Polish Herbaria

Polish plant collections of scientific value - over one million numbers gathered in 54 institutional herbaria situated in Poland. Only twelve of them were listed in the last issue of *Index Herbariorum*.

MIREK Z. 1990. Polish Herbaria. *Polish Botanical Studies. Guidebook Series 2: 3-73.* Kraków. PL ISSN 0867-0749.

Polish plant collections with total amount of *ca* 3.5 million numbers gathered in 54 institutional herbaria and nine private. Only twelve of them were listed in the last issue of 'Index Herbariorum'.

W opracowaniu scharakteryzowano polskie zbiory zielnikowe liczące w sumie około 3,5 mln numerów zgromadzonych w 54 zielnikach należących do różnych instytucji państwowych i w 9 będących własnością prywatną. Jedynie 12 spośród nich wymienia ostatni międzynarodowy „Index Herbariorum”.

Zbigniew Mirek. Institute of Botany, Polish Academy of Sciences, Lubicz 46, PL-31-512 Kraków, Poland

Contents • Treść

Introduction – Wprowadzenie	4
Institutional herbaria	18
Private herbaria	65
Index to persons	68
Index to important collections (names of collectors and geographical regions)	72

A review of the plant collections in Polish herbaria presented in the following directory is based on the data gathered by the Committee of Botany of the Polish Academy of Sciences in 1984. They have been subsequently supplemented and updated by the author (Tab. 1). As a result, information on 54 institutional and nine private herbaria have been completed. In comparison to the latest issue of 'Index Herbariorum' (Holmgren *et al.* 1981), which includes information on twelve Polish herbaria only, this is a considerable increase of particulars on other herbaria in the country.

The institutional herbaria in Poland are associated with universities (15), agricultural academies (14), regional museums (8), teachers colleges (5), the Polish Academy of Sciences (4), medical academies (3), the Ministry of Forestry (3) and others (2). They are located in 30 towns and spread more or less evenly throughout the country (Fig. 1). The majority of them was established after the World War II (Fig. 2) and these are mostly small herbaria. Only a few older herbaria are relatively larger ones (Fig. 3). The largest botanical collections are presently in Kraków, which is the main botanical centre in the country. Altogether in this town five institutional and three private herbaria total over 1 million specimens (Fig. 4). In totals Polish herbaria hold approximately 3.411.000 sheets including about 2.525.668 sheets

Charakterystyka polskich zbiorów zielnikowych zawarta w niższym opracowaniu oparta jest na informacjach zebranych przez Komitet Botaniki PAN w 1984 roku oraz danych ankietowych uzyskanych przez autora opracowania. W wyniku otrzymano informacje o 54 zielnikach związanych z instytucjami państwowymi, spośród których tylko 12 wymienia ostatni „Index Herbariorum” (Holmgren *et al.* 1981), oraz o 9 zielnikach prywatnych (Tab. 1).

Wspomniane 54 zielniki związane są z następującymi instytucjami: uniwersytety (15), akademie rolnicze (14), wyższe szkoły pedagogiczne (5), akademie medyczne (3), muzea regionalne (8), placówki PAN (4), placówki podległe Ministerstwu Leśnictwa (3) oraz inne (2). Wszystkie wspomniane zielniki grupują się w trzydziestu ośrodkach i są mniej więcej równomiernie rozmieszczone na terytorium kraju (Ryc. 1). Większość z nich to zbiorы młode, powstałe dopiero po II wojnie światowej (Ryc. 2.). Zaledwie kilka zielników posiada większe zbiorы (Ryc. 3.). Pod względem sumarycznej wielkości zbiorów (Ryc. 4.), największą kolekcję posiada Kraków (wraz z zielnikami prywatnymi około 1 000 000 arkuszy). Całość polskich zbiorów liczy 3 411 647 arkuszy, w tym 2 525 668 stanowią rośliny naczyniowe, 446 320 – mszaki, 205 703 – grzyby i śluzowce, 188 739 – porosty, 9 875 – glony (tab. 2.). Glony są naj słabiej re-

of the vascular plants, 446.320 specimens of the bryophytes, 205.703 specimens of the fungi and myxomycetes, 188.739 specimens of the lichens, and 9.875 specimens of the algae (Tab. 2). It should be noted that the collections of the algae to some extent are enriched by the collection of the algal illustrations. The algological Iconotheca in the Institute of Botany of the Polish Academy of Sciences, Kraków, includes ca. 280.000 illustrations and is one of the largest collection of this type in Europe. Distribution of collections of the particular groups is given in Figs 5-8. Most of Polish herbaria store local material from various parts of the country. Only a few herbaria including KRA, KRAM, KOR, LBL, POZ, POZG, WA, WRSL are worldwide. Type specimens are rather poorly represented in the Polish herbaria. and are present mostly in the larger ones. For example, KRA and KRAM keep over 1.000 types, LBL holds several hundreds of types (mostly lichens) and POZG has many types of African phanerogams.

The herbaria listed below are arranged alphabetically by the city. Acronyms used in Holmgren *et al.* (1981) for twelve herbaria are adopted. For the others, acronyms suggested by keepers of the herbaria have been introduced. The general scheme of characterization of the collections follows the pattern given in Holmgren *et al.* (1981), but other similar directories have been also consulted. Private herbaria have their acronyms of a diffe-

prezentowane w naszych zbiorach. W grupie tej jednak zielnik może być w pewnym stopniu zastąpiony ikonoteką. Taka centralna ikonoteka gromadzona jest w Instytucie Botaniki PAN; liczy ona około 280.000 „okazów”, (fotografii i rycin) i należy do najbardziej bogatszych w Europie. Wielkość zbiorów reprezentujących poszczególne grupy systematyczne w różnych ośrodkach ukazano na rycinach 5-8.

Większość polskich kolekcji ma charakter lokalny lub regionalny. Bogatsze materiały zielnikowe spoza Polski, a więc z innych części Europy czy z innych kontynentów znajdują się w kilku zaledwie zielnikach (KRA, KRAM, KOR, LBL, POZ, POZG, WA, WRSL). Najbardziej bogatsze w typy są zielniki krakowskie (KRA i KRAM), gdzie znajduje się ponad 1 000 typów nomenclaturalnych (głównie roślin naczyniowych i mszaków) oraz zielnik lubelski (LBL), gdzie przechowywanych jest kilkaset typów (głównie porosty i mszaki), a także kolekcja afrykańska w POZG.

Zielniki prezentowane poniżej uporządkowane są alfabetycznie według miast. Akronimy dla 12 głównych zielników przyjęto za Holmgren i in. (1981), dla pozostałych przyjęto akronimy zaproponowane przez kuratorów poszczególnych zbiorów. Zielniki prywatne mają akronimy odmiennego typu: skrót *hb.* plus trzy początkowe litery nazwiska. Prezentowana charakterystyka zielników oparta jest na schemacie przyjętym za „Index Herbariorum” (Holmgren

rent type: abbreviation *hb.* plus three beginning letters of the owner's family name.

Abbreviations used in the text:

BOT GARDEN	botanical garden
CUR	curator
CUR PROCED	curatorial procedure
GEOGR AREA	geographical area
P & S WORKS	periodical and serial works

Acknowledgments. I am greatly indebted to Professor Kazimierz Browicz, Directors of institutions consulted and Keepers of the herbaria for information on collections (see Table 1). I am also very grateful to Prof. dr. Jan Kornaś for critical comments on the manuscript, and to Lucyna Musiał M. Sc. for technical assistance.

i in. 1981) oraz „Compendium of Bryology” (Vitt *et al.* 1985).

Skróty użyte w tekście:

BOT GARDEN	ogrod botaniczny
CUR	kurator
CUR PROCED	sposób przechowywania zbiorów
GEOGR AREA	obszar geograficzny
P & S WORKS	periodyki i wydawnictwa seryjne

Podziękowania. Autor dziękuje serdecznie Profesorowi Kazimierzowi Browiczowi oraz Dyrektorom i Kierownikom wszystkich instytucji posiadających zbiory zielnikowe a także ich Kustoszom za przesłane informacje (patrz Tab. 2.). Pragnie również wyrazić podziękowanie Prof. dr J. Kornasiowi i Recenzentom za krytyczne uwagi i sugestie, a także koleżance mgr Lucynie Musiał za pomoc w przygotowywaniu tekstu do druku.

