MEMORABILIA ZOOLOGICA publishes original works reporting experimental and theoretical investigations in the fields of zoocoenology, zoogeography, theoretical and evolutionary systematics and the history of zoology.

It is a fundamental condition of acceptance that submitted manuscripts have not been, and will not be, submitted or published simultaneously elsewhere.

#### INSTRUCTIONS TO AUTHORS

Manuscripts: original papers should be in the Congress languages, i.e., English (preferably), French or German. Two copies of each manuscript, typed double-spaced, with a margin on the left at least 3.5 cm wide, should be submitted. Authors are requested to make no editorial markings on their manuscripts. Papers should be arranged as follows: 1) author's name and title of paper; 2) an abstract in English of not more than 20 lines; 3) the paper, limited to 20 printed pages, including introduction, material and methods, results and discussion. Authorities should be quoted for all specific names of animals and plants once only — when the name is first mentioned in text or tables; 4) the address of the author; 5) summary (for translation into Polish and Russian).

Figures: each figure or group of figures should be planned to fit, after reduction, into one column of the text (the maximum width of a column is 12.5 cm). Figures are numbered in arabic numerals. Figure titles and legends are to be submitted together on separate sheets.

Tables: should be typed on separate sheets, numbered with arabic numerals, have brief titles and be referred to in the text as (Tab. 1), etc.

References: these should be checked with the original articles and referred to in the text by key numbers, in parentheses. They should be listed on a separate sheet with their numbers, in alphabetical order and in the form used in the current number of the journal. Titles of journals should be abbreviated according to the World List of Serials.
