CONTENTS

Editorial	1
Aleksander Jagodziński. In commemoration of the seventieth birthday anniversary ... <i>Tomasz Herbich</i>	3
Albert Hesse. In commemoration of the sixty-fifth birthday anniversary	5
<i>Alain Tabbagh and Tomasz Herbich</i>	

SPECIAL THEME: ARCHAEOLOGICAL PROSPECTION

Archaeological geophysics in Egypt: the Polish contribution	13
<i>Tomasz Herbich</i>	
Geophysical reconnaissance at the site of Tanais (Russia) in 1993–2003	57
<i>Krzysztof Misiewicz</i>	
Non-destructive geophysical-archaeological investigations of the site at Tablada de Lurin (Peru)	79
<i>Krzysztof Misiewicz and Krzysztof Makowski</i>	
Zofipole interdisciplinary research project: fieldwork results	91
<i>Halina Dobrzańska and Tomasz Herbich</i>	

5th INTERNATIONAL CONFERENCE ON ARCHAEOLOGICAL PROSPECTION

Sessions of the 5 th International Conference on Archaeological Prospection	104
Magnetic archaeoprospection at Fayum governorate, Egypt	113
<i>T.F. Abdallatif, H. Odah and A.M. Saleh</i>	
Application of 3D-migration to GPR survey at the Tenpaku-site, Mie, Japan	113
<i>T. Ako, H. Kamei, Y. Yotsuya and M. Okita</i>	
3D GIS in archaeology: a comprehensive approach to the reconstruction of archaeolo- gical monuments	115
<i>Sergey Alekseychuk</i>	
Geophysical study of Loma Guadalupe archaeological site in Michoacan, Mexico	118
<i>Luis Barba and Gregory Pereira</i>	
Magnetometry at Uruk (Iraq): the city of King Gilgamesh	122
<i>Helmut Becker and Jörg W.E. Fassbinder</i>	
The study of ancient city planning by geophysical methods: the case of Dura-Europos, Syria	124
<i>Christophe Benech</i>	
The use of modern technologies in archaeological prospection: experience from SUO “Nasledie”	128
<i>Andrei B. Belinski and Sergey V. Merkulov</i>	
Geophysical survey of the Medieval stronghold at Nasielsk, Central Poland	129
<i>Mariusz Błoński, Peter Milo and Krzysztof Misiewicz</i>	

Magnetometer survey of Celtic salt exploitation in the Seille river valley (Moselle, France) and an approach to 3D presentation of magnetic anomalies <i>Norbert Buthmann, Bruno Wirtz and Benno Zickgraf</i>	131
The location and characterization of magnetic bodies from archaeological prospection using 2D cross-correlation <i>M.C. Capanna and S. Piro</i>	134
Marine geomagnetic high definition metrology: possible archaeological applications <i>F. Caratori Tontini, C. Carmisciano, M. Ciminale, O. Faggioni and S. Monti</i>	135
Mann's landscapes revealed <i>Paul Cheetham, Tim Darvill, Roger Doonan and Bronwen Russell</i>	137
Aerial archaeological prospection of the Viking Age settlement in Haithabu <i>Michael Doneus</i>	140
Prospecting the Roman military camp of Zwentendorf, Austria <i>Michael Doneus, Wolfgang Neubauer, Stefan Grob, Klaus Löcker and Sirri Seren</i>	143
Archaeological feedback of aerial archaeological interpretation of an Early Medieval graveyard at Frohsdorf, Lower Austria <i>Michael Doneus and Gabriele Scharrer</i>	146
Large-scale magnetic and resistivity surveys at the Burgaz archaeological site, Turkey <i>Mahmut G. Drahor and Gökhan Göktürkler</i>	149
Magnetic prospection at the site of Bocheń, Central Poland <i>Marek Dulinicz, Peter Milo, Krzysztof Misiewicz and Mieczysław Rekowski</i>	152
The city map of ancient Carnuntum – combining archaeological prospection, photogrammetry and GIS <i>Alois Eder-Hinterleitner, Peter Melichar, Wolfgang Neubauer, Michael Doneus and Sirri Seren</i>	156
Combined geophysical survey at Selinus, Sicily <i>Ercan Erkul, Wolfgang Rabbel and Harald Stümpel</i>	157
Development of a mobile multi-sensor system: first results <i>Ercan Erkul, Wolfgang Rabbel and Harald Stümpel</i>	159
Magnetometry at Zhaolun, the “Asian Central Bank” of the Han dynasty Shaanxi Province, China <i>Jörg W.E. Fassbinder, Doris Ebner, Josef Lichtenauer, Qin Jianming, Jiang Baolian, Liang Xiaoqing, Yang Tianmin, Zhao Qiang and Qi Yang</i>	161
Magnetic prospecting and targeted excavation of the prehistoric settlement Platt-Reitlüsse, Austria <i>Martin Fera, Wolfgang Neubauer, Michael Doneus and Alois Eder-Hinterleitner</i>	165
Excavating in “blind” mode. Magnetometer survey, excavation and magnetic susceptibility measurements of a multiperiod site at Bad Homburg, Germany <i>Nico Fröhlich, Martin Posselt and Norbert Schleifer</i>	167
A contribution to archaeological prospection. Examples of resistivity surveys in the Mediterranean area <i>Roberto Gabrielli, Teresa Iuliano, Paolo Mauriello, Dario Monna and Daniela Peloso</i>	169
Why scan when you can do detailed survey? <i>Chris Gaffney and John Gater</i>	171