INSTITUTIONAL HERBARIA

BIAŁOWIEŻA • *Department of Nature Protection, Forest Research Institute (Zakład Ochrony Przyrody, Instytut Badawczy Leśnictwa) – BIL*

ADDRESS • 17-230 Białowieża; tel. 123-96

FOUNDATION • institution – 1930; herbarium – 1962

SPECIMENS • total 76.230 [vascular plants – 68.000; bryophytes – 7.980; lichens – 250]

GEOGR AREA • regional collection from NE Poland

DIR & CUR • Prof. Dr. ALEKSANDER W. SOKOŁOWSKI (flora and vegetation of NE Poland, nature protection)

RESEARCH • chorology of vascular plants and forest communities in NE Poland

LOAN • to recognized botanical institutions

EXCHANGE • available – plants from NE Poland; wanted – synanthropic newcomers in Europe and European xerothermic species

CUR PROCED • specimens are mounted on herbarium sheets and stored in metal boxes in holders in numerical order.
Sheet size: 28 x 42 cm

BIAŁOWIEŻA • *Białowieża Geobotanical Station, Warsaw University (Białowieska Stacja Geobotaniczna, Uniwersytet Warszawski) – BSG*

ADDRESS • 17-230 Białowieża; tel. 125-48; 124-79

FOUNDATION • institution – 1952; herbarium – 1959

SPECIMENS • total 10.800 [vascular plants – 6.600; bryophytes – 1.200; lichens – 3.000]

GEOGR AREA • local collection from Białowieża Forest and some forest and non-forest complexes in NE Poland

DIR & CUR • Prof. Dr. JANUSZ B. FALIŃSKI (ecology, geobotany, phytosociological cartography, synanthropic flora and vegetation, nature protection)

RESEARCH • vegetation and plant population dynamics

LOAN • to recognized botanical institutions

EXCHANGE • not carried

CUR PROCED • specimens are filed on herbarium sheets and stored in cardboard boxes. Sheet size: 28 x 42 cm

BOT GARDEN • experimental garden 1 ha

P & S WORKS • *Phytocoenosis*

BIELINY • *Research Laboratory and Museum, Świętokrzyski National Park (Pracownia Naukowo-Badawcza i Muzeum, Świętokrzyski Park Narodowy) - SKPN*

ADDRESS • Święty Krzyż, 26-004 Bieliny; tel. Nowa Słupia 87

FOUNDATION • institution - 1950; herbarium - 1977

SPECIMENS • total 1.219 [vascular plants - 972; lichens - 247]

GEOGR AREA • local collection (vascular plants and lichens from the Świętokrzyski National Park)

HEAD & CUR • Dr. Eng. RYSZARD KAPUŚCIŃSKI (vascular plants - floristics, forest botany)

LOAN • not available at present

EXCHANGE • available - plants from the Świętokrzyskie Mts

CUR PROCED • specimens are filed on herbarium sheets and stored in cardboard boxes. Sheet size: 28 x 43.5 cm

BOLESTRASZYCE • *Department of Physiography and Arboretum in Bolesraszyce, Society of the Friends of Sciences in Przemyśl (Zakład Fizjografii i Arboretum w Bolesraszycach, Towarzystwo Przyjaciół Nauk w Przemyślu) - BDPA*

ADDRESS • Bolesraszyce 130, 37-722 Wyszatyce; tel. 179-25

- FOUNDATION** • institution – 1976; herbarium – 1984
- SPECIMENS** • total 7.386 [vascular plants – 6.758; lichens – 628]
- GEOGR AREA** • vascular plants and lichens from SE Poland; *Trapa* from Poland
- DIR & CUR** • Doc. Dr. JERZY PIÓRECKI (floristics, vascular plants and lichens, ecology of *Trapa*)
- STAFF** • M. Sc. JÓZEF HORDOWIAK (floristics, lichens)
- RESEARCH** • aquatic macrophytes, lichens of SE Poland; rare and endangered vascular plant species in SE Poland; ecology of *Trapa*
- LOAN** • not available at present
- EXCHANGE** • available and wanted – rare vascular plants from SE Poland and lichens of the East Carpathians
- BOT GARDEN** • Arboretum 9 ha

- BYDGOSZCZ** • *Department of Botany and Ecology, Agricultural Faculty, Technical-Agricultural Academy (Katedra Botaniki i Ekologii, Wydział Rolniczy, Akademia Techniczno-Rolnicza) – BYDG*
- ADDRESS** • ul. Bernardyńska 6/8, 85-029 Bydgoszcz;
tel. 39-10-03 ext. 225, 238, 242
- FOUNDATION** • institution – 1969; herbarium – 1983
- SPECIMENS** • 6.000 [vascular plants only]
- GEOGR AREA** • regional collection
- DIRECTOR** • Prof. Dr. EUGENIUSZ R. ŚPIEWAKOWSKI (hydrobotany)
- CURATOR** • M. Sc. BEATA DĄBROWSKA (agroecology)
- STAFF** • M. Sc. EWA KRASICKA (agrophytocoenology)
M. Sc. MACIEJ KORCZYŃSKI (synanthropic plant associations, urban ecology)
M. Sc. BOGNA PACZUSKA (hydrobiology)
Dr JÓZEF PIASECKI (agroecology)
M. Sc. ANNA SPANIDIS (hydrobiology)
Dr MARIA WIELICKA (agroecology)
- RESEARCH** • flora and vegetation of the Bydgoszcz Province
- LOAN** • not available at present

EXCHANGE • *available* – plants of the Bydgoszcz Province; *wanted* – vascular plants of Central European mountains and highlands

P & S WORKS • *Zeszyty Naukowe Akademii Techniczno-Rolniczej.*

BYTOM • *Upper Silesian Museum (Muzeum Górnosłaskie)*
– MGS

ADDRESS • Plac Thaelmanna 2, 41-902 Bytom; tel. 81-82-91

FOUNDATION • institution – 1927; herbarium – 1927 (by A. Ko-
złowska)

SPECIMENS • total 23.597 [vascular plants – 12.300; bryophytes –
9.730; fungi and myxomycetes – 421; E. DRESCHER's
zooecidia and theratological collection – 950; lichens
– 196]

GEOGR AREA • local flora of the Upper Silesia and neighbouring ter-
ritories (chiefly the Silesian Beskid and the Cieszyn
Foothills)

IMPORT COLL • E. DRESCHER (zooecidia and theratological collec-
tion)

DIRECTOR • M. Sc. JÓZEF KOWALEWSKI

CURATOR • M. Sc. HENRYK DUTKA (zoology)

LOAN • limited

EXCHANGE • not carried

P & S WORKS • *Rocznik Muzeum Górnosłaskiego w Bytomiu, Se-
ria Przyroda; Komunikaty Muzeum Górnosłaskiego
w Bytomiu (Communications of the Upper Silesian
Museum in Bytom).*

CHRZANÓW • *Museum in Chrzanów (Muzeum w Chrzanowie)*
– CHRZ

- ADDRESS** • ul. A. Mickiewicza 13, 32-500 Chrzanów; tel. 51-73
FOUNDATION • institution - 1950; herbarium - 1936
SPECIMENS • total 11.103 [vascular plants - 9.620; bryophytes - 126; fungi - 1.129; lichens - 228]
GEOGR AREA • local collections from the Chrzanów District
DIRECTOR • M. Sc. JERZY MOTYKA (history)
CURATOR • M. Sc. IRENA MAZARAKI (floristics)
STAFF • M. Sc. PIOTR GRZEGORZEK (floristics)
RESEARCH • local flora, chiefly vascular plants and macrofungi
LOAN • not available at present
EXCHANGE • not carried
REMARKS • see chapter 'Private herbaria' - P. GRZEGORZEK

- GDAŃSK** • *Department of Pharmaceutical Botany, Medical Academy (Zakład Botaniki Farmaceutycznej, Akademia Medyczna) - GDMA*
- ADDRESS** • ul. K. Marksza 107, 80-416 Gdańsk-Wrzeszcz;
tel. 41-80-11, ext. 47
- FOUNDATION** • institution - 1946; herbarium - 1950
- SPECIMENS** • about 31.000 [vascular plants - 30.000; bryophytes - 1.000]
- IMPORT COLL** • bryophytes of K. LUBLINER-MIANOWSKA
- GEOGR AREA** • regional collection of vascular plants
- DIRECTOR** • Doc. Dr. HELENA TOKARZ (geobotany)
- CURATOR** • Dr MICHAŁ BULIŃSKI (geobotany, floristics)
- STAFF** • Dr. KRYSYNA SZMĘJA (vascular plant flora of N Poland - vicinity of Elbląg)
M. Sc. TADEUSZ JELINOWSKI (vascular plant flora of the Gdańsk region)
- RESEARCH** • flora and vegetation of N Poland, chiefly of the Gdańsk region
- LOAN** • to local institutions only
- EXCHANGE** • *available* - vascular plants of N Poland; *wanted* - medicinal plants from any regions of the world

CUR PROCED • specimens stored on herbarium sheets in cardboard boxes in holders or in cabinets in taxonomical order.
Sheet size: 32 x 44 cm

