II. *Lycidae* (Coleoptera)

Список дескрипционных типов хранящихся в Зоологическом
Институте Польской Академии Наук в Варшаве ¹.

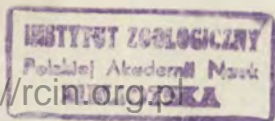

II. *Lycidae* (Coleoptera)

List of type specimens in the collection of the Institute of
Zoology of the Polish Academy of Sciences in Warszawa¹.

II. *Lycidae* (Coleoptera)

The list includes the following type specimens upon which species or lower taxa were established: 1) holotypes, 2) allotypes, 3) syntypes, 4) paratypes. These names of the various groups of types are based on international regulations now in force, irrespective of how they were termed in either the particular collection or the original publication. The specimens included in the list are numbered for inventorial purposes in the following way: separate successive numbers are given to the holotype, allotype and to each series

¹ In fulfilment of Decision No. 150 of the XIV International Zoological Congress at Copenhagen, the Institute of Zoology of the Polish Academy of Sciences has started to publish lists of type specimens in the collection of the Institute. The Decision reads as follows: „150. „Recommendation” that institutions possessing type specimens should publish lists of such specimens in their possession: The Colloquium recommends the addition to Article 31 of the following Recommendation: — All

Р. 0. 5. 5

of syntypes or of paratypes, specimens coming from the same locality being considered as one series. The labels used for this purpose are made of red paper and bear the following inscription in print: „Inst. Zool. P. A. N. Warszawa (or Kraków, Poznań, Łódź) — Holotypus (alternatively Allotypus, Syntypus, Paratypus) — Nr. ...”; the number is marked in black India ink.

The list is arranged in alphabetic order. The particular entries are given as follows: the name of the species, quoted strictly according to the original description, is followed by the name of the author of the species or infraspecific taxon, then the year of publication of the description and the page. The name of the author and the year refer to the list of literature; consequently, it was sometimes necessary to add letters after the year, e. g., 1926a, 1926b, 1926c, etc. Next follows the number of type specimens, and the designation of the type specimen or specimens used in the original collection (when this term is incorrect, the correct term is added in square brackets). Further the inventorial number follows, in brackets, and the locality from which the given specimen originates. When necessary, notes relating to the condition of the specimen are given at the end.

The list is based on the material found in the collection and that is why some type specimens might have been omitted if they have not been marked in some way or other in the collection. On the other hand, numerous specimens are marked „type”, or the like, and yet they are not type specimens:

Institutions maintaining zoological collections should prepare and publish lists of type material in their possession.”

This is also in agreement with the recommendations of the International Council of Museums of the UNESCO, published in the booklet:

SWINTON W. E. 1955. Spécimens-types en botanique et en zoologie. Recommandations à l'usage des Musées d'Histoire Naturelle et des Musées mixtes. Paris, V+12 pp.

This list is the second of a series of similar lists to be compiled by various authors. The main object of these lists is to provide zoologists with information relating to type specimens in the collection of the Institute of Zoology of the Polish Academy of Sciences. At the same time they will form a published inventory of type specimens in the possession of the Institute.

this is the case with unpublished names (MS-names), as well as in cases when the author of the collection was forming his own „collection types”, and in some other instances. In view of these difficulties, every entry of the list was meticulously checked against the corresponding literature and, when a reliable check up was impossible, it was omitted. In cases when checking with literature was not sufficient, the history of the specimen was not infrequently tediously traced as far as possible. All doubtful entries were left out; if cleared up in the future, they will be published later as a supplement to the present list.

The list comprises 1236 type specimens of the family *Lycidae*, grouped in 700 entries.

Lycidae

- Acantholyceus clarus* KLEINE, 1940a: 251. 1 Co-Typus [paratype] (No. 57) from Mulungu, Kivu, in the Belgian Congo.
- Acantholyceus vividus* KLEINE, 1939c: 258. 1 [paratype] (No. 58) from Nairobi in Kenya.

