p. 41 ff.).

It is difficult to present a summary statistic of the advancement of the urbanization process in sixteenth century Mazovia. The size of the towns varied significantly, and so did the functions of particular settlements. As such, it might not be appropriate to equal them in the final summary. On the other hand, the broad scale of Mazovian settlement diversity weakens the value of the statistical average values levelling the said variety. The comparison of the general number of Mazovian settlements, inflated by the settlements of petty gentry, become unreliable both in terms of relations between districts and between voivodeships.⁵¹ The relation between the number of burghers and the total number of inhabitants is questionable.⁵² The same could be said about the relation of the number of towns to the area of the entire district, or particular voivodeships, as the inner diversity of Mazovian voivodeships surpasses, as shown by the table, the differences between the voivodeships.

Moreover, the figures on the density of town network in each voivodeship, and particularly in each land, distort the real image of the cooperation between towns and agrarian settlements in highly forested areas. Łomża land could be an example here, as it encompassed the major part of Zagajnica Forest, and the density indicator was one town per 842 km². On the other hand, the lowest indicators of Czersk land (1:168) and Zawkrze (1:198) are justified by the existence of complexes of small town settlements, which could function thanks to the wealthy nobility of Czersk – the families Miński, Siennicki, Oborki, Parys or Wodyński,⁵³ and of Płock – the families Sierpski, Srzeński, Radzanowski or Kuczborski.

In both cases, the excessive growth of competing urban centres in a small area dwindled their chances of development in comparison with royal or Church towns, more scattered and growing for a long time with a background of much larger estate complexes and offering services to many petty noblemen, who could not afford their own urban investments.

Table 3 presents the results of our calculations of the population of Mazovian villages, which had over 200 inhabitants in the second half of the sixteenth century, along with their ownership division. The table shows that such villages constituted a mere 7.6% of the total Mazovian rural settlement. The majority of the villages belonged to the Church. Royal villages were a bit fewer, and the number of royal and Church villages was 1.5 times higher than the number of villages of the nobility. The relation of the villages of demesne nobility to those of farm gentry was similar.

The largest villages in Mazovia were irregularly scattered in each voivodeship and land. This usually agrees with the opinion about their different ownership situation, which influenced the variety of settlement forms. The highest number of villages over 200 inhabitants occurred in Rawa Voivodeship (12.7%) and was related to the largest area of Church and royal property and a relatively insignificant number of petty settlement in this territory. The total number of Church and royal villages was three times higher than the number of the villages belonging to the nobility of the same rank. Of all three lands of Rawa Voivodeship, Gostynin land – the most fertile and the wealthiest – had almost the same number of villages over 200 inhabitants as the two remaining lands, where the nobility's share of property was quite considerable.

⁵¹ Given the amount of small settlements of petty gentry in Mazovia and Płock Voivodeships, Rawa Voivodeship surpassed them in its 1½ time higher share of towns (respectively 1.5% and 2.2% of all settlements). However, inside Mazovia Voivodeship the relation between the towns in Ciechanów land was only 0.65%, whereas in Czersk land it was over 3% of all settlements.

⁵² It appears that in the second half of the sixteenth century burgher constituted 20% of the population of Płock and Rawa Voivodeships, in Mazovia Voivodeship the share was a bit higher, mostly thanks to the concentration of several of the largest town centres, for which the calculations of population can contain the largest margin of error.

⁵³ Thanks to the family Oborski, the following settlements were granted town rights: Kuflew (around 1520), Kozłów (1526) and Żeliszew (Jeruzal, 1533). The family Dobrzyniecki, who owned estates in Liw and Czersk lands, also obtained three foundation privileges: for Dobre Stare (1530), Dobre Nowe (prior to 1563), and Wawrzyńczewo (Glinianka, 1557). Two towns own their existence to the family Siennicki: Siennica, founded in 1526, and Seroczyn, founded in 1548. One year later the family Wolski obtained two market privileges for their hereditary towns, Sandomierz and Raszyn, wrongly considered town privileges by Pazyra 1939, p. 124. In fact these towns were founded by the father of the recipients of these bestowals, Mikołaj Wolski, the castellan of Sandomierz and the Marshall of Queen Bona's court.

Table 2. Mazovian urban network in the second half of the sixteenth century

Land, voivodeship	Area in km ²	Number of towns	Km ² per 1 town

Nur	563	88	15.6	7	42	7	32
Liw	204	15	7.4	7	3	3	2
Mazovian Voivodeship	4,515	319	7.1	107	87	46	79
Mazovia	6,572	502	7.6	149	156	118	80

According to current calculations, of all three voivodeships, the ratio of the largest villages to all villages was the lowest in Płock Voivodeship.⁵⁴ Church and royal property was rare here, hence the proportions between the number of villages over 200 inhabitants were reversed in comparison to other voivodeships. The number of large villages belonging to the nobility was twice as high as the number of Church and royal villages altogether.

In Mazovian Voivodeship, the share of large villages was similar to the one in Płock Voivodeship, but the number of such villages was half as high again in Church and royal estates than in the estates of the nobility. Yet, the individual lands in the voivodeship display a much varied image, depending on the dominance of different types of property in the area. The number of large villages was – relatively – the lowest (3.7%) in Ciechanów land, and the highest – in Nur land (15.6%), both thanks to the concentration of large villages of the Church and of farm gentry. Similarly, a relatively high share of villages over 200 inhabitants in Łomża land (10%) is a result of a high concentration of large villages of farm gentry in Zambrów district, as well as royal villages in the starosta's district of Łomża. However, the exceptionally high concentration of royal estates in Czersk land⁵⁵ was expressed only in the highest number in the entire voivodeship of royal villages over 200 inhabitants, which still did not raise the general rate (5.3%), given the low number of large villages of the Church and the nobility.

Two comments should be added regarding the conclusions formulated on the basis of Table 3. Firstly, the multipliers used in the calculations to isolate the villages with over 200 inhabitants are debatable, and therefore further research could introduce certain, probably inconsiderable, changes in the numbers presented in the table. This should not, however, influence the proportions and the general outcome of the table. Secondly, the percentage share of settlements from different ownership categories in the lower size group, which was still significant in Mazovia (e.g. around 150 inhabitants), would present itself a bit differently.

This does not change our opinion on the influence of large landed property, royal and Church, on the size of particular settlements. It would be difficult to consider it a coincidence that the concentration of the majority of the largest towns and villages in Mazovia occurred in royal and Church estates.

(1973)

Translated by Agata Staszewska

⁵⁴ The differences between the assumptions made in WP, p. 33, result mostly from the aforesaid necessity to diversify the calculation indicator per serf lan depending on the size of an estate (see *ibidem* p. 27).

III.3.2.8 PODLASIE VOIVODESHIP

III.3.2a.8 CHARACTER OF SETTLEMENTS

Michał Gochna

This volume showcases various types of settlement in accordance with the same set of principles as applied for the rest of the AHP¹ series. The main map depicts the following types of settlement:

- villages,
- mill settlements,
- demesnes settlements (*folwark*),
- smithy settlements,
- towns,
- peripheral suburbs,
- castles.

Additionally, both centres of secular (capitals of voivodeships and lands, starosty, places of *Sejmik* (Diet) meetings) and religious (locations of deaneries and parishes) administration.

When specifying the nature of individual inhabited units, numerous queries concerning the definition of the concept of ‘settlement’, the factors that contribute to its status and the criteria required for a place to be classified as such, have arisen. This matter was tied to the relatively intensive changes of the Podlasie settlement network endured in the sixteenth century, which occurred for a host of reasons such as the division of large villages into several smaller ones (eg. the expansion of noblemen’s properties),² or changes introduced during the VoloK Reform. These factors contributed to the creation of new settlements, located either in previously uninhabited areas or ones developed on the site of pre-existing infrastructure, as well as the disappearance of existing communities, along with the grouping or division of settlements themselves. Finding source information on these changes is a difficult task, as many of them were omitted from the available resources. All these factors have caused many problems of an ontological nature. Taking into consideration the scope of the available source materials and the AHP series as a whole, creating a complete directory of terms that would accurately categorise and describe the types of settlements and the relations between them was not possible. However, basing matters on experience earlier gained while working on other volumes in the AHP series, we have compiled a list of criteria defining the different types of settlement; one that shall be presented below. However, it is important to note that these are not ultimately finalised and in the future might, or even should, be verified in the process of any additional in-depth research.³

³ This matter of late was the subject of research on the part of a team headed by Dr. hab. Bogumił Szady, a professor of the Polish Academy of Sciences History Institute, and conducted within the framework of the research project “Ontologiczne podstawy budowy historycznych systemów informacji geograficznej” [Ontological bases in the construction of historical systems of geographical information]. See *Metodologia tworzenia czasowo-przestrzennych baz danych dla rozwoju osadnictwa oraz podziałów terytorialnych*, ed. B. Szady, <https://zenodo.org/record/3751266> (access 16.06.2020), in particular the chapter by P. Kulicki, T. Związek, *Definicje typów jednostek osadniczych i administracyjnych*, idem, pp. 437–454.

Those settlements falling into the ‘village’ category were ones that in the original source materials were given the Polish designation *siolo*, one was used interchangeably with the term *village* though it is important to draw attention to the linguistic difference between the English words *village* and *hamlet*; both of which will be use in the course of the volume in relation to settlements designated in Polish by the terms *wieś*, *siolo* and *przysiółek* and their Latin equivalent of *villa* (Translator’s note: *Hamlet* – a small village, especially (in Britain) one without a church. – ORIGIN ME: from OFr. *hamelet*, dimin. of *hamel* ‘little village’; rel. to home; *Village* – a group of houses situated in a rural area, larger than a hamlet and smaller than a town. – ORIGIN ME: from OFr., from L. *villa* ‘country house’. Both definitions OUP Concise Oxford Dictionary, Guy Torr). Places marked as *obrąb* (*obrúb*, *obręb*) or *zaścianek* pose a different problem altogether. The source material gathered reveals that putting units described with these terms within the same category as *village* or *folwark* properties is simply in some cases unjustifiable. The term *obrąb* signified a village or other part of a land or property, usually bearing its own unique name. *Zaścianki* were not, as it was usually understood, settlements inhabited by lower-class noblemen who owned no land themselves, instead what they did signify was a place located near another residential unit (such as a village, town or *folwark*), from which it was in fact ‘divided’ (hence the employment of the Polish term ‘*ściana*’, meaning ‘wall’) by some sort of barrier. These were either naturally occurring (a forest or waterway, for instance) or man-made (the border of a neighbouring village or Volok Reform division line). The liberal usage of this terminology has created the need to examine the settlements on a case-by-case basis.⁴ In accordance with the rules established in the AHP series, the map and accompanying List of settlements do not feature units of a status lower/smaller than that of a settlement (be it a village, *folwark* or settlement of a different nature). If a unit’s status was unclear as to whether it constituted a fully developed village or it was simply an *obręb* or *zaścianek* area, then it was marked as the former under the condition that it was confirmed as such in the first half of the seventeenth century.⁵ Villages were divided according to their size, into those of a large or small category.⁶

A case that illustrates the problems encountered when classifying these units well is the settlement called Solnicy in the Tykocin forestry, located in the Bielsk land. In a 1576 survey the settlement’s nature was not explicitly defined, only listing its name as *Solnicy obrębnycy*, an area encompassing 18 voloks in total.⁷ This unit was similarly described in both a 1577 register and a inspection of 1616 – each document featuring the term *obrębnycy* which implies that this was not a village, but instead a peripheral strip or multiple strips of land belonging to the salt extractors themselves (out of which 4 voloks belonged in 1576 to the arsenal warden of Tykocin castle, Bartosz Nacz, and which in 1616 were transferred to a certain Markiewicz).⁸ The privilege granted to Bartosz Nacz by Stefan Batory in 1580 mentions only voloks of land located between the boundaries of two villages, and does not speak of any areas belonging to specific administrative units.⁹ All the aforementioned indications support our decision to classify this unit as an *obręb*, or peripheral zone, therefore omitting it from the map, especially given its exact location was unclear. The compilers of the 1576 inspection point toward the

⁴ In the Podlasie inspections for the years 1570 and 1576 *zaścianki* are divided into folwark, urban (defined as ‘at the town’ with here being included mill *zaścianki* and one ‘wilderness’), suburban, rural (defined as ‘at villages’; including both mill *zaścianki* and deserted ones); LWP 1570, 1576, p. 191 (index); in footnote 12 on p. 30 the authors, in relation to the context of *zaścianki*, narrow matters down somewhat: ‘The matter is not about so-called gentry *zaścianki* but about the ground that lay beyond the boundaries of village fields (often beyond a forest ‘wall’), and taken into cultivation, not necessarily inhabited, and known equally as *nowiny*, *naddawki*.’ Cf. idem p. 112: ‘Obrąb albo siolo Żarnowo’, idem p. 139 ‘obrąb Nowykowski pusty, którego Sorczowie ziemianie KJM ronia, mieniąc być swym’. AWAK 14, p. 72 ‘obrúb wójta narewskiego, pana Matyssa Sawickiego włók 10 na Czortkowie przy Narwi mieście’. *Słownik języka polskiego*, vol. 8, comp. J. Karłowicz, A. Kryński, A. Niedźwiedzki, Warsaw 1983, p. 303; S. B. Linde, *Słownik języka polskiego*, vol. 4, Lwów 1858, p. 765; *Słownik języka polskiego*, vol. 10, ed. W. Doroszewski, 1968, ‘zaścianek’ <https://sjp.pwn.pl/doroszewski/zascianek;5527493.html> (access 18.07.2020).

⁵ We were directed by the principle ‘to rather not pass over actually existing places than to avoid considering a part of a village to be a separate settlement.’ H. ⁹ MK 123, ff. 327v–328v.

wilderness that is Solniki, located to the south of Trzcianne as a possible candidate for its location.¹⁰ The National Registers of Geographical Names classify this place as a marsh or wetland area.¹¹ The aforementioned privilege granted by Stefan Batory locates the *obręb* of Solniki to be somewhere between the villages of Chobotki and Góra, that is 9–13 kilometers to the southeast of the marsh itself. On the other hand, an inventory list pertaining to the Goniądz starosty, which dates back to 1571, mentions the existence of three ‘*solnickie voloks*’,¹² located at the village of Trzcianne. This state of affairs suggests that the voloks belonging to the aforementioned salt extractors could have been scattered across a wider territory and did not in fact constitute a compact agricultural area as such. This theory is supported by the way this territory was structured, as different tax rates could have corresponded to the different grades of soil found there. According to an inspection that dates back to the year 1576, out of the 18 mentioned voloks eight were taxed at the rate of 1 *złoty* 26 *groszy* and 4.5 denars, while six voloks were taxed at 2 *złoty*; with the remaining four voloks that belonged to the arsenal warden being exempt of taxation.¹³ In the 1577 tax register it is recorded that 20 *groszy* was collected for each of the 13 voloks (a sum that was in accordance with the generally accepted flat rates of tax applied at the time).¹⁴ At the time of the 1616 survey the four aforementioned voloks still remained exempt of taxation, 11 voloks were subject to 2 *złote* 15 *groszy* in taxation dues, while the remaining three were laid fallow due to the ground being ‘of a poor, sandy quality.’¹⁵

The main map, aside from villages, also features *folwark* settlement complexes, that is to say *folwarks* bearing their own unique name and constituting a separate residential entity from nearby villages. These settlements have been labelled in the sources as *folwark* or *praedium*. The *folwark*'s name could be the same as that of the neighbouring village's or carry its own unique designation. These units were identified solely in the Bielsk land and are as follows: Grodzisko (r), Hołowiesk (r), Kiersnowski (r), Lipniki (r), Stołowacz (r), Szpakowo (r), Wielki Dworzec (r), Użyki (Huzyki; r). One *folwark* settlement – Karpowszczyzna (n) – possessed a localisation connected to another village (Antonowo, in the sixteenth century Wierwiczki), and so in accordance with the principles employed in the present series it has not been entered onto the map.¹⁶ In the Mielnik land one such unit of unknown location existed, Chmielów (n; the environs of Chotycze).

The main map also shows the location of mill settlements, that is to say mills bearing their own unique title that were located at a fair distance from surrounding towns and villages, forming as a consequence their own settlement unit. Historical sources rarely mention the names of these mills, designating them instead with the surname of their proprietor. These instances have featured on the map under the condition that they operated under their own unique title no later than the first half of the seventeenth century.

- Drohiczyn land: Przekop (r);
- Bielska land: Burchaty (Burkat; r), Frącki (r), Jacewicze (r), Jarmakowczyzna (Jarmarkowczyzna; n), Kiermusy (r), Krupki (r), Leszczyny (r), Niestrowicz (r), Pace (r), Puchacze (r), Solniki (r), Torule (Turule; r), Wilginie (r), Wojtki (Wojtkowic; r), Żegunia (r).

In accordance with the principles established and applied by the AHP series, the main map does not feature mill settlements the location of which can be merely approximated. An example of such a settlement existing in the Podlasie Voivodeship is that at Surojeska (r).¹⁷

¹³ LWP 1570, 1576, p. 139.

¹⁴ ASK I 47, f. 116v; VC, vol. II, vol. 1, p. 398.

¹⁵ ASK XLVI 149, f. 121. The inspection of 1616 is the last known source to me in which this area appears. It is not mentioned, and even more so the village itself in the poll taxation registers of 1663, 1672, 1674 and 1676. It is also absent in the descriptions of the Trzcianne parish published by W. Wernerowa; eadem, *Opisy parafii dekanatu augustowskiego z roku 1784*, SP, vol. 4, 1993, pp. 222–234. The problem in the registration of Podlasie settlements is revealed also by the charter privilege of King Stefan Batory of 1576 bestowing on Florian Łobeski the Tykocin forest in which salt extractor, ranger, and honey gatherer communes were treated as if they were separate villages: „cum praediis et villis: Wolie, Brzezyny, Psczolczyno, Choyniki, Osoczynki et Barthniki ut praedio nostro Thrzezianensi cum subditis et aliis omnibus pertinentiis huius praedii videntur villis Ogronniki, Solniki ac Chobotki”, MK, 114, f. 62.

¹⁶ See J. Suproniuk, *Location of settlements*, [in:] AHP Podlasie, in this edition III.3.1.8.

¹⁷ Surojeska, Wysokie in the seventeenth century, is visible only on the map by Perthées in the environs of the rivers Nurzec, Czarna and Leszczka. The settlement no longer exists.

The only cases of mill settlements with unknown locations were recorded in the Bielsk land and are as follows: Markolewski Mill (n; Dolistowo parish), Suskowski Mill (n; the environs of Boćki), Wyszonki-Cicholas (n; located in the vicinity of the village of Mień, Domanowo parish).¹⁸

The settlement of Młynarze located by the Moszczona River in the Mielnik land requires rather more extensive coverage. An inventory of the Mielnik starosty dating back to 1560 describes it as “*Siolo Młynarz*” (Miller Village), inhabited by six serfs on 12 voloks of land.¹⁹ The inventory further lists all the relevant dues and taxes,²⁰ as well as describing the extent of the settlement’s boundaries. To the east and south the settlement flanked the village of Moszczona, to the west it reached down to a river bearing the same name, and to the north it bordered with the ‘*sumine*’²¹ grounds. The same inventory list mentions six ‘castle’ mills. These were also owned by the inhabitants of the village of Młynarze.²² The inspection survey of 1576 also mentions the existence of a village going by the name Młynarze, though the authors of the edition of this source remark that ‘These days the place is an agglomeration of villages situated by the Moszczona River that bear the names of their proprietors, who own mills situated on this very waterway.’²³ The survey mentions 19 mills located in the Mielnik starosty in total. Another later survey, created in the year 1616 contains information about the existence of seven functional mills²⁴ located upon the Moszczona River. It also notes the existence of six voloks of land in the Młynarze village area, remarking that they ‘belong to those who also own the mills that lie along the Moszczona River’.²⁵ The 1661–1664 inspection provides vital information, disclosing that the aforementioned village did not have any agricultural areas of its own, bar the acres belonging to the six millers.²⁶ The village of Młynarze is mentioned again in a poll tax register of 1676 as well

¹⁸ LWP 1602, p. 11. Two mill settlements in the area of Knyszyn – Wodzilówka and Jeleń – do have source confirmation from the year 1602. It is highly likely that they were still in existence at the end of the sixteenth century however in the light of the principles adopted by the AHP series represented on maps are only those settlements which have mentions and referencing for the year 1600 at the very latest.

¹⁹ ASK LVI 171 (formerly M.2-I), f. 167v: „Siolo Młynarz [...] Oxiuta kleszkowicz [...] Olich osipowicz [...] Stanko Proszynczycz [...] Wasko Cimoszewicz [...] Szczęsny Ambrozy iurkowicze [...] Jwazsko kleszkowicz”.

²⁰ Including “For the arrival of His Majesty the King, in the autumn and here following the resolving of their affairs, the courtly buildings they will have to repair together with other millers and the estate and here instead of carpenters. While from communal works, corody and patrols they should be exempt in duty for they mind the mills from violence and theft as if on the border.” idem, f. 168.

²¹ Idem, f. 168. Unclear is the status of the said *sumine* grounds – the name could have referred to the name of the area or their owner’s name. In the seventeenth century there existed in this place the village of Sumicz Wólka. Michaluk, Ziemia mielnicka, p. 172.

²² ASK LVI 171 (former signatory number M.2-I), f. 184v: “Castle Mills on the River Moszczona, 6 mills Szczęsny and Ambrozy Jurkowicz, a mill of one water wheel in the same place a fulling and felting works Stanisław Ploszynczycz, a mill of one water wheel in the same place a fulling and felting works Jwazsko kleszkowicz, a mill of one water wheel in the same place a fulling and felting works Wasko Cimoszewicz, a mill of one water wheel in the same place a fulling and felting works Olich osipowicz, a mill of one water wheel in the same place a fulling and felting works Oksiuta Kleszkowicz, a mill of one water wheel in the same place a fulling and felting works. These mills grind always when there is a load.”

²³ LWP 1570, 1576, p. 88, footnote 164; “The Młynarze Village facit lit. Kop 16/4”.

²⁴ ASK XLVI 149, ff. 154–154v: “There are at this village on the River Moszczona 7 mills. The millers take a third measure, and from two royal measures to the manor house the loans drawn for the year for the acreage derived from: 1. A fulling and felting mill is maintained by Maskowic. From this they obtain fl. 25. 2. A fulling and felting mill is maintained by Łapkowic. They get from this fl. 25. 3. A fulling and felting mill is maintained by Kudzielicz. They get from this fl. 25. 4. A fulling and felting mill is maintained by Wawrzyn Homoty, from this they obtain fl. 25. 5. A fulling and felting mill with a saw is maintained by Matys Pawłowicz. They get from this fl. 25. 6. A fulling and felting mill is maintained by Oxincic. They get from this fl. 25. 7. A mill is maintained by Pawłowic Kuźma, but it lies on weak water and is remote hence it makes nothing only fl. 6. The income from these mills is 156 fl. At six of the mills there are acres, on which according to each mill they pay fl. 5/25, facit fl. 35;” I would like to thank Dr. M. Sierba for access to these excerpts from the 1616 inspection.

²⁵ Idem, f. 155. “They pay for all taxes and dues, described in the former act, for a year per fl. 5/25, facit fl. 35. In relation to those voloks they should work for the Mielnik demesne 24 days a year with an axe. The sum of the incomes from this village being facit fl. 35”.

²⁶ MK XVIII, p. 558: “The Młynarze village does not have any measured out farmland, millers occupy but a few acres, the number of which is six. Each of these should pay rent to St. Martin on the mill they work at a rate of 5/25 and here proportionally a third of the measure for them a two thirds is owed his lord Starosta. 10 barrels of rye they may deliver within a year at 2 złoty, facit zł 20. The sum of incomes from this village facit zł 55;” I would like to thank Dr. M. Sierba for supplying this information.

as in a Church inspection to Siemiatycze in 1726 (here as *Moszczona Młynarze*).²⁷ This settlement no longer exists and neither does it appear on historical maps. There is, however, as was pointed out by the earlier cited editors of the Podlasie inspection, a string of villages that were created on the basis of mill settlements, whose names come from the names of the original founders. All this information we are presented with provokes the question as to whether the village of Młynarze can be classified as a separate unit. And, if so, what was its relation to the aforementioned mills? Even though we do not know whether the proprietors lived in the mills themselves or resided in the village and whether the village of Młynarze contained any buildings, it is certain that the unit had its own name, was situated within a defined area (with clearly designated boundaries) and was subject to a series of dues (mills were taxed separately). Due to all of these factors we have decided to include the village of Młynarze on the main map, treating the aforementioned mills as economic objects aligned with it.²⁸

In the Podlasie Voivodeship two smithy settlements constituting separate independent residential units have also been noted, these going by the names Ruda (r) and Turowczyzna (r). The former was located in the vicinity of the village of Czechowizna.²⁹ The exact location of the latter remains unknown (it was situated somewhere near the village of Klejnik, known in the sixteenth century as Zygmuntowo, and located in the Bielsk land).³⁰ Blacksmith forges existed in Podlasie mainly in the form of trading entities within settlements. These smithy works have been noted in the following places (though here solely within the Bielsk land): Ruda (located in the Knyszyn starosty),³¹ Trościanica,³² Hukowicze,³³ Ruda (under Kleszczele lease).³⁴

²⁷ BCzart., Łoyko Collection, MS 1099 IV, p. 680 (f. 333v): “the same from the villages of the Moszczona River both from Millers and Baczykow.”; APL, Chełmski Konsystorz Greckokatolicki, sign. no. 101, f. 348v (“the village of Moszczona Młynarze”); LMAVB, f. 41–322, p. 701 (“Millers”) (I would like to thank Dr. Andrzej Buczyło for supplying the information contained in the Orthodox church inspection visit of Siemiatycze).

²⁸ For its exact localisation see J. Suproniuk, *Location of settlements*, [in:] AHP Podlasie, in this edition III.3.1.8.

²⁹ In the light of the inventory for the Knyszyn starosty, this forge was already redundant by the year 1561: “Ruda. From which initially was paid 4 and 3 *kop* they now pay nothing on for they have been ravaged by poverty.” Chomętowski, *Materiały*, p. 265. LWP 1602, p. 11, notes a mill in this place: “At this village [Czechowczyzna – M. G.] there is a mill, known as Ruda, below the Augustów pond. They get from it 16 miller measure barrels of rye, each at gr 32, making for 17/2.” Presumably the bog iron had been used up and this resulted in a change from forging to grain milling. At present approx. 1.4 km to the south of Czechowizna is occupied by a forest called Rudnik. PRNG, no. 118091.

³⁰ LWP 1570, 1576, p. 61.

³¹ The inventory for the Knyszyn starosty for the year 1561 speaks of the Ruda village and forge: “The village of Ruda is 30 voloks in acreage, of which 3 voloks was left for the measurer, 1 volok for the miller, an half a volok left fallow,” “On the River Jaskra at the same mill is Ruda, from where in the year [15]60 blacksmith[?] gave 60 *sosnikow*, which coming in at 2 grosze make for 2 *kop*. But in the current year [15]61 blacksmith have to pay a lease of *kop* 2”. Chomętowski, *Materiały*, pp. 242, 243. In a list of unclaimed incomes for the year 1557 it is noted: “And so Ruda, which Jan holds on the River Jaskra, which is at the same village, from which every year paid is grosze kop 4, for three years in the years [15]57, [15]58, [15]59 was deserted because of poverty, nothing came from it. But the past year [15]60 the blacksmith gave 60 *sosnikow*, which coming in at 2 grosze makes for 2 *kop*. And in some way this has already been described above at the Knyszyn mills.” Idem, p. 254. LWP 1570, 1576, pp. 73, 75; LWP 1602, pp. 31–33; ASK I 47, ff. 276, 279. Cf. *Prawa i przywileje miasta Knyszyna 1509–1795. Monografia historyczna miasta Knyszyna z uwzględnieniem najnowszych badań archiwalnych*, comp. J. Maroszek, Knyszyn 2018, p. 46 footnote 159.

³² LWP 1570, 1576, p. 60; LWP 1602, p. 94.

³³ LWP 1570, 1576, p. 61; J. Maroszek, *Rzemiosło w miastach podlaskich w XVI–XVIII w.*, [in:] *Studia nad produkcją rzemieślniczą w Polsce (XIV–XVIII w.)*, ed. M. Kwapien, J. Maroszek, A. Wyrobisz, Wrocław 1976, pp. 105–107. Although the author links the comment about ore belonging to Szczech Rudnik with Zygmuntów according to the source note this was in fact located at the village of Hukowicze on the River Łoknica.

³⁴ J. Maroszek, *Rzemiosło w miastach podlaskich*, pp. 105–106. The author states that a smithy was equally in operation in Dobrzyniewo, however the mention of ore in the inventory of the Knyszyn starosty of 1561 relates to the planned construction of a foundry and not to an already existing object. Its operational existence is not confirmed by other sources, including the inspections of 1602 and 1616; see Chomętowski, *Materiały*, p. 246; LWP 1570, 1576, pp. 73, 75; LWP 1602, pp. 31–33; ASK I 47, ff. 276, 279 (rej. pob. bielski 1577); ASK LVI 110 (former signatory number K 11), ff. 20, 44, 76–77, 79v. The existence of a smithy foundry at Narew has yet to find confirmation. Though the inventory of the Narew estate of 1560 mentions inhabitants by the nickname of Rudnik (from *ruda* – ore in Polish: GT), this on its own in no way constitutes proof of the working of a smithy foundry. See AWAK, p. 63: „Mosiey Rudnik Pawłow”; ibidem, p. 66: “Matys Rudnik”, “Tomko Rudnik”; ibidem, p. 69: “Szczech Rudnik”; ibidem, p. 70: “Szczęśny Rudnik”. The mentioned Szczech Rudnik may be identified with the rudnik from the ore at Hukowicze; see footnote 33 above. Possibly there was also in existence a smithy foundry at the village of Kroszewo (Krosiewo) – in 1580 tax was paid by Jakub Karwowski, the son of Wojciech Karwowski Rudnik. The same Wojciech was mentioned in the endowment by Jan Radziwiłł of 200 voloks for Maciej Srebrowski in 1532. These voloks, on which later were to appear the settlements of Neta and Brzozówka, bordered with the ore (*Rudnica*) belonging to Karwowski; ASK I 47, f. 617; LMAVB, f. 1–109.

There is no evidence that points in the Podlasie Voivodeship to the existence of monasteries, taverns, mines or glass works in the form of autonomous, self-governed settlement units during the second half of the sixteenth century.

Before we describe the development of the sixteenth-century Podlasie town network it follows to recall the notable impact that its affiliation prior to 1569 to the Grand Duchy of Lithuania had on its character. The medieval urbanistic processes that occurred recall Lithuanian relations. As Stanisław Alexandrowicz has noted, in the Grand Duchy of Lithuania from amongst settlements which in the fifteenth and sixteenth century obtained town rights, many such town settlements already had an urban economic character, but which from a legal viewpoint in no way differed from other settlements situated within state, Church or private estates. Only some of Lithuanian towns had foundation charters.³⁵ This situation was equally true for Podlasie, though here the urbanising processes were distinguished by a somewhat different than purely Lithuanian specific, and here as a result of Podlasie connection with Mazovia and its influence (which manifested itself in numerous charters on the basis of Kulm Law while Lithuania was dominated by Magdeburg rights).³⁶ In connection with the above, and also as a result of the poor source basis for many of the towns, it is in many cases simply unknown whether a given centre was in its beginnings a town understood as a developed economic centre of the Lithuanian type or as a town with a foundation charter. For many Podlasie towns it is impossible to establish the date and nature of the initial foundation charter as well as to ascertain to what extent sixteenth-century charters actually resulted from the founding of new towns or merely confirmed an already existing fact or altered earlier issued charters. At the end of the sixteenth century all the below mentioned centres had fulfilled one or even several criteria adopted by the current AHP series to consider the given settlement a town, i.e., they possessed a foundation act, had paid property tax (*szos*), or had fulfilled other conditions confirming the urban nature of the settlement.³⁷

The following Podlasie towns are known from the sixteenth century (in brackets the date of the oldest known town charters with the type of rights stipulated) – royal towns and earlier ducal: Drohiczyn (1498, Magdeburg rights),³⁸ Mielnik (1440, Kulm Law),³⁹ Bielsk (1496, Magdeburg rights),⁴⁰ Brańsk (1493, Magdeburg rights),⁴¹ Suraż (1445, Magdeburg rights),⁴² Tykocin (1425, Kulm Law),⁴³ Goniądz⁴⁴ and Rajgród,⁴⁵ private towns: Sokołów Podlaski (1424, Środa Law),⁴⁶ Węgrów,⁴⁷ Ciechanowiec,⁴⁸

³⁵ S. Alexandrowicz, *Powstanie sieci miejskiej Podlasia na tle wczesnych procesów urbanistycznych w Wielkim Księstwie Litewskim*, KHKM, vol. 28, 1980, no. 3, p. 415.