Multimethodological approach to study and characterise the Forum Novum site (Vescovio), Italy	172
<i>V. Gaffney, H. Patterson, S. Piro, D. Goodman and Y. Nishimura</i>	
The Knowlton Neolithic and Early Bronze Age Landscape Project – geophysical survey in a Late Neolithic and Early Bronze Age ritual landscape	173
<i>John Gale, Paul Cheetham and Steve Burrow</i>	
Why the fish ensign and cult of Khnum were prevalent in Mendes: a new Egyptological approach in the light of science	175
<i>Mahmud M. al-Gamili</i>	
Use of space remote sensing data for the archaeological mapping of the Taman peninsula, Russia	176
<i>G.P. Garbuzov and Y.V. Gorlov</i>	
The remote sensing background in the “Irendyk” reserve project, Southern Ural, Russia	177
<i>G.P. Garbuzov, S.V. Gusev, N.S. Saveliev and P.M. Shulgin</i>	
Geomagnetic mapping on the Early and Middle Bronze Age settlement mound Tell Mozan (Urkesch), Northeast Syria	178
<i>Stefan Giese, Armin Grubert and Christian Hübner</i>	
Processing and interpretation of magnetic fields of heterogeneous archaeological objects	180
<i>Vladimir V. Glazunov and Natalia N. Efimova</i>	
Horizon slice in archaeological prospection	184
<i>Dean Goodman, Yasushi Nishimura and Hiromichi Hongo</i>	
Integrated prospection in the Upper Town of Ephesus, Turkey – a case study	185
<i>Stefan Grob</i>	
Geomagnetic surveys at Sais, Sa el-Hagar, western Delta, Egypt	185
<i>Duncan Hale and Penny Wilson</i>	
Integrated archaeological geophysical assessment of an urban brown field site in Benghazi, Libya	188
<i>Ken Hamilton and Armin Schmidt</i>	
Archaeological investigation of the Somme battle site by ground penetrating radar ...	189
<i>Ken Hamilton and Armin Schmidt</i>	
Electrical and GPR tomographies for archaeological investigations at Mit-Raheina, Egypt	190
<i>A.Gh. Hassaneen, S.Sh. Osman, M.A. Abd Allah and F.A. Shaaban</i>	
Geoelectrical study to delineate the effect of groundwater increment in Abusir, Egypt	190
<i>A.Gh. Hassaneen, El.A. al-Sayed and M.M Soliman</i>	
Topographic correction to compensate for changes in surface elevation in GPR image by applying F-k migration	191
<i>Pasomphone Hemthavy, Hiroaki Watanabe and Hiroyuki Kamei</i>	
Magnetic mapping of the Northern Cemetery at Abydos, Egypt	193
<i>Tomasz Herbich, David O'Connor and Matthew Adams</i>	
Magnetic surveys of the site Burg Gana (Hof/Stauchitz) in Saxony	197
<i>Tomasz Herbich, Roman Krivánek, Krzysztof Misiewicz and Judith Oexle</i>	
Magnetic survey at South Abydos: revising archaeological plans	200
<i>Tomasz Herbich and Joseph Wegner</i>	