- Adoceta Turneri* PIC, 1934a: 127. 1 Cotype [syntype] (No. 61) from Kaimosi in Africa.
- Adoceta ugandanensis* KLEINE, 1933a: 17. 1 Co-Typus [allotype] (No. 62) from Bwamba Pass in Uganda.
- Bulenides adumbratus* KLEINE, 1926k: 84. 1 Type [holotype] (No. 63) from Butuan, Mindanao, 1 [allotype], (No. 64) from Mt. Banahao, Luzon, 1 [paratype] (No. 65) from Mt. Makiling, Luzon, 1 [paratype] (No. 66) from Mr. Limay, Luzon, 1 [paratype] (No. 67) from Surigao, Mindanao, 1 [paratype] (No. 68) from Cuernos Mts, Negros, and 1 [paratype] (No. 69) from Sibuyan Island.
- Bulenides adventicus* KLEINE, 1926k: 84. 1 Type [holotype] (No. 70) from Kolambagan, Mindanao, 1 Typus [allo-

- type] (No. 71) from Butuan, Mindanao, 2 [paratypes] (No. 72) from Butuan, Mindanao, 1 [paratype] (No. 73) from Surigao, Mindanao and 1 [paratype] (No. 74) from Iligan, Mindanao.
- Bulenides aridus* KLEINE, 1926b : 152. 2 Co-Typus [syntypes] (No. 75) from Penang.
- Bulenides aterrimus* KLEINE, 1926k : 83. 1 Typus [allotype] (No. 76) from Cuernos Mts, Negros.
- Bulenides bicoloratus* KLEINE, 1930f : 351. 1 Type [holotype] (No. 77) from Anai Kloof, Sumatra.
- Bulenides duplicatus* KLEINE, 1928b : 320. 1 Type [holotype] (No. 78) from Mt. Tibang, Borneo.
- Bulenides flavoreticulatus* KLEINE, 1932b : 155. 1 Co-Typus [paratype] (No. 79) from Lumu Lumu, Mt. Kinabalu, Borneo.
- Bulenides imitator* KLEINE, 1930k : 95. 1 [paratype] (No. 80) from Perak Mts.
- Bulenides longeaerolatus* KLEINE, 1936e : 132. 1 Typus! [holotype] (No. 81) from Tangkoeban Prahoe, Preanger, Java.
- Bulenides nebulosus* KLEINE, 1930f : 350. 1 Type [holotype] (No. 82) from Penang.
- Bulenides philippinensis* KLEINE, 1930f : 351. 1 Type [holotype] (No. 83) from Surigao, Mindanao.
- Bulenides pudicus* KLEINE, 1931a : 257. 1 Type [holotype] (No. 84) from Toegoe, Java.
- Bulenides reticulatus* KLEINE, 1930f : 352. 1 Type [holotype] (No. 85) from Zamboanga, Mindanao.
- Bulenides Sijthoffi* KLEINE, 1926b : 149. 1 Co-Typus and 1 unmarked [both syntypes] (No. 86) from Preanger, Java.
- Bulenides socius* KLEINE, 1935e : 311. 1 Co-Typus [paratype] (No. 87) from Kokoda, New Guinea.
- Bulenides triangularis* KLEINE, 1930f : 351. 1 Type [holotype] (No. 88) from Quop, Sarawak, Borneo.
- Calleros curtelineatus* PIC, 1934b : 135. 1 Type and 1 unmarked [both syntypes] (No. 89) from Costa Rica.
- Calleros maculatipes* PIC, 1934a : 128. 1 Type [syntype] (No. 90) from Bolivia.
- Calleros mediofasciatus* PIC, 1933d : 122. 1 Typus [syntype] (No. 91) from Rio Grande do Sul, Brazil.