³⁶ Idem, *Powstanie i rozwój miast województwa podlaskiego (XV – I połowa XVII w.)*, „Acta Baltico-Slavica”, vol. 1, 1964, p. 146.

³⁷ See footnote 1 above.

³⁸ See T. Jaszczółt, *Drohiczyn*, [in:] AHP Podlasie, in this edition III.6.8.8. As T. Jaszczółt shows although the first known bestowing of an vogt's office for the town of Drohiczyn is of the year 1439, a Drohiczyn vogt appears in sources already in 1414; *ibidem*.

³⁹ See A. Buczyło, *Mielnik*, [in:] AHP Podlasie, in this edition III.6.19.8.

⁴⁰ Bukowski, Michaluk, *Przywileje*, pp. 67–76. In 1430 the grand duke of Lithuania Witold founded an vogt's office in Bielsk; *ibidem*; see also M. Sierba, *Bielsk Podlaski*, [in:] AHP Podlasie, in this edition III.6.2.8.

⁴¹ Z. Romaniuk, *Rozwój i znaczenie ośrodka miejskiego w Brańsku w XV w.*, „Ziemia Brańska”, vol. 4, 1993, pp. 4–8.

⁴² W. Jarmolik, *Prawa miejskie Suraża za Jagiellonów*, „Białostoczczyzna”, 1995, no. 3(39), pp. 1–7.

⁴³ Z. Romaniuk, *Tykocin w XV w.*, [in:] *Małe miasta: przestrzenie*, ed. M. Zemło, Supraśl 2003, p. 279. A year earlier the Mazovian duke Janusz I established the said vogt's office.

⁴⁴ Although no foundation charter from the fifteenth century for Goniądz is known of as a document, it is highly likely that this settlement already had municipal rights at that time; J. Kloza, J. Maroszek, *Dzieje Goniądza w 450 rocznicę praw miejskich*, Białystok–Goniądz 1997, pp. 11–12; W. Jarmolik, *Prawa miejskie Goniądza w XVI w.*, „Białostoczczyzna”, 1991, no. 2(22), pp. 5–6.

⁴⁵ Founded most likely in the fifteenth century, with the first burghers being noted at the turn of the sixteenth century; J. Wiśniewski, *Dzieje osadnictwa w powiecie grajewskim do połowy XVII w.*, [in:] *Studia i materiały do dziejów powiatu grajewskiego*, ed. M. Gnatowski, H. Majecki, Warsaw 1975, pp. 211–212.

⁴⁶ W. Jarmolik, *Pierwsza lokacja miejska na Podlasiu (Sokołów Podlaski 1424 r.)*, SP, vol. 1, 1990, pp. 71–84.

⁴⁷ See M. Gochna, *Węgrów*, [in:] AHP Podlasie, in this edition III.6.30.8.

⁴⁸ The charter act for Ciechanowiec has not been preserved, while the foundation document of 1429 raises doubts. Ciechanowiec burghers appear in fifteenth-century sources; T. Jaszczółt, *Osadnictwo Podlasia nadbużańskiego w XV i początkach XVI w.* [in:] *Podlasie nadbużańskie. 500-lecie województwa podlaskiego*, ed. O. Łatyszczek, Ciechanowiec–Białystok 2013, pp. 86–87; N.D. Tomaszewski, *Historia Ciechanowca do 1989 roku*, Białystok 2012, pp. 40–45.

Mordy (1488, Kulm Law)⁴⁹ and Mokobody (1496).⁵⁰ Amongst these in the sixteenth century town rights were bestowed on Bielsk, Suraż, Mielnik and Mokobody (1501)⁵¹ as well as Goniądz (1547)⁵² and Rajgród (1568).⁵³ In the sixteenth century in the Podlasie Voivodeship 10 new towns were granted charter rights. The towns founded on the basis of Kulm Law were as follows: Waniewo (post 1510),⁵⁴ Narew (1514)⁵⁵ and Kleszczele (1523).⁵⁶ The following settlements were granted Magdeburg rights: Wysokie Mazowieckie (1503),⁵⁷ Łosice (1505),⁵⁸ Boćki (1509),⁵⁹ Miedzna (1531),⁶⁰ Siemiatycze (1542),⁶¹ Augustów (1557),⁶² Knyszyn (1568). A part of these centres functioned as a town even before being granted a town charter – as was the case in Augustów, Miedzna, Łosice and Knyszyn.

The last of the above – Knyszyn – was first mentioned as a municipal centre in 1538, when Aleksander Chodkiewicz, the leaseholder of the Knyszyn estate, undertook the division of plots of land into voloks under the instruction of Queen Bona, assigning thus 90 voloks to the town of Knyszyn. In 1540 the Queen validated the town's charter, though the type of charter rights granted at the time remain unknown. The oldest Knyszyn court ledgers are from the first half of the sixteenth century.⁶³ The giving by King Sigismund II August of Magdeburg rights in 1568 was therefore either their confirmation or a change in rights from Kulm Law to Magdeburg rights.⁶⁴

We have decided to include Waniewo amongst the towns marked on the map. The town's charter, and here on the basis of Kulm Law, was granted to Mikołaj Radziwiłł by King Sigismund I the Old in 1510; however it is not known exactly when this occurred, as the charter document remains unknown. Mikołaj Radziwiłł a year later was to fund the construction of the parish church of the Holy Ascension.⁶⁵ Waniewo was to develop its municipal potential to only a limited degree, dropping down to the rank

⁴⁹ Maroszek, *Dzieje województwa podlaskiego*, p. 213.

⁵⁰ T. Jaszczółt, *Własność możnowładcza, średnio- i drobnoszlachecka na obszarze tzw. „podlaskiej” części powiatu węgrowskiego do poł. XVI wieku*, „Rocznik Liwski”, vol. 5, 2010/2011, pp. 21–22.

⁵¹ Bukowski, Michaluk, Przywileje, p. 85; W. Jarmolik, *Prawa miejskie Suraża*, p. 4; see A. Buczyło, *Mielnik*, [in:] AHP Podlasie, in this edition III.6.19.8. Mielnik had at this time its rights changed from operating under Kulm Law to adopting on Magdeburg rights. T. Jaszczółt, *Własność możnowładcza*, pp. 21–22. During the confirmation of municipal rights for Mokobody there was also an attempt to change the place name to Nowe Miasto, however the change was not adopted and they reverted to the older designation.

⁵² J. Kloza, J. Maroszek, *Dzieje Goniądza*, pp. 11–12, 80–81, 129–131; W. Jarmolik, *Prawa miejskie Goniądza*, pp. 5–7.

⁵³ Maroszek, *Dzieje województwa podlaskiego*, pp. 186, 212, 214.

⁵⁴ See below.

⁵⁵ D. Michaluk, *Z dziejów Narwi i okolic. W 480 rocznicę nadania prawa chełmińskiego 1514–1994*, Białystok–Narew 1996, pp. 16–18; *Lietuvos Metrika. Knyga no. 8 (1499–1514)*, published by A. Baliulis, R. Firkovičius, D. Antanavičius, Vilnius 1995, p. 141; *Lietuvos Metrika. Knyga no. 9 (1511–1518)*, published by K. Pietkiewicz, A. Baliulis, Vilnius 2002, p. 151.

⁵⁶ *Rejestr pomiaru włócznej Kleszczel z roku 1560*, edited by J. Zieleniewski, SP, vol. 3, 1991, pp. 201–248, 201, 242–244; M. Roszczenko, *Kleszczele*, Bielsk Podlaski–Kleszczele 2002, pp. 24–30, 321–322.

⁵⁷ Maroszek, *Dzieje województwa podlaskiego*, p. 213.

⁵⁸ *Przywileje królewskiego miasta Łosic 1505–1779*, ed. A. Buczyło, J. Zawadzki, Ciechanowiec–Warsaw–Białystok 2018, pp. 6, 36–44. From the content of Aleksander Jagiellończyk's document for Łosice of the 10 May 1505, in which the king gave Magdeburg rights, it results that this centre had already earlier been municipal in character.

⁵⁹ Z. Romaniuk, *Boćki na Podlasiu. Monografia historyczna*, Boćki 2013, p. 19.

⁶⁰ T. Jaszczółt, *Własność możnowładcza*, p. 7; SGKP, vol. 6, p. 334. Eugeniusz Borowski dates the royal document for Międzylesie to the year 1522, claiming that in 1531 it was merely proclaimed. Idem, *Sanktuarium Matki Bożej w Miedznej, Drohiczyn* 1996, p. 10. Miedzna was mentioned as a town already in 1523 in the will of Elżbieta Wodyńska, the wife of Mikołaj Wodyński (the document was to be ratified the following year by king Sigismund August) and in 1528, when Mikołaj Wodyński issued the *in Miedzilessie oppido* document, in which he gave his servant from Dmochy voloks at Suchożebry and 1 in Kownaciska; *Lietuvos Metrika. Knyga no. 12 (1522–1529)*, ed. D. Antanavičius, A. Baliulis, Vilnius 2001, p. 569; NGAB, Mińsk, f. 1759-2-27, f. 216v.

⁶¹ Maroszek, *Dzieje województwa podlaskiego*, p. 214. The original charter document for Siemiatycze is held at present by a private individual (information from Dr. T. Jaszczółt); see T. Jaszczółt, *Miasto Siemiatycze w XVI w. pod rządami Tęczyńskich i Radziwiłłów*, [in:] *Прыватнаўласніцкія гарады Вялікага Княства Літоўскага: лёс праз стагоддзі. Матэрыялы міжнароднай навукова-практычнай канферэнцыі Нявіж, 23–24 красавіка 2014 г.*, ed. З.Л. Яцкевіч, Minsk 2014, pp. 23–44.

⁶² J. Wiśniewski, *Nieznany oryginalny dokument lokacyjny Augustowa z 1557 roku*, „Rocznik Białostocki”, vol. 3, 1962, pp. 425–437; J. Szlaszyński, A. Makowski, *Augustów - monografia historyczna*, Augustów 2007, pp. 21–24. 17 May 1557 issued was a charter bestowing municipal rights for Augustów, though from its contents it results that it had been functioning as a town previously.

⁶³ *Akta albo sprawy sądów miasta knyszynskiego: 1553–1580*, vol. 1, intro., ed. J. Maroszek, Białystok 1999, pp. 1–8.

⁶⁴ *Prawa i przywileje miasta Knyszyna*, pp. 7–8, 64–67, 71–75.

⁶⁵ A. Oleksicki, *Waniewo, z przeszłości dawnego miasta*, „Biuletyn Konserwatorski Województwa Podlaskiego”, vol. 7, 2001, pp. 159–164; *ibidem*, *Waniewo. Dzieje regresu dawnego miasta*, „Białostoczczyzna”, 1988, no. 3(11), pp. 9–12.

of village in the eighteenth century.⁶⁶ The evidence which lead to this settlement being classified as municipal in status was based on the descriptive terms employed in two fiscal sources for the years 1577 and 1581 – these refer to Waniewo as *miasteczko* (little town/townlet) or *civitas*⁶⁷ – as well as granting by Paweł Szczawiński, the owner of a part of the town, a new municipal statute in 1604.⁶⁸

The settlement at Orla was in the sixteenth century not urban. The granting by King Aleksander Jagiellończyk of permission for the town's founding was not to be realized in the year 1500, with it only gaining municipal rights in 1614.⁶⁹

In total, for the Podlasie Voivodeship for the second half of the sixteenth century, confirmation as to their legal existence as municipal entities has been established in relation to 23 towns that were either royal or noble property (no towns belonging the clergy have been found):⁷⁰

- in the Bielsk land: Bielsk (r), Augustów (r), Boćki (n), Brańsk (r), Goniądz (r), Kleszczele (r), Knyszyn (r), Narew (r), Rajgród (r), Suraż (r), Tykocin (r), Waniewo (n);
- in the Drohiczyn land: Drohiczyn (r), Ciechanowiec (r), Miedzna (Międzyzlesie; n), Mokobody (Mąkobody; n), Mordy (n), Siemiatycze (n), Sokołów Podlaski (Sokołów; n), Węgrów (n), Wysokie Mazowieckie (Wysokie; n);
- in the Mielnik land: Mielnik (r), Łosice (r).

Table 1. Types of settlements in Podlasie Voivodeship in the second half of the sixteenth century

Type	Drohiczyn land	Mielnik land	Bielsk land	Total
town	9	2	12	23
village	641	126	820	1,587
suburb	–	–	33	33
mill settlement	1	–	19	20
<i>folwark</i> settlement	–	1	9	10
smithy settlement	–	–	2	2
Total	651	129	895	1,675

Table 2. Percentage share of property holding rights of Podlasie Voivodeship municipal centres in the second half of the sixteenth century

Land	Crown-owned towns		Nobility-owned towns		Towns total
	number	% overall	number	% overall	
Drohiczyn	1	11	8	89	9
Mielnik	2	100	0	0	2
Bielsk	10	83	2	17	12
Podlasie Voivodeship	13	57	10	43	23

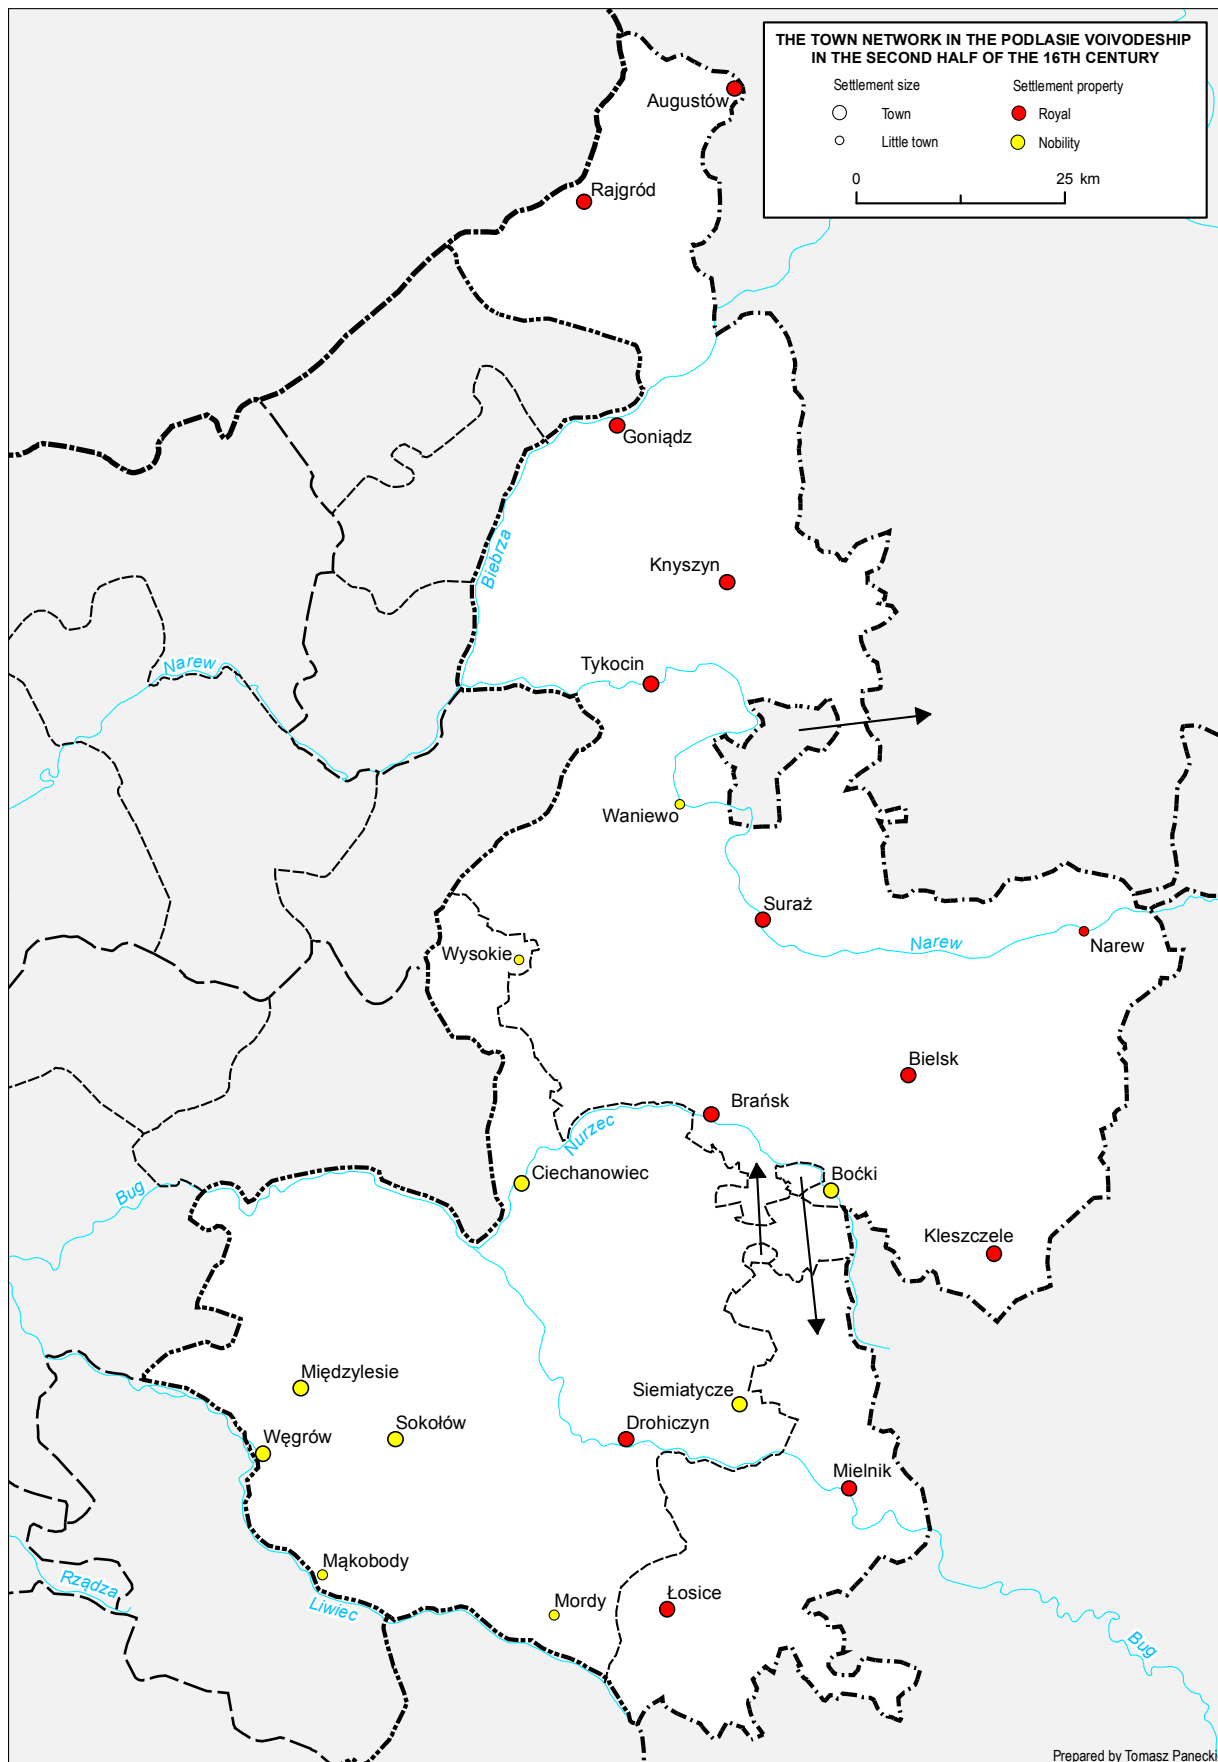

⁶⁶ BCzart., Łoyko Collection, 1099 IV, f. 387v: “in the village of Waniewo there are 65 peasants.”

⁶⁷ ASK IV 41, p. 77; ASK I 47, f. 222v (tax register of the Bielsk land, 1577). In 1577 tax from Waniewo was paid on the 25 settled voloks, four presbytery voloks, 14 cottage gardens, a three water wheel annual mill. Tax was not paid on two vacant voloks, two hospital cottage gardens. A. Oleksicki and A. Jabłonowski also list for Waniewo four artisans (one cobbler, two tailors, one locksmith), although in the register they were entered down for all the settlements of the Waniewo demesne. Consequently it is unclear where they resided although placing them in Waniewo itself appears the most probable. ASK I 47, f. 87v; A. Oleksicki, *Waniewo, z przeszłości dawnego miasta*, p. 166; Podlasie I, p. 182.

Map 1. The town network in the Podlasie Voivodeship in the second half of the 16th century

Table 3. Density of the Podlasie Voivodeship municipal network in the second half of the sixteenth century

Land	Number of towns	Area in km ²	Number of km ² per 1 town	Number of village settlements	Number of village settlements per one town
Drohiczyn	9	3,550	394	641	71
Mielnik	2	1,169	585	126	63
Bielsk	12	5,811	484	820	68
Podlasie Voivodeship	23	10,530	458	1,587	69

The relatively large (in comparison to other royal towns) amounts of land allocated to the royal towns of Podlasie resulted in the creation of settlements in these allotted regions, sometimes located only a few kilometres away from the town. Their nature and relations to the neighbouring towns has already been described in detail in this volume by Krzysztof Boroda in the chapter concerning settlement property holding rights.⁷¹ We will only recap the fact that formally they were a part of the municipal agglomerations they belonged to. The classification methods of the AHP series so far have treated these cases as more distant suburbs and marked them on the map as villages of a municipal holding nature (suburbs located in the nearer vicinity have been marked on the relevant town plans).⁷² That is how these settlements have been marked on the maps depicting sixteenth-century Podlasie Voivodeship. They are the suburbs of the following towns:

- Augustów: Biernatki, Turówka, Uścianki (Zaścianek), Żarnowo;⁷³
- Bielsk Podlaski: Augustowo, Stryjki (Młodzianowo), Szastały (Koszczyno), Widowo (Stanisławowo), Parcewo (Piotrowo), Spiczki;⁷⁴
- Brańsk: Glinnik;⁷⁵
- Goniądz: Białosuknie, Boguchwały, Downary, Jaski, Kosioroki (Kosiorokowie), Łupichy, Puszkarze, Pyzy, Owieczki, Zyburty, Żodzie;⁷⁶
- Kleszczele: Dasze (Kośna), Dobrowoda (Dobra Woda), Kuzawa (Babicze), Czeremcha-Wieś (Nurzec), Pogreby (Pohreby), Trubianka;⁷⁷
- Narew: Makówka, Waniewo;⁷⁸
- Suraz: Daniłowo, Kowale, Hruskie.⁷⁹

What is characteristic is the fact that such settlements only appeared in the Bielsk land which should be linked with the decisively larger number of royal towns than privately held ones to be found there when one compares the matter to the Drohiczyn and Mielnik lands.

Similarly to the previous volumes of the AHP series, the Podlasie volume marked on the main map are the locations of the principal castles that existed in the area in the second half of the sixteenth century. The main factor qualifying an object as a castle was its description appearing in historical sources, and featuring terms such as *arx*, *castrum* or ‘castle’ (though it is important to bear in mind

the looseness with which these terms were used back in the day).⁸⁰ The majority of castles that existed in the area were wooden constructions. The only fully or at least partially stone building was that of Tykocin Castle.⁸¹ In total the map displays nine castles:

- in the Drohiczyn land: Drohiczyn,⁸² Ciechanowiec,⁸³ Miedzna;⁸⁴
- in the Bielsk land: Tykocin,⁸⁵ Bielsk (burnt down on 22 July 1564⁸⁶), Goniądz,⁸⁷ Suraż,⁸⁸ Waniewo;⁸⁹
- in the Mielnik land: Mielnik.⁹⁰

⁸⁰ Doubts over the adoption of the recalled criterion have been summed up by M. Słomski in the Greater Poland volume of AHP; see idem, *Character and size of settlements: Castles and abbeys*, [in:] AHP Greater Poland, in this edition III.3.2c.4.

⁸¹ A. Andrzejewska, *Jagiellonian Castles in Northern Podlasie*, [in:] *Building a Castle – Preparing for War or Keeping the Peace? Proceedings of a symposium held in Vordingborg, Nyborg and Elsinore in Denmark on the 24th to the 28th August 2015*, ed. N. Engberg, V. Etting, L.M.S. Jens, C. Sørensen, D. Wille-Jørgensen, Bonn 2018, pp. 144–145. The author, besides the royal defence castles of the Jagiellons mentioned in the present list (Drohiczyn, Mielnik, Bielsk, Suraż, Tykocin), divides the Podlasie seats of the grand dukes of Lithuania and the kings of Poland into municipal residences which came into being on the basis of hunting lodges or castles (Łosice, Knyszyn, Narew as well as Kryniki and Milejczyce lying beyond the borders of sixteenth-century Podlasie Voivodeship) and hunting lodges that still fulfilled their primary function (Burzyce, Wodziłówka, whose role was taken over by Knyszyn, and beyond the border of the sixteenth-century Podlasie Voivodeship – Białowieża); ibidem, passim; cf. D. Michaluk, *Z dziejów Narwi i okolic*, p. 27.

⁸² LWP 1570, 1576, pp. 5–7. The inspection only provides sporadic references to the castle and folwark “at Drohiczyn castle” which does not necessarily have to mean only a stronghold and merely the headquarters and seat of the starosta and municipal office; A. Gwagnin, *Rerum Polonicarum tomi tres*, vol. 2, Frankfurt 1584, p. 45: only “curia regia”; L. Map 2. Castles in the Podlasie Voivodeship in the second half of the 16th century

Apart from the Ciechanowiec Castle that belonged to the Kiszka family and the castle in Miedzna, which was owned by the Wodyński line, as well as the fortifications at Waniewo (Olelkowicze) all fortresses were royal property. The map does not feature the fortified unit situated in Białystok, which subject literature predating the discussed epoch refers to as a castle. Contemporary research suggests that in the second half of the sixteenth century it functioned as a wooden manor house, converted at some point in the early decades of the seventeenth century by Piotr Wiesiołowski into a brick construction, encircled by a fence that enclosed it and the adjacent agricultural buildings.⁹¹

III.3.2b.8 SIZE OF SETTLEMENTS

Piotr Guzowski

In accordance with the practice employed hitherto within the AHP series marked on the map is the settlement network with its division into settlement size according to the demographic criterion adopted.¹ Differentiated amongst rural settlements are those hamlets numbering up to 200 inhabitants, more populated settlements with up to 1,000 persons, equally small towns operating under municipal rights with a population of less than one thousand and towns with a population division of between 1,000–5,000 inhabitants. The basis for estimations as to the state of population levels for the individual settlements was the data drawn from tax registers, inspections and inventories of royal property holdings that gave information about inhabitant categories, the amount of acreage cultivated and the number of households (houses). These were then converted in the case of rural settlements according to the multipliers adopted in the Greater Poland volume of the AHP, which has been considered equally appropriate for the Podlasie Voivodeship. Amongst these the most important concerns 11 persons per peasant/nobility and village lan/volok (1 lan = 30 morgen \approx 16.8 hectares) (*cornfield*). Though admittedly in relation to other regions of the country we do not have information as to the number of peasants for Podlasie, as was recorded by the royal taxation registers for the year 1552. The hitherto research employing the inventories of royal holdings have shown that the most frequently encountered acreage farmed by peasant farmsteads was 0.5 voloks.² Half-lan nobility holdings were equally the most characteristic for the Podlasie petty nobility independently cultivating farmland.³ In turn, demographic analyses of population density for nobility estates based on seventeenth-century poll taxation lists show that as equally for nobility estates as that for peasant holdings the average number of individuals above 10-years of age was for the Podlasie Voivodeship fewer than four.⁴ After estimating the number of the youngest children (approximately 30% of the population) we may adopt an average at a level of 5.5 persons for peasant holdings. While the figure for petty nobility farmsteads and estates at the end of the eighteenth century numbered 5.55 persons.⁵

The remaining conversion rate is six persons per mill, windmill and tavern, four individuals for artisan holdings, gardeners and landless peasants with livestock, three persons for a landless peasant unspecified in the sources as to economic standing, and two persons for a landless peasant without

cattle. These are to a greater extent modifications of the proposals advanced by Adolf Pawiński,⁶ which in future detailed research into social estate divisions and population numbers may be modified.⁷ Adopted in the case of towns have been the proposals advanced by Jerzy Topolski and Stanisław Alexandrowicz.⁸ Both authors have most correctly employed the conversion rate of six persons per household with their results not noticeably differing from each other. The basis for their calculation has been the primary resources employed equally within the current project (taxation registers, inspections, and volok reform registers).⁹

The most populated town in the voivodeship was Bielsk, numbering over 3,300 inhabitants. The remaining 'capitals' of their respective lands, Drohiczyn and Mielnik were significantly smaller centres with the former inhabited by approximately 2,000 souls, while the latter had a population of around 1,500. The size and significance of the urban centres resulted first and foremost from their position in the domains (demesne) system first that of the grand ducal as functioning within Lithuania and subsequently that of the Polish Crown. The following functioned as the seats of starosty: Augustów, Bielsk, Drohiczyn, Goniądz, Knyszyn, Łosice, Mielnik, Rajgród and Tykocin. The centre of royal estate complexes was also located at Kleszczele and Narewka. From amongst private towns the largest was Ciechanowiec numbering around 2,000 inhabitants. Around 1,700 persons resided in Węgrów and about 1,500 in Siemiatycze. The populations of all the remaining small towns that entered into the structures of magnate estates and here chiefly in southern Podlasie did not exceed 1,000 inhabitants.