Archaeological prospection: dreams and reality	205
<i>Albert Hesse</i>	
The potential of archaeological prospection techniques in Iceland	205
<i>Tim Horsley, Armin Schmidt and Steve Dockrill</i>	
Oberlausitz. A GIS-based Medieval landscape modelling of the Sorbian/German region	207
<i>George Indruszewski</i>	
From hypothesis to survey, from survey to excavations and back to hypothesis: the conclusions of 10 years of work in the amphorae workshop at Sinope-Demirci	209
<i>Dominique Kassab Tezgör</i>	
Geomagnetic prospection of the Early Bronze Age town of Tuttul/Tell Bi'a, Syria	211
<i>Kay Kohlmeyer, Martin Marinow, Thomas Goldmann and Bernd Kutschan</i>	
Investigation of agricultural terraces in the South of Russia	212
<i>Dmitry Korobov</i>	
Magnetic prospection of various types of large ditch enclosures (or fortifications) of prehistoric Bohemia	216
<i>Roman Křivánek</i>	
Geophysical prospection in South Abusir, Egypt, 2002	220
<i>Roman Křivánek and Miroslav Bárta</i>	
Three new circular enclosures from Slovakia	223
<i>Ivan Kuzma and Ján Tripák</i>	
The use of antenna arrays for GPR surveying in archaeology	226
<i>Jürg Leckebusch</i>	
From hypocast to hyperbola: ground penetrating radar surveys over mainly Roman remains in the United Kingdom	227
<i>Neil Linford</i>	
Integrated use of caesium vapour total field and gradiometer magnetometer surveys to maximise data recovery and archaeological interpretation: field examples from the United Kingdom	229
<i>Paul Linford</i>	
Investigations of the magnetic and electrical response of archaeological structures at the Early Neolithic site of Movila lui Deciov, Banat, Romania	231
<i>J.M. Maillol, D.L. Ciobotaru and I. Moravetz</i>	
Results of high-resolution magnetic and tomographic seismic surveying at the Saqqara archaeological site, Egypt	232
<i>M. Metwaly, A. Green, H. Horstmeyer, A.Gh. Hassaneen, A. Abbass and M. al-Gamili</i>	
Tell prospection: experiences collected in Northern Syria	233
<i>Cornelius Meyer and Burkart Ulrich</i>	
The Early Neolithic monumental enclosure Weinsteig-Grossrussbach	236
<i>Wolfgang Neubauer, Michael Doneus, Alois Eder-Hinterleitner and Klaus Löcker</i>	
Magnetic survey of the Viking Age settlement of Haithabu, Germany	239
<i>Wolfgang Neubauer, Alois Eder-Hinterleitner, Sirri Seren, Helmut Becker and Jörg W.E. Fassbinder</i>	

