Abstract. The type specimens of *Hemiptera-Auchenorrhyncha* of the family *Lophopidae*, *Nogodinidae*, and *Ricaniidae*, preserved in the Museum and Institute of Zoology of the Polish Academy of Sciences in Warsaw, are listed.

Key words. *Hemiptera*, *Auchenorrhyncha*, *Lophopidae*, *Nogodinidae*, *Ricaniidae*, type specimens.

INTRODUCTION

The following list includes type specimens of 40 nominal species, subspecies and varieties of family *Lophopidae*, *Nogodinidae*, and *Ricaniidae* preserved in the Museum and Institute of Zoology of the Polish Academy of Sciences (MZPW) in Warsaw.

The family *Lophopidae* is represented by 4 nominal species described by SCHMIDT and FENNAH. The family *Nogodinidae* is represented by 10 nominal species and 2 nominal varieties described by SCHMIDT. The family *Ricaniidae* is represented by 21 nominal species and 3 nominal varieties described by SCHMIDT, JACOBI and STÅL.

The list is arranged alphabetically by family, genera and species according to the names in original descriptions. The species name is followed by the author and bibliographic citation. The contents of individual labels are limited by quotation marks and separated by the comma.

The specimens included in the list are individually numbered and labelled for an inventory purposes. All specimens have two museum registration labels attached. One of them is white and bear the inscription

in print: "Mus. Zool. Polonicum Warszawa [accession No]" or "Inst. Zool. PAN Warszawa [accession No]", the second one is red with the following inscription in print: "Mus. Zool. Polonicum Warszawa Typus n. [museum type number] [original name, author and year] [kind of the type]".

All the data published in the list are being simultaneously recorded in a computer data base in the Zoological Museum, and potential borrowers of the specimens may refer both to the name or to the number of particular specimen they want to borrow for study.