The plentiful land possessed by Podlasie towns meant that in the main their inhabitants engaged in agriculture. Over 300 voloks were given to the residents of Bielsk and Kleszczele, while over a hundred or more voloks were made available to the populations of Boćki, Brańsk, Goniądz, Mielnik, Narew, Siemiatycze and Suraż.¹⁰ A part of this acreage became the basis for differentiating rural settlements or the suburban, while small towns and towns across the voivodeship successfully operated as craft and artisan centres as well as transport communication points. Half of the populations of such towns such as royal Łosice and Narew as well as the private town of Wysokie earned their living from craft workshops. Equally a large percentage of the populations (around 40%) of Bielsk and Drohiczyn were craftsmen and artisans as were their families.¹¹ The trade and service significance of a centre can be clearly seen through the prism of the liquor tax collected in an urban centre,¹² a taxation levy that was paid in the greatest degree in 1578 at Drohiczyn and Bielsk (over 400 złoty annually), from which at least a half less was gathered by the exchequer in Augustów, Brańsk, Tykocin, Suraż, Knyszyn and Ciechanowiec (over 100 złoty). Some of the towns took advantage of their favourable geographical location to become key ports in the transportation of, first and foremost, timber and agricultural products to Gdańsk. The Bug River was to play an important role in southern Podlasie with a port situated at Drohiczyn and to a lesser degree at Mielnik and Brańsk, situated on the River Nurzec, being an

inflow to the Bug River itself.¹³ In the north of the voivodeship Tykocin on the River Narew was of tremendous importance, but goods were equally floated from the river ports at Narew and Suraż. In turn, on the Biebrza, there was an important trade centre at Goniądz, although the customs houses in Włocławek regularly noted down merchants who had come from Podlasie towns situated a distance from the river ports themselves, such as Bielsk, Knyszyn and Rajgród.¹⁴

Table 1. Town and small town (townlet) populations in the Podlasie Voivodeship in the second half of the sixteenth century

Land	Town	Ownership	The population number according to Jerzy Topolski	The population number according to Stanisław Alexandrowicz
Bielsk	Augustów	royal	1,770	1,800
	Bielsk	royal	3,350	3,342
	Boćki	nobility		1,400
	Brańsk	royal	1,650	1,746
	Goniądz	royal	1,660	1,482
	Kleszczele	royal	2,250	2,310
	Knyszyn	royal	1,860	1,674
	Narew	royal	1,040	750
	Rajgród	royal	870	774
	Suraż	royal		1,902
	Tykocin	royal	1,440	1,440
	Waniewo	nobility		600
Drohiczyn	Ciechanowiec	nobility	2,020	1,998
	Drohiczyn	royal	1,970	1,980
	Miedzna	nobility		600
	Mokobody	nobility		306
	Mordy	nobility		720
	Siemiatycze	nobility	1,450	1,446
	Sokołów Podlaski	nobility		1,140
	Węgrów	nobility		1,698
	Wysokie Mazowieckie	nobility	860	854
Mielnik	Mielnik	royal	1,520	1,524
	Łosice	royal	1,130	1,134
In total			24,840	32,620

Mielnik			2	9			2
In total	7	30	14	61	2	9	23

Source: see Table 1.

There were differentiated amongst rural settlements (passing over the matter of the suburban) those whose populations probably did exceed 200 persons. There were to be found 263 (16%) of such large villages in the Podlasie Voivodeship. The greatest number of these were to be found in the Bielsk land with 186 of them (71%), significantly fewer in Drohiczyn land with 46 (17%) and in Mielnik land with 31 (12%). Large villages constituted the greatest percentage out of all the rural settlements in the Mielnik land (25%), slightly less in the Bielsk land (23%), and the least in the Drohiczyn land (7%).

The following settlements in the Bielsk district should be classified as large villages, the affiliation of which in relation to ownership is shown in brackets (r – royal, c – Church, n – nobility, t – town, rn – royal-nobility, cn – Church-nobility, rc – royal-Church): Bagno (r), Bajki (n), Bańki (n), Baranki (r), Bargłów (r), Bargłówka (r), Berezowo Stare (r), Białosuknie (n), Białystok (n), Biele (r), Bielki (r), Bobrówka (r), Boguszewo (rn), Brok (r), Broniszewo (rn), Bruszewo (n), Brzeźnica (n), Brzozowa, parish Kalinówka (r), Brzozówka, parish Bargłów (r), Bujnowo (Bonowo, r), Buzuny (n), Chojewo (r), Chrańboły (r), Czajki (n), Czochoy (r), Czyże (Czyżowicze, r), Dąbrowa Moczydły (n), Daniłowo (r), Dawidowo (r), Deniski (r), Długoleka (r), Dobra Woda (t), Dobrzyniewo Kościelne (r), Dołęgi (n), Dorozki (r), Dręstwo (r), Dubicze Cerkiewne (r), Dubno (n), Filipy (Falki-Filipy, n), Góra (rn), Grabowiec, parish Bielsk (r), Grabowiec (Obychodnik, r), Gredele (Hredele, r), Haćki (r), Hodyszewo (r), Hołody (r), Holonki (r), Hornostaje (r), Horodniany (rn), Husaki (Husakowo, r), Istok (r), Jaświły (rn), Jatwież (r), Jagodniki (Jahodnik, r), Jaskra (r), Jelonka (r) Stare Jeżewo (r), Jośki Wschodnie (r), Juchnowiec Dolny (n), Kalejczyce (n), Kalinówka Królewska (r), Kamień (r), Klepacze (r), Klewianka (r), Knorozy (r), Knorydy (n), Kojły (r), Kołodziej (r), Stary Kornin (Kornino, r), Koryciski (Koryciszczka, r), Kośna (t), Kostry-Litwa (n), Koszki (Kuzki, n), Kotły (r), Kowale (n), Koziańce (Kozopatry, r), Kramkówka Duża (Kramkówka, n), Krasna Wieś (Krasne, n), Kropiwnica (r), Krypno Wielkie (rc), Krzywiatycze (r), Kulikówka (rcn), Kuraszewo (r), Leśniki (r), Letniki (r), Lewki (n), Łoknica (rn), Łopienie Grochy (n), Łopuchowo (r), Łubin Kościelny (Łubino, n), Łukawica (n), Łupianka Stara (n), Malesze (r), Mazury (r), Mierzwin Duży (Mierzwin Stare, n), Mikicin (n), Milewskie (Czarna, r), Mochnate (r), Mocieszce (r), Mokre (n), Morze (r), Mołoczki (n), Mystki-Rzym (Myski, n), Nałogi (r), Neta (r), Niewodnica Korycka (n), Ołędzkie (n), Oleksin (r), Orzechowicze (r), Gąsówka Osse (Osse, n), Pajewo (rn), Patoki (r), Pawły (Pawłowicze, r), Pasyunki (r), Piliki (r), Pilipki (r), Płoski (r), Plutycze (r), Płonka Kościelna (cn), Podrzeczany (r), Pogorzałki (r), Pomigacze (r), Popławy (n), Proniewiczze (r), Pszczółczyn (n), Radule (rn), Rajsk (r), Rakowicze (r), Romejki (r), Rostoły (r), Ruda (r), Rutki Stare (n), Rumejki (n), Ryboły (Antonowicze, r), Rzepniki (r), Saniki (rn), Sawino (r), Sielec (rn), Sierki (r), Jabłoń Śliwowo (n), Smogorówka Goniądzka (r), Soce (r), Starowieś, parish Boćki (n), Stacewicze (r), Stok (r), Stryki (t), Suchowolce (r), Cieluszki (Święciciele, r), Świrydy (r), Szepietowo Podleśne (n), Szpakowo (r), Szumki (n), Tajno Stare (rn), Toczyłowo (n), Topczykały (n), Toporki (n), Trześcianka (r), Tryczówka (r), Trzcianne (r), Turośń (n), Wilkowo Stare (n), Wyszowate (n), Witowo (r), Stare Wnory (n), Wojszki (r), Wyszonki Kościelne (n), Zabiele (r), Zalesie, parish Topczewo (n), Zaminowo (n), Zapole (r), Żarnowo Drugie (t), Zastocze (r), Zawyki (r), Zbucz (r), Złotoria (r), Zubowo (r), Klejnik (Zygmuntowo, rc).

In the Drohiczyn land marked as large villages were: Andryjanki (Stanisławowo, n), Bujaki (n), Czarna Wielka (r), Czarnoty (n), Czekanów (n), Ceranów (n), Dołubowo (n), Głuchówek (n), Gródek,

parish Jabłonna (n), Hołowienki (c), Kosów Lacki (cn), Krupice (n), Krynica (n), Krynki-Sobole (n), Kuczyn (n), Kupientyn (n), Łazów (n), Łysów (n), Malinowo (n), Nieciecz Włociańska (n), Olendy (n), Osmola (n), Ostrożany (cn), Patrykozy (n), Piętki-Basie (n), Piotrowo-Trojany (n), Podnieśno (n), Przesmyki (n) Przywózki (n), Repki (n), Rogów (n), Rudka (cn), Sabnie (n), Sady (n), Skórzec (n), Skrzyszew (c), Słochy Annapolskie (n), Świeck Wielki (n), Świniary (n), Telaki (n), Turna Duża (n), Twarogi Lackie (n), Włodki (n), Zawady (n), Zembrów (n), Żeleźniki (n).

In turn in the Mielnik land more than likely the following were large villages: Borsuki (r), Hołowczyce (r), Hruszniew (n), Huszlew (n), Jakubowicze Stare (n), Kisielew (n), Mężenin (n), Mostów (n), Moszczona Królewska (r), Niemirów (n), Nosów (n), Olszanka (r), Ostromęczyn (n), Płosków (n), Próchenki (r), Radziwiłówka (r), Rudka (r), Rusków (n), Sarnaki (n), Stara Kornica (r), Stare Łepki (r), Stare Mierzvice (r), Stare Szpaki (r), Tołwin, (n), Witulin (n), Wyrzyki (n), Zabłocie (r), Zalesie, parish Siemiatycze (r), Żerczyce (rn), Żurobice (r).

Table 3. Large villages in the Podlasie Voivodeship in the second half of the sixteenth century

Land	Number of total settlements	Number of rural settlements	Number of large villages	Percentage of all rural settlements
Bielsk	895	820	180	22
Drohiczyn	651	641	46	7
Mielnik	129	126	31	25
total	1,675	1,587	257	16

Source: own calculations

In the differentiation of rural settlement size in the Podlasie Voivodeship the decisive impact besides the general level of settlement was had by the structure of land ownership. From amongst 257 large villages a whole 125 were located on royal possessions (48.6%). In the case of large nobility-held villages, doubts arise by the frequent notation in the taxation registration for a single payment for several plots, as a result one may conjecture that the 105 large villages arrived at out of generalisation is an approximate figure (40.9%). Five municipal villages need to be added to the large villages (1.9%), two to Church (0.8%) and 20 that found themselves on land belonging to at least two owners derived from different social estates (7.8%).

The relatively significant number of settlements owned by the monarch amongst the large villages in Podlasie is connected with the modernisation action conducted on the grand ducal estate complexes lying in the western part of the Grand Duchy of Lithuania for the period 1547–1566. The so-called volok reform had as its aim not only the enclosure and measurement of lands, the change in the shape of villages as well as the introduction of a new system of agricultural management, but also the acceleration and systemization of colonisation itself.¹⁵ The largest villages of the Augstów starosty (Bargłów, Netta, Tajno Stare),¹⁶ Bielski (Hołody, Kuraszewo, Ploski, Plutycze, Pawły, Rajsk, Ryboły, Trześcianka),¹⁷ Knyszyn (Bobrówka, Brzozowa, Długoleka, Jaświły),¹⁸ Mielnik (Hołowczyce, Moszczona Królewska),¹⁹ Tykocin (Złotoria)²⁰ and the Kleszczele estates (Dubicze Cerkiewne, Czochy)²¹ had each more than 50 voloks of land measured out and farmed. And some such as Żurobice and Żerczyce in the Mielnik starosty exceeded 100 voloks,²² while Klejniki (Zygmuntowo) in the Bielsk starosty

extended 150 voloks.²³ Although it had been assumed that an acreage of a single volok would be the amount bestowed on peasants, in practice the area allocated within Podlasie was to create farmsteads of an acreage of half a volok, or more rarely ones covering 0.75 voloks. The volok reform besides modernising peasant agricultural practices was also to bring about the development of the folwark, whose lands were adapted to peasant and vogt's fields.²⁴

According to Aleksander Jabłonowski's estimates around the year 1580 the Podlasie Voivodeship was inhabited by around 233,300 persons.²⁵ His calculation is accepted by Jerzy Topolski²⁶ and only to a little extent adjusted by Jerzy Ochmański, according to whom the number of people inhabiting the voivodeship was 243,000.²⁷ This would give for a population density of 23 persons/km², and thus somewhat larger than was the case for Lesser Poland, Greater Poland or Mazovia.²⁸ After many years reservations as to these estimations were advanced by Anna Laszuk. She has drawn attention to Aleksander Jabłonowski's errors in totalling up the figures he had arrived at for the numbers of representatives for various social groupings, while she has considered all hitherto calculations as to the sixteenth-century population of Podlasie to be, given the data context of the subsequent century, overly optimistic.²⁹ Still relevant, though as yet unrealised, is her demand that a new study into the structure and estate divisions of the Podlasie Voivodeship be conducted for the second half of the sixteenth-century.³⁰

III.3.2.9a ROYAL PRUSSIA

Marian Biskup

One important aspect addressed in the Maps of Royal Prussia is demographics. This follows directly from the research directions adopted, as discussed above.

The demographic issues addressed in this elaboration cover both questions of the density of rural population and the occurrence of the basic types of wage labourers (smallholders and cotters). Issues related to the occupational diversity of the rural population have also been investigated in addition to the structure of the group of feudal landowners.

This rather broad focus required a correspondingly broad treatment of the numerical representation of the population of Royal Prussia; this, however, posed quite a challenge. The reasons were twofold: 1) there was a lack of comprehensive works devoted to the demographics of the Prussian province; 2) the socio-economic specificity of Prussia required new methods for calculating the population, in particular in the countryside.

The issues of the population and demographics of Prussia in the sixteenth century had not been addressed by I.T. Baranowski in the introduction to the edition of tax registers, which went against the practice established in the other volumes of that series by A. Pawiński and A. Jabłonowski.¹ We only have at our disposal the overall figures concerning the populations of individual Prussian lands in the Teutonic period, in particular of Chełmno land and Pomerania in the mid-fourteenth century calculated by T. Ladenberger-Ładogórski on the basis of the accounts of Peter's Pence, and some approximate calculations by H. Łowmiański.² Similarly, J. Paradowski³ attempted to estimate the population of the land of Chełmno in the fourteenth century. Without addressing the values themselves, we would like to indicate that for the sixteenth century, we can only consult the work by W. Jakóbczyk concerning the stratification of the rural population in several sets of royal estates based on incomplete registers of Prussian starostwos.⁴ For our purposes, however, it can only serve an auxiliary function. A similar value can be attached to the work on the stratification of the population of Prussian starostwos in 1664 by W. Rusiński.⁵ In fact, when it comes to the entire area of Royal Prussia, the only fairly complete data on the rural and urban population from the years 1772–1793 onwards were drawn up by the Hohenzollern's administration of Prussia.⁶ This short overview clearly demonstrates that the discussion of the demographics of Royal Prussia in the sixteenth century

¹ I.T. Baranowski postponed the preparation of the demographic statistics until the publication of the inspections of Prussian royal estates in the second half of the sixteenth century by J. Paczkowski, which, however, never happened; cf. *Introduction*, [in:] P. Prusy Królewskie, p. XI.

⁶ Published by M. Bär, *Westpreussen unter Friedrich dem Grossen*, vol. 2, Lipsk 1909, pp. 707 f. For Pomeranian Voivodeship with Gdańsk's territory more detailed calculations can be found in G. Dabinnus, *Die ländliche Bevölkerung Pommerellens im Jahre 1772 mit Einschluss des Danziger Landgebietes im Jahre 1793*, Marburg 1953, pp. 73, 115 f.

really had to be prepared from scratch; consequently, we believe that we are now offering the first comprehensive treatment of the problem.

The elaboration on the demographics of Royal Prussia in the sixteenth century was supposed to correspond fully to the analogous works prepared for the neighbouring Crown lands (in particular, Greater Poland and Mazovia). However, in the course of preparatory work, it turned out that we had to adopt new assumptions for the statistical calculations, ones that would differ slightly from those developed for the other lands, in particular by A. Pawiński. One contributing factor was the socio-economic specificity of the Prussian lands, which was reflected in their demographics. At the same time, the source material made it possible to develop a new method delivering, supposedly, slightly more accurate results.

In the existing demographic calculations, the basis for the calculation of the peasant population has always been the number of cultivated lans.⁷ There was no alternative, because the main source, i.e., tax registers, included no peasant count. The author of this method, A. Pawiński, also assumed that the amount of land at a peasant's disposal was generally fixed and amounted to 0.5 lan. Consequently, he accepted that one lan indicated two peasants, which, together with their families and servants and staff, amounted to 11 persons. By multiplying this number by the number of cultivated lans, he obtained the data for the peasant population.

This method underwent some modifications, in particular, introduced recently by W. Kula (who, for example, increased the multiplier for Lesser Poland from 11 to 13–15 persons),⁸ however, its key assumption (about the cultivated lan and two peasant families per one lan) did not change.

The same criterion could not be adopted for the demographic calculations pertaining to Royal Prussia. The main obstacle was the fact that a Prussian peasant was provided with much more land than in the other lands of the Crown, and not only in royal estates. And anyway, it differs for every type of ownership in each of the voivodeships. For example, in the royal estates in Chełmno and Pomeranian Voivodeships, it amounted to 2–3 lans and 3–4 lans in Malbork Voivodeship; on average, approximately 3 lans.⁹ The emolument of a sołtys in this category of ownership oscillated between 4–5 lans on average, while in Malbork Voivodeship, between 6–7 lans.¹⁰ Similarly, in the Church estates in Chełmno Voivodeship, the area of land a peasant had at his disposal oscillated between two and 3 lans, averaging 2.5 lans. In noble estates (for which the data are scarcer), the average was a bit lower, 1–2 lans. Inside the territories of the 3 great Prussian towns, the allotments provided were very huge, oscillating between 3–4 lans on average. Without delving into the reasons for such generous provision of land to the Prussian peasant, which most likely dated back to some extent to the Teutonic period and exerted a serious impact on the development of barter and currency economy of Royal Prussia, we can only say that for entire Royal Prussia, the average land a peasant had at his disposal was approximately two lans. This fact, rendering the average rates proposed by A. Pawiński invalid, would prompt us to lower the peasant count per one lan. However, in our calculations, we opted out of using this risky approach.

This was because the source material collected for the Prussian lands provides not only information about cultivated lans in Prussian villages, or even demesnes; in many cases, it also gives the numbers of peasants in individual villages. The data are fuller not only in inspections of royal estates but partially also in tax registers, where for some villages they even exceed the scope covered by the data on cultivated lans, especially in Chełmno Voivodeship. Similarly, Church inventories and accounts of town estates offer abundant material in this respect. Such data are relatively the least informative in the case of noble property. In general, however, the collected material informs at least 50%, and sometimes even more than 90% (for royal and Church property), about the numbers of peasants. This makes it possible to calculate the average provision of land to peasants in individual regions and for each type of ownership, supplementing the missing peasant counts (where the source listed only the resident lans (*lan osiadły*)).

⁷ Cf. P. Wielkopolska, vol. 1, pp. 84 f.

⁸ W. Kula, *Stan i potrzeby badań nad demografią historyczną dawnej Polski*, RDSG, vol. 13, 1951, pp. 39 f.; cf. also minor corrections by E. Vielrose, *Ludność Polski od X do XVIII wieku*, KHKM, vol. 5, 1957, no. 1, pp. 22 f.

⁹ Calculated on the basis of a cross-analysis of tax registers, inspections of the royal property and Church inventories; see also W. Jakóbczyk, *Uwarstwienie ludności wiejskiej*, pp. 58, 60.

¹⁰ Cf. W. Rusiński, *Uwarstwienie ludności wiejskiej*, p. 94.

For the reasons discussed above, it seemed advisable to employ a different method for the calculation of the numbers of peasants, namely using peasant count or peasant family count in individual villages. We believe that in practice this method is much more accurate than A. Pawiński and W. Kula's general assumptions. It forces one to analyse the number of particular peasant groups within each type of ownership and each administrative unit avoiding the previously inevitable simplification and unification of the entire peasant population in terms of land provision.

The obtained peasant counts serve, in the next step, as the basis for the calculation of the number of peasant family members. According to the common practice, we assumed that one peasant family consisted of five persons (i.e., one peasant and four family members). The greatest difficulty was to take into consideration the servants and staff employed at peasants' households.

The previous studies discussed the main issues related to the number of independent wage labourers in royal demesnes in Prussia.¹¹ The source material we have collected provides also much information about the staff in royal, Church and town estates. Unfortunately, we lack information about the staff who were certainly employed at the households of Prussian peasants, with more draft animals at their disposal, for the cultivation of so vast areas.¹² For this reason, it was necessary to adopt approximate numbers of the peasant staff. For the central lands of the Crown, A. Pawiński adopted in general one farmhand per one peasant family, and usually per one lan (i.e., two peasant households), one person only, because in his view, staff were not always used by peasant households. It seems indisputable that in Royal Prussia, staff (farmhands, maids) were used in the vast majority of peasant households. For this reason, it seemed reasonable to accept two persons of staff per a middle-sized, i.e., 1–2 lans, peasant household. For larger peasant households, exceeding two lans, the number of three persons of staff was adopted. Consequently, the household of a Prussian peasant consisted of five family members and two staff members, on average seven persons in total. In larger households, there could be three staff members, equalling eight persons in all.

We are perfectly aware of the hypothetical nature of the assumptions above, but at the present stage of the preparatory work on the socio-economic aspects of Prussia, no other criteria could be applied. It is possible that in some larger peasant households (e.g., owned by sołtyses, in particular in the Żuławy region), the number of staff was slightly higher. At the same time, we believe that for the group of peasant families as a whole, the multiplier of 2–3 is justified and, it seems, not too high.

As far as the staff employed at royal, Church and town demesnes are concerned, the obtained source information made it possible to calculate the average indicators. These are different in each of the voivodeships, usually numbering five to seven persons in Chełmno and Pomeranian Voivodeships, reaching 12–16 per one demesne at maximum. The greatest numbers had been recorded for the demesnes in Malbork Voivodeship, reaching 28. For the demesnes without the number of staff explicitly stated, the average of five to seven persons was adopted. The category of demesne servants covers also the small group of castle servants.

It must be noted that when calculating the peasant population, the group of sołtyses and lemans (*vassals*) was not distinguished, as they occurred only in sources concerning royal and, partially, Church ownership; instead, they were treated as peasants of the category provided with more land.

The second large group of the rural population, namely wage labourers (in particular, smallholders and cotters) and craftspeople, was reflected well in the collected source material. The data from tax registers for this group were abundant and often confirmed also in related sources (such as inspections of royal property and inventories of Church estates).

In the group of wage labourers, smallholders (Latin: *hortulani*) come first. For this group, the multiplier of four persons per one family was adopted, following A. Pawiński's assumption. For the other, smaller category of wage labourers, namely cotters (German: *Kammerleute*), the multiplier of three persons only was adopted due to the fact that sources often mention poor lonely cotter women.¹³

¹¹ In particular J. Rutkowski, *Pańszczyzna i praca najemna w organizacji folwarków królewskich w Prusach za Zygmunta Augusta*, RH, vol. 4, 1928, pp. 40 f.

¹² Cf. L. Żytkowicz, *Uwagi o gospodarstwie chłopskim w dobrach kościelnych w XVI w.*, [in:] "Studia z dziejów gospodarstwa wiejskiego", Warsaw 1957, p. 63.

¹³ Cf. P. Prusy *Królewskie*, pp. 2, 5, 7, 8 f.; cf. a similar observation and the method of A. Pawiński, presented in P. Wielkopolka, vol. 1, p. 98.

The third, equally small group of wage labourers were the so-called “loose people” (Polish: *hultaj*, German: *Dienstlose*), for whom the multiplier of two was adopted. As data are indicating that in the summer, loose people in Prussia did not go to the countryside alone, but with their families and cattle, which had to be taken into consideration in our calculations.¹⁴

For (rural) craftspeople, the multiplier of five persons¹⁵ was adopted everywhere except for innkeepers owning plots of land (usually adding two persons as staff) and millers. In the case of the latter, one person was added (hand) in the case of facilities with one to two mill wheels, and two persons in the case of larger facilities. The multiplier of five was also adopted for breeders (beekeepers and fishermen). When it comes to the small group of ‘spirits vendors’ (*szynkarze wódki*), no multiplier was adopted, because there are data to support the claim that provision of spirits was a side job of some groups of the population (in particular, of smallholders and innkeepers). This issue will also be addressed below.¹⁶

A greater number than usual was adopted for a rural parish, namely eight persons. This number includes the parson, five church servants and two farmhands, added because almost every parish was well equipped with land, four lans on average, and cultivated by the parish inhabitants themselves.

Another problem for the calculations was the gentry population. When choosing the method, no reference was made to the approach suggested by A. Pawiński, who, for the neighbouring Greater Poland, mechanically adopted one family of demesne gentry of 11 persons (including five persons of the family + six staff) per one village. Per each smallholder lan (*łan zagrodowy*) in Greater Poland, he adopted two gentry families, on average 11 persons per one smallholder lan.¹⁷ In the case of Royal Prussia, these multipliers are unacceptable for two reasons, including the differences in terms of the size of land owned by demesne gentry families and the much greater provision of land to farm gentry.

In our calculations, we opted for a more precise method than the rather hypothetical assumptions made by A. Pawiński. This reservation applies in particular to the manner of calculating the number of demesne gentry families based on the number of villages, which should be replaced with the most accurate possible determination of the factual number of gentry families in Prussia. The point of departure was the aforementioned catalogue of all noble families. It made it possible to precisely list 80–90% of noble families in each voivodeship (mainly based on tax registers) and to assign the owner(s) to the appropriate village when calculating. It also made it possible to distinguish the group of demesnes operated with paid labour and then, inside that group, to distinguish the group of factual farm gentry, who owned 0.5–3 lans.¹⁸ By slightly increasing the estimated number of the gentry in some administrative units (in particular in Chełmno and Malbork Voivodeships) for which the tax registers were missing some information, we were able to obtain figures which we believe are close to the factual state of affairs.

Based on the aforementioned findings, for each individual owner, the following multipliers were adopted: per the family of a demesne nobleman – six persons¹⁹ and three persons of staff, totalling nine persons. With gentry families owning over 10 lans, four persons were added as staff (totalling 10 persons). For farm gentry owning 0.5–2 lans, the multiplier of six (family) + two (staff), totalling eight persons was adopted. For farm gentry families owning 2–3 lans, 3 persons were added as staff, totalling nine persons.

It is plain to see that the above rates for farm gentry refer partially to the estimations adopted for the peasant population (two to three persons of staff). Due to the fact that the amount of land provided to a landed nobleman, in reality, equalled the average amount owned by a Prussian peasant, this step appears to be justified. As far as demesne gentry is concerned, the number of three to four

¹⁴ This issue will be addressed below.

¹⁸ Cf. earlier.

¹⁹ The size of a noble family in the sixteenth century is still debated; cf. T. Furtak, *Kilka zagadnień z demografii historycznej szlachty polskiej*, RDSG, vol. 6, 1937, pp. 31–58; W. Kula, *Stan i potrzeby badań*, p. 101. It seemed advisable to accept the multiplier of six persons rather than 5, assuming that in addition to the five persons of the nuclear noble family, a resident should also be taken into consideration, given the preponderance of middle-sized gentry families in the whole of Prussia. Anyway, the surplus (i.e. accepting six persons) would total approximately 1,440 persons for the entire group of the gentry.

persons of staff is only slightly below the average figure related to the staff employed at royal and Church demesnes (five persons), which can be justified by the smaller size of noble demesnes. On the other hand, the approximated figures mentioned above relating to gentry servants are, at least partially, supported by specific source materials, true enough, coming from the mid-seventeenth century. It is the personal tax register of 1662, which includes the most details for the Chełmno Voivodeship.²⁰ It states, for example, the number of two to three persons of staff in farm gentry families, and three to four persons of servants²¹ in families of demesne gentry.²² This suggests that the adopted estimations concerning servants can mostly reflect reality.

We must emphasise that staff, both those employed at Prussian peasant households and in demesnes, cannot be treated as the only workforce, which alone satisfied the needs of the economy. This view, justified to an extent for the situation in the central lands of the Crown, would be incorrect by default for Prussia. Both peasant and demesne households used auxiliary and permanent paid labour to a large extent, provided mainly by smallholders and cotters as well as “the loose men” (the latter in the harvesting period). Without delving into this issue, which will be elaborated on in some statistical calculations presented below, we only want to stress that it accounts for a certain underestimation of peasants’ and demesne gentry’s servants in relation to the figures adopted for the other lands of the Crown.

The afore-discussed methodological assumptions were adopted when calculating the rural population of Royal Prussia, excluding the territories of two large towns: Gdańsk and Elbląg, in addition to Chełmno. Unfortunately, the scarcity of appropriate source materials (lost, to some extent, during the Second World War) made it impossible to calculate their populations precisely and to analyse their occupational structures. The tax registers do not cover villages owned by these cities at all, and the existing replacement material (mainly rent lists) is full of gaps and incomplete. For these reasons, it was necessary to resort to a rather uncertain method of approximating the population globally, basing on the population figures from the second half of the eighteenth century. Naturally, it was not possible to represent the demographics of these territories fully in the form of maps.

Calculating the rural population of Royal Prussia, despite all the difficulties related to the materials and methods, has proven much easier than the determination of the urban population. We have already stressed the scarcity of source materials, in particular tax registers, for urban centres in Prussia. This scarcity not only prevented the presentation of the occupational diversity of the urban population, but also the determination of the number of inhabitants in individual centres in general. These difficulties were especially problematic when determining the populations of the 12 towns in Chełmno and Malbork Voivodeships and the two large towns: Elbląg and Toruń (for Gdańsk, the hypothetical number of inhabitants at the end of the sixteenth century had been established by P. Simson), which accounts for 1/3 of the Prussian urban settlements.

Usually, the populations of those towns for which more specific data were available were calculated on the basis of the number of dwellings, following S. Pazyra’s²³ assumption of six persons per one dwelling, and for town square dwellings (for which in Prussian towns a higher rent was usually paid) – 12 persons. For three towns in Chełmno Voivodeship (Golub, Lubawa, Wąbrzeźno), for which only the overall sums paid for all the dwellings had been available, the comparative method was employed for the calculation of the hypothetical number of dwellings and then, on this basis, the number of inhabitants was established.

For the remaining 12 Prussian towns, the approximation method had to be used, basing on the data from the late eighteenth–early nineteenth century. We assumed that their populations, after the economic crisis and war destruction of the seventeenth century, could in the late eighteenth–early nineteenth century reach the same level they had had in the Renaissance period. Certainly, drawing on monographs on individual towns, we took into consideration their development between the sixteenth century and eighteenth century (e.g., natural disasters in the seventeenth and eighteenth centuries and restoration failure towards the fall of the Polish Commonwealth), making appropriate adjustments to

the estimations. Our motivation was that the application of the method of calculating urban population on the basis of taxes paid (e.g., *schoss* = tax paid by town residents on their property), prone to error as it is, proved to be impossible due to the lack of sufficient source data.

We are perfectly aware that the figures obtained based on the afore-presented methodological assumptions for rural and urban populations are all too often hypothetical. Nevertheless, using these assumptions, we were able to obtain a demographic picture of Royal Prussia, which, even if not entirely free of gaps or shortcomings, is the first comprehensive description of this sort. It can and should provide the point of departure for further studies, improved in the course of time, with more detailed monographs for individual socio-economic problems getting published.

The obtained results made it possible to draw up population maps, the method and results of which are given below. We must also stress that in the text, several demographic issues have been touched upon, in particular in the form of tables offering supplementary information which could not always find its way into the graphic content, but which is nevertheless important from the point of view of the comprehensive description that we are aiming at.

For a fuller understanding of the contents of all the maps, we start by presenting the global results of calculations concerning the rural and urban populations of individual voivodeships, moving the issue of the social structure of the rural population to the discussion of map number 7.

The rural population of Chełmno Voivodeship in the second half of the sixteenth century in districts and per land ownership type was as follows:

Table 1. Rural population of Chełmno Voivodeship

ownership affiliation	total	%	of which			
			Chełmno district	Michałow district	Chełmno bishopric territory	Toruń territory
royal	22,500	34.5	14,542	7,958	–	–
noble	20,736	31.8	14,051	6,685	–	–
Church	15,567	23.9	2,286	1,030	12,251	–
town-Church	800	1.2	–	–	800	–
town-royal	5,247	8.0	1,114	373	–	3,760
undefined	400	0.6	230	170	–	–
total	65,250	100.0	32,223	16,216	13,051	3,760
%	100		49.4	24.8	20	5.8

As indicated in the table, the majority of the rural population was located in the western part of Chełmno district; the majority inhabited royal and noble estates.