REMARKS • see also chapter 'Private Herbaria' - T. SULMA

GDYNIA • *Department of Plant Ecology and Nature Protection Gdańsk University (Katedra Ekologii Roślin i Ochrony Przyrody, Uniwersytet Gdańsk) - UGDA, UGDA-B, UGDA-L*

ADDRESS • ul. Czołgistów 46, 81-378 Gdynia; tel. 21-70-28 or 20-34-58, ext. 18

FOUNDATION • institution - 1971; herbarium - 1971

SPECIMENS • total 32.000 [vascular plants - (UGDA) - 28.000; bryophytes (UGDA-B) - 1.000; lichens (UGDA-L) - 3.000]

GEOGR AREA • regional collection (Gdańsk region)

HEAD & CUR • Prof. Dr. HANNA PIOTROWSKA (plant ecology)

STAFF • Dr. JACEK HERBICH (plant ecology, floristics)

Dr. MARIA HERBICHOWA (plant ecology, floristics)

Dr. WIESŁAW FAŁTYNOWICZ (lichenology - ecology, distribution and protection of lichens)

Dr. MAŁGORZATA LATALA (palynology)

Dr. RYSZARD MARKOWSKI (plant ecology, floristics)

M. Sc. JOANNA PICIŃSKA (phytology)

M. Sc. BARBARA STACHOWIAK (palynology)

Dr. JADWIGA STASIĄK (floristics, taxonomy - *Juncaceae, Linaria odora*)

M. Sc. DARIUSZ SZLACZETKO (floristics, *Orchidaceae* - taxonomy, evolution, pollination biology and distribution)

M. Sc. JÓZEF SZMĘJA (hydroecology)

RESEARCH • flora and vegetation of N Poland (chiefly of the Gdańsk region)

LOAN • to recognized botanical institutions

EXCHANGE • not carried

P & S WORKS • *Zeszyty Naukowe Wydziału Biologii i Nauk o Ziemi Uniwersytetu Gdańskiego, Seria Biologia*; from 1985 changed into *Zeszyty Naukowe Wydziału Biologii, Geografii i Oceanologii Uniwersytetu Gdańskiego, Se-*

CUR PROCED • specimens of vascular plants filed on herbarium sheets in boxes in holders in taxonomical order. Sheet size: 27 x 42 cm. Bryophytes and lichens in envelopes in cardboard boxes in holders

KATOWICE • *Department of Plant Systematics, Faculty of Biology and Environmental Protection, Silesian University (Katedra Systematyki Roślin, Wydział Biologii i Ochrony Środowiska, Uniwersytet Śląski) - KTU*

phytes, vascular plant geography and taxonomy, distribution of vascular plants in Poland, *Cerastium* in Poland)

Dr. MARIA ZAJĄC (chorology, geobotany, distribution of vascular plants in Poland)

Dr. URSZULA ZAJĄC (vascular plant geography and taxonomy, genus *Bromus* in Poland)

Dr. DANUTA ZDEBSKA (Devonian floras; evolutionary differentiation in plants)

RESEARCH • flora of Poland (all groups); chorology of vascular plants (ATPOL); pteridophytes of Africa; flora and vegetation of Mongolian mountains

LOAN • to recognized botanical institutions

EXCHANGE • available – European plants, especially Poland; wanted – plants from the Holarctic and tropical Africa, especially *Pteridophytes*

P & S WORKS • *Zeszyty Naukowe Uniwersytetu Jagiellońskiego, Prace Botaniczne; Plantae Poloniae Exsiccatae; Pteridophyta Poloniae Exsiccata; Index Seminum*

CUR PROCED • specimens of vascular plants are mounted on herbarium sheets in wooden boxes in metal holders in taxonomical order; bryophytes and fungi are filed in envelopes on herbarium sheets in wooden boxes in metal holders in alphabetical order; lichens are filed in envelopes in cardboard boxes, in metal cabinets in alphabetical order. Sheet size: 31 x 44 cm (vascular plants, fungi); 31,5 x 48 cm (bryophytes). Envelopes and boxes size respectively: 12 x 16 cm, 16 x 18 x 48 cm (lichens); myxomycetes in paper (carton) little boxes in cardboard boxes of size: 35 x 50 cm.

BOT GARDEN • Botanical Garden of the Jagiellonian University, ul. Kopernika 27, 31-501 Kraków; tel. 21-02-77

DIRECTOR • Doc. Dr. KAZIMIERZ SZCZEPANEK (palaeobotany)

STAFF • Dr. MARIA LANKOSZ-MRÓZ (cytotaxonomy of *Tripleurospermum*)

Dr. ALICJA PIEKIELKO-ZEMANEK (history of botany)

Dr. DANUTA TUMIDAJOWICZ (ecology of vascular plants)

Dr. BOGDAN ZEMANEK (floristics – vascular plants,

vascular flora of the Polish Eastern Carpathians) [In the Botanical Garden there is the Museum comprising botanical archives and about 5.000 of botanical specimens (dendrological collection, seeds and fruits, paleobotanical collection) including 1.000 specimens collected by M. RACIBORSKI in Java and about 240 specimens collected by K. JELSKI in S America. There are also 52 type specimens of parasitic fungi (M. RACIBORSKI, Java)]

REMARKS • There are preserved also two historical herbaria of the XVIII century. The first is a book of 27 sheets (24,5 x 40 cm) with 172 specimens of plants captioned with latin names. Its supposed author could be a French physician J. A. CAMELIN, professor of medicine at the Cracow Academy, who lectured medicinal botany in 1749–1774. The second herbarium consists of four unified folio volumes (32 x 44,5 cm). The I volume includes 104 sheets, vol. II – 98 sheets, vol. III – 100 sheets, vol. IV – 104 sheets. The herbarium contains 383 species of plant captioned in latin. After the title page the owner of the herbarium was ANDRZEJ BADURSKI (1740–1789), lecturer of medicine at Cracow Academy, but its probably author was PAOLO ANDREA PARENTI (1699–1771) – chemist and surgeon of the hospital Santa Maria della Vita in Bologna. For further information in this respect see: PIEKIELKO A. 1981. *Dwa osiemnastowieczne zielniki ze zbiorów Instytutu Botaniki Uniwersytetu Jagiellońskiego*. Wydawnictwo Instytutu Historii Nauki, Oświaty i Techniki Polskiej Akademii Nauk, Zakład im. Ossolińskich, Wrocław, 194 pp. In the Institute there is also stored private collection of J. KORNAŚ and A. MEDWECKA-KORNAŚ

ZIELIŃSKA. KRAM-B – about

500 types, A. ŻMUDA, M. KUC (Poland, Spitsbergen), B. SZAFRAN, R. OCHYRA (Antarctica, Africa, Europe), F. LILIENFELD, J. KRUPA, A. REHMAN, S. LISOWSKI (Africa, Asia, Europe), T. PÓCS (East Africa). KRAM-F – E. JANCZEWSKI, J. KRUPA, K. ROUPPERT, W. STEC-ROUPPERTOWA, B. NAMYSŁOWSKI, A. WRÓBLEWSKI, W. and J. ZABŁOCKI, W. WOJEWODA (*Heterobasidiomycetes* from Poland, Korean macrofungi), T. MAJEWSKI. KRAM-A – T. MROZIŃSKA (40 types of *Oedogoniales*). KRAM-P – M. JASIEWICZOWA, W. KOPEROWA, J. OSZAST, L. STUCHLIK, W. SZAFAER, A. ŚRODOŃ, M. ŚRODONIOWA, K. WASYLIKOWA, E. ZASTAWNIAK;

- TYPES** • about 1.400 [vascular – ca 700; bryophytes – 500; lichens – ca 100; algae – 74]

- DIRECTOR** • Prof. Dr. LEON STUCHLIK (palynotaxonomy – *Pollenmioniaceae*, Tertiary floras)

- CURATORS** • KRAM (vascular plants) – Prof. Dr. ADAM JASIEWICZ (taxonomy of vascular plants – *Hieracium*, *Euphrasia*, *Melampyrum*, *Scabiosa*, *Rhinanthus*)
KRAM-A – Doc. Dr. TERESA MROZIŃSKA (algology, world monograph of *Oedogoniales*)
KRAM-B – Doc. Dr. RYSZARD OCHYRA (Antarctic bryophytes, European mosses – taxonomy and distribution, *Amblystegiaceae* of the world, moss flora of East Africa)
KRAM-F – Prof. Dr. WŁADYSŁAW WOJEWODA (macrofungi of S Poland, *Heterobasidiomycetes* of Central Europe)
KRAM-L – Doc. Dr. JANUSZ NOWAK (lichens of Poland, *Verrucaria* in Central Europe)
KRAM-P – Doc. Dr. EWA ZASTAWNIAK (Tertiary floras of Antarctica and Central Europe)