GPR survey for detecting post-hole houses: two examples of surveys for the identification of low-contrast soil structures	241
<i>Yasushi Nishimura</i>	
Gradiometer survey for detecting the ancient remains distributed northeast of the Djoser pyramid, Saqqara, Egypt	242
<i>H. Odah, T.F. Abdallatif, I.A. al-Hemaly and E. Abd All</i>	
New methods for archaeological site detection in Egypt <i>via</i> satellite imagery analysis: case studies from Sinai and the Delta	243
<i>Sarah H. Parcak</i>	
Results of magnetic survey in Deir al-Barsha, Middle Egypt	245
<i>Christoph Peeters and Tomasz Herbich</i>	
Beaming into Hollywood	248
<i>John Peukert</i>	
High-resolution GPR surveys for the study of <i>domus del Centenario</i> , Pompeii, Italy . . .	249
<i>Salvatore Piro</i>	
The application of electromagnetic profilings in archaeology – case study of Cieszacin Wielki grave mounds, Poland	250
<i>Artur Poreba, Bogdan Zogala, Kazimierz Klimek, Maria Lanczont and Jolanta Nogaj-Chachaj</i>	
The 2002 magnetometer survey at the Early Islamic city of Kharab Sayyar in Northeast Syria	252
<i>Martin Posselt</i>	
Early Neolithic settlements in Germany and Poland. Latest results of a magnetometer survey approach to the investigation of Early Neolithic architecture and settlement patterns throughout Central Europe	254
<i>Martin Posselt and Thomas Saile</i>	
Archaeological prospection in the Hyksos capital of Avaris using geoelectric resistance imaging	257
<i>G. al-Qady, N. Soliman, A. Taha and J. Dorner</i>	
Synergic use of very high resolution geophysical methods to delineate the archaeological strata of the Phoenician site of Neapolis, Sardinia, Italy	257
<i>G. Ranieri, P.G. Spanu, R. Zucca, G.P. Deidda, R. Deiana, S. Erriu and M. Nuvoli</i>	
A proposed method for the robust classification of texture in magnetic survey data . . .	258
<i>Anne Roseveare and Martin Roseveare</i>	
Inline quality assessment for data processing in archaeological geophysics	259
<i>Anne Roseveare and Martin Roseveare</i>	
Geophysical survey in the archaeological record: the Archaeological Investigations Project	261
<i>Bronwen Russell and Tim Darvill</i>	
Using induced polarization (IP) for the mapping of wooden plankways	262
<i>Norbert Schleifer and Andreas Weller</i>	
The lost village of Tidover – magnetic susceptibility survey as part of a sequential prospection strategy	265
<i>Armin Schmidt</i>	

Geomagnetic surveys at the PPNA site of Dhra', Jordan	266
<i>Mark R. Schurr, Ian Kuijt and William Finlayson</i>	
A contribution to archaeological prospection in Lower Saxony, Germany, illustrated by some recent geophysical surveys	269
<i>Christian Schweitzer</i>	
Mapping buried archaeological remains using GPR surveys at the Isis temple, Bahbeit el-Hegara area, Nile Delta, Egypt	272
<i>F.A. Shaaban, F.F. Shaaban, A.M. Abbas and A.H. al-Essawy</i>	
Historical analysis and geophysical surveys to define remains of ancient stone buildings	273
<i>Zakhar Slepak and Gulchachak Nugmanova</i>	
The interpretation of aerial photographs in the Linzi Project	276
<i>Baoquan Song</i>	
Magnetic survey on the acropolis of Pisidian Antioch	278
<i>Mehmet Taşlıalan, Roger S. Bagnall, Tatyana Smekalova and Sergey Smekalov</i>	
First comparative test of magnetic viscosity and magnetic susceptibility mapping	280
<i>Julien Thiesson, Eric Marmet and Alain Tabbagh</i>	
Surveying in Egyptology	281
<i>Břetislav Vachala and Jaromír Procházka</i>	
The geophysical assessment of the Myers Wood iron-working complex near Huddersfield, England: fiction (?) then fact	282
<i>R. W. Vernon, J. G. McDonnell, A. Schmidt, A. Powell, E. Godfrey and B. Spence</i>	
Prospection with the new FM 256 fluxgate gradiometer system and other instrumental techniques	285
<i>A.R. Walker</i>	
Getting more from our data through data fusion and modelling	287
<i>Meg Watters</i>	
Testing multi-spectral airborne remote sensing for detecting archaeological sites under the sands of the Inner Hebrides of Scotland	287
<i>Sandy Winterbottom and Tom Dawson</i>	
List of authors	289