The data on the urban population of Chełmno Voivodeship in sixteenth century are as follows (figures for early nineteenth century included for comparison):

Table 2. Urban population of Chełmno Voivodeship

town name	district – administrative unit	no. of dwellings in 16 th c.	number of inhabitants in 16 th c.	total	number of inhabitants in early 19 th c.
Golub	Chełmno	233	approx. 1,866	6,662	year 1826 – 1,760
Grudziądz		?	approx. 2,000		1826 – 5,621
Kowalewo		?	approx. 600		1826 – 512
Łasin		175	approx. 1,170		1826 – 1,294
Radzyń		135	1,026		1826 – 1,008

Toruń	Toruń territory	?	approx. 12,000	12,000	
			total	29,456	

The comparison of the population figures for eight smaller towns in the voivodeship for which we had the data on the number of dwellings in the sixteenth century at our disposal with their populations in the early nineteenth century, as obtained from Roscius,²⁴ indicates a prevailing convergence, in particular in the case of six towns (Golub, Łasin, Lidzbark Welski, Chełmża, Kurzętnik and Wąbrzeźno). This fact made it possible to adopt approximate figures for Kowalewo and Nowe Miasto. In the case of Brodnica and Grudziądz, the nineteenth century figures had to be reduced to account for the well-known population increase after 1772,²⁵ in particular in Grudziądz. For Chełmno, the number of 3,000 inhabitants in the the sixteenth century was established by S. Sadowski.²⁶ The population of Toruń, unknown for the sixteenth century, in 1772, according to the calculations made by T. Korzon,²⁷ amounted to 11,000 persons; in 1796–1804 – according to the data from A.C. Holsche – 8,954,²⁸ in 1846 – 10,473.²⁹

The global figures for the rural and urban population of the voivodeship are presented in the table below.

Table 3. Rural and urban population of Chełmno Voivodeship

district – administrative unit	district km ²	rural population	%	per one km ²	urban population	%	per one km ²	rural and urban population	per one km ²
Chełmno	2,065	32,223	82.9	15.6	6,662	17.1	3.2	38,885	18.8
Michałowó	1,314	16,216	79.2	12.3	4,248	20.8	3.2	20,464	15.6
Chełmno bishopric territory	916	13,051	66.6	14.2	6,546	33.4	7.2	19,597	21.4
Toruń town territory	359	3,760	23.9	10.5	12,000	76.1	33.4	15,760	43.9
total	4,654	65,250	68.9	14.0	29,456	31.1	6.3	94,706	20.4

In percentage terms, the urban population constitutes 31.1% or nearly 1/3 of the total population of the voivodeship. This extraordinarily high percentage of the urban population is explained by the existence of the large urban centre, Toruń. One km² was inhabited on average by 6.3 urban residents.

A comparison of these figures with related ones, obtained by W. Kula for the central lands of the Crown, indicates that the population density of Chełmno Voivodeship in relation to the rural population is similar to the population of Greater Poland (13.1 per one km²) and Cracow Voivodeship (14.7 per one km²). The figures on the urban population in these areas vary (6.3 per one km² as compared to 4.4 and 7.1. per one km²). The average value of population density in relation to the rural and urban population of Chełmno Voivodeship (i.e., 20.4 per one km²) is very similar to the figures for Cracow Voivodeship (21.8 per one km²) and the entire Mazovia region (21.4 per one km²).³⁰ It is also higher than the averages for the densely populated Greater Poland (17.5 per one km²) and Sandomierz Voivodeship (17.6 per one km²).

The obtained overall population figures for the sixteenth century can be compared with the population figures for Chełmno land from the mid-fourteenth century. According to the original calculations made by T. Ladenberger, the number of inhabitants of this area amounted to 87,318 at that time. Accepting the number of 3,405 km² as the total area of Chełmno land, he calculated the average population density of 25.6 per one km². This was an extraordinarily high number in comparison with the figures obtained for the other Polish territories.³¹ And anyway, it resulted from the adoption of the underestimated value of 3,405 km² as the area of the diocese of Chełmno (erroneously equated with Chełmno land, excluding Lubawa land, which in the fourteenth century was a constituent part of the diocese).³²

In 1958, T. Ładogórski introduced major modifications to his calculations, making them more accurate; basing on the number of villages and parishes of the diocese of Chełmno, he managed to establish its population. Rejecting overestimations made by J. Paradowski (101,300 inhabitants) and underestimations made by H. Łowmiański (50,000–60,000 inhabitants), he arrived at the number of approximately 85,800 inhabitants of the diocese of Chełmno (which included the lands of Chełmno and Lubawa),³³ which, assuming the area of 4,490 km², gives the population density of 19.1 per one km². These figures normally do not raise major objections, testifying to a large population density in Chełmno land, in fact, the largest in comparison with the other Polish territories. They are also pretty close to the figures we have determined for the sixteenth century. This would support the conclusion about the relatively high population density of Chełmno land already in the Teutonic period and the non-occurrence of major demographic changes in this area since the end of the fourteenth century. Undoubtedly, the wars of the fifteenth century, which significantly impacted the population of this region, affected also the obtained results.

As far as Malbork Voivodeship is concerned, the demographic data concerning the rural population are presented in the table below.

Table 4. Rural population of Malbork Voivodeship

ownership affiliation	total	%	of which	
			voivodeship excluding Elbląg town territory	Elbląg territory
royal	18,408	58.8	18,408	–
noble	5,020	16.0	5,020	–
Church	313	1.0	313	–
town-royal	7,571	24.2	71	7,500
total	31,312	100.0	23,812	7,500
%	100	–	76%	24%

³¹ T. Ladenberger, *Zaludnienie Polski*, p. 29.

³² Because the author based on the erroneous map by S. Kujot, which showed the line of the Drwęca River as the eastern border of the diocese of Chełmno, excluding the entire land of Lubawa of approximately 900 km²; S. Kujot, *Kto założył parafie w dzisiejszej diecezji chełmińskiej*, RTNT, vol. 12, 1905 (the map of the diocese of Chełmno). A similar mistake was reproduced in the map in vol. 10.

³³ T. Ładogórski, *Studia nad zaludnieniem*, pp. 131, 165.

When it comes to the territory of Elbląg, due to the scarcity of the source material, we could only adopt an estimated number of population. Towards the end of the eighteenth century, it amounted to 15,052 inhabitants.³⁴ For the period discussed here, we decided to adopt the number amounting to 50% of that value, i.e., approximately 7,500 due to the fact that starting from the end of the sixteenth century, a major increase in the settlement activities and population numbers was noted in the western and south-eastern parts of the territory, driven by advances in the colonisation of lowland and swamp areas.³⁵

The urban population of Malbork Voivodeship (excluding Sztum) could only be estimated. This was caused by the disastrous condition of the town source materials for the sixteenth century. For five towns (including Elbląg), we had to use the figures from 1772–1826 complemented with the data from *Deutsches Städtebuch* by E. Keyser. Using historical monographs of individual towns, we were able to offer the approximate numbers for the sixteenth century, as follows:

Table 5. Urban population of Malbork Voivodeship

town name	unit	no. of dwellings in 16 th c.	no. of inhabitants in the 16 th c.	total	number of inhabitants in late 18 th – early 19 th
Dzierzgoń	voivodeship excluding Elbląg town territory	?	approx. 1,500	8,720	1782 – 1,595
					1826 – 2,105
Malbork	voivodeship excluding Elbląg town territory	?	approx. 4,500		1776 – 5,117
					1826 – 5,258
Nowy Staw	voivodeship excluding Elbląg town territory	?	approx. 1,100		1816 – 751
					1826 – 1,514
Sztum	voivodeship excluding Elbląg town territory	50	420		1816 – 751
					1826 – 895
Tolknicko	voivodeship excluding Elbląg town territory	?	approx. 1,200		1816 – 1,400
Elbląg	Elbląg territory	?	approx. 15,000		15,000
				1810 – 16,710	
				1826 – 20,707	
			total	23,720	

The generous estimation of the population of Elbląg is justified by the major economic advancement of this town manifested in the mid-sixteenth century as well as the need to take into account the inhabitants of the suburbs. The relatively high number of inhabitants of Malbork, namely 5,400 (excluding castle residents, the number of which, together with the castle boroughs, amounted to approximately 500 persons), was dictated by the fact that the town acted continuously as an important centre for grain and wood trade and brewing for the entire area of Żuławy.³⁶ In general, per one km² of the voivodeship area, the high number of 11.3 urban inhabitants applies. This fact, unprecedented in the Crown's demographics, results from the very small size of the voivodeship together with the existence of the large urban centre, namely Elbląg.

³⁴ M. Bär, *Westpreussen*, vol. 2, p. 708.

³⁵ H. Bertram, *Die Eindeichung, Trockenlegung und Besiedlung des Weichseldeltas seit dem Jahre 1300 in ihrer geopolitischen Bedeutung*, „Zeitschrift des Westpreußischen Geschichtsvereins”, vol. 72, 1935, pp. 192 f. and the map.

³⁶ G. Berg, *Geschichte der Stadt Marienburg*, Malbork 1921, p. 112.

Table 6. Rural and urban population of Malbork Voivodeship

administrative unit	area in km ²	rural population	%	per one km ²	urban population	%	per one km ²	rural and urban population	per one km ²
voivodeship excluding Elbląg town territory	1,584	23,812	73.2	15.0	8,720	26.8	5.5	32,532	20.5
Elbląg town territory	512	7,500	33.4	14.7	15,000	66.6	29.2	22,500	43.9
Total	2,096	31,312	56.9	14.9	23,720	43.1	11.3	55,032	26.3

The share of the urban population in percentage terms amounts to 43.1%, which makes up over 2/5 of the total population. This is the greatest share in comparison with the other voivodeships. The average population density in relation to the rural population is close to the population density of Greater Poland and Lesser Poland (14.9 in comparison with 13.1 and 13 per one km²), while in relation to the rural and urban population (26.3% per one km²), it is greater than the population density of Mazovia (21.4 per one km²).

The numbers relating to the rural population of Pomeranian Voivodeship are as follows:

Table 7. Rural population of Pomeranian Voivodeship

ownership affiliation	total	%	per district								
			Człuchów	Gdańsk	Mirachowo	Nowe	Puck	Świecie	Tczew	Tuchola	Gdańsk-town
royal	32,794	35.6	6,225	856	1,728	1,665	2,742	4,144	10,012	5,422	–
noble	29,208	31.7	6,917	1,564	1,637	2,306	2,269	5,771	6,217	2,527	–
Church	13,782	14.9	153	3,319	602	453	2,487	977	5,214	577	–
town-royal	16,116	17.5	–	451	–	–	–	113	548	4	15,000
undefined	347	0.3	–	60	48	–	–	10	152	77	–
total	92,247	100.0	13,295	6,250	4,015	4,424	7,498	11,015	22,143	8,607	15,000

Of necessity, in these calculations, we had to adopt an approximate number of inhabitants of the territory of Gdańsk, given the serious shortages in the source material. The number of approximately 25,000 inhabitants of the territory of Gdańsk in 1793³⁷ was the only viable choice for the basis of our calculations. Adjusting for the certainly significant increase in the number of inhabitants in this territory (the Dutch colonisation, a major increase in the number of settlements), which, however, was slightly smaller than in the territory of Elbląg, we decreased it by approximately 40%, arriving at the number of 15,000 inhabitants.

The urban population of Pomerania was calculated in a much more precise manner when compared with the urban population of the remaining voivodeships. This was partially because of the fact that the tax registers of 1570/1571 stated the number of dwellings in 14 smaller towns. When it comes to Gdańsk, the hypothetical number of residents in 1577 was established by P. Simson,³⁸ while for Hel, the number of the population in the years 1527–1554³⁹ was given in the sources.

³⁷ G. Dabinnias, *Die ländliche Bevölkerung*, p. 91. In fact, it amounted to 26,428, provided we include the population of Hel and the rural estates of Gdańsk's hospitals, which we treat separately in our calculations.

Gdańsk	territory of the town		approx. 40,000	41,170
Hel			1,170	
total				55,318

The preponderance of small and medium-sized urban centres is clearly visible, however, none of them exceeds the number of 2,000 inhabitants, the only exception being the 40,000 of Gdańsk, which was the largest urban centre not only of Pomerania but of the entire Royal Prussia and the Crown in general. In spite of that, the urban population density per 1km² amounts to 4.3, which in essence corresponds to the situation noted in the other lands of the Crown. This was caused to an extent by the large size of Pomerania with its forest areas and a sparse network of urban settlements.

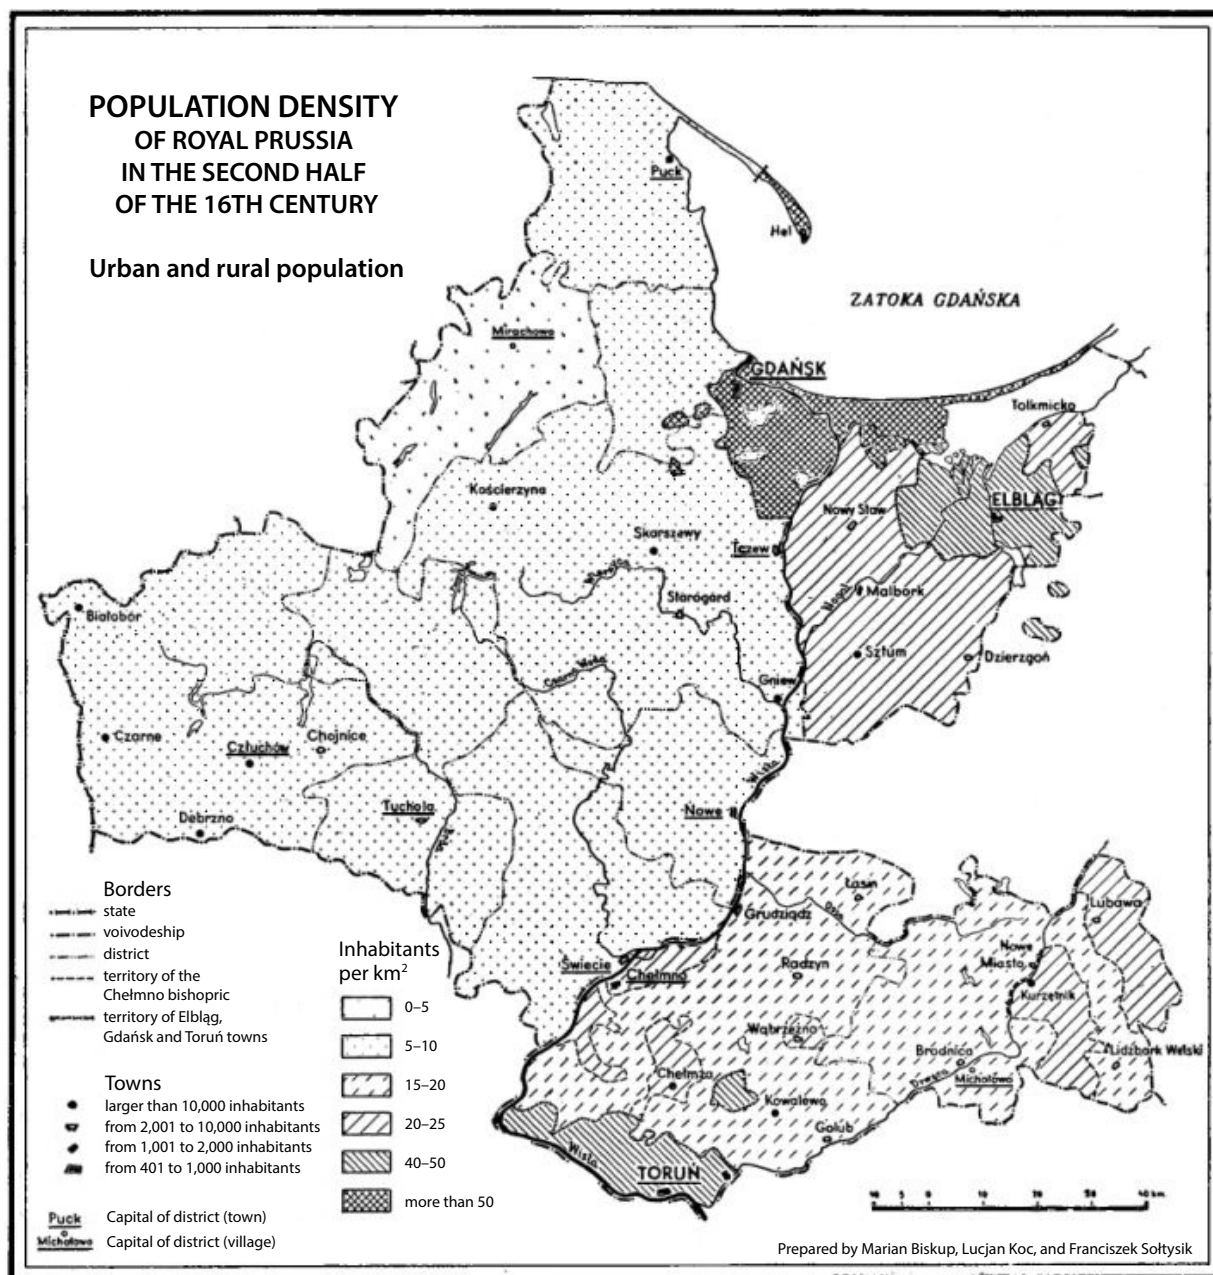

Table 9. Rural and urban population of Pomeranian Voivodeship

district – administrative unit	area in km ²	rural population	%	per one km ²	urban population	%	per one km ²	rural and urban population	per one km ²
Człuchów	2,436	13,295	74.8	5.4	4,470	25.2	1.8	17,765	7.3
Gdańsk	661	6,250	100.0	9.4	–	–	–	6,250	9.4
Mirachowo	1,137	4,015	100.0	3.5	–	–	–	4,015	3.5
Nowe	720	4,424	80.1	6.1	1,098	19.9	1.5	5,522	7.7
Puck	981	7,498	89.7	7.7	864	10.3	0.9	8,362	8.5
Świecie	1,473	11,015	85.3	7.4	1,182	14.7	0.8	12,197	8.3
Tczew	3,038	22,143	81.3	7.3	5,088	18.7	1.7	27,231	8.9
Tuchola	1,818	8,607	85.6	4.7	1,446	14.4	0.8	10,053	5.5
Gdańsk-town	643	15,000	26.7	23.3	41,170	73.3	64.0	56,170	87.4
Total	12,907	92,247	62.5	7.2	55,318	37.5	4.3	147,565	11.4

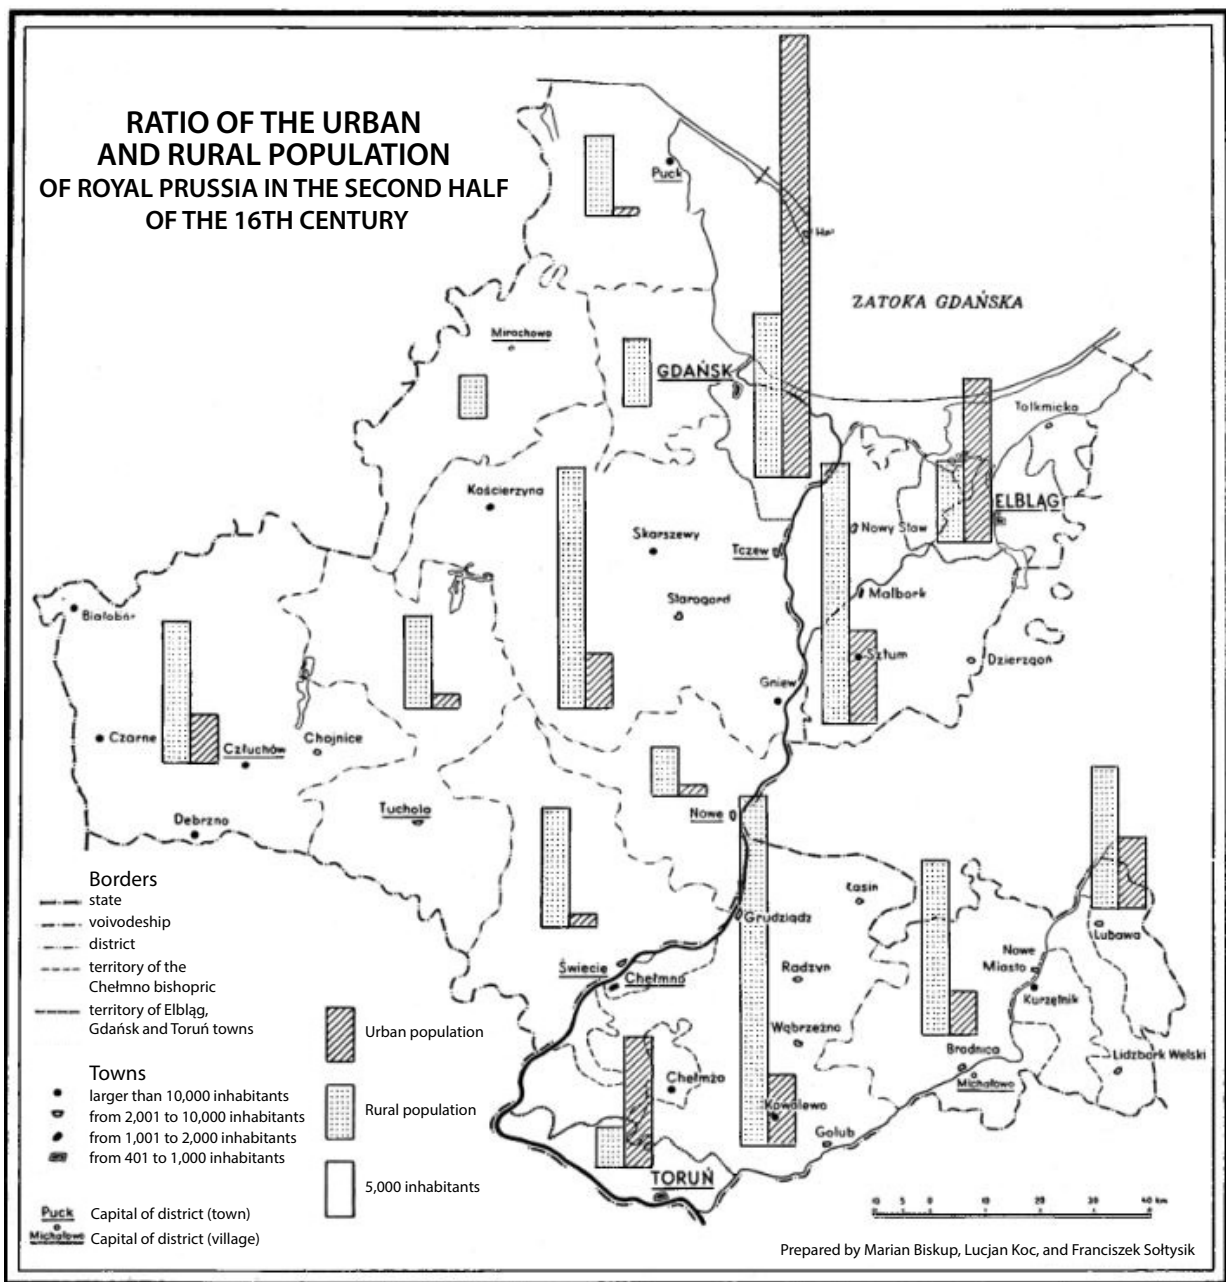

In percentage terms, the urban population makes up 37.5%, which translates to over 1/3 of the total population (the ratio being similar to Chełmno Voivodeship) thanks to the great number of Gdańsk's population. However, even this large number does not significantly increase the average density of population in relation to the rural population, i.e., 7.2 per one km², raising it to 11.4 per one km².

**Map 1. Population density of Royal Prussia in second half of the 16th century.
Rural population**

Map 2. Population density of Royal Prussia in the second half of the 16th century. Urban and rural population

Map 3. Ratio of urban to rural population of Royal Prussia in the second half of the 16th century

These numbers are the lowest not only in relation to the remaining two Prussian voivodeships, but also to the majority of the Crown's territories; they are comparable with the population density in Lublin Voivodeship (8.8 and 10.5 per one km²), and lower than the average for all the Crown's lands (14.2 and 18.4 per one km²).

The figures obtained for the territory of Pomerania can be compared with the figures calculated for the mid-fourteenth–early fifteenth centuries by T. Ładogórski.⁴⁰ By slightly adapting his values through the omission of the data for the Bytów and Lębork districts, we obtained the number of approx. 12,045 km² of the area of Pomerelia (even though it fails to include a part of the diocese of Pomesania with the territory of Gdańsk) and approximately 89,500 inhabitants (or 87,500), which gives approximately 7.4 or 7.3 per one km². In comparison with the sixteenth century, the population increase would then be approximately 65% and the greatest in relation to the urban population, which would increase threefold (20,500 in comparison with 55,318). Clearly, the growing demographic potential of Gdańsk played a key role here. Be that as it may, the demographic development of Pomerelia between the fourteenth and the sixteenth centuries is much greater than in the case of Chełmno Voivodeship.

For the entire area of Royal Prussia, the following results have been obtained:

Table 10. Rural and urban population of Royal Prussia

voivodeship	area km ²	rural population	%	per one km ²	urban population	%	per one km ²	rural and urban population	per one km ²
Chełmno	4,654	65,250	68.9	14.0	29,456	31.1	6.3	94,706	20.4
Malbork	2,096	31,312	56.9	14.9	23,720	43.1	11.3	55,032	26.3
Pomeranian	12,907	92,247	62.5	7.2	55,318	37.5	4.3	147,565	11.4
Total	19,657	188,809	63.5	9.6	108,494	36.5	5.5	297,303	15.1

Thus, the average population density of Royal Prussia (15.1 per one km²) is close to the population density of Greater Poland and Lesser Poland and it is lower than the average population density of the entire Crown (18.4 per one km²). One of the reasons for this situation is clearly the low population density of the largest, Pomeranian Voivodeship, which remained at a relatively low level.⁴¹ On the other hand, when it comes to the average density of the urban population (5.5 per one km²), Royal Prussia tops the other lands of the Crown with their average of 4.2 per one km². The percentage of the urban population of Prussia, amounting to 36.5, is very high indeed. Rounding up the obtained overall figures a bit, one might conclude that out of some 300,000 inhabitants of Royal Prussia, approximately 200,000, or $\frac{2}{3}$, were rural population, while 100,000, or $\frac{1}{3}$ – urban population. In this respect, the Prussian province was clearly different from the other Crown territories.⁴²

⁴⁰ T. Ładogórski, *Studia nad zaludnieniem*, pp. 131, 168.

⁴¹ For the Pomerania of the fourteenth century together with Chełmno land T. Ladenberger, *Zaludnienie Polski*, p. 35, assumed 10.3 inhabitants per one km², subsequently changing the number to approximately 9.7; T. Ładogórski, *Studia nad zaludnieniem*, p. 131.

⁴² Approximate population figures for Royal Prussia at the end of the eighteenth century (years 1772–1793) obtained from the data of M. Bär and G. Dabinnus (with an approximate addition of 5,000 inhabitants for the territory of Toruń and 9,000 for the town):

Voivodeship	Rural population	Urban population	Total
Chełmno	91,934	18,725	110,659
Malbork	65,501	17,900	83,401
Pomeranian	140,199	62,091	202,290
Total	297,634	98,716	396,350

The population increase between the sixteenth and eighteenth century would amount to approximately 100,000, which corresponds in total to 33% of the sixteenth century's population. This indicates a smaller increase than in the other parts of the Crown, where it reached approximately 58%; cf. S. Hoszowski, *Dynamika rozwoju zaludnienia Polski w epoce feudalnej*,

The population density of royal prussia broken down into districts is shown in the maps. They clearly indicate the greatest rural population density in Malbork and Chełmno Voivodeships (in particular, in the territory of Chełmno district – 15.6 per one km²) as well as in the territory of Gdańsk in the northern part of Pomeranian Voivodeships (23.3 per one km²). In all the remaining districts of pomerania, we noted low population density (from five to 10 per one km²), descending to the scale's lowest range in two districts: Mirachowo and Tuchola (3.5 and 4.7 per one km²).

The picture changes when the rural and urban populations of Prussia are taken into consideration, especially inside the territories of Chełmno and Malbork Voivodeships. the average population density of the former gets 'promoted' to the scale range of 15–20 per one km², and in the territory of the Chełmno bishopric, to the range of 20–25 per one km². Inside the territory of Toruń, it reaches the number of 43.9 inhabitants per one km². a similar phenomenon can be noted even more easily inside the territory of the Malbork Voivodeship, where the average population density gets increased to 20.5 per one km², and inside the territory of Elbląg – to 43.9 per one km².

When it comes to the territory of Pomeranian Voivodeship, the change is noticeable only in the territory of Gdańsk, where the average rises to 87.4 per one km², and in the territory of the Tuchola district, where the average rises from the lowest scale range 0–5 per one km² to 5.5. per one km².

The afore-presented phenomena can be explained well using the afore-mentioned figures for urban populations, in particular those pertaining to large cities. a comparison of the sizes of both population categories per individual districts is clearly illustrated in the attached map – 'Ratio of urban to rural population of Royal Prussia'.

Village population density (thematic map 4)

The above-mentioned cartographic presentation of demographics in Royal Prussia is subject to more detailed scrutiny on the map number 3 presenting the population density in parishes of Royal Prussia, the calculations for which are as follows:

Table 11. Population density in Royal Prussia in parishes (excluding the population of the towns)

voivodeship	rural population per one km ²					unknown	total no. of parishes (or their counterparts)
	0–5	5–10	10–15	15–20	over 20		
Chełmno	6	14	36	45	18	2	121
%	5	11.5	29.8	37.1	14.9	1.7	100
Malbork	1	2	8	27	9	–	47
%	2.1	4.3	17.0	57.4	19.2	–	100
Pomeranian	49	53	52	27	6	1	188
%	26	28.2	27.7	14.4	3.2	0.5	100
total	56	69	96	99	33	3	356
%	15.8	19.4	26.9	27.8	9.3	0.8	100

The table speaks of the particularly high diversity of the population density in all of the voivodeships. In Chełmno Voivodeship, the parishes with an average population density between 10 and 20 and over 20 were predominant, with the maximum at 29.5 per one km². In Malbork Voivodeship,

RDSG, vol. 13, pp. 139 f. What is striking is the decrease in the urban population by approximately 10,000, which is related to the well-known fall of smaller Prussian towns in the seventeenth and eighteenth centuries; the percentage of the urban population in the eighteenth century is only approximately ¼. The most significant increase was noted for Malbork and Pomeranian Voivodeships, which would confirm the conclusion about the distinct intensification of settlement processes in these areas in the late sixteenth century.

the majority of parishes were populated by 15 to 20 people per one km² (29.8 maximum) while in Pomeranian Voivodeship is the one with the highest number of parishes with the lowest density (49) and the majority of parishes are populated by 0 to 15 people per one km² (with the maximum density at 25,8). As far as the entire Prussia is concerned, however, the parishes with an average population (10–20) predominate.

The highest population density can be observed in a deforested area of Malbork Voivodeship, particularly, in alluvial soil deposits in Żuławy and in the southeast where clayey soils can be found. Less populated (10–15 per one km²) is the area of the territory of the town of Elbląg, the western part of which, located on both banks of the Nogat, was waterlogged and not yet developed. Similarly, in the eastern part of Elbląg Voivodeship, lying on the Elbląg Upland and around Tolkmicko, there are vast areas of forest and fertile soils – sandy soils and podzols – good for cultivation, which resulted in them being less populated. However, the only areas with the lowest population density at 0–10 people per km² are those in the vast forests near Sztum and Drużno Lake, where boggy meadows were only improved and developed by the Malbork engineers in the late sixteenth century and seventeenth century.