- STAFF** • M. Sc. HALINA BEDNAREK-OCHYRA (chorology of Polish mosses, botanical illustrations, taxonomy of *Racomitrium*)
Dr. MARIA BIAŁOBRESKA (taxonomy and variability of vascular plants – *Betula*, *Fagus*)
Dr. URSZULA BIELCZYK (communities of epiphytic lichens in the Polish Carpathians)
M. Sc. ANDRZEJ CHLEBICKI (mycology – *Pyrenomyctetes* of the Polish national parks; botanical illu-

strations)

Dr. LUDWIK FREY (cytotaxonomy and chorology of grasses in Poland – *Avena*, *Avenula*, *Deschampsia*, *Koeleria*, *Trisetum*)

Doc. Dr. MARIA GOSTYŃSKA-JAKUSZEWSKA (taxonomy of vascular plants – *Crataegus*)

Dr. MAŁGORZATA GUZIKOWA (ecology and distribution of alien *Solidago* and *Reynoutria* species, synanthropic vascular plant flora of the Pieniny Mts)

Dr. ZOFIA HEINRICH – macrofungi (genus *Hypoloma*)

Dr. HALINA KOMOROWSKA (mycology – *Tricholomataceae* of Poland, myxomycetes of S Poland)

Prof. Dr. TOMASZ MAJEWSKI (taxonomy and chorology of parasitic fungi – *Uredinales*, *Ustilaginales*, *Laboulbeniales*)

Prof. Dr. JÓZEF MĄDALSKI – (emeritus) iconography of Polish vascular plants in Silesia)

Dr. ZBIGNIEW MIREK (*Camelina*, *Neslia*, biotaxonomy of *Lamium maculatum* and *L. galeobdolon* complex, *Glyceria* and *Veronica*, synanthropic flora of the Carpathians, steppe flora and vegetation of Poland, history of botany)

Dr. MARTA MIZIANTY (cytotaxonomy of genus *Dactylis* L. in Central Europe)

M. Sc. LUCYNA MUSIAŁ (biotaxonomy and ecology of the *Solidago virgaurea* – *alpestris* complex)

M. Sc. LIDIA NOWAK (*Sesleria* in Europe)

Dr. WIESŁAWA PRZYBYŁOWSKA-LANGE (algology – extant and fossil diatoms of Poland)

Doc. Dr. MARIA REYMANÓWNA – Mesozoic macrofossils

Prof. Dr. JADWIGA SIEMIŃSKA (taxonomy and chorology of algae – diatoms, *Rhodophyceae*; bibliography)

Prof. Dr. JERZY STASZKIEWICZ (taxonomy and variability of vascular plants – *Dendranthema zawadzkii*, *Picea*, *Pinus*, *Trapa*)

Dr. JANINA TRUCHANOWICZ (taxonomy and variability of trees – *Betula*, *Fagus*)

Dr. KONRAD WOŁOWSKI (algology, floristics)

Dr. JAN J. WÓJCICKI (taxonomy, variability and hybridization of vascular plants – *Prunus fruticosa*, *Saxifraga moschata* – *exarata* complex, *Trapa*)

Prof. Dr. KAZIMIERZ ZARZYCKI (ecology of vascular plants; rare and threatened species of Polish flora; sex ratio in the *Rumex acetosa* complex)

RESEARCH • fossil and contemporary flora of Poland, plants of the Balkan Peninsula, Antarctic and Arctic bryophytes, European mountain flora, ecology of threatened and expanding plant species in Central Europe, Cuban flora

LOAN • to recognized botanical institutions

EXCHANGE • available – plants – (all groups) from Poland; wanted – all groups of plants from different regions of the world (especially mountain plants from Europe and Asia)

P & S WORKS • *Polish Botanical Studies*; *Polish Botanical Studies – Guidebook Series*; *Acta Palaeobotanica*; *Fragmenta Floristica et Geobotanica*; *Bibliografie Botaniczne* (Botanical Bibliography). *Atlas Flory Polskiej i Ziemi Ościennych* (*Florae Poloniae Iconographia*); *Flora polska – rośliny naczyniowe* (*Flora of Poland – vascular plants*); *Flora Polska – rośliny zarodnikowe* (*Flora of Poland – cryptogams*); *Mał Flora Grzybów* (*Field Flora of Fungi*); *Flora Śląskowodna Polski* (*Freshwater Flora of Poland*); *Atlas rozmieszczenia roślin zarodnikowych w Polsce* (*Atlas of the geographical distribution of spore plants in Poland – Lichenes, Hepaticae, Musci*); *Flora Poloniae Exsiccata* (*vascular plants*); *Planteae Vasculares Svalbardenses Exsiccatae*; *Musci Poloniae Exsiccati*; *Bryophyta Antarctica Exsiccata*; *Bryophyta Svalbardensis Exsiccata*; *Bryophyta Africana Selecta*; *Phycotheca Polonica*; *Lichenes Poloniae Meridionalis Exsiccati*.

CUR PROCED • specimens of vascular plants are filed on herbarium sheets in metal cabinets in taxonomical order (Durand's system). Sheet size: 31 x 43,5 cm. Bryophytes are filed in envelopes in holders in metal cabinets; fungi – in envelopes, on herbarium sheets and stored in cardboard boxes in holders; lichens in envelopes, in cardboard boxes in metal cabinets

REMARKS • the collection of the Paleobotanical Museum KRAM-P (at the Department of Palaeobotany) consists of:

I. extant plants – 13.720 slides of spores and pollen (10.219 species, 3.544 genera, 287 families); 25.000 vials of seeds and fruits (11.830 species, 2.269 genera, 232 families); wood collection (205 species, 114 genera), collection of tissues (vascular plants and mosses) of peat-forming plants (234 slides); leaves collection (several thousand samples).

II. fossil plants – paleo- and mesophytic floras (7 types); Tertiary floras (9292 sites, 1.139 taxa including 66 type specimens); Quaternary floras (319 sites, 1.221 taxa including 6 type specimens). At the Department of Phycology there is the *Iconotheca* of the algae (collection of drawings and photographs of freshwater algae and fossil diatoms published in the world literature) – over 280.000 figures. Library (common property of the Institute of Botany, Jagiellonian University, and Institute of Botany, Polish Academy of Sciences) – about 130.000 volumes. In the Institute there are also stored two private collections: A. JASIEWICZ's and H. & Z. MIREK's – see chapter 'Private Herbaria', and two herbaria of historical value: J.E. GILIBERT's (XVIII century) and S.B. & J. JUNDZIŁL'S (XVIII/XIX century).

- LOAN** • only to Polish institutions
- EXCHANGE** • available – *Rosaceae*, mosses; wanted – plants from Poland
- POZNAŃ** • *Department of Forest Botany, Agricultural Academy*

in Poznań (Katedra Botaniki Leśnej, Akademia Rolnicza) – POZNF

ADDRESS • ul. Wojska Polskiego 71d, 60-625 Poznań;
tel. 22-49-01, ext. 24, 30

FOUNDATION • institution - ?; herbarium - 1920

SPECIMENS • 7.000 [vascular plants 4.000, lichens 3.000]

GEOGR AREA • regional collection

HEAD & CUR • Doc. Dr. KAZIMIERZ GLANC (lichenology)

STAFF • Dr. WŁADYSŁAW DANIELEWICZ (dendrology, *Betula carpatica*)

RESEARCH • lichenology, dendrology

CUR PROCED • specimens filed in alphabetical order on herbarium sheets in boxes in cabinets

POZNAŃ • Department of Genetics, Faculty of Biology, Adam Mickiewicz University (Zakład Genetyki, Wydział Biologii, Uniwersytet im. Adama Mickiewicza) – POZW

ADDRESS • ul. J. Dąbrowskiego 165, 60-594 Poznań; tel. 448-70

FOUNDATION • institution - 1968; herbarium - 1945

SPECIMENS • about 30.000 [*Hepaticae*]

GEOGR AREA • Polish and Holarctic liverworts

HEAD & CUR • Prof. Dr. JERZY SZWEYKOWSKI (population genetics; chorology of Holarctic liverworts; taxonomy of *Lophoziaeae*, *Jungermanniaceae*, *Marsupellaceae*, liverworts of the Tatra Mts)

STAFF • Dr. MARIA ANNA BOBOWICZ (numerical taxonomy – *Pinus* and *Conocephalum*, hybridization in *Pinus*)

Doc. Dr. MARIA KRZAKOWA (enzyme variability of natural populations – *Hepaticae*, *Pinus*, *Bromus*, *Melilotus*, *Pisum*)

Doc. Dr. WIESŁAW PRUS-GŁOWACKI (enzyme variability and serology of the *Hepaticae* and *Pinus*)

Dr. IRENEUSZ ODRZYKOWSKI (chemotaxonomy, enzyme variability of natural populations of *Conocephalum*)

Dr. LECH URBANIAK (phenolic compounds and ter-

penoids variability in natural populations of *Carex arenaria*)

RESEARCH • population genetics, taxonomy and chorology of Holarctic liverworts

LOAN • to recognized botanical institutions

EXCHANGE • available - Polish liverworts, many taxa from the Tatra Mts; wanted - any liverworts, mainly Holarctic ones

P & S WORKS • *Atlas rozmieszczenia roślin zarodnikowych w Polsce. Seria III. Wątrobowce (Atlas of the geographical distribution of spore plants in Poland. Series III. Hepaticae)*

REMARKS • POZW is a hepatic herbarium housed separately from the main University herbarium POZ.