- Calleros purgatus* KLEINE, 1942c : 160. 2 Co-Types [paratypes] (No. 92) from Maracay, Venezuela.
- Calochromus bicoloratus* KLEINE, 1926a : 18. 1 Type [syntype] (No. 93) from Fort de Kock, Sumatra.
- Calochromus bifasciatus* KLEINE, 1941a : 233. 1 Co-Typus and 1 unmarked [both paratypes] (No. 94) from Kausani, Almora, Uttar Pradesh, India.
- Calochromus cerberus* KLEINE, 1941a : 234. 1 Co-Typus [paratype] (No. 95) from Terbakar, Cameron Highlands, Pahang.
- Calochromus conveniens* KLEINE, 1926k : 41. 1 Type [holotype] (No. 96) from Cuernos Mts, Negros, 1 [allotype] (No. 97) from Cuernos Mts, Negros, 1 [paratype] (No. 98) from Mt. Isarog, Luzon, 1 [paratype] (No. 99) from Sibuyan Island, 2 [paratypes] (No. 100) from Surigao, Mindanao, 2 [paratypes] (No. 101) from Iligan, Mindanao, 1 [paratype] (No. 102) from Dapitan, Mindanao, 1 [paratype] (No. 103) from Kolambugan, Mindanao and 1 [paratype] (No. 104) from Zamboanga, Mindanao.
- Calochromus costulatus* KLEINE, 1928a : 260. 1 Cotype [paratype] (No. 105) from Gulmarg, Kashmir and 1 [paratype] (No. 106) from Sadiya, Assam.
- Calochromus cyanescens* KLEINE, 1930k : 101. 1 Co-Typus [paratype] (No. 107) from Cameron Highlands, Malaya.
- Calochromus densecostatus* KLEINE, 1930h : 288. 1 Co-Typus [paratype] (No. 108) from Chiengmai, Siam.
- Calochromus dilatatus* KLEINE, 1935e : 318. 1 Typus! [holotype] (No. 109) from New Guinea.
- Calochromus diversus* KLEINE, 1925c : 31. 1 Co-Type [paratype] (No. 110) from Buru.
- Calochromus dolosus* KLEINE, 1939a : 11. 1 Type [holotype] (No. 111) from Mt. Matang, Sarawak, Borneo.
- Calochromus Drescheri* KLEINE, 1936e : 139. 1 Typus [holotype] (No. 112) from Tankoeban Prahoe, Preanger, Java.
- Calochromus firmus* KLEINE, 1939a : 10. 1 Typus [holotype] (No. 113) from Sandakan, Borneo.
- Calochromus fraterculus* KLEINE, 1939d : 20. 1 Paratypus (No. 114) from Kambaiti in Burma.
- Calochromus imitator* KLEINE, 1927a : 294. 1 Co-Typus and 1 unmarked [both paratypes] (No. 115) from Madang, Borneo.

- Calochromus kashmirensis* KLEINE, 1928a : 259. 1 Type [holotype] (No. 116) from Uri, Kashmir and 2 [paratypes] (No. 117) from Gulmarg, Kashmir.
- Calochromus longepectinatus* KLEINE, 1939a : 10. 1 Type [holotype] (No. 118) from Sandakan, Borneo.
- Calochromus luzonicus* KLEINE, 1932a : 572. 1 Co-Typus [paratype] (No. 119) from Benguet, Baguio, Luzon.
- Calochromus macropalpis* KLEINE, 1926k : 40. 1 Type [paratype] (No. 120) locality not given.
- Calochromus malayensis* KLEINE, 1932c : 120. 1 Co-Typus [paratype] (No. 121) from Bukit Kutu, Selangor, Malay Peninsula.

STRESZCZENIE

Wykonując uchwałę XIV Międzynarodowego Kongresu Zoologicznego odbytego w r. 1953 w Kopenhadze, a także idąc w myśl zaleceń Międzynarodowej Rady Muzeów przy UNESCO, opublikowanych w r. 1955, Instytut Zoologiczny Polskiej Akademii Nauk przystąpił do publikowania wykazów typów opisowych przechowywanych w jego zbiorach.

Niniejszy wykaz jest drugim z serii i podaje typy opisowe z rodziny *Lycidae* (*Coleoptera*). Obejmuje on 1236 okazów typowych zgrupowanych w 700 pozycjach wykazu.

РЕЗЮМЕ

Исполняя решение XIV Международного Зоологического Конгресса состоявшегося в 1953 г. в Копенгагене, и согласно предложению Международного Совета Музеев при ЮНЕСКО, опубликованному в 1955 г., Зоологический Институт Польской Академии Наук начал публиковать списки дескрипционных типов находящихся в его коллекциях.

Настоящий список является вторым из этой серии и приводит дескрипционные типы из семейства *Lycidae* (*Coleoptera*). Он содержит 1236 типичных экземпляров сгруппированных в 700 пунктах списка.