In Chełmno Voivodeship, the highest population density (15–20 per one km²) we observe in the parishes in the west of Chełmno district and Chełmno bishopric stretching from Toruń district, through Radzyń, Łasin as far as the northern borders of the voivodeship. It is, undoubtedly, the result of the presence of fertile clayey soils and lack of forests; those areas had been inhabited the longest – as early as since the pre-Teutonic period. The second highest populated areas are the parishes in the western part of Michałowo district inhabited mostly by the Chełmno petty gentry, those in the west and south of Brodnica, and some parishes in Lubawa land (near Kurzętnik and Lubawa). All of the said areas are interwoven with those of lower and the lowest populated ones. It is clearly visible in the southwest of the Voivodeship within the territory of the town of Toruń, which, due to its forested area and sandy soils, is among the less populated ones. Some parallel phenomena occur even in the highest populated lands of the Voivodeship, i.e., near Chełmża (with boggy and forested lands), on the right bank of the Drwęca, near Golub (densely forested), and near Wąbrzeźno (bogs and forests). Among less populated lands (10–15 people per one km²) we can quote the Vistula riverside stretching from Chełmno up to Grudziądz, which consist mostly of meadows and pastures subject to much later (Olander) colonisation since the end of the sixteenth century. The least populated parts of the Voivodeship are located in the centre of Michałowo district and in the densely forested Brodnica Lakeland. Also, the less populated areas stretch further east along the Brodnica River valley and forests as far as Lidzbark in the southeast of Lubawa Lands.

We can observe a particularly characteristic phenomenon in the Pomeranian Voivodeship; with the exceptions of the Vistula riverside and south-western parts, its entire area is incomparably low populated (less than five people per one km²). The reason behind that is the share of forested land, especially Tuchola Forests, covering the majority of central and western parishes, paired with a tenuous settlement network. The most important of settlement clusters of Pomerania are the deforested riverbanks of the Vistula – near Tczew, Skarszew, and Gdańsk – abundant with fertile clayey and alluvial soils.

The most important centres of settlement in Pomerania are the open riverside areas, especially the northern riverbank near Tczew, Skarszewy, and Gdańsk, thriving with fertile clayey and alluvial soils. The average population density in the voivodeship reaches 20 per one km², and even exceeding this threshold in some parishes within the town of Gdańsk. The parishes closest to the Gdańsk, Tczew, and partially, Nowe district were mostly inhabited by the gentry or Church demesne population.

In the northern part of the voivodeship, in Puck district, some less populous settlement areas are notable – the fertile lands of islands (*kępa*): Puck and Swarzewska, though their average population is impacted by the vast areas of wetlands and the forests of Darżlubiska Forest (*Puszcza Darżlubiska*).

In the southern parts of the Voivodeship, the biggest settlement cluster is at the Vistula's riverside, in the open areas of Świecie district, southern parts of Człuchów, and Tuchola (with fertile clayey soils) where average population density reaches 20 people per one km².

It bears mentioning that geomorphological and soil conditions may indicate various ways of land use in the area of parishes. The depiction of the phenomena using that level of administrative unit resulted in including in the areas of the parishes' less populated lands, consequently changing the

average population indicator, which in turn rendered some of the settlements impossible to detect, and impossible to depict on a map. As such, there are the parishes in the north of Człuchów district (Borzyszkowy and Brzeźno Szlacheckie) and Puck district (Krokowo parish). Even though they were the major clusters of Kashubian gentry, their average population does not exceed 10 people per one km². It shows that an indicator calculated in such a way does not serve the purpose of depicting the real population distribution in the investigated area, e.g., in the arable lands only, excluding the forested and uncultivated lands. The issue is better addressed in the next map.

Relative village population density (thematic map 4)

The map was based on the total area of arable land given in lans presented at the scale of parishes. The population density index was recalculated as follows: 16.8 ha, i.e., six lans per one km²; then the total population was divided by such recalculated arable land in lans to arrive at an average population density per one km² of arable land.

Table 12. Village population density per 1 km² of arable land in Royal Prussia (in parishes)

voivodeship	number of people per one km ² of arable land							unknown	total no. of parishes (or their counterparts)
	0–15	15–20	20–25	25–30	30–35	35–40	over 40		
Chełmno	1	12	59	28	17	2	1	1	121
%	0.9	9.9	48.8	23.1	14.0	1.7	0.8	0.8	100
Malbork	–	7	29	7	2	2	–	–	47
%	–	14.8	64.3	14.9	4.3	4.3	–	–	100
Pomeranian	23	80	48	17	11	3	3	3	188
%	12.2	42.6	25.5	9.0	5.9	1.6	1.6	1.6	100
total	24	99	136	52	30	7	4	4	356
%	6.7	27.8	38.2	14.6	8.5	2.0	1.1	1.1	100

The table above indicates that in Chełmno and Malbork Voivodeship, the parishes with 20–30 people per one km² of arable land predominate. The maximum population in Chełmno parishes reaches 38.9, while in Malbork it is 38.5. On average, in Chełmno, there are 24.8 people per one km² of arable land, while in Malbork 23.9.

In Pomeranian Voivodeship, however, the parishes with 15–25 inhabitants per one km² of arable land come to the fore (68.1%). As many as 23 parishes (which constitutes 12.2%) had the lowest density – below 15 people (minimum 8.6) per one km²; the maximum density reached as many as 47 inhabitants per one km². The average for the entire Voivodeship was at 22.6 people per one km².

In Chełmno Voivodeship, as far as the largest settlements are concerned (understood as regions with more than 25 inhabitants per one km² of arable land), they are located near Toruń, Grudziądz, Radzyń, Golub, and Brodnica, or, more generally, in the western part of Chełmno district and eastern part of Michałowo district. In the east of the voivodeship, the largest settlement area is located in the centre of Lubawa lands. The least populated lands (less than 20) could be found in the south and north of Lubawa lands, as well as north of the town of Brodnica, while in the western regions such low population density is fairly rare and can be observed in Gubiny parish in the north of Chełmno district with the lowest population density of 12.6 per one km².

In comparison with the absolute population density, this indicator presenting relative population density per one km² of arable land yielded some different results in the case of the territory of the town of Toruń, the Vistula riverbank area and by the Drewnica, near Golub, where heavily forested areas with previously low density now are among those with the high relative population density areas.

In Malbork Voivodeship, the highest population density (over 25 per one km²) can be observed within the town of Elbląg, in Dzierzgoń and Sztum vicinity, and the centre of Malbork in particular. The majority of Wielkie and Małe Żuławy Malborskie (*Greater and Lesser Żuławy*) is among the regions with average relative population density (with the sole exception of Lisewo by the Leniwka River). The parishes with lower relative population density could be found in the Tolkmicko region, and in the centre of Wielkie Żuławy Malborskie, though the ratio is never below 15 people per one km².

So, the major differences, in comparison to the absolute population density, were in the Elbląg region and near Sztum. In Żuławy, however, there is no noticeable difference between the two maps. It can be explained by the lack of forested areas and wastelands in those heavily cultivated settlement regions.

In Pomeranian Voivodeship, the highest relative population density (over 25 per one km²) can be observed in the riverside areas near Świecie, Gniew, and Gdańsk (including the town itself). The other stretches of, slightly less, populated areas are: the north-western part of the Puck district and the region near Mirachowo, as well as the north of Człuchów district. We can observe the average density (up to 25 per one km²) in Tuchola district, including the Tuchola Forests, while the lowest density – in the centre of the voivodeship, near Kościerzyna, Starogard, and Skarszewy.

It is clearly visible that in comparison to the absolute population density, the greatest settlement regions in Pomerania (*Pomorze*) were not located exclusively near the Vistula river and Gdańsk, and even in the northwest regions, particularly in Puck, Człuchów, and Tuchola district, which are heavily forested. It points to the existence of settlement “islands” in the vast body of the Tuchola Forest (parishes: Wiele, Brusy, Czersk, Osie, and Śliwice). The high relative population density in Puck and Mirachowo districts, as well as in the north of Człuchów district, indicates that important settlements, mostly of Kashubian gentry, were located there. On the other hand, the increase of population density is sometimes a result of the higher percentage of craftsmen among the villages, e.g., innkeepers in Lisewo, in Malbork Voivodeship, or ore miners in Oliwa parish, in Pomeranian. This issue will be elaborated on later.

To sum up, the map of relative population density neatly balances the one-sided perspective presented by the absolute population density data. It shows a greater variation of the population in the settlement regions, which we deem a better depiction of the actual state of the distribution of settlement in Royal Prussia. However, the key conclusion remains intact: Pomeranian Voivodeship was less populated than the two others.

The size of the rural and urban settlements (thematic map 5)

Map number five complements the two previous ones depicting the rural and urban settlements in Royal Prussia, taking into account the number of their inhabitants.

The settlements were divided into eight groups as follows:

category	no. of inhabitants
I	1 – 30
II	30 – 100
III	100 – 200
IV	200 – 400
V	400 – 1,000
VI	1,000 – 2,000
VII	2,000 – 10,000
VIII	over 10,000

In terms of the type of settlement, the first z categories are rural, though the last one might also include smaller towns.

The results of such a division of settlements, grouped by voivodeship, are presented in the table below; the settlements belonging to the towns of Chełmno, Elbląg, and Gdańsk were not included in the tally due to lack of data.

Table 13. Size of the rural settlements in Royal Prussia

voivodeship	rural settlements with population of [no. of inhabitants]					size unspecified	total
	1–30	30–100	100–200	200–400	400–1,000		
Chełmno	106	175	187	71	2	72	613
%	17.4	28.5	30.5	11.6	0.3	11.7	100
Malbork	30	72	64	30	–	25	221
%	13.6	32.6	28.9	13.6	–	11.3	100
Pomeranian	211	420	219	56	1	80	987
%	21.3	42.6	22.2	5.7	0.1	8.1	100
Total	347	667	470	157	3	177	1821
%	19.1	36.7	25.8	8.6	0.1	9.7	100

The same division was applied to the settlements grouped by their ownership, which rendered the following results:

Table 14. Size of the rural settlements in Chełmno Voivodeship, grouped by the ownership affiliation

ownership affiliation	rural settlements with population of [no. of inhabitants]					size unspecified	total
	1–30	30–100	100–200	200–400	400–1,000

total	12	19	2	3	36
%	33.4	52.8	5.5	8.3	100

In Chełmno Voivodeship, the average settlement is inhabited by approximately 2,100 people, in Malbork c.a. 3,950, and Pomeranian – 3,450. In the entire Royal Prussia, the average town is inhabited by 3,140 (with a minimum value of 420 and maximum 40,000 burghers).

The tables above indicate that among the rural settlements those of average size with 30–100 and 100–200 inhabitants prevail. They are usually smaller or middle-sized peasant villages and villages

inhabited by the farm gentry (*szlachta zagrodowa*) and demesne gentry (*szlachta folwarczna*). The settlements of 200–400 inhabitants, just like the remaining three villages of more than 400 (Lisewo and Gruta in Chełmno district and Skórcz in Nowe district in Pomeranian Voivodeship – all of which are royal property), were usually large peasant villages.

The category of smaller settlements includes mostly those located by the mills or inns, but also villages belonging to the demesne gentry (one or two families in one village), which is particularly notable in Pomeranian Voivodeship. A general conclusion can be made that the size of the village usually, though not always, corresponds to the ownership of the villages. The villages with more than 100 inhabitants usually belong to the king or the Church. We do, of course, infrequently encounter larger villages (more than 200 inhabitants) belonging to the nobility, though mostly in Człuchów district.

The conclusion above is supported by the findings of the map analysis. It is particularly visible for Chełmno and Malbork Voivodeships; a greater density of smaller and middle-size in the western parts of Chełmno Voivodeship corresponds to the higher proportion of the noble property. The larger settlements, however, are located in Lubawa lands (the Chełmno bishopric territory) and in the lands belonging to the starosts of Brodno and Rogoźno.

In Malbork Voivodeship (excluding the Elbląg area) the greater density of smaller villages can be observed in the south-eastern region, which mostly belongs to the nobility, while the larger settlements are located in Żuławy, especially between the Leniwka and the Nogat (Malbork royal estates, *ekonomia malborska*).

In Pomeranian Voivodeship (excluding the territory of the town of Gdańsk), the majority of the settlements are of smaller size (1–30 and 30–100 inhabitants). It is, undoubtedly, eventuated by the considerable share of inn and mill villages (royal property mostly) scattered throughout the Pomeranian forests. Similarly, contrary to the two other Voivodeships, a smaller number of peasants in royal and Church villages, and a higher number of farm gentry families does not allow for drawing any swift conclusions concerning the ownership affiliation on the basis of the property's population. In the voivodeship, there is a majority of smaller settlements (1–100 inhabitants) each belonging to all categories of the property owners likewise. Only the largest settlements (of more than 200 villagers) belong either to the Crown or the Church; they cluster in the riverside stretch and the south of Tuchola and Człuchów district. The larger noble settlements are notable in the northern and central part of Człuchów district (Kashubian gentry area).

As far as the urban settlements are concerned, we can observe the prevalence of smaller ones which is particularly visible in Pomeranian Voivodeship, and the middle-sized ones, particularly those of 1,000–2,000 burghers (52.8%). The presence of the three largest towns of more than 10,000 residents leaves its mark on the entire settlement landscape, especially if we take into consideration the fact that in the remaining 2,000–10,000 category there are only two towns: Chełmno and Malbork.

Distribution of smallholder and cotter population (thematic map 6)

Map number six aims to present one of the major socio-economic problems in Royal Prussia, which is the issue of wage labourers among peasants, known in Polish under the names “komornik” (Cotter) and “zagrodnik” (*hortulani, smallholders*).

The importance of smallholders in the peasant and manorial economy of Prussia as early as in the times of the Teutonic Order has drawn the attention of scholars often enough.⁴³ Many an interesting remark were made by J. Rutkowski,⁴⁴ and more recently by A. Mączak and W. Odyńiec.⁴⁵ The works

⁴³ Cf. H. Plehn, *Zur Geschichte der Agrarverfassung in Ost- und Westpreussen*, „Forschungen zur brandenburgisch-preussischen Geschichte”, vol. 17, 1904, p. 82 f.; H. Steffen, *Beiträge zur Geschichte des ländlichen Gesindes in Preussen am Ausgange des Altmittelalters*, Królewiec 1903, p. 70 f.

⁴⁴ J. Rutkowski, *Pańszczyzna i praca najemna*, p. 40 f.

⁴⁵ A. Mączak, *Folwark pańszczyźniany a wieś w Prusach Królewskich w XVI–XVII w.*, PH, vol. 47, 1956, no. 2, pp. 359 f.; W. Odyńiec, *Ghurzy i golce na Żuławach w roku 1673*, „Rocznik Gdański”, vol. 14, 1955.

based on the starostwos' [*lands governed by starosta* – translator's note] inspections emphasise as a key factor the need for smallholders, especially in the royal estates. The acquired sources enabled us to fairly precisely estimate the population of landless peasants for the first time (apart from the territory of the towns of Chełmno, Elbląg, and Gdańsk).

We know that the landless peasants (commonly known as "ogrodnicy" [*hortulani*]) were located near the Prussian villages and manor demesnes to serve as hired hands. Sometimes they were grouped in special "*hortulani*" villages (*wsie zagrodnicze*) near the manors,⁴⁶ a practice present already in the Teutonic times. They could not be counted as wage labourers per se, as they were forced to do additional work for a specified pay, usually paid in kind, and their freedom of movement was also restricted. Yet, they were relatively mobile; despite all the measures to prevent that, they often changed their whereabouts. They can be roughly divided into three categories: demesne/castle *hortulani* (*folwarczni/zamkowi*), peasant *hortulani* (*gburscy*), and commune's *hortulani* (*gmińscy*), who were located for the benefit of the entire village or community. The peasant and commune ones were often additionally forced to work in the manor demesnes, particularly the royal ones.

The division proposed above is not represented in the majority of the source material (especially in the key primary source – tax registers) where another criterion is used, namely division into smallholders without and with arable land. The first group occupied separate cottages with a garden paying 1–2 grosz in 1570 in Chełmno and Pomeranian Voivodeships, and presumably four grosz in 1581 in Mabork Voivodeship.⁴⁷ The latter, called "*robotnych, co rolę mają*" (*hard-working, with arable land*), undoubtedly owned a small plot of land next to their cottage, which was granted outside of the village peasants' fields, and for which they paid four grosz in 1570 and, supposedly, six grosz in 1581.⁴⁸ Small as they were, the fields could not constitute a separate farmstead. The third category found in the sources were the "free, commune" *hortulani* (*wolni gmińscy*) or "hired hands" also called "those who earn the rent", paying the highest tax – six or 12 grosz.⁴⁹ Apart from the cottage and the garden, the smallholders also owned cattle, or sometimes became craftsmen, which will be addressed below in greater detail.

We should note that the term *hortulani* is often used to describe the group of "rataje" (*oracze, ploughmen*) who, despite formally being servants, undoubtedly can be counted as hired hands.⁵⁰ However, drawing on the fact that they often owned land (i.e., cottage with a garden) the sources, especially the tax registers, often equate them with the smallholders. Such a practice is rarely possible to detect in the sources,⁵¹ which results in counting them in the group of smallholders⁵² and only specifying the possible difference in the footnotes.

The previous considerations, though incomplete in their nature, are necessary to properly understand the tables below presenting the categories of smallholders in Royal Prussia. They are, to a large extent, based on the data acquired from tax registers, because only those sources proved satisfactory to establish and widely apply the categories mentioned above. Due to some supplementary sources failing to provide any detailed distinction, except the total number of smallholders, an "unspecified" category was introduced. It also includes the estimated, relatively small number of smallholders, especially in the case of Chełmno Voivodeship (about 9%) added to the tally. The tables do not pertain to the territories of the towns of Chełmno, Elbląg, and Gdańsk.

It was decided to elaborate the table presenting each Voivodeship separately because the tax registers from Malbork Voivodeship (years 1581–1582) list and assume slightly different categories than those from the two other voivodeships (from years 1570–1571).

⁴⁶ Cf. B. Geremek, *Problem siły roboczej w Prusach w pierwszej połowie XV w.*, PH, vol. 48, 1957, no. 2, p. 201.

⁴⁷ The criteria were assumed by the tax registrars in Royal Prussia on the basis of tax proclamations from 1569 and 1581; VL, vol. 2, pp. 103, 213.

town-royal	–	119	–	–	–	177	296
total	29	2,808	68	109	2	622	3,638

The total number of smallholders in the entire Royal Prussia amounts to 7,636 (workers) and having included also the estimated numbers for the area of the three largest towns, most probably to approximately 8,000. The tables above indicate that the most notable category of the smallholders is that called “bezrolni” (*without arable land*) who paid 1–2 grosz rent in the year 1570, and four grosz in 1581. It amounts to 4,783 people, which translates to 62.6% of their total number. Apart from them, there was a significant group of smallholders who owned land and paid four grosz in 1570 and six grosz in 1581. It accounts for 1,108 out of 6,300 smallholders in Chełmno and Pomeranian Voivodeships. The dominance of the smallholders without arable land, which renders them more mobile and less connected with particular villages, remains indisputable.

Table 20. Classification of smallholders in Malbork Voivodeship (1581–1582)

ownership affiliation	no. of smallholders paying rent [grosz]					total
	4 gr	6 gr	8 gr	2 gr	unspecified	
royal	592	18	32	116	151	909

town-royal	–	–	–	–	–	–
total	916	25	33	136	226	1 336

Table 21. Classification of smallholders in Pomeranian Voivodeship (1570–1571)

ownership affiliation	no. of smallholders paying rent [grosz]						total
	2 gr (without arable land)	4 gr (with arable land)	6 gr (free wage labourers)	8 gr	12 gr	unspecified	
royal	395	461	153	–	7	116	1,132 ⁵⁶
noble	540	275	56	1	–	92	964
Church	90	275	56	–	–	108	529
town-royal	5	29	3	–	–	–	37
total	1,030	1,040	268	1	7	316	2,662

⁵³ Two ploughmen listed in Krotoszyny and Mózgowo, Michałowo district; cf. footnote no. 51.

⁵⁴ Two ploughmen listed near Salno, Chełmno district; cf. footnote no. 51. The number 206 of unspecified smallholders includes also the 99 estimated smallholders.

⁵⁵ Including 32 ploughmen in: Chojty – 4, Cieszynowo W. – 1, Cieszynowo M. – 1, Dąbrowa (Dammerau) – 2, Górki – 2, Igly – 5, Jeziorno – 2, Labusztyn – 2, Linki – 2, Polaszki – 4, Wątkowice M. – 1, Wątkowice W. – 2, Witki – 2, as well as two ploughmen of M. Branta (with no designated village) ASK I 120, pp. 12, 18, 19, 21, 23, 24. It is notable that in the printed tax register of 1582, the ploughmen are given in the total number of smallholders, which renders them indistinguishable.

⁵⁶ Including 14 ploughmen in: Brody – 1, Ciepłe – 4, Gronowo – 4 (manor demesnes in Gniewno district), Klonówka, Tczew district – 3; ASK XLVI 28, pp. 509, 515, 520, 547; Bralewica – 1, Dąbrówka – 1 (Tuchola starostwo’s demesnes); *ibidem*, pp. 91, 93.

The role of the smallholders in Royal Prussia is well depicted by the comparison of total numbers of peasants and smallholders in the voivodeships.

voivodeship	smallholders	peasants	proportion
Chełmno	3,638	4,968	73/100
Malbork	1,336	1,811	74/100
Pomeranian	2,662	6,199	43/100

The table indicates that in the two first voivodeships there are 1.5 as many peasants as smallholders. In Pomeranian, however, there are twice as many. We have to bear in mind, though, that some of the smallholders were employed in the manor demesnes, particularly the royal ones.

Assuming that the number of smallholders should be, on average, multiplied by four to account for the number of people in their families, we arrive at the following numbers of the village population (excluding the territory of the towns of Chełmno, Elbląg, and Gdańsk):

Table 22. Village population of Royal Prussia

voivodeship	smallholder population	entire village population	share of the smallholders
Chełmno	14,552	64,450	22.6
Malbork	5,344	23,812	22.5
Pomeranian	10,648	77,247	13.8
total	30,544	165,509	18.5

In comparison to 12% of the share of smallholders in the central Crown lands,⁵⁷ the share at 13.8% – 44.6% in Prussia testifies to their vital importance. The numbers for the particular voivodeships become even more vivid when applied to the parishes' scale (depicting parishes and their administrative counterparts).

Table 23. Share of smallholders in parishes of Royal Prussia

voivodeship	parishes						
	no. smallholders.	0–10%	10–20%	20–30%	over 30%	unknown	total
Chełmno	2	10	42	42	21	4	121
%	1.6	8.3	34.7	34.7	17.4	3.3	100
Malbork	–	2	19	18	7	1	47
%	–	4.3	40.4	38.3	14.9	2.1	100
Pomeranian	18	78	56	28	6	2	188
%	9.6	41.5	29.8	14.9	3.1	1.1	100
total	20	90	117	88	34	7	356
%	5.6	25.3	32.9	24.7	9.5	2.0	100

The table above speaks of the predominant share of parishes with 10–30% of smallholders in Chełmno and Malbork Voivodeships. The highest share can be observed in parishes in Chełmno where the smallholders can account for as much as 45% of the entire village population (the minimum share there is 2.2%); in Malbork, the highest population share of smallholders is 43.2%, and the minimum –2.4%.

⁵⁷ J. Rutkowski, *Historia gospodarcza Polski*, vol. 1, Poznań 1947, p. 146.

In Pomeranian Voivodeship, however, there are 18 parishes with no smallholders whatsoever and parishes with their 0–20% share are predominant. The maximum numbers there are 76% and 1.2%. The numbers clearly indicate their less vital role in the rural economy of the voivodeship.

As far as the entire Royal Prussia is concerned, the parishes with 10–20% of smallholder families are most common and account for 32.9% of all the parishes.

Map number six depicts the spatial distribution of the smallholder population in Prussia. Their share is notable (over 20% of the village population) in the western part of the Chełmno Voivodeship, particularly in Chełmża, Grudziądz, and Radzyn area. In the east of the Voivodeship, in Michałowo district (excluding the Brodnica, Kurzętnik, and Nowe Miasto regions), their share is usually smaller (less than 20%).

In Malbork Voivodeship, the greatest clusters of smallholders can be observed in the central area stretching from the Leniwka (near Tezew) as far as the eastern border near Dzierzgoń and Lake Drużno. There is even a separate smallholder village by Mątowy Małe manor demesne (Mątowy Wielkie parish). The lowest concentration of smallholders is in the Tolkmicko region and in the north-western part of Żuławy, where it usually does not even reach 10% (in all but two parishes in Żuławy).

Pomeranian Voivodeship, however, presents a completely different picture. The highest concentration of smallholders can be observed in the riverside area stretching from Świecie up to Gdańsk, although only in five cases it exceeds 30% of all village population. Parishes with 20–30% of smallholders are among those with their lower or even the lowest share. The parishes with average share are scattered near Tuchola and Człuchów (with the smallholder village called Ledyczek in the parish of the same name being particularly notable), as well as Puck and Żarnowiec. The majority of the western part of the voivodeship is characterised by a relatively low share of smallholders (0–10%). Most of the area is densely forested and is characterised by the lowest soil classes, cultivated by Kashubian petty gentry.

It is worth noting that in the area of the largest towns, i.e., Elbląg and Gdańsk, the share of shareholder population is supposedly at a high level, at least 20–30%, which is supported by some partial sources for particular villages there, as well as by the guidelines from the sixteenth century for the peasants to settle one smallholder per every four lans of arable land⁵⁸ in Gdańsk Żuławy (Żuławy Steblewskie), a similar region to abutting Great and Lesser Żuławy in Malbork Voivodeship.⁵⁹

The map also illustrates the distribution of cotters (*komornicy, inquilini*) in the parishes. Cotters, similarly to smallholders, play an important role as wage labourers in the Prussian villages.

Little is known of the legal standing of this social group. It was common for the cotter to be single, often widowed. Similar to the smallholders, the cotter population was diverse. It is exemplified by the level of tax they paid – the lowest two grosz fee, or higher if they owned cattle, e.g., in 1570 – four grosz or more. The division is illustrated by the tables showing the number of the working people only, given below. Just like the previous tables, they were based on the tax registers from 1570–1571 in Chełmno and Pomeranian Voivodeships, and 1581–1582 ones in Malbork, with some minor corrections, introduced based on some supplementary sources in the case of Chełmno Voivodeship (the towns of Chełmno, Elbląg, and Gdańsk excluded).

Table 24. Classification of cotters in Chełmno Voivodeship (1570–1571)

Table 26. Classification of cotters in Pomeranian Voivodeship (1570–1571)

ownership affiliation	no. of cotters paying rent [grosz]						total
	2 gr	4 gr	6 gr	8 gr	12 gr	unspec.	
royal	7	10	–	1	55	–	73
noble	–	–	1	–	27	–	28
Church	2	9	–	–	28	–	39
town-royal	–	–	–	–	5	–	5
total	9	19	1	1	115	–	145

The total number of cotters in Royal Prussia was 1,026 (c.a. 1,100 including the estimated number of cotters in the three largest towns). The majority of them belong to the poorer class of cotters, which is particularly true for Malbork Voivodeship. In the two other voivodeships, the cotters with cattle (paying four grosz or more) dominate. Comparing the numbers of cotters with the smallholders, the numbers are seven times lower, which points to their role being less vital in the husbandry of Royal Prussia.

Assuming that the number of cotters should be, on average, multiplied by 3 to account for the number of people in their families, we arrive at the following numbers for the particular voivodeships:

Table 27. Cotter population in Royal Prussia

voivodeship	cotter population	village population	share of cotters in village population %
Chełmno	1,872	64,450	2.9
Malbork	771	23,812	3.2
Pomeranian	435	77,247	0.6
Total	3,078	165,509	1.9

Taking into account the possible underrepresentation of the cotter population in relation to the smallholder population due to a smaller multiplier, we still have to assert the dominance of the smallholders over the cotters.⁶⁰ The share of the cotters in the parishes is relatively low.

Looking at the table, we see that in Chełmno Voivodeship, in 1/3 of all of the parishes, there are no cotters whatsoever. In the remaining ones, the numbers are small or average, i.e., 0.1%–3% and 3–6% (53.7% of all). Only in 10 parishes (8.3% of all parishes), the share of cotters exceeds 6% (the maximum is 9.8%). In Malbork Voivodeship, the situation is similar, though the number of parishes with a slightly higher share of cotters – more than 3 and 6% – is bigger at 42.6% (the maximum share reaches up to 9.7%). The data for Pomeranian Voivodeship paint a completely different picture: in 3/4 parishes, the sources do not confirm any existence of cotters, while in the remaining ones the

⁶⁰ A different stance by A. Mączak (ibidem, p. 366) finds no confirmation in the source material.

share is 0.1%–3% (with maximum 6.2%). For the entire area of Royal Prussia, the parishes with no cotters constitute 53.9% and those with their lower share 24.4%.

Table 28. Share of cotter population in the parishes in Royal Prussia

voivodeship	parishes				unknown	total
	no. cotters	0,1–3%	3–6%	over 6%		
Chełmno	40	36	29	10	6	121
%	33.1	29.7	24.0	8.3	4.9	100
Malbork	11	15	14	6	1	47
%	23.4	31.9	29.8	12.8	2.1	100
Pomeranian	141	36	8	1	2	188
%	75.0	19.1	4.3	0.5	1.1	100
total	192	87	51	17	9	356
%	53.9	24.4	14.4	4.8	2.5	100

Consulting the map, we find that the cotters in Chełmno Voivodeship lived in the southwest of the Chełmno district (parishes with 3% and 6% of cotters), and in Michałowo district (less densely). In Malbork Voivodeship, the highest density of cotters can be observed in the stretch between Sztum and Dzierzgoń, lower and average density – in Żuławy, while in Tolkmicko there are no cotter population.

In Pomeranian Voivodeship, the cotters lived only in small numbers, mostly in the riverside areas in Puck and Kościerzyna regions, rarely in Tuchola district.

The problem of servants, smallholders and cotters, discussed above, does not exhaust the issue of the workforce in the farmsteads in Royal Prussia. Among those, we can also count fully free wage labourers, namely seasonal workers hired during the harvest. The group was indispensable, particularly in the peasant farmstead in Malbork Żuławy.⁶¹ Being mobile – they were called “luźni ludzie”⁶² (*loose/mobile persons*), they were coming to Prussia in the spring and leaving in the autumn. Most had been coming from the Crown, especially from Mazovia since the end of the fifteenth century. Some of them were also delinquents from the lesser Prussian towns (as it was established for the Chełmno Voivodeship).⁶³ All in all, those mobile persons in majority came from outside of Royal Prussia and supplemented the peasant workforce in the times of harvest and threshing, when necessary. This process is particularly worth emphasising and noting in order to fully understand the demography of Malbork Voivodeship, which, contrary to our expectations, did not show a greater density of local hired hands, i.e., smallholders and cotters. One explanation is that the seasonal workers were mostly hired in the peasant farmsteads in Żuławy, which is firmly supported by the studies pointing to Malbork Voivodeship being a primary destination of the influx of free hired hands from Mazovia.⁶⁴

Unfortunately, the numbers of the hired hands population elude us, as the sources are scanty on this free wage labourers’ group, only rarely mentioned in the tax registers by the officials, especially in the wintertime.⁶⁵ That is why, despite emphasising the role the hired hands played in the village workforce in Royal Prussia, also having in mind our estimations, we have to resort to the numbers acquired from the tax registers from the years 1570–1582.

The numbers are undoubtedly underrepresented, especially, as it was said above, in the case of Malbork Voivodeship, and may only indicate that a greater share of hired hands was employed in the royal and Church estates.