PULAWY • *Institute of Soil Sciences and Cultivation of Plants (Instytut Uprawy, Nawożenia i Gleboznawstwa) - IUNG*

ADDRESS • Osada Pałacowa, 24-1000 Pulawy; tel. 34-21

FOUNDATION • institution - 1917; herbarium - 1891-1895

SPECIMENS • 6.000 [vascular plants]

GEOGR AREA • regional collection, mainly from territory of Poland and the European part of the U.S.S.R.

DIRECTOR • Prof. Dr. STANISLAW NAWROCKI (agriculture)

CURATOR • M. Sc. HENRYK STASIAK (floristics, plant taxonomy)

STAFF • Dr. IRENA JACKOWSKA (plant morphology, physiology)

Doc. Dr. ANNA JÓZEFACIU (grassland communities)

M. Sc. JAN PIĘTA (forest botany)

Dr. LUCYNA PUSZKAR (phytosociology)

Agricul. Eng. BOGUMIL RĘBOWSKI (decorative plants)

Dr. ADAM WOLEK (dendrology)

RESEARCH • forest and agricultural botany; dendrology

LOAN • not available at present

EXCHANGE • not carried

P & S WORKS • *Pamiętnik Puławski*

BOT GARDEN • about 2 ha; dendrological collection – about 300 taxa of trees, shrubs and climbers; collection of tulips, narcissi – about 250 cultivars

LITERATURE • KORNAŚ J., ZURZYCKI J. 1959. Botany in Poland. 35 pp. Jagiellonian University and the Polish Academy of Sciences (Cracow Centre). Cracow.
WOLEK A., STASIAK H., RĘBOWSKI B. 1987. Spis drzew i krzewów Ogrodu Puławskiego (w układzie alfabetycznym). 23 pp. Puławy

ROGÓW • Arboretum, Warsaw Agricultural University in Rogów (Arboretum, Leśny Zakład Doświadczalny SGGW-AR) – ROGA

ADDRESS • Leśny Zakład Doświadczalny SGGW-AR, 96-135 Rogów; tel. 20

FOUNDATION • institution – 1925; herbarium – 1953

SPECIMENS • 500 [vascular plants – mainly genus *Acer*; collection of cones and berry-like cones of 230 taxa]

GEOGR AREA • Holarctic dendroflora (woody plants)

DIR & CUR • Dr. JERZY TUMIŁOWICZ (dendrology and forestry, *Abies*, *Acer* and *Stewartia*)

LOAN • not available at present

EXCHANGE • not carried

P & S WORKS • *Index Seminum*

BOT GARDEN • Arboretum about 60 ha [collection of trees and shrubs – 1.900 taxa, herbaceous plants – 300 taxa]

RZESZÓW • Department of Botany, Field Faculty of Economy of Agricultural Production, H. Kollątaj Agricultural Academy in Cracow (Pracownia Botaniki, Wydział Ekonomiki Produkcji Rolniczej, Filia Akademii Rolniczej im. H. Kollątaja w Krakowie) – RZS

ADDRESS • ul. M. Ćwiklińskie 2, 35-959 Rzeszów; tel. 412-55

FOUNDATION • institution – 1973; herbarium – 1984

- SPECIMENS • about 2.000 [vascular plants]
- GEOGR AREA • local collection, mainly weedy plants
- HEAD & CUR • Dr. ZYGMUNT WNUK (agroecology)
- STAFF • M. Sc. DANUTA GRZEBYK (agroecology)
- RESEARCH • flora and vegetation of cultivated grounds in the Rzeszów Province
- LOAN • to local institutions only
- EXCHANGE • not carried

SIEDLCE • *District Museum (Muzeum Okręgowe) – SMOK*

- ADDRESS • ul. K. Świerczewskiego 1, 08-110 Siedlce; tel. 242-24
- FOUNDATION • institution – 1928 (reactivated in 1967); herbarium – 1981
- SPECIMENS • 2.000 [vascular plants]
- GEOGR AREA • local collection
- DIRECTOR • M. Sc. ZOFIA WIĘCKOWSKA (filology)
- CURATOR • M. Sc. ANDRZEJ BOHDANOWICZ (biology)
- RESEARCH • vascular plants of the Siedlce region
- LOAN • not available at present
- EXCHANGE • not carried

SIEDLCE • *Department of Botany, Teachers Agricultural College (Zakład Botaniki, Wyższa Szkoła Rolniczo-Pedagogiczna) – WSRP*

- ADDRESS • ul. B. Prusa 12, 08-110 Siedlce; tel. 252-93, 252-94
- FOUNDATION • institution – 1969; herbarium – 1971
- SPECIMENS • total 21.600 [vascular plants – 21.000; lichens – 600]
- GEOGR AREA • regional herbarium; flora of Central East Poland
- HEAD • Doc. Dr. EUGENIUSZ ĆWIKLIŃSKI (geobotany)
- CURATOR • Dr. ZYGMUNT GŁOWACKI (geobotany)
- RESEARCH • flora and vegetation of Central East Poland
- LOAN • to recognized botanical institutions

EXCHANGE • not carried

SLUPSK • *Department of Botany, Faculty of Biology, Teachers College (Zakład Botaniki, Katedra Biologii, Wyższa Szkoła Pedagogiczna) – SLTC*

ADDRESS • ul. Arciszewskiego 22, 76–200 Słupsk; tel. 72–91

FOUNDATION • institution – 1969; herbarium – 1969

SPECIMENS • about 33.000 [vascular plants – 30.000; lichens – 3.000]

GEOGR AREA • flora of Pomerania and coastal areas; regional collection, vascular plants of the Siedlce region and vascular plants of the Słupsk region

HEAD & CUR • Doc. Dr. JÓZEF MISIEWICZ (plant ecology, geobotany; vascular plants of Pomerania)

STAFF • Dr. IRENEUSZ IZYDOREK (lichens of Pomerania)

RESEARCH • vascular plant and lichen flora of Central Pomerania

LOAN • to local institutions (Polish) only

EXCHANGE • not carried

P & S WORKS • *Słupskie Prace Matematyczno-Przyrodnicze*

CUR PROCED • specimens filed in alphabetical order in boxes in holders

SOSNOWIEC • *Laboratory of Pharmaceutical Botany, Silesian Medical Academy in Katowice (Zakład Botaniki Farmaceutycznej, Śląska Akademia Medyczna w Katowicach) – SOSN*

ADDRESS • ul. Jagiellońska 4, 41–200 Sosnowiec; tel. 69–58–35

FOUNDATION • institution – 1978; herbarium – 1978

SPECIMENS • total 24.000 [vascular plants – 4.000; bryophytes – 20.000]

GEOGR AREA • regional collection, mainly plants from Silesia and the West Carpathians

HEAD • Doc. Dr. KRZYSZTOF JĘDRZEJKO (floristics – mosses and vascular plants, phytosociology, Silesian region)

