ROCK ART STUDIES: NEW APPROACHES

**Symposium 1A of the
1995 International Rock Art Congress
Pinerolo-Torino, Italy 30 August-8 September.**

The symposium *Rock art studies: new approaches* will concentrate on taking a fresh look at studying prehistoric imagery. Creating new analytical models taking the discipline into the 21st century will involve a significant rejuvenation of analytical methodology and epistemological rigour.

Among the topics likely to be covered in this symposium are technological studies and physicochemical analyses; the identification of various types of residues (for instance binders, proteins lipids, extenders etc. in rock paints, organic inclusions in mineral accretions over petroglyphs); software of image analysis and manipulation; nano-stratigraphy of paints; new developments in direct dating of rock art; microscopic study and 'internal analysis' of tool marks in rock art and portable art; discrimination of anthropic and non-anthropic marks on rock and portable objects, and relevant ethology; replication studies; erosion and micro-erosion studies; relationships between phylogenetic and ontogenetic development of logic and symbolism; the psychology of iconicity and its decipherment; concepts of type and typicalness in prehistoric art, symbolism and psychology; distinction between mental and artistic representations; the application of taphonomic logic at both technical and epistemic levels; epistemology in the formulation of theories and in the interpretation of palaeoart; valid applications of statistics in the discipline; sound utilization of universals in palaeoart studies; and other experimental approaches. Contributions are invited from many disciplines, ranging from paleobotany to mathematics, biology to geography, to assist palaeoart specialists in establishing comprehensive new approaches for the rigorous study of prehistoric art. An initial aim of the symposium is to discuss and compare the potentials of new approaches.

To facilitate constructive dialogue among those wishing to partake in these new developments, the participation of cultural anthropologists, psychologists, linguists, neurophysiologists, epistemologists and semioticians is strongly encouraged. Methods of reasoning relevant to the discipline will be elucidated, and the areas of possible collaboration with other disciplines defined. In the past, the study of palaeoart has become unduly isolated among the disciplines concerned with human antiquity. However, common objectives should facilitate common approaches. Innovative work usually results from interdisciplinary collaboration in a scientific community. It is the objective of this symposium to reinforce this tradition and to develop future approaches in all facets of the discipline.

The role of this symposium will not merely be that of a theoretical forum, hypothesizing about future directions. An integral component will be an exhibition of specialized scientific equipment and technologies which are envisaged to play a role in the new research directions in palaeoart studies. Currently available techniques are to be demonstrated wherever possible, and practical applications of theoretical models and methods encouraged. Mindful that delegates have to travel far to attend an international conference, and that they need to secure the greatest possible advantage in terms of practical information, the organizers are determined to provide, with the help of specialized manufacturers of equipment, the technological environment that is needed to translate the proposed theoretical models into practical research realities.

The proceedings of this symposium are to be published soon after the congress and they are expected to become a blueprint for the future development of the discipline.

PERIODICALS:

ARCHAEOLOGIA POLONA (in English)

The Polish archaeological annual journal intended for an international audience. Its main purpose is to present a wide range of various approaches to the most important problems of contemporary archaeology. The editorial policy is to produce monothematic volumes.

30, 31. Vols XXIX (1991) and XXX (1992)

each 25 \$ US

ARCHEOLOGIA

(in English, French, German, Polish with English abstract)

The annual edited since 1947. It deals with classical archaeology and the ancient culture. Its aim is to present general studies, field reports, publications of finds and monuments, reviews.

32, 33, 34. Vols XLI /1990/, XLII /1991/, XLIII /1992/

each 30 \$ US

ARCHEOLOGIA POLSKI (in Polish with English abstract, German, English)

Semi-annual published since 1957. It publishes original studies on the archaeology with special concern of Polish lands until 14th century, on methods and methodology of research, discussions and polemics.

35, 36. Vols XXXV: 1990, iss. 1 & 2

each 20 \$ US

37. Vol. XXXVI: 1991, iss. 1/2

double iss. 40 \$ US

ETHNOLOGIA POLONA (in English)

The annual published since 1975. It includes materials written by Polish and foreign scholars.

38. Vol. 15/16 (1991)

25 \$ US

ETNOGRAFIA POLSKA

“Polish Ethnography” is a semi-annual. It publishes on Polish, world and general subjects, the last volume XXXVI/2 is devoted to Quincentenary of discovery of America.

39, 40, 41, 42. Vols XXXV, iss. 1 & 2 (1991), XXXVI, iss. 1 & 2 (1992)

each 20 \$ US

KWARTALNIK HISTORII KULTURY MATERIAŁNEJ (in Polish with English, German and French summaries)

“History of Material Culture Quarterly” is a scientific journal published by the Institute. It presents the issues connected with the history of Polish and European civilisation from its dawn to the 20th century, from the point of view of archaeology and social history. It discusses the most interesting interdisciplinary problems.

“Quarterly” publishes texts concerning the history of craft, industry and agriculture, history of material culture, industrial archaeology and other fields.

43–51. Vols XXXIX, iss. 1–4 (1991); XL, iss. 1–4 (1992); XLII, iss. 1–4 (1993)

per year 40 \$ US

POLISH ARCHAEOLOGICAL ABSTRACTS (in English)

The annual of the Institute, published since 1972. It contains shorts summaries of works concerning archaeology, published in Poland.

52, 53. Vols. 19 (1991) & 20 (1993)

each 25 \$ US

PRZEGŁAD ARCHEOLOGICZNY (“Archaeological Review” – in English, German, Polish)

The annual of the Institute founded in 1919, publishes studies on the archaeology with special concern of Polish archaeological research. It contains approximately 180 pages presenting general studies, publications of finds and monuments, reviews, includes drawings, maps and photographs.

54, 55, 56. Vols 38 (1991), 39 (1992) & 40 (1993)

each 25 \$ US

SPRAWOZDANIA ARCHEOLOGICZNE (“Archaeological Reports” – in Polish, summaries in English)

The annual of the Institute, contains field reports, publications of archaeological finds and monuments in Poland.

57, 58, 59. Vols XLII (1990), XLIII (1991) XLIV (1992), XLV (1993)

each 20 \$ US