⁶¹ For more information on the matter cf. *ibidem*, pp. 363, 367.

Demography and social structure of village population (thematic map 7)

Map number seven aims to depict the demography of the village population in the districts of Royal Prussia. Although it is based on the tables and data presented above, it required some adjustments: the peasant population (comprising the peasant families of five people) was presented separately from the remaining servants and staff (*czeladź*) group working in both peasant and demesne farmsteads in all types of property. That way we arrived at the estimated numbers properly representing this important, and populous social group in its entirety. In the other columns, the two other categories of wage labourers are given, i.e., smallholders and cotters. The craftsmen and workers connected with the forest economy (beekeepers and fishermen) were given a separate column; noble families were also shown separately.⁶⁶ The last column covers the minor population groups with various occupations (e.g., peddlers) or with unspecified occupation (accounting for the estimated numbers for some districts, where the sources were incomplete). That way we arrive at a relatively comprehensive cross-section of the occupational groups among the village population. Unfortunately, we had to exclude from the tally the Chełmno, Elbląg, and Gdańsk districts due to lack of data.

The table with the village population social structure in the voivodeships and districts as well as the entire Royal Prussia can be found below.

The data in table 30 clearly speak of two key phenomena: 1) large share of peasants' population,⁶⁷ numerous irrespective of the voivodeship, comprising between 38% and 40.1% of their population, and 39.2% for the entire Prussia, which is nearly 2/5 of the entire population, 2) the importance of the wage labourers (servants, smallholders, cotters), who constitute 43.4% of all of the population of Royal Prussia, again, c.a. 2/5. Altogether, the categories of the wage labourers exceed even the number of peasants with land, the phenomenon unparalleled in the other regions of the Crown. Peasants and landless peasants together comprise 82.6% of all the village population. Among the remaining categories, a prominent group constituting 8.2%, are the craftsmen. The percentage of the craftsmen connected with the forest economy is marginal, although it bears mentioning that it was rather treated as an additional source of income, moonlighting of a sort, rendering it difficult to measure statistically. The percentage of nobility (5.2%) points to the small share of this privileged feudal class in comparison to the entirety of the village population, as well as compared to the situation in other Crown lands. It

⁶⁶ The nobility was not divided into the demesne and farm gentry, as the issue will be addressed in greater detail below in the chapter on the *Holdings and social structure of the nobility class*.

⁶⁷ We also provide the tables of the peasant population in each voivodeship, along with the numbers of the peasant servants (the territories of Chełmno, Elbląg, and Gdańsk excluded).

is a result of the size of peasant fields, their share in the entirety of the land and the relatively small numbers of petty gentry in the area.

Analysing map number seven in the district scale, we can conclude that in the area of Chełmno and Malbork Voivodeships likewise, the most prominent social classes are peasants, servants, and smallholders. Craftsmen also appear to be well represented, especially in Chełmno district.

In Pomeranian Voivodeship in turn, in the case of some districts (Mirachowo, Tuchola) we can observe a lower share of peasants along with a higher share of servants and gentry. Those regions are inhabited by farm gentry families. In most of the districts in the voivodeship, there are fewer smallholders and cotters, with the exception of the Vistula riverside areas (Świecie, Nowe, Tczew, and Gdańsk district). The share of craftsmen is the highest in Gdańsk, Nowe, Świecie and Tczew districts, while in Człuchów and Tuchola district the share of the population working in forest-connected jobs, like beekeeping, is relatively higher.

Holdings and social structure of the nobility (thematic map 8)

Map number eight illustrates the heterogeneity of Prussian nobility. It was based on the data acquired from the noble families' files containing figures on the size of their arable land. It, in turn, laid at the foundation of the division of the nobility class into demesne nobility with peasants (paying 20 grosz per lan in 1570–1571 and 30 grosz in 1581–1582) and without peasants, i.e., farm gentry paying 12 grosz (or 15 grosz in 1581–1582) per lan. The calculated numbers are as follows:

Table 31. Nobility with peasants in Royal Prussia

voivodeship	owners paying 20 grosz per lan								total
	0.5–3	3–6	6–10	10–15	15–20	20–30	30–60	over 60

Malbork	–	2	5	2	2	2	13
Pomeranian	305	154	70	16	3	2	550
Total	407	223	103	33	7	4	777

The acreage belonging to the noble families who did not own peasants, seemingly belonging to the “farm” gentry is stunning. As it was described above, a need arose to differentiate among the noble families without peasants the group of actual “farm gentry”, and then counting the remaining ones among the demesne gentry, who did not own any peasants as well. Consequently, the category of farm gentry only included the families owning 0.5–3 lans of land.

Having done that, in the following tables the gentry is divided into:

- 1) Demesne gentry owning peasants;
- 2) Demesne gentry without peasants;
- 3) Farm gentry with 0.5–3 lans of arable land.

The first group, i.e., the demesne gentry, is further divided into “middle-class” gentry with up to 10 peasant lans (including the demesne land, altogether about 15 lans) and those owning more than 10 lans of peasant arable land. That way we managed to distinguish great landholders among the nobility, who, with some reservations in mind, can be called “Prussian Latyfundium owners”. The criterion of at least 10 lans of land cultivated by the peasants, relatively adequately – as far as the acquired sources may attest – reflects the ownership structure of the middle and upper class of Prussian nobility.

We should also clarify that the elaboration of the table above encountered significant problems with lack of sources, pertaining to the noble ownership structure in each of the Voivodeships respectively. For Malbork Voivodeship, the data covered only 70% of noble settlements, for Chełmno – 80%, and Pomeranian, even though covered the most, there were sources only for 90%. On average, the sources lacked between 15% and 20% of data. That was the reason why we deem the numbers presented in the classifications in this chapter (tables 31, 32 and further), concerning the people in noble families and acreage they owned, under representative. It was decided that the figures will refer to the actual numbers acquired from the sources, not the total, estimated values. It also explains why the figures concerning the village population and social structure are lower than those previously discussed.

Among the entirety of the nobility of the Royal Prussia, the middle class of gentry seems particularly prominent (category II and III), i.e., those owning up to 10 lans of arable land (the average: 4.3, including the estimated demesne land – 6.5 lans on average) or up to demesne lans with hired labour (on average 6.8 l.). The gentry with 10 peasant lans or more is represented by a substantial group of 166 landowners (29.2 lans on average per one owner; including the estimated demesne lans – c.a. 42 lans). The farm gentry is substantial in numbers (407 owners, with on average 2.1 lans) and comprises about one-third of all the noble owners, despite holding only a minor portion of the entire arable land. It is a direct result of a great proportion of peasant lans being in the hands of demesne nobility and

⁷¹ In the calculations, the estimated 61 (7%) noblemen were added.

the farm nobility owning a high number of demesne arable lands. We may suppose that the population and holdings of the latter are the highest compared to the other Crown lands, which leaves its mark on the entire social structure of Prussian nobility.

The groups discussed above vary in terms of their location and distribution. The group number I, i.e., those with more than 10 lans, is present in each of the voivodeships, however, it is most numerous in Malbork, where, in turn, farm gentry was non-existent. In the remaining two voivodeships the wealthiest group is less populous (relatively to the overall noble population), because the middle class of gentry dominated there, with a reservation, that the proportion of the gentry with peasants in their domains was higher in Chełmno Voivodeship. However, in Pomeranian Voivodeship, the demesne gentry without peasants is clearly predominant. Similarly, in this voivodeship, there is a significant population of petty farm gentry, much greater than in Chełmno Voivodeship.

The situation described above becomes even more vivid and palpable when we discuss it at the level of districts, which lay at the foundation for the elaboration of the thematic map. The bar graphs given on the map depict the number of lans belonging to the four categories of nobility as well as their arable land given in peasant, demesne and smallholders' lans, differentiated with hachures and colours.

In Chełmno Voivodeship, the proportion of the middle gentry, both with and without peasants are stunning, with the latter being of particular importance. The share of wealthier gentry without peasants is also very high here. Despite a relatively low population, it accumulated the majority of peasant arable land. The farm gentry was also fairly numerous, though their holdings were meagre in comparison. In the eastern part of the voivodeship (Michałowó district), the situation is slightly different and the demesne and farm gentry without peasants were predominant. The gentry with peasants is represented there by the less wealthy, middle-class nobility. The wealthiest nobility class is also notable there.

Among the wealthier nobility with peasants in the entire area of Chełmno Voivodeship, the group with 10–30 lans dominates. The seven owners in the western part of the voivodeship come to the fore. Firstly, we should mention: Jerzy Rokusz (with 121.5 peasant lans), and Archacy Konopacki (76.5 peasant lans), then Mateusz Orłowski (67) Tomasz Sokołowski (63), Jan Elżanowski (62), as well as Feliks Męldzyński (52.5). Their estates were mostly located west and north of Chełmża (particularly Rokusz's, Konopacki's and Orłowski's) and Radzyń. In Michałowó district, the estates worth noting are those of Rafał Działyński, the starost of Brodnica (71.5 peasant lans) and Fabian Bystram, the judge of the land court of Michałowó (63 peasant lans). The largest estate of those landholders comprised five entire villages (with 20 lans on average and 43.5 the largest) as it was the case of Rokusz, Sokołowski, and Bystram, while the average estate was 2–3 village and 2–4 shares (usually co-owned with other members of their families).⁷²

It is worth stating that some of the landholders had some estates outside Royal Prussia. It pertains to the Działyński family, who owned several estates in Dobrzyń land and Płock Voivodeship.⁷³ As far as Chełmno Voivodeship is concerned, it is also worth emphasising that, in general, the prevalent type of ownership is partial ownership – usually two owners in one village – and ownership of one village alone. As far as farm gentry is concerned, they most frequently lived in the eastern part of the Michałowó district. There are maximum 10 farm gentry families in one village, though settlements with less dominate.

In Malbork Voivodeship, the group of greater noble families who owned peasants comes to the fore, while the middle-class gentry with peasants is underrepresented and those without peasants, slightly more populous. The number of families who owned land cultivated by peasants is greatest here of all the three voivodeships; those with 10–30 peasant lans is the most populous group, but we can distinguish four major landholders with 50–150 peasant lans.

Firstly, the Cem family, playing a vital role on the political stage not only in the voivodeship but the entire Royal Prussia,⁷⁴ who owned about 153.5 peasant lans. Secondly, Wacław Schack von

⁷² Taking into account the entirety of the land held by the particular families, apart from Rokusz and Konopacki, the numbers are significantly higher: Orłowski family – 97 peasant lans, Sokołowski – 78., Elżanowski – 95, and Męldzyński – 60.5.

⁷³ Cf. WP, p. 71.

⁷⁴ We give the total holdings of the families due to the imprecise account of the tax registers when it comes to particular noble owners in Malbork Voivodeship. Some of the lands were only vaguely established to belong to the Cem family, based on F.W.F. Schmitta, *Geschichte des Stuhmer Kreises*, Toruń 1868, pp. 234 f.

Wittenau, the chancellor of Royal Prussia, owning 96 lans of land cultivated by peasants (with vast estates in the entire Royal Prussia) and Jerzy Sokołowski with a similar number of peasant lans.⁷⁵ Finally, Jerzy and Ludwik Bażyński (the descendants of the governor of Prussia – Jan Bażyński). They owned two villages near Tolkmicko with 57 peasant lans. The greatest estate belonging to the Cem family includes at least eight villages (plus four separate demesne settlements), while the remaining landholders owned 3 to six peasant villages (plus 1–3 separate manor demesne settlements). Taking into consideration that the Malbork nobility was not particularly wealthy, we can observe that the majority of the wealth was concentrated in the hand of a small number of landholders (27 out of 74 settlements, i.e., 1/3 belongs to only four families).

In Pomeranian Voivodeship, however, the social strata of nobility vary depending on the district. The most striking phenomenon observed is the substantial share of farm gentry (here known as Kashubian gentry) which is particularly visible in the western districts: Człuchów, Mirachowo, and Puck, and partially in Tuchola and Tczew. The density of Kashubian gentry is the highest, though the population in one village amounts to 18 in Człuchów district. Those districts, similarly to Gdańsk district, are also characterised by a high percentage of demesne gentry, who did not own peasants (Mirachowo, Puck, and Tuchola districts in particular), with a small share of the gentry with peasants, both the middle-class one and the greater noble families (mostly Mirachowo and Tuchola districts). In the Vistula riverside districts: Świecie, Nowe, and Tczew, as well as in Człuchów districts, there is a majority of, or at least a significant population of, gentry with peasants, with a notable share of middle-class gentry (owning up to 10 peasant lans). The greater noble families mostly reside in Człuchów, Nowe, Świecie, and Tczew districts, much less frequently in Gdańsk and Puck districts. In comparison to the other two voivodeships, in Pomeranian Voivodeship there is the highest share of farm gentry with particular importance of middle-class gentry without peasants.

Among the gentry with peasants, the majority of landholders own 10–30 lans, however, 38 out of 74 families owned between 10 and 15 lans. The group of the 14 major landholders most frequently reside in the southern districts, i.e., Człuchów and Świecie. The four greatest landholders in Człuchów district are: Barbara Wierzbicka (with 99 peasant lans), Adam Żaliński, the judge of the land court of Tuchola, who also owns the estates in the western part of Tuchola district (77 peasant lans), Jerzy Lewald (70), and Michał Konarski, the judge of the land court of Człuchów (69). In Świecie, the greatest landholders are Michał Żelisławski (93 peasant lans), Wacław Lubodziński, the judge of the land court of Świecie (71), Michał Wulkowski (62), and Jan Niemojewski (60).⁷⁶ In the abutting Nowe district, we can mention Jan Oleski, holding 100 peasant lans. In the vast Tczew district, there are only two landholders with more than 50 peasant lans: Feliks Wojanowski-Dąbrowski (76)⁷⁷ and Mikołaj Swaroczyński (56), while in the small Gdańsk district, there are also two major landholders: Joanna Werden (67 peasant lans) and Wilhelm Jackowski (54).⁷⁸ In Mirachowo and Puck districts, the landholders rarely own more than 30 peasant lans with the sole exception of Andrzej Czarliński (51), who also owns land in Gdańsk district. The wealthiest representative of the nobility in Puck district – Rinhold Krokowski – did not own more than 30 peasant lans. Usually, the „latifundium owners” held three to four (maximum five) villages with about 40 peasant lans and two to 3 shares (maximum 6) in other villages, reaching up to 44 lans.

Distribution of craftsmen population (thematic map 9)

The two remaining maps address the issue of population and distribution of the craftsmen in the villages and major industrial settlements and facilities.

⁷⁵ He came to Malbork Voivodeship as late as 1578; E. Wernicke, *Tiefenau*, „Zeitschrift des Historischen Vereins für den Regierungsbezirk Marienwerder”, vol. 65 (Beilage), 1927, p. 15.

⁷⁶ The estates belonging to the whole families were significantly larger. In the case of the Żaliński and Konarski family it was at 125 peasant lans, Lewald – 87. It is worth stressing that the renowned Kostek family owned 80 peasant lans altogether, though each separate landholder did not exceed 50 lans of peasant land each (Anna Kostkova – 47.5, Jan Kostka – 32.5).

⁷⁷ The estates of the entire Wojanowski-Dąbrowski family were nearly twice as large and amounts to 131.5 peasant lans.

⁷⁸ For the entire Jackowski family, the number of peasant lans is 131.

The numbers and type of occupation of the craftsmen population were elaborated on the basis of the entirety of the acquired sources. They lack, however, the distinction of particular types of craftsmen (with the exception of innkeepers, millers and foundry workers (*Rudnik*)). The primary sources, i.e., the tax registers, give only the overall number of the craftsmen in the village, with the sole exception of the tax registers in Chełmno Voivodeship, where the occupation is mostly mentioned. Therefore, the acquired sources allowed to: 1) establish the overall number of craftsmen in the villages within particular parishes (apart from the territory of the towns of Chełmno, Elbląg, and Gdańsk), 2) establish the number of craftsmen facilities (industrial facilities), both rural and municipal. We also have to stress that the issue of number and type of occupation of municipal craftsmen could not be addressed due to the substantial lack of sources on the towns in Chełmno and Malbork Voivodeship and lack of source material on the largest Prussian towns. It was only elaborated in the case of the towns in Pomerania, which is presented in the tables given in the following chapter.

We should clarify here that among the categories of village craftsmen, there are only people with a particular craft as their main job. However, from H. Samsonowicz's research, we gather that at that time in the Crown lands craft was often an additional venture for peasants and smallholders.⁷⁹ The Prussian source documents also confirm it, particularly in the case of smallholders.⁸⁰ Assuming that the craft was not the primary occupation for the said peasants, they were not counted among craftsmen proper. Consequently, the numbers acquired from the sources certainly do not show the actual maximum number of people involved in, or dabbling in, crafts; they only present the category of peasants whom it was the main source of income.

We should also shed some additional light on the status of innkeepers in Prussia. Following the train of thought described above, they were subsumed under craftsmen, as they not only sold but often brewed the beer, that is were involved in production (sometimes also in the distillation of spirits). However, as far as Prussian innkeepers are concerned, they did not always do the brewing part. In the Teutonic Order times, they obtained additional permission to make the beer, even though usually it was supplied by the local brewmasters from the small towns nearby – the major local beer makers.⁸¹ The situation had changed in the sixteenth century, mostly owing to the practice among the starosts or Church administration who partially broke the small-town monopoly by brewing beer themselves.⁸² So did the innkeepers, particularly in the areas distant from the towns,⁸³ or even the peasants (especially the sołtyses).⁸⁴

For the reasons given above, the innkeepers were all counted among the craftsmen, despite having in mind their predicament. Either way, the actual brewing innkeepers were impossible to distinguish among those selling beer.

It bears mentioning that the presented numbers do not distinguish between the demesne and village (*gmiński*)⁸⁵ craftsmen, as the sources did not provide any ground to do so. We can only observe that the share of the demesne (castle) ones, mostly in the royal and Church land, was minor and the great majority of craftsmen operated in the villages and communes (*gminy* or *gromady*).

⁷⁹ H. Samsonowicz, *Rzemiosło miejskie w Polsce XIV–XV w.*, Warsaw 1954, pp. 8, 103.

⁸⁰ Cf. ASK I 120, p. 7 – Jasna (Lichtfelde), Malbork Voivodeship: „ab 13 hortulanis haereditariis qui proprios habent hortos, quorum six sunt artifices”. The source further quotes 2 craftsmen who paid the same fee as the smallholders; P. Prusy Królewskie, p. 28: Tuszewo (Tryszewo) „2 smallholders without occupation – 12 grosz, and two grosz for their craft”; also cf. the stance on the matter by W. Jakóbczyk, *Uwarstwienie ludności wiejskiej*, p. 176.

⁸¹ H. Steffen, *Das ländliche Krugwesen im Deutschordensstaate*, „Zeitschrift des Westpreußischen Geschichtsvereins”, vol. 56, 1916, p. 226.

⁸² Cf. F. Mager, *Geschichte der Landeskultur Westpreussens und des Netzebezirks bis zum Ausgang der polnischen Zeit*, Berlin 1936, pp. 147–148. Two breweries (Komorsk, Subkowy) of Włocławek bishopric (Inw. 1582, pp. 282, 321) supply the beer to the inns nearby in the bishops' lands. Cf. also H. Samsonowicz, *Rzemiosło miejskie*, p. 155 – an example of the monastery brewery in Kartuzy. There is no shortage of evidence that the town beer was delivered eg. to the Włocławek bishopric's inn in Wysin, Tczew district, from Skarszewy (Inw. 1582, p. 296) or to Chwaszczyno, Gdańsk district, from Gdańsk (ibidem, p. 298).

⁸³ P. Prusy Królewskie, p. 18 „także i arbire w niektórych wsiach u piwowarów zatrzymano” (Chełmno Voivodeship); pp. 295–296: the innkeepers brewing the beer in Radomno and Wapiersk in Bratian and Brodnica starosty, p. 14 – in Radowiska, Golub starosty; similarly, in the villages in Osieck starostwo (Pomeranian Voivodeship) “czopowe de ptisana” (*liquor excise tax*).

⁸⁴ P. Prusy Królewskie, pp. 13, 15 – brewing beer in Kurkocin, Łobdowo, and Pluskowęsy, in Chełmno district; cf. I. Baranowski, *Przemysł polski w XVI w.*, Warsaw 1919, p. 143 – similar examples in Mazovia.

⁸⁵ Cf. H. Samsonowicz, *Rzemiosło miejskie*, pp. 106 f.

Having discussed the reservations concerning the lack of source data and the specificity of the social situation in Royal Prussia, we present the data at the foundation of the elaboration of map number 9.

Firstly, the total numbers of the craftsmen population in the villages for Royal Prussia and their share in the voivodeships (the greatest towns excluded) are as follows:

Table 38. The craftsmen population in the villages in Royal Prussia

voivodeship	village population	village craftsmen population	share of the craftsmen
Chełmno	64,450	4,687	7.3%
Malbork	23,812	1,954	8.2%
Pomeranian	77,247	6,936	9.0%
total	165,509	13,577	8.2%

The highest percentage can be observed in Pomeranian Voivodeship, then Malbork, although the towns of Elbląg and Gdańsk population is not included.

To better present the density of the craftsmen in the parishes, we assumed the following categories:

- 1) parishes where craftsmen comprise 0%
- 2) parishes where craftsmen comprise 0.1–3%
- 3) parishes where craftsmen comprise 3–6%
- 4) parishes where craftsmen comprise 6–10%
- 5) parishes where craftsmen comprise over 10%

The first and second category consists of the parishes with the lowest craftsmen population density, 3 – with average, four and five with the highest.

Table 39. The craftsmen population in Royal Prussia (in parishes)

voivodeship	share of craftsmen						total (parishes or their counterparts)
	0%	0,1–3%	3–6%	6–10%	over 10%	unknown	
Chełmno	–	13	37	45	21	5	121
%	–	10.7	30.6	37.2	17.4	4.1	100
Malbork	–	5	8	22	11	1	47
%	–	0.6	17.0	6.8	23.4	2.2	100
Pomeranian	13	7	33	67	65	3	188
%	6.9	3.7	17.6	35.6	34.6	1.6	100
total	13	25	78	134	97	9	356
%	3.7	7.0	21.9	37.6	27.3	2.5	100

In the entire Royal Prussia and in all of the voivodeships, the parishes with an average or high share of craftsmen (3–6% and 6–10%) are dominant. The parishes with 0% appear only in Pomeranian Voivodeship, which also has a relatively high number of parishes with the highest two shares.

In Chełmno Voivodeship, the greatest cluster of craftsmen can be found in the western part of Chełmno district and the territory of Chełmno bishopric in Lubawa land. There are also significant clusters near Gołub and the Drwęca, as well as near the north border of the voivodeship by the Ossa River. The reason for that is a great number of mills by the tributaries of the Drwęca and the Ossa. The maximum accumulation of craftsmen reaches as much as 28.4% of the entire village population (Ciechocin parish). The smallest share can be found near the towns of Kowalewo, Toruń, Łasin, Brodnica, Kurzętnik, and Lidzbark Welski. It confirms our premise that the presence of the town nearby reduces the number of village craftsmen. The high share in the parishes near Lubawa and Grudziądz seemingly contradict that theory, but we should not forget that such a situation is a result of the presence of numerous mills near the royal castles and bishops' castles.

In Malbork Voivodeship, the highest craftsmen population density can be found in the Żuławy area (with the sole exception of Nowy Staw) and Sztum region. Indubitably, that is because of a great share

of innkeepers among the local craftsmen – as many as three in some villages. The highest share can be observed in Malbork parish (21.4%), where a few castle mills and 13 inns were located in Podzamcze.

In Pomeranian Voivodeship, the areas with the most numerous craftsmen population are located in the south, in Człuchów and Tuchola districts, and in the Vistula riverside part of Świecie, Nowe, Tczew, and even Gdańsk districts. There is a substantial share in Mirachowo district and the western part of Puck district. The maximum percentage reaches as much as 41% (Pelplin parish) or 40.2% (Chylonia parish). That is also the result of, as we will discuss later, a very high number of millers and innkeepers working there. The presence of more numerous foundry workers also deserves our attention. And finally, we can find many innkeepers and other craftsmen in the parishes near the castle (Gniew in particular) and the monastery (Pelplin, Żukowo).

The craftsmen population per the area of a district is additionally presented in the diagram next to map number nine and corroborates the findings of the analysis at the parish level, proving that the districts in Chełmno and Malbork Voivodeship were the home of the greatest clusters of craftsmen. In Pomeranian Voivodeship, we can find the highest density can be found in Tczew, Świecie, and Tuchola districts.

Those very general numbers can only partially be explained by supplying them with some more detail. For the sake of clarity, we will only refer to the working population. The craftsmen population can be divided as follows:

Table 40. Detailed division of the craftsmen population in Royal Prussia

voivodeship	I		II	III		IV	V						VI			
	innkeepers	brewers	millers	charcoal burners	pitch burners	smiths	coach-builders	wheelwrights	coopers	carpenters (roofs); joiner	sawyers	carpenters (furniture)	roofers	shoemakers	leatherworkers	furriers

| VI. Leatherwork | XII. Unspecified |

⁸⁶ The number includes the brewers and the malters (*stodownik*), as they are given together. The name malter is sometimes used to refer to the brewer; cf. *ibidem*, p. 153.

The results above, despite their incompleteness, point to some general trends among the craftsmen. The primary role is played by the innkeepers, or more generally, brewers, with millers closely following in their footsteps. It means those are the two major crafts. Then, we can list the jobs connected with steelwork (smiths) and apparel products (mostly tailors, but also weavers), woodwork (carpenters, wheelwrights), and leatherwork (shoemakers). The remaining categories seem to be relatively rare, especially those connected with food production, working with clay and forestry (charcoal and pitch burners).

The great diversity of the craftsmen in Royal Prussia speaks of the development of the region. It is also attested by the tax registers, where the particular craftsmen are listed among those paying various fees starting from two to 4, 6, 8 or 12 grosz.⁸⁷ Similarly, the existence of the apprentices (journeymen, *czeladnik, socii opificum*)⁸⁸ shows how developed village craft was, as it attempted to adapt the structure of the town craft, and possibly reflects its proficiency and high quality.⁸⁹

The existence of guilds in villages is attested by the sources listing them in, e.g., Drzycim village in Pomeranian Voivodeship (Świecie district) and Czarze village in Chełmno Voivodeship (Chełmno district) but only as late as the eighteenth century, which, however, was a completely different economic period.⁹⁰

We should also note some clusters of craftsmen in some particular settlements distant from the larger towns, especially in Pomeranian Voivodeship, e.g., Skórcz, which belongs to the Osieck starost in Nowe district, where we can find 12 craftsmen with two apprentices.⁹¹ We can stipulate that it puts this settlement in the position of a local centre. Additionally, when it comes to the number of craftsmen, we can also list some villages and Church land, particularly those of the Gniezno bishopric in Świecie district. The numbers in Gruczno village are: 22 craftsmen with three apprentices, while in Kozielec – 19 (three apprentices),⁹² in the lands belonging to Oliwa monastery, i.e., in Strzyża – 17 craftsmen with 15 apprentices, and in Przymorze 10 and 8.⁹³ It is a result of the location of a few forges in the two mentioned locations, which will be further discussed later on. All in all, such a high density of craftsmen population can be observed in Pomeranian Voivodeship in the villages by the Vistula River, although not all the said villages are distant from the towns (as it was in the case of Gruczno). In the two remaining voivodeships, the maximum numbers of craftsmen in the particular settlements are considerably lower and do not exceed 10; there are no mentions of village apprentices there, which would point to the conclusion that the craft there was less developed than in the mentioned Pomeranian Voivodeship, where it substituted the lacking local towns' functions.

On the side note, this lacking settlement network in Pomeranian Voivodeship also contributed to the emergence of the class of travelling vendors and peddlers with their own stalls called "hakbudy" (word supposedly of German/Dutch origin). They sold alimentary goods (*Qui cibarias vendit*) or miscellaneous goods (*tectum variarum mercium*). Some of them, 18 in total, appeared in larger royal and Church villages, sometimes even in those which had fairly developed craft, like Skórcz and Gruczno, but mostly in the riverside area in Tczew (10) and Gdańsk district (4).⁹⁴

Drawing on the acquired source material, we can present some additional data painting a more detailed picture of the two major crafts: innkeeping and millery.

As implied above, the status of innkeepers in Royal Prussia was somewhat peculiar. In most cases, apart from only selling the beer and other alimentary goods, they also did the brewing. Sometimes they

⁸⁷ Ibidem, p. 102, Samsonowicz erroneously connects the phenomenon only to the Pomeranian Voivodeship.

⁸⁸ Cf. P. Prusy Królewskie, p. 178.

⁸⁹ Cf. H. Samsonowicz, *Rzemiosło miejskie*, p. 100, who analyses the issue of the apprentices themselves in some settlements in Pomeranian Voivodeship (Laskowice, Przysiersk); P. Prusy Królewskie, pp. 180, 189. In tax registers, the smiths were listed separately, which troubled H. Samsonowicz, *Rzemiosło miejskie*, p. 101. It is completely understandable, as the smiths often owned a plot of land (garden) and, consequently, paid higher taxes (e.g., eight grosz) in comparison to the other craftsmen, who paid, for example, two grosz, cf. Subkowy – four craftsmen paying two grosz, while the smith – 8; P. Prusy Królewskie, p. 111.

⁹⁰ A. Mańkowski, *Cechy rzemieślnicze na wsi Czarzu w XVIII w.*, „Zapiski Towarzystwa Naukowego w Toruniu”, vol. 10, 1935, pp. 297 f.

⁹¹ P. Prusy Królewskie, p. 178.

⁹² Ibidem, XXIII, pp. 193, 195.

⁹³ Ibidem, XXIII, pp. 255–256.

⁹⁴ In Tczew district: Dalwin, Lignowy, Rakowiec, Rudno, Walichnowy – royal property; Miłobądz, Radostwo, Skowarcz, Subkowy – Church property; in Gdańsk district: Hopperbruch – Church property, Kolibki – noble property; Tuchola district: only Wieszczyce, noble property.

owned some land (up to two lans), though it occurred much less frequently.⁹⁵ Some of the innkeepers also engaged in other crafts on the side, e.g., smithery.⁹⁶ Their legal status in Royal Prussia is particularly puzzling, namely the question of the inns' possession: were they inherited, under hereditary tenure (i.e., if the innkeeper held particular privileges and paid rent), or leased with a yearly renewal (the so-called "*roczne*").⁹⁷ The last option was, obviously, the most profitable for the feudal lords. To capture the phenomenon in numbers would mean shedding some light on the relationship between the landowners and the innkeepers, and the degree of the latter's freedom. It is, then, necessary to present the data according to the type of ownership affiliation, as shown below. The inns located in Chełmno, Elbląg and Gdańsk were given separately, due to lack of data on their legal status.

Table 41. Legal status of the inns in Royal Prussia

total	433		430		222		1,085	
no. of inns established for the towns of Chełmno, Elbląg, and Gdańsk								105
total								1,190

Despite some lacks, particularly in the case of Malbork Voivodeship, the table may offer some clear conclusions: in Chełmno Voivodeship, maybe Malbork Voivodeship even, there are a majority of the inns with yearly renewed lease, while in Pomeranian – the inherited ones. However, the latter dominate in Pomeranian Voivodeship only in the royal and Church land, while in the noble property the “yearly” inns are predominant. A relatively high number of inherited inns can be observed in the royal and Church property in Chełmno Voivodeship, and, to a slight degree, in noble lands. We presume that the numbers give rise to some conclusions on the noble policy towards the innkeepers in Prussia: they aimed at maximising rent by leasing the inns for one year only, contrary to the royal and Church administration's less advanced and strict stance on that matter.