- CURATOR** • Dr. J. ŻARNOWIEC (floristics, ecology, phytosociology, flora of the town of Oświęcim)
- STAFF** • Dr. H. KLAMA (liverworts of the Beskid Żywiecki)
- RESEARCH** • flora and vegetation of S Poland
- LOAN** • to recognized botanical institutions
- EXCHANGE** • available – plants from the Silesian highland and the Western Beskids; wanted – plants of S Poland
- P & S WORKS** • *Musci Macroregioni Meridionali Poloniae exsiccati*
- SZCZECIN** • Department of Botany, Faculty of Agriculture, Academy of Agriculture (Katedra Botaniki, Wydział Rolniczy, Akademia Rolnicza) – SZCZ
- ADDRESS** • ul. J. Slowackiego 17, 71–434 Szczecin; tel. 760–71, ext. 250, 252, 341
- FOUNDATION** • institution – 1955; herbarium – 1955
- SPECIMENS** • total 11.700 [vascular plants – 3.500; bryophytes – 7.000; macrofungi (*Macromycetes*) – 1.000; marine algae – 200]
- GEOGR AREA** • regional collection, mainly from West Pomerania
- HEAD & CUR** • Prof. Dr. MIECZYSŁAW JASNOWSKI (bryology, geobotany, vegetation and stratigraphy of peat bogs)
- RESEARCH** • peat bog vegetation and stratigraphy
- LOAN** • to recognized botanical institutions
- EXCHANGE** • not carried
- P & S WORKS** • *Zeszyty Naukowe Akademii Rolniczej w Szczecinie*
- CUR PROCED** • specimens filed in taxonomical order on herbarium sheets in cabinets or in cardboard boxes in holders. Sheet jacket size: 29 x 42 cm (vascular plants) and 14.5 x 21 cm (bryophytes)
- REMARKS** • additional collection about 140 slides of European *Sphagnum* species (each species represented by 3 slides)
- SZCZECIN** • Department of Plant Pathology, Academy of Agriculture, Szczecin (Katedra Fitopatologii, Akademia Rolnicza w Szczecinie) – SZPA

ADDRESS • ul. Słowackiego 17, 71-434 Szczecin; tel. 760-71 ext. 229

FOUNDATION • institution - 1954; herbarium - 1982

SPECIMENS • 1.110 [vesicular-arbuscular mycorrhizal fungi (*Endogonaceae*) and E-strain ectendomycorrhizal fungi from Poland, Germany and Czechoslovakia]

DIRECTOR • Doc. Dr. TADEUSZ MADEJ (plant ecology)

CURATOR • Dr. JANUSZ BLASZKOWSKI (plant pathology, taxonomy of the *Endogonaceae*)

RESEARCH • taxonomy, occurrence and geographic distribution of the *Endogonaceae* in Poland

LOAN • to recognized botanical institutions

EXCHANGE • available and wanted - any specimens of *Endogonaceae*

P & S WORKS • *Zeszyty Naukowe Akademii Rolniczej w Szczecinie*

CUR PROCED • Specimens are mounted on microscopic slides in polyvinyl alcohol solutions, with or without lactophenol and in formaldehyde in small vials

REMARKS • all specimens are stored in the Department of Plant Pathology

SZCZECIN • *Department of Botany, Szczecin University (Zakład Botaniki, Uniwersytet Szczeciński) - SZUB*

ADDRESS • ul. Felczaka 3a, 71-412 Szczecin; tel. 23-01-28

FOUNDATION • institution - 1986; herbarium - 1987

SPECIMENS • about 5.000 [vascular plants]

GEOGR AREA • regional collection (plants of the Szczecin and Kielce regions)

HEAD • Prof. Dr. TADEUSZ GŁAZEK (phytosociology, floristics)

RESEARCH • flora and vegetation of the Szczecin region

LOAN • to recognized botanical institutions

EXCHANGE • not carried

CUR PROCED • specimens are filed on herbarium sheets and in boxes. Sheet size: 31 x 43 cm

TORUŃ • *Institute of Biology, Nicolaus Copernicus University
(Instytut Biologii, Uniwersytet im. Mikołaja Kopernika) – TRN*

ADDRESS • ul. J. Gagarina 9, 87-100 Toruń; tel. 134-53

FOUNDATION • institution – 1945; herbarium – 1946

SPECIMENS • total 196.500 including some paratypes [vascular plants – 190.000; bryophytes – 3.500; lichens – 3.000]

GEOGR AREA • mainly vascular plants from Europe

IMPORT COLL • collection of the former Gdańsk Museum, J. ZABŁOCKI's (7.500) and RIENER's (3.850) collection plants from Japan

DIRECTOR • Prof. Dr. KLEMENS KĘPCZYŃSKI (phytosociology, floristics)

CURATOR • Dr. WANDA GUGNACKA-FIEDOR (taxonomy of vascular plants)

STAFF • Dr. URZSULA BOIŃSKA (taxonomy of vascular plants)

Dr. MARIAN BOIŃSKI (floristics – vascular plants)

Doc. Dr. MIROSLAWA CEYNOWA-GIEŁDOŃ (plant taxonomy)

Doc. Dr. MARIAN REJEWSKI (aquatic plants)

RESEARCH • flora and vegetation of N and Central Poland (vascular plant taxonomy)

LOAN • to recognized botanical institutions

EXCHANGE • available – plants from N and Central Poland; wanted – vascular plants, bryophytes and lichens of the Holarctic.

P & S WORKS • *Acta Universitatis Nicolai Copernici, Seria Biologia; Exsiccata Toruniensis*

CUR PROCED • Specimens are mounted on herbarium sheets and stored in cardboard boxes in wooden cabinets in taxonomical order. Sheet size: 28.5 x 42.5 cm

REMARKS • type specimens are stored with the rest of collection under basionyms

LITERATURE • KORNAŚ J., ZURZYCKI J. 1959. Botany in Poland. 35 pp. Jagiellonian University and the Polish Academy of Sciences (Cracow Centre). Cracow.

WALBRZYCH • *Regional Museum (Muzeum Okręgowe) – WALM*

ADDRESS • ul. 1-go maja 9, 58-300 Wałbrzych; tel. 248-45

FOUNDATION • institution – 1947; herbarium – 1908

SPECIMENS • 6.000 [fossil plants]

GEOGR AREA • Silesian fossil plants

IMPORT COLL • FRANZ ZIMMERMANN'S collection

DIRECTOR • M. Sc. STANISLAW ZYDLIK (law)

CURATOR • M. Sc. MAREK PAKIET (paleozoology)

STAFF • M. Sc. EUROZYN SAGAN (emeritus)

LOAN • not available at present

EXCHANGE • not carried

REMARKS • the other part of ZIMMERMANN'S collection is stored in the Institute of Geological Sciences, Wrocław University. For further information see also SAGAN E., 1983. *Atlas roślin karbońskich (na podstawie zbiorów Muzeum Okręgowego w Walbrzychu) Rośliny skrzypowe (Equisetophyta)*. 80 pp. Wałbrzych

WARSZAWA • *Department of Systematics and Phytogeography, Institute of Botany, Warsaw University (Zakład Systematyki i Geografii Roślin, Instytut Botaniki, Uniwersytet Warszawski) – WA*

ADDRESS • Al. Ujazdowskie 4, 00-478 Warszawa; tel. 28-75-15

FOUNDATION • institution – 1919; herbarium – 1919

SPECIMENS • 300.700 [vascular plants – 205.000, bryophytes – 50.000, fungi and myxomycetes – 28.700, lichens – 11.000, algae – 6.000]

GEOGR AREA • world-wide, all groups from the Holarctic and Africa

IMPORT COLL • vascular plants – F. BŁOŃSKI, F. KARO, S. KRUPKO (Africa, SW Asia), K. LAPCZYŃSKI, K. DRYMMER, T. WIŚNIEWSKI, B. HRYNIEWIECKI, J. ZABŁOCKI (*Carex* and *Viola*), H. CZECZOTT (Crimea); – bryophytes T. CHAŁUBIŃSKI reference herbarium to *Enumeratio muscorum frondosorum tatrenseum hucusque cognitorum*, G. L. RABENHORST, T. WIŚNIEWSKI (Africa); fungi – W. and J. ZABŁOCKI,

L. GARBOWSKI, A. MICHALSKI, K. DRYMMER

- DIRECTOR** • Doc. Dr. ANDRZEJ BATKO (aquatic microfungi, numerical taxonomy)
- CURATOR** • M. Sc. MIROSŁAWA KOPIJ (vascular plants)
- STAFF** • Dr. ALICJA BOROWSKA (fungi – *Deuteromycetes*)
Dr. WANDA RUDNICKA-JEZIERSKA (fungi)
Prof. Dr. ALICJA SKIRGIELLO (emeritus) (macrofungi, vascular plants)
Dr. HANNA SZYMAŃSKA (algae – *Chlorophyta*)
Dr. JANINA ZIELIŃSKA (lichens)
- RESEARCH** • taxonomy and chorology of cryptogams, mainly fungi
- LOAN** • to recognized botanical institutions
- EXCHANGE** • *available* – plants of all groups, chiefly from Poland;
wanted – plants of all groups, preferably from Asia
- CUR PROCED** • specimens are mounted on herbarium sheets and stored in taxonomical (fungi according Ainsworth's system; vascular plants according Engler's system) or alphabetical order in cardboard boxes in holders.
Sheet size: 28.5 x 45.5 cm
- BOT GARDEN** • Botanical Garden of the Warsaw University is a separate administrative unit
- LITERATURE** • KORNAŚ J., ZURZYCKI J. 1959. Botany in Poland. 35 pp.
Jagiellonian University and the Polish Academy of Sciences
(Cracow Centre). Cracow.
- WARSZAWA** • *Museum of the Earth, Division of Palaeobotany, Polish Academy of Sciences (Muzeum Ziemi, Dział Paleobotaniki, Polska Akademia Nauk) – WAME*
- ADDRESS** • Al. Na Skarpie 20/26 i 27, 00-488 Warszawa; tel.
29-80-61
- FOUNDATION** • institution – 1948; herbarium – 1948
- SPECIMENS** • total 6.792 [leaves of vascular plants – about 2.000 samples; carpological collection – 2.120 samples; collection of epithelia – about 1.000 slides; collection of pollen and spores – 1.672 slides]
- GEOGR AREA** • comparative collection of plants from various regions
- DIRECTOR** • Prof. Dr. KRZYSZTOF JAKUBOWSKI