BOOK REVIEW

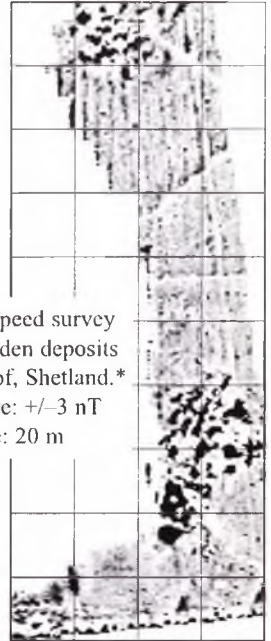

<i>Cornaline de l'Inde. Des pratiques techniques de Cambay aux techno-systèmes de l'Indus.</i> Edited by Valentine Roux	301
<i>(Paul Barford)</i>	

Archaeologia Polona is regularly indexed in the International Bibliography of the Social Sciences; in IBZ – International Bibliography of Periodical Literature; IBZ – CD-ROM; IBR – International Bibliography of Book Reviews of Scholarly Literature; IBR – CD-ROM. Articles contained in *Archaeologia Polona* are indexed in electronic bibliography ANTHROPOLOGICAL INDEX ONLINE (<http://rai.anthropology.org.uk>).

FM256

Upgrades from FM18/36
to FM256 also available

Single/Dual Fluxgate Gradiometer System

Double speed survey
over midden deposits
at Jarlshof, Shetland.*
Plot range: ± 3 nT
Grid size: 20 m

FM256 Features

- 256000 reading data logger
- Fast download: 15 minutes
- Square/rectangular grids 10–100 m
- Sample interval: 1–16 samples/m
- Logged resolution down to 0.05 nT
- External compartment for battery
- NiMH battery, 4 hour fast charge

Dual Gradiometer System

- Flexible: use 2 instruments together for double speed/increased density surveys or use 2 instruments separately at different sites
- Master/slave system accepts FM 18/36 or FM256 slave
- Interleaving gives high resolution 0.5 m or 0.25 m traverse intervals
- Simple data merge facility in Geoplot
- Open frame design gives rapid operator turn-around (not system) for zig-zag surveys, avoiding introduction of heading errors

Other Products: RM15 Resistance meter system, MPX15 Multiplexer, Geoplot software

Heather Brae, Chrisharben Park, Clayton, Bradford, West Yorkshire BD14 6AE. UK

Grad601 Magnetic Gradiometer for Archaeological Prospecting

Roman/British site 90m x 120m
scaled to +/-3nT

Grad601-2
dual gradiometer

- High stability
- 0.1nT resolution
- 1m sensors for deep features
- Single or dual gradiometer
- Electronic adjustment
- Large memory
- Fast download
- Survey and scanning modes

MS2 magnetic susceptibility system is also available.

Only one archeological survey tool can give you all this!

The G-858 MagMapper™ offers superior speed, reliability and ease of use for all magnetometer survey projects, but that's not all.

It also serves as a digital data acquisition system for the OhmMapper™ resistivity system, the MetalMapper™ metal detector, Geonics EM61 and integrates seamlessly with a GPS for a complete, multi-parameter mapping system, for the fastest, easiest, and most diagnostic archeological surveys. Our mapping and interpretation software turns your PC into a personal interactive geophysical workstation.

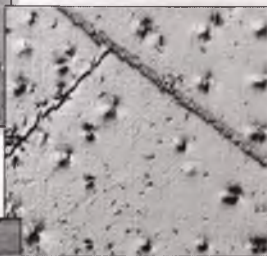

For archeology, UXO surveys, hazardous waste, utility locating, and void detection, there's no better combination than the MagMapper™ system. *Great plotting and modeling software and valuable case histories are available free on our website.*

Caesium magnetometer integrated with GPS for efficient data collection.

MetalMapper™, the first metal detector to work in magnetic soil.

MagPick™ software offers profile analysis and calculation of depth to target.

OhmMapper non-contact resistivity system. Fast, easy resistivity without stakes.