Last but not least, the issue requiring our attention is the distillation of spirits by the innkeepers in the entire Royal Prussia. The sources are scanty and unclear on the issue because of the actual weak condition of the industry in the rural areas or even complete lack thereof, contrary to the situation in

⁹⁵ Cf. The calculations of the innkeepers with and without land in the royal estates in the sixteenth century; W. Jakóbczyk, *Uwarstwienie ludności wiejskiej*, p. 47.

⁹⁶ P. Prusy Królewskie, p. 8 (Dąbrówka Król., Chełmno Voi.), p. 82 (Czerwony Dwór, Malbork Voi.). In one case, the innkeeper was also a ferryman; ASK XLVI 28, p. 438 (Gorzędziej, Pomeranian Voi.).

⁹⁷ J. Rutkowski, *Badania nad podziałem dochodów w Polsce w czasach nowożytnych*, vol. 1, Cracow 1938, p. 202.

the towns.⁹⁸ In the light of the gathered materials, it seems reasonable to claim that alcohol distilling is not an important part of the innkeepers' tasks; indeed, we do have accounts mentioning that some of them did distil alcohol, though only sporadically.⁹⁹ In the tax registers, there are mentions of „6 grosz for distilling hooch” [type of spirits – translator's note, “*gorzałka*”] or “for burning hooch – 12 grosz”, which did not specify whether it pertained to the innkeepers. We could not arbitrarily ascribe the practice to them, as we know from the sources that distilling was also taken up by some female-innkeepers or female spirits vendors (“*niewiasty szynkarki wódki*”) as well as, supposedly, the smallholders, cotter women, and other craftsmen.¹⁰⁰

For the reasons discussed above, it would be unwise to distinguish the inns selling beer and those selling spirits, as we have no grounds to claim that the distilling did actually occur in the inn, as long as the source does not state that explicitly. Even risking overgeneralization, we can say that in Chełmno Voivodeship, for example, only 45 out of 352 inns, which is only 18%, can be subsumed under “spirit-selling inns”. It was the case in the villages which in the tax register were listed under the fee of six grosz for alcohol distillation, without specifying particular innkeepers. That is why we should rather focus on the frequency of the occurrence of the tax on alcohol distillation, a number of the separate spirit vendors, than on the number of villages where the distillation stills were located (“*kotły gorzalczane*”). For particular voivodeships, the numbers are as follows (the numbers of all inns for the entire voivodeship without Chełmno, Elbląg, and Gdańsk are given in the brackets).

Table 42. Alcohol distillation in Royal Prussia

voivodeship	no. of villages where selling spirits occurred	no. of innkeepers mentioned to be involved in distillation (“ <i>szynkarki</i> ”)	no. of villages where distillation was mentioned	no. of distillation stills
Chełmno	45 (352)	8	14	15
Malbork	– (157)	–	5	6
Pomeranian	30 (576)	29 ¹⁰¹	16	19
total	75 (1,085)	37	35	40

The numbers seem to clearly illustrate the small scale of the distillation undertaking in the Prussian villages. It is relatively the highest in Chełmno Voivodeship, then in Pomeranian, and finally the lowest in Malbork Voivodeship. Distilling was not within the scope of interest and activities of the court¹⁰² or the nobility. It is corroborated by the number of the innkeepers and distillation stills in the noble property (e.g., in Pomeranian Voivodeship – four and 2). In each of the voivodeships, the alcohol distillation is most widespread in the royal and Church property, which testifies to its additional and “moonlighting” character for the village population.

The second important craft we would like to discuss – millery – occupied a very important place in Royal Prussia, which was already noted by J. Rutkowski.¹⁰³ The vast majority of the Prussian mills were located by the powerful Pomeranian rivers. Analogically to the other Crown lands, the mills played multiple roles.¹⁰⁴ Apart from the stones grinding the flour, they were also fitted with ones grinding the malt,¹⁰⁵ and with crank stocks (in fulling mills) for the textiles and leather.¹⁰⁶ Most frequently, they are also paired with the sawmills, often operated by the millers themselves. The number of wheels in

⁹⁸ Ibidem, p. 147; H. Samsonowicz, *Rzemiosło miejskie*, p. 159.

⁹⁹ E.g. Mełno and Okonin, Chełmno district; P. Prusy Królewskie, pp. 27, 36.

¹⁰⁰ Cf. ibidem, p. 8 – the shoemaker sells alcohol (Rogoźno), p. 42 – cotter woman – alcohol vendor (*szynkarka*; Kamionki), pp. 53, 60 and 64 – selling spirits (no innkeepers) (Chelmonie, Sumowo, Tylice).

¹⁰¹ In some cases, in one village there are two spirits vendors. They are mentioned in 26 villages.

¹⁰² Cf. J. Rutkowski, *Badania nad podziałem dochodów*, vol. 1, p. 204 – concerning the royal estates in the sixteenth century.

¹⁰³ Ibidem, p. 274.

¹⁰⁴ H. Samsonowicz, *Rzemiosło miejskie*, pp. 47–49.

¹⁰⁵ E.g. Dębica, Człuchów district, Przechowo, Świecie district; ASK XLVI 28, pp. 187 and 580.

¹⁰⁶ E.g., Grzmiąca, Brodnica district; H. Plehn, *Ortsgeschichte des Kreises Strasburg in Westpreussen*, Królewiec 1900, p. 38; Gniew, Tczew district, and Przechowo, Świecie district; ASK XLVI 28, pp. 466 and 580.

one mill was usually at 1–2, though it reached up to five or even 7.¹⁰⁷ Without getting into detail, we would like to briefly analyse the legal status of the millers in the sixteenth century Prussia. Similarly, in the innkeepers' case, we would also like to capture the numbers representing the relations between the mills that were inherited (much more profitable for the peasants) and those the lease of which had to be renewed yearly (or periodically),¹⁰⁸ rendering them more profitable for the feudal owner.

Table 43. The legal status of the mills in Royal Prussia

ownership affiliation [voivodship]	water/windmills						total	
	yearly renewed rent		inherited		unspecified			
royal:								
Chełmno	22		23		2		47	
Malbork	6		9		7		22	
Pomeranian	14	42	63	95	15	24	92	161
noble:								
Chełmno	20		23		8		51	
Malbork	4		4		1		9	
Pomeranian	28	52	38	65	5	14	71	131
Church:								
Chełmno	4		23		14		41	
Malbork	–		–		–		–	
Pomeranian	8	12	21	44	5	19	34	75
town-royal								
Chełmno	2		3		6		11	
Malbork	–		–		–		–	
Pomeranian	–	2	6	9	–	6	6	17
total	108		213		63		384¹⁰⁹	

The table above allows for a conclusion that in Royal Prussia there were a majority of inherited mills. It is most vivid in Pomeranian Voivodeship, while in the two others the two types of lease are in balance, maybe slightly in favour of inherited mills. Even in the case of noble property, the group of inherited mills is significant, which would support the claim that the policy towards the millers was much more lenient than towards the innkeepers. The necessity to undertake necessary investments in the mills forced the feudal lords to offer more favourable lease terms.

The craft connected with the forest economy is a completely separate matter and requires our special attention. In the process of classification of the craftsmen, two pitch burners (in Malbork Voivodeship) and 21 charcoal burners (Pomeranian Voivodeship) were distinguished. The latter were mentioned only in Chylonia, Kielno, Kack Wielki and Przyjaźń parishes, which are located on the border of Gdańsk and Puck districts in Darzłubie Forest. Given the vast areas of forest in the southern and central Pomerania, Tuchola Forest, in particular, such lack of data on the pitch and charcoal burners is perplexing. One explanation is provided by the sources on Tuchola starostwo which shows that the local peasants treat the charcoal burning as an additional source of income, paying an additional fee for that; in Borzechowo starostwo likewise.¹¹⁰ Indubitably, making ash and pitch was only an additional source of income for the inhabitants of the forested areas, and consequently, it was not properly depicted in

¹⁰⁷ The mills with that maximum of 4–7 wheels are located in the royal property, e.g., in Chełmno district: Nadolny Mill, Grudziądz starostwo – five wheels, Słup, Rogoźno starostwo – five wheels; in Malbork Voivodeship – Dzierżoń Zamek (*Castle*) – five wheels, Malbork Zamek – two mills with four wheels, Młyn Piekarski – four wheels; Przechowo, Świecie district and starostwo – seven wheels, Gniew Zamek, Tczew district – six wheels; Starogard Folwark – six wheels, Tczew Dwór – six wheels. In the Church property the greatest number of wheels are in mill owned by the monastery in Pelplin – four.

¹⁰⁸ Cf. Rutkowski, *Badania nad podziałem dochodów*, vol. 1, pp. 165–166.

¹⁰⁹ The numbers do not include the territory of Chełmno, Elbląg, and Gdańsk as well as the facilities within the towns in the Royal Prussia. The total number of the mill in the entire Prussia is given hereafter.

¹¹⁰ Cf. J. Rutkowski, *Badania nad podziałem dochodów*, vol. 1, p. 212. In Lubichowo, Borzechowo starosty, Tczew district seven peasants are also pitch burners, in Borzechowo – 7, Zblewo – 5; cf. ASK XLVI 29, pp. 248–250.

the tax registers. Such phenomenon was rather widespread in the Crown lands.¹¹¹ The emergence of professional charcoal burners in Gdańsk and Puck district, however, can be explained by the increased demand created by the local centre of trade and crafts, namely by the town of Gdańsk.

We would also like to mention the category of craftsmen connected with breeding, which includes beekeepers and fishermen. Though distinctive, it was not properly depicted due to its sparseness. Below, we give the data for each voivodeship, counted in families (excluding the territory of Chełmno, Elbląg, and Gdańsk).

Table 44. Beekeepers and fishermen in Royal Prussia

ownership affiliation	Chełmno Voivodeship		Malbork Voivodeship		Pomeranian Voivodeship		total	
	beekeepers	fishermen	beekeepers	fishermen	beekeepers	fishermen	beekeepers	fishermen
royal	17	22	2	43	275 ¹¹²	90	294	155 ¹¹³
noble	6	17	–	4	–	25	6	46
Church	6	23	–	–	1	49	7	72
town-royal	–	4	–	–	–	2	–	6
total	29	66	2	47	276	166	307	279

The numbers indicate that the two crafts are most popular in Pomeranian Voivodeship, particularly in the royal and Church lands. The fishermen are also numerous in Malbork Voivodeship. In Pomerania, they are present mostly in Gdańsk and Puck districts (43, 28) and they mostly fish in the sea. Those fishing in the rivers live in Świecie (29), Tuchola (21), and Tczew district (21).¹¹⁴ The beekeepers, in turn, live predominantly in the area of Tuchola Forest, so in Tuchola and Człuchów district, as well as in Tczew and Mirachowo districts.¹¹⁵ The beekeepers are organised into groups with an elder presiding, called a starost (e.g. in Tuchola and Świecie starostwo).¹¹⁶

We should also bear in mind that the acquired numbers do not reflect the entirety of the village population dabbling in beekeeping and fishing, and only refer to those who did it for the living. In some seasons, the crafts were mostly taken up by the larger village population.

Location of the key industrial facilities (thematic map 10)

Map number 10 is strictly connected with the previous one and aims to illustrate the location of the key craftsmen shops (i.e., industrial facilities) in Royal Prussia, both in the villages and towns. In the map drawing, they are presented over the state of the forests at the end of the eighteenth century

¹¹¹ Cf. H. Samsonowicz, *Rzemiosło miejskie*, p. 171.

¹¹² The number was calculated on the basis of the data on the beekeepers and, partially, by recalculation of the fees paid in honey by the beekeepers in Człuchów, Mirachów, Świecie, and Tczew districts. E.g. in Człuchów starosty the number given is 93.5 *pokowa* of honey (1 *pokowa* – c.a. 16 litres) from the beekeepers from the forest, with a note that each one of them gives 1 *pokowa* whereby 3 *pokowas* equal one barrel. In the calculations, we assumed it represents c.a. 90 beekeepers, we applied similar rules in the estimations for the Białobór starosty, arriving at the number of five beekeepers, Gniew (12), Mirachów (16), and Świecie (5) starostys; ASK XLVI 28, pp. 147, 261, 333, 473, 611.

¹¹³ The numbers acquired for the royal property were similar to those given by W. Jakóbczyk, *Uwarstwienie ludności wiejskiej*, p. 50, who also counted among the beekeepers and fishermen the peasants doing the beekeeping and fishing on the side.

¹¹⁴ The number of the fishermen reaches up to 22 in Brzeźno village, 20 in Jelitkowo (Gdańsk district), which are Church property; P. Prusy Królewskie, pp. 255–256.

¹¹⁵ The royal property, in Tuchola district – 104 beekeepers, Człuchów district – 45, Tczew district – 51, Mirachowo district – 19, Świecie district – 6. In the Church land, there is only one beekeeper in Tczew district; in noble – none.

¹¹⁶ ASK XLVI 28, p. 611 “bartny starosta” (*beekeepers’ starost*; in Drzycim in Świecie district), p. 34 (in Kosobudy, Tuchola district – the starost and 20 beekeepers), p. 50 (in Czersk – starost and 24 beekeepers), p. 56 in Leśno, starost and 15 beekeepers); p. 70 (Karsin – with 13 and 10 beekeepers). The responsibilities of the starost are addressed by A. Żabko-Potopowicz, *Dzieje bartnictwa w Polsce*, RDSG, vol. 15, 1955, p. 33.

and the hydrography, in order to better show the sources of hydropower and other resources, which were a factor in the location of some facilities.

For practical reasons, the idea to also include the inns was abandoned due to their sheer number – about 1,200, which would obscure the situation and not provide any interesting conclusions (their density is similar in all of the voivodeships and districts). Instead, all other facilities in the towns are presented in detail, with the sole exception of the town breweries, due to lack of data. Also, the previously excluded territory of the largest Prussian towns was analysed and the facilities located there are shown on the map, rendering the overall map drawing fairly representative of the phenomenon.

The objects presented on the map can be divided into three main categories: mills (with similar facilities, like fulling mills), foundries (with other related facilities, like brickyards or lime kilns), and facilities connected with brewing beer (i.e., village breweries).

The table below presents the details on the industrial facilities in each Prussian voivodeship, divided according to their village or town location.

Table 45. Key craftsmen shops (industrial facilities) in Royal Prussia

craftsmen shops (industrial facilities)	Chełmno Voivodeship			Malbork Voivodeship			Pomeranian Voivodeship			total		
	village	town	total	village	town	total	village	town	total	village	town	total
mills:

alun mine	–	–	–	–	–	–	1	–	1	1	–	1
breweries	11	–	11	3	–	3	15	–	15	29	–	29

The numbers clearly point to the predominance of mills among other industrial facilities, with the vast majority of watermills (386).¹¹⁷ They are most frequent in Chełmno and Pomeranian Voivodeships. In the former, they are mostly located by the larger rivers and their tributaries, particularly by the Drwęca, the Ossa, the Lutryna, and the Wel. In the latter, however, the mills are most frequent in the western and riverside areas, where they also utilised the hydropower of the larger rivers (Brda, Czarna Woda, Wierzyca, Radunia, Reda) as well as the smaller, forest streams. In Malbork Voivodeship the water mills are mostly located in the southeast, while in Żuławy, there are mostly windmills, which

¹¹⁷ The number given by H. Samsonowicz, *Rzemiosło miejskie*, p. 146, 5000 mills in Royal Prussia in the sixteenth century must be some misunderstanding. J. Rutkowski, *Badania nad podziałem dochodów*, vol. 1, p. 286, whom Samsonowicz quotes, mentions 5,222 złoty income from peasant mills in Prussia. In the map drawing, some mills failed to be located by the running waters. It is clear that some were located by streams that have disappeared since, although their location was only roughly given.

were also built in the southwest of Chełmno Voivodeship. The sawmills were mostly built in Pomeranian Voivodeship, especially in Człuchów, Świecie, and Tczew districts, which makes sense, concerning how densely forested the said areas are. So, we can rarely observe them in, e.g., Malbork Voivodeship.

Out of the 30 fulling mills, the majority was located in Pomeranian Voivodeship (15) and Chełmno Voivodeship (9). We may suppose, drawing on the incomplete sources, that the mills where leather was cleansed were more frequent than those devoted to textiles – in proportion 16 to 10. The distinction is not necessarily well grounded, however, as one and the same mill may provide its services to both the shoemakers and drapers.¹¹⁸ That is why there was no clear distinction between the two types of fulling mills in the map drawing. The type of the fulling mill can also be inferred from the data on the existence of the drapers in particular towns.¹¹⁹ Thus, in Chełmno Voivodeship, there must have been fulling mills serving the drapers in the following towns: Toruń, Chełmno, Brodnica, Nowe Miasto, and Lubawa; in Malbork Voivodeship: Elbląg and Malbork; in Pomeranian Voivodeship: Gdańsk, Puck, Gniew, Starogard, Skarszew, Świecie, Tuchola, Chojnice, and Czarne. The leather fulling mills were most frequent in Malbork Voivodeship, near the town of Malbork (one serving shoemakers and one making more delicate leather [for craftsmen called “białoskórniczy”])¹²⁰ and in Chełmno Voivodeship (two leather fulling mills in Toruń).

Curiously, a substantial number of Prussian fulling mills are located outside of the town territory. It can be explained by the need to find adequate hydropower, not necessarily present within the town borders. It probably requires some further elaboration. The Prussian fulling mills, located outside of the towns, are mostly adjacent to the water mills, which were the royal and Church property. It gave grounds to charge an additional fee paid to the peasant leasing the mill or to the owner, e.g., the starost, who thus obtained some control over the production. We should bear in mind that such practice dates back to the times of the Teutonic Knights, who incentivised from forcing their subjects to use the services of their facilities as the Order’s substantial income came from such a milling fee. So, the seemingly illogical location of a fulling mill in Brodnica or Nowe Miasto, in Chełmno Voivodeship, and in Puck, in Pomeranian Voivodeship, can be the remnant of the former fiscal policy of the Teutonic Order.¹²¹ It was most probably supported by the king’s starosts, who had vested interest in keeping the income coming. We will later see that most of the fulling mills did not in fact belong to the towns, despite their primary function of serving the town craftsmen. The one main exception is the leather fulling mill in Pelplin, serving the craftsmen in the monastery there.

As far as other types of mills are concerned, there are three paper mills, one in Chełmno Voivodeship, near Toruń, most certainly providing its services to the town craftsmen; and two in Pomeranian Voivodeship, belonging to the town of Gdańsk.

The four horse mills found in the sources are, in fact, the malt-grinding mills; they were located mostly in the towns of Chełmno Voivodeship (Chełmno and Chełmża) and Malbork Voivodeship. The fourth horse mill was located in Lipienek, and, in light of no source of running water, served the local castle brewery.

There were three gunpowder mills: two in Pomeranian Voivodeship (Śmiechowo, Puck district, and Gdańsk), and one by the Malbork Castle (Landmel mill), serving the castle staff.¹²²

The second category – the foundries – is mostly represented by the ironworks (*kuźnica*). We should probably emphasise that the majority of Prussian ironworks, also called *hamry*¹²³ (word of German origin), strongly differed from those in the other parts of the Crown. They did not have the furnace for melting iron, but they used the resources supplied and transported from Sweden through Gdańsk.¹²⁴ Such smithies were usually located in Gdańsk district, near Oliwa (Oliwa, Przymorze, Strzyża), particularly by fast-running streams in Strzyża and Jelitkowo. Most of them (7) belonged to the Oliwa monastery, although they were leased and used by the representatives of the Gdańsk craft-

¹¹⁸ A. Mączak, *Sukiennictwo wielkopolskie XIV–XVII w.*, Warsaw 1955, p. 88; cf. Gniew-Zamek – fulling mill for the drapers and shoemakers; ASK XLVI 33, p. 358.

¹¹⁹ The information was acquired from the monograph of particular towns or tax registers and inspections of the royal property (particularly for the Pomeranian Voivodeship).

¹²⁰ ASK XLVI 29, pp. 82 f.

¹²¹ Cf. L. Weber, *Preussen vor 500 Jahren*, Gdańsk 1878, p. 224.

¹²² ASK XLVI 29, p. 83v.

¹²³ Ibidem, 28, p. 393: Zagórze, Puck starosty, „the ore by the river, “hamer” in Prussian”.

¹²⁴ Cf. B. Zientara, *Dzieje małopolskiego hutnictwa żelaznego XIV–XVII w.*, Warsaw 1954, p. 64.

smen.¹²⁵ The number of wheels in such ironworks was on average at two to three, but would reach as many as six (Przymorze), while the number of workers they employed (*socii malleortn*) reaches up to four.¹²⁶ The second major ironworks (4), this time mostly town, was in the north of Gdańsk district, near Mały Kacek and Kolibek, where they were located by the fast-running Kamienny Potok. Apart from those, they were sporadically located by the Radunia and the Kłodawa rivers in Tczew district and by the Wierzyca river, near Starogard.

The third cluster of ironworks can be found in the southeast of Pomeranian Voivodeship, in Świecie district (5) and in Tuchola (1). Drawing on the scanty sources, the ironworks there are similar to those in the Crown, which means that they did not only make the end products but also melted the ore transported from the area of Nowe starostwo.¹²⁷ Such claim is supported by their location in the forest providing wood for burning in the furnace. Moreover, there was also a mill nearby in Kozłów by the Czarna Woda river, in Świecie district, where the ore was ground (*mola in qua ferra exteruntur*).¹²⁸ Similar mills were located in the central Pomerania by the castle in Skarszewy by the Więćsica river (Tczew district). However, there is no mention of any ore ironworks nearby,¹²⁹ which is fairly surprising.

Within the discussed category, we would also include the ironworks in Chełmno Voivodeship, located by the forest in Lipinki in Radzyń starostwo. In Malbork Voivodeship, there were no ironworks identified.

The second type of foundries: copper smithies (7) are mostly located near the largest towns and provided their services to the local craftsmen. The majority of them (4) served the town of Elbląg (3 directly by the town and one in Gronowo village). The Toruń copper smithy was in Lubicz, by the Drwęca river; in Gdańsk, there was only one copper smithy, although it also used for the same purposes the ironworks in Lezienek by the Radunia river. Indubitably, the copper smithies only forged the copper products and did not melt the ore.

In the last category of industrial facilities, a significant number of brickyards (13) deserve our attention. They are most common in Chełmno Voivodeship, by the residences of the starosts' (Rogoźno) and bishops (Lubawa, and the Połowęż manor), and mostly near the larger towns (Chełmno, Grudziadz, Toruń). In Malbork Voivodeship, there are as many as three brickyards, one serving the Malbork castle, and two the town of Elbląg. Out of the four in Pomeranian Voivodeship, two serve the town of Gdańsk, one – the town of Tczew, and one is in Jasiniec, where it operated for the purposes of the local starost. Next to the brickyards, there were also lime kilns (3): one in Chełmno Voivodeship (Toruń) and two in Pomeranian Voivodeship, serving the town of Gdańsk.

There are only two glassworks: one in Malbork Voivodeship (Majewo, Tolkmicko starostwo), the other in Pomeranian Voivodeship in Skarszewy starostwo (Boże Pole village). Both of them were located near the forest, and the one in Boże Pole employed a glassblower (*vitrarius*) and five apprentices.¹³⁰

A sole exception in the area of Royal Prussia (in terms of foundry and mining facilities) was the mine where alun, vitriol, and maybe even saltpetre was mined. It was established in the '50s of the sixteenth century by the archbishop of Gniezno in Koziulec village by the Vistula River (Świecie district). It was operated by the Toruń and Gdańsk burghers¹³¹ and it employed eight miners (*magistri metalli aluminis*)¹³² in 1570.

¹²⁵ Cf. H. Voellner, *Die Mühlen am Glettkaubach in Oliva*, „Zeitschrift des Westpreußischen Geschichtsvereins”, vol. 75, 1939, p. 199; B. Zientara, *Dzieje małopolskiego hutnictwa*, p. 174, who erroneously equates the Oliwa smithies' leaseholders with their owners.

¹²⁶ P. Prusy Królewskie, p. 256.

¹²⁷ ASK XLVI 28, p. 593 – Ruda Sławie and Suchowska: „there is no ore in [Świecie – M.B.] starosty, we go to the inhabitants of Kosów in Nowe starosty”. It might also be the case that the name Kosów referred to that of Świecie district.

¹²⁸ P. Prusy Królewskie, p. 185; cf. B. Zientara, *Dzieje małopolskiego hutnictwa*, p. 60, who erroneously claims that such mills were not present in the area of Poland.

¹²⁹ P. Prusy Królewskie, p. 140: „2 molae in quibus ferra et alia exteruntur” (1 mill was misspelled in the text).

¹³⁰ Ibidem, p. 141.

¹³¹ AAG, Archiwum Kapitulne, vol. B. 143, pp. 196–197. The issue of the mines in Koziulec was addressed in greater detail by M. Biskup, *Z badań nad kopalnictwem alunu i witioliu w Prusach Królewskich w XVI w.*, [in:] *Prace z dziejów Polski feudalnej ofiarowane Romanowi Grodeckiemu w 70 rocznicę urodzin*, Warsaw 1960, pp. 367–380.

¹³² P. Prusy Królewskie, p. 193. Apart from that we also find some single facilities by the larger towns in: Chełmno Voi. – one smithy (Jedwabno, Toruń territory), knife grinderies (*szlifiernia nożownicza*) (Toruń); Pomeranian Voi. – one groats mill (*kaszownik*), oil mill, two grinderies, armourers' mill (*Harnischmühle*).

As mentioned above, in the case of the third general category – the breweries – we resorted to depicting only the town breweries. Brewing as a craft was fairly developed in Prussia, which will be elaborated on later. Thus, 15 out of those 29 town breweries were located in Pomeranian Voivodeship. They mostly belonged to the starosts (those in Świecie, Jasiniec, Człuchów, Tuchola, Borzechowo, Gniew, Tczew, Klonówka, and Puck), to the monasteries (Kartuzy), the Włocławek bishops (Komorsk W., Subkowy), or to the town of Gdańsk (Grabiny-Zameczek, Sztutowo, Warcz). The second in terms of the number of breweries was Chełmno Voivodeship. Similarly, they belonged to the starosts (castle breweries: Bratian, Brodnica, Grudziadz, Linieniek, Rogoźno), Chełmno bishops (Lubawa, Płowęż, Wąbrzeźno, Unisław, Starogród) and nobility (one in Linowiec, Chełmno district). In Malbork Voivodeship, there are three castle breweries (Sztum, Dzierzgoń, Malbork), but the needs of the castle were also satisfied by the 13 inns nearby.

We should take into consideration the fact that, apart from the castle breweries (royal or Church ones), the craft was undertaken by the innkeepers in the settlements in both types of the property. The sources support the claim that brewing beer in Royal Prussia, despite being the domain of the towns, had encountered considerable and growing competition in the form of the royal starosts (there is a brewery next to nearly each castle, and some of them even sold the beer to the local inns) and the Church administration (in Chełmno and Włocławek bishopric in particular).¹³³ Such process had not occurred in the noble lands as of then or was not depicted by the sources.

The placement and location of the industrial facilities is directly connected with their ownership affiliation. The issue was briefly mentioned in the analysis above, but here we would like to present a table showing the overall division of the facilities according to their owner. It is important to bear in mind that it specifies the actual owner, not its leaser or temporary holder, which is particularly valid in the case of the ironworks and smithies.

Having scrutinised Table 46, we can draw the following conclusions: a majority of the mills are located in the royal and noble property; the majority of windmills belongs to the nobility (particularly in Chełmno Voivodeship); 60% of fulling mills are located in royal and Church land, while they are nearly always used by the town craftsmen, which supports the claim given above as to their location. As far as the foundries are concerned, most of them are also in royal and Church lands, and only a minority in the noble property; however, their lessors and users are also the local burghers. The copper smithies, in turn, are almost completely town property.

In case of the breweries, the dominance of the royal and Church property with almost non-existent share of noble ones is stunning.

In our consideration of the craft, we solely focused on the entirety of the village craft, supporting the findings with only very rough, general tables and locations of the town industrial facilities. As it was mentioned above, such practice stems from the lack of sources, rendering the analysis fragmentary. Thus, we would like to supplement the description of the village craft with a detailed account of the phenomenon – the population and diversification – of the craft in the 14 smaller towns in the Pomeranian Voivodeship, for which the sources proved rather detailed (with the exception of some general numbers in case of Białobór and Gniew).

Table 77 shows a significant number of craftsmen in the smaller towns in Pomerania. In the 14 of them, the total number is 842 – the maximum number for one town being 152 (Chojnice), while the minimum – two (Białobór) and eight (Człuchów). The average number of craftsmen per one town is 60. The main clusters of the craft were the towns in the Vistula riverside stretch and two towns in the west of the voivodeship (Chojnice and Tuchola).

Calculating the percentage of craftsmen in the entirety of the town population (assuming five people per one family) we arrive at the value of 30% on average, with nearly as much as 50% in Chojnice and Puck – 46.2%, Skarszewy – 49.5%, Starogard – 45% and as little as 1.5% in Białobór and 7.8% in Człuchów. What is striking is the great diversity among the town craftsmen, even within one type of work, which testifies of their high specialisation.¹³⁴

As far as categories are concerned, we should note two groups: those connected with textiles – making broadcloth and linen and those connected with leather. In the first group we can, primarily, distinguish

¹³³ F. Mager, *Geschichte der Landeskultur*, p. 147 f.

¹³⁴ Cf. the two categories of potters in Chojnice, smiths in Człuchów, bakers in Tczew, wheelwrights in Nowe, coopers in Chojnice.

the broadcloth drapers (*sukiennicy*) from Chojnice (55), which was the local textile production centre for the entire Pomeranian, as well as linen drapers (*plóciennicy*), particularly in Chojnice and Tczew.

In the second main category – craftsmen working with leather – the most important position is taken by the shoemakers (117) present in almost every Pomeranian town.

The further larger groups are as follows: those connected with metalwork, where smiths dominate (52), those connected with woodwork, where wheelwrights and coopers are most numerous. Apart from brewing and alcohol distilling craft, we should also distinguish a numerous group of tailors (87). As far as food production is concerned, the bakers and butchers are dominant, and in clay work – potters.

Trying to look for a more general tendency among the distribution of crafts, we can distinguish two groups: the first one aiming at satisfying the need of the town itself, where we can list such crafts as: bakers, butchers and carpenters; the second one producing for the purposes of both the town and the village: drapers, shoemakers, tailors, coopers, wheelwrights, and potters. The second group certainly supplied the nearby village population filling the gap in the village craft and strengthening the trade.

It is also true in the case of brewing and alcohol distillation. The acquired data, though fragmentary for some towns, show examples of a few, or even a dozen brewers in some towns (especially in Skarszewy – 15 and Tuchola – 8) who brew the beer mostly sold outside the town. This craft was fairly popular among the townsfolk, which had a clear depiction in the tax registers.¹³⁵ The professional brewers, however, mostly worked in the major town breweries.

¹³⁵ Tax registers list a fee “de ptisana” for each Pomeranian town. For Gniew, they list three breweries, and two malteries; P. Prusy Królewskie, p. 99. Człuchów town utilises the malt mill in the nearby Dębica; ASK XLVI 28, p. 187. The role of brewing in the smaller towns in Prussia is discussed by A. Mączak, *Mieszkańcy Malborka w roku 1570*, ZH, vol. 25, no. 3–4 (in print), the information gathered by whom could only partially be used here.