HEAD & CUR • Dr. ANNA HUMMEL (palaeobotany)

LOAN • not available at present

EXCHANGE • not carried

WARSZAWA • *Department of Plant Pathology, Faculty of Horticulture, Warsaw Agricultural University (Katedra Fitopatologii, Wydział Ogrodnictwa SGGW) – WAUF*

ADDRESS • ul. Nowoursynowska 166, 02-766 Warszawa;
tel. 43-90-41, ext. 11-12, 11-15

FOUNDATION • institution – ?; herbarium – ?

SPECIMENS • about 5.000 (pathogenic microfungi)

GEOGR AREA • collections from Europe, Asia and N America (chiefly
Peronosporales, Uredinales and *Ustilaginales*)

IMPORT COLL • A. WRÓBLEWSKI, W. SIEMASZKO, J. KOCHMAN,
T. MAJEWSKI

DIRECTOR • Prof. Dr. ZBIGNIEW BORECKI

STAFF • Dr. RYSZARD DZIĘCIOŁOWSKI

Prof. Dr. JÓZEF KOCHMAN (emeritus)

Dr. JOANNA MARCINKOWSKA

Doc. Dr. BOGDAN NOWICKI

Dr. Czesław ZAMORSKI

RESEARCH • diseases of cultivated and ornamental plants

LOAN • to recognized botanical institutions

EXCHANGE • available – *Mycotheca Polonica*; wanted – pathogenic
microfungi from Europe, Asia and N America

CUR PROCED • specimens are stored in envelopes in cardboard boxes
in wooden cabinets

WROCŁAW • *Department of Botany and Plant Physiology, Academy of Agriculture (Katedra Botaniki i Fizjologii Roslin, Akademia Rolnicza) – WRAB*

ADDRESS • ul. Cybulskiego 32, 50-205 Wrocław; tel. 21-25-64

FOUNDATION • institution – 1945; herbarium – 1945

SPECIMENS • total 12.100 [vascular plants – 10.000; bryophytes –
1.000; lichens – 1.000; algae – 100]

- GEOGR AREA** • local collection, chiefly from the Lower Silesia and the Sudetes, bryophytes and vascular plants from peat bogs of Poland
- IMPORT COLL** • type material of *Ducellieria corcontica* Mat. (alga)
- HEAD** • Prof. Dr. JERZY FABISZEWSKI (plant ecology, lichens)
- CURATOR** • Dr. BRONISŁAW WOJTUŃ (plant ecology, *Sphagnum*)
- STAFF** • Dr. JAN MATUŁA (algae)
Dr. JERZY ZABAWSKI (fungi, myxomycetes)
- RESEARCH** • plant physiology, ecology, floristics
- LOAN** • to recognized institutions only (on the territory of Poland)
- EXCHANGE** • *available and wanted* – species of genus *Sphagnum*
- CUR PROCED** • specimens are filed on herbarium sheets and stored in cardboard boxes in holders in alphabetical order.
Sheet size: 26 x 42 cm
- REMARKS** • there are two separate collections in the herbarium:
J. FABISZEWSKI's collection of liches and vascular plants from eastern Canada and seeds of *Carex* species (about 2.000 samples) curated by Doc. Dr. ADAM PAŁCZYŃSKI
- WROCŁAW** • *Department of Phytopathology, Academy of Agriculture (Katedra Fitopatologii, Akademia Rolnicza)*
– **WRAF**
- ADDRESS** • ul. Cybulskiego 32, 50-205 Wrocław; tel. 22-97-21
- FOUNDATION** • institution – 1946; herbarium – 1956
- SPECIMENS** • over 2.000 (microfungi);
- GEOGR AREA** • microfungi of Poland
- HEAD & CUR** • Prof. Dr. WANDA TRUSZKOWSKA (phytopathology, mycology – *Pyrenomyces*)
- RESEARCH** • taxonomy and chorology of *Pyrenomyces* and *Deuteromyces* in Poland
- LOAN** • to recognized botanical institutions

- WROCŁAW** • *Museum of Natural History, University of Wrocław
(Muzeum Przyrodnicze, Uniwersytet Wrocławski)
- WRSL*
- ADDRESS** • ul. H. Sienkiewicza 21, 50-335 Wrocław; tel. 250-41
- FOUNDATION** • institution - ?; herbarium - 1821
- SPECIMENS** • total 400.000 [vascular plants - 350.000; bryophytes, lichens, fungi and myxomycetes altogether - 50.000]
- GEOGR AREA** • worldwide, all systematic groups
- IMPORT COLL** • P. ASCHERSON, C.G. BAENITZ, J. BORNMÜLLER, H. ENGLER, H. HANDEL-MAZZETTI, J. M. HILDERBRANDT, F. K. KARO, A. KRAWIEC, H. KRZEMIENIEWSKA, herbarium K. A. G. LAUTERBACH (50.000 specimens), F. KERN, K. G. LIMPRICHT, J. MILDE, F. PAX, G. L. RABENHORST, B. SCHRÖDER, J. SCHRÖTER, T. SCHUBE, P. SYDOW, R. UECHTRITZ, H. WINKLER
- DIRECTOR** • Prof. Dr. ANDRZEJ WIKTOR (malacology)
- HEAD** • Doc. Dr. JERZY HRYNKIEWICZ (dendrology)
- CURATOR** • Dr. WANDA STOJANOWSKA (myxomycetes)
- STAFF** • M. Sc. EDWARD KOZIOŁ (algae)
- RESEARCH** • flora of Silesia
- LOAN** • to recognized botanical institutions
- EXCHANGE** • available - *Flora Silesiaca Exsiccata*; wanted - all systematic groups from various regions of the world
- P & S WORKS** • *Flora Silesiaca Exsiccata; Katalog zbiorów Zielenika Muzeum Przyrodniczego Uniwersytetu Wrocławskiego; Acta Universitatis Wratislaviensis, Prace Botaniczne*
- CUR PROCED** • specimens are mounted on herbarium sheets and stored in cardboard boxes in taxonomical order (Engler's system). Sheet size: 24 x 39 cm (old Silesian herbarium) and 26 x 42.5 cm (the rest)
- BOT GARDEN** • Botanical Garden of Wrocław University, ul. Sienkiewicza 23. The garden is separate administrative unit
- REMARKS** • excluding above mentioned, there are stored two separated collections: 1 - Lower Silesian myxomycetes

(W. STOJANOWSKA); 2 – collection of timber (wood) samples – 1.000. Moreover there is also historical SYLWIUSZ BOCCONE herbarium (XVII century)

ZAKOPANE • *Tytus Chałubiński Tatra Museum (Muzeum Tatrzanskie im. Tytusa Chałubińskiego) – ZAMU*

- ADDRESS** • ul. Krupówki 10, 34-500 Zakopane; tel. 52-05
- FOUNDATION** • institution - 1888; herbarium - about 1890
- SPECIMENS** • total 7.367 [vascular plants - 5.800; bryophytes - 679; lichens - 151; fungi and myxomycetes - 112, algae - 25 and 600 slides of mosses]
- GEOGR AREA** • local collection; plants from the Tatra Mts and Subtatic region - all taxonomical groups
- IMPORT COLL** • mosses of T. CHAŁUBIŃSKI
- DIRECTOR** • M. Sc. TADEUSZ SZCZEPANEK
- CURATOR** • M. Sc. MAŁGORZATA GĄSIENICA-SZOSTAK
- LOAN** • not available at present
- EXCHANGE** • not carried
- P & S WORKS** • *Rocznik Podhalański*
- CUR PROCED** • Specimens are filed on herbarium sheets or in jackets in wooden cabinets in taxonomical order. Sheet size: 30.5 x 43 cm, 31.5 x 47 cm
- ZAKOPANE** • *Tatra Field Station, Department of Nature Protection and Natural Resources, Polish Academy of Sciences (Tatrzańska Stacja Terenowa, Zakład Ochrony Przyrody i Zasobów Naturalnych, Polska Akademia Nauk) - ZTS*
- ADDRESS** • Antałówka 7, 34-501 Zakopane; tel. 26-51
- FOUNDATION** • institution - 1951; herbarium - 1951
- SPECIMENS** • total 11.080 [vascular plants - 8.500; bryophytes - 1.450; fungi - 130]
- GEOGR AREA** • regional collection, mainly vascular plants of the Tatra Mts and Subtatic region
- HEAD & CUR** • Dr. HALINA PIĘKOŚ-MIRKOWA (variability, distribution and ecology of rare, endangered and endemic species in the West Carpathians; biotaxonomy and distribution of pteridophytes - *Dryopteris* in the Holarctic, *Cystopteris* and *Polystichum*; Atlas of the distribution of vascular plants in the Tatra Mts)
- STAFF** • M. Sc. HANNA KUCIEL (ecology of *Crocus*)
- RESEARCH** • flora and vegetation of the Tatra Mts and Subtatic

Region – taxonomy, distribution and ecology. Rare, endangered and endemic species of the Tatra region

LOAN • to recognized botanical institutions and private individuals

EXCHANGE • *available* – vascular plants of the Carpathians; *wanted* – vascular plants of the mountains of Europe

P & S Works • *Index Seminum*

BOT GARDEN • *M. Raciborski Mountain Botanical Garden* in Zakopane - 0.2 ha. Specialized in *ex situ* protection of rare, endemic and endangered species of the Tatra Mts and Podhale Region. Contains over 600 Tatra's vascular plant species. Open for public

REMARKS • additional collections of seeds: over 1.000 species from the Tatra Mts and Subtropic region.

PRIVATE HERBARIA

GRZEGORZEK PIOTR (hb. Grz.)

ADDRESS • *Museum in Chrzanów (Muzeum w Chrzanowie)*,
ul. A. Mickiewicza 13, 32-500 Chrzanów; tel.
51-73

SPECIMENS • 3.300 (vascular plants 300, macrofungi 3.000)

GEOGR AREA • local collection — chiefly fungi from the Silesian
highland

LOAN • not available at present

JASIEWICZ ADAM (hb. Jas.)

SPECIMENS • about 40.000 (vascular plants)

GEOGR AREA • plants from many European countries, Mexico,
Turkey, and China

LOAN • to recognized botanical institutions

REMARKS • stored in KRAM

KORNAŚ JAN, MEDWECKA-KORNAŚ ANNA (hb. Korn.)

SPECIMENS • about 40.000 (vascular plants)

GEOGR AREA • plants from Poland (rich collection from the
Carpathian Mts), many European countries, the
Caucasus, North America and tropical Africa
(rich collection of pteridophytes)

LOAN • to recognized botanical institutions

REMARKS • stored in KRA

MĄDALSKI JÓZEF (*hb. Mąd.*)

- SPECIMENS • about 40.000 (vascular plants)
- GEOGR AREA • plants of Europe (rich collection from E Europe and Silesia) and N America
- LOAN • to recognized botanical institutions
- REMARKS • stored in the Laboratory of the Polish Flora Iconography of the Institute of Botany, Polish Academy of Sciences, ul. Podwale 75, 50-449 Wrocław

MIREK ZBIGNIEW, PIEKOŚ-MIRKOWA HALINA (*hb. Mir.*)

- SPECIMENS • about 30.000 (vascular plants)
- GEOGR AREA • flora of Polish and European mountains; rich collection of grasses and pteridophytes
- LOAN • to recognized botanical institutions and private individuals
- REMARKS • stored in KRAM

RADWAŃSKA-PARYSKA ZOFIA (*hb. Par.*)

- SPECIMENS • 3.500 (vascular plants)
- GEOGR AREA • local collection – the Tatra Mts and Podhale region
- LOAN • not available at present
- REMARKS • stored in private house: Koziniec 1, 34-501 Zakopane

SENDEK ANDRZEJ (*hb. Sen.*)

- SPECIMENS • 3.500 (vascular plants)
- GEOGR AREA • plants from Silesia
- LOAN • only to Polish institutions

REMARKS • stored in: Faculty of Biological Sciences, Physical Training Academy; ul. Mikołowska 72a, 40-065 Katowice; tel. 51-70-70

SULMA TADEUSZ (hb. Sul.)

SPECIMENS • several thousands.

GEOGR AREA • lichens from Poland and adjacent territories

LOAN • not available at present

REMARKS • stored in GDMA

ŻUKOWSKI WALDEMAR (hb. Żuk.)

SPECIMENS • about 10.000 (vascular plants)

GEOGR AREA • vascular plants from the Drawsko region

LOAN • to recognized botanical institutions

REMARKS • stored in POZ

Publications for sale or exchange
by the
W. Szafer Institute of Botany, Polish Academy of Sciences
& Institute of Botany, Jagiellonian University

Acta Paleobotanica A journal published twice a year now in its 30th volume. It contains research papers concerned with all topics of palaeobotany.

Fragmenta Floristica et Geobotanica A journal published four times a year, established in 1953, now in its 35th volume. It publishes papers of relevance to the taxonomy, phytogeography, phytosociology, anatomy, biosystematics, cytology, ecology, and phytochemistry of all plant groups.

Universitas Jagellonica Acta Scientiarum Litterarumque, Folia Botanica (Zeszyty Naukowe Uniwersytetu Jagiellońskiego, Prace Botaniczne) Published one-several volumes a year, journal now in its 20th volume. It contains articles and monographs in all topics of the botany.

Flora Polonicae Terrarumque Adiacentium Iconographia (Atlas Flory Polskiej i Ziemi Ościennych) Series established in 1930 to present full illustrations and descriptions of all plants growing spontaneously and subs spontaneously in Poland and adjacent territories, including Lithuania, Byelorussia, the Western Ukraine, and the East Carpathians. Published irregularly in volumes each including a various numbers of parts. Each part is loose-leaf in a folder [in Latin & Polish].

Atlas of the Geographical Distribution of Spore Plants in Poland (Atlas Rozmieszczenia roślin zarodnikowych w Polsce) Established in 1962 to present distribution maps of all groups of spore plants in Poland including algae, fungi, lichens, liverworts, and mosses. For every species there is an account of the distribution and ecology in Poland with notes on extra-Polish distribution in English and Polish and generalized distribution maps in the world, Holarctic, and Europe. Each part is loose-leaf in a folder including ten species. So far maps for 90 species of lichens, 100 species of hepatic, and 50 species of mosses have been published.

Flora of Poland, Vascular Plants of Poland and Adjacent Territories (Flora Polska, Rośliny naczyniowe Polski i Ziemi Ościennych) Completed in 14 volumes published in 1919-1980. This flora presents descriptions of all native species and established aliens of vascular plants in Poland and adjacent territories, including Lithuania, Byelorussia, the Western Ukraine, and the East Carpathians, [in Polish].

Flora of Poland, Spore Plants of Poland and Adjacent Territories (Flora Polska, Rośliny Zarodnikowe Polski i Ziemi Ościennych) This flora published irregularly since 1957 is designated to present descriptions and illustrations of all species of algae, liverworts, mosses, myxomycetes, fungi and lichens of Poland and adjacent territories. So far one volume of algae, two of mosses, one of hepatic, one of myxomycetes, five of lichens, and eighteen of fungi have been completed, [in Polish]

Field Flora of Fungi (Mala Flora Grzybów) Published irregularly, this compilation is designated to present descriptions and keys for determination of world fungi species. Six volumes have already appeared, [in Polish].

Freshwater Flora of Poland (Flora Stokwodna Polski) Published at irregular intervals since 1963, this series is devoted to descriptions and illustrations of all plant groups growing in fresh water in Poland. To date 14 of 18 planned volumes have been published including treatments of hepatic, mosses, and most groups of algae, some of which having two different editions, [in Polish].

Botanical Bibliographies (Bibliografie Botaniczne) Published irregularly, this series was established in 1983 to present a full list of publications dealing with all plant groups by Polish botanists as well as all publications covering territory of Poland by foreign authors. So far bibliography of lichens, fungi, and algae have been compiled.

Detailed catalogue including all publications available from W. Szafer Institute of Botany of the Polish Academy of Sciences & Institute of Botany of the Jagiellonian University will be sent on request. All inquiries regarding subscriptions, purchase and exchange of the above publications should be directed to: The Library, W. Szafer Institute of Botany, Polish Academy of Sciences, Lubicz 46, PL-31-512 Kraków, Poland.