Table 47. Detailed division of the craftsmen population in towns of the Pomeranian Voivodeship

District - town	I						II								
	blacksmiths	locksmiths	tinsmiths	tinkers	blade smiths	gunsmiths	carpenters (furniture)	coopers	pottery specializing in the bowls manufacturing	wheelwrights	coach-builders	roofers joiners	sawyers	shoemakers specializing in the manufacture of boots	woodcarvers

- I. Jobs connected with metalwork
- II. Jobs connected with woodwork
- III. Jobs connected with production of cloth and linen
- IV. Jobs connected with leatherwork
- V. Jobs connected with textiles and apparel
- VI. Jobs connected with making alimentary products
- VII. Jobs connected with claywork
- VIII. Various crafts (glaziers, rope makers, barbers, goldsmiths, pharmacies)
- IX. Unspecified craftsmen
- X. Jobs connected with production of beer
- XI. Data on distillation and its alcohol sale

A similar line of thinking can be applied to the alcohol distillation, which is even better reflected in the sources. The acquired number of 90 distillation stills for the 12 towns (7.5 per one town) and 33 innkeepers making spirits in eight towns (about four per one town) seems to illustrate the size of the undertaking in the Pomeranian towns, especially, compared to the 19 distillation stills in the village area in the entire voivodeship.

The numbers and ruminations above, though fragmentary, allow for, as it seems, a better understanding of the role of town craft in supplementing the lacks in the village craft in Royal Prussia.¹³⁶

¹³⁶ For example, it can be added that we have data on existence for the area of the Chełmno Voivodeship crafts in four smaller towns: Chełmża – shoemakers, tailors, weavers (the number not given), roofer, furrier, stove fitter, cap maker and 26 distillation stills and six innkeepers making spirits; Lidzbark Welski – nine craftsmen, 21 distillation stills; Wąbrzeźno – seven craftsmen and 22 distillation stills; Radzyń – 12 distillation stills, seven innkeepers making spirits, 18 companions-journeymen (the number of craftsmen is not given, except for two, not possessing houses); P. Prusy Królewskie, pp. 66–68. These figures

The craft in the three largest towns is of a completely different sort and function, which still requires further studies and elaboration.

The remaining elements included in the map were administrative centres for both the Polish Crown and the Catholic Church, as well as seats of town courts and land courts. As such, seats of all *starostwos* (royal demesne lands belonging to the Crown), and Church property clusters have been marked on the map. All district seats have also been marked, as well as town court seats in Chełmno Voivodeship (Kowalewo), Malbork Voivodeship (Dzierzgoń), and Pomeranian Voivodeship (Skaryszewy); similarly, land court seats, and sites of local *sejmiki* have been marked. *Sejmik* assemblies took place in Kowalewo in Chełmno Voivodeship, Sztum in Malbork Voivodeship, and Starogard in Pomeranian Voivodeship.¹³⁷ The location of the so-called general *sejmik* (*sejmik generalny*) – *sejmik* for the whole Prussian province – rotated from Grudziadz (Chełmno Voivodeship) to Malbork (Malbork Voivodeship), which has been separately noted on the map.

The cathedral in Chełmża, the only bishopric cathedral in Prussia (excluding Warmia), has also been marked on the map, as well as all twenty-eight castles existing in the sixteenth century: twenty-three belonging to the Crown, four to the Chełmno bishopric, and one belonging to the town of Toruń (Bierzgłowski Zamek).

(1961)

Translated by Paulina Waclawik

seem to indicate a weaker development of craftsmanship in the towns of the western part of the Chełmno Voivodeship with the widespread development of alcohol distillation.

¹³⁷ Data after M. Bär, *Die Behördenverfassung in Westpreussen seit der Ordenszeit*, Gdańsk 1912, p. 40 f. Land court proceedings in Chełmno Voivodeship were held in Radzyń, Toruń and Brodnica, Nowe Miasto on the Drwęca; in Malbork Voivodeship, they were held in Sztum; in Pomeranian Voivodeship – in Starogard, Świecie, Człuchów, Tuchola, Mirachowo, and Puck, meaning in all districts save the two smallest ones, Gdańsk district and Nowe district.

¹ The data pertaining to the population of smallholders and cotters are available only for Brzozowo and Grubno villages. The numbers in brackets indicate that they were estimated or incomplete, and usually were not included in the map. The two exceptions are some data on the population of the territory of the towns of Gdańsk and Elbląg.

² Only the area of the parish located in Royal Prussia, in Chełmno district (Elgiszewo) was included.

³ The data pertaining to the population of smallholders and craftspeople are available only for Czarze village.

⁴ Only the area of the parish located in Royal Prussia, in Michałow district (Łaszewo) was included.

⁵ The number includes 536 smallholders added to the population of the noble property.

⁶ The number includes 159 cotters added to the population of the noble property and the territory of the town of Toruń.

⁷ The number includes 70 craftspeople added to the population of the territory of the town of Toruń.

⁸ Excluding the estimated population of the town of Chełmno of 800 the share should be 22.6%.

¹ Only the area of the parish not laying in the territory of the town of Gdańsk, but in Tezew district was included.

² Only the area of the parish located in Royal Prussia, in Mirachowo district (Niepoczolowice), was included.

³ Only the areas of the parishes located in Royal Prussia, in Człuchów district (Orzetek) and Tuchola district (Ovilav) were included.

⁴ For the craftspeople population, there were only data for Zajązdkowo Wlk.

⁵ Only the areas of the parish not laying in the territory of the town of Gdańsk, but in Gdańsk district (Bąkowo, Golańkowo, and Kolbudy Górne), were included.

⁶ Only the areas of the parish located in Royal Prussia, in Mirachowo district (Okalice and Zakrzewo) were included.

⁷ Only the areas of the parish located in Royal Prussia, in Puck district (Brzyn, Nadole, and Prusewo) were included.

⁸ Only the area of the parish located in Royal Prussia, in Mirachowo district (Kętrzyno) was included.

⁹ Only including the following settlements: Grabiny Duchowne, Mokry Dwór i Wiślina, counted among the Gdańsk district ones.

¹⁰ Only the area of the parish located in Royal Prussia, in Tuchola district (Pamiętowo) was included.

¹¹ 192 of which are estimated smallholder population in the noble property.

¹² Excluding the estimated population of the territory of the town of Gdańsk of 15,000, the share should be 13.8%.

¹³ Excluding the estimated population of the territory of the town of Gdańsk of 15,000, the share should be 0.6%.

¹⁴ Excluding the estimated population of the territory of the town of Gdańsk of 15,000, the share should be 9%.

III.3.3 OWNERSHIP AFFILIATION OF SETTLEMENTS

III.3.3.1 CRACOW VOIVODESHIP

Krzysztof Chłapowski

Ownership affiliation of settlements in Cracow Voivodeship at the end of the sixteenth century was determined on the basis of tax registers, inspections, inventories, documents, and other sources from this century. Earlier and later sources were also helpful. All sources were described in the chapter *Written sources*.¹ We also consulted the literature on the subject. Settlements were marked with the same colours used in the entire AHP series: royal – red, belonging to Church institutions – purple, to the nobility – yellow, other – brown.

Royal estates in Cracow Voivodeship belonged to gord starosta's districts, leaseholders ('tenuty'), or were administered by a magnus procurator. The so-called 'wielkorządy' were royal estates, the income of which was used to pay for the needs of the royal castle and other buildings situated on the Wawel hill, as well as buildings supplying the castle, but located outside Wawel. In the second half of the sixteenth century, there were four gord starosta's districts in the voivodeship: Cracow (unusually, endowed with no lands, only the income from the regalia), Biecz, Nowy Sącz, and Oświęcim. Also, several villages belonging to the starosta's district of Nowe Miasto Korczyn, situated in Sandomierz Voivodeship, were located in Cracow Voivodeship. Leases were listed in Annex I. In the course of the sixteenth century their number changed, as royal estates were being merged (e.g. between 1521–1550 Jasło lease was merged with the starosta's district of Biecz²), or divided (in 1549 de iure, and in 1585 de facto, Żarnowiec lease was separated from the starosta's district of Nowe Miasto Korczyn;³ in 1585 and 1588 Mszana Górna and Mszana Dolna were separated from Nowy Targ lease;⁴ in 1588 Zator lease was isolated from Oświęcim starosta's district⁵).

It must be noted that in the second half of the sixteenth century, official sources had already ceased to use the terms 'starosta's district' ('starostwo'), *capitaneatus*, *praefectura* to denote gord starosta's district, and *bona regalia*, or lease ('tenuta') for the starosta's district not related to gord. Numerous leases in Cracow Voivodeship were then called *capitaneatus* ('starostwo'),⁶ *praefectura*,⁷ or even *praefectura seu tenuta*.⁸

⁸ Lanckorona in 1574 and 1588 (MK 112, f. 34; 134, f. 270v).

The affiliation of villages to a particular starosta's district and leases was described in the published inspection of Cracow Voivodeship conducted in 1564.⁹ Royal estates, recognized as legally charged (the so called 'old sums') by the Sejm (Diet) in 1562/1563, were not subject to inspection, and as such do not appear in this document. Their complete list and composition (names of villages in these estates) were determined many years ago by the author of this commentary.¹⁰ Foundations of new royal villages were numerous between 1565 and 1600, especially in piedmont territories (starosta's districts of Nowy Targ, Czorsztyn, and Biecz).

During the Sejms (Diets) of 1566 and 1567, specially appointed committees decided, based on the inspection, which exchanges of royal villages for villages of the nobility were valid, and which not. The committees also decided on these cases, which were not solved during the control of legal rights to use royal estates, conducted during the 1563/1564 Sejm (Diet) (the so-called revision of letters). The inspectors were to investigate the matter in the field, in other instances the decision was postponed until proper documents were presented by the interested party.¹¹

In the second half of the sixteenth century there were minor changes in the composition of royal estates. The exchange of a royal village Bieńkowice in Szczyrzyc district, and the royal part of Wrzempia in the same district for a part of a village Rudno, which belonged to the nobility and lay in Proszowice district, was confirmed in 1593.¹² In 1595 Dziewięciele, a village in Proszowice district, was given to Marcin Mazowiecki.¹³

On the eve of the seventeenth century, the number of royal estates in the voivodeship fell, as in 1603 the lease of Mszana Górna in Szczyrzyc district (nine villages) was exchanged for Lednica, a village in the same district, with a salt shaft belonging to Sebastian Lubomirski. The transaction was confirmed by the Sejm (Diet) in 1607.¹⁴

Two villages in Biecz district: Mrukowa and Sowokłęski, were not treated as royal, even though tax sources from the sixteenth and the seventeenth century describe them with a letter R, or an abbreviation reg., and were therefore considered royal villages by Edward Trzyna.¹⁵ In the fifteenth century, and in the beginning of the sixteenth, these villages were called royal, but in 1563–1567 the matter of their affiliation was not investigated, and no decision was made, so royal rights faded.¹⁶

Also, Lińcze Dolne and Lińcze Górne, two villages in Silesian district, were not recognized as royal property. The inspections from 1564 and 1569 mention that the nobility of Lińcza was obliged to provide for the castle in Lanckorona. However, this is not a proof of royal ownership of these villages, which the 1597 inspection describes as belonging to haeredes villae Lincze.¹⁷ This is an example of subordinate nobility, known e.g. in some royal estates in Red Ruthenia, or in Tykocin starosta's district.

Estates constituting the endowments of the offices of the castellan and the voivode of Cracow form a particular category of royal estates in Cracow Voivodeship.¹⁸

In total, at the end of the sixteenth century royal estates comprised 40 towns, 422 villages, and 30 parts of villages (their location in districts was shown in Table 4 and 5).

⁹ LK 1564. The information gathered from the inspection did not allowed us to determine, which villages belonged to Oświęcim starosty, and which to Zator lease. This was determined on the basis of detailed inventories from 1549, which described these estates separately, even though they had not been separated (ASK LVI, 0 1/II, ff. 78–145, Z 1, ff. 156–183).

¹⁸ They were described by W. Pałucki, *Studia nad uposażeniem urzędników ziemskich w Koronie do schyłku XVI wieku*, Warsaw 1962, pp. 119–122, 125–126. The author incorrectly included Łętkowice, a village in Proszowice district, in the benefices of the voivode of Cracow. The sources leave no doubts that this was Zętkowice in Lelów district. This mistake was noticed by J. Laberschek, *Dobra ziemskie urzędu wojewody krakowskiego w średniowieczu*, [in:] *Cracovia – Polonia – Europa. Studia z dziejów średniowiecza ofiarowane Jerzemu Wyrózumskiemu w sześćdziesiątą piątą rocznicę urodzin i czterdziestolecie pracy naukowej*, ed. W. Bukowski, K. Ożóg, F. Sikora, S. Szczur, Cracow 1995, p. 103.

Church property in Cracow Voivodeship (property of the clergy) consisted of the endowments of various institutions of the Roman Catholic Church (annex II). We assumed that even if villages belonging to Church institutions had a lay mayor, they were considered a property of the Church.

The number of Church institutions which owned land in Cracow Voivodeship is visibly higher than in any other voivodeship, probably because Cracow was the capital of the State from the eleventh century until the end of the sixteenth. The number we determined is much higher than the one presented in the table prepared in the past by Adolf Pawiński.¹⁹

The results of the source query allowed us to determine, precisely which estates belonged to the Church. Settlements inherited by various members of the clergy (e.g. Piotr Myszkowski, the bishop of Cracow, or Szymon Ługowski, the provost of Miechów)²⁰ were not treated as Church property. Settlements owned by possessors performing two Church functions (e.g. the Bishop of Kamieniec and Abbot of Mogiła, or the Dean of Cracow cathedral chapter and the Provost of St. Michael collegiate church)²¹ were not treated as endowments of Church institutions, it would be unjustified to treat them so.

In the course of the sixteenth century, the number of Church institutions, which owned land in Cracow Voivodeship, changed – some estates were taken, some were given. In 1529 the castellan of Żarnowiec, Achacy Jordan, founded a collegiate church in the town Bobowa, in Biecz district. The collegiate was endowed with Chodorowa, a village in Wilczyńska parish.²² In 1559 Cracow cathedral chapter decided that from then on the suffragan bishop of Cracow could be nominated only from the prelates or canons of the chapter (before the suffragan bishops came from the orders of the Franciscans or the Dominicans), and assigned a permanent endowment: villages Wygnanowice, Żydów, and a part of the village Wawrzyńczyce in Proszowice district, and Biezanów in Szczyrzyc district. In 1583 Goszcza in Proszowice district was added.²³

Between 1576 and 1580 Świniarsko Małe vel Mała Wieś, a village in Nowy Sącz district, Nowy Sącz parish, was given (sold?) by the monastery of the Sisters of St. Clare in Stary Sącz to the Franciscans of Cracow.²⁴ In 1585 Anna Kormanicka donated Stępcowice, a village in Książ district to the

¹⁹ The Table entitled ‘*Obraz tabelaryczny posiadłości duchownych w Małopolsce w drugiej połowie XVI wieku*’ (‘The estates of clergymen in Lesser Poland in the second half of the sixteenth century’), an appendix to *P. Małopolska*, vol. 3, p. 71. The part concerning the Voivodeship of Cracow lacks the endowments of: Gniezno archbishopric, Przemyśl bishopric, collegiate churches in Bobowa, Wiślica and Cracow (church of All Saints), the Norbertine Abbey in Nowy Sącz, the monastery of the Sisters of St. Clare in Cracow, the monasteries: Dominican in Cracow, Canon Regulars in Kłobuck, Krzepice and Trzciana, of the Holy Sepulchre in Cracow, Augustans in Cracow, Paulines in Cracow.

²⁰ For instance, the tax register from 1595 described villages Wielowieś and Wolica in Książ district as property, ‘epi. Crac’ (BCzart, 329, f. 333), whereas we know from our query that they were a hereditary property of Piotr Myszkowski, the bishop of Cracow. This suggests they were a part of the endowments of the bishopric. The tax register from 1581 the villages Kowary, Korzkiew, Grebienice, Brzozówka, Maszyce, Januszowice, Biały Kościół in Proszowice district and Kobierzyn in Szczyrzyc district were described as property of ‘*praepositi miechoviensi*’, and we know they were inherited by Szymon Ługowski, the provost of Miechów, which would suggest that they were part of the provost’s benefices (*P. Małopolska*, vol. 3, pp. 13, 27, 28, 30, 40).

²¹ The villages Półwsie, Ryczów and Woźniki in Silesian district were described in the tax register from 1581 as a property of ‘*episcopi Camenecensi*’, whereas we know they belonged to the abbey in Mogiła (*P. Małopolska*, vol. 3, pp. 104–105), as a result, the bishop of Kamieniec was included in the table as an owner of estates in Cracow Voivodeship. The contemporary abbot of Mogiła, Marcin Białobrzęski, became the bishop of Kamieniec in 1557 (*M. Brzozowski, Białobrzęski Marcin*, [in:] *Encyklopedia katolicka*, vol. 2, Lublin 1989, p. 366), hence this entry in the register. The register from 1581, and subsequent registers until 1595 place Mysławczyce and Tempoczoł in Proszowice district among the estates of ‘*decani Cracoviensi*’ (*P. Małopolska*, vol. 3, pp. 11, 18; BCzart. 329, ff. 13v, 27). This would suggest they were part of the benefices of the dean of the cathedral chapter. In reality they were part of the benefices of the provost of the collegiate church of St. Michael at the castle in Cracow, and the current provost, Erazm Dembiński was at the same time the dean of the cathedral chapter (*A. Tomczak, Walenty Dembiński, kanclerz egzekucji ok. 1504–1584*, Toruń 1963, pp. 158–160; *Kumor, Dzieje*, vol. 2, p. 270).

²² *Kumor, Dzieje*, vol. 2, pp. 338–339.

²³ *Ibidem*, p. 93.

²⁴ In the register from 1576 this village was listed as property of the convent in Stary Sącz (i.e. the Sisters of St. Clare) for the last time (ASK I 114, f. 175v), and in the 1580 for the first time as property of ‘*conventui S. Francisci*’ (ASK I 119, f. 284v). In 1611 the *Sejm* (Diet) decided in the constitution ‘*Sep z Małej Wsi zniesiona*’ that the corn levy was annulled from ‘*Mała Wieś, the property of the Franciscan Friars from Cracow convent, which they paid to the castle or the starosta of Sącz*’ (*VL*, vol. 3, p. 18). This tells us, which Franciscan convent it was about. We tried to determine, how and when exactly the village changed its affiliation, but our research in the literature concerning the Sisters of St. Clare from Stary Sącz, or the Franciscans from Cracow, did not bring any results.

college of the Jesuits in Cracow.²⁵ In 1588 Jadwiga Iwanowska offered her part of Błogocice (a village in Proszowice district) to the monastery of the Benedictine Sisters in Staniątki, the owner of the other part of the village.²⁶ In 1579, Marcin Dobroszowski, the burgrave of Cracow, was allowed to give Zielenice, a village in Proszowice district, to this college, which he did in 1598, under the condition that the donation would become effective after his death.²⁷ Because we know he died in 1613,²⁸ the village was marked as belonging to the nobility.

In the second half of the sixteenth century, the number of Church institutions with endowments located in Cracow Voivodeship was reduced by three. In 1551 the Abbot of Wąchock exchanged with the king the only villages of the abbey situated in the Voivodeship of Cracow: Dołuszyce and Olchawa (Szczyrzyc district) – for lodgings from the villages, three blocks of salt and 30 grzywnas a year from the mines in Bochnia. In 1552 the king endowed Piotr Kmita with these villages.²⁹ Also in 1551, Jan Janowski, the Abbot of Szczyrzyc, exchanged Ściborzyce, a village belonging to the abbey, situated in Proszowice district, with Zuzanna, the wife of Bernard Jodłownicki, for a part of the village Porąbka in Szczyrzyc district, and the both parties agreed the exchange would become effective in 1554, and it was so.³⁰ In 1556 the convent of the Franciscans in Nowy Sącz exchanged with the authorities of Nowy Sącz a part of Mała Żeleźnikowa village, for a yearly rent of 8 zloty.³¹ The right of presentation and the patronage of the prelates, canons and prebends of the collegiate church of St. Florian in Cracow (except for the provostry) since 1401 belonged to Cracow Academy.³² In 1559 Sigismund Augustus granted the right of the patronage over the provostry to the Academy, in 1578 this right was confirmed by Stephen Bathory, and in 1590 the Sejm incorporated the provostry into the Academy.³³ Since then the estates of the Academy could be identified with the estates of the chapter of St. Florian.

In 1588, Feliks Czerski and Jan Tęczyński, the patrons of the collegiate church of St. Giles in Cracow, bequeathed the villages Górka and Sadowie (Proszowice district), belonging to the collegiate chapter, to the monastery of the Dominicans in Cracow, and passed them their right of patronage. This decision was confirmed by the pope in 1591, and assigned these villages as an endowment of the faculty of philosophy and theology of the religious college,³⁴ and the collegiate chapter ceased to exist.³⁵

In the second half of the sixteenth century, the composition of Church estates in Cracow Voivodeship changed due to various transactions, either between institutions of the Church, or between an institution and a private person. In 1599 Cracow Academy bought a village Trątnowice in Proszowice district from the college of the cathedral vicars on Wawel.³⁶ In 1556 the college seized the income from the collegiate provostry in Skarbmierz (Skalbmierz), and thus became a co-owner of the town.³⁷ In 1568, the abbess of the monastery of the Norbertine Sisters in Zwierzyniec in Cracow sold the village Grodzisko in Silesian district to the family Myszkowski.³⁸ In 1593, Mikołaj Koryciński gave Wrocimowice,

and a part of Raclawice (both villages in Proszowice district) to the monastery of the Order of the Holy Sepulchre.³⁹

Another issue was the change of ownership affiliation through the exchange of estates. In 1562 the exchange of hereditary villages of Spytek Jordan, the castellan of Cracow, was confirmed: Brzozowa and Polikta in Nowy Sącz district for the villages of Tyniec monastery – Opatkowice in Szczyrzyc district, Zdania and Ujazd in Nowy Sącz district, as well as the exchange of the villages Wilkowisko, Raciborzany, Markuszowa and a part of Porąbka in Szczyrzyc district for the villages of the Szczyrzyc abbey – Mogilany, Głogoczów, and Włosań, situated in this district.⁴⁰ In 1563 the exchange of a part of Topola, a village in Proszowice district, owned by Mikołaj Rey, for a part of Zdziemierzyce in the same district, property of the chapter of St. Michael at the castle in Cracow, was confirmed.⁴¹ In 1566 the monastery of the Order of the Holy Sepulchre in Miechów gave its four villages in Kalisz Voivodeship, and Konin district, in exchange for Głuchów, a village belonging to Jan and Piotr Zborowski, located in Proszowice district.⁴²

The inspections of Cracow Voivodeship from 1564 and 1569 list a village Damice (Proszowice district) among the villages belonging to the monastery of the Sisters of St. Clare in Cracow, for which the monastery paid. We know that in the fifteenth century the monastery owned a part of this village, but in the sixteenth century sources, and later, the village appears only as a property of the nobility.⁴³ As such, we assumed that the village Damice fell in the hands of the nobility – in unknown circumstances – at the beginning of the sixteenth century at the latest.

When it comes to the endowments of parsons, we took into account only those cases when the endowment exceeded the standard endowment ('poświętne', 'manus ecclesiasticus'), especially, when the parson owned an entire village, or when his endowment lay outside the parochial village.

The holdings of Church institutions at the end of the sixteenth century, depicted in Annex II, changed already in the first half of the seventeenth century, as three institutions of the Church (Cracow Academy, the College of the Jesuits, and the Dominicans in Cracow) increased their properties significantly, not to mention new foundations, which were endowed with land, e.g. the Camaldolese in Bielany near Cracow (1604), the Bernardines in Zebrzydowice (1602), and in Alwernia (1616), the Carmelites in Wiśnicz (1622) and in Czerna (1628–1633).

At the end of the sixteenth century the Church owned 11 towns, 519 villages, 76 parts of villages in Cracow Voivodeship, three towns, and 32 villages in the Duchy of Siewierz altogether. In the Duchy, which belonged to the bishops of Cracow, there was no royal property, only Church (almost entirely belonging to the bishops of Cracow), the nobility owned land there as well.

Town property consisted of settlements belonging almost exclusively to royal towns (Annex III). Their composition underwent minor changes in the middle of the sixteenth century. In 1549, Jan Ocieski, the castellan of Biecz, sold Mierzączka, a piece of land he used situated just outside the town, to the town of Wieliczka, for a yearly rent of 16 grzywna, but this transaction was annulled during the so-called revision of letters (1563/1564).⁴⁴ The burghers of Wieliczka settled in this land (called then suburbium), and in 1578 the king extended the town rights to this land.⁴⁵ In 1588 it was leased by Sebastian Lubomirski, who in the same year ceded the perpetuity for parts of Lednica village and parts of Mierzączka suburbs to his son Stanisław.⁴⁶ That is why we treat the suburbs Mierzączka as a settlement of mixed ownership (royal-town). In 1568 the authorities of Biecz sold the town village Męcina to Kasper Wielopolski.⁴⁷

⁴⁶ ASK I 126, f. 435; MK 134, ff. 162v–163. In 1603, during the exchange of the hereditary village Lednica that is Lednica Polna for Mszana Górna lease, the family Lubomirski became the owners and heirs of Mierzączka (Tax reg. 1629, f. 93; Tax reg. 1680, p. 94; MK L.XVIII 24, ff. 431v–432) and in 1628 they granted the Magdeburg law to the town (K. Kubik, *Mierzączka – nieznanie miasteczko w obrębie Wieliczki*, „Studia i Materiały do Dziejów Żup Solnych w Polsce”, vol. 8, 1979, pp. 52–55).

⁴⁷ *Materiały do historii miasta Biecza (1361–1632)*, pub. F. Bujak, Cracow 1914, no. 301.

There are no separate tax registers for villages in Cracow Voivodeship inhabited by farm gentry ('szlachta zagrodowa'; 'nobilium emethones non habentium'). Although a list of 50⁴⁸ such villages was prepared by Adolf Pawiński, we decided – given our doubts concerning the accuracy of his findings – not to include this category of ownership on the map, or in the tables.

Property of the nobility dominated in the sixteenth century Cracow Voivodeship over other, aforementioned categories, just like in all other voivodeships. What was characteristic for Cracow Voivodeship, however, was the rare occurrence of partial gentry ('szlachta częstkowa'), and numerous estates in the category of great land ownership.

In this volume of AHP, as in the one devoted to Sandomierz Voivodeship, we decided to indicate larger estates of the nobility. As our work aims at presenting the situation from the end of the sixteenth century, this was based on the 1595 tax register. It is a known fact that tax registers did not include all settlements (newly-located villages and some small hamlets were omitted), and the payment was not based on all sources of income (manorial fields, especially demesnes, were omitted).⁴⁹ Moreover, due to tax reliefs and various concealments, the number of lands recorded in registers usually differed from the reality by over 10%,⁵⁰ and sometimes the taxpayers were not hereditary owners of villages, but leaseholders. Because of these drawbacks, the picture derived solely on the basis of tax registers is not entirely real. That is why we tried to verify some incorrect, or uncertain, pieces of information.

In order to avoid inaccuracies, we compared data from several registers, e.g. the 1595 register lists 'Mat. Misiowski' as the person, who paid for the village Jedlcza in Książ district, but the 1588 mentions 'Alb. Padniowski, ten. Misiowski',⁵¹ thus we could identify Padniowski as the real owner of this village. Thorough knowledge on the matters of royal and Church property allowed us to eliminate those cases, where tax registers listed names of noble leaseholders of the estates, not the actual institution, which owned the estate. Studies on great families, or individuals, whose authors reached court books,⁵² helped us verify the information found in the registers. We – following the rules appointed in our Atlas – did not use court books. Some findings of the authors were rejected, e.g. Podstolice, a village in Szczyrzyc district listed by Długosz among hereditary villages of Sebastian Lubomirski, belonged to a Church institution (collegiate), and was only leased by Lubomirski.⁵³ Similarly, Maszków in Proszowice district, attributed by Włodzimierz Dworzaczek to Stanisław Tarnowski, the voivode of Sandomierz, was only leased by him from the monastery of the Sisters of St. Clare in Cracow;⁵⁴ or in the cases of the villages Rokitno, Grabiec, and Boniowice in Lelów district, which Halina Kowalska considered a property of Stanisław Szafraniec, when in fact they belonged to this monastery, and Szafraniec was only their leaseholder.⁵⁵ We also rejected Tomasz Kempa's thesis that voivode of Kiev Konstanty Wasyl Ostrogski, as per agreement concluded in 1594, gave a group of villages situated in Cracow Voivodeship to his son-in-law Krzysztof Radziwiłł 'Piorun',⁵⁶ as the fiscal sources from the end of the sixteenth and the seventeenth centuries, as well as data from the inspection conducted in 1595–1599, suggest these villages remained in Ostrogski's hands. Henryk Lulewicz drew attention to the fact that Radziwiłł's wife prevented her husband from seizing her dowry.⁵⁷ So, the registers show

the range of Radziwiłł's formal rights (and claims), which did not evolve into actual use. Finally, against Janusz Kurtyka, we did not accept Mikołaj Firlej, voivode of Cracow, as the owner of Balice, Burów, and Szczeglice in Proszowice district, in 1595,⁵⁸ because according to that year's register, these estates were already owned by Jan Firlej, the Treasurer of the Crown.⁵⁹

We also made use of the document from 1 April 1591, in which Piotr Myszkowski, the bishop of Cracow, divided the great private estates he gathered in the Voivodeships of Cracow, Sandomierz, and Rawa Mazowiecka between his nephews: Piotr, the starosta of Chęciny, Zygmunt, and Aleksander (Jan, the eldest nephew, died in March 1591), and the document lists all settlements in these lands.⁶⁰

We believe, in spite of all objections, which could be provoked by the image of great land property presented on the basis of tax registers, that their cognitive values justify the preparation of the list (Annex IV), and the Table (Table 2).

Neither tax registers, nor any other source of mass and statistic nature, provided any data concerning the sole, unquestionable criterion, which could be used as a basis for the division of estates into categories of large and petty property. As such, the table had to be prepared with the available criteria (the number of towns and villages, or the number of serf lans in the estates). The number of lans, not villages, defined the order in the table (villages could differ), and the lower limit qualifying for our table (and our annex) was 30 lans (not 50 used by Antoni Mączak in his study⁶¹), because we wanted to increase the cognitive value of our table. We also included the families with less than 30 lans, but owned cities (towns), which increased their income significantly. Offices occupied in 1595 were listed next to names. We could not define the borders of the estates precisely, especially in areas of sparse settlement. As a result, the margin of error would be too big, so we decided not to include the area of the estates belonging to individual owners in the table.

The table was entitled 'Great landed property owners'. This allowed us to omit the term 'magnate', controversial due to the imprecise criteria of this category (including wealth criterion).

One could be surprised having analysed the order of owners according to the number of lans, and to the number of villages owned. It should, however, be remembered that:

1. Among the villages belonging to Stanisław Szafraniec, the wojski of Cracow, there was a village Sułozowa (Proszowice district), which occupied the area of 89.5 lans. This explains why Szafraniec appears so high in the table;

2. Some villages belonging to Joachim Ocieski, the starosta of Olsztyn, had over a dozen, and more than twenty lans. Hence his high position in the table;

3. The majority of villages belonging to Wojciech Padniewski, the castellan of Oświęcim, had five or more lans, and that is why he owned so many of them;

4. Krzysztof Komorowski, the castellan of Nowy Sącz, did own 35 villages, but – with few exceptions – these were small piedmont hamlets, sometimes newly-founded. He owned a large and compact, yet poorly inhabited or developed territory, which could potentially provide large income, after it was settled and developed. This explains, why in the near future Sigismund III and his wife Constance would want to obtain these lands and make them their private (hereditary) property;⁶²

5. Villages in the estates of Andrzej Stadnicki and Oktawian Gucci, in Biecz district, were mainly located on Vlach law, with small demesnes – 'dworzyszcz'a' (75 in Stadnicki's estates and 60 in Gucci's altogether). In Red Ruthenia the term 'dworzyszcz'e' was used alternately with 'lan wymiorny', i.e. a 16-rod lan, and in villages located on Vlach law, it most often meant the big lan, 32 rods.⁶³ Had we assumed it was similar in Cracow Voivodeship, Gucci and Stadnicki would appear on much higher positions in the table.
